39—Kt to R 4 ch.	39—K takes Kt (x)
40—P takes P (v)	40—K to Kt 5
41—R to R sq. ch.	41—K to B 4
42—K R to Kt sq. ch.	42—K takes P
43—R to R 5 ch.	43—K to B 4
44—R to R 4 ch.	44—K to B 5
45—R to R 5 ch.	45—K to B 4
46—R to R 4 ch.	46—K to B 5
47—R to R 5 ch.	47—K to B 5
48—R to R 4 ch.	Draw (y)

(a) This variation was played by the late W. H. K. Pollock v. Schiffrs in the Hastings Tournament. Tchigorin v. Charousek, in the Budapest Tournament, played 5—Castle, B to B 4; 6—P to K 5, P to Q 4; 7—P takes Kt, &c., the Max Lange continuation.

(b) The theoretical variation.

(c) 6—B to Kt 3, as in a similar form of the Scotch Gambit, seems preferable, yielding more scope for complications.

(d) This is also the best continuation, 6..... Kt takes B would be to White's advantage.

(e) 8..... Kt takes B; 9—Q takes Kt, P to Q 3; 10—Kt to B 3, B to K 3, is the alternative; but White would then have perhaps the better developed game owing to the unfavourable position of Black's queen.

(f) 11—P to B 4 would let the Kt into play, viz., 11..... Kt to Kt 5; (and if) 12—P to B 3, then 12..... Kt takes P; 13—K takes Kt, Q to R 5, ch, and wins.

(g) Compulsory. He cannot allow this Bishop to bear upon the Q P nor the advance of the K P.

(h) 15—Kt to Q 5 looks tempting, but Black has a valid defence.

(i) Black's position having now improved (he has retained two bishops with more elbow-room than a few moves back), White might change queens and secure a draw. Or, if the queen retires, Q to K 3 would have been better.

(j) Threatening P to Q 4 and B to Q B 4.

(k) We do not see the utility of this move.

(l) 20—B to Q 3 gives Black's queen a square at Q 5, and, if 20—B to R 2, Black Castles Q R, as the K B P could not be captured by White because of Q R to B sq.

(m) He has to exchange queens now less favourably than when Black proposed it with 15..... Q to K 4.

(n) White has now to be on the defensive, and Black, after 24..... P to Q 4, remains with a majority of pawns on the queen's side and two active bishops.

(o) Probably not the best. Mr. Pillsbury, however, seems to have been determined upon the subsequent advance on the queen's side. 29..... P to Q 5; 30—P takes P, R takes P, followed by K R to Q sq, seems preferable.

(p) To support eventually the Q P, now somewhat weak.

(q) 35..... P to Kt 6; 36—B to Kt sq, B to K

6; 37—Kt to Q 4, B takes Kt; 38—R takes B and White's game is quite safe, and he could eventually advance on the king's side.

(i) He must keep the Black's Q R occupied in guarding the Q P. He has, besides, the subsequent combination, which saved his game, in view.

(c) Intending the advance of the Q P, he should not have placed the king upon a White diagonal, because of check with the B.

(t) A fine combination, which saves the game.

(u) If K to Kt 3; 39—Kt to R 4 ch, K to R 4; 40—P takes P, and whether 40..... K takes Kt, or B takes P, White can draw the game.

(v) This move came as a surprise no doubt to Pillsbury as well as to most of the spectators.

(x) If 40..... B takes P then 41—R to Kt sq, ch, K takes Kt; 42—R to Kt 7 and wins.

(y) The latter part of the game is a fine piece of strategy on the part of Blackburne.

GAME No. 688. (RUY LOPEZ.)

WHITE.	BLACK.
J. W. Showalter.	C. D. Locock.
1—P to K 4	1—P to K 4
2—K Kt to B 3	2—Kt to Q B 3
3—B to Kt 5	3—Kt to B 3
4—Castles.	4—Kt takes P
5—P to Q 4	5—B to K 2
6—Q to K 2	6—Kt to Q 3
7—B takes Kt	7—Q P takes B (a)
8—P takes P	8—Kt to B 4

12—P to Kt 5	12—P to K Kt 3 (d)
13—Kt to B 3	13—Q to K 2
14—Q to K 4	14—B takes P
15—R takes B	15—K takes R
16—Q to Kt 4 ch.	16—Q to K 3
17—Q to Q 4 ch. (e)	17—R to B sq.
18—B takes B (f)	18—P to Kt 3
19—B to B 6	19—R to K sq.
20—P to Q R 4	20—P to Q R 4
21—R to Q sq.	21—P to R R 3
22—K to Kt 2	22—R to K Kt sq.
23—P to R R 3	23—P to K Kt 4
24—Kt to K 2	24—K to Kt 2
25—P to Kt 3	25—R to Kt 3
26—Q to K Kt 4	26—Q takes Q ch.
27—P takes Q	27—R to K sq.
28—Kt to Kt 3	28—K to B sq.
29—Kt to B 5	29—R takes B
30—P takes R	30—R to K 3
31—Kt to K 7 ch.	31—K to Kt 2
32—Kt to Kt 8	32—K to B sq.
33—K to B 3	33—P to Kt 4
34—R to Q R sq.	34—P to Kt 5
35—R to Q sq.	35—P to B 4
36—R to Q 5	36—Resigns.

(a) Well-known, and by Mr. Locock himself, to be fatal if continued as by Showalter above. The right move is 7..... Kt P takes P.

(b) This move disproves the variation adopted by Mr. Locock.

(c) The only move. If 10..... Kt to R 3, then 11..... P to K 6, P takes P; 12—Kt to K 5 winning a piece.

(d) If 13..... B takes P, then 13—P to K 6, P takes P; Q to R 5, ch., &c., and it in answer to 13—P to K 6, 13..... B takes B, then 14—P takes B, ch, K to B 3; 15—Q to K 8, ch, Q takes Q; 16—P takes Q=Q, ch, R takes Q; 17—R takes B &c. The alternative therefore is 12..... P to K R 4; 13—P to K 6, P takes P; 14—Q to K 4, B takes P, ch, 15—K takes B, Castles, ch; 16—K to Kt sq, Q to K 2, with the possibility of a better fight than in the actual game.

(e) Driving the King back, thus keeping Black Rooks separated.

(f) The remainder is of no interest, White having an easily won game.

61—B to K 6 ch	61—K to R sq.
62—R to B 4	62—R to B sq., ch
63—B to B 7	Resigns.

(a) It is not absolutely necessary to withdraw the Bishop. 5..... Kt to B 3 may be played.

(b) A lost move. In the majority of the positions White after Castling has to play the King, therefore R 2 is a handy square for it afterwards.

(c) Having pinned the knight, it is better to take it off than retire the B.

(d) Black is already embarrassed in development. Under the circumstances he might have castled Q R, trying for a possible counter attack on the King's side. At Q sq the Knight has no prospect of coming into play again if White simply plays P to Q 4 and P to Q 5.

(e) The alternative would have been 13..... B to Kt 5, followed by Kt to Q 2; P to K B 3; and Kt to B 2.

(f) If 15..... Q takes P, then 16—R takes Kt, followed by Q takes B, &c.

(g) There seems to be no objection to B takes B P at once. The pawn at Q 5 keeps the Q Kt confined.

(h) Obviously if 22 Q takes Q the Exchange is lost.

(i) More forcible would have been 32—R to K 8, ch, K to R 2; 33—P to R 4 Kt to K 3; 34—B to K 4, ch, P to Kt 3; 35—B to Q B 3, Kt to Kt 2; 36—P to R 5 threatening P takes P, ch and R to K 7.

(j) If necessary he could have saved the pawn by R to K sq, ch, and attacking the knight.

(k) The remainder is plain sailing.

GAME No. 690. QUEEN'S PAWN OPENING.

29—Kt to Q sq.
30—B to K 2
31—K to B 2
32—Q to B 5
33—K to Kt 3
Resigns.

(a) The well-known "Stoneware" variation of this opening, introduced by the late Mr. Ware, of Boston. Herr Lipke revived it at the Leipzig Congress, 1894.

(b) Lipke played this move against Schlechter, the intention being to sacrifice this Kt after Black Castled with Kt to Kt 5, P to R 3, P to K R 4, &c.

(c) We prefer 7..... B to Q 2: 8—Castles, P takes P, followed by R to Q B sq., and Castles.

(d) Not necessary. 9..... P takes P at once would have delayed White's Kt to K 5.

(e) Compulsory. If 11—P takes P, a pawn is lost with 11..... B takes Kt; 22—P takes B, Kt takes K P.

(f) Perhaps it would have been preferable to Castle KR. If 13—P to B 5, then 13..... Kt to B 3, threatening P to K 4.

(g) Black could have still kept a safe game with 13..... P to B 4, followed by Kt to B 3 and then Kt to K 5.

(h) This is decidedly bad, and given him the inferior game. He had nothing better again than 15..... P to B 4; Kt to B 3; and Kt to K 5.

(i) There is an alternative variation with 16..... Q to B 2; 17—P takes P, R takes P; 18—B to B 5, R to K 2; 19—Q R to K sq., K R to K sq., &c.

(j) Here might be suggested 18..... K R to B sq; 19—Q to Kt 5, Kt to K 2, followed by Q to B 3. Temporarily he would not have lost a pawn.

(k) To take the pawn or to leave it is equally bad. Black's game is disorganised and should be lost, but it would have been better to submit to the loss of the Q P and defend the B P with R to B sq. He might have made a better fight even afterwards, but he could not have saved the game. Mr. Barry played very well.

Good News!

It seems that neither Steinitz or Mackenzie are dead after all! Are all Chess players destined to read their own obituary notices? *Absit Omen!*

PASSENGERS.

ARRIVED.

Per American steamer *City of Peking*, from Hongkong via ports:—Mr. Mende, Capt. J. W. Lee, Miss M. Sutherland, Miss M. Shea, Mr. A. Brown, Mr. Chas. Rodgers, Mr. W. A. Main, Mr. E. W. Blodgett, Mrs. R. M. Smith and son, Mr. F. E. B. to, Mrs. J. Lewis, Mr. and Mrs. Kragh and 2 children in cabin. For San Francisco:—Com. Mackenzie, U.S.N., Mr. F. Freeman, Mr. W. H. Stanley, Mrs. Anderson, Rev. and Mrs. Deans and 3 children, Rev. and Mrs. Webster and infant, Mr. E. F. Eckhardt, Dr. W. H. Abercrombie, Messrs. T. D. Baldwin, D. W. Todd, J. R. Monaghan, Macgillivray and W. C. Davidson in cabin.

Per British steamer *Verona*, from Hongkong, via ports:—Mr. A. Bevington, Mr. Crowe, Mr. and Mrs. Home Cook, Miss Smith, Mr. and Mrs. Grey Smith, Mr. and Mrs. Abell, Miss Henderson, Rev. A. Bunker, Miss Pettly, Mr. Simons, Surg. E. T. Meagher, R.N., Mr. Meyericks, Miss Williams, Mrs. Swaine, and Mr. Tsang Moi Tin in cabin.

Per British steamer *Japan*, from London via ports:—Mr. and Mrs. Miss Troup, Miss Hill, Mrs. Crowley, Mrs. Allen, Mr. and Mrs. Rutherford, Messrs. English, Arnold, and Miss Leslie Arnold in cabin.

Per Japanese steamer *Kobe Maru*, from Shanghai via ports:—Capt. N. Kashiwazaki, Capt. K. McIvor, Capt. H. Tanaka, Lieut. H. Kawase, Lieut. K. Machida, Mrs. M. Uyematsu, Mrs. Goetz, Miss Grey Le Mars, and Mr. C. S. Averill in cabin; Mr. and Mrs. F. C. Schatzchen, Miss T. Ishiguro, Messrs. H. Kawamura, M. Senga,

V. Inada, M. Togoku, C. F. Gibb, and H. S. Hamada in 2nd class; 62 in steerage.

DEPARTED.

Per French steamer *Salazie*, for Shanghai, via Kobe:—Mr. Hubert Owen, Mr. Bouguin, Mr. Flood, Count and Countess Von Rothenburg, Mr. H. B. Smithers, Dr. C. Schulten, Mr. J. P. Reid, Mr. Denys Larrieu, Miss N. Johnstone, Messrs. Chan Yan Poy, J. Olmstead, James Douglas, Yeung Foox Cho, W. H. Brown, l'Abbé P. Rey, G. Robson, S. Todo, Ayub Galayni, Tobias and child, G. W. Bennett, G. Oddie, Baron and Baroness Hayashi and servant, Mr. L. Van de Polder, Mrs. Van de Polder, Mr. K. Otchitai, Mrs. Parsons, 2 children and amah, Mr. Abily, Mr. N. Yamagata, and F. Boyer in cabin.

Per American steamer *City of Peking*, for San Francisco:—Dr. W. H. Abercrombie, Mr. P. M. Ader, Mr. S. G. Alexander, Miss A. Alexander, Mrs. Anderson, Mr. E. P. Baldwin, U.S.N., Mr. W. Coleman, Mr. W. C. Davidson, U.S.N., Rev. and Mrs. Deans and three children, Messrs. F. W. Eastlake, E. F. Eckhardt, U.S.N., B. W. Ellis, F. E. Harkness, Mrs. J. C. Leonard, Commander Morris, R.S., Messrs. MacGalloway, Ming Sang Ho, J. R. Monaghan, U.S.N., Mackenzie, U.S.N., E. N. Freeman, U.S.N., R. W. Playfair, J. T. Pratt, P. Schuler, L. K. G. Smith, W. H. Stanley, U.S.N., D. W. Todd, U.S.N., T. R. Price, Master Price, Rev. and Mrs. Webster, and Miss E. Wilson in cabin.

Per British steamer *Victoria*, for Victoria, B.C., and Tacoma, Wash.:—Madame, Middle, and Mons. Pernet, Rev. and Mrs. W. N. Brewster and 3 children, Mrs. McGowan and child, Miss Anderson, Miss Halverson, Messrs. E. D. Oppenheimer, F. J. W. Palmer, J. Gargan, M. White, W. G. Norris, A. J. Wiles, J. R. Germain, Chu Kew Chong, and Yau Pliow Lee in cabin; 510 in steerage.

Per Japanese steamer *Saito Maru*, for Shanghai via ports:—Mrs. F. H. Bugbird, Mrs. E. C. Scidmore, Mr. Greenhalgh, Capt. K. Kato, Mr. M. Wada, Mr. and Mrs. L. S. Max Meincke, Mrs. Kono Kosen, Mr. E. H. Sharp, Sub-Inspector of Navy Surgeon Yamazaki, Mr. D. Clarkson, Mr. R. C. K. Johnson, Mr. K. Moritake, and Mr. H. R. Bostwick in cabin; Mrs. J. Ogiwara, Mr. H. Yazawa, Mr. K. Matsuda, Mr. K. Sato, Mrs. K. Fujisawa, Mrs. H. Fujisawa, Mr. Yamazaki, Misses H. Yamazaki, Y. Yamazaki, Mr. Charles Anderson, Master A. Barradas, and Mr. Hason in 2nd class; 51 in steerage.

CARGOES.

Per American steamer *City of Peking*, for San Francisco:—

	SAN FRANCISCO	NEW YORK	HAMILTON	OTHER	TOTAL

Tea 1 cent Gold per lb. gross.
Silk 3 cents Gold per lb. gross.
Measurement \$13 Gold per ton.

Per French steamer *Salazie*, for Shanghai via Kobe:—Raw Silk for Europe, 953 bales; Waste Silk for Europe, 272 bales.

LATEST COMMERCIAL.

IMPORTS.

Dull and depressed. Nothing doing in any department. Buyers appear to be sufficiently occupied digesting purchases already made, and with a drop in home values, they appear inclined to stay out of the market altogether. Quotations nominally unchanged; but there is absolutely no business to test the market.

COTTON PICK GOODS.

Grey Shirts—8 1/2 yds, 39 inches	PER PIECE.	\$2.40 to 2.75
Grey Shirts—9 1/2 yds, 45 inches		2.75 to 3.25
Grey Shirts—10 1/2 yds, 45 inches		1.50 to 1.90
Indigo Shirts—12 yds, 44 inches		1.95 to 2.90
Prints—Assorted, 24 yds, 30 inches		2.00 to 3.75
Cotton—Italians and Satteens Black, 39 inches	PER YARD.	0.16 to 0.32
Velvets—Black, 35 yds, 29 inches	PER PIECE.	7.75 to 9.90
Victoria Lawns, 24 yds, 24 1/2 inches		0.75 to 1.00
Turkey Reds—2.0 to 2.4 yds, 24 1/2 inches		1.50 to 1.70
Turkey Reds—2.8 to 3 1/2 yds, 24 1/2 inches		1.75 to 2.10
Turkey Reds—3.8 to 4 1/2 yds, 24 1/2 inches		2.40 to 2.70
Turkey Reds—4.8 to 5 1/2 yds, 24 1/2 inches		3.00 to 3.50

WOOLLENS.

Flannel—30 yds, 39 inches	PER YARD.	\$0.30 to 0.50
Italian Cloth, 30 yds, 39 inches		0.35 to 0.41
Medium		0.30 to 0.39
Italian Cloth, 30 yds, 39 inches		0.25 to 0.37
Mousseline de Laine—Cape, 21 yds, 31 inches		0.15 to 0.32

RAW COTTON.

American Middling	PER POUND.	\$23.00 to 23.50
Indian Broach		23.00 to 23.25
Chinese		21.00 to 21.50

METALS.

Dull and dispiriting. Importers complain that "there is no money in it."

Flat Bars, 1 inch	PER POUND.	\$3.70 to 3.80
Flat Bars, 1 1/2 inch		3.90 to 4.00
Round and square up to 1 inch		3.70 to 4.00
Sheet Iron, assorted		3.80 to 4.00
Galvanized Iron sheets		4.80 to 5.00
Wire Nails, assorted		5.30 to 6.50
Pig Iron, per box		5.50 to 6.00
Pig Iron, No. 3		1.80 to 1.85

KROSKENK.

Heavy arrivals this week have caused buyers to remain "on the fence." They will only buy when they are obliged: and will hold off as long as possible. Prices are more or less nominal.

American	PER POUND.	\$2.08 to 2.10
Russian		2.05 to 2.10
Langkat		—

SUGAR.

Brown—Quiet and moderate business but no satisfactory trade. White—Strong at late rates with a good demand ahead.

Brown Takao	PER POUND.	\$3.45 to 3.55
Brown Manila		4.30 to 4.40
Brown Daitong		3.30 to 3.40
Brown Canton		3.10 to 4.20
White Java and Penang		6.80 to 7.00
White Hainan		7.00 to 9.00

EXPORTS.

RAW SILK.

Considerable business at irregular prices. Quotations nominally unchanged but during the week better has been done. At closing the market looks stronger: in sympathy with better news from consumers. On their side sellers here will be current if buyers are cautious. It is getting too near new crop to run great risks.

QUOTATIONS.

Filatures—Extra 9/15, 10/15 den.	Nom. \$850 to 860
Filatures—No. 1, 10/15 deniers	840 to 850

ARTIFICIAL PERFUMES. CAUTION!

Messrs. J. & E. ATKINSON warn their customers against the Artificial Chemical Perfumes at present so extensively offered. Though strong they are nasty, and from a hygienic point of view their use is to be strongly deprecated.

ATKINSON'S "NATURAL" PERFUMES are made from flowers, and possess all their natural fresh sweetness. They cannot be surpassed either in delicacy or strength.

THE GREATEST WONDERS OF MODERN TIME HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the druggist Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN. HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations. Mr. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a tea-spoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining stock."

Sold by all Chemists and Medicine Vendors throughout the World.
May 1st, 1896.

MILKMAID BRAND CONDENSED MILK

The "Milkmaid" Brand is guaranteed to contain all the cream of the original milk. In the process of manufacture nothing but water is removed, nothing but the best refined sugar added.

Avoid low-priced brands from which the cream has been abstracted, and ask for the "Milkmaid" Brand, the best for all purposes.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, APRIL 17TH, 1897.

BIRTH.

On the 14th instant, at Yokohama, the wife of N. OKUSHI, Esq., Commissioner of Customs, of a son.

SUMMARY OF NEWS.

SEVERAL fires have occurred in Yokohama this week.

THE Osaka Mint is now engaged in designing dies for the new gold coins.

THE Easter holidays seem destined to be accompanied with showery weather this year.

TRAINING for the races is proceeding steadily, some good galloping taking place on Saturday morning.

A GOOD many of the Japanese emigrants who were refused landing at Honolulu will be sent to Brazil.

SOME bands of Greek Volunteers have been in collision with Turkish troops on the Thessalian frontier.

WINTON HOUSE SCHOOL held its first Athletic Sports Meeting on the Yokohama Cricket-ground on Wednesday.

THE Hawaiian emigrant trouble having entered the diplomatic stage, a Japanese man-of-war proceeds at once to the Islands.

THE Municipal Council of Shanghai, acting on the advice of the Consuls and the Chinese

Taotai, have decided to postpone the increase in the wheel-barrow coolie tax until July. The strike has terminated in consequence.

THE Kyoto University will be opened in October next, the first section to be organized being that of Civil Engineering.

MR. MATSUMOTO, President of the Railway Bureau, will soon start for Europe for an inspection of the broad gauge system in the West.

MR. OISHI MASAMI, who was formerly Minister to Korea, has been appointed Vice-Minister of the Department of Agriculture and Commerce.

THE trade in Formosa during the month of January amounted to:—Exports, yen 453,531; imports, yen 648,556; duties collected, yen 26,908.

T.I.M. the Emperor and Empress have contributed yen 1,300 towards the relief of the sufferers by the recent fire at Kashiwazaki, Niigata Prefecture.

WHILE a fire in China-town, Yokohama, was in progress on Sunday night, a European woman died from excitement. She had suffered from heart-disease for a long time.

COUNT Itagaki has been invited to attend a grand meeting of the *Yifu-to* to be held at Kyoto on the 25th inst. Hence he will leave the Capital for Kyoto at an early date.

It is reported that Mr. Kitagaki, Vice-Minister of the Colonization Department, will be nominated a member of the Upper House after his resignation has been officially accepted.

THE importance of the latest Note from the Powers to Greece is minimised at Athens; nevertheless, the leading Greek journals censure the popular clamour of the Greeks for war.

THE Codes Investigation Council are to finish the investigation of the Commercial Law in November, and all the other sections are to be completed by the end of March next year.

THE General Staff Office will convene a meeting of Councillors of the various Army Divisions, with Lieut. General Kawakami as President, about the middle of next month.

It is the general opinion at St. Petersburg and elsewhere that Greece is calming down, consequent on ascertaining that the Turkish forces are in unexpected strength on the Thessalian frontier.

VISCOUNT ENOMOTO and others have applied to the Authorities for permission to establish the Nichi-Boku Takushoku Kaisha (Japan and Mexican Emigration Company), with a capital of yen 200,000.

THE prospects of the tea crop in Suruga districts are reported to be brighter this year than last. The first parcel, of about 3,000 catties, will probably be despatched on the 24th inst., the average price being \$42 or \$43 per picul.

THE French Minister of Marine has introduced a Bill into the Chamber of Deputies to sanction the expenditure of eight hundred million francs, mainly for new ships and dockyards, to be spread over a term of eight years, commencing this year with eight new ships.

ACTUATED by a desire to prevent a warlike collision on the frontier and to preserve general peace, the Great Powers have jointly warned both the Greek Government and the Porte that in the event of a conflict arising between them, the aggressor will be held solely responsible

for the consequences, and will not be permitted to derive the least advantage therefrom.

ACCORDING to statistics compiled at the Treasury Department, the number of banks throughout the country during the month of March was 1,400, with an aggregate capital of yen 262,979,114. These figures show an increase of 22 banks and yen 6,829,600 in funds.

On the 4th inst. a serious fight took place among the mining coolies belonging to the Tagama Saitan Kaisha (Coal Mining Company) of Tagama-gun, Fukuoka Prefecture, in which four coolies were killed on the spot and a score or more severely wounded.

THE amalgamation of the Tokyo and Nihon Marine Insurance Companies has been effected. The aggregate capital of the united Company is estimated at yen 6,000,000 and the business will be carried on in the name of the Tokyo Hoken Kaisha.

THE Sendai Chamber of Commerce having recognized the necessity of improving the anchorages in Matsushima Bay, recently applied to the Prefectural authorities for a survey at the expense of the Chamber, and the authorities have sanctioned the enterprise.

THE foreign instructors now in the Higher Commercial School, Tokyo, are one British, one American, two Chinese, and one Korean. According to the scheme for the extension of the institution, one Russian, one French, and one German tutor will be engaged in July next.

PROFESSOR TSUBOI SHOGORO, who has been engaged in antiquarian investigations and excavations at Maruyama, Shiba Park, has discovered that Maruyama was at one time the sepulchre of the Imperial Family, probably as far back as 1,800 or 2,000 years ago. He has presented a petition to the Authorities for the preservation of the hill under the Shrines Preservation Law.

In accordance with the Navigation Encouragement Law, the examination of the steamer *Kyofun Maru* of the Nippon Yusen Kaisha, was conducted in Tokyo Bay on the 13th inst. by officials of the Communications Department, and it was shown that she had a speed of over 13 knots, while her engines were in perfect condition. She is the second vessel that has passed the official examination and is to be put on the European line on the 17th inst. The first vessel passed was the *Kinshu Maru*.

IMPORT markets still continue stagnant and almost dead, cottons and yarns being simply unsaleable, while metals are nearly as badly fixed, the only business to speak of being in tin plates, for the new tea season. Kerosene is piling up, but buyers are scarce and wary, under the belief that prices will fall. Sugar is about the only staple import which shows any briskness, but even in this the volume of trade is small. When money gets cheaper and Banks resume credits, a turn in affairs may be seen; but there are at present no signs of such a welcome change. In Exports very little is doing in silk, and with regard to the tea market, of course every buyer is awaiting the new crop. A small parcel of new tea is expected in Kobe on the 24th inst. and by the 30th there should be a good selection of samples both here and at the Southern port. It is rather too early as yet to speculate as to the quality or quantity of the new crop, but the leaf is reported to be well forward for the time of year, and good in condition. Exchange has fallen again and closes weak.

SPRIT OF THE VERNACULAR PRESS DURING THE WEEK.

A good deal of attention is paid by the leading journals of Tokyo to the affair of the emigrants to Hawaii. There is surprise and there is evidently some indignation, but no one is quite clear about the nature or validity of the pretenses advanced by the Hawaiian Authorities, and in the absence of distinct intelligence concerning that crucial point, criticism is necessarily cautious. It can not be said that the press displays any impatience, or any desire to urge recourse to arbitrary methods. The organs of political parties endeavour, as a matter of course, to make capital out of the incident at Count Okuma's expense, and to represent him as sitting idle when action is required. But, on the whole, the tone is temperate, and in no instance do we find advocacy of the gun-boat policy.

The press is now in its fourth week of emancipated existence. On the 19th of March, the amended Regulations for its control were promulgated under the Imperial Sign Manual. We should be pronouncing a premature judgment, of course, did we draw any conclusive inference from the conduct of the newspapers in that interval. Until some strongly exciting incident occurs to test their self-restraint, it will be impossible to determine whether the increased measure of liberty secured to them by the new law is likely to be abused. We ourselves entertain strong apprehensions on the subject, but it will gratify us to find that they are mistaken. Meanwhile, it is only fair to note that neither the Hawaiian complication nor the fiscal discrimination of the United States has provoked any utterances which would have been suppressed under the old system.

It is curious to find a writer like Professor Matsumoto,—whose article in the *Nichi Nichi* we epitomise—laying down the very principles enunciated by Count Okuma as the true basis of international intercourse, and, by implication, attacking the Count for not applying them in America's case. If Japanese politicians expect their Minister of Foreign Affairs to influence the procedure of the United States' Administration in the matter of tariff compilation, they are verily sanguine.

The *Jiji Shimpō*, after recapitulating the facts that out of some 600 immigrants carried by the *Shinshu Maru* to Honolulu, 488 were not allowed to remain, and out of 300 carried by the *Sakura Maru*, 163 were returned, goes on to denounce the action of the Hawaiian Authorities as a flagrant violation of the Treaty between the Hawaiian Republic and the Japanese Empire. It was pretexted by the Hawaiian Government that the forms prescribed by law had not been complied with, but it does not appear that the plea is justified. The planters in Hawaii and the Agricultural Company made due application to the Immigration Committee last October, but their petition is said to have been rejected on the ground that it was not accompanied by an engagement pledging the Company to bring to white labourers for every 90 Asiatics introduced by it during the course of the next 18 months. The law, as hitherto interpreted, imposes no such condition. Its original terms were carefully observed in this instance, and every one of the Japanese immigrants carried with him the regulation sum of 50 dollars. No valid reason for preventing their landing is apparent. Appeal to the Supreme Court was made against the decision of the Administrative authorities, but the latter set up the defence that the Court had no jurisdiction over aliens who, not having been allowed to enter the realm, could not be considered judicable by its tribunals of law, and the Court admitted the validity of that objection. There can be little doubt that all this is a violation of the Treaty as well as of the principles of justice. The Hawaiian authorities had actually allowed the Japanese to land and had subjected them to

the quarantine regulations of the Republic. To that extent they had already assumed jurisdiction over them, and it is unwarrantable to assert that no appeal to the law courts could be entertained under such circumstances, or that the Customs Officials of Hawaii are entitled to deprive Japanese subjects of their rights as individuals. The question, however, has been ejected from the domain of the judiciary, and how to treat it now is a matter of some difficulty. Detailed reports from the officers of the *Shinshu Maru* and from her passengers have by this time reached the Minister of State for Foreign Affairs, and it remains to be seen whether he will make the matter a subject of diplomatic representation. If the Government of the Republic is in the wrong, steps must be unhesitatingly taken to obtain redress. Japanese emigrants went there originally at the invitation of Hawaii, and out of the 100,000 inhabitants of the islands, some 25,000 are now Japanese. These figures constitute a sufficient argument in favour of a resolute policy on Japan's part. If Hawaii has enacted, or is about to enact, any regulations discriminating unfairly against Japanese immigrants, she must be restrained. At the same time, the negotiations ought to be conducted in an amicable spirit and without any semblance of violence. Many persons appear to be in favour of adopting what they call a strong attitude, but strength or weakness in foreign policy is a question of occasion and season. The development of her armaments by Japan since the recent war has made her an object of suspicion to other countries: they imagine that she entertains aggressive designs. Spain's action in seeking and obtaining a guarantee that nothing should be undertaken against the Philippines was an evidence of that suspicious mood. If, then, Hawaii be now approached in a hectoring fashion, not only will the world's doubts of Japan be more or less confirmed, but Hawaii also will be estranged, and may be expected to resort to every possible means of keeping the Japanese at arm's length. Above all, the relations between Hawaii and the United States must be considered. If Japan attempts to pursue an arbitrary course, she may find herself involved with America. A lesson has been taught her elsewhere. Her attempts to clear away with a strong hand the obstacles that intervened between her and Korea ended simply in throwing the latter into the arms of another strong Power. In Hawaii and the United States there are large parties that favour the annexation of the former by the latter, and it may not be an unwarrantable inference that these immigration troubles have been engendered by a desire to find a pretext for forcing the United States to step in and aid Hawaii against Japan. That phase of the problem must be remembered, and the Japanese Government must be careful not to play into the hands of the persons, if such there be, by whom such schemes are fomented. The American Government's action in the cases of Venezuela and Cuba evinces a disposition to play a very active part in the arena of foreign politics, and it would be difficult for the Washington statesmen to look on idly were Hawaii seriously menaced by Japan. Already, indeed, news has come of American men-of-war having been sent to Honolulu. Of course Japan must maintain her rights *vis-à-vis* the United States, if need be. There are 25,000 Japanese subjects in Hawaii, and that fact gives Japan a right to be heard first in any discussion of the question of annexation. But if this difficulty be designed merely to force the annexation problem upon the practical attention of the United States, Japan would not act wisely did she treat the matter with a high hand. Besides, Hawaii is essentially a weak country. Her military preparations may be said to be non-existent. To attack her would be like twisting a baby's arm. It is contrary to the dictates of civilization to treat women and children roughly. The weaker one's opponent, the gentler should be one's treatment of him. Japan may easily bring disgrace upon herself in this matter. If she has right on her side,

gentle methods will secure its recognition, and what her statesmen must avoid is the sacrificing of permanent reputation on the altar of a transient gain.

The *Yomiuri Shimbun* (*Shimpo-to* organ) discusses the above matter from another point of view, namely, the relations between England and America in Hawaii. It says that, according to information obtained from the returned emigrants, the British subjects in Hawaii, numbering over a thousand, were unanimously opposed to the action of the Authorities, and upheld the Japanese. Moreover, rumour says that England, hearing of the despatch of American men-of-war to Honolulu, has ordered some of her own ships to proceed thither. Now this question of immigration is one that concerns Japan and Hawaii alone. There is no apparent reason for interference by other Powers. What, then, is England's motive? In order to find an answer to that question the *Yomiuri* gives a *précis* of America's attitude towards Hawaii during recent years, which attitude, it concludes, has been shaped, at one time, in accordance with the traditional doctrine of non-interference in any matters that lie outside the country's border; at another, in agreement with the sentiment entertained by no small section of the American people, namely, that their country should be supreme in the Pacific, and that possession of a centrally situated group of islands like Hawaii is essential to the establishment of that supremacy. On the other hand, Great Britain's interests are diametrically opposed to the absorption of Hawaii into the American Republic. In the scheme of confederation so fondly urged by patriotic Englishmen, the telegraphic connexion of Canada with Australia appears necessary. Hawaii offers itself as a natural resting-place for the cable *en route*. The scattered character of her vast possessions imposes upon England the obligation of establishing and conserving roads of communication between them. America, posted at Hawaii would dominate one of the most important of those roads. It is easy to see, therefore, in which direction British interests point. But the Anglo-American conflict of views about Hawaii has no more to do with Japan than Japan's emigration difficulty with Hawaii has to do with England and America. The two problems should be kept entirely separate.

The *Chuo Shimbun* (National Unionist organ), employs the incident as a handle for attacking Count Okuma. It lends its leading columns to a writer calling himself "Shusui," who wields a rhetorical pen, and invokes the aid of sentiment to discredit the present Minister of Foreign Affairs. A vivid picture is drawn in brief outline of the unfortunate emigrants, who, having sold their small farms and narrow dwellings in order to seek kinder fortune beyond the sea, have been turned back after reaching their destination, and obliged to retrace their path to a country where they have no longer a home, and where their means of earning a livelihood have been sacrificed. Three weeks have passed since the news of the event reached Japan, but Count Okuma has done nothing. His whole attention is engrossed by party politics. This statesman, upon whom the nation set its eyes as the empire's unique diplomat, seems to excel in one accomplishment only—inaction. Since he took the portfolio of foreign affairs, Japan's prestige in Korea has gone from bad to worse. He sent a man-of-war to the Philippines when the fight was over, and he now sits calmly looking on while Japan is robbed of the privileges belonging to her in Hawaii as a most-favored nation, and while Japanese subjects are condemned to hardship and put to shame. America and England, though only indirectly concerned, have despatched cruisers to Honolulu, but Japan has done nothing. Is that an example of the "strong foreign policy" inscribed on Count Okuma's banner when he took office?

In the columns of the *Kokumin* (*Shimpo-to* organ) several paragraphs have appeared on the same subject during the week. Their tone is

not truculent or impatient. They speak, indeed, of the imminent probability that the *Matsushima* and the *Yoshino* will be despatched to Honolulu, but they say that diplomatic representations will not be made by the Tokyo Foreign Office to Hawaii until Consul-General Shimamura has furnished a detailed report, for the speedy preparation of which instructions have been conveyed to him by Count Okuma.

The *Sekai-no-Nippon* (*Yūn-to* organ) confines itself to a few paragraphs, strongly tinged by party spirit. It says that Count Okuma has at length been compelled to move, and that, under his direction, his newspaper organs have announced the despatch of instructions to Consul-General Shimamura in Honolulu, calling for prompt and full details. It further alleges that men-of-war are held in readiness to proceed, the *Hiei* having actually received orders to prepare for sea, and the *Chin-yn*, *Naniwa*, *Matsushima* and *Suma* being indicated as the four ships one of which will be chosen to accompany the *Hiei*. But it is plain that the *Sekai-no-Nippon* speaks chiefly from conjecture. It circulates another statement to the effect that Mr. Ozaki Yukio has been trying to have himself appointed special envoy to negotiate with the Hawaiian Government, but that his efforts are fruitless, since, if any such functionary be needed, Mr. Hoshi Toru, Japan's Representative in Washington, is obviously the proper person.

Professor Matsumoto Kumpel, graduate of an American college, writes over his own signature in the *Nichi Nichi Shimbun* (Opposition organ), on the subject of the anti-Japanese policy of the United States (*Beikoku hi-Nippon saku*). Naturally he commences his article by discharging a shot at Count Okuma, whom he proposes to hold responsible for the tariff legislation of the United States. That legislation he denounces as eminently unfriendly to Japan, and calculated to destroy the specially amicable sentiments entertained during so many years by the Japanese nation towards the people of the Great Republic. It was America that opened Japan's gates to the ingress of Occidental civilization, and led Japan into the path of progress, where she has found innumerable benefits. Japan is fully sensible of the advantages thus brought within her reach. She understands the value attaching to the goodwill of a huge Power, whose people number 60 millions, and whose territories extend over three million six hundred thousand square miles. Her manufacturers and producers have always had American markets in view, and she has counted confidently on American sympathy. Yet now she suddenly finds herself the object of most unfriendly legislation. International intercourse has two phases; the political phase and the economical phase. The latter is the true basis. Political relations may be strained, but so long as economical relations hold, peace is pretty well assured. On the other hand, if economical relations are interrupted, politics become of small avail. Russia and France are held together by more than merely political considerations. So are the members of the Triple Alliance. The first object of wise diplomatists should be to preserve and extend their country's commerce with other States. But Japan is now confronted by the catastrophe of an old commercial ally's suddenly proclaiming itself commercially hostile. The Tariff Bill recently passed by the Legislature of the United States aims virtually at excluding Japanese silk and other fabrics from the American markets. In the case of *habutae* weighing one oz., or less, per yard, an import duty of \$4 per pound is to be charged. In the case of *Sakai* rugs, 6 *sen* per yard, together with an *ad valorem* duty of 35 per cent., are to be levied on goods valued at 30 *sen*, or under per yard; and 12 *sen*, together with an *ad valorem* duty of from 38 to 40 per cent., on goods valued at over 30 *sen* per yard. Fancy matting (*hana-mushiro*) is to pay 8 *sen* a yard if valued at 10 *sen* a yard or under; and 8 *sen* together with an *ad valorem* duty of 25 per cent. if valued at over 10 *sen*. These rates, if they be truly reported,

mean *ad valorem* duties of from 90 to 100 per cent. on silk fabrics; from 70 to 80 per cent. on cotton rugs, and from 100 per cent. upwards on fancy matting. Such duties are prohibitive. They amount to a declaration on America's part that she intends to exclude Japanese manufactured goods from her markets. It is unnecessary to descant upon the disastrous results that will be produced upon Japan's trade. The three industries of silk fabrics, cotton rugs, and fancy matting depend largely upon American demand. If that demand be withdrawn, they must languish, or even disappear altogether. As for the motive of the American Government, it is probably two-fold. The advantage derived by Japan from cheap silver has enabled her to offer her manufactures in American markets at prices that defied competition on the part of American domestic manufacturers. To protect the latter is one purpose of the new tariff. Again, the balance of trade has always been against America in her dealings with Japan: the former has always bought from the latter more than she sold to it. That, too, her economists doubtless desire to remedy by means of the new tariff. It is not yet known whether similarly prohibitive duties are to be levied upon silk fabrics from France and Italy. But however that may be, America has now become economically hostile to Japan, and the political friendship of the two countries can not long survive. What is Japan to do? Shall she engage in a war of tariffs as other countries have done? She can not. Her hands are tied by treaties, and, moreover, her purchases from America are only a fraction of her sales to that country. The contest would be too unequal. Some exceptionally able policy must be adopted. The writer in the *Nichi Nichi* concludes by expressing a wish to know what Count Okuma intends to do.

The *Mainichi Shimbun* (*Shimpo-to* organ), has a long article the purpose of which is to dispel a misconception entertained in certain quarters that, because Japan is entitled to grant sums of public money to her own people in order to encourage deep-sea fishing, navigation and shipbuilding, and because she may exclude foreigners from any share in such grants, therefore she can similarly make grants to direct native exporters of silk without extending the grants to foreigners even after the new Treaties go into operation. Such confusion of ideas is ridiculed by the *Mainichi*. It explains clearly that the former grants belong to the class of "subsidies," in dealing with which a country has complete liberty of action, whereas the latter are included in the category of "bounties," about which the Revised Treaties are absolutely explicit. There cannot be the smallest doubt, according to the *Mainichi*, that from the date of the operation of the new Treaties foreigners would become eligible for the bounties enumerated in the Law for encouraging the direct export of silk. Our contemporary also sets forth at considerable length the mischievous character of such legislation from an economical point of view, but we need not follow it along that route of argument.

A question venerable in point of age but retaining all the freshness of its original importance, is briefly discussed by the *Yūji Shimpo*. It is the question of the study of the English language in Japan. Our contemporary thinks that English may one day be the language of the world. At all events, it is already a language absolutely without peer in point of general usefulness. It is the language of England and America, and of all the former's vast possessions. A man speaking English can be sure of being understood wherever he goes. At no stage of her history did the necessity of learning English press more imperatively upon the people of Japan than it presses to-day. In one sense the country has ceased to be an island. Treaty Revision has joined it to the Occident. In two years foreigners will be able to settle where they please within the realm of Japan, and the commerce to which the country owes so much will receive a new impetus of development. If the nation is to take advantage of its opportu-

nities, it must acquire the English language. The benefits accruing from a knowledge of Chinese were abundantly apparent during the recent war, and if that was true of war, it is a hundred times truer of peace. English ought to be taught in every school in the Empire, and, if possible, technical studies should be pursued in that tongue. Financial difficulties must not be suffered to stand in the way. The Treasury should assist. The *Yūji* is very emphatic. We have here greatly abridged its writing, but the general sense is sufficiently conveyed by our epitome.

The *Osaka Asahi* devotes three long articles to sociological questions, but our space is too limited to produce, however briefly, a disquisition that has only academical interest at the moment.

The Matsukata Cabinet is the object of a violent attack by the *Sekai-no-Nippon* (*Yūn-to* organ), which asserts that the statesmen now in power have no scruples about employing the public money to enrich their own friends. Sixteen years ago, the country was thrown into a state of ferment by intelligence that the Government contemplated disposing of the Kaitakushi (Colonization Department) properties to the former officials of that Department, and a great political crisis was barely averted. Yet, the sums then in question amounted to only a few hundred thousand *yen*. To-day, the nation looks on calmly while millions are devoted to similar objects—a subsidy here, a grant there, until no less than 24 favoured enterprises are drawing some two million *yen* from the Treasury. The special grant of 2½ millions to the Nippon Yusen Kaisha and another big subsidy to an iron foundry were cognate instances, though happily in those particular cases the Matsukata faction failed to achieve their purpose. Two columns are devoted by the Opposition organ to this subject, their gist being that the policy of the present Cabinet is a policy of plutocracy. Every monetary concession made by the Government, even the grant for railway construction in Formosa, is attributed to corrupt motives, and, of course, an indictment formidable as to the quantity of its counts at all events, whatever be their quality, is thus made out.

THE NEW INDUSTRIAL BANK.

The *Official Gazette* of the 8th inst. contains the following notice with regard to the Japan Industrial Bank:—

1. The capital of the Bank shall be ten million *yen*, in 50,000 shares of 200 *yen* each.
2. The Charter of the Bank was sanctioned by the Minister of Finance on the 17th March in the 30th year of Meiji.
3. The term of subscription to the shares shall be from 10th April to the 29th of the same month. Applications bearing postage stamps marked at the post office not later than the 29th April will be received until the 11th May, those that may arrive after that date will be returned to the senders.
4. Applicants are required to pay twenty *yen* on each share applied for in a remittance payable to the order of Mr. Tajiri Inajiro, the Chairman of the Bank Institution Committee, with a note addressed to the Bank of Japan, and enclosed in a registered envelope containing the application as directed to the Chairman's Office. A receipt thereof shall be transmitted on the remittance being cashed.
5. In case the amount of subscriptions exceeds the fixed number of shares of the Bank, the amount of shares to be allowed to each applicant shall be distributed in proportion. Any fraction of a share shall be cancelled.
6. When the amount of subscription is settled, the applicants shall be informed of the number of shares allotted them, and the money paid by them as security shall be kept on deposit, to be appropriated to the first payment of subscription (at the rate of fifty *yen* for each share). The surplus, if any, shall be returned to them.
7. Failure to pay the first installment of subscription shall involve forfeiture of the rights of a shareholder, besides confiscation of the security money.

THE HAWAIIAN QUESTION.

It is alleged that the action of the Hawaiian Administration in preventing the landing of Japanese immigrants is regarded by the Japanese Government as a violation of the Treaty. Negotiations will therefore be opened for the purpose of asserting Japan's rights. Instructions have been conveyed to Consul-General Shimamura requiring him to forward an accurate report by the 20th of this month, and on receipt of that information, Japan's demands will be presented to the Hawaiian Authorities. Two men-of-war will be despatched. One is the *Hiyei*, which had already been got ready for a voyage, and the other will be chosen from among the *Chin-yen*, the *Matsushima*, the *Fuso*, the *Naniwa* and the *Suma*. The *Hiyei* is a belted corvette of 2,284 tons; a slow vessel, not primarily likely to be chosen for such a purpose. The *Mainichi Shimbun* is responsible for the above statements. We take them from an extra published by it on Saturday evening.

The principal points in the interesting decision rendered by the Supreme Court of Hawaii in the above case are these:—

The return of the Collector General of Customs shows that the petitioners were natives of Japan and aliens, that upon their arrival in Honolulu they were removed to the quarantine station and there subjected to an examination by the Deputy Collector General of Customs to ascertain their qualifications for entering this country. It was decided that all the petitioners were not entitled to land because they were aliens and lacked the necessary qualifications required by law for landing. It was then decided that they should be held to await the return of the steamer that they might be deported.

The decision of the Court continues: "A lengthy traverse to the return was presented for the petitioners by Mr. Ballou, which substantially denies that any legally conducted examination of the right of these Japanese to land was made by the Deputy Collector or that any legal decision thereon was made. It is claimed in argument that the Court should inquire into the proceedings, in order to ascertain if the statute relating to the landing of aliens in the Hawaiian Islands (Act 66 of the Laws of 1894) was complied with. Counsel urge that the decision alleged in the return is not final, because it was not communicated to these Japanese, and therefore they have had no opportunity to appeal therefrom to the Collector General as by the statute allowed. They also claim that the decision is not binding, because no opportunity was allowed these Japanese of counsel, and that this was in derogation of their rights under the treaty of Hawaii with Japan, which provides that Japanese subjects may remain and reside in the Hawaiian Islands, enjoying at all times the same privileges as may be granted to the citizens or subjects of any other nation, one of which privileges is, as set forth in the treaty with Spain, for instance, that 'they shall have free and easy access to the Courts of Justice in the pursuit and defence of their rights, in every instance and degree of jurisdiction established by the laws,' and 'shall be at liberty, under any circumstances, to employ lawyers, advocates or agents from any class whom they may see fit to authorize or act in their name.'"

"These treaty provisions, as it seems to us, do not require that aliens be allowed counsel in cases of examination under the immigration act in question, for the reason that they refer only to persons while resident in the Hawaiian Islands, and not to those who, like the aliens in question, have not yet landed in these Islands, and also for the reason that these treaty provisions apply only to judicial proceedings. As we shall see later on the proceedings under the Act in question to be conducted by the Deputy Collector, are of an executive and not judicial nature. It is not contended here that the Act in question is in conflict with the treaty with Japan, this Act making no discrimination between subjects of other countries."

"There being nothing in the treaty to invalidate the Act itself, or the action taken by the Deputy Collector, if remains to consider whether the statute has been complied with. Upon this point we are greatly assisted by the decisions of the Supreme Court of the United States, made under an

Act of Congress, passed on March 3, 1891, from which our statute was for the most part taken. Both statutes exclude certain classes of undesirable persons, and confer upon certain executive officers the duty of inspecting all alien passengers and deciding upon their right to land in the respective countries, that is, the authority to pass upon the question whether they are within the prohibition."

The Court then quotes at length from the decisions of the United States Court in which it has been decided that Congress gave a "discretionary power to an officer, to be exercised by him upon his own opinion of certain facts," and "he is made sole and exclusive judge of the existence of those facts, and no other tribunal, unless expressly authorized by law to do so, is at liberty to re-examine or controvert the sufficiency of the evidence on which he acted." Under these decisions "the proper inspection officers are required to go on board any vessel bringing alien immigrants and to inspect and examine them, and may for this purpose remove and detain them on shore without such removal being considered a landing, and shall have power to administer oaths, and to take and consider testimony touching the right of such aliens to enter the United States."

The Court, in its decision, sums up the decisions of the United States Supreme Court as follows:—"When the law has conferred to a special tribunal the authority to hear and determine certain matters in the course of its duties, the decision of that tribunal within the scope of its authority is conclusive upon all others."

"It is contended that the decision of the Deputy Collector of Customs is not final because not announced to the petitioners so that they might appeal. Having held that the decision refusing to admit them to land is an executive function, formal notice of the decision to the petitioners is not essential to its validity. We as a Court do not know whether the decision may not have been announced to them by this time. The failure to announce the decision is not ground to discharge them from the restraint they are undergoing."

"In a case, in re Chin Yuen Sing, a United States Circuit Judge held that the Act of 1891 'left nothing for the Court to inquire into, save only whether petitioner is an alien and whether the Collector has made a decision. On this latter point, the return, in which he states that he has decided adversely to admission, is conclusive. Even if he had not so decided when the writ was applied for, the signing of such a return is itself a decision.' The opinion of the Deputy Collector cannot be inquired into by this Court."

In effect the Court ruled that the Deputy Collector of Customs is absolutely independent of the Judiciary in matters connected with the enforcement of the Immigration Act, and that no appeal from his proceedings lies to a tribunal of law. It will be at once apparent that a very curious consequence is involved in this decision: namely, that a Collector of Customs being beyond the purview of the law in respect of his conduct when applying the Immigration Act, can not be legally arraigned whatever step he may take. If, for example, in examining an immigrant, he resorts to practices criminal under ordinary circumstances, he can still claim immunity from penal indictment. On the other hand, if an immigrant whose title to land has been denied by the Collector, suffer wrong at the hands of an ordinary Hawaiian citizen, will the Law Courts of Hawaii refuse redress on the ground that the injured alien has not obtained due permission to land in Hawaii? These questions seem more or less academical, but it is beyond all doubt that Hawaii is not competent to decide for herself when and where within her territory privileges secured by treaty shall begin to be enjoyable. There is a universally recognised custom in such matters, and no State has arbitrary power to depart from it. Formerly emigration from Japan to Hawaii used to be regulated by a Convention concluded in 1886, but the Convention having ceased to be in force, the Treaty of 1871 alone appears to apply, and we fail to see how the recent proceedings of the Hawaiian Authorities can be reconciled with the terms of the 2nd Article:—

Article II.—The subjects of each of the two high contracting parties, respectively, shall have the liberty freely and securely to come with their ships and cargoes to all places, ports and rivers in the territories of the other, where trade with other nations is permitted; they may remain and reside in any such ports and places respectively, and hire and occupy houses and warehouses, and may trade in all kinds of produce, manufactures and merchandise of lawful commerce, enjoying at all times the same privileges as may have been or may hereafter be granted to the citizens or subjects of any other nation, paying at all times such duties and taxes as may be exacted from the citizens or subjects of other nations doing business or residing within the territories of each of the high contracting parties.

The *Mainichi Shimbun* gives the gist of a report made by Mr. Shimamura, Japanese Consul-General in Hawaii, with regard to the immigrants' complication. Our contemporary's article runs as follows:—

The objection by the Government of Hawaii to the landing of Japanese labourers has become a diplomatic question, but owing to the absence of official reports from the Japanese Consul-General in Hawaii, the actual circumstances of the case have not been ascertained until now. Fortunately, the steamer *Shinsiu Maru*, which carried the labourers back to Japan, carried also official despatches from Hawaii. Some of them the Government appear to be unwilling to make public but we are in a position to represent the facts in their true light. Before giving the reports of the Consul, it seems advisable to state the laws of Hawaii with regard to the landing of Japanese. Labourers hitherto sent to Hawaii from Japan have been classified as contract and free labourers. With regard to the former, agreements had to be entered into between the employers, namely the landed proprietors, on the one hand and a representative of the Emigration Company on the other. The representative had to obtain the sanction of the local authorities of Hawaii by presenting a written statement of the number of labourers to be brought over. That sanction he forwarded to the Company in Japan, and the latter, in turn, presented it to the Authorities, together with an application for permission for such and such a number of persons to emigrate. Having obtained the necessary permit, the Company took steps to engage and transport the labourers. These processes were altered, however, in October last. The landed proprietors took upon themselves the task of obtaining the sanction of the Hawaiian authorities, and thereafter simply notified the representative of the number of immigrants needed, which notice the representative forwarded to the Company in Japan, and the latter took steps to execute the commission with the approval of the Japanese Government. As to free labourers, no conditions were imposed except that they must be in *bona fide* possession of fifty dollars each. Now the report of the Consul shows that the holders of estates in Hawaii, namely the employers of Japanese, had sent an application to the representative of the Company for 144 labourers with full assurances that the permission of the authorities had been obtained. The required number were duly sent, all necessary steps of procedure having been taken. At the same time 410 others as *free* labourers took passage on the 10th February, each carrying the sum of fifty dollars. The steamship *Shinsiu Maru*, taking these passengers—554 in all—arrived in Hawaii on the morning of the 27th February and anchored outside the harbour.

Two of the passengers were suffering from measles, and the ship was kept in quarantine for eleven days, during which time the Customs Authorities of Hawaii, after making investigations of the men's qualifications for landing, allowed 102 to go ashore, but held all the rest in detention. Despatches were consequently sent from the Japanese Consulate, enquiring the reason of the Hawaiian Government's objection to the labourers landing, and the reply was, that the agreement for the men's employment had been concluded between the landed proprietors and the Emigration Company only, without the sanction of the Hawaiian authorities, which being contrary to law permission could not be given for landing, and further, that whereas each labourer was required by law to possess fifty dollars, the sums held by the free labourers were merely "show-money," and not a *bona fide* possession.

If that reply of the Hawaiian Government be correct, we are at a loss to understand why the landed proprietors pretended to have received the necessary sanction for the transport of labourers from Japan. That question was carefully investigated by the Japanese Consul in Hawaii, but no definite proof was forthcoming that sanction had

really been obtained. But the report being dated the 20th of March, the whole circumstances can not be ascertained until the arrival of later information.

The Foreign Department, however, has issued instructions to the Hiogo *Kencho* to ascertain whether the money possessed by the immigrants was really their own or not. Should it be established that the labourers were really in *bona fide* possession of fifty dollars each, the proceedings of the Hawaiian Government will be regarded by the Japanese authorities as an open violation of the Treaty, and a claim will be made supported by armed demonstration.

According to the *Mainichi Shimbun* the Japanese Government has resolved to send two men-of-war to Hawaii, and, pending the settlement of the complication, has issued instructions to suspend further immigration.

According to the vernacular press, Count Okuma, Minister of State for Foreign Affairs, has issued the following instructions to the Japanese Minister in Hawaii:—

1.—The Hawaiian Government, in refusing to permit Japanese immigrants to land, put it out of the power of the Japanese Consul to adopt measures for their protection and to discharge other necessary functions. Its action must be regarded as contrary to the Treaty.

2.—The measure taken by the Hawaiian Government to prevent the Japanese immigrants from placing the matter in the hands of legal advisers, amounted practically to undue interference with individual rights of the Japanese, and must also be a violation of the Treaty.

3.—The fact that the Hawaiian Judiciary, in conformity with the position taken by the Executive, refused to entertain the suit at law instituted by the Japanese whose landing had been prevented, must be recognised as a violation of the legal rights secured to the Japanese by the Treaty.

In addition to sending the above instructions, Mr. Akiyama, Diplomatic Agent, is to be despatched to Hawaii in a war vessel leaving Japan on the 17th or 18th instant, for the purpose of preferring the claims of the Japanese Government through the Minister in Hawaii. The Hawaiian authorities' refusal to permit the landing of the free labourers must be regarded from every point of view as a contravention of the Treaty concluded between Hawaii and Japan. Investigations made by the Hiogo Prefectural Office up to the present have established the fact that the immigrants were in *bona fide* possession of the prescribed sum of fifty dollars. His Majesty the Emperor had already sanctioned the despatch of the *Nanika* to Hawaii for the protection of the Japanese settlers there.

PROGRESSIONISTS AND THE GOVERNMENT.

The following is a translation of the report made by the Progressionist Party on the tenth session of the Diet:—

Section 1.—The situation and responsibilities of the Progressionists.

In making up a report of the results of the tenth session of the Diet for distribution among public-spirited men in the country, we have to consider the magnitude of our own responsibility. If we look, is it not perceived that the public are in a state of utter indifference in spite of the growing gravity of Oriental relations and conditions at present? A period of eight years had elapsed since the promulgation of the Imperial Constitution; and yet before any benefits could be derived from it, abuses began to spring up through the unwonted indifference of the people at large. Moreover, the prominent political parties, that ought to be the foundation of the maintenance of the Constitution, have suffered themselves to be divided, the *Jiyu-to* and *Kokumin Kyokwai* having fallen into a grievous state of dissolution. At this stage the Progressionists alone stood firm and prominent in the boisterous arena of politics, taking upon themselves the responsibilities of

State. Any stumbling on their part would necessarily lead to the elimination of the incentive by which both Government and people are stimulated to activity, and internal administration and foreign diplomacy are improved. The loss of such stimulus causes political life to stagnate and decay. The questions of the extension of national prestige and of the perfection of the Constitution are then likely to end in a dream. The principal parties having already dissolved, and insignificant factions sprung up, with experiences so immature that they have early betrayed their want of unity and discipline, the responsibility of the Progressionists, as the only remaining prominent party is incalculably increased. Our advocates by their proceedings in the tenth session of the Diet, have upheld our avowed principles and accepted the responsibility. But the responsibilities of our Party do not end in the short period of one session of Parliament. With perseverance and assiduity we have to proceed further to carry out all the duties that devolve upon us. In order to report upon the tenth session it is necessary for us to state briefly the former relations between ourselves and the present Cabinet.

The public are perfectly familiar with the history of our Party: that we have fought bravely and bitterly against the so-called clan system of Government under the banner which we have raised for the maintenance of the constitution, adjustment of finances, and extension of national prestige. Our attacks upon the Government, however, were simply due to our desire to enforce our principles and our political views. They never originated from feelings of enmity or revenge. Such being the case, we shall not hesitate to lend our help to the Government if the latter is known to act in accordance with our political theories. The former Cabinet was at variance with our views, but the present is the reverse.

The Cabinet with which we now deal not only holds the same views as ourselves with regard to the three fundamental principles, viz., the maintenance of the Constitution, adjustment of finances, and extension of national prestige, but also agrees with us on many other political problems.

We are prepared at all times to assist any one who shows his fidelity to our principles, and it is for this reason that we have changed our attitude from that of assailants to that of adherents. We formerly condemned the policy of affectation by which the Ito Cabinet was characterized, and desired to establish a more open and sincere Cabinet. Meanwhile, the new Cabinet was organised, and the fundamental principles of its policy having been notified, our hopes were gratified. Accordingly, we have put aside our weapons of attack, but still not being satisfied with some of the proceedings of the Cabinet, have resolved to act resolutely and positively with a view to enabling it to pursue its principles with vigour. To this end we came to the following conclusions at our general meeting in November last year:—

1. The Cabinet ought to show itself to be a responsible council of State.
2. The rights and advantages of the nation shall be extended by the alteration of foreign policy.
3. The expansion of armaments shall be adapted to the national resources.
4. The development of the national power shall be accomplished by the encouragement of education and practical industry.
5. Freedom of speech and public meeting shall be expanded.
6. Radical reforms shall be made in the administration, and the fundamental principles of government be developed on a higher basis.
7. The adjustment of finances shall be effected by the restoration of the balance of revenue and expenditure.

The above items are nearly the same in purport as the speech addressed by the Minister President of State to the local Governors, Speech, however fine it is, if not accompanied by action is empty. Statesmen ought to have this warning constantly before them. Should the proceedings of the present Cabinet be contrary to the declarations it has made, we would be under an obligation to attack it. We have thus clearly shown the relations between ourselves

and the present Cabinet, and it must be acknowledged that our friendly relations with the Cabinet are the result of coincidence of principles and views.

In regard to the internal administration as well as foreign diplomacy, we agree with the Cabinet on nearly all points. It is not any one question that induced us to unite with the Cabinet. We shall not therefore alter our position on account of one or two points of disparity. Nor can a prominent party persuade itself to change its avowed principles in a hasty or reckless manner. In the beginning of the organization of our society, we enrolled members on the understanding that we should devote our efforts to the development of the three grand principles of policy to which we have already adhered. Should the present Cabinet be found at any time to be destitute of resolution or competence to carry out those principles, we shall instantly separate from it.

Having thus stated our real situation, and responsibility, as well as our relations with the Cabinet, it will be seen that in taking part in the deliberations, in dealing with the Government, and in discussing the questions before the Diet, we have on no occasion acted contrary to the pledge we have made to the public.

At our extraordinary special meeting held on the 1st November last year, we clearly defined our relations with the Government, and at our ordinary meeting determined on the policy to be pursued towards the Diet. The fifteen problems that came up for our decision were not of the same magnitude or importance, but each had a vital relation to the well-being or financial interests of the people. They have been presented at every session of the Diet, but most of them failed to obtain the approval of a majority. The public are probably familiar with the difficulties experienced in persuading the Government to agree with them, or inducing the Diet to recommend them for approval, but it may be worth while to state the fifteen problems referred to, and to give the results attained.

1.—Press Law Amendment:

This question was presented by the Government in the beginning of the session, but as there were many points on which we could not agree, we prevailed upon the Government to defer to our proposals, and eventually succeeded in rescinding the administrative proceedings in regard to the suspension or prohibition of publication of newspapers. A problem which had led to collisions between the Government and the Diet ever since the first session was thus amicably settled; and the Administration having been deprived of its most dangerous weapon of despotism, it may safely be asserted that we deserve to receive the honour of having achieved one of the greatest benefits obtained in the last session of the Diet.

2.—Amendment of the Law of Public Meeting and Political Association:

We were of opinion that out-door meetings ought not to be prohibited, and that the power afforded to police authorities for the dissolution of meetings at their own discretion must be restricted to a considerable extent.

With these views we revised the Government Bill and allowed it to pass in the Lower House, but to our great regret it was not fully discussed in the Upper House and failed to obtain approval.

3.—Amendment of the Law of Publication:

This was withdrawn by us in consequence of the Press Law Amendment being approved and passed.

4.—The rescinding of the Peace Preservation Regulations:

The Bill bearing on this subject passed the Lower House, but could not be deliberated by the Upper House before the end of the session.

5.—The rescinding of the Law of Premotion:

We introduced this question and sent it to the Government in the form of a Representation from the Lower House.

6.—The Imperial Ordinance with regard to travelling in Korea:

This was abolished by the Government prior to the session of the Diet.

7.—Special system of Administration for Cities: Mr. Koizuka's Bill for the abolition of this system was rejected, while the session closed before the Hatoyama Bill came up for discussion.

8.—Curtailement of Government Expenditures: As the session of the Diet opened shortly after the organization of the present Cabinet, no

important steps could be taken with regard to the compiling of the Budgets, and the result was the adoption of the schemes of finance drafted by the preceding Cabinet. Taking into consideration that excessive pertinacity in advocating reduction of expenditures for administration might lead to confusion in the estimates, we resolved to defer the financial adjustment until next year, with full confidence in the promises of the Government in this matter.

9.—Improvement of the administration of Formosa: So far as the Budgetary items are concerned it seems that the present Cabinet has continued to administer the government of the Island by the establishment of seven Prefectural Offices (although the number was decreased to five by the Budget Committee), instead of three Prefectures and twelve branches. Schemes are also contemplated to expand the organization of Gendarmerie as an effectual garrison against the turbulent natives. The schemes in question were designed to eventually dispense with the movement of troops and to secure the authority of the Imperial Army. Yet we were not fully satisfied with them, and suggested the necessity of selecting competent officers and a more perfect system.

10.—The force of protective troops in Formosa: We insisted upon the curtailment of expenses for the supply of troops in Formosa, but unfortunately our motion was rejected by the majority.

11.—The proposal for shortening the period fixed for the extension of military and naval armament: The Government approved our suggestion, and not only resolved to carry out the schemes of extension at an earlier date than first proposed, but also increased the number of new war-vessels.

12.—The rescinding of taxes for registering personal matters:

The imposition of taxes with regard to the occurrences of daily life, such as births, deaths, and marriages, is utterly against the principles of justice, especially if those taxes are levied without discrimination as to the various degrees of personal wealth. We succeeded in repealing taxes of that nature despite strong opposition.

13.—Amendment of the Law for the Election of Representatives.

A Bill on this subject was in course of investigation when the Diet closed.

14.—Amendment of the systems of Local Administration for Cities, Prefectures, and Rural Divisions:

This measure was passed by the Lower House, but rejected by the Upper.

15.—Amendment of the Law of the Houses:

The measure introduced by us on this subject was also approved by the Lower House, but the session came to a close before it could be discussed in the Upper House.

Of the fifteen problems above enumerated, six referred to popular rights. To those six measures the former Cabinet showed no little opposition. Nevertheless the present Administration was known to appreciate these rights and to be anxious to promote them. Other important questions which we framed at our general meeting, were passed by the House, to the no small satisfaction of our Party. Among these may be mentioned the Customs Tariff, Forest Law, Silkworm Eggs Inspection Law, and the Laws for improving the Divisions of Land, and for subsidizing tea dealers to enable them to extend their markets. The question of the adjustment of finances and the development of popular enterprises is one of the fundamental principles entertained by the Progressionist Party. Neither do we hesitate to say that it was the very cause which led to our union with the Cabinet.

Apart from the above considerations, it must be mentioned that, during the term of office of the Ito Cabinet, the expenditures of the Government having been augmented to an enormous amount, we fully recognised its inability to maintain financial affairs on a sound basis. And we were sagacious enough to predict the confusion of finances in the ninth session of the Diet, and for bungling in this matter the Ito Cabinet was, as we anticipated, dissolved, the estimates from the Government Departments exceeding three hundred million yen against the sum of one hundred and eighty-two millions, the average amount of expenditures for the past ten years. The greatest difficulties to be experienced by its successors, therefore, were in regard to finance. Nevertheless, the short interval of the session did not allow us to effect any satisfactory arrangement, and the result was simply the reduction of some six millions in the Budget.

Count Matsukata, Minister President, had

already declared that he would not fail to adjust the finances by the 31st fiscal year of *Meiji*, and thus we had every reason to assist the Cabinet in the attainment of this object, by prolonging the period for the enforcement of measures in connection therewith.

The situation of the *Yiyu-to* and the *Kotamin Kyokwai* differs widely from ours. These two parties recklessly approved throughout the ninth session, the budgets introduced by the Cabinet, which were virtually destined to lead to the utter bankruptcy of the State, and thus created the source of the present disorganization of financial administration.

THE ASHIO MINE AFFAIR.

Count Kabayama, Home Minister, now on a tour of inspection through the districts alleged to have been devastated by the copper poison from the Ashio mine, was received with acclamation by the leading men among the sufferers in *Oura-gori* in Gumma Prefecture, on the 11th instant. The Minister made a short halt in one of the sufferers' dwellings, where he was informed of all the details of the injury inflicted, and was even shown the poisonous effects on straw grown in the affected districts, which, on being burned, left ashes containing particles of copper. The Count is said to have sympathized with the misfortunes of the farmers with tears in his eyes. Just about this time Mr. Tojo, Director of the Agricultural Gardens, came up and told the Count that what he saw was not copper, but simply the residue of straw ashes collected together. Upon this, hundreds of peasants, furiously indignant cried out:—"Fellow, when you examined the clay in September last year at our request, you clearly testified as to the presence of poisonous matter; but now that you have been bribed by the proprietor of the mine, you attempt to change your decision. You scoundrel! How can you allow yourself to be so treacherous?" With these words the farmers attempted to force a true confession, but were obliged to forego fresh outbursts of indignation in the presence of so high a personage as the Home Minister. When the Director was about to take a *jinrikisha* to go away, multitudes thronged around invoking him to aid thousands of people whose misery and distress had reached its climax, solely through the vile artifices of such a treacherous person as Mr. Tojo. With great difficulty the disturbance was quelled by the intervention of the new Governor and the Police Inspector. It is said that both Mr. Tojo and Mr. Tamura, representative in the Diet for the devastated district, have tendered, in the most sincere terms, an apology for their conduct in the matter.

A meeting of the special Commission for investigating the notorious copper-poisoning affair was held in the Cabinet on the 13th instant. The Commission decided that the following points required elucidation:—

1.—The districts alleged to have been affected by mineral poison from the mine are noted for their weaving industry. The value of their manufactures during recent years has reached the large figure of ten million yen. For dyeing purposes they use great quantities of sulphuric, nitric, and chloric acid, as well as chlorate of potash, and it has long been a subject of discussion among the sanitary community of the district, whether those chemicals have not found their way into the neighbouring rivers and wells, thus inflicting more or less injury upon men, cattle, and plants. The closest attention is drawn by the Commission to that

point, and a chemical expert has been dispatched to investigate it.

2.—The Rural Division of Ashiwo being the largest lime producing district in the Empire, the people have employed lime for the past twenty years as a particularly economical fertilizer. But from an agricultural point of view, lime, though temporarily efficacious, is not permanently beneficial, for it burns up the soil and reduces its productive capacity. The question arises whether the diminished harvests, if they have in truth diminished, may not be owing to this cause.

3.—Bamboo roots in the districts affected by the poison are in a state of decay and do not throw out any small filaments. Botanists are at a loss to understand how the trunks themselves can flourish luxuriantly with the roots in such a condition. There is no parallel in botanical history. At the same time, it is generally considered that such a phenomenon is probably due to some suddenly maleficent influence.

4.—When straw grown in the affected district is burned, its ashes have the character of a mineral substance. There is no precedent for that. A chemist, placing lime in a tube, tried to dissolve it, but failed. He then added nitric acid, but found that although a certain amount of the lime was taken up, much remained in the solid state. Calcium is also a substance that offers effectual resistance to the effects of heat. It is a matter of wonder that grains of corn can absorb the elements of lime.

We give the above as it appears in the vernacular press.

JAPANESE ITEMS.

The *Official Gazette* announces that their Majesties the Emperor and Empress will leave the Palace at 7.20 a.m. on the 17th instant, and proceed to Shimbashi station, whence they will start by the 7.45 train for Nagoya. The night will be spent at the latter place, and the journey to Kyoto will be resumed by the 9.35 a.m. train, reaching Kyoto at 2 p.m.

With regard to the recent appointment of members of the Progressionist Party (*Shimpo-to*) to be Local Governors, it is explained that the step was taken in fulfilment of the Cabinet's pledge to employ men of ability from among the people. In carrying out that intention, the Government had no idea of confining its choice to any one party. Its idea was to select suitable men without regard to their political complexion. Thus, posts as Governors were offered to Mr. Ebara Soroko of the Liberal Party and to Mr. Kajiyama Teisuke of the National Unionists, but neither could be induced to accept. Mr. Yumoto Yoshinori of the Liberal Party was also asked to take office, as were some members of the *Shin-Yiyu-to* (new Liberals) and other parties, but all had reasons that dictated refusal. The Progressionists, in consideration of the support given by them to the Cabinet, asked that ten of their members should be appointed Local Governors and ten to positions in the Central Administration. No promise to make any such appointments had been given by the Cabinet, nor would the application have been entertained had not eminently suitable men been found in the ranks of the Party. So the *Jiji Shimpo* says, at any rate.

It is easy to apprehend the difficulty that prevents the acceptance of official appointments by members of the Liberal, or National Unionist, Parties. Both parties, or, at any rate, sections of them, lie under the imputation, whether just or unjust, of having espoused the Cabinet's cause in deference to considerations not generally potent with honourable men. Any member of either party that might now become a recipient of favours at the hands of the

Cabinet, would inevitably be pointed at as an illustration of the truth of that suspicion, and would be for ever a marked man.

Mr. Takata Sanae, who becomes chief of the Commercial Bureau in the Foreign Office, has for many years been editor of the *Yomiuri Shimbun*. He is a man of undoubted talent, and his parliamentary reputation is scarcely inferior to the consideration he enjoys as a journalist. He will doubtless have a large share of Count Okuma's confidence.

Two more appointments of politicians are announced. Mr. Oishi Masami becomes Vice-Minister of Agriculture and Commerce, in succession to Mr. Kaneko Kentaro, who resigns; and Mr. Koizuka Ryo is nominated Chief of the Mining Bureau in the same Department *vice* Mr. Yamanchi Tokusaburo, who, like Mr. Kaneko, retires at his own request. These changes, as well as the resignation of Viscount Enomoto, seem to be a direct outcome of the Ashio Copper Mine affair. We trust that Mr. Kaneko's services may not remain long unavailable. He is unquestionably one of the very ablest among the rising generation of statesmen, and his nomination to a portfolio would be fortunate for the Cabinet that he entered.

The Navy was to have had its spring manoeuvres in February, but owing to certain changes in the regulations, that intention was not carried out. It is now stated that warlike operations on a grand scale will be undertaken by both services in the autumn. The programme is not yet definitely arranged, but the Navy will have its fighting ground in the seas off Hiroshima, Nagasaki and Kiushu, and its attacks will be opposed by the Fifth and Sixth Divisions of the Army. It is expected that the new line-of-battle ships, the *Fuji* and the *Yashima*, will have arrived by that time, and that they will take part in the manoeuvres.

NOTES ON NEWS.

In a recent issue we quoted a Roman Catholic vernacular newspaper as saying that the Rev. Father Vigroux had published another book, "*Vigroux*" being the apparent original of the transliterated name. We have since learned that the Rev. Father Ligneul was the writer alluded to.

There has been some correspondence in the columns of our local English contemporaries about the name under which a horse is entered for the Spring Races. One writer complains that the name is unfit to be used in polite society, and censures the Race Committee for permitting it to be recorded; another says *honi soit qui mal y pense*. The rejoinder is entirely irrelevant. There can be no question of opinion in the matter. The name is abominable. Its use is an insult to the whole community. It could not possibly be admitted into a race book except on the assumption that all the people attending the Races are either ignorant of the French language or lacking in any sense of modesty. We have no hesitation in saying that the Committee must have over-looked the point. Certainly if no decisive step be taken to correct the foul vulgarity, the presence of ladies at the Race meeting will be small. We note that a writer has the temerity to defend the use of the disgusting term on the ground that Zola employed it

as a *nom-de-plume* in *Figaro*. The idea of citing Zola as a sponsor for propriety is magnificently comical.

Mr. Hoshi Toru, Japanese Minister in Washington, says the *Yomiuri Shimbun*, has collected the views of scholars, politicians and journalists in America on the subject of the annexation of Hawaii, and has forwarded them to the Foreign Office in Tokyo, with an expression of his own conviction that annexation is out of the question.

The same journal repeats the assertion that Count Okuma has instructed Consul-General Shimamura to assume a very firm attitude in negotiating with Hawaii about the immigration question, and that, immediately after the receipt of Mr. Shimamura's report, which is to arrive by the 20th instant, diplomatic action will be taken.

The number of joint stock companies in Japan at the end of last month, exclusive of railway and banking companies, was 1,813, with an aggregate capital of 278,235,047 *yen*. Compared with the statistics for February, there was an increase of 37 companies and 614,400 *yen* of capital.

The number of banks at the end of March was 1,400, with a total capital of 262,379,114 *yen*, being an increase of 23 banks, and of 6,829,600 *yen* of capital. Thus the capital represented by joint stock companies and banks combined was 540,614,161 *yen*.

Chinese naval officers have the business instinct strongly developed. The commander of a gun-boat, the *Tei-yuen*, took 300 passengers on board at Chefoo for conveyance to Port Arthur, charging 50 *sen* a head. The speculation was not happy, for the little steamer's engines broke down just outside Chefoo, and she had to be towed back by a tug-boat.

M. Haas, the French Consul in Chungking, has been invaded. His health seems to have broken down in consequence of the hardships he had to endure when escorting the missionary Fathers from Tachientu to Batang, whence they had been driven with violence ten years previously. M. Haas had arranged that the return should be an imposing affair, and had obtained an escort of 50 Chinese braves. He seems to have won golden opinions among the foreign community at Chungking during his all-too-brief service there.

Some one sent a silly telegram to Nagasaki to the effect that Japan has protested against the contingency of Hawaii's annexation by the United States, and some folks in the southern settlement have been silly enough to believe the tale. Nagasaki now rejoices in a monopoly of the flippantly virulent style of journalism of which other places in this country had more than enough in their time, and, of course, the idea of such an unwarrantable protest on the part of the Tokyo Government affords a fine text for the proverbial sneer and snarl.

Public opinion seems to incline more and more to the idea of a foreign loan. Roughly speaking, Japan has to raise 67 million *yen* this year. She need not, indeed, procure the whole amount before the opening of her next fiscal period, but she must get it sooner or later, and her economists evidently feel that the lend-

ing capacities of the people are pretty well exhausted. They have just been invited to put up capital for starting the Industrial Bank, and in May and June calls for payments aggregating 8½ million *yen* will be made upon the shares of various companies, and taxes to about an equal amount will have to be paid into the Treasury. Idle money seeking investment will probably be conspicuous by its absence. A foreign loan is the plain path out of the difficulty. If only Japan will extend the redemption period of her Bonds sufficiently to make them a reasonable investment, she can get as much money as she wants now that she has decided to adopt the gold standard.

It is evident from the tenor of Count Okuma's instructions to Consul-General Shimamura, as reported by the vernacular press, that this Excellency wisely intends to lay comparatively little stress on the question of Hawaii's legislation for the control of alien immigration, but will insist, rather, upon the obvious breach of Treaty stipulations committed by the Hawaiian Administration, first, in preventing the Consul-General from examining his nationals in order to protect them, if necessary; and secondly in not allowing the immigrants to engage counsel; and by the Hawaiian Judiciary in closing the law courts of the republic to Japanese subjects. These acts are quite indefensible. They constitute flagrant breaches of the Treaty, and how the Hawaiian Authorities intend to justify them, we can not perceive.

The *Yomiuri* says that the losses incurred by the various immigration companies in connexion with the Hawaiian affair aggregate sixty or seventy thousand *yen*. The figure certainly does not seem excessive.

There were 28 fires in Tokyo proper last year, and 252 in the suburbs, making 533 in all. Of that total, 230 were extinguished immediately, without doing any special damage; 224 burned the houses involved, and 79 spread to the dimensions of serious conflagrations. The number of houses destroyed was 1,439; the area covered by them, 228,026 *tsubo* (190 acres); and their total value, 269,000 *yen*. It appears, therefore, that the average value was only 187 *yen* per house, or a little over a *yen* a *tsubo*, which latter figure is quite incredible.

The *Hochi Shimbun* invited its readers, in June, 1895, to register their vote for the merchant enjoying the highest credit in Japan; the most experienced merchant, and the sharpest merchant. The result was that Baron Iwasaki Yanosuke, Mr. Kawada Koichiro (then President of the Bank of Japan), and Mr. Yoshikawa Taijiro were elected to the three posts, respectively. Since then, Messrs. Kawada and Yoshikawa have passed away, and our contemporary having invited votes to fill their places, obtained these figures:—

THE MOST EXPERIENCED MERCHANT.

Mr. Shibusawa Eiichi.....	2,536 votes,
Mr. Yasuda Zenjiro.....	2,082 "
Mr. Otsu Kahei.....	683 "
Mr. Matsumoto Jutaro.....	408 "
Mr. Shoda Heigoro.....	148 "
Mr. Watanabe Koki.....	136 "

THE SHARPEST MERCHANT.

Mr. Nakamigawa Hikojiro.....	1,540 votes.
Mr. Kondo Rempo.....	1,410 "
Mr. Nakano Buyei.....	1,242 "
Mr. Nakao Sanjiro.....	1,147 "
Mr. Mayekawa Tarobei.....	358 "
Mr. Sonoda Kokichi.....	262 "

THE SHANGHAI AFFAIR.

While sympathising fully with the embarrassment of the Consular and Municipal Bodies in Shanghai when they found that the additional tax imposed by them on the Chinese Wheel-barrow men had provoked mob violence, we are profoundly astonished and disquieted by their unfortunate surrender to such a lawless protest. To abandon a measure of the kind in deference to the menaces of a rabble of coolies is to establish an incalculably mischievous precedent. It has been a constant habit with the press of Shanghai, presumably reflecting the views of a majority of the community, to censure in severe terms the alleged want of firmness and resolution shown by this or that Foreign Representative in obtaining redress for an outrage committed against his nationals by the Chinese. But in every instance, some measure of satisfaction has been obtained, and in nearly every instance the disadvantages contingent upon further insistence were at least as great as the advantages. In this Shanghai incident, however, we have the Municipal Council and the Consular Body striking their flag at the sound of a Chinese threat, and virtually establishing the fatal principle that the municipal administration of the Settlement is to be conducted in obedience to the dictates of a native rabble. Nothing calculated to produce such an evil impression had ever previously been recorded in the history of foreign relations with China. If the wheel-barrow men thought that they were hardly treated, their right to protest peacefully was undeniable; but they had recourse to violence from the very outset, and after two or three encounters not only with the police but also with members of the foreign community, they found themselves complete masters of the situation. It is a miserable affair, and that the Shanghai residents should be stirred to the deepest indignation is natural. There is a statement published to the effect that the Consular Body, though originally a party to the levy of the tax, finally warned the Municipal Council that unless the impost was abandoned, no protection need be expected from the vessels-of-war lying in the river. We find it impossible to believe that such a threat was employed, and most assuredly no British admiral or captain could have been a party to it. Even supposing that the tax was unjust—a supposition that we have grounds for entertaining—its abandonment in deference to mob violence was a step so imprudent as to be quite unendorsable by representatives of constituted authority, above all of military or naval authority, and, under any circumstances, we trust that British subjects may count on the protection of Her Majesty's ships against murderous outrage. Foreign communities can not hope to live in China if the possibility of intimidating them is to be thus openly proclaimed to the Chinese. It is perfectly plain that the action of the Consular and Municipal Bodies did not reflect the spirit of Shanghai. The residents are prepared to hold their ground in the face of any odds. What we have to hope is that the misconstruction which will certainly be put upon this most imprudent act may not ultimately involve results far more serious than the contingencies from which the Consuls and Municipal directors shrunk. An opportunity occurred to teach the Chinese that exhibitions of brute force could never pre-

vail against a community of Occidentals, but most unhappily the very opposite lesson has been inculcated.

The epithet "wheel-barrow men" probably sounds strange in the ears of people that have not visited China. For their sake we may explain that the Chinese wheel-barrow is a species of jaunting car. It has seats projecting from either side, and not infrequently one sees a sturdy coolie wheeling along as many as four passengers. Of course there is the goods wheel-barrow also, and there is the wheel-barrow hauled by quadrupeds and steered by a biped. Altogether, the barrow plays a very important part in the transport business of the Chinese.

FINE ARTS EXHIBITION IN TOKYO.

As usual, we have to report that the spring exhibition of objects of art in Uyenopark has been opened before articles sufficient to fill the cases were forthcoming. In that respect the exhibition is no better than any of its predecessors. The *sankohin*, that is to say, the specimens of old workmanship which are sent in for the ostensible purpose of comparison, are tolerably complete, from a numerical point of view, but judged by any artistic, or even technical standard, they leave a very great deal to be desired. Doubtless some of them have interest for Japanese visitors, but, on the whole, we are disposed to think that a better result would be obtained by frankly devoting the whole available space to modern productions, and organizing a special display of pre-*Meiji* examples whenever the support of collectors becomes really cordial. A most attractive exhibition might unquestionably be arranged if the amateurs of Tokyo could be induced to cooperate, but their attitude towards these annual spring affairs is hopelessly perfunctory.

We need scarcely say that wherever the works of modern Japanese art artisans are fairly represented, many beautiful objects invite inspection. The Uyenopark Exhibition is no exception. Although only partially furnished, it already contains specimens indicating steady progress towards higher standards, both technical and artistic. The metal work is particularly good, for though no very imposing objects are displayed, innumerable small pieces, showing the greatest delicacy and accuracy of execution bear witness to the constantly increasing army of skilled artisans. Silver kettles are very much *en evidence*. Apparently a fashion for them prevails. They are not kettles in the Western acceptance of the term, but *yu-wakashi*, of capacity only sufficient for the very limited wants of the tiny tea-utensils affected by the Japanese. Grace of form and purity of decoration are essential features of these vessels, but they have little to commend them to the average European or American. It seems, indeed, that less attempt is made year by year by the exhibitors at Uyenopark to cater to Western taste. The bronzes, the porcelains, the lacquers, and even the enamels now on view show greater sobriety than we have observed at any previous exhibition. Kozan, of course, is *facile princeps* among the potters. He appears to have devoted himself on this occasion to challenging Seifu of Kyoto and Higuchi of Hirado in

their own special lines, for he shows two pieces—one with reserved blue decoration in a yellow field, the other having a lace-work of white slip decoration under the glaze—which are fully equal to the best of Seifu's efforts, and he shows also a fine vase having portions of the *pâte* cut out and filled in with transparent glaze after the Chinese grains-of-rice style. The Hirado master was supposed to have obtained a patent for that special *tour de force*, but it would seem that Kozan does not hesitate to employ the same method. There is an abundance of fine ivory carvings, happily not disfigured by the excessive elaboration of detail that too often replaces faithful line and chaste conception in the glyptic work of modern Japan. When the exhibition is fully furnished, there may be more to say about it, but it does not at present promise to be greatly above the average.

In another building close at hand those interested in modern Japanese painting may see a considerable superfluity of silk disfigured by drawings so meritless as to be, for the most part, ludicrous. There are a few notable exceptions; sufficiently notable to prove that masters of skill and power still uphold the old methods. But the feeling provoked by the display, as a whole, is one of profound compassion for the bitter disappointment awaiting so much misdirected effort.

THE NEW U.S. MINISTER TO JAPAN.

From American newspapers to hand by last mail, it would appear that the post of U.S. Minister to Japan under the McKinley administration was much sought after. Mr. Henry C. Payne, of Milwaukee, it is said, was offered choice of certain foreign missions, and himself preferred Japan, "where there is but little pomp and circumstance and a good opportunity to promote America commerce;" but his wife "would rather go to Europe." Mr. Horace Clerk, of Illinois, included Japan in the list of posts which he was willing to fill. Mr. E. T. Mason, of New York, and ex-Minister Frank L. Coombs, of California, were also candidates for this particular mission. But a man who was announced as a candidate for the Brazilian mission eventually secured the appointment to Japan. The Hon. Alford E. Buck, of Atlanta, Georgia, the new Minister, is a native of Texcote, Maine; son of a Baptist deacon; and a graduate of Colby University (then Waterville College), Maine, in the class of 1859. He chose law as a profession; but, when the war broke out, entered the Federal army, and attained the rank of Colonel. After the war he settled down to the practice of his profession in Atlanta, Georgia; but soon went into politics. He made a reputation as provost marshal, and filled other important positions, and has been a leader of the Republican party in the strongly Democratic state of Georgia. Mr. Buck is spoken of as a man of great sturdiness of character, upright, and sincere. He is probably over 60 years of age.

When the last mail left, the President had not made many diplomatic appointments. It was thought likely that Mr. John Russell Young might be appointed Minister to China. Among those mentioned in connection with the now important position of U. S. Minister to Turkey, was Col. John W. Foster, recently diplomatic adviser to the Government of China.

The Goshima Kanyeki No-gakko (Agricultural School), Nagasaki Prefecture, is to receive yen 800 per annum for five years.

The official *conversations* to be held at the residence of Count Matsukata, will not take place till after the conclusion of the special services for the late Empress Dowager.—*Kokumin Shimbun*.

THE TEA BOUNTY.

The following orders have been issued by the Department of Agriculture and Commerce with regard to the subsidy of 70,000 *yen* to be granted to the Central Tea Dealers' Association for seven years :

Art. I.—The sum of 70,000 *yen* shall be granted to the Central Council of Tea Dealers as a subsidy to be appropriated to the extension of markets for the sale of tea.

Art. II.—The programme for the extension of the sale of tea as well as the estimates of expenditure, shall be determined every year by the Central Council, and the sanction of the Minister of Agriculture and Commerce shall be obtained thereto.

The Minister of Agriculture and Commerce may, if he deems it necessary, issue orders to alter the programme or the estimates referred to. In such cases no objection can be raised by the Central Council.

Art. III.—The enterprises specified in the preceding Articles must be undertaken directly by the Central Council, and in case necessity arises for entrusting part of the work to others, the sanction of the Minister of Agriculture and Commerce must first be obtained.

Art. IV.—The programme as well as the estimates above mentioned shall, under no circumstances, be changed or put into operation except with the sanction of the Minister of Agriculture and Commerce.

Art. V.—As regards the subsidy to be granted yearly, application shall be made to the Minister of Agriculture and Commerce within each fiscal year in times of need.

Art. VI.—The Minister of Agriculture and Commerce may at times despatch responsible officers to inspect the account books as well as the transactions of the Central Council.

No objection can be raised by the Council to such proceedings.

If it is deemed by responsible officers that any irregularity is observable in accounts or transactions, the same shall be corrected at once, and in such cases no objection can be raised by the Board.

Art. VII.—The reports of transactions and the accounts of expenditures shall be presented to the Minister of Agriculture and Commerce without loss of time.

Art. VIII.—The various reports bearing upon the enterprises above referred to, shall, as soon as they are collected, be printed and speedily distributed among the Tea Dealers' Corporations or Councils in Cities and Prefectures, and also among Government offices and private individuals connected with the tea industry.

Art. IX.—In case the measures decided upon by the Council are to be enforced abroad, the same may be placed under the direction or control of overseers in foreign countries, as specified by the Minister of Agriculture and Commerce.

Art. X.—If it is deemed that the object of the contemplated enterprises can not be attained in consequence of these Orders being violated or other inconsistent proceedings carried out, the Minister of Agriculture and Commerce may suspend the payment of subsidy and claim repayment of money already disbursed.

Art. XI.—These Orders are to be observed by the officers of the Council, and their seals affixed thereto.

Art. XII.—The Minister of Agriculture and Commerce may, if he deems it necessary, alter or withdraw these Orders even within the period specified in Article I.

Art. XIII.—With regard to losses, whether direct or indirect, arising in the cases mentioned in Article XI. and XII., no claim whatever can be made by the Central Council.

The memorandum appended to the above instructions states that out of the total subsidy of 20,000 *yen*, the sum of 61,200 *yen* is to be devoted to opening markets in North America and Canada, and 18,000 *yen* to establishing agencies in Chicago, New York, Canada, etc.

At a meeting of tea dealers, held in the Department of Agriculture and Commerce on the night of the 8th instant, Count Okuma spoke as follows:—

GENTLEMEN:—You lately established the Central Association of Tea Dealers, and I am much pleased to be enabled to have an inter-

view with you, and to state my opinions about the Association to a certain extent. There is no doubt that the question of improvement in the production of tea claims immediate attention, and it is hardly necessary to remark that you all hold a similar view on this point. That Japanese tea had found its way into foreign countries is, as you are all aware, to be traced back to the time when the Isthmus of Suez had not yet been opened. Consequently, in transporting a box of tea to the European market at that time, we had to go round the Cape of Good Hope at the southern extremity of Africa; and as there was no steamship service fully developed, not only was much time lost but also a very considerable sum had to be paid for freight. The means of communication as well as the rates of freight could in no way be compared with what are enjoyed at present. The amount of tea then exported must therefore have been insignificant as compared with the present figures, but the quality of the commodity from Japan being excellent, the credit of green tea soon rose in European markets, so that the Ural and Ceylon teas were eventually compelled to yield to the superiority of the Japanese article, which then acquired the victory in this branch of commerce. Nevertheless, Japanese tea subsequently lost much of its reputation abroad, and its credit seems to lessen day by day. Why? The fact is evidently due to abuses of crude and adulterated manufacture. You must perfectly understand that the responsibility of removing these abuses has now devolved upon you. Under these circumstances the Government in approval of a representation made by the Central Tea Dealers' Association, has resolved to grant a subsidy of seventy thousand *yen* annually. The amount may appear too insignificant to achieve the object in view, but as it is granted to assist the development of the tea industry in the present critical period of apathy and indifference, you must fully appreciate the motive of the Government and devote your utmost efforts to improvement of the manufacture and restoration of the former reputation of Japanese tea.

JAPANESE BONDS AND FOREIGN PURCHASERS.

According to the *Tokyo Asahi Shimbun*, rumours are current that an offer made to the Government by Messrs. Samuel Samuel & Co., for the purchase of public loan bonds, has not been accepted. But that is not the case, says our contemporary. Negotiations are still being conducted by the firm. The proposed purchase amounted to thirty-five million *yen* worth of consolidated Bonds bearing five per cent. interest, and the Company offered to buy at the face value (100 *yen*) but Government insisted upon receiving 105 *yen*. Under these circumstances an understanding has not yet been arrived at. The Firm seems to hesitate greatly about buying such a great quantity of bonds at a premium of five per cent., whereas the Government considers that a good price should be procurable in view of the recent adoption of gold monometallism. In truth, the Authorities find themselves placed in a very difficult position. Investigations are now being made to ascertain the comparative rates of various securities in foreign countries. Rumours still circulate that a London firm has offered to take consolidated Bonds as security for a loan at an annual interest of 3½ per cent. The proposal, however, was for War Loan Bonds to the amount of two millions of *yen*, at 4 per cent. interest and a discount of five *yen*.

COAL AND FREIGHTS.

Simultaneously with the recent rise in the price of coal, freight has also risen, especially on the lines between Wakamatsu and Osaka. The rates between these two places were formerly five *yen* per 10,000 cattiees, but they have now risen to over ten *yen*, thus causing embarrassment to factories and commercial companies. The Kwansei Steamship Company, which suspended business for a while on account of the extraordinary rise in the price of coal, has issued the following circular to mercantile companies consuming more than 30,000 tons of coal daily:—

1. The enterprise of the Kwansei Steamship Company, now under suspension, will be recommenced.
2. The sum of 12 *yen* 50 *sen*, viz. one-fourth of the amount of each share, will be called up for the above purpose.
3. All payments in arrear, if any, will be borne by the Weaving Companies.
4. The Kwansei Tug-ship Company shall, for a fixed period of time, enter into special contract with such Spinning Companies to transport coal at low rates of freight.

To the above suggestions twenty Spinning Companies, paper factories, alkali and cement manufactories appear to have consented. The Company proposes to construct seven steam vessels (of 60 horse-power each), and three hundred lighters (capable of loading 250,000 tons of coal), at a cost of a million *yen*, for the transport of coal from Osaka to Wakamatsu, Moji, and Kobe.

LEGISLATIVE NEWS.

On the 12th instant the Law relating to Corporations of Dealers in Principal Staples of Export was duly promulgated. There had been so much delay in publishing this Law that the possibility of its failing to receive Imperial sanction began to be thought of, especially in view of the fact that all the officials directly responsible had resigned. But it does not appear that the resignations in the Department of Agriculture and Commerce were connected with either the above Law or the Law for encouraging the Direct Export of Silk, and since the former has now been promulgated, we presume that the latter also will soon receive Imperial sanction. We append a list of the laws that have been promulgated in the sequel of the Diet's deliberations:—

- Law for altering the Time of paying Interest on Railway Bonds and Public Undertakings Bonds.
- Law for placing the Formosa Finances in a Special Account.
- Laws for increasing the Capitals of the Tokyo and Osaka Arsenal and the Senfu Woollen Factory.
- Law relating to the time of collecting Land Tax in the Islands of Kagoshima Prefecture.
- Law for amending the Railway Construction Law.
- Law relating to the collection of Fees for Game Licences.
- Law for amending the Arsenal Finances Law.
- Law for amending Law No. 92 of 1896.
- Law for amending Law No. 15 of 1894.
- Law relating to the Business of Corporations receiving state aid.
- Law for amending the Press Regulations.
- Law for the Inspection of Silk-worm's Eggs.
- Law for granting permission to a private company to construct a Railway included in the Programme of State Lines.
- Law for the Inspection of Stud Horses.
- Law for amending Law No. 23 of 1895.
- Law of General Tariff.
- Law of Bonded Warehouses.
- Law relating to Unclaimed Lands in Hokkaido.
- Coinage Law.
- Law for amending the Convertible Bank-note Regulations of 1884.
- Law for amending Notification No. 14 of 1885.
- Law for rescinding Notification No. 35 of 1879.

Law relating to Special Procedure as to Taxes in Districts devastated by Earthquake.
 Two Laws for amending the Private Railway Regulations.
 Law for granting permission to a Private Company to build a Railway on the Hokkaido Programme.
 Law for encouraging Deep-sea Fishing.
 Forestry Law.
 Law for Special Procedure with regard to Land Tax in Districts devastated by Foundations.
 Law relating to Corporations of Dealers in Principal Staples of Export.
 Opium Law.
 Law for amending the Law to prevent Collisions at Sea.
 Law for preventing the Spread of Contagious Diseases.
 Law for amending the Law relating to Grants of Land to Local Militia.
 Law for converting the shares of the Joint-stock Fifteenth National Bank into Hereditary Property of the Peers.
 Law for recinding a part of the Registration Law.
 Law for the payment of the Tobacco Manufacture Tax in money.
 Law for preventing Sand-slips.

FAREWELL DINNER TO MR. F. H. TREVITHICK.

On the evening of the 9th instant, some forty members of the Tokyo Club entertained Mr. F. H. Trevithick at a farewell dinner, in view of his approaching departure for England. After the usual toast to the Emperor had been duly honoured, Mr. G. Lowther, Vice-President of the Club, who was in the chair, proposed the health of the guest of the evening in the following terms:—

GENTLEMEN,—I believe it was Dr. Johnson who said "Never speak of a man in his own presence. It is always indelicate and sometimes offensive." I will endeavour to steer between Scylla and Charybdis and be neither indelicate nor offensive, but I feel convinced that in fulfilling my duty of proposing the health of the guest of the evening, you will expect me to say something about him, and you will also agree with me that Dr. Johnson would have made a very moderate Vice-President of the Tokyo Club if he had adhered strictly to the maxim he laid down.

I need offer no apology to-night for addressing you in my own language, a language which, if not identical, is somewhat similar to that used by our guest. You will however forgive me if I do not adopt those flights of rhetoric for which we know him, and lose myself in a labyrinth of words, a style he is so fond of adopting. The few words I have to say I propose to put in the simplest form capable of comprehension by the meanest intellect.

Let us then divide our guest into two parts. By this I do not mean that I have any idea of performing a surgical operation. I merely intend to speak first of his serious side and then of his lighter side. That he has a serious side you will all admit. His very name is an indication of it. Gentlemen, those who have heard the name of Stevenson have heard that of Trevithick. It is the name of a family very closely connected with Railway enterprise not only in the British Empire but in other parts of the Globe, and this member of that family is no exception to those who have gone before. The mere fact that he has been in the continued employment for over 20 years of the Japanese Railway Department is a proof that he has done good work and that his services have been appreciated. There are some of you, no doubt, present to-night who can remember the time when the humble *jinrikisha* or the quadruped which goes under the name of a horse in Japan, were the only means of travelling. Those who remember that time will appreciate the immense work done by Trevithick and his collaborators. We now have a complete network of railways running from north to south and east to west of the country, with lightning trains starting at every hour of the day and night. The *jinrikisha* has been outdistanced. The horse has been outpaced, and even the bicycle is seriously threatened.

But to turn to his lighter side and the side perhaps that we know the best. It seems to me that when one knows a man well and likes him, one is apt to say to oneself: Why do I like this man? In this case I think there is only one answer. Because he is an honest, straightforward fellow and is invariably good humoured. Gentlemen I have seen our guest under the most distressing circumstances; but I never saw his temper ruffled or his good-nature forsake him. I remember meeting him once at one of the fashionable health resorts in the mountains. He was on a walking tour and was detained by four days of incessant rain, with all his garments wringing wet. Deprived of the comforts of whisky and literature bring with them, he sought solace in a walk on the fashionable promenade. His costume when I met him was that generally reserved for the solitary moments of

the night, but yet under these painful circumstances he appeared bright and contented. I have seen him playing at whist with large stakes and heavy bets. At the critical point of the game his partner revoked and the rubber was lost. Not a murmur of disapproval or annoyance passed his lips. He took it as a matter of course. I have likewise seen him under the still more distressing circumstances when he himself revoked. A look of surprise and a cheerful smile were all that followed the disaster.

Last year our friend was attacked by an epidemic that was raging in Tokyo. He had rather a severe attack, and his oldest friends did their best unsuccessfully to cure him. I allude to the bicycling mania. Confident of his powers and the speed to which he could attain, he sought out one almost as stout and almost as old as himself, who had also recently been attacked by the disease, and challenged him to a race for a stake. This is the only occasion on which I can remember our friend making a losing bet. He was hopelessly defeated. His antagonist forged further and further ahead and eventually left him half a mile behind, but with the dogged pertinacity which characterizes him, he plodded on in the hopes of an accident occurring to his adversary. After the race—not a word of disappointment or excuse. If I remember rightly, for I was there, all he said was, "Have a drink." Since then he has used the means of locomotion given him by nature.

There are many stories told against our friend Trevithick. I will not attempt to remind you of them. Were I to do so I should be here till midnight. But to those who have not known him long I say, "Do not believe these stories. To look at him he may seem as simple as a village maiden but beneath that appearance of simplicity there is a fund of common sense and a power of taking care of himself of which we may all be envious." To those who have known him long I would say, "You are fortunate, for in him you have a friend, an honest fellow, and a genial companion."

Our friend has so far departed from his usual reserve as to tell us that he is leaving Japan by steamer. His habitual caution forbids him to give us the name of that steamer or to tell if he has taken a return ticket. We will not encroach upon his reserve. But he will, I hope, not take it ill of us if we curse the hope that his departure is only a temporary one and that we may see the jolly face of our good friend here again very soon. I ask you to drink to his health.

Mr. Trevithick, who was heartily cheered on rising, said:—Mr. President and Gentlemen—I thank you most heartily for the hospitality you have shown me this evening, and for the cordial manner in which you have drunk my health. Mr. Lowther has said a great many nice things about me. I should like to think that I deserved them, but I can not do that. I regard them rather as a fresh evidence of the friendly sentiments you have always displayed towards me, and I shall treasure their expression as a delightful sequel of the long and happy intercourse I have had with you all. We have been together for 18 years; during the whole of that time I can not recall anything in our relations that will not be a pleasant reminiscence to me. I see many Japanese friends about me, and I wish them to know that what I say applies to them also. I am leaving Japan because, to put it briefly, the Japanese think that they can do without me. They have reached a stage where they can manage their railways without foreign aid, and of course they are right to be independent. At the same time, it is a satisfaction to me to reflect that, before leaving the country, I have been able to see the practical vindication of some of my views. A few years ago, I employed some of my spare hours preparing a paper for the Asiatic Society on the subject of railways in Japan, and in that paper I deprecated the formation of a number of small companies to build and control short sections of road. I need not recapitulate my reasons for that view. It is enough to say that a tendency to form such companies developed itself, as you all know. But their experience has evidently convinced them of the disadvantages of such petty enterprises, for we now see on all sides an inclination to amalgamate, and in several cases union has actually taken place. I wish the fullest success to Japanese railways, and I can honestly say that my relations with railway officials in this country have always been of the pleasantest character. Gentlemen, I am leaving you with regret, and I will confess that even the prospect of re-visiting the old country would not look so bright if I might not treasure the hope of coming back to you in a year or two. Meanwhile, I wish you health and

happiness of every kind, and I thank you again most heartily not only for the honour you have done me this evening, but also for your continued and unvarying kindness through so many years.

PUBLIC WORKS IN GIFU.

Information is to hand to the effect that Public Works Loan Bonds are to be issued in Gifu prefecture according to the following methods and process of subscription:—

1. The Bonds raised shall amount to 313,400 yen, of the face value of 500 yen, 100 yen, and 50 yen.

2. The period of subscription shall be from the 20th to the 24th of this month.

Subscribers are required deposit ten yen on each bond of 100 yen, with their application, to be forwarded to the Government Office or any Rural Office in Gifu.

3. When the amount of subscription is settled, notice shall be given of the fact to the applicants, the money paid as deposit being appropriated to the payment of the first call. The remainder may be paid in the following instalments:—

Second period, from 16th to 31st of May this year,—40 yen.

Third period, from 16th to 30th of October this year,—the balance.

ART UNION LOTTERY.

The lottery advertised by the Royal Institute of Painters in Water Colours, for July 12th, is attracting much attention in England. It is the second affair of the kind, the first having taken place ten years ago. Among the prizes are to be three original drawings by John Ruskin, and more than 50 pictures in water colours by John Constable (1), J. M. W. Turner (2), P. De Wint (8), David Cox (1), Wm. Hunt (1), T. Gainsborough (1), George Barrett (1), John Varley (7), S. Prout (6), Copley Fielding (1), J. S. Cotman (3), Geo. Chambers (1), W. Müller (4), Jas. Holland (4), J. R. Cozens (1), R. P. Bonington (2), S. Austin (2), H. Edridge (1), M. A. Rooker (1), E. Dayes (2), L. Francia (2), P. S. Munn (1), Geo. Dodgson (2), R. Hills, (1), G. F. Robson (1). The modern artists, members of the Royal Institute, who have promised to contribute one or more drawings each, are:—

Sir James D. Linton, President; E. M. Wimperis, Vice President; C. R. Axon; J. Annonier; Edwin Bale; Gordon Browne; Edgar Bundy; Arthur Burrington; H. Caffien; Robert Carrick; Hugh Carter; Chas. Cattermole; Miss Marian Chase; E. H. Corbould; F. G. Cotman; Frank Dadd; Edward Davies; Lucien Davis; Miss Jane M. Dealy; Frank Dillon; J. C. Dollman; Mrs. W. Duffield; Geo. S. Elgood; Bernard Evans; Ed. H. Falley; Miss Emily Farmer; Robt. Fowler; John Fullerylove; Miss Mary L. Gow; Chas. Green; Townley Green; Miss Kate Greenaway; E. J. Gregory; A.R.A.; C. MacIver Grierson; Anderson Hague; Miss G. Dmain Hammond; St. George Hare; Wm. Hatherell; Claude Hayes; Edwin Hayes, R.H.A.; Mme. Teresa Hegg; Harry Hine; Miss A. M. Hobson; C. E. Holloway; Thos. Huson; C. E. Johnson; Cyrus Johnson; G. G. Kilburne; Albert Kinsley; Veend King; Jos. Knight; G. Sheridan Knowles; Walter Langley; Sir Coutt Lindsay; Max Ludby; Thos. R. Macquoid; Percy Macquoid; Joseph Nash; R. B. Nisbet, A.R.S.A.; James Orrock; Alfred Parsons; J. Bernard Partridge; H. Pilleau; Thos. Pyne; Wm. Rainey; H. M. Rheam; John I. Richardson; Mme. Henriette Ronner; John Scott; Arthur Severn; Wm. Simpson; Carlton A. Smith; Miss Alice Squire; Chas. J. Staniland; H. R. Steer; H. J. Stock; Sir John Tenniel; W. L. Thomas; Leslie Thomson; Frank Walton; Edmund G. Warren; W. H. Weatherhead; A. W. Weedon; Geo. Weatherbee; John White; Miss K. M. Whiteley; J. W. Whympier; T. Walter Wilson; W. B. Wollen; Miss A. M. Youngman.

In addition to a chance, or chances, in the lottery each subscriber is entitled to a print of one or both of the pictures "Between Two Fires" (by Millet), and "The Approach to Venice" (by Turner). The tickets are to be one guinea, with an extra charge of a shilling for a packing case for each plate. Applications can be made locally through Messrs. Kelly and Walsh.

THE SENDAI SCHOOL DIFFICULTY.

(COMMUNICATED.)

MR. YOSHIMURA TORATARO, hitherto Director of the Second Higher School, has resigned that post and been appointed an Advisor to the Department of Education. Mr. YANAGISAWA MASATARO, who for the past two years was director of the Gumma Ordinary Middle School, has been chosen to succeed Mr. YOSHIMURA. Mr. YANAGISAWA is comparatively a young man. He graduated in philosophy at the Imperial University about ten years ago, and continued his studies in connection with the institution for several years, subsequently taking office in the Mombusho, where he was engaged in cartography. He afterwards resumed his studies at the University and continued them until he was appointed Director of the Gumma School.

Mr. YOSHIMURA has reached an age when, in the natural course of things, his retirement from the arduous post filled by him for eight years might have been looked for. But there is no disguising the fact that his resignation is regarded by the students as the result of their strike, and that it will consequently furnish a precedent for similar commotions in other schools. Not being in possession of any particulars other than those that have appeared in the vernacular press, we are not able to write confidently. We strongly suspect, however, that the surrender of the students was by no means unconditional, but that, before hauling down their flag, they ascertained in some way or other that their demand—request we cannot call it—would be granted at a later date. Thus we are confronted with the fact that it is possible for the students of a public school to usurp the functions of the Department of Education—to insist on the removal of a high officer who has received his appointment direct from the Department. That is the ugly side of the situation. But it has other aspects.

No sooner were the facts connected with the disturbance made known than impartial onlookers perceived that the Mombusho had a weak case to defend. Mr. YOSHIMURA seems to have been the victim of mistaken police information; not only in the case already mentioned in these columns, but in another equally unfortunate one, where a very promising and highly respectable student, having travelled in a railway carriage with a pickpocket, was accused by the police of a theft, and on the strength of the accusation was dismissed from the school. His innocence was subsequently established beyond a doubt. Now considering the voice that students in Japan are allowed to have in the management of schools, considering, too, the ages and the knowledge of the senior students of an institution like the Second Higher School, it could not reasonably be expected that they

would remain quiet while such wrongs were perpetrated. The keen interest that they take in the prosperity of their school and their readiness to give advice as to its better management, are surely to be commended rather than condemned. As a matter of fact those tendencies are encouraged by the teachers themselves, who often derive great assistance from knowing the mind of the students on proposed alterations. It is very easy to decry Japanese methods of managing schools. But the important question is, do these methods, on the whole, work well? Are they not the outcome of influences and circumstances impossible to control? The English school system would not work here for a single day. The insubordination of students complained of so much in some quarters, is only skin-deep. The testimony of all teachers well versed in the art of managing youth is that Japanese students are remarkably easy to handle so long as they are treated considerately, and so long as they receive the respect due to pupils many of whom have long since reached the age of manhood. There is no denying that, in the large majority of instances, school disturbances have been created by the manner in which real grievances have been treated by school authorities when brought to light. In arguing thus we are far from defending a school strike of the dimensions of the Sendai affair. As we pointed out on a former occasion, the resort to a strike was the most objectionable of all courses open to the champions of the wronged students. That they should meekly submit to the blot cast upon the reputation of fellow-students by the action of the late Director was not to be expected. Had such an irregularity excited no interest, elicited no comment, a hopeless state of servility, or moral obliquity, must have been attributed to the students. Having decided to agitate, they determined to make the success of the movement sure by extending it to its utmost limits. They did not stop to consider whether the evils incidental to such a policy would not enormously exceed the good to be attained. They exaggerated the importance of their cause and, with the object of striking an effective blow at an existing abuse, did not perceive that by taking the law into their own hands they were aiming a blow at duly constituted authority, and attempting to establish the right of the ruled to force certain action on the rulers. That is democracy in the schools. Its existence has long been recognised by the managers of the great educational establishments of the country. No violence, we believe, was ever contemplated. The position the students took was that they should remain no longer in an institution where the Director was allowed to com-

mit grievous mistakes without being called to account for them. They made his removal a condition of their continuance in the school.

If we may judge from the extremely lenient punishment prescribed by the Department, it would seem to have been fully recognised in high quarters that the students had a strong case, and that the situation called for conciliatory treatment. But the unfortunate part of the affair was that the Department took so long to reach that conclusion. If from the outset it had been recognised, and the student delegates had been informed of the fact, we venture to think that nothing like a general strike would have taken place. With things as they now are, it seems to us to be useless to try and defend a weak case. There was an attempt last year in some quarters to palliate the CARRUTHERS episode but an indiscretion had been committed and the subsequent efforts to justify it on unjustifiable grounds, ended, as had been foreseen by many at the commencement, in the enforced resignation of the teacher concerned.

The whole question of the management of schools will no doubt engage the earnest attention of the Educational Council now about to commence its sittings. Opinion is divided as to the possibility of curtailing the power exercised by students in the management of the schools they attend. Not a few experienced teachers hold that, properly handled, there is nothing to fear from that source. They argue that the exercise of a certain amount of power furnishes a moral training to the student of a highly beneficial kind. The hopeful element in the position is the amenableness to reason that the majority of the senior students display. All authorities are agreed that the schools would be more manageable were the pupils younger, but in order to obtain younger students it is necessary that the tedious study of Chinese ideographs, which occupies the early years of a boy's life, should be considerably curtailed. How to effect that desired end is a problem that leading educationalists from year to year agree to leave unsolved, and even, for the most part, undiscussed, notwithstanding the fact that it is the most urgent of all urgent questions of the time, and has more to do with the success of the Japanese in the keen competition with the West on which they have entered, than all the noisy topics now engrossing the attention of political orators throughout the country.

Mr. W. Peterson of England, who is connected with large English shipping interests, has signed a provisional contract with the Canadian Government for a fast transatlantic steamship service of four boats of 10,000 tons each, to be ready in two years and to steam over twenty knots per hour. The subsidy to be paid by Canada is said to be \$500,000 per year and the British Government, it is understood, is ready to contribute \$250,000 per year in addition.

THE HAWAIIAN AFFAIR.

IT is impossible to avoid the conclusion that there has been a violation of the Treaty—more than one violation, indeed—on the part of the Hawaiian Government. Modern international law tends to admit the principle that a State's competence to safeguard itself by legislation against an inconvenient influx of alien races may be exercised without absolutely strict regard to the stipulations of treaties. That principle has certainly found expression in the practice of the United States towards the Chinese. If the terms of Japan's Treaty with Hawaii were strictly observed, every class of Japanese subjects would be entitled to enter Hawaiian territory without let or hindrance of any kind. Hawaii, however, has considered it necessary in her own interest to enact laws for the control of labour immigration, and Japan has given tacit assent to those laws. But it is beyond question that the laws must be lawfully enforced, and that every Japanese subject must be protected against their abuse. That is where Hawaii's procedure has been flagrantly faulty. Her immigration laws require that one of two conditions must be satisfied in the case of an alien coming to her territory for the purpose of labouring there. He must be either in *bonâ fide* possession of a sum of fifty dollars, or under contract to serve for a term of at least two years in the employment of a Hawaiian citizen. It is alleged, on behalf of the Japanese, that one or the other of these conditions was fulfilled by all the recent immigrants, yet they were prevented from landing, the Deputy Commissioner of Customs in Hawaii pretexting that those who came as free labourers with the prescribed sum of fifty dollars in pocket, had been furnished with the money merely as a temporary measure, and that in the case of those who came under contract, some formality, apparently independent of the textual provisions of the law, had not been satisfied. With regard to the latter point, fuller information is required before we can form a definite conclusion. But with regard to the former, the Japanese will certainly not be disposed to concede the Hawaiian officials right to go behind the actual fact of the money's being in an immigrant's possession. That fact is the only practical and trustworthy test. However, there is room here for a difference of opinion. It may be claimed, with some show of justice, that the qualificatory words *bonâ fide* do, in effect, invest the officials with competence to examine the question of the money's *provenance*, and to determine whether it is a genuine asset. Still, to admit such a claim would open the door to all kinds of vexatious inquisitions and unjust discriminations. On the other hand, what can not be defended for an instant is the refusal to grant legal facilities to the Japanese, and their exclusion from

the Courts of Law in Hawaii. There the Treaty was flagrantly violated. Japan is conventionally entitled to most-favoured-nation treatment, and the Treaty between Spain and Hawaii provides that Spanish subjects shall "enjoy constant and complete protection for their persons and property" in Hawaii, shall have "free and easy access to the Courts of Justice in the pursuit and defence of their rights in any instance and degree of jurisdiction;" shall be "at liberty under any circumstances to employ lawyers, advocates, or agents of any class whom they may see fit to authorize;" and, "in fine, shall enjoy the same rights and privileges granted to natives, and shall be subject to the same conditions." In defiance of those most explicit provisions the Japanese immigrants were not allowed to engage legal assistance, and declared to be outside the pale of the law, the Supreme Court ruling that they did not come within its jurisdiction until permitted by a Deputy Commissioner of Customs to land on the island. It is exceedingly difficult to attribute such procedure to legal experts. The Treaty between Japan and Hawaii covers all intercourse and transactions between Japanese subjects and Hawaiian citizens without any limitation. The condition that landing in Hawaii is a necessary preliminary of access to Hawaiian law courts becomes manifestly absurd when we remember that a Japanese subject living in Tokyo and holding property in Hawaii, would be plainly entitled by Treaty to claim the protection of the Hawaiian Courts in everything relating to that property. We can not conceive any serious assertion of the pretext that a Government is entitled to entrust to a petty official like a Deputy Commissioner of Customs absolute authority to determine when and where it shall be required to fulfill the Treaty obligations devolving upon it *vis-à-vis* another State. Of course Japan can not consent to any such frivolity, and if the Hawaiian Authorities imagine that they will be supported by the Washington Cabinet, they will find themselves much mistaken. The United States would doubtless sympathise with their legislative efforts to control the immigration of alien labourers, but nothing in the record of American statesmanship warrants the Hawaiians in expecting it to endorse procedure such as that adopted by them in this instance.

REPRESENTATIVE GOVERNMENT.

Commenting on some imperfect points in representative government, the *Nippon* pens a long warning to Japan. It commences its remarks by saying that there is a regular road of progress for human society. To proceed either to the left or to the right is a matter which must be accomplished in conformity with pre-determined plans. The path is not very distinct to the human eye, and appears as dim as when a man is walking with a lantern on a dark night. Yet the course is not altogether invisible. Some, however, fail in their progress, and in such case it is their

duty to warn others not to fall into similar mistakes. China has pursued the course of her predecessors to the last. As for the Japanese, they once trod in the same path with China, but having reached the summit, turned their steps towards Europe and America, considering that those continents had acquired considerable experience in social progress and were well qualified to be her guides. Notwithstanding that Europe and America sprung up at a comparatively later period than China, they soon overtook the latter, and so Japan is now endeavouring to follow in their track at full speed. That she has been exceedingly rapid in her movements is simply owing to the absence of obstructions in the path taken. Yet modern Europe and America progressed beyond other parts of the world with the greatest possible haste, and their frequent revolutions are chiefly due to this cause. Their representative forms of government were invariably the outcome of civil disturbances, and it seems that they considered their systems such as could only be purchased by blood. Such is the state of affairs presented in their history, but it can by no means be regarded as a logical consequence that representative systems must be achieved by civil war. The revolutions that occurred in the West could have been effectually prevented had rulers only taken into consideration the popular sentiments of the day. The lower orders of Japan, however, have resolved to unite blindly with the influential classes, and clamour against the principles of socialism now prevalent. The injudiciousness of this proceeding is beyond question. In Europe and America there is a great gulf between wealth and poverty, and not a little difficulty is felt in discovering a way of conciliation. Should the leaders of thought fail to take resolute steps at an early date, the West may not be able to escape further revolutionary movements. Discretion is thus necessary on the part of Japan. If she makes preparations against such contingencies, she may be able, not only to attain the highest degree of civilization, but also to evade similar misfortunes at a time when the West may be involved in serious troubles and embarrassments. She has fortunately acquired her Constitution without bloodshed, and she may equally expect to be able to carry out some of the principles of socialism without turbulence or class ill-will.

FARES BETWEEN JAPAN AND FORMOSA.

We take this from the *Kobe Herald*. The following freight and passenger rates have been agreed upon by the Osaka Shosen Kaisha for their regular services between Formosa and the mainland:—

	PASSENGER FARES.		
	Cabin.	Second Class.	Steerage.
	Yen.	Yen.	Yen.
Kobe-Keelung	21	14	9
Keelung-Takao	12	8	5
Keelung-Shojo	14	10	7
Keelung-Taian	9	5	3
CARGO.			
Kobe-Keelung	8 yen per ton.		
Keelung-Takao	6 " " "		
Keelung-Shojo	7 " " "		
Keelung-Taian	5 " " "		

Parcels of not less than a cubic foot measurement will be charged 40 sen, and those measuring less than 2 or 3 cubic feet will be charged 50 or 60 sen respectively between Kobe and Keelung.

Information received from Seoul on the 10th instant announces there were signs of a rising of Tonghaks in parts of Cholla-do and Chhung-chihong-do; that the peaceful inhabitants in Kang-won-do and three other places were being plundered by the insurgents; and that the Governor of Sam-su having been murdered, the Korean authorities had issued orders to the Commandant of each garrison to arrest ring-leaders and quell the disturbance.

SHIPMENT OF NEW TEA.

The *Yiji Shimo* states that last year the first shipment of new tea was effected on the 28th April, but it is expected to be made by the 24th this year. Dealers in tea in Yokohama have already despatched their men to various districts to make arrangements with the local producers for the coming season. Information from Shizuoka announces that the climate having been so remarkably mild this winter as to cause the cherry blossoms to fall already, the tea districts on the coast of Yajiri and Fujiyeda, which are known to be foremost in the production of that commodity, have completed their preparations to commence picking from the 20th instant. No considerable amount of crop can be obtained, however, at the outset, and it is expected that the first installment for shipment will be very insignificant. It was customary for the tea-producers to send some quantity of tea to Yokohama in the form of presents, but they have determined this year to transmit no amount under fifty piculs on any pretext whatever before the 20th instant.

COMMENTS OF THE WEEK.

This year is an epoch in the history of the National Banks of Japan. The charter of three have already expired, namely, the Sixth (Tokyo), on the 12th of February; the Seventh (Kochi), on the 19th of February; and the Tenth (Yamanashi), on the 21st of March. The same fate will overtake 17 others during the course of the year, namely:—

The Thirteenth, Osaka; 14th May.
The Fifteenth, Tokyo; 20th May.
The Eleventh, Nagoya; 25th May.
The Twelfth, Toyama; 1st July.
The Twentieth, Tokyo; 10th July.
The Fourteenth, Matsumoto; 16th July.
The Sixteenth, Gifu; 7th August.
The Seventeenth, Shizuoka; 21st September.
The Nineteenth, Ueydo; 9th October.
The Twentieth-second, Okayama; 9th October.
The Eighteenth, Nagasaki; 1st November.
The Twenty-third, Oita; 11th October.
The Twenty-first, Nagahama; 29th November.
The Ninth, Kumamoto; 21st November.
The Twenty-seventh, Tokyo; 6th December.
The Twenty-fifth, Ohiama; 16th December.
The Thirtieth, Tokyo; 14th December.

It does not follow, of course, that all these Banks will be closed: the law entitles them to continue their business as joint-stock concerns if the shareholders desire.

The adoption by Japan of a press-rate for telegrams from Shanghai is likely to become an accomplished fact very soon. Considering that messages for which the privilege is claimed may not be sent in cypher, and that it will doubtless be considered necessary to procure a larger number than before, the saving to those subscribing will not be great, but the reading public will doubtless benefit.

The sums deposited in various Tokyo banks according to returns for February of this year and February of last, stand as follow:—

	February 1897 Yen.	February 1896 Yen.
First Bank	4,414,439.....	4,087,173
Third Bank	4,295,968.....	4,251,736
Fifteenth Bank	3,341,266.....	3,215,328
Tenth Bank	2,934,995.....	4,428,094
Mitsui Bank	10,903,358.....	7,969,277
Mitsubishi Bank	5,169,125.....	4,846,681
Yasuda Bank	4,718,788.....	3,520,139
Imperial Commercial Bank	4,093,722.....	4,711,845

Total39,871,661.....37,029,701

The fine rates of interest paid by the Banks are doubtless the chief cause of the increase.

The Cotton-Spinning Factories Union has compiled returns showing that the Reserves accumulated by the 53 companies forming the Union during the latter half of last year aggregated 611,311 yen; the net profits, 2,279,508 yen, and the dividends, 1,275,598 yen. These

figures represent the following averages for each Company:—

Net profits, 43,837 yen; an increase of 5,285 yen as compared with the preceding half year.
Addition to Reserves, 11,056 yen; a decrease of 375 yen as compared with previous half-year.
Dividend, 24,534 yen; an increase of 3,322 yen, as compared with previous half-year.
Rate of Dividend, 11 per cent.; an increase of 1 per cent.

The *Kokumin* thinks that the best course to pursue at present with respect to political parties would be to dissolve them all. Their complexion is so variable and so uncertain that they do not deserve to continue in organized existence. Break them up, one and all, and let something like genuine parties be formed.

We must apologise to our readers for failing to publish either the revised Budget or the General Tariff Bill. The latter being of much importance, we purpose to submit an authorized version; and in connection with the former, we desire to add some figures that involve research.

It is announced that the Rev. J. S. Gale's Korean-English Dictionary will be published shortly. It is to be a quarto volume of 1,096 pages, divided into two parts. The first part will contain 35,000 words; the second, 11,000 Chinese characters, with the most common distinguishing Korean word after each. The price is to be 12 yen. Mr. Gale's reputation as a scholar and his long residence in Korea guarantee the quality of this work.

Messrs Kelly and Walsh give another evidence of their enterprise. They announce the impending publication of "Japanese Self-taught." The work seems to be somewhat on the lines of the now-almost-forgotten volume of phrases by Dr. Brown, which gave so much aid to students thirty years ago. There are to be about 500 colloquial phrases, each written in "familiar" and "polite" Japanese, and we are promised "copious vocabularies of words useful to business men."

The value of the foreign trade of China during 1896 was Hk. Tls. 333,600,000 against Hk. Tls. 315,000,000 for the preceding year. The trade has grown from Hk. Tls. 139,908,438 in 1884 to the present large figure. On the other hand if we consider sterling values, the figures for 1884 and 1896, become 35 million and 51 million pounds respectively. The Report of the Imperial Customs says that in both imports and exports trade was active in 1896 and that the revenue derived from import duties, showed an increase of 1½ million Tls. over the figures for 1895. As to the ports of Soochow, Hangchow and Shashi, opened on October 1st, under the Shimonoeki Treaty, we read that trade was insignificant, the revenue collected by the Customs during the quarter aggregating only Hk. Tls. 6,180. The total Customs collection of 1896 was Hk. Tls. 22,519,000, showing an increase of Hk. Tls. 1,193,000, despite the loss of the Formosan contingent which represented over a million Tls.

Despite the above fine figures, the record is not altogether rosy. As in Japan, so in China, great quantities of imported goods remain unsold, and a marked falling-off of imports is expected this year.

NEWS OF THE DAY.

Four steamers have been chartered to carry steel rails and locomotives from Philadelphia to Japan.

The Admiralty has authorised the expenditure of £100,000 at Hongkong, with the view of making the port a first-class naval base.

The Japanese battleship *Fuji* arrived at the Nore on March 4th from the Victoria Docks. She went to Chatham Dockyard next day to be docked.

The *Official Gazette* announces that Mr. Higami Shimakichi, the captain of the steamer *Tokiwa Maru* (287 tons register), which colli-

ed with the British steamer *Barmoral* at Nagasaki on the 26th December last, had his certificate suspended on the 22nd ult. for three months by the Nagasaki Marine Court.

Captain Craig of the E. & A. S.S. *Manmuir* has been presented with the Portuguese Royal Military Order of our Lord Jesus Christ for services rendered in connection with the transport of officials and troops during the Timor rebellion.

During the recent riot at Shanghai both the Shanghai Club and the Club Concordia were placed at the disposal of the Volunteers; and the proprietors of the Japanese Hotel in North Honan Road, the Committee of the Mercantile Marine Officers Association, Mr. Geo. McBain, and Mrs. Jansen, Proprietress of the Astor House, also kept open house for the members of the various Defence Corps.

Mr. S. M. Severin, a Portuguese clerk in the employ of the Japan Brewery Company, was arrested by the Bluff Police on the 12th instant on a charge of fraud of some kind, but what the actual accusation laid against him is, or by whom it is brought, we have been unable to learn from the Police. His employers, we are informed, know nothing of the reason for his arrest. The accused has, however, been handed over to the Saibansho for examination.

Residents on the Bluff who availed themselves of a fine day for a run into the country, relying upon the Yokohama Union Electric Light Company to brighten their homes on their return, were again in distress on Sunday night. After the expense of installation, the high charges for a very poor and irregular light, to which is added \$3 a month for an unreliable meter, the patrons of such a company may be excused for wishing they had ever abolished their old oil lamps.

We learn from *El Comercio* that the Governor-General of the Philippines published, after the fall of Imus, an amnesty to all concerned in the rebellion on condition that they presented themselves before Palm Sunday (11th April), promising them freedom from molestation if they surrendered to the military authorities, and suspending all prosecutions that might be pending against them. There were six Spanish officers killed at the capture of Imus and 14 wounded, and 29 soldiers killed and 117 wounded.

During a recent all-night sitting in the Tasmania Assembly, Mr. Attorney-General Clark took off his boots, and dreamed in his socks as he lounged on a bench, and Mr. Gill, M.L.A., snored heavily beside him. Some one called the chairman's attention to the noise, but he refused to interfere. "The remarks of the hon. member who is asleep," he said, tartly, "are quite as much to the point as those of the hon. member who unfortunately remains awake."

The judicial proceedings lately held in Nagasaki, by J. H. Longford, Esq., H.B.M. Consul, sitting as a Master in Lunacy, are painful reading. The enquiry was held into the mental condition of Mr. Arthur Norman, proprietor of the *Nagasaki Rising Sun*, one of the oldest foreign residents in Japan. One of the witnesses called was Simeon Forest Lawrence, Constable at the British Consulate, under whose charge the poor demented fellow had been placed for several weeks. This person stated that during the first fortnight Norman was doing nothing but writing letters and telegrams. These were addressed to the Commander-in-chief of the Navy; the British Minister; Lowder, Yokohama; Baring, London, and many others. By request of the Court one telegram was read. It ran as follows:—Telegram to His Excellency, the British Minister, Peking, China, December 25th, 1896. Your Excellency, I have the honour of informing you that after serious consideration I have been inspired to solve the almighty problem of turning the world upside down. No Emperors or Emperresses, kings or queens, presidents or Governors, Ministers of State, prime ministers, princes of royal blood, statesmen,

politicians, philosophers, admirals, or all the wise men throughout the whole creation have—."

As the P. & O. steamer *Rosetta*, with the homeward mail, was approaching Hongkong on April 5th, about ten o'clock at night, she collided with a fishing junk. The lifeboat was promptly lowered and careful search made for the crew of the junk, but no trace of them could be found. There was a large fleet of fishing junks in the neighbourhood and it is possible that the crew of the junk that was run down may have been picked up by a companion craft.

It is notified in the Hongkong Government *Gazette* that seamen serving in vessels belonging to the C. P. R., the P. & O., or other subsidised merchant-cruisers, may join the Naval Reserve at Hongkong on application to the Commodore; also that payments for retainers to Royal Naval Reserve men may be made in Hongkong. This is a wise step on the part of the Admiralty, says the *Daily Press*, and ought to lead to the strengthening of the Reserve. Hitherto men have only been able to join at home.

A public farewell was tendered to Mr. and Mrs. MacTavish at Kobe on Tuesday. It took the form of a tiffin at the Gymnasium and was a most successful affair. Mr. Consul Hall proposed the toast of the departing friends. In the course of his remarks he said—"They were living in a time not of war but of great preparations for war. Yet the tendency of society was not towards war at all but towards peace and commerce. Modern society was like a pyramid built up in four divisions. At the base came the working man, next the manufacturer, then the merchant who distributed to all the world products of civilization. But could commerce, he asked them, be carried out on any large scale without the Bank, and it was the Banker therefore who stood at the apex of the social pyramid.—(Laughter and applause.) He was perfectly serious in what he said: the greatest thinker of modern times looked forward to society being controlled in the future mainly by the Bankers."

The people who revel in the supposed signs of Great Britain's national decay, will get little satisfaction from the figures brought forward by Mr. Ritchie at the Chamber of Shipping, says the *Daily Press*. The growth of the shipping industry during the Queen's reign is a monument of successful energy too solid to be explained away by any amount of pessimistic theorising. The number of vessels on the register is about the same in 1896 as in 1836; but the tonnage has increased fourfold because of the substitution of steam for sail. The tendency is still to increased size both in steam and sailing ships. Of course, we know that as regards steam; but it will probably be a shock to many to learn that the largest sailing-ship of 1837 was not much more than one-third of the tonnage of her reigning successor. The champion steamer afloat is the *Lucania*; but there is one on the stocks which will beat her by 2,000 tons. This "leviathan" is to be 680 feet long and 68 feet wide, with a tonnage of 15,000.

The *Rising Sun*, Nagasaki, reports that on Monday evening a murderous assault was attempted by a gang of drunken coolies upon a party of five foreign residents who were returning to the Settlement from the Rowing Club's new boathouse at Kosuge. The first in the party attacked were Messrs. C. M. Birnie and M. C. Adams, who were in advance of the rest on bicycles. Messrs. H. Smart, W. H. Evans and E. L. Conan, who were following, were also held up by the drunken ruffians, and, though Messrs. Birnie and Evans had a hard fight of it, Mr. Conan, who had his shirt torn off his back, literally speaking, was the most seriously knocked about of the party. A regular pitched battle was in progress for a while, the coolies yelling "Over the cliff with them?" "Kill them!" etc. in Japanese. Mr. Evans was nearly thrown over at one time, but hung on to his assailant and saved himself. The police subsequently arrested two of the miscreants, who were identified by Messrs. Conan,

Birnie and others at the Settlement Police Station a short time later. The matter was reported to the British and American Consulates.

Hongkong has not yet quite made up its mind as to the form its permanent memorial of the Diamond Jubilee shall take. At a recent meeting of the Diamond Jubilee Committee, the various schemes for a permanent memorial were taken into consideration. There were in all twenty proposals, of which fourteen were rejected and the remainder referred to a sub-committee for examination and report. The choice, we understand, lies between the proposed hospital for women, with training institute for nurses, the College of Medicine, and the road round the Island. Two of the other proposals that remain under consideration may be taken as an addition to the principal memorial; they are, an oil painting of Her Majesty to be placed in the City Hall, and the completion of the Queen's statue now standing on the Praya. The remaining proposal is that of the erection of a women's and children's hospital in connection with the Civil Hospital, which is a variation of the scheme for a women's hospital and nursing institute, and the two will no doubt be considered in combination.

The *Fiji Shimp* gives the following particulars with reference to the silk industry in Gumma prefecture:—The agricultural industry of Gumma consists of mulberry-planting for silkworms, the cultivation of rice and other grain being considered as an occupation of only secondary importance. The crops from both dry and irrigated fields do not exceed in value the proceeds from the mulberry plantations. Not a place in the prefecture but is engaged in the silk rearing industry, the densely-populated towns and the weaving district near Kiriu alone excepted. The statistics of the 27th year of *Meiji* show that 400,000 silk-worm cards were taken for rearing, while the prefecture then consisted of only 80,085 houses. In the production of cocoons, therefore, it ranks next to Shinshiu and above Fukushima, the amount being no less than 100,000 or 200,000 *koku*. The order in which the prefectures stand with respect to the production of cocoons is as follows:—Nagano, 490,000 *koku*; Gumma, 200,000 *koku*; Fukushima, 180,000 *koku*; Saitama, 170,000 *koku*; Gifu, 130,000 *koku*; Yamanaashi 100,000 *koku*.

A special telegram to the *China Mail* from Singapore, announces that Mr. H. Arthur O'Brien, of the Straits Civil Service, has succumbed to an overdose of morphia. The deceased gentleman was a brother of Sir George T. M. O'Brien, at one time Colonial Secretary in Hongkong, now Governor-elect of Fiji and High Commissioner for the Western Pacific. In the latest edition of "Whitaker Almanac," Mr. O'Brien is stated to have been First Magistrate at Penang. His record in the "Colonial Office List" is as follows:—O'Brien, H. Arthur. —Writer, Straits Settlements, 1875; passed his final examination, 2 Nov., 1878; attached to office of Lieut.-Gov., Penang, Mar., 1879; assistant magistrate for Penang and Province Wellesley, 1879; commissioner and magistrate, Malacca, Jan., 1883; acting resident, Sungei Ujong, May, 1884, to June, 1885; acting resident councillor, Malacca, July to Sept., 1885; acting senior magistrate, Singapore, April, 1886; postmr.-gen., Str. Settlements, 1888; ag. col. treasurer, 1891; ag. audr.-gen. S.S., May to Nov., 1892, and Sept., 1893, to Sept., 1894. Deceased was a son of the Right Rev. James Thomas O'Brien, Bishop of Ossary and Ferns.

At the end of last year the fleet of the Osaka Shosen Kaisha, says the *Kobe Chronicle*, was composed of 55 steamers with an aggregate tonnage of 22,658 tons. Three new steamers have already arrived and four others are expected out before the end of June. Delivery of the vessels which are now being built at the Nagasaki Yard and the Osaka Iron Works is expected in the latter half of the current year. Excluding the vessels which have been sold or have recently foundered, the fleet of the Company will reach 43,337 tons in the next half-year. The Com-

pany's revenue in February last showed an increase of about 22,000 *yen* over the amount for February 1896. The Company has incurred additional expenditure, however, in removing the sand which has silted up at Kawaguchi, while 1,500,000 *yen* in cash for defraying the cost of vessels now being built in England has been lying idle. From this month, an annual subsidy amounting to 462,500 *yen* will be given for the Formosan line, and 110,000 *yen* for the transport of mails. The Company has arranged to make a call of 3 *yen* on each new share in June and July next, and the money will be applied for the purchase of three more large steamers, which will complete the extension of the Company's fleet at this stage.

Papers received by the *Peru* contain news of the arrest at Meridian, Texas, on the 15th ult., of a man going under the name of "Professor" Forbes, who is believed to be identical with Josef Blanthier, the supposed murderer of Mrs. Philopena Langfield. At latest advices the prisoner was held at Meridian, awaiting identification by a detective and a former friend of Blanthier's named Dodge, who had been sent from San Francisco for that purpose. After his arrest the prisoner attempted to poison himself with morphine, but was rescued from death by the doctors in charge. It was found that the alleged Professor Forbes arrived in Kopperl, near Meridian, Texas, the 6th of last July, about a month after the delivery of a letter bearing the Atlanta, Ga., postmark, written by Blanthier to the *Chronicle*, in which he made farewell to the San Francisco police and advised them to hunt for him in foreign lands. Professor Forbes lived a quiet life in Kopperl and was looked upon as an eminently respectable citizen and his wife, notorious as she was in other places, was given the entree into the best social circle in the little town up to the time she left never to return. If the prisoner is Blanthier, he will be brought speedily back to face the overwhelming evidence against him. It is reported that there is also something mysterious about the disappearance of Addie Walker, the woman who was living with Blanthier as his wife up till December last, and it is hinted that another crime may be added to Blanthier's record, when this woman's fate is discovered. The next mail should settle the question definitely whether Professor Forbes is really Blanthier and the murderer of Mrs. Langfield.

Commenting upon the actual situation of England, the *Asahi* says that although it is not precisely known why England preferred standing neutral in lieu of entering into a continental alliance, there is no great difficulty in solving the problem. During many years past, each of the two European alliances devoted its efforts to prevail upon England to advocate its cause. But England did not comply. The policy thus pursued by this Power no doubt originated in the belief that its alliance with the three Powers would immediately induce Germany to challenge France in order that she might be enabled to emancipate herself from the annual burden of her armament. On the other hand, should the English display any friendly attitude towards the two other allies, then France, conscious that she would not be opposed, if not assisted, by England, would instantly prepare to take her revenge on Germany. England saw the danger of her situation in relation to a continental alliance, and accordingly, pursuing a policy of judicious neutrality, looked after her own interests. In short, she held the key to the universal peace of Europe. Her attitude, however, created ill-feeling against her both in Germany and France, and the jealousy of these two Powers was also excited by her policy of colonization. If they only recognised the fact that England, being comparatively small in size, with an overwhelming population, has no alternative for national development but to extend her colonies, promote commerce, and secure maritime power, they would see no cause for enmity. So far as her present position is concerned, England is unable to lend her hand in the cause of other Powers for any active movement, as she is now engrossed by her own affairs.

CORRESPONDENCE.

MISS TERU SONO.

TO THE EDITOR OF THE "JAPAN MAIL."

S R.—In your columns of March 8th a correspondent wrote concerning my present whereabouts, in a very peculiar tone. I am greatly astonished at persons suspecting me without so much as inquiring into my affairs, which are only too well known to the majority of Japanese. Owing to considerations of health and future plans, I resolved to remove my institute from Azabu, Tokyo, to Ito, Izu, some ten miles from Atami. This I did in May last, and the construction of the school building is partly completed. During the course of building I have received students from Tokyo, and everything in regard to the education of females is getting on very well, with every appearance of success. As everyone who is accustomed to educational movements may be aware, it is no easy task to establish a school for the higher class within the space of a couple or so of years. It is easy to rent a house and get together a number of pupils from a certain class of people in a day or two, and thus be able to make a good report at once, but my scheme has been, from the first, to educate young ladies after polished and refined methods, and with that intention I have ever been careful to get a proper class together. I have been aiming at this for the last ten years, and am still working to educate my fellow-countrywomen and to give those under my tuition a good Christian education, perfect in all its branches. I have a good Christian woman as a fellow-worker in my school. Ito, Izu, is a quiet, healthy place, very well suited for the establishment of a ladies' school. It is easy of access, being only ten miles from Atami, which place is reached by rail from Tokyo, the capital of Japan. The reader may remember that many famous colleges for ladies in England and America are located in country places, free from city noise, bustle, and impure air. I have at present a number of pupils from among the aristocracy of Japan, but I will refrain from giving publicity to their names, as it would be distasteful to them. Heedless of many obstacles that have from time to time presented themselves before me, I have been and am still pushing onward with marked success and I have great commendations and confidence from people of high social standing. I am pleased to say the hindrances I have had have been temporary. I shall be very happy indeed to see any visitor to my institution if they bring a letter of introduction from any friend of mine in Tokyo, or Yokohama, Europe or America. I shall do all in my power to make their stay pleasant and agreeable and will explain to them my principles and methods.

Thanking you in anticipation, I remain, yours, &c.,

TERU SONO.

April 9th, 1897.

AN APPEAL.

TO THE MISSIONARIES IN JAPAN:—Dear Brethren and fellow-workers—The undersigned, wishing to secure a set of Lantern Slides which will allow to some extent the progress of mission work in Japan, for use in the home land, and supposing that the Christian community generally feel more or less interest in this subject, and desiring as far as possible to obtain your co-operation, and also hoping that we may be able to assist you to procure for your own use a set of slides which will prove of great help to you during a vacation, beg to solicit your consideration of the following:—

(1.) We propose to have slides made from photos of school buildings, churches, chapels, groups of church members, groups of pupils and teachers of mission schools, Japanese pastors, missionaries, Bible women, etc., as may suit the pleasure of those missionaries and other Christian workers who will kindly cooperate with us.

(2.) We will have the slides made in Tokyo by a man who is said to be the best slide-maker in Japan. They will be properly painted. Less than one hundred of a kind will cost forty-five sen each; one hundred or more of a kind, thirty-five sen each. (Unpainted slides, twenty-five sen each.) This is the actual cost of manufacture; express and postage will be extra. But we propose to combine orders and so reduce prices whenever it is possible to make the combined orders for a given kind total one hundred.

(3.) As soon as possible a note giving names of subjects will be sent to each one who cooperates so as to enable him to make up his order. We suggest that mission communities take up the subject and, so far as convenient, let some one act for the entire community.

(4.) Send photos of objects as above to the undersigned who will have the work done and your orders filled and shipped to you, or placed in the hands of a friend to hand to you, as you may suggest.

(5.) Each photograph sent us should be numbered and the name clearly written in English opposite a corresponding number in a note sent us to say that photos have been sent. Photographs must be in our hands not later than the 15th day of May.

Photographs returned, if desired.

Nagoya, Japan, April, the 12th.

D. S. SPENCER,
A. R. MORGAN.

SPECIAL TELEGRAMS.

EARTHQUAKE AT HAKODATE.

Hakodate, April 15, 8.07 a.m.

At 10.25 last night a slight shock of earthquake was felt at Hakodate; no damage was done.

A CONFIRMATION.

Paris, April 8.

Actuated by a desire to prevent a warlike collision on the frontier and to preserve general peace, the Great Powers have jointly warned both the Greek Government and the Porte that in the event of a conflict arising between them, the aggressor would be held solely responsible for the consequences and would not be permitted to derive the least advantage therefrom.

COMMENCEMENT OF HOSTILITIES.

Petersburg, April 12.

A Russian semi-official *Gazette* of 12th instant published a telegram to the effect that although no declaration of war has yet been made, hostilities have actually begun between Greek and Turkish troops on the frontier.

THE KING OF SIAM ON TOUR.

Singapore, April 12.

The King of Siam arrived here yesterday and leaves for Europe to-morrow. It is not expected that he will visit Japan on this occasion; but will do so next year.

LATEST TELEGRAMS.

(FROM THE "JAPAN TIMES.")

CRETE.

London, April 9.

The importance of the latest Note from the Powers to Greece is minimised at Athens; nevertheless, the leading Greek journals censure the popular clamour of the Greeks for war.

The Cretan insurgents are massing troops at Sitia, on the north coast of the island. The commander of a French war-ship stationed there has landed a force with guns, in readiness to meet any emergency.

April 10.

It is the general opinion at St. Petersburg and elsewhere that Greece is calming down, consequent on ascertaining that the Turkish forces are in unexpected strength on the Thessalian frontier.

London, April, 13.

Bodies of Greeks, together with Italian volunteers commanded by ex-officers, to the number of over 2,000 in all, well armed at the expense of the Greek National League, have crossed the Thessalian frontier into Turkish territory, and severe fighting ensued, lasting throughout the whole of Friday.

The Greek Government at once dispatched stringent orders with a view to

the prevention of any further collision. The Government has also declared that nothing was known of the raid being contemplated by the National League.

Frantic excitement prevails at Athens.

London, April 16.

Parleying has taken place between the Powers and Turkey on the subject of Crete's status.

Owing to the present Turko-Greek crisis, the Greek Exchequer is almost exhausted, and the only resource is the raising of an Internal Loan, which will not be likely to obtain the support of the people except by provoking war, and by this means appealing to the national patriotism.

FRENCH NAVAL EXTENSION.

London, April 10.

The French Minister of Marine has introduced a Bill into the Chamber of Deputies to sanction the expenditure of eight hundred million francs, mainly for new ships and dockyards, to be spread over a term of eight years, commencing this year with eight new ships.

THE RECENT RIOT AT SHANGHAI.

Nagasaki, April 10.

A letter from Shanghai, dated 8th instant, contains the following particulars about the recent riot at Shanghai:—"In consequence of an increase in the vehicle tax in the foreign settlements here, the wheel-barrow coolies went on strike, and on the 5th instant two or three thousand coolies attempted to invade the British Settlement. They were repulsed by the police, with several wounded on both sides. Volunteers were mustered and Marines were landed from the British, German, and Russian warships in harbour, for the protection of the Consulates of the respective countries. A similar step was taken by the Japanese gunboat *Oshima*. Notice was issued by our Consul, inviting Japanese subjects to repair to the Consulate in the event of danger.

On the 6th, the Municipal Council, in compliance with the request of the Taotai, decided to postpone the carrying out of the new vehicle tax regulations until the 1st of July. It is believed that this measure will restore order. The Marines will return to their ships either to-day or to-morrow. At one time the confusion was indescribable.

(FROM SAIGON PAPERS.)

KAISER FRANZ JOSEF.

March 30.

The Emperor of Austria has left Mentone for Vienna.

INTEGRITY OF THE OTTOMAN TURK.

Lord Salisbury has stated in the House of Lords that all the Powers are determined to maintain the integrity of the Ottoman Empire. The Greek ships have left Canea for Corigo.

ITALIAN ELECTIONS.

March 22nd.

The Italian elections took place yesterday without incident; the Chamber is only slightly modified.

(FROM LE COURRIER D'HAIPHONG.)

MADAGASCAR.

Paris, March 24.

The Chamber has passed a vote of twenty million francs for the conversion of the public debt of Madagascar and for public works.

DEATH OF A CAMBODIAN PRINCE.

Paris, March 25.

The Cambodian Prince interned at Djelfa is dead.

FRANCE IN AFRICA.

The Gourma region is placed under French protection, and thus the French Soudan and Dahomey are brought into contact.

PANAMA REDIVIDIVUS.

Paris, March 23.

In the Chamber, M. Darlan asked a question

about the new action in respect of the Panama affair. The answer was that everything would be brought to a head shortly, and that the honour of Parliament would remain above suspicion.

Paris, March 25.

M. Saint-Martin, formerly Deputy for Avignon, compromised in the Panama affair, has been arrested.

Paris, March 27.

M. Saint-Martin was endeavouring to escape when arrested.

A demand has been lodged in the Chamber for the prosecution of Deputies Naquet, Maret, and Boyer in connection with the Panama affair.

Paris, March 28.

The Commission charged with the prosecution of Deputies has decided to make a complete examination of the papers before taking action.

(FROM "EL COMERCIO.")

THE CAPTURE OF IMUS.

Madrid, March 26.

The occupation of Imus has produced great enthusiasm throughout Spain and especially in Madrid.

H.E. the Governor General has received the following expressive telegram from Her Majesty:—

"My most contented congratulations to your Excellency, and the Army and Navy for the capture of Imus.—Maria Cristina."

WELL DESERVED PROMOTION.

In a few days, a decree will be signed promoting General Lachambre to the full rank of Lieutenant-General.

A NEW GENERAL.

Brigadier-General Francisco de Castilla will embark for Manila on the direct mail steamer leaving Barcelona to-morrow to serve in the army under operation.

NEW CAPTAIN OF MANILA.

Madrid, March 31.

Post Captain S. Antonio Cano-Prieto has been appointed Captain of the Port of Manila.

ACCEPTED RESIGNATION.

The resignation of H.E. General Luis Cappa, Governor of Mindanao, has been accepted.

(FROM JAPANESE PAPERS.)

Fukushima, April 16.

The Fukushima Higher Girls' School is to be opened to-morrow.

STRIKE OF COAL COOLIES.

Nagasaki, April 16.

The coolies employed at the Hatashima Coal Mine went on strike because their demands for an increase of wages were refused. As the coolies were in an excited condition, the Police forces from all neighbouring Stations proceeded to the scene to keep order.

EARTHQUAKE AT HAMATSU.

Hamatsu, April 16.

A strong earthquake was felt here last night at 12.15 p.m.

CHESS.

All Communications to be addressed to the Chess Editor.

The Yokohama Chess Club meets on Monday and Thursday in each week, at Clausen's Hotel, No. 66, Main Street, from 5 p.m. to 11 p.m.

Visitors to Yokohama, and Officers of ships (whether Navy or Merchant service) who are Chess-players, are welcome to use the Club during their stay in this port.

The Tokyo Chess Club meets at the Tokyo Hotel, every Friday, from 1 p.m. to 7 p.m.

| 43—K to B 5 ch. | 43—R to K 8 |
| 44—K to Kt 4 | Draw. |

(a) A variation favoured by Capt. Mackenzie.

(b) 6.... Castles; 7—B to Q 3, P to Q B 4; 8—P to K 5, B to K 2, &c., is preferable.

(c) Developing White's game only.

(d) 14—Kt to K 3 is preferable. Better to let Black exchange the two minor pieces.

(e) A pretty trap on the part of Black, which Mr. Mills, however, avoids, viz., 15—B takes P, apparently getting three pawns for the bishop, and a fourth, the K P, en prise. But Black has a valid reply with 15.... B takes Kt; 16—P takes B, P to Kt 3; 17—B takes P, P takes B, and White could not capture the K P because of 18—R to K Kt sq. Still he need not have parted with the B, but might have advanced Kt to K 5.

(f) The exchange of queens foreshadows a draw, although it is the best move here.

(g) Better would have been 39—R to K 7, R to K sq; 40—Q R to K sq, R takes R; 41—R takes R, R to Q B sq; 42—K to Q 7 with good chances. Afterwards Mr. Mills tried his best for a win, but Mr. Hynes defended himself very skilfully.

| 67—K to K 3 | 67—K to B 4 |
| 68—Kt to B 4 | 68—B to Kt 2 |
| 69—Kt to R 3 | Draw. |

The above is a sound game, the players being

evenly matched. Mr. Hodges is, next to Pillsbury and Showalter, the best American player; but, in spite of having the first move, and that Mr. Bellingham defended with one of the less favourable variations, the first player could make no impression upon him. In the ending, Hodges proposed a draw, and Bellingham accepted, as a draw secured Great Britain the victory by one game; otherwise Bellingham would have tried for a win.

44-K to Kt sq.	44-B to Q 5 ch.

- Resigns.
- (a) One of the less complicated defences, Black preventing the establishment of a centre, generally so troublesome in this Opening, but it should be followed up with P to Q B 5, so as not to leave White four pawns to three on the queen's side.
- (b) 12. P to Kt 3, P to B 4, 6-Kt to B 3, &c.
- (c) Perhaps unnecessary. He might have played Kt to B 3 at once. If B to Kt 5, then B to K 4.
- (d) If 22. Kt to B 3; 23-B to B 3 B to B 5; 24-B takes B, Q takes R; 25-Kt to K 3, hampering Black's development. Consequently, the text move is right.
- (e) 24. P to Q B 4 at once was preferable.
- (f) 25. P to Q Kt 3; 16-P to Q Kt 4, P to Q B 4 would have been better under the circumstances.
- (g) 19. B to Q 3; 20-R to B sq. P to Q R 3 might be considered now here.
- (h) The first weak move. Better would have been B to Q 6, so as not to get the Q out of play.
- (i) He had nothing better, now than B takes B, followed by Q R or R to Q sq. accordingly.
- (j) 23-B takes P, followed by 24-Kt to B 4 and Kt to Kt 6, was still better.
- (k) A pawn is lost now, and the game with it.

LATEST COMMERCIAL.

IMPORTS.

The market has fallen away to nothing this last week. Yarns have got into the doldrums; and there is no sign of their emerging at present. Shittings—Half-hearted enquires are about, but they lead to no business. Fancies, nothing doing, buyers being apparently full of stock from last year's purchases. Woollens, a nibble or two at Italian cloth is all that can be noted.

COTTON PIECE GOODS.

Grey Shittings—8 1/2 yds. 30 inches	\$6.40 to 7.75
Grey Shittings—6 1/2 yds. 35 inches	7.25 to 8.15
Grey Shittings—7 1/2 yds. 32 inches	1.50 to 1.90
Indigo Shittings—12 yds. 44 inches	1.95 to 2.90
Prints—Assorted, 24 yds. 30 inches	2.00 to 3.75
Cotton—Italians and Sateens Black, 32 inches	0.16 to 0.22
Velvets—Black, 35 yds. 22 inches	7.75 to 9.90
Victoria Lawns, 12 yds. 42 1/2 inches	0.75 to 1.00
Turkey Reds—2.0 to 2.4 yds. 24 1/2 yds. 30 inches	1.50 to 1.70
Turkey Reds—2.8 to 3 1/2 yds. 24 1/2 yds. 30 inches	1.75 to 2.10
Turkey Reds—3.8 to 4 1/2 yds. 24 1/2 yds. 30 inches	2.40 to 2.70

THE GREATEST WONDERS OF MODERN TIME HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the druggist Mahomet to inform the Fakir that I was a Doctor, and I had the best medicine at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN. HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations. Mr. J. T. COOPER, in his account of his extraordinary travels in China, published in 1875, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of pear, and the demand became so great that I was obliged to lock up the small remaining 'stock.'"

Sold by all Chemists and Medicine Vendors throughout the World. May 1st, 1896.

MILKMAID BRAND CONDENSED MILK

The "Milkmaid" Brand is guaranteed to contain all the cream of the original milk. In the process of manufacture nothing but water is removed, nothing but the best refined sugar added.

Avoid low-priced brands from which the cream has been abstracted, and ask for the "Milkmaid" Brand, the best for all purposes.

DEATH.

ARNOTT.—On the 13th March, at Shide Hill House, Newport, I.W., EMMA, wife of James Arnott, and mother of John Milne, F.R.S., in her 70th year.

SUMMARY OF NEWS.

THE *Naniwa Kan* has left Yokosuka for Hawaii.

TURKEY declared war against Greece on the 17th April.

A RAILWAY accident happened near Naoyetan on Thursday, an engineer being severely injured.

THE Sublime Porte has assured the Powers that Turkey does not intend to act on the aggressive.

THE past few days have seen a succession of heavy gales; but the temperature has risen appreciably.

COUNT MATSUKATA, who is suffering from erysipelas, has been temporarily relieved of the cares of office.

H.I.H. PRINCE KAN-IN started for Narashino, Chiba Prefecture, on Friday last to take part in the military manoeuvres.

SIR CLAUDE MACDONALD, H.B.M. Minister to China, is making a tour of all the Treaty ports of the Middle Kingdom.

THE demarkation of the German and Japanese Concessions at Amoy has been carried out during the past fortnight.

H.I.H. PRINCE ARISUGAWA will leave Japan on the 2nd of May to attend the Diamond Jubilee

celebrations as the representative of the Emperor of Japan. He is expected to return home in August.

THE Japanese Standing Squadron, including the *Chinyen*, now at Yokosuka, will proceed to the China Sea on the 25th inst.

THE Sendai School trouble has entered on a new phase, the principal teachers in the foreign languages section having resigned.

THE Taipeh Railway Company projected by some capitalists of Tokyo, Yokohama, and Osaka, received a charter on the 12th inst.

THE Conservative party in the British House of Commons are said to disapprove the policy of the Government in relation to the Cretan trouble.

MEASLES are very rife in Motomachi and on the Bluff, Yokohama. Cases from the outbreak up to Tuesday numbered 65 in all; none were fatal.

THE Government subsidy for the Sanyo Railway Company is estimated this year at yen 170,953, and will be handed to the Company at once.

IN the French Chamber of Deputies on the 1st April, Admiral Besnard demanded that 800,000,000 francs be expended for new vessels of war.

SOME capitalists of Osaka are contemplating the establishment of warehouses along a canal that runs between the River Agi and the Shirinashi-gawa.

IN Totomi Province silkworms have already been hatched, but mulberry trees being late in budding, silk producers are reported to be in an anxious state of mind.

THE long-expected European War has broken out, Turkey recalling her Minister from Athens, and giving the Grecian representative at Constantinople his passports.

ON the 16th inst. a large Japanese ferry boat conveying 23 actresses was capsized off Nagahama, Inland Sea, by a strong wind. All the passengers were drowned.

A COLLISION occurred in Yokohama harbour on Thursday morning, a Japanese steamer running into the American ship *Roanoke*. Both vessels were badly damaged.

THE Department for Home Affairs will convene a special Central Sanitary Council in a few days as a result of the re opening of the epidemic inspection bureaux.

COUNT MATSUKATA came down to Yokohama with his family on Friday morning. Taking a steam-launch at Benten Bridge, they proceeded to the Count's villa at Tomioka.

LIEUT.-GENERAL OGAWA, who has been appointed Commandant of the Fourth Army Division, Osaka, will leave the capital about the 26th inst. to take over his new command.

ON the 9th inst. the match factory at Kozumacho, Inaba Province, fell in, and a female engaged at work was crushed to death, while several others were severely injured.

COUNT OKUMA, Minister of Foreign Affairs, and also Minister of Agriculture and Commerce *ad interim*, gave a garden party at his residence, Waseda, on Wednesday afternoon to which all high officials of the Department of Agriculture and Commerce are invited.

MR. MORIKUBO SAKUZO and several others are projecting the establishment of the Nippon Imin Goshi Kaisha (Japanese Emigration Joint-fund

Company), with a capital of yen 60,000. The object is to arrange for the sending of Japanese emigrants to Australia, Hawaii, Mexico, and Brazil.

THE committee of the united regatta to be held on Lake Biwa, held a consultation at the Sangi-ai, Ueno Park, a few days ago and decided that the 18th of July should be fixed for the event.

ON Tuesday night and Wednesday morning two houses in Main Street, Yokohama, were gutted by fire. One was occupied by a Chinese printer, the other by Messrs. Lohmann, German tailors.

THE Chinese Ambassador to the Jubilee is taking some beautiful presents to Queen Victoria, from the Emperor, Empress-Dowager, Li Hung-chang, and members of the Tsung-li Yamén.

THE British West African Squadron under Rear-Admiral Harry H. Rawson, consisting of nine vessels, has arrived at Durban quite unexpectedly. The object and destination are unknown.

THEIR MAJESTIES THE EMPEROR AND EMPRESS have spent the week in Kyoto, attending the services specially set for commemorating the 100th day since the death of the Empress-Dowager.

KOBE seems to have experienced a heavy gale on Thursday morning just about the time that Yokohama was visited by an exceptionally high wind. Both phenomena were accompanied by torrential downpours of rain.

MR. KANEKO KENTARO, the former Vice Minister of the Department of Agriculture and Commerce, has received a letter from the University of Harvard to the effect that the University wishes to confer on him the title of LL.D.

THE news from Europe regarding the progress of the war, at present shows that either side may claim victories; though the Turks are having the best of it on the land, the Greek naval forces have made a success of their attack on Preveza.

THE Central Cement Company, which has head works at Kurozaki, Chikuzen Province, and a branch at Osaka, held its regular general meeting on the 13th inst., when a dividend of twenty-five per cent. was declared, the present capital being increased to yen 30,000.

THESE are dull days for Importers and the more philosophic of the community, to pass the time, are looking up some of the classical authors of their school-boy days in order to assimilate old-world consolation, of which they stand badly in need. Hence we are not surprised that our Commercial correspondent opens his parable this week with *Ex nihilo nihil fit*. There really is no market at all. Yarns have seen some enquiries in gassed 2-fold, but at prices below home rates: nothing has been done in shirtings, and fancy cottons and woollens give no signs of animation either for spot or futures. A little business has been done in Iron at a small decline in price, and buyers have undoubtedly the best of the market in spite of importers doing their utmost to hold things up. Prices are weak for kerosene, and tending downwards. In sugar, trade is irregular, though there has been a considerable movement of Takao at a slight increase in value; but Manila and China sorts are dull at a decline. White refined is said to be satisfactory. The war in Europe is keeping matters quiet in the silk trade, everyone holding off to await events. Small parcels of New Leaf are expected this week, and till they come in nothing can be settled as to the quality of the new crop. Exchange is falling again and closes weak.

SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.

The Hawaiian affair, railways, and education occupy the leading columns of the Tokyo journals. There is absolute agreement among politicians of all colours as to the unwarrantable nature of Hawaii's action towards the emigrants, but no journal advocates a violent demeanour on the part of this empire in seeking redress.

The *Nichi Nichi Shimbun* is opposed to strong measures in dealing with Hawaii. Reviewing the conduct of the Hawaiian authorities, it is not disposed to pronounce any hard-and-fast opinion on the point of the rejected emigrants' qualifications. Whether the free labourers were in *bona fide* possession of fifty dollars each, is a question of fact, not requiring any discussion. But the theory that Japanese subjects, after landing at the quarantine station in Hawaii, and while detained there by order of the Government of the Republic, were still outside Hawaiian jurisdiction and could not claim the protection of Hawaiian laws, is naturally denounced as an absurdity. That they were thus beyond the purview of Japanese law admits of no question; if they were equally outside the jurisdiction of Hawaii, it follows that they were beyond the pale of all laws, a position not to be contemplated for a moment by responsible statesmen. In asserting such a contention the Hawaiian Government and the Supreme Court of Hawaii trampled under foot the Treaty with Japan, and must be required to atone for the wrong. At the same time, the motives of these strange proceedings deserve attention. They are too unreasonable to be without a peculiar purpose, and there can be little doubt that it is a desire to impose prohibitive restrictions on the immigration of Japanese labourers. The Hawaiian Government fears Japan. Hawaii is virtually helpless from a military point of view. Distrustful of Japan's mood since the Chinese War, her uneasiness is augmented by the fact that out of her total population of a hundred thousand, no less than twenty-five thousand are Japanese. She thinks that to suffer the ingress of Japanese labourers to proceed without check may quickly imperil her national existence. Menaced by that contingency, it is not unlikely that she will turn with renewed desire towards the safeguard of American annexation, and that these curious doings of hers are intended to provoke an imbroglio which will force the United States to step in. But it is not for Japan's interests that Hawaii should become a part of the United States, nor is it for Hawaii's interest. Such an event would mean the cessation of Japanese immigration and the destruction of Hawaii's sugar-growing industry. Therefore, in negotiating with Hawaii, it should be the object of Japanese diplomats not to promote any contingency of the kind. They have also to remember that any attempt to settle this matter by force, where a weak country like Hawaii is their *vis-à-vis*, would be a disgrace to Japan. Count Okuma, though he came into office as the exponent of a "strong foreign policy," has not yet accomplished anything that justifies his title to that epithet. It is to be hoped that he will not seize the present occasion to re-establish his reputation.

The *Fiji Shimpō's* tone has somewhat changed. Its articles, at the outset, deprecated the idea of assuming anything like a stalwart attitude towards Hawaii, and treated the question with comparative nonchalance. But fuller information of the facts has imparted color to its views. The methods pursued in investigating the *bona fides* of the immigrants' pecuniary qualifications, are denounced as purely farcical. One object alone was kept in view by the examiners—the object of sending away all the immigrants. Our contemporary speaks on the strength of sworn testimony furnished by a Japanese Christian who was present. (It is singular and significant, we may note *in passing*, that the man's Christianity is openly put forward by the *Fiji* in the sense of an implied assurance that his veracity may be trusted).

This witness alleges that the examination of the immigrants had been brought to an apparent end on the 4th of March, and they were expecting to be released from the quarantine station and allowed to go about their business, when suddenly, on the 8th, the examination was renewed in the presence of armed force. No explanation offered by an immigrant received the least attention. "Where did you get that fifty dollars?" "I saved it during two years' labour as a farmer in Japan." "Impossible; a man in your position could not save fifty dollars in two years. Out you go." "It was given to me by my elder brother," or perhaps, "by my father." "Men like you haven't brothers or fathers with fifty dollars to give away. Out you go." "I sold all my belongings and realized the sum." "Out of the question. You never could have owned property worth so much. Out you go." There was not any variation. Whatever the immigrant said, the deputy commissioner had only one rejoinder, "out you go." There was, in fact, no examination: there was merely a pronouncing of sentence. The Hawaiian authorities had determined to send the Japanese packing, and they made no pretence of finding a just pretext. Of course Japan can not suffer her people to be treated in a manner so irreconcilable with Treaty. It would seem that the Hawaiians have become suspicious of her. They imagine that she is swayed by aggressive ambition. But, in truth, she took up arms most unwillingly against China. An appeal to the sword was forced upon her by the repeated insults that she suffered at the hands of her arrogant neighbour. If she has since then devoted some attention to developing her national armaments, it is with a defensive purpose: she is merely making good the deficiencies that experience has indicated. And even were she aggressive, Hawaii would be the last object of her ambition. In addition to geographical difficulties of holding it, there are the very patent complications that must follow any display of ambition in that direction. Hawaii must remember that she herself invited Japanese immigration. To stop it now in an arbitrary, high-handed manner that does violence to Treaty provisions and not merely infringes the rights of Japanese subjects generally, but also imperils the position of the twenty-five thousand Japanese already in the islands, is a proceeding that Japan can not tamely endure. Reason indicates no limit in these matters. If twenty thousand Japanese do not conceive traitorous designs, thirty thousand need not be less loyal or law-abiding. If Japanese have found their account in going to Hawaii, it is because the Hawaiians have found their account in receiving them. If there is a supply of Japanese labour, it is because the islands demand it. If the supply becomes too large, if it exceed the demand, the natural course of events will supply a remedy. But so long as Hawaiian planters have need of the Japanese immigrant, it must be taken for granted that he helps them to develop their resources, and in such development lies Hawaii's real hope of maintaining her national integrity, not in recourse to methods that no self-respecting nation can suffer, and that are calculated to embroil her with a friendly State.

A writer signing himself "Saito" receives the hospitality of the *Mainichi Shimbun's* leading columns to discuss the same subject. He treats it from a broader stand-point than that taken by any previous publicist. After noting that Hawaii's treatment of Japan has been distinctly illiberal ever since the republican form of government replaced the royal, and after pointing out the wholly indefensible character of the procedure adopted by the Administration as well as the Judiciary of the islands on this occasion, "Saito" goes on to explain that the problem now confronting Japan does not concern only the immigrants directly exposed to injustice: it concerns also the twenty-five thousand Japanese subjects already settled in Hawaii, and it concerns the treatment that may be expected by Japanese immigrants in Canada, Brazil, and whatever other places they visit. If Japan tamely suffers this great wrong to remain unredressed it will be generally understood that her people can not count on her protection

outside her own dominions, and the attitude of foreign nations towards them will be inevitably influenced by that conviction. That Hawaii has the United States at her back is no justification for her deliberate flouting of her treaty obligations towards Japan, and Japan, on her side, must remember that, having made her *débat* upon the stage of the world in the Chinese war, she can not shrink from asserting her rights even in the face of European nations, which, indeed, have become her natural *vis-à-vis*.

The position assumed by the *Osaka Asahi* presents only two features worthy of special notice. One is our contemporary's confidence that American statesmen will not approve Hawaii's methods; the other, that although political questions may be treated by diplomats in a leisurely manner, questions of right and wrong demand prompt settlement. The present question belongs to the latter category. The longer its final discussion is delayed, the more difficult will it be to reach a satisfactory conclusion. The *Osaka* journal regrets that the despatch of a ship-of-war should have been thought necessary, and hopes that in the interests alike of Japanese emigration and the development of Hawaii's resources, the complication may soon be brought to a conclusion.

The *Shogyo Shimpō* considers that the course taken by the Hawaiian Authorities must be interpreted as part of a deliberate resolve to exclude Asiatic labour, and must be treated in that sense by the Japanese Government. Our contemporary suffers one note of indignation to sound in its columns when it observes that the extraordinary scrutiny to which the Japanese immigrants were subjected, took place in the presence of some thirty armed policemen. But, for the rest, it is quiet and temperate, confining itself to the declaration that Count Okuma must remember the future issues involved in this problem, and must endeavour to reach a settlement such as shall provide against the troublesome contingencies inevitable unless Hawaii's arbitrary procedure be checked.

The *Nippon* has one of its characteristic *ex-cathedra* articles. It talks of Hawaii as of a girl or a child, but is willing to admit that the little person being an acknowledged householder, must be treated as a grown-up individual. Still this immigration question itself seems contemptibly petty in the eyes of the chauvinist journal. Hawaii must be admonished. If admonition prove ineffectual, then, perhaps, it may be necessary to punish her. On the other hand, possibly the Japanese emigration agencies failed to comply strictly with the laws. Truly such matters do not deserve to be elevated to the rank of international questions. Hawaii's guardian merits more attention. It is supposed that the United States might assist her. That does not affect the rights or wrongs of the question, and should not influence Japan's conduct in the least. Besides, America is not in a position to assist Hawaii even if she had the desire to do so. She has talked much of aiding the Cuban insurgents, but the talk has ended in talk. Even for the protection of her own coasts, her naval and military forces are insufficient, and her national policy of non-interference outside her own borders has never varied. During the Chinese War her people used to say, half in joke but half in earnest, that if Japan appeared at the Golden Gate her invasion could not be checked by any American force then available, and that she might easily become mistress of all the region west of the Rocky Mountains and the Sierra Nevada. America is not going out of her way to assist a little island in the far Pacific. But these are eventualities scarcely of a serious character. The main point for Japanese diplomats to remember is that the problem now before them is not a mere affair of emigration, or of the rights of one or two trading companies. It is the problem of determining whether Japanese subjects shall be placed on the same level and treated in the same manner as white men.

A very different view is taken by the *Yomiuri*

(*Shimpo-to* organ). It insists that the possession of Hawaii by a foreign Power would have serious consequences for the United States, and that the Government in Washington is fully entitled to have a voice in any question likely to concern the national status of the little republic. The arguments used by the late Mr. Blaine in that sense are re-produced and apparently endorsed by the *Yomiuri*.

The *Sekai-no-Nippon* (Liberal organ), pursues its programme of making this question a test of Count Okuma's ability in the field of foreign policy. It writes about the Minister of Foreign Affairs in a most unfriendly spirit, and virtually asks the nation to judge his capacity by the results of this, the first practical issue by which he has been confronted since he accepted a portfolio in the present Cabinet.

The question of railways furnishes a topic for discussion by the *Fiji Shimpo*, which takes the position that the power of deciding what lines shall be built and what lines left unbuilt, has passed from the Government's hands, and been usurped by the majority in the Railway Council where private lines are concerned, and by the majority in the Diet where State roads are under consideration. The result is that these matters are decided, not upon their real merits, but in accordance with the interests of individuals, and more effective methods are daily adopted to secure the support of members of the Council or the Diet. That abuses have occurred under such circumstances is inevitable. For example, the Kansai Railway Company wanted to extend its line to Nagoya so as to form a junction with the Tokaido road. The Government opposed the project, but the Company, by working in unison with the Sangu directors, succeeded in bringing such pressure to bear upon the Council that the scheme obtained approval. The Kanagawa-Hachioji line is another case in point. Its construction was most necessary for the purpose of carrying materials for the central system of State railways (Chuo Tetsudo). But the Diet decided that the line need not be carried from Hachioji to Kanagawa, but should pass immediately from the former place to Tokyo. The supporters of the change had a great deal to say about the prospect of a harbour for Tokyo, and the facilities that would then exist for carrying material from the capital to the central roads instead of from Yokohama. But it is well understood that the true object in view was to preserve for private enterprise the Kanagawa-Hachioji line, which is expected to be highly profitable. It is true that the Railway Council subsequently rejected all applications for the construction of a private line from Kanagawa to Hachioji, on the ground that that road was included in the State system, but the Diet's conduct in the matter illustrates the evils that have sprung up. If the Tokaido and Chuo Railways belonged to private companies, and the Government, stepping in, proposed to build a State line joining the two, it is easy to imagine what a commotion would be caused by such an invasion of "private rights." The State lines are built to promote public benefit; the private lines, to put money into the pockets of individuals. It may be said of the former that the nation is the company owning them, and that the forty millions of Japanese people are shareholders. The Government should take a more resolute stand in the matter. It should definitely decide what roads are needed to promote facilities of general communication, and should spare no effort to secure their construction.

The same journal discusses, in another issue, the question of State *versus* private railways, and arrives at the conclusion that all roads ought to be built and superintended by the Government but worked by the people. Briefly speaking, this contention is derived from the experience thus far garnered by Japan in the matter of railways. Official lines are managed with a degree of officialdom to which the public has a right to object, and private lines are built on principles so economical as to be distinctly dangerous. Happily no serious ac-

cident has yet occurred, but that it will occur one of these days is beyond question. Besides, there is public need of many lines which do not offer immediate prospect of profits large enough to tempt private enterprises. The difficulty is how to procure funds for Governmental construction. As to that, the *Fiji* recommends the sale of the State railways already in operation. The capital invested in them is about 43,700,000 yen, and the net profits derived from them annually aggregate yen 5,420,000 in round figures. In other words, they pay nearly 11 per cent. At ruling market rates these lines might be sold for something like a hundred million yen, and the Government, after recovering the capital invested, would have about 50 millions to spend on new lines. That plan might be steadily pursued; namely, construction by the State and sale to the people as soon as the lines are in operation, with strict surveillance by the Railway Bureau subsequently to the sale.

The old question of English v. American locomotives is taken up by the *Chuo Shimbun*, but not editorially. That journal confines itself to reproducing arguments said to have been advanced by the advocates of each engine respectively. The English speaker is thoroughly practical. "There is no need for discussion," he is represented as saying. "Facts are stronger than theories. When Viscount Inouye was at the head of the Railway Bureau, he resolved to make trial of American locomotives, and in June, 1891, two were imported. Their story is soon told. Within a twelve-month they were useless." (Here follows a catalogue of technical defects evidently compiled by an expert.) "After Viscount Inouye's retirement, his successor, Mr. Matsumoto, who received a part of his education in the United States and has a great penchant for things American, imported 4 American locomotives. They arrived in January, 1894, and fared just like their predecessors. From the very outset repairs or alterations were required, and after a year or two the whole four were virtually condemned." (Here, also, technical details are given.) "Thereafter it was inevitably decided that the English engine was the better, and when Messrs. Okura and Co., received an order from the Government on the 5th instant for 18 locomotives, there was a condition attached that they must be of English make." The speech is then taken up by an advocate of the American manufacture. "The engines hitherto imported by Japan from the States," he says, "were not of the best kind. They were Baldwin's locomotives, and the Baldwin locomotive does not command high favour even in America. There are other and better makers in the States. Above all, there is Rogers. It is absurd to suppose that Americans can not make good engines. Japan herself is beginning to develop that ability, and America is not new to the work as Japan is. She has been at it for years. Above all, she can turn out much cheaper locomotives than England can. There is a difference of one-third of the price in favour of the American engine, which means, of course, that if the American locomotive lasts seven years against the English locomotive's ten, the advantage is still on the side of the former. Materials and labour are cheaper in America than in England. Besides, the British manufacturer is a stiff-backed person. He has stood at the top of the manufacturing tree for such a long time that he fails to observe the changes going on below. He won't concede anything to a customer, or make any effort to suit the latter's convenience. But the American is looking for custom, and will spare no pains to reduce his prices or accommodate a client in any other manner. The proof that the Japanese Government understands these things is that it recently ordered 18 locomotives from Rogers, and they are to be examined and passed by Mr. Crawford, an engineer formerly in Japan. If England has obtained an order for 18 locomotives, she must have taken great pains to get it." (*Oi ni undo suru tokoro arishi ga tame naran, i.e.* questionable methods.)

The *Kokumin* (*Shimpo-to* organ) has an ar-

ticle directed against the methods of the Educational Department. The language employed is vague and general. Not a single specific charge is advanced. Our contemporary is simply dissatisfied with the results achieved, and thinks that the staff of the Department should be completely changed. It has nothing particular to say against Marquis Hachisuka except that he follows in the path marked out by his predecessor. Still, the fact that discontent is widely engendered by the Departments' procedure receives confirmation when we find the *Hochi Shimbu* also ventilating the same sentiment. The *Hochi* declares that the portfolio of Education is a kind of trial portfolio. When a new man is to be taken into the Cabinet, his capacity is tested in that office. So well is the fact recognised that Count Itagaki, when asked to join the Ministry, entered a precautionary protest against being sent to the Mombusho. No wonder that the public makes little of a Department so lightly treated by the Government. On that text, and on the vast importance of education, the *Hochi Shimbu* preaches a strong sermon arriving at practically the same conclusion as the *Kokumin*. The *Meiji Shimbu* (Liberal organ), however, attributes all this criticism to party prejudice. When party organs attack a member of the Cabinet controlled by that party, under such circumstances as those now existing, the motive is clear. From the first, Count Okuma's supporters in the press have been vilipending the four Cabinet Ministers supposed to be independent of his leadership. They have called them "Mess Ministers" (*Banshoku daijin*) and spared no pains to drive them out of office. Marquis Hachisuka being one of the four, the phalanx is now assailing him. Tanaka Shozo, the "lord of Tochigi" (*Tochi-chin*), has succeeded in working his will at the Department of Agriculture and Commerce. His idol, Count Okuma, has replaced Viscount Enomoto as chief of the Department; Oishi Masami is Vice-Minister; Taketomi Tokitoshi is head of the Bureau of Commerce, and Koizuka Ryu is head of the Bureau of Mines. Something of the same kind is now to be effected at the Department of Education. It is unendurable that State Departments should thus be made the playthings of party ambition.

WEAVING IN FUKUI.

A report from Fukui Prefecture announces that the weaving industry has of late made significant developments, especially in the manufacture of *habutae*. Last summer, owing to the inundations, weavers were obliged to suspend work for a considerable period, but the production nevertheless increased beyond any previous year. The result is due to the great credit Fukui silk textiles have attained for superior quality. No inspection is so rigorous as that prevailing in this prefecture. To supply the expenses of examination, the sum of three thousand yen is handed over to the Silk Fabrics Corporation by the local Authorities. A report compiled by the Corporation shows that the value of silk textiles amounted last year to 6,334,607 yen, an increase of 15,361 yen as compared with the previous year. At the close of last year, the total number of *habutae* producers was 2,438, and of looms, 12,663; an increase of 508 in the former and 385 in the latter, as compared with the corresponding period of the previous year. Of the total value of silk textiles exported abroad during the past ten years, the exports from Fukui were as follow:—

	Total export. Yen.	From Fukui. Yen.
20th year of Meiji	1,146,281	6,100
21st do	1,233,927	53,624
22nd do	2,104,459	406,641
23rd do	3,335,483	748,190
24th do	4,257,454	1,050,687
25th do	7,524,893	2,779,857
26th do	7,453,250	3,305,228
27th do	10,883,607	5,076,127
28th do	13,694,445	6,076,229
29th do	11,669,937	6,004,426

THE EUROPEAN SITUATION.

Turkey is certainly displaying remarkable moderation. The telegram from Paris, which we publish this morning, shows the Porte in a very good light, and must remove all doubt, if any remained, as to which of the two Powers is the aggressor. It would seem as though the Government at Constantinople had at length awoke thoroughly to the fact that Turkey remains in Europe on very slender sufferance, and that her wisest policy is to avoid every cause of offence. Look at this matter from what point of view we please, the only apparent explanation of Greece's temerity is that she believes Turkey's knell to have been sounded in Europe, and that she counts on a few initial successes to rally Serbia, Montenegro, and Bulgaria to her cause. These four States in combination might succeed in driving the Turks finally across the Bosphorus, and restoring them to regions where their peculiar methods of administration are less out of touch with their surroundings. It is all very well to denounce Grecian truculence and aggressiveness, but we have to recognise the racial element in this struggle, and to anticipate that the public will finally see in it nothing except a fight between European and Asiatic. If Greece can hold out until that time of broad discrimination comes, or if she can gain victories sufficient to remove the impression that she has plunged into war merely in the speculative hope of some helping hands being held out to her, the end may perhaps justify the means. Meanwhile, it is interesting to contrast Turkey's forbearance on this occasion with her seemingly defiant attitude in connection with the Armenian massacres. Is it conceivable that there has been suddenly vouchsafed to the Sultan an access of political wisdom such as would account for so salient a change of procedure? Many people will reply in the negative, and will be disposed to infer that the Armenian troubles had a side never made visible to the general public. Be that as it may, the Turk is now winning for himself an excellent character. Perhaps the world is called on to assist at the spectacle of a death-bed repentance.

THE HAWAIIAN AFFAIR.

According to the *Tokyo Shimbun*, the steamer *Coptic*, which arrived in Yokohama on the 19th instant, brought the second report from the Japanese Consul-General in Honolulu with regard to the late immigration affair. The report consists of correspondence that passed between the Consul-General and the Hawaiian authorities. Its general tenor seems to coincide with the accounts already published, but there is one new and perplexing feature. When the Consul-General demanded a clear reply from the Hawaiian Government with regard to its refusal to permit the landing of the Japanese labourers, he was informed that immigrants to Hawaii, although free labourers, had to be in the position of employees whose services were definitely pledged to a Hawaiian estate-owner, and that the Japanese ought to have concluded special contracts in the same way as regular con-

tract labourers. The immigrants having arrived in Hawaii without adopting that precaution, their landing had been absolutely refused. Such a reply seems to ignore the distinction hitherto recognised between free and contract labourers. The Government of the little Republic, finding itself without any sound original reason for its action, apparently conceived the idea of insisting on a qualification never before required. Of course the *Tokyo Shimbun* is very emphatic in its condemnation of such subterfuges. It also denounces the unreason of attempting to go behind the fact that an immigrant possesses fifty dollars. If he has the money and can show it, nothing more need be said. The *bona fides* of his ownership can only be matter of conjecture.

That the action of the Hawaiian Authorities admits of no valid defence is now pretty generally recognised. Even the Hawaiian newspapers admit the fact, as we showed in our issue of the 20th by direct quotation. But in connection with the Supreme Court's declaration of its own incompetence to exercise jurisdiction over Japanese subjects within Hawaiian territory until they have acquired the right of permanent residence under the *fiat* of a deputy commissioner of customs, we may mention a record illustrating the curious inconsistency of that tribunal. Last year, the Deputy Commissioner, having examined a number of Japanese immigrants reported favourably on their qualifications. The Commissioner of Customs, however, on receiving the report, refused to endorse his subordinate's finding, and the immigrants were detained at the quarantine station, pending return to Japan. Thereupon, a writ of *habeas corpus* was sworn out on their behalf, and the Supreme Court heard the case, raising no question whatever as to its own competence or the status of the immigrants. It did not, indeed, undertake to determine whether the reasons of the Commissioner's veto were valid or invalid, but merely ruled that he was not entitled to over-ride the report of the Deputy Commissioner, by whom the examination had been actually made. Still jurisdiction was assumed and exercised by the very tribunal that, a few months later, declared itself incompetent to assume jurisdiction under analogous circumstances. Hawaii has blundered all round in this business, and will probably have to pay for its mistakes.

We observe that the *Yomiuri Shimbun's* account of the Hawaiian Authorities' alleged answer to the Consul General's query, differs from that of the *Tokyo Shimbun*, as quoted above. The *Yomiuri* says that the pretext put forward was that the so-called free labourers were not really free, inasmuch as they had entered into agreements with an emigration agency, and had pledged themselves to take service with any one designated by the agency. Thus they became, in effect, contract labourers, and permission should have been duly sought for their coming in that capacity. That pretence is, at all events, conceivable, but has no more warrant than the other.

The steamer *Taku Maru*, built by Messrs. Richardson & Co., of England, for the Osaka Shosen Kaisha, arrived at Kobe on the 16th inst. The vessel is built of steel and is of a gross tonnage of 1,013 tons. After landing her cargo at Kobe she will come round to Yokohama.

JAPANESE NEWS.

The *Naniwa* is to leave to-day for Hawaii. In the absence of telegraphic communication with the islands, the people of Japan will have to possess their souls in patience. Probably a month will elapse before they obtain any clear information as to the course of the negotiations opened by direction of Count Okuma. It is said that the Emigration Company of Kobe claims 320.60 *yen* for every man turned back. We are somewhat surprised that the calculation does not extend to *rin*. When a Japanese takes a *soroban* into his hand, tenths of a *sen* become tangible realities to him. The sum of 320.60 *yen* is to cover all the expenses incurred by the emigrant on account of travelling, outfit and so forth. It sounds a good deal. The Kobe Company had 313 emigrants returned, so that its total demand amounts to 97,893.18 *yen*.

Telegrams from America give hope that the Senate may modify the Tariff in so far as the severe rates on Japanese goods are concerned. Of course nothing definite can be asserted, but there seems to be a belief that such prohibitive imposts will not be suffered to become practical realities.

His Imperial Highness Prince Arisugawa Takehito is to proceed to England to represent the Emperor of Japan on the occasion of the Diamond Jubilee. Messrs. Saito Momotaro and Yamada Giyo, of the Imperial Household Department, have been ordered to accompany him. It is expected that the party will start from Tokyo on the 5th of May. The original intention, we believe, was that His Imperial Highness should travel in the *Yoshino Kan*, but the ship has to go into dock, and would not be ready to set out in time to reach England before the Jubilee.

Lieut.-Colonel Hemmings, 5th Dragoons retired, has been appointed British Military Attaché in Japan. Nothing is yet known about his movements.

Some of the vernacular journals are determined, it would seem, to persuade the public that the Matsukata Cabinet is in a parlous condition. It is the old story of accomplishing an object by suggestion. If people can be led to believe that the Ministry is *in extremis*, its health may be actually impaired by loss of confidence. Thus the *Tokyo Shimbun* (Liberal organ), interprets the Premier's erysipelas to signify that his conscience smites him for having appointed a number of provincial Governors merely by way of sop to the political Cerberus that guards the gates of office. The Governors are alleged to have encountered grave opposition at the hands of the junior prefectural officials, and the whole machinery of local administration is supposed to be creaking ominously. The *Yomiuri*, however, which enjoys the confidence of the Cabinet, says that although Count Matsukata may probably give up the portfolio of Finance, he will do so for the purpose of devoting his whole energies to the duties of Minister President. The functions of the two offices are proving too much for his somewhat enfeebled constitution. He came into power specially to adjust the finances, and having given a pledge to the Diet that he will perform that task by next session, he is naturally reluctant to leave the business to anyone else. There is, however, no reason why he should not place the Finance Depart-

ment under a statesman enjoying his confidence and willing to carry out his programme implicitly. That is what he will do, the *Yomuri* predicts.

It is said to be the intention of the Government to devote more attention than ever from next year to the development of means of communication, the money spent upon which being of the nature of productive expenditure, need not be grudged by the nation. Then the period originally fixed for improving the State Railways—especially for doubling the Tokaido line—is likely to be shortened; telegraphs will be extended to every part of the country, and the existing lines will be rendered more effective; telephones, which are so greatly deficient as compared with the demand that from four to five hundred *yen* is paid for the transfer of an installation, will be largely augmented; in the matter of posts, the third-class offices, which, being now in the hand of private individuals, are conducted with so much economy as to impair their efficiency, will be raised to the rank of second-class offices and placed under official management; further, the number of parcels-post offices will be increased from 500 to 800, and in every respect means of communication will receive particular attention at the hands of the Ministry. The receipts from State enterprises now constitute an important and steadily growing factor of public revenue, and money invested for their development is a valuable asset.

Proposals in the sense of increasing individual freedom of trade were recently made by the Tea Dealers Corporation of Kobe, but failed to obtain the endorsement of a conference of tea-men specially convened for the purpose of considering the scheme. Sketched in outline, the idea appears to have been the establishment of a depôt in Kobe the members of which should be allowed to act independently with regard to sifting and fixing the weight of parcels of tea, instead of observing the hard-and-fast rules hitherto enforced by the Union Tea Inspection Offices. Representatives of the latter, to the number of 35, met in conclave in Kyoto on the 15th inst., and decided to negative the proposals, on the ground that such liberty could not yet be safely entrusted to sellers. The programme of a depôt in Kobe, however, obtained approval, but as official sanction has not yet been given, the operations of the depôt can not affect the tea trade of the current year. The depôt is to be the sole place for purchases by foreign merchants, and if those in Kobe object go there, recourse is to be had to the foreign merchants of Yokohama.

DEATH OF MRS. ARNOTT.

Mrs. Arnett, whose death we regret to record, is known directly to a few residents in Japan, and indirectly by her contributions, to a large circle. In 1891, when this country lost nearly 10,000 of its people by the Nagoya-Gifu earthquake, Mrs. Arnett raised a considerable sum in aid of the survivors, particulars of which were published in our columns. Her greatest sympathy was, however, devoted to her only son, in whose work she took the keenest interest. A few weeks before her death she addressed a letter to the *Western Mail* on the nature and object of seismology, pointing out that even in the Isle of Wight he was from time to time recording earthquakes originating in Japan, which country for so many years had been his home.

THE GENERAL TARIFF.

We publish to-day a translation of the General Tariff, for the accuracy of which we can vouch. This is the law passed by the Diet in the session just closed. It is supposed to cover all articles of trade, but, of course, the rates do not refer to any articles contained in the Conventional Tariff; that is to say, the Tariff arranged between Japan and the Treaty Powers. The Conventional Tariff not having yet been published in conclusive form, can not be accurately compared with this Statutory Tariff; but we may note that the former, as concluded with Great Britain, covers 39 principal staples of import, to which a considerable number have been added by the German and French Treaties, whereas the Statutory Tariff covers 532 articles. It is understood, however, that the whole volume of the import trade in about equally divided between the two Tariffs. Speaking generally, the Statutory Tariff is higher than the Conventional. For example:—

	Conventional Tariff. Per Cent.	Statutory Tariff. Per Cent.
Glass, Window (uncoloured).....	8	10
Glass, Window (all others).....	10	15
Iron (pig and ingot).....	5	5
Iron (bar, rod, plate and sheet).....	7½	10
Iron (rails).....	5	10
Sugar (refined).....	10	20
Woolen Yarns.....	8	10
Woolen Tissues of all sorts.....	10	15
Milk (condensed or dehydrated).....	5	15
Salt-petre.....	5	10
Leather (all except sole).....	10	15
&c., &c.		

We think it much to be regretted in Japan's interests, and therefore in the interests of foreigners also, that these high duties should be levied on imports, but the country is apparently bent upon raising a revenue, and the permanent advantage of trade receives scanty consideration.

POLITICAL NOTES.

Of course Count Matsukata's attack of erysipelas is regarded by his enemies as a political malady. They say that it is due to coinage poisoning. The Minister's forecast as to the ratio between the precious metals was 1 to 32.34. He considered that the appreciation of gold would not exceed that figure. But events have falsified his judgment, and 203 silver *yen* can now be bought with a hundred gold *yen*. So the Opposition journals allege, but we should like to know where an exchange can be effected on such terms. However, proceeding on that assumption, the critics point out that everybody naturally prefers paper currency to silver, inasmuch as the former will be exchangeable for gold at par when the new system comes into operation, and consequently all the silver *yen* stored away throughout the country have been brought out, and exchanged for bank notes. The quantity of silver thus put upon the market is far greater than the Finance Department estimated, and it is now evident that much embarrassment will be experienced in carrying out the programme.

If these stories be trustworthy, which seems problematical, people must be behaving in a very "previous" manner. All of us recognised from the first, eminently Count Matsukata, that the weak factor in the new programme was the silver *yen*. If gold appreciates to a point much higher than 32.34 to 1 every silver

yen now circulating within or without Japan will be carried to the Treasury for exchange against gold. But there is no apparent reason why bank notes should now be purchased with silver coin, or, indeed, why such a purchase should at any time be a feature of the transaction. The silver *yen* can be presented direct to the Treasury for exchange. Of course, the difficulty of transport is obviated by buying paper; but who are the sellers of paper? The average Japanese has never been willing to give notes for coins, except in the days of fiat currency, and if he does so now, he probably has to be paid for it, or will soon insist on being paid. If, on the contrary, the purchase of paper is effected at the Bank of Japan or its agencies, where is the gain? Are we asked to believe that the notes will be hoarded until they become exchangeable for gold? Neither is it credible that any large emergence of silver *yen* from hiding-places has yet occurred, supposing anything of the kind to be possible. Not the silver coins held by Japanese in Japan will be a source of trouble, if there is to be trouble. The source will be the silver *yen* now circulating abroad—in Singapore and China, for example—which may prove much more numerous than is supposed, and which will be bought up by foreigners and carried to Japan for exchange against gold so surely as the latter metal appreciates much above its present point.

JAPAN'S FOREIGN TRADE.

The *Yiji Shimo* gives the following figures of foreign trade for the three months ending March last:—The export trade increased thirty-nine per cent. as compared with the corresponding period of last year, while imports show an increase of only fifteen per cent. The following table shows the value of certain staples of export divided into five classes:—

	From Jan. to March, 1897. year (1897).	From Jan. to March, 1896. year (1896).	Increase or Decrease.
Agricultural Products.....	18,400,000	20,968,000	67 inc.
Marine Products.....	476,000	556,000	30 inc.
Industrial Products.....	9,108,000	6,364,000	37 inc.
Forest Products.....	519,000	670,000	19 dec.
Mineral Products.....	3,788,000	3,386,000	13 inc.

It will be seen that the greatest increase was in agricultural products, being sixty-seven per cent. as compared with the previous year. This was owing chiefly to the export of raw silk, wheat, and flat braids. Industrial products rank next, due to the large exports of *habutae*, cotton fabrics, materials for thread, and straw matting. It is somewhat strange to notice the serious decrease in forest products (camphor, dried mushrooms, &c.). Imports for the same period were as follows:—

	From Jan. to March, 1897.	From Jan. to March, 1896.	Increase or Decrease.
Materials for Manufactures.....	12,824,000	11,547,000	19 inc.
Woven Goods.....	4,576,000	5,037,000	14 dec.
Machinery, &c.....	6,107,000	3,000,000	66 inc.
Articles for Consumption.....	6,517,000	6,837,000	37 inc.

The increase in articles of consumption is attributable to considerable imports of rice, while the augmentation in manufacturing materials is due to the excessive imports of raw cotton. The decrease in woven goods is chiefly in shirtings, cotton cloth, flannel, and woollen cloth.

Coal produced in Saga Prefecture during last year amounted to 866,550,847 *hin* (one *hin* = 141b.), for which *yen* 1,416,717 was obtained. The production of coal as compared with the previous year shows an increase of 187,955,503 *hin*, or 20 per cent.

THE LAST ACT IN THE SENDAI SCHOOL DRAMA.

(COMMUNICATED.)

It would seem that the Sendai School trouble is by no means at an end. In token of their disapproval of the way in which the conduct of the students in the late disturbance was treated by the Education Department, no less than eight of the teachers of the School have sent in their resignations. Among them are Mr. Nakano, head of the English Language Department, Mr. Takahashi, head of the Science Department, and Dr. Yamamoto, head of the German Language Department. The teachers that have resigned are very popular among the students; hence the commotion which led to this, from the students' point of view, most undesirable termination, is regarded by the large majority of them as an entire mistake. The difficulty of filling the vacated posts at this time of the year is considerable. It is thought that no efficient substitutes for the able men now leaving the school will be found before the summer vacation, and that the only possible plan is to appoint stop-gaps, and get through the remainder of the term in the best way possible. The school opened under the new Directorship on the 19th inst.

We are informed that Mr. Yoshimura takes his leave of Sendai deeply regretted by the whole body of teachers over whom he has presided for many years. On the evening of the 19th, the teachers *en masse* assembled in the Mutsu-no-yen, at the invitation of the late Director, and in that quiet philosophical manner with which the Japanese are wont to face and bear the greatest changes to which every-day existence is subject, circulated the "cheering" cup, the new Director in their midst; and, with smiling faces, these men who had been so long associated in what cannot be regarded as other than a great enterprise, bade each other a hearty farewell. If strength of character can be gauged by the ease with which great changes of fortune are borne, it can not be denied that there are in Japan, outside of the army and navy, a number of men worthy to be called heroes of a high type.

CHINESE NEWS.

It appears that the imposition of an additional tax of 200 cash (about 20 *sen*) on each wheel-barrow in Shanghai was not for the purpose of raising revenue. Its object was to enhance the cost of the land transport of goods, so that water carriage might be more resorted to. The cargo of steamers is discharged at wharves and there placed in godowns, many of the foreign merchants not bringing their goods into their own godown at all. When a sale is effected, the Chinese buyer receives a delivery order, on the strength of which he proceeds to carry away the goods, hiring barrows for the purpose. These barrows, with their enormous, unwieldy loads, constitute a serious impediment to traffic, especially in the narrow streets of Shanghai. Since it is not possible to widen the streets, no resource offers except to try and divert a portion of the traffic to the river, and with that object the additional tax was imposed on the wheel-barrow. As for the tax itself, which would have become six hundred cash (about sixty cents)

had its imposition been persisted in, we read that it would not be at all prohibitive, for with the present rate, 400 cash, the barrow-men thrive and grow rich. Apparently the Consular Body weakened because the Taotai personally preferred a request to their senior member that the levying of the tax should be postponed until July 1st. A good deal of moral courage is needed to refuse such requests, but they are very old-fashioned diplomatic devices, after all. A meeting of rate-payers to discuss the question was to have been held on the 21st instant, but whether the rate-payers can disavow the action of their elected representatives, the members of the Council, may be problematical.

The Emperor of China is beginning to receive presents from European Potentates in return for the gifts that he sent them by Li Hung-chang last year. The first installment of these gifts has come from France. They are thus described by the *N.-C. Daily News*.

An immense pair of beautiful porcelain vases on a pale blue base, with figures, etc., of variegated colours. One pair hand-made velvet carpets; a beautifully mounted double-barrel fowling piece, with the gunstock plentifully encrusted with precious stones and jewels, with ammunition, etc., complete, and two large oil paintings by the hands of modern French artists of repute.

The Shanghai Volunteers have just undergone their usual annual inspection. Colonel Gordon, of the West Yorkshires, was the inspecting officer. His address after the parade and march past contained some pointed suggestions. He doubted whether a body of only twenty-eight or thirty men could serve usefully as cavalry; he doubted whether nine-pounder Armstrongs could be pulled by China ponies through a long day's work in deep ground, and he doubted whether the captains of companies attended sufficiently to details that were essential to smartness. But the Volunteers, having covered themselves with glory by the promptness and spirit that they displayed on the occasion of the recent wheel-barrow riots, can afford to listen calmly to criticism and profit by it wisely.

That awful alternative to starvation, eating one's own children, is said to be now resorted to by the people of Kueifu and Wushan, in Szechuan province. The famine is terrible. A harvest offering splendid prospects, was ruined by rain just before reaping-time. There are rumours of a rebellion, and of the defeat of the Government's troops. From twenty to thirty people perish daily from lack of food in Chungking, and altogether one of the most appalling of nature's tragedies is being acted without exciting any special attention outside China.

Here is a graphic description of the business of sericulture in the vicinity of Soochow, including the hatching of the silk-worm's eggs by the sericulturist himself:—

The Chinese keep the eggs laid last year by the butterflies on pieces of cotton cloth. They will place these pieces of cloth on their persons for a few days this Spring in order to cause the eggs to hatch. The worms when they first appear are so small that they are scarcely visible to the naked eye. But their owners can see them, and they know how to feed them. The worms change their skins four times, and when they are full and fat they crawl up on the little bunches of straw provided for them and spin their cocoons. A peasant who has been feeding a mass of worms piled together upon his dirt floor, with nothing to hem them in

except a cable of twisted straw, will tell with almost perfect accuracy the precise hour at which the worms will begin to seek places where they may begin to spin.

The Settlement in Tientsin has been enlarged by the addition of 1,650 *mow* (254 acres) to the 420 (66½ acres) previously composing it. Another example of the great enhancement that the price of land in such places has undergone, is furnished by its history. Land that hardly found a purchaser 30 years ago, now sells for five thousand taels per *mow*, or 48,710 *yen* per acre. That is at the rate of over 40 *yen* per *tsudo*, a price not yet attained by any Yokohama lots, so far as we know. In granting this addition to the Settlement, the Chinese have stipulated that the term "concession" is not to be applied to it, and have hinted that the name "Victoria" might be appropriately attached, in some way or other.

Unfortunately Sir Robert Hart's new postal system has provoked the enmity of certain high dignitaries. It seems that the officials of the post, in their zeal to prevent the carriage of letters in private baggage, broke open boxes containing memorials to the Throne which were being transported to Peking by a special messenger from Canton. This led to a protest from the Viceroy of the Two Kuang and from a Censor, with the result that Sir Robert received instructions to modify the regulations "so as to bring them into harmony with the views and convenience of the masses."

A correspondent of the *N.-C. Daily News* points out that the Municipality of Shanghai derives a revenue of 70,000 *Tls.* from three classes of tax-payers, *sampansmen*, *jinrikisha*-men, and wheel-barrow-men, and the tax upon the last named, though only 400 cash per month, has been increased by 130 per cent. in three years. He also denies that the wheel-barrow business is so lucrative as some folks assert, and says that the number in Shanghai has grown from 3,000 in 1893 to 6,000 in 1897.

The following list is given of the presents carried by H.E. Chang Yin-huan, Special Ambassador, to the Queen of Great Britain on the occasion of the Diamond Jubilee:—

The Empress Dowager's presents consist of rare porcelain and jade-stone cups or vases of fine workmanship and great antiquity; some of the rare and celebrated Tibetan "joss" or incense-sticks (for burning on the altar of longevity); and a pine tree (emblem of longevity) made entirely of variegated candles moulded into all sorts of shapes and devices but all aiming at the one motto "Longevity."

The foregoing are contained in six square boxes made of the valuable beautifully polished wood called *Tsu fan*, resembling mahogany. In addition to the above there are also two rectangular boxes of the same material containing, it is said, gold and silver worked embroideries and silk and satin stuffs specially woven for their Majesties' use at the celebrated looms of Soochow and Hanchow, or eight boxes in all. On the top of the two rectangular boxes is engraved the legend:—

"Eternal Spring finds its home in the Kingdom of the Sea,

"And refulgent light surrounds the Lady of the Moon."

On top of the six square boxes is engraved the solitary character *Shou*, or "Longevity." The gifts of the Emperor bore a certain resemblance to those recounted above and were also enclosed in eight boxes made of the same material. Another instance of friendly feeling to Her Majesty, and through her towards Great Britain, displayed by the highest nobles and officials of the land, is the fact that Their Highnesses Prince Kung and Prince Ch'ing, H.E. Li Hung-chang, Weng Tung-ho, ex-Imperial

Tutor and President of the Board of Revenue, and the other members of the Tsungli Yamen, including the Special Ambassador himself, have also conjointly sent several valuable presents to the Queen, through the hands of that official. The following is the list of presents:—Porcelain stand, four feet six inches high; eight-fold embroidered screens, the frames being made of the valuable wood called *Hung-mu*; a pair of jade-stone sceptres, and a pair of ancient flower vases of porcelain of very large size.

Another attempt is to be made to reach Lhasa. This time the intrepid traveller is Mr. Rhynhart. He is a Dutchman. Upon the fact of his nationality—purely neutral—he relies, and also upon the fact that his wife, a doctor, served as army surgeon to the Chinese troops in the Mahomedan rebellion, treating some 3,000 patients in three months, and winning universal esteem and affection by her intrepidity and devotion. The Rhynharts' progress to Lhasa will be slow, however. Their resources are too slender to permit rapid travel, and they intend to stop a week here, a month there, by which leisurely method they also hope to disarm suspicion and opposition.

ASHIO.

The *Shogyo Shimpō* contains a detailed account of the working of the Ashio Mine. The mine lies in the rural division of Kami Tsugu, in Tochigi prefecture, and extends over an area of about sixteen *cho* (40 acres) to the east and west, and about twenty-five *cho* (62½ acres) to the south and north. The veins of ore extend over 1,778,000 *tsubo* (1,481 acres). Across this mineral district is a ridge of mountains, of which Bizendate is the highest peak. Bizendate it is about 4,400 feet above the level of the sea, and the valley is about 2,000 feet below this. Here are situated the mining offices, refineries, and other important buildings. Ore is found in two districts—Ashio and Kotaki—and workings are in operation in more than ninety places. The extreme length of the tunnels is not less than twenty *ri* (50 miles) in all. The ore won daily amounts to 400 tons, and this is refined at Ashio and Kodaki to an amount of nine or ten million catties per year. The number of persons engaged in and about the mine is 9,400 in all, and together with their families they aggregate 16,200. The machinery employed in the mine is of 1,310 horse-power; rails are laid for a distance of three *ri* (7½ miles), with tramways extending over twenty *ri* (59 miles). Telephonic communication is available for forty-four *ri* (110 miles), while the number of electric lights are 1,723 (ten and sixteen candle power), with thirty-five others of a capacity of 600 candles each. Aqueducts are constructed for a distance of 56,000 feet. The whole expenses incurred up to the 28th year of *Meiji* were five million *yen*.

SILK, TEA, AND CURRENCY.

The *Shogyo Shimpō* remarks that apart from periods when no extraordinary demand is made for money to carry on great enterprises, transactions connected with the export of rice, the import of sugar, the purchase of woven goods and other merchandise really have no serious effect on the circulation of money. The greatest demand for currency, therefore, synchronises with the cocoon and tea seasons. During the tea season, this important commodity passes from the growers into the hands of brokers to the value of over thirteen millions of *yen*, and the business requires an enormous amount of capital before the tea reaches either Yoko-

hama or Kobe, whence it is exported abroad. The amount of cocoons passing from the hands of silk raisers into silk brokers' godowns is no less than sixty millions of *yen* in value, while silk to the value of over eighty-six million *yen* is sent to Yokohama for export. Although this vast amount of money is not needed in one sum, or at any one time, yet, as every district does its utmost to absorb this capital with the greatest possible promptitude, it is quite natural that the circulation of money is influenced by the silk season to no small extent.

New tea is to be brought to market this year within ten days, and information from Okinawa announces that silk-worm eggs have already hatched. Hitherto about twenty thousand bales of silk have remained over at the close of the season, but the silk trade having been prosperous this year, only eighty-five hundred bales are now awaiting purchasers. Considerable facilities have no doubt been afforded for the circulation of money, under these circumstances. But as there are innumerable items of expenditure necessary for the promotion of these industries, as well as commercial transactions connected with them, it is very doubtful whether the Banks will be able to meet the demands soon to be created.

The report of the Tokyo Bank, as presented to shareholders, contains the following figures:—

	Nov. 30th year.	March 30th year
Loans issued	71,648,581	70,297,739
Temporary loans.....	14,887,976	14,917,756
Notes Discounted ...	21,438,845	21,525,678

Total 107,975,402 106,741,173
As for the Bank of Japan, the following figures are given:—

	January this year.	April this year
Loans issued	87,900,154	90,045,905
Notes Discounted ...	36,154,869	24,765,624

Total 124,055,023 114,810,527
The actual receipts of the Bank of Japan did not exceed 7,340,000 *yen*. Such being the case, some difficulty in obtaining funds at this season must reasonably be anticipated.

KOREAN AFFAIRS.

A letter from Seoul dated the 6th April, as published in the *Shogyo Shimpō*, gives the following particulars with regard to the financial condition of Korea:—

Mr. McLeavy Brown, Councillor to the Finance Office, who has adopted the schemes of his predecessor in regard to financial adjustment, deserves credit for having discharged his duties in a most satisfactory manner in spite of the many embarrassments with which he was surrounded. The punctuality of the people in payment of taxes, and the continued success of the crops were, however, among the direct causes of the restoration of order in the financial administration. A few years ago the country was almost entirely devastated by turbulent mobs and factions; and the apprehensions entertained by the Korean Government of the utter disorganization of finances that might occur under the circumstances, induced it to apply to Russia for a loan. Nor did the Government hesitate to entreat the President of the Russo-Chinese Bank, who happened to be travelling in the interior, to assist the country in her financial embarrassment. All these measures were the outcome of the want of a substantial basis of revenue. Political motives might also have induced Korea to resort to the scheme of a loan from Russia,—namely the apprehension that she was likely to be called upon to repay her debt to Japan, in view of the unpleasant relations which then existed between her and the latter country. The King himself called the responsible Minister to his presence and caused him to take immediate steps to negotiate a Russian loan with the Ambassador in Seoul, or with the Russo-Chinese Bank. But political relations having gradually returned to their former condition, and the bountiful crops having unexpectedly improved the sources of revenue, the accounts for the first year of *Kenyo* produced a surplus of 1,147,192 *gen*:

If to this sum be added last year's taxes in arrear and the fresh collections of this year, the actual amount will exceed two million *yen*. Despite the expenditures, over and above the budgetary items, incurred for State funerals and foreign commissions, the King has sanctioned the following:—

- 1.—To increase the Reserve Fund by the sum of 1,100,000 *gen*.
- 2.—To reduce the loans from Japan by the amount of 1,000,000 *gen*.
- 3.—To pay the sum of 12,272 *gen* for the purchase of land to be appropriated to the construction of a railway.
- 4.—To pay the prison expenses incurred in connection with the Higher Court of Enquiry in December of the 1st year of *Kenyo*.
- 5.—To pay the expenses incurred by the re-cession of the Pusan Office.

Apart from the payment of one million *yen* to Japan, the Korean Government is still possessed of another million in cash, while there is every prospect of receiving increased taxes this year. Under these circumstances, it is supposed that Korea may work its administrative machinery without experiencing serious difficulties as regards finance. Moreover, her liquidation of one million *yen* will save a portion of the interest, which amounts to 180,000 *yen* per annum on the total loan of three millions. The remainder she proposes to redeem before two years, but in the event of failure to do so, intends to negotiate with Japan for yearly instalments.

DESTRUCTIVE FIRES IN YOKOHAMA.

Two fires in the foreign Settlement of Yokohama were recorded on Wednesday morning. The first broke out about twenty minutes to 9 o'clock on Tuesday evening on the premises occupied by Messrs. Kingsell & Co., printers and stationers, No. 53, Main Street, the same house in which a small blaze took place last week. On this occasion the fire seems to have broken out in one of the front rooms upstairs, for when the Fire Brigade, under Superintendent Morgan, arrived upon the scene the upper storey was in flames. Through the strenuous exertions of the Brigades, Settlement and Police, the conflagration was got under in an hour and a half. Then the firemen retired leaving everything in the vicinity apparently secure. But within four hours the alarms were again ringing and the Brigades answered the call most readily. This time the fire was next door to the building already gutted, the tailor's store occupied by Messrs. Lohmann & Co. It would seem from the accounts of those early on the scene, that sparks from Kingsell's fire must have found their way beneath the corrugated iron roof of Messrs. Lohmann's premises, and where there fanned into flame by the stiff night breeze. In a very short time the place was gutted, the fire making its way to the lower rooms with astonishing rapidity. So fast were they in their rate of progress that Mrs. Binder, wife of the proprietor, and her children were nearly suffocated in their beds. The Brigades, working with a will, succeeded in mastering the flames in about two hours, all danger of a further spread being then at an end. Both buildings were insured in the Imperial Insurance Company, of which Messrs. Browne & Co. are the local agents. The amount on the premises in the occupation of Kingsell & Co. was \$6,500; while that on Messrs. Lohmann and Co.'s was \$4,500. Messrs. Lohmann's stock was insured with the London Assurance Corporation, and Kingsell's with various offices. The present is the third occasion on which Messrs. Kingsell's premises have been destroyed by fire.

Kingsell, the Chinese printer who was burnt out on Tuesday night, is a man of many fires, but his last seems, if one is to believe his doleful tale, to have been the most expensive. His insurance was about \$10,000, but by the time he has refunded to people whose bound books and other matters happened to be in his store on the night of the fire, the value of their lost goods, workmen's wages, etc., he expects to be about \$16,000 out of pocket.

OSAKA HARBOUR SCHEME.

The Governor of Osaka lately issued instructions to the Local Council with regard to the construction of a harbour in that city. The gist of the instructions is that if the works are to be conducted in accordance with the provisions specially drawn up for the purpose, a certain portion of State lands not at present appropriated will be granted to the City, and also an annual subsidy of 468,000 yen for ten years to come, provided that the Municipal Assembly are able to commence work within three months from the date of permission for the issue of Public Loan Regulations, and can finish within eight years.

The special provisions referred to are as follow:—

- 1.—If the programme for harbour-building has in any way to be altered, the sanction of the Minister of Home Affairs shall be obtained.
- 2.—When the filling-in of earth is completed, the title of the land so filled in shall be made out to the City, a fourth section only being excepted.
- 3.—On the completion of the filling-in of some 380,000 *tsubo* (316 acres) in the vicinity of the pier, as specified by the Minister of Home Affairs, the land shall be transferred in perpetuity to the city of Osaka. As to the use of such land, the sanction of the Minister for Home Affairs shall be obtained.
- 4.—When the harbour-works have been completed, reclaimed land to the extent of 10,000 *tsubo* (83 acres) to the south of the river Ajikawa, as specified by the Home Minister, shall be transferred to the Government without compensation.
- 5.—After the completion of the work of construction, the dredging of the port and the maintenance and repair of buildings, shall be undertaken by the City at its own expense.
- 6.—The City shall construct at least one highway between the present city and the reclaimed land at its own expense, under specification provided by the Minister of Home Affairs. Roads, ditches, bridges, canals, and aqueducts must also be constructed in the swamp, and piers erected as necessity occasions, at the expense of the City.
- 7.—If fees are collected from vessels for the use of the wharf, the rates shall be determined, and the sanction of the Minister of Home Affairs obtained.
- 8.—If the construction of the harbour fails to be accomplished in eight years in consequence of natural calamity or other unforeseen circumstances, the instructions of the Home Minister shall be applied for.
- 9.—In case the operations of building the harbour prove injurious to others, steps shall be taken, at the expense of the City to remove or prevent such injuries.
- 10.—In case the scheme of construction is interrupted, or the programme is necessarily altered, the City will have no right to raise any objection, or to claim compensation for the loss so sustained, provided that such contingencies are dictated by considerations of public benefit.
- 11.—In case it is deemed by the Minister for Home Affairs that the City of Osaka is unable to complete the work begun, or in case the City entirely relinquishes it, or acts contrary to these provisions, steps may be taken to cause the return to the Government of the whole or part of the land transferred or to the payment of a corresponding sum of money to the Treasury, together with the whole or part of the subsidy granted by the Treasury.
- 12.—In case of the City's decreasing the expenditure in consequence of abandoning any portion of the undertakings contained in the programme originally drafted, steps may be taken to curtail the subsidy to an amount corresponding with the reduction of expenditures in question.

GERMAN NOTES.

Herr Miguel, the German Minister of State for Finance, was knighted on his fifty-eighth birthday. Like many other distinguished Germans, he was in his youth a Radical. Experience converted him into a Conservative, he says. His elevation to a baronetcy proves that the Emperor appreciates his services, and that the attacks of the Radicals upon his management of Germany's finances have fallen flat.

The *National Zeitung* states that Admiral von

Hollmann resigned the portfolio of the Navy because the Budget Committee of the Reichstag practically rejected all his plans for the extension of the German Navy. The increase of the German Navy is a "pet project" of the Emperor, and he has been trying to use the complications in the Levant to scare the Reichstag into granting the necessary funds. So far these endeavours have not met with success.

The elections for the Austrian Reichsrath were held on March 8th, and for the first time the voting was on the basis of universal suffrage. In Vienna the struggle was confined entirely to the Socialists and the anti-Semites. The latter elected five of their candidates.

An interesting experiment was recently made by Professor Schmiedeborg, of Strasburg, which demonstrates the existence of iron-hunger in animals, and indicates disastrous results when the craving remains unsatisfied. A strong, frolicsome dog, which lost a small quantity of blood, was fed for a time on pure milk only. Soon all evidence of spirit vanished, he refused further nourishment, became thin, and so weak that the limbs failed to support the body. When the animal seemed at the point of death, a grain of ferratin was added to his daily allowance of milk, which he then devoured ravenously. In two weeks the dog recovered normal health and strength.

A discussion at present going on in German papers is interesting in its way. The *Tageszeitung* and other agrarian journals declare that not only is Germany able to produce sufficient grain to feed her millions, but that she actually did so in 1894 and 1895. The *Vossische Zeitung* opposes the statement. In 1894, says that paper, over a million tons of grain were imported, the export being less than one hundred thousand tons. The agrarians that wish to protect themselves against American and Russian grain, assert that the difference between exports and imports is so slight that it can be made up in the country if the German farmer is protected.

An amusing incident is reported in a German railway paper. A flagman on the Basel-Olten line received notice from the railway officials that he would be fined if his wife was again seen flagging the train. The flagman replied that his wife had never flagged, and explained the peculiar situation as follows:—The wife having been delivered of a fine baby, found that she had not sufficient milk to nurse it, and asked her husband to milk the goat. This animal, however, was unused to any one handling it save the woman herself, and the flagman, to save trouble, put on his wife's clothes to deceive the goat. While so engaged, a shrill whistle reminded him of his duty, and thus it came about that he saluted the passing express in skirts.

Much has been said about the effect of the X-Ray. It has influenced Dr. Wilhelm Konrad Roentgen himself as follows:—It has made him Honorary Director of the Medical Faculty in Wuerzburg; Corresponding Member of the Royal Academies of Berlin and Munich; Corresponding Member of the Royal Society or Science in Goettingen; Honorary Member of the Society of Natural Science at Frankfurt-on-the-Main, and of the Society of Natural Sciences of Chester; Corresponding Member of the Medical Society of Erlangen, of the Academy of Natural Sciences of Philadelphia, and of the Société des Sciences Naturelles et Mathématiques de Cherbourg. Besides this, he is now in possession of Royal Medals from Prussia, Bavaria and Italy.

An American travelling in Germany during the recent National birthday celebrations, prints his views in one of the leading papers. Among other things, he says there can be no doubt that the celebrations taught the German youth many impressive lessons. Nor can there be any doubt that they were designed to do so. They are, in fact, productive of genuine national feel-

ing. Moreover, one cannot fail to observe that many influences are now on foot which work toward national unity, as against the old confederation. An exaggerated estimate of divine right is apparent in many things the Kaiser says and does; many of his assumptions of wisdom and authority would be resented in America. On the other hand, it must be acknowledged that during the eight years of his reign the Emperor has kept within the limits of his prerogatives, and has shown himself interested in whatever appertains to the welfare of the people as well as to the nobility. He has made himself felt on the question of reform in educational matters. In December, 1890, he called together in Berlin, a conference consisting in part of practical educators, and in part of interested laymen, for the consideration of questions of higher education. The Kaiser opened the conference with a significant speech. Whatever may be one's opinion of this speech, it was effective. A special commission was appointed, at the head of which was placed his old instructor, Dr. Hinzpeter; and a new course of study was prepared for the higher institutions, which went into effect in 1892. The Emperor's contention was that Germany ought to produce young Germans, not Greeks or Romans. He considered the German army essential to the solidarity and greatness of Germany, and the preservation of peace. He stations some very strong garrisons in the conquered territories along the Rhine, but does not depend on his soldiers alone. The University of Strasburg is said to have the finest University building in the world; it was the wisdom of the Emperor's grandfather, and of his advisers, which thus began to Germanize the conquered territories by a most effective agency.

EMIGRATION TO THE HOKKAIDO.

The Department of Colonization issued the following Ordinance on the 19th instant:—

RULES FOR IMMIGRATION TO HOKKAIDO.

Art. I.—Any persons who desire to emigrate to Hokkaido and obtain a lease of land, by organizing a corporation, may obtain certificates to that effect upon presentation of applications to the Governor of the locality where they actually reside.

Art. II.—The application to be forwarded to the Governor or Prefect in accordance with the preceding Article must contain the following items:—

1. Object of enterprise (reclamation, stock, farming, plantation, &c.)
2. The extent of land to be leased.
3. The number of immigrants.
4. Former occupation.
5. Names of representatives, if any.
6. Method of relief of neighbours after the immigration, if such was contemplated.
7. Method of raising and paying travelling expenses for immigration, and the expenses for agricultural implements, food, and clothing.
8. Contracts of tenancy, if necessary.

Art. III.—In case application is received as prescribed in Article I. the Governor or Prefect shall investigate the same and grant certificate to such only as he deems trustworthy.

Art. IV.—With regard to persons who have obtained certificates as specified in the foregoing Article, the Governor of Hokkaido may, according to provisions specially established, determine the land to be reclaimed.

Art. V.—At the expiration of a period of six months after the receipt of certificates, no application can be entertained for the specification of land to be appropriated for cultivation.

Art. VI.—Unless a person or his agent is in possession of an order for the lease of land from the Governor's Office in Hokkaido, or of certificates of the Governor or Headman of a Rural Division, or District, no permission shall be granted to him to collect emigrants from a City or Prefecture for immigration to Hokkaido.

Art. VII.—No person can refuse the production of his certificate on demand being made by the officers concerned or by the officials of a City, Town, or District.

Art. VIII.—Any violation of Articles VI. and VII. shall be punished with a fine of from 50 *sen* to 1 *yen* and 95 *sen*.

Art. IX.—Any person obstructing the emigration of tenants as specified in Article VI. shall be liable to a fine of from 2 *yen* to 25 *yen*.

HAWAII AND JAPAN.

THE people of Hawaii, judging from the tone of their newspapers, do not seem to attach overwhelming importance to the recent action of their Administration and Judiciary in the matter of the Japanese immigrants. They treat it in an academical fashion that suggests little apprehension of unpleasant contingencies. But it is plain that there are two parties in the islands. One is for stalwart measures at all hazards. It doesn't care two pins about international law or treaty obligations, but simply echoes the formula of the Deputy Commission of Customs at the examination of the Japanese immigrants, "out you go." The other ponders but does not venture to be candid. It finds the atmosphere charged with spurious patriotism, and dares not speak aloud through fear of starting the thunder. But there are suggestive comments. The business of the Executive, say these thinking persons, is "to make things all right, if that be possible, when a treaty is defeated." "The Judicial power gets the Executive power into a hole, and then stands by and softly whistles while the Executive is trying to get out of it." As to whether the net result—namely, the deliberate violation of treaty obligations—be permissible, the answer suggested is that "strong nations do just about as they please, and weak ones have to do as they are told." That seems a singular answer for Hawaii to formulate when her *vis-à-vis* is Japan. But the fact is that when a Hawaiian stalwart speaks of "strong nations" in this particular context, he refers to the United States, by which Power he believes himself to be backed. He does not reflect, apparently, that the Government in Washington prefers to back people who have not put themselves hopelessly in the wrong in their premises. Probably it will interest our Japanese readers, as well as our foreign, if we quote a few pertinent paragraphs from *The Hawaiian Gazette*:—

If there is a serious question between ourselves and Japan, it is because we have, for years, rushed into a reckless, foolish importation of labourers, without taking the least notice of the possible consequences. Now, we are frightened, and very properly, too, and suddenly call a halt. We are quite sure that Count Okuma, a statesman of rare political knowledge and moderation, will do what he can to help us out of the hole we dug for ourselves.

As to the proposition that the Taku case may force the hand of the Washington Government, it may be well understood that the Japanese Government will not permit the forcing of hands. It will stand on its international rights, and the United States will not disagree with it, in all probability. There will be no fuss and feathers about it. The whole affair may be "hung up" indefinitely.

But there should be no crying till we are out of the woods. There will be a large pecuniary loss, owing to our action, and the men who suffer it will by no means remain idle. They may not, however, get much sympathy from the home Government for pushing emigration which that Government really does not approve.

While our "impulsives" say there is no doubt that we are wholly right sending the immigrants back, it is well to remember that there are glorious uncertainties in international law. Many positivists get badly left. The British, confident as they were, left under a load of \$15,000,000 in the

Alabama matter. The United States got badly left, under a load of \$4,000,000 in the Halifax matter. The average man usually has no "doubts" about anything. He makes up his mind and that is the end of it.

Thus there is an evident want of unanimity as to the strength of the Hawaiian case. One thing, however, is plain, the idea of constructing out of this affair a lever to force the annexation of the islands by the United States has not occurred to responsible people in the little republic. Their voices do not reach beyond the cry "Hawaii for the whites." What they want is simply to keep out the Japanese whose increasing numbers alarm them. They do not seem to reflect that, though the Japanese were expelled, there would remain forty thousand Asiatics of another type to "dispose of." They appear, further, to labour under the misapprehension that Japan would like to annex Hawaii, and that the "silent invasion" of the island by thousands of labourers is prompted by that desire. The paper from which we have just quoted says:—

The people of Japan regard the place as a financial Paradise, and very naturally they desire to see it annexed to Japan. This sentiment is perfectly manifest in the press, and in the common talk of the farming class. Any land which will bring the common labourer an average of five hundred per cent. in wages, must be fascinating indeed, and if there are no obstacles in the way, ownership of such land would be very desirable. There is, therefore, a general desire on the part of Japanese people to possess Hawaii, but not for any political purpose. It is regarded only as a source of profit, just as we regard an island with guano deposits.

The Government of Japan, on the contrary, has studiously, carefully, and honestly abstained from taking any measures whatever towards securing any political control of these Islands. It has accepted the unwritten agreement of the great Powers that "Hawaii belongs to the United States." Any one who asserts the contrary has not closely studied the situation. In these eventful days let us stand on the facts, if they are to be obtained. Every movement made by us on lines that are not truthful injures our cause. A false statement is like a nail dropped into fine machinery.

Of course the statement that a wish to annex Hawaii "is perfectly manifest in the Japanese press and in the common talk of the farming class" has not the least shadow of truth. No sentiment of the kind has ever found expression in a Japan newspaper, so far as we know, and we venture to affirm that the subjects of "common talk" among farmers in Japan are absolutely unknown to the editor of the *Hawaiian Gazette*. Japan does not want Hawaii. We doubt whether she would take it as a gift, and considering that her people went there originally at the request of the Hawaiians themselves, to accuse them of aggressive designs because they go, sounds quaint.

An incident that has occurred since we last wrote upon this subject deserves to be noted, as indicating that the action of the Hawaiian Authorities is not of the indiscriminating character originally supposed. Subsequently to the rejection of the first batch of immigrants, a second lot arrived by the *Sakura Maru*, and were subjected to the same examination as their predecessors. They numbered 316 in all, and 153 were admitted, on March 22nd, 1897,

being sent back. Among those admitted were many who came as free labourers. They succeeded in proving the *bond fides* of their possession of \$50. It is, therefore, evident that to satisfy the tests prescribed by the examining officials is not impossible

THE SITUATION IN EUROPE.

IT looks as though the situation in Europe had drifted almost completely beyond the control of the Great Powers. Both Greece and Turkey seem to have thoroughly learned the lesson taught by the events of the past two years, namely, that to translate diplomatic agreement into practical union is beyond the capacity of the Cabinets in Paris, Berlin, St. Petersburg, Vienna, Rome and London. They can combine to talk but they can not combine to act. The telegraphic intelligence shows that Turkey has declared war against Greece. She could scarcely choose but do so. Were she to tamely suffer the invasion of her territory by a neighbouring Power, her days of independence would assuredly be numbered. She has been told, in effect, that she will not be left free to prosecute belligerent operations. Who is to prevent her? There is no Power in Europe that could lightly undertake the task of loosening Turkey's fingers from the throat of a victim. She can put into the field an army of half a million men whose fighting qualities have been proved beyond all question. It has been proved also that to beat her is a task reaching very nearly to the limits of even Russia's military strength. Suppose that ABDUL HAMID, recalling his Armenian experiences, determines to defy the Powers and launch his forces at Greece, is it possible to conceive that Germany and France, Russia and England, Austria and Italy, will contribute *corps d'armée* to operate together and drive back his battalions? The prospect is chimerical. He can not be coerced on land. Only one practically feasible form of pressure suggests itself, namely, a blow struck at Constantinople. The brunt of that undertaking would fall on England. Her ships would have to force the Dardanelles. She would have to lead the assault upon a State whose integrity it has been a cardinal object of her perennial policy to preserve. She could not stand aside without abrogating for ever all title to discuss the fate of the Ottoman Empire in the councils of Europe. The alternative would be to take upon her shoulders the active vindication of Turkey's procedure. Besides, pressure exerted at Constantinople alone would not draw asunder armies fighting on the frontiers of Thessaly and Epirus. Corresponding operations would be necessary at Athens. Two years ago, sanguine folks might have imagined the possibility of such vigorous action by a combination of the Christian States of Europe. To-day all conceptions of the kind belong to the realm

of dreamland. Comparing great things with small, we are vividly reminded of Japan's experience in the matter of Treaty Revision. All the Powers consented to meet her in debate on an accepted basis of arrangement, but for any practical purpose the collision of their interests drove them as far part in the conference chamber as though they had never joined hands to enter it. No serious consequence then depended on their failure to agree, whereas in Europe a great war is the penalty of their political paltering. Greece is virtually the ward of France, Russia and England. Her independence was secured by their protection sixty-seven years ago, and her Sovereign is their pensioner to the extent of nearly a fourth of his total income. Yet they can not control their fractious child, and it is becoming daily plainer that the romantic British people will not allow their Government to coerce her. What title to such consideration the truculent little kingdom possesses, we are at a loss to perceive. But if England may not assist to enforce Europe's pacific mandate at Athens, how can she assist to enforce it at Constantinople? Is Turkey to be told that she must sit with folded arms while a little State, which for three centuries bent under her yoke and which she could strike down in a moment if the lists were fairly kept, makes armed irruptions into her territory, shoots her soldiers and insults her flag? If Turkey had consented to be condemned to such a roll, it would have meant that she was to be bundled out of Europe. She has understood the situation and taken the law into her own hands. What may we now expect? That is the perplexing question. Will Mr. GLADSTONE return to Downing-street to assist in packing the Ineffable's baggage, and, by balloons of rhetoric, to raise HOMER'S descendants from the abyss of national puniness? Or will the tall talk of the six Powers sink into a feeble whisper, while the combatants are left to fight out their quarrel without alien interference? The latter is the result that we anticipate. Greece will be beaten to her knees. Turkey will be more or less exhausted by the task of thrashing her, and "the Powers" will then step in to dictate terms of peace. That kind of thing is becoming a historical programme. Russia had to submit to it when the taste of Plevna was still bitter in her mouth. Japan had to submit to it when Liaotung was already in her grasp. Turkey will have to submit to it when the Nizam battalions are within sight of Athens. After all, what the prefatory talk of the Powers signified was simply that they intended to have a place at the council board when the terms of peace come to be discussed. It is not a large mouse to emerge from such a mountain, and its birth might have been achieved without the massing of squadrons at Crete, and the bombardment of Christian insurgents at Canea. But old time conceptions of cause and effect are out of date.

THE TARIFF LAW.

LAW NO. 14.

Art. I.—Articles enumerated in Class I. of the Annexed Tariff, upon importation from foreign countries, shall pay import duties in accordance with the rates given therein; those contained in Class II. shall be exempted from import duty; and those specified in Class III. are prohibited from importation.

Art. II.—The dutiable value of imported articles shall be calculated by adding to their actual cost at the place of purchase, production, or fabrication, the cost of packing, freight, insurance, and all other charges up to their arrival at the port of discharge.

Art. III.—In regard to those articles enumerated in the Annexed Tariff in respect of which it may be found advisable to substitute specific duties in place of *ad valorem* duties, the articles and the classifications thereof may be determined by Imperial Ordinance.

The specific duties mentioned in the preceding clause shall be determined by calculating the average values for a period of not less than six months, upon the basis prescribed in the preceding Article and taking the duty given in the Annexed Tariff.

Art. IV.—When two or more different rates mentioned in the Annexed Tariff are applicable to any article, the duty shall be imposed according to the highest rate.

Art. V.—The following are exempted from import duty:—

- 1—Articles for Imperial use.
- 2—Arms, Ammunition, and Explosives imported by the Imperial Army and Navy.
- 3—Vessels belonging to the Navy.
- 4—Articles for the personal use of diplomatic agents accredited to this Empire.
- 5—Decorations and medals.
- 6—Records, and other similar papers.
- 7—Commercial Samples (limited to such as are only fit for use as samples).
- 8—Travellers' articles (such as are carried by travellers).
- 9—Articles imported with a view to their permanent exhibition in Government and public museums and galleries.
- 10—Articles of Japanese origin, reimported from abroad within five years, and showing no change in character or form since their exportation (tobaccos, and wines, spirits and liquors excepted).
- 11—Articles exported abroad for the purpose of repair and re-imported.

The articles under sections 7, 8, and 9 are limited to those recognized as such by the Customs Authorities.

In regard to the articles coming under section 11, the period within which reimportation must take place shall be fixed at the time of exportation.

Art. VI.—The following articles shall, if re-exported within six calendar months from the date of importation, be exempted from import duty.

N.B.—At the time of importation, a sum equivalent to the import duty shall be deposited or guaranteed by security.

1. Articles temporarily imported for the purpose of repair.
2. Articles temporarily imported for the use of travellers engaged in scientific research.
3. Articles temporarily imported for the purpose of trial.
4. Articles temporarily imported as samples by merchants, manufacturers, and commercial travellers.
5. Articles temporarily imported for use in theatrical and other similar performances.

Art. VII.—Should it be found necessary to revise any portion of the Annexed Tariff, such revision shall be published at least six months prior to the date of enforcement.

SUPPLEMENTARY PROVISION.

Art. VIII.—The date on which the present Law comes into force shall be determined by Imperial Ordinance.

IMPORT TARIFF.

CLASS I.—DUTIABLE ARTICLES.

GROUP I.—ARMS, CLOCKS, WATCHES, SCIENTIFIC INSTRUMENTS AND MACHINERY.

1—Cannon, muskets, pistols, side-arms, projectiles, cartridges, and other arms.	35
2—Balances and measuring scales and tapes	10
3—Barometers	10
4—Binocular glasses:	
a. Leather-covered or japanned ...	15
b. All others	20
5—Clocks and parts thereof	20
6—Compasses and chronometers (for navigation) and parts thereof ...	10
7—Crucibles (all kinds)	10
8—Cutlery (not otherwise provided for).	20
9—Diving appliances and parts thereof.	10
10—Electric light machinery and parts thereof	10
11—Fire engines and parts thereof ...	10
12—Implements, agricultural, artisan's tools, and parts thereof	5
13—Instruments, musical, and accessories	15
14—Instruments, philosophical, chemical, drawing, surveying, surgical, and all other scientific (not otherwise provided for)	10
15—Instruments or apparatuses, photographic, and parts thereof ...	15
16—Locomotive engines and parts thereof	10
17—Machinery or machines of all kinds and parts thereof (not otherwise provided for)	10
18—Microscopes and parts thereof ...	10
19—Phonographs and parts thereof ...	25
20—Pumps and parts thereof	10
21—Sewing machines and parts thereof..	10
22—Spectacles and parts thereof ...	10
23—Sporting guns and parts thereof ...	25
24—Steam-boilers, engines, and parts thereof	10
25—Telephones and parts thereof ...	20
26—Telescopes	10
27—Thermometers	10
28—Typewriters	10
29—Watches, watch-cases, accessories:	
a. Gold or platinum	30
b. Silver or other	25
30—Watch movements and fittings ...	15

GROUP II.—BEVERAGES AND COMESTIBLES.

31—Mineral waters, lemonade, soda-water, and other non-alcoholic drinks ...	10
32—Biscuits:—	
a. Ship-biscuits	10
b. Fancy biscuits	15
33—Butter	15
34—Cheese	15
35—Coffee	20
36—Confectionary and sweetmeats ...	25
37—Eggs, fresh	10
38—Flour and meal of all cereals, and starch	10
39—Fruits, fresh or dried, and nuts not otherwise provided for	15
40—Hams and bacon	15
41—Meat, fresh	10
42—Milk, condensed or desiccated ...	15
43—Pepper	15
44—Salt (sea or rock):	
a. Crude	10
b. Refined	15
45—Salt fish	15
46—Salt meat	10
47— <i>Schikwasat</i> (gelidium cornum) ...	10
48—Tea	25
49—Vegetables, green, dried or salted ...	10
50—All other comestibles	15

GROUP III.—CLOTHING AND ACCESSORIES.

51—Boots and shoes (all kinds)	20
52—Braces, or suspenders:	
a. Of silk wholly or in part ...	25
b. All others	20
53—Buttons, buckles, hooks and eyes (except studs and sleeve or cuff buttons or links)	20
54—Comforters, neckerchiefs, or mufflers:	
a. Of silk wholly or in part ...	25

55—Gloves (all kinds) 20	106— <i>Mawo</i> (<i>Epedora vulgaris</i>) ... 10	GROUP VIII.—HORNS, IVORY, SKINS, HAIR, SHELLS, &c.
56—Hats, caps, and bonnets:	107—Manganese, black oxide of (<i>manganesi oxidum nigrum</i>) ... 10	180—Bones, animal 5
<i>a.</i> Mounted with gold, silver or gems 30	108—Morphine, hydrochlorate or sulphate of (<i>morphia hydrochloras or sulphas</i>) ... 10	181—Feathers and downs (all kinds) ... 25
<i>b.</i> Of silk wholly or in part ... 25	109—Musk (<i>moschus</i>) 15	182—Furs (dressed or otherwise) ... 25
<i>c.</i> All others 20	110—Musk (artificial) 15	183—Hair, animal, excluding wool, goat's hair, and camel's hair 5
57—Scarfs and neckties:	111—Nard, or spikenard 10	184—Hair, human 20
<i>a.</i> Of silk wholly or in part ... 25	112—Phosphorus, amorphous ... 10	185—Hides of skins, bull, ox, cow, and buffalo (raw, dried, salted or pickled, and undressed) 5
<i>b.</i> All others 20	113—Pilocarpine, hydrochlorate of (<i>Pilocarpine hydrochloras</i>) 10	186—Hides or skins, deer (raw, dried, salted or pickled and undressed) ... 5
58—Shawls:	114—Potash, bromide of (<i>Potassii bromidum</i>) 10	187—Hides or skins, samba (<i>cerous elepus</i>) [raw, dried, salted or pickled, and undressed] 5
<i>a.</i> Of wool embroidered, or of silk wholly or in part 25	115—Potash, chlorate of (<i>Potassii chloras</i>) ... 10	188—Hoofs 5
<i>b.</i> All others 20	116—Potash, iodide of (<i>Potassii iodidum</i>) ... 10	189—Horns, bull, ox, cow, and buffalo ... 5
59—Shirts 20	117—Putchuk 10	190—Horns, deer 5
60—Socks and hose or stockings, knit:	118—Quinine, hydrochlorate or sulphate of (<i>Quinia hydrochloras or sulphas</i>) ... 10	191—Horns, rhinoceros 10
<i>a.</i> Of cotton, wool, or wool and cotton 20	119—Rosin 10	192—Ivory or tusks, elephant 10
<i>b.</i> Of silk wholly or in part ... 25	120—Rhubarb, in lump or ground (<i>radix rheum</i>) 10	193—Ivory or tusks, elephant, waste ... 10
<i>c.</i> All others 20	121—Saffron (<i>crocus</i>) 10	194—Ivory or tusks, narwhal or unicorn ... 10
61—Studs and sleeve or cuff buttons or links:	122—Saltpetre (<i>potassu nitras</i>) 10	195—Ivory or tusks, walrus or sealhorse ... 10
<i>a.</i> Of gold or platinum (mounted with gems, pearls, corals, &c., or otherwise) 30	123—Santonine (<i>santoninum</i>) 10	196—Leather, sole 15
<i>b.</i> All others 25	124—Sarsaparilla (<i>radix sarsa</i>) 10	197—Leather, all other 15
62—Trimnings of all kinds (including braids, cords, ribbons, laces, fringes, gimps, tassels, knots, stars, metallic threads and braids, and others not otherwise provided for:	125—Semen cynac, or worm seed (<i>semen santonice</i>) 10	198—Tortoise shell 15
<i>a.</i> Composed of gold or silver wholly or in part 30	126—Shellac 10	199—Tortoise shell, waste 15
<i>b.</i> Of silk wholly or in part ... 25	127—Soda-ash 10	200—All other bones, horns, raw hides or skins, and shells of animals ... 5
<i>c.</i> All others 20	128—Soda, bicarbonate of (<i>sodu bicarbona</i>) ... 10	201—All other tusks or teeth of animals ... 10
63—Undershirts and drawers, knit:—	129—Soda, caustic (<i>sodu caustica</i>) 10	GROUP IX.—METALS AND METAL MANUFACTURES.
<i>a.</i> Of cotton, wool, or wool and cotton ... 20	130—Soda crystals (washing soda) ... 10	202—Antimony (ingot and slab) ... 5
<i>b.</i> Of silk wholly or in part ... 25	131—Soda, salicylate of (<i>sodu salicylas</i>) ... 10	BRASS:—
<i>c.</i> All others 20	132— <i>Sojutsu</i> (<i>radix atractylis laneca</i>) ... 10	203—Bar, rod, plate, and sheet ... 10
64—Waterproof coats:—	133—Sticklac 10	204—Pipes and tubes 10
<i>a.</i> Of silk wholly or in part ... 25	134—Vaseline 10	205—Screws 10
<i>b.</i> All others 20	135— <i>Wagon</i> (<i>radix scutellaria lancescharia</i>) ... 10	206—Old (only fit for remanufacturing) ... 5
65—All other clothing and accessories:—	136—All other drugs, chemicals and medicines 10	COPPER:—
<i>a.</i> Of silk wholly or in part ... 25	GROUP V.—DYES, COLOURS AND PAINTS.	207—Ingot and slab 5
<i>b.</i> All others 20	137—Alizarine dyes 10	208—Bar, rod, plate, and sheet ... 10
GROUP IV.—DRUGS, CHEMICALS, AND MEDICINES.	138—Aniline dyes 10	209—Nails 10
66—Acidum carboicum 10	139—Blue, mineral (dry or liquid) ... 10	210—Pipes and tubes 10
67—Acidum salicylicum 10	140—Carmine 10	211—Wire 10
68—Acidum tartaricum 10	141—Cobalt, oxide of 10	212—Copper coins and nickel coins ... 5
69—Alcohol 40	142—Cochineal 10	213—Old (only fit for remanufacturing) ... 5
70—Alum 10	143—Emerald green 10	214—German silver (sheet, plate, rod, and wire) 10
71—Anti-febrin 10	144—Galls of all kinds 10	IRON AND MILD STEELS:—
72—Anti-pyrine 10	145—Gamboge 10	215—Pig and ingot 5
73—Betel-nut 10	146—Gold, silver, or platinum, liquid ... 15	216—Kentedges 5
74— <i>Biaksutsu</i> (<i>radix atractylis ovata</i> or <i>alta</i>) 10	147—Indigo, dry 10	217—Bar, rod, hoop, and band ... 10
75—Bismuth subnitrate 10	148—Indigo, liquid 10	218—T, angle, and other similar wrought iron and mild steel 10
76—Bleaching powder (chloride of lime or calx chlorinata) 10	149—Indigo extract and indigo carmine ... 10	219—Rails, and bolts and nuts, chairs, dog-spikes, and fish-plates thereof ... 10
77—Borax (<i>socii biboras</i>) 10	150—Lead (all colours) 10	220—Sheet and plate (plain or corrugated) ... 10
78—Camphor, Borneo, and Blumea or Ngai ... 10	151—Logwood, chips 10	221—Galvanized sheet and plate (plain or corrugated) 10
79—Cassia, or cinnamon, bark 10	152—Logwood, extract of 10	222—Plate, diagonal or checkered ... 10
80—Cassia, or cinnamon, oil 10	153—Mangrove bark 10	223—Pipes and tubes 10
81—Catarie, leaf of 10	154—Paint in oil 10	224—Nails (plain or galvanized, not otherwise provided for) 10
82—Cinchona bark 10	155—Safflower 10	225—Screws, bolts and nuts (not otherwise provided for) 10
83—Cinchonine (muriate or sulphate of) ... 10	156—Sapan-wood 10	226—Tinned plates (plain, crystallized, or laminated) 10
84—Cinnabar. (<i>hydrargyri sulphuretum rutrum</i>) 10	157—Smalt 10	227—Wire and small rod not exceeding $\frac{1}{4}$ inch in diameter (plain or tinned) ... 10
85—Cloves (<i>caryophyllus</i>) 10	158—Turmeric 10	228—Telegraph wire (galvanized) ... 10
86—Cocaine hydrochloride 10	159—Ultramarine 10	229—Wire-rope (plain or galvanized) ... 10
87—Cod liver oil (<i>oleum morrhua</i>) 10	160—Varnish 10	230—Wire-rope, old (plain or galvanized) ... 5
88—Collodion, photographic, with iodizer ... 10	161—Varnish, Chinese 10	231—Old hoops, old wire, and other old iron and milled steel, only fit for remanufacturing 5
89—Colombo (<i>radix calumba</i>) 10	162—Verdigria 10	LEAD:—
90—Cow bezoar 10	163—Vermilion 10	232—Pig, ingot and slab 5
91—Cutch and gambier (<i>extractum catechu nigrum</i> and <i>extractum terra japonica</i> or <i>catechu pallidum</i>) ... 10	164— <i>Wansho</i> , or <i>gossu</i> 10	233—Sheet 10
92—Gentian (<i>radix gentiana</i>) 10	165—White zinc 10	234—Pipes and tubes 10
93—Ginseng (<i>panax</i>) 10	166—All other dyes, colours, and paints ... 10	235—Mercury 5
94—Glycerine 10	GROUP VI.—GLASS AND GLASS MANUFACTURES.	236—Nickel 5
95—Gum Arabic, or acacia 10	167—Glass, Window (ordinary):	PLATINUM:—
96—Gum benzoin, or benzoinum 10	<i>a.</i> Uncoloured and unstained ... 10	237—Block 5
97—Gum dragon's blood, or <i>sanguis draconis</i> 10	<i>b.</i> All others 15	238—Bar, rod, sheet, wire 10
98—Gum myrrh, or myrrha 10	168—Glass, plate (silvered or unsilvered) ... 20	239—Soldier (all kinds) 5
99—Gum olibanum 10	169—Glass beads, known as Venetian beads 20	STEEL (other than mild steel):—
100—Hops 10	170—Glass, broken or powdered ... 5	240—Pig and ingot 5
101—Iodoform 10	171—Glass, looking 25	241—Bar, rod, plate and sheet ... 10
102—Ipecac (<i>radix ipecacuanha</i>) 10	172—Glass, all other manufactures of (not otherwise provided for) 20	242—Pipes and tubes 10
103—Jalap (<i>radix jalapa</i>) 10	GROUP VII.—GRAINS AND SEEDS.	
104—Lead, acetate, or sugar of	173—Barley 5	
105—Liquorice (<i>radix glycyrrhiza</i>) 10	174—Beans and pease 5	
	175—Indian corn 5	
	176—Oats 5	
	177—Sesame, or sesamum 5	
	178—Wheat 5	
	179—All other grains and seeds, not otherwise provided for 5	

243—Wire and small rod not exceeding 1/4 inch in diameter 10	305—Cotton threads, for sewing purposes ... 15	cotton (singly or in piece) ... 15
244—Wire (for umbrella ribs) 10	306—Book-binder's cloth 15	δ. of silk or lace 25
245—Wire-rope (plain or galvanized) ... 10	307—Cotton damasks 15	369—Mosquito-nets (all kinds) 20
246—Old files and other old steel, only fit for remanufacturing 5	308—Cotton drills 15	370—Leather-cloths (for furniture, &c.) ... 15
TIN:—	309—Cotton ducks 15	371—Oil cloths and linoleum cloths (for floors) 15
247—Block, pig, and slab 5	310—Cotton prints and chintzes ... 15	372—Table cloths or covers:
248—Plate 10	311—Cotton satins, brocades, Italians, and figured shirtings 15	α. of silk wholly or in part ... 25
249—White metal, Babbit's 5	312—Cotton velvets, or velveteens ... 15	δ. all others 20
YELLOW METAL OR MUNTZ METAL:—	313—Ginghams 15	373—Towels (all kinds, singly or in piece). 15
250—Sheet and plate 10	314—Shirtings, grey 15	374—Travelling rugs (singly or in piece):
251—Rod and bar 10	315—Shirtings, white or bleached ... 15	α. of silk in part 25
252—Nails 10	316—Shirtings, twilled 15	δ. all others 15
253—Pipes and tubes 10	317—Shirtings, dyed 15	375—Twine of cotton, and of hemp, flax, jute, Manila hemp, or China grass ... 10
254—Old yellow metal, only fit for re- manufacturing 5	318—Taffachelass 15	376—Yarns and threads (all kinds, not otherwise provided for) 15
ZINC:—	319—T. Cloth (shirtings of narrow width) 15	377—All other plain tissues 15
255—Block, pig, and slab 5	320—Turkey-red cambrics 15	378—All other finished tissues:
256—Sheet 10	321—Victoria-lawns 15	α. of silk wholly or in part ... 25
257—Old sheet and other old zinc only fit for remanufacturing 5	322—All other cotton tissues (of cotton wholly or in part, the cotton in the latter case, however, predominating in weight) 15	δ. all other 20
258—Nails and screws not otherwise provided for 10	323—Woollen and worsted yarns (all kinds) 10	GROUP XIV.—TOBACCO.
259—Anchors and chain cables (new or old) 10	324—Alpaca 15	379—Cigar and cigarettes 40
260—Bag-frames 15	325—Balzarine 15	380—Cigarettes rolled in paper 40
261—Capsules (for bottles) 15	326—Buntings 15	381—Snuff 40
262—Chains, iron, not otherwise provided for 15	327—Camlets, lastings, and crape lastings 15	382—Tobacco, cut 40
263—Door-locks, knobs, bolts, hinges, &c. 15	328—Camlet cords 15	383—Tobacco, leaf 35
264—Foins and powder of gold, silver, and other metals 15	329—China figures 15	384—Tobacco, all other prepared ... 40
265—Gold and silver ware (not otherwise provided for) 15	330—Flannel (wholly of wool or of wool and cotton) 15	GROUP XV.—WINES, LIQUORS, AND SPIRITS.
266—Gold and silver plate ware (not other- wise provided for) 25	331—Italian cloths 15	385—Beer, ale, porter, and stout ... 25
267—Grates, fenders, stoves, and fittings thereof 20	332—Long ells 15	386—Brandy 40
268—Safes and cash-boxes 20	333—Mousseline de laine (wholly of wool or of wool and cotton) 15	387—Champagne 35
269—Umbrella ribs and furnitures thereof. 15	334—Orleans and lustrés 15	388—Chinese liquors (all kinds) ... 40
270—All other metals unmanufactured, or old, not otherwise provided for ... 5	335—Serges 15	389—Gin 40
271—All other manufactures of metal or metals not otherwise provided for ... 20	336—Spanish stripes 15	390—Liqueurs (all kinds) 40
GROUP X.—OIL AND WAX.	337—Woollen cloth (all kinds) 15	391—Port 35
272—Candles 15	338—Woollen damask 15	392—Rum 40
273—Gasoline 10	339—Woollen felt 15	393—Sake (similar to that made in Japan). 40
274—Oil, bean and pea 10	340—All other woollen tissues (of wool wholly or in part, the wool in the latter case, however, predominating in weight) 15	394—Sherry 35
275—Oil, castor 10	PART III.	395—Vermouth 35
276—Oil, cocoa-nut 10	341—Silk, raw, thread, "tama," "noshi," waste, and raw silk of wild cocoons ... 15	396—Whisky 40
277—Oil, ground nut 10	342—Silk, floss 15	397—Wines (red or white) 35
278—Oil, kerosene 10	343—Silk, spun (for weaving purposes) and threads partly of silk 15	398—Spirits, or distilled liquors, of all kinds 40
279—Oil, linseed 10	344—Silk threads (not otherwise provided for) 20	399—Wines, or fermented liquors, of all other kinds 35
280—Oil, olive 10	345—Crape, Chinese 20	GROUP XVI.—MISCELLANEOUS.
281—Oil, palm 10	346—Silk pongee, Chinese 20	400—Aloeswood 10
282—Oil, paraffine 10	347—Silk satins, Chinese 20	401—Ambers:
283—Spirit of turpentine 10	348—Silk-figured satins, Chinese 20	α. Unwrought 10
284—Wax, Chinese white 10	349—Silk-faced cotton satins 20	δ. Wrought 20
285—Wax, paraffine 10	350—Silk or silk and cotton tissues, em- broidered 25	ANIMALS:
286—All other oils and waxes 10	PART II.	402—Cattle, horse, ass, mule, sheep, goat, and fowl 5
GROUP XI.—PAPER AND STATIONERY.	351—All other silk tissues (of silk wholly or in part, the silk in the latter case, however, predominating in weight) ... 20	403—All others 10
287—Albums (photographic and postage stamp) 25	PART IV.	404—Asbestos (in sheet or board) ... 10
288—Books, blank or printed blank, and printed blank forms 15	352—Flax yarn, for weaving purposes ... 10	405—Bamboo (unwrought) 5
289—Ink, printing, copying, writing and lithographic 15	353—Flax threads, for sewing purposes ... 15	406—Bellings of leather, caoutchouc, or canvas and hose of caoutchouc or can- vas (for machinery) 10
290—Paper, Chinese (all kinds) 15	354—Canvas 15	407—Billiard tables and accessories ... 30
291—Paper, hanging 15	355—Linen (grey, white, dyed or printed) 15	408—Blasting gelatine and similar explo- sives, detonators and fuses 15
292—Paper, printing 15	356—Linen damasks 15	409—Bricks and tiles (for building pur- poses) 10
293—Paper, all other 15	357—All other linens (of flax wholly or in part, the flax in the latter case, how- ever, predominating in weight) ... 15	410—Brushes and brooms (all kinds) ... 20
294—Pencils:	PART V.	411—Canes, sticks, and whips 20
α. In gold or platinum 30	358—Blankets (of all kinds, singly or in piece) 15	412—Caoutchouc and gutta percha:—
δ. All others 15	359—Carpets or carpeting, Brussels ... 20	α. Crude 5

α. Gold 30	361—Carpets or carpeting, hemp or jute .. 20	γ. Manufactures of (not otherwise provided for) 20
δ. All others 15	362—Carpets or carpeting, patent tapestry. 20	413—Carriages, bicycles, tricycles and parts thereof 25
296—Sealing wax 15	363—Carpets or carpeting, all other ... 20	414—Cars or carriages, railway passenger and parts thereof 10
297—Straw-boards 15	364—Chikufu 15	415—Cars or wagons, railway freight and parts thereof 10
298—All other stationery 15	365—Curtains:	416—Cars or carriages, tramway and parts thereof 10
GROUP XII.—SUGAR.	α. of silk wholly or in part ... 25	417—Cars or drays for conveyance of goods 10
299—Sugar 5	δ. all others 20	418—Celluloid:—
300—Sugar, refined 20	366—Elastic boot webbing:	α. In sheet or rod 10
301—Sugar, rock candy 25	α. of silk in part 30	δ. Wrought 20
302—Molasses 10	δ. all other 15	419—Cement, Portland 5
303—Syrup 10	367—Elastic braids or cords 15	420—Chalk, and whiting 5
GROUP XIII.—TISSUES, YARNS, THREADS, AND MATERIAL THEREOF.	368—Handkerchiefs:	421—Charcoal, wood and animal ... 5
PART I.	α. of cotton, linen, or of linen and	422—Clay (all kinds) 5
304—Cotton yarn, for weaving purposes... 10		423—Coal and coal in brick 15

425—Corals (wrought or otherwise) ...	30
426—Cordage and ropes of flax, hemp, jute, Manila hemp, or China grass (for rigging purposes) ...	10
427—Cork bark ...	5
428—Corks ...	10
429—Diamond-glaziers ...	10
430—Dynamite ...	15
431—Emery sands ...	5
432—Emery cloth or paper, and sand paper	5
433—Emery wheels and all kinds of grind-stones ...	5
434—Felt (for ships bottoms or for roofing)	10
435—Fireworks (all kinds) ...	30
436—Fishing-guts (<i>igusu</i>) ...	5
437—Flints ...	5
438—Flowers, artificial ...	25
439—Frames for pictures and mouldings..	20
440— <i>Funori</i> (<i>gleopeltis intricata</i>) ...	5
441—Furnitures (new or old, not otherwise provided for) ...	20
442—Games, all articles of, used in tennis cricket, chess, etc., (not otherwise provided for) ...	25
443—Glue (common) ...	5
444—Gun-cotton ...	15
445—Gunpowder (all kinds) ...	15
446—Gypsum ...	5
447—Hay ...	5
448—Ivory, manufactures of, not otherwise provided for ...	20
449—Jewelry (set with precious stones, pearls, etc.; or otherwise) ...	35
450—Jewelry, imitation (set with precious stones, pearls, etc.; or otherwise) ...	30
451—Labels (for bottles, tins, etc.) ...	15
452—Lamps, lanterns, and parts thereof...	20
453—Lard, tallow, and grease ...	10
454—Leather, manufactures of (not otherwise provided for) ...	20
455—Malt ...	5
456—Matches (all kinds) ...	20
457—Mattings, China (in rolls of 40 yards)	20
458—Mattings, cocoa ...	20
459—Mats and mattings, or other ...	20
460—Mica (in sheet) ...	10
461—Oakum ...	5
462—Packing (for steam-engines) ...	10
463—Paintings in oil or water-colour, lithographs, chromolithographs, photographs, <i>h&g</i> , and all other pictures, not otherwise provided for ...	25
464—Pitch, wood tar, and coal tar ...	5
465—Plaster of Paris... ..	5
466—Playing cards (all kinds) ...	35
467—Plumbago, or black lead... ..	5
468—Porcelain and earthenware (not otherwise provided for) ...	20
469—Precious stones and pearls ...	35
470—Precious stones and pearls (imitation)	30
471—Pulp (for making paper) ...	5
472—Putty ...	5
473—Rattans (split or otherwise) ...	5
474—Saddles, bridles, and harness ...	25
475—Sandalwood ...	10
476—Shoe-blackening (all kinds) ...	20
477—Smoker's articles used in smoking (opium excepted) ...	30
478—Soap:	
<i>a.</i> Toilet	20
<i>b.</i> All other	10
479—Soap-stone (in lump or powder) ...	5
480—Sparterie (for hat manufacture) ...	10
481—Sponges ...	5
482—Stones and slate (not otherwise provided for):	
<i>a.</i> Rough or unwrought for building purposes, &c. ...	5
<i>b.</i> Wrought for ornamental works, furnitures, &c. ...	20
<i>c.</i> Statues and other sculptured or engraved works ...	25
483—Submarine cables and subterranean telegraph wires ...	10
484—Timber, santalum (<i>shitan</i>) ...	5
485—Timber, teak ...	5
486—Timbers, lumbers, boards, and planks (of all kinds not otherwise provided for) ...	5
487—Toilet or dressing cases ...	25
488—Toilet or perfumed water, hair-oil, tooth-wash, and all other cosmetics and	

perfumery	30
489—Tortoise shells, manufactures of ...	25
490—Toys (all kinds) ...	25
491—Trunks, portmanteaux, and travelling or courier bags. ...	20
492—Umbrellas, parasols, and sunshades:	
<i>a.</i> Of silk, wholly or in part ...	25
<i>b.</i> All other	20
493—Umbrella sticks and handles (except those made of gold and silver) ...	20
494—Vessels, steam and sailing, and boats	5
495—Wares of santalum or ebony wood ...	25
496—All articles, raw or unmanufactured not herein enumerated ...	10
497—All articles, manufactured, wholly or in part, not herein enumerated ...	20

CLASS II.—DUTY-FREE ARTICLES.

498—Advertisements and sign-boards.	
499—Animal bone ashes.	
500—Atlases, maps, and charts, and other scientific diagrams.	
501—Bank notes, coupons, scrips, and negotiable papers of all kinds.	
502—Books, printed, including pamphlets, copy-books, journals, and periodicals.	
503—Bullion, gold and silver.	
504—Cocoons (all kinds.)	
505—Coins, gold and silver.	
506—Cotton, old.	
507—Cotton, raw, ginned.	
508—Cotton, raw, on the seeds.	
509—Cotton, waste.	
510—Cotton yarn, waste.	
511—Flax, hemp, jute, Manila hemp, and China grass (hackled or otherwise).	
512—Guano.	
513—Gunny bags (new or old).	
514—Gunny cloth.	
515—Mats, backing.	
516—Models, and architectural and engineering plans.	
517—Oil cake in lump and powdered.	
518—Opium for medicinal purposes (imported by the Imperial Government).	
519—Plants, trees and shrubs, and roots, shoots, and bulbs thereof.	
520—Rice and paddy.	
521—Sardines (<i>iwashi</i>), dried.	
522—Tea firing baskets and sieves.	
523—Tea firing pans.	
524—Tea-lead.	
525—Wool, goat's hair, and camel's hair (new or old).	

CLASS III.—PROHIBITED ARTICLES.

526—Adulterated drugs, chemicals, medicines, food and beverages considered injurious by laws, ordinances and regulations.	
527—Articles used in smoking opium.	
528—Articles considered by laws, ordinances, and regulations dangerous to public health or to plants and animals.	
529—Articles in violation of the laws of the Empire respecting patents, designs, trademarks, and copyright.	
530—False coins, and imitations of coins which may be considered to be false coins.	
531—Opium (opium imported by the Government for medicinal purposes excepted).	
532—Books, pictures, engravings, and other articles injurious to public peace and morals.	

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

The *Rikugō Zasshi* contends that a new ethical movement is needed in Japan. Too much, says this organ, has been made of loyalty and filial piety to the exclusion of other important virtues. According to the "Analects" of Confucius filial piety is not simply one of a number of cardinal virtues, but becomes the foundation of a whole system of ethics. Virtues like sincerity, purity, uprightness, humility, and generosity, or charity, are relegated to very subordinate positions. It is quite possible for a man to be a filial son and a loyal subject and yet have no title whatever to be called virtuous. In Japan to-day patriot-

ism has been exalted to such a degree that, in the minds of many, to possess this virtue is a kind of excuse for neglecting the cultivation of all others. The men that vaunt their patriotism ostentatiously are ready, time after time, to accept bribes or to pass their lives in vice. Though it is the fashion to point to loyalty and patriotism as characteristics in Japan that show to advantage when compared with other countries, we, for our part, says the *Rikugō Zasshi*, are of a contrary opinion. Virtue which has no connection with the observance of the whole code of morality is no longer worthy of the name of virtue. From a moral standpoint Japanese patriotism, as displayed to-day, is a weakness. Such considerations as these, concludes the organ we are quoting, point to the necessity of the reform of our ethical system, and, in our opinion, to the need of combining ethics and religion.

The pen of the Rev. Dr. Christlieb is ever busy. He contributes, we observe, to No. 84 of the *Shinri* (Truth) articles on "Is God personal?" "the Philosophy of Kant" and the "Mythology of the Rigveda," according to Max Müller and Oldenberg. In its new year congratulations, the *Shinri* promises that its pages shall be enriched by contributions from abroad, some well-known European and American writers having been asked to send communications to the magazine. It is further announced that in the opinion of the editor the time has come for translating into Japanese German standard works bearing on the Christian religion, and that this enterprise is now in progress.

We learn from the *Shinri* that Professor Busse, formerly of the Imperial University, Tokyo, now Professor of Philosophy at the Rostock University, has published a book entitled "Philosophie und Erkenntnistheorie," which is to a large extent a reproduction of the lectures delivered at the University in Tokyo between 1887 and 1892.

In the *Seikyō Shimpō* (the Greek Church organ), Mr. Ishikawa Kisaburō refers to the comments of the Tokyo newspapers respecting the tolling of the Cathedral bell on Surugadai during the period of mourning. On January 13th, says Mr. Ishikawa, when the death of the Empress Dowager was announced, a service was held at the Surugadai Cathedral and the great bell was tolled. There were not wanting ignorant people in Tokyo who interpreted this proceeding as showing want of respect to the deceased, in that it was a violation of the order forbidding every kind of music. An expression of that opinion found its way into the Tokyo newspapers and was copied into provincial dailies. It is, of course, beyond doubt that the music forbidden was such as is produced for the sake of the pleasure it affords. A church bell is as often used to call attention to a death as to celebrate a wedding. Its tones are rightly regarded by religious people as the most solemn of sounds. It is the voice of mother Church calling her children, of God's messenger calling devout souls to prayer. In European countries bells are constantly employed to express national mourning. The fact that Japanese Buddhist and Shintō priests interpreted the Government order as including their temple drums and bells shows how little they appreciate the significance of the solemn sounds that call to prayer. After desisting from the use of their bells for some weeks, the Tokyo priests were informed by the authorities at the end of January that the restriction did not apply to temple bells. They thus had to be taught by the secular power the true significance of religious practices, a thing of which they may well be ashamed.

In the *Seikyō Shimpō*, Mr. Ishikawa Kisaburō discusses the connection of Christianity with Mr. Herbert Spencer's Synthetic Philosophy (総合哲學 *Sōgō-tettugaku*). After observing that the tenth and last volume of this gigantic work was published last year, Mr. Ishikawa proceeds to discuss the bearing of Mr. Spencer's

views on Christianity, a subject on which the essayist has nothing new to say. Although the whole of Mr. Spencer's work has been translated into Russian, according to Mr. Ishikawa, not more than two or three volumes have as yet been rendered into Japanese.

* * *

In Nos. 387 and 389 of the same magazine are two contributed articles, which both express dissatisfaction with the amount of real Christian progress made by the Japanese adherents of the Greek Church. The first of these, alluding to the oft-repeated reproach addressed to Greek Christians on the ground of their want of patriotism, says that there is a certain amount of truth in the popular accusation; that in the matter of Christianity Japan is far more dependent on Russia than is honourable to her as an independent nation. There are those that point boastfully to the Surugadai Cathedral as a proof of the triumph of Christianity in Japan, but the writer of the articles regards the building in another light. To him it represents a great debt that Japan owes to Russia. What credit can the Japanese take for a structure upon which a vast sum of Russian money has been expended? Japanese Christians belonging to the Greek Church are in the habit of sneering at the servility of the Roman Catholics to the Pope, but wherein do the Roman Catholics differ from the Greek Christians in the matter of subjection? Until they have rendered their church entirely independent of foreign aid, they will not be in a position to exercise wide influence over the Japanese nation as a whole. The greatest obstacle to progress at the present moment is the comparative weakness of the national spirit. The second article contributed to the *Seikyō Shimpō* proceeds on the same lines as the above, but adds that the real remedy for the evil alluded to is more Christian zeal. Were believers fuller of the spirit of Christ, nothing would prevent them from becoming independent of Russian aid.

The *Shūkyō* (No. 65), contains articles on "Christianity and our present Society;" "The *Kofiki*;" "The Ethics of Buddhism;" "Religious ideas connected with numbers;" "Christianity and Patriotism;" "The Religion of the Future—its five Characteristics;" "Prayer for the Dead;" "The Myths of a New World," and a variety of other subjects. This magazine is, in our opinion, unequalled in the comprehensiveness of the subjects it treats and diversity in the method of treatment. We give an epitome of the article on Christianity and patriotism, it being a subject which of late has been much discussed by Japanese Christians belonging to various churches. "Great misunderstanding exists in reference to the relation of Christianity to patriotism. This arises from one of two causes. Either the nature of Christianity or the nature of true patriotism is misunderstood. Religions are either national or universal. In the case of national religions, to be patriotic is to be religious. But regarded from the point of view of nineteenth century civilisation, national religions are far behind universal religions, and those who profess faith in them are usually narrow-minded and bigoted. Such religions are out of harmony with the spirit of the age. The tendency of modern influences and learning is the reduction of purely national differences to a minimum. The intercourse between different nations is now so intimate that a perpetual removal of national angles is taking place. People that cling to their national faiths are left behind in the race. Their enlightenment is not to be compared with that of those that have adopted a universal form of religion. There are three characteristics which mark universal religions. (1) They are free from superstition and conducive to morality. (2) They are intellectual rather than ceremonious. (3) They show no preferences for any special class of people, but treat all mankind alike. Christianity is as religion to this class and hence is in no way opposed to patriotism of the right type. Patriotism, as understood by some people, consists of a contempt for foreign countries and an exagger-

ated notion of the importance of one's own land. But this is mere narrow prejudice founded on ignorance of the merits of others, and, unless restrained, is perilous to the safety of a nation, since insults offered to other countries are apt to be resented and to lead to the punishment of the offenders. That belief in Christianity is not antagonistic to patriotism is proved by the strong patriotic feeling manifested in England, America and Germany. The five necessary qualifications for the religion of the future, according to the *Shūkyō*'s editorial, are that such a religion should be (1) Scientific, (2) Ethical, (3) Philosophical, (4) Comprehensive (*Seikaleki*), (5) Progressive.

A recent number of the *Bukkyō* furnishes a late account of the dissensions in Buddhist sects which have been noticed in these columns from time to time:—

(1) *Shinshū Otani-ha*.—The business manager of the Sect appointed to succeed Atsumi, Otani Shōchin, relinquished the post on the ground that he was only intended to be a puppet and that the former manager purposed to work things from behind the scenes. This step was followed by the choice of one hundred persons to whom Archbishop Otani entrusted the responsibility of selecting a manager. The Chief Abbot has also given his consent to the revision of the rules of the sect.

(2) *The Sōshū*.—This, as some of our readers know, is a sub-sect of the Zenshū. Its troubles are by no means over. It is alleged that the central business office of the Sect is guilty of misappropriation of money, of bribery, and of general disrespect towards the representatives of over 10,000 temples attached to the body. The conflict between the different parties shows no signs of abatement.

(3) *The Nichirenshū*.—Unawed by their defeat in a court of law, the adherents of this sect have not only carried their case to the Court of Appeal, but have utilised to the full their literary organs for the ventilation of their alleged grievance. The *Kyōjū* (教友) *Zasshi*, the *Nihon-no hashira*, and the *Hokuyō* (北友) *Zasshi*, all have articles on the subject, and in order to give greater force to their cause a new magazine called the *統一圖報 Tōitsu dampō* has been called into existence. Of the organs of this sect the *正法 Shōhō* alone shows its wisdom by silence.

(4) *The Shingonshū*.—It will be remembered that the disturbance in this sect commenced in Kii. Buddhist temples are divided into main temples (本山 *honsan*) and branch or dependent temples (末寺 *maisuji*). Priests connected with dependent temples of the Kōya-san, in Kii, objected to the conservatism of the mother temple and agitated for independence. This movement gradually spread to other subordinate temples and the whole sect became a hotbed of strife and contention. It is asserted in some quarters that it is doubtful whether this body will succeed in averting thorough disintegration.

The *Tsugaku Zasshi*, as usual, devotes a good deal of space to the discussion of religious topics. There is a review of the *Bukkyō Shōshi* (A short History of Buddhism), an article on the interest taken in religious philosophy in this country, and another on the importance of studying the original doctrines of Shaka Muni, as distinguished from the additions of after ages. We are informed by the magazine that Mr. Takakusu Junjiro, who left Japan in 1890 for the purpose of studying comparative religion, has returned to Japan, after studying at the Oxford, Kehl, Berlin, and Leipzig Universities, having obtained the degrees of Master of Arts and Doctor of Philosophy. Dr. Takakusu has been engaged in translating certain portions of the "Sacred Books of the East."

No. 21 of the hundred short essays contributed to the *Taiyō* by Dr. Katō Hiroyuki is entitled *Shūkyō Kairyō* (the Reform of Reli-

* This is the famous Oxford work edited by Professor Max Muller, consisting now of no less than 40 volumes.

gion). In this article Dr. Katō expresses the opinion that the reform of religion so much talked about in some circles is not a thing that can be accomplished. Learned men are constantly heard to say that, since neither Buddhism nor Christianity is abreast of the age in which we live, they should be replaced by some form or forms of faith spun out of the brains of modern thinkers. But this observation displays great ignorance of the whole subject. Religion does not exist as an organ whose chief object is the development of intelligence among the learned, but rather as a source of comfort to ordinary men of the world whose intellectual powers are very limited. Hence, were the changes that scholars propose such as could be effected, their desirability would be denied by all religious persons. Buddhism and Christianity are both useful as they are, and any attempt to alter them fundamentally is bound to end in failure. The doctrines of these religions are fixed and no amount of argument on the part of scholars will alter them. Where there is room for reform is in the manner that religious precepts and doctrines are exemplified in the lives of professors of the two great creeds. Specially is this necessary in the case of Buddhism, where corruption of various kinds is most prevalent. Buddhist delinquencies are so serious that it is high time for the Government to interfere. For this purpose it is desirable that a special bureau should be created, and that the settlement of all matters connected with religion should be entrusted to it.

* * *

The *Nihon Shūkyō* publishes a statement of the views of Baron Hayashi Tadasu, the lately appointed Russian ambassador, on the subject of religion. The following is the gist of Baron Hayashi's utterances as reported in the *Nihon Shūkyō*. "Christianity is accepted in Europe from custom rather than from conviction. As for the missionaries who carry the gospel to other lands, there is no other body of men who stir up such discord between the people of one country and those of another as these evangelists. When I was in China, I was impressed by the fact that the American and other foreign Missionaries were quite unable to defend the attitude of of foreign missionaries toward the Chinese. In Japan, too, there are foreign missionaries who travel and reside in the interior of Japan contrary to the treaty. On the other hand, there are men like Dr. Hepburn who are revered by everybody. On one occasion, when travelling by steamer, I remarked at table that with extra-territoriality in force it was difficult for Japan to administer her own laws. At which an Episcopal missionary replied that if the Japanese were Christian believers there would be no need to enforce extra-territoriality. To this I answered:—'If this be so, how is it that in spite of the command of Christ to love your enemies Christians nations are armed to the teeth?' Whereupon the reverend gentleman blushed scarlet and left the table. The age in which we live is a scientific age, and such questions as the existence of God, hell, heaven, and the soul excite no more real interest than the discussion of such abstract topics as time and space. I am a believer in the existence of a fine type of morality, such, for instance, as was displayed by our *Samurai* in days gone by, without any religion; and as long as instruction in practical morality is an essential part of the educational system of the country, we have nothing to fear. The good that Buddhism has effected may be traced to its ethical teaching.† The power of this teaching is well illustrated in Ceylon, to which I purpose sending three or four Japanese priests. I am a materialist in the sense that I do not believe in the existence of spirit apart from matter, and as for the Buddhist contention that

† The Buddhist doctrines are divided into 大乘 *daijō*, metaphysical, abstract doctrines; and 小乘 *shōjō*, doctrines referring to the practical matters of life, which include morality. There is also a 中乘 *chūjō*. Dr. Edkins translates these terms as the Greater; the Little (Lesser would be preferable); and the Middle Development or Vehicle. Like so many Buddhist terms they are used in an objective as well as a subjective sense.

mind alone has real existence, and that the existence of matter is only apparent—that I cannot accept." Commenting on the above, the *Nihon Shūkyō* says:—"It is well-known that since the time when, with Mr. Toyama and others, he proceeded to Europe in the train of Iwakura, Mr. Hayashi has been a most diligent student of Western life and learning, and that he has gained a reputation as translator of Mill's Political Economy and some parts of Gibbon's "Decline and Fall of the Roman Empire." That a man of such eminence in the literary and political worlds should entertain notions of this kind the *Nihon Shūkyō* thinks very significant.

The *Nihon Shūkyō* has addressed to the provinces a number of questions eliciting information on religious practices and sects. The questions cover some nine different topics; but as answers from only two places are given, we defer a fuller notice of the subject.

We read in the *Fukui Shimpō* that Dr. Inouye Tetsujirō, Professor Nakajima Rikizō and others propose to start a new religious organ to be called *Shinshūkyō* (New Religion), which will aim at adapting religion to the spirit of the age. The *Rikugō Zasshi*, as noticed in our last summary, is opposed to the scheme, and thinks it will prove utterly futile. In the magazine just quoted we find an account of the progress of Christianity and other religions in Formosa, furnished by Mr. Kawai, who has lately returned from the island. Neither life nor property is altogether secure in many parts of the island. There are many places where it is unsafe to be out after dark. The Japanese that have settled in Formosa belong mostly to the lower classes, and their behaviour is by no means creditable to the country from which they came. To console themselves in their isolation, many of them take to drinking, and to protect themselves from the many dangers to which they are exposed, they make use of charms and worship Buddhist divinities. In the opinion of the *Fukui Shimpō*, the present state of things in Formosa furnishes an excellent opportunity for Christian evangelistic work. Testimony is borne to the thoroughness and extent of Dr. MacKay's labours. He is said to be held in veneration in the districts where he has worked, even the coolies deeming it a privilege to serve him without remuneration. The organ we are quoting thinks it necessary to form a Special Missionary Society in Japan to provide evangelists for the newly acquired territory. Buddhism, it seems, occupies a very subordinate position in the island, being, when existent at all, a mere adjunct of Confucianism, the only formidable opponent of Christianity. The Buddhist priests sent from Japan amount to some 15 or 16. The Sects represented are the Jōdo, the Shingon, and the Shin. Shinō priests are in charge of the Shrine of the late Prince Kitashirakawa. Mr. Moriyama, a member of the Seikōkai (Episcopal Mission), is combining commerce and evangelistic work. The Baptist mission is represented by Mr. Ichikawa. The natives of Formosa are referred to by the *Fukui Shimpō* as *fuku-banjin* (barbarians who are comparatively civilized), and *sei (生) banjin* (wild, untaught savages). Dr. MacKay's work has been principally among the former classes. The members of the Baptist and the Episcopal Protestant missions purpose devoting themselves to the enlightenment of the latter.

We are informed that Dr. Gring has in hand a "History of Missions in Japan," which is partly original and partly a translation from the German work of Dr. Klitter, published in Berlin in 1890. Dr. Gring's book will appear within the next few months. The Rev. J. H. Pettes, of Okayama, has published in English a collection of statistics bearing on Christian work of a benevolent kind in this country, which should prove a valuable reference book. It is issued by the Kyōbun Kwan, the publishers of the *Kirisutokyo Meian*, mentioned in our last Summary. Mr.

Pettes has confined himself to Protestant Missions, we are given to understand, and purposes embodying the results of his investigations in other quarters in a second volume.

In an article entitled "Christianity and New Ideas," the *Fukui Shimpō* expresses the opinion that Christianity in Japan at the present day, instead of moulding men's thoughts, is moulded by them. It repeatedly dances to the piping of outsiders. The popular ideas respecting the connection of religion and patriotism, the Mombushō view of the right principle to be followed in educational matters, the readiness to identify Christian objects of worship with ancient Japanese Gods and the like, all show the inherent weakness of modern Christians. The *Fukui Shimpō* prays for the return of the days in which Christianity showed its superiority to all human institutions.

The same magazine complains of the perfunctoriness of modern school-masters. In order to please the authorities they do nothing but prate about faithfulness to the State and the importance of obeying the commands given in the Imperial Ordinance on Education issued some years ago. With such teachers it is not surprising that we constantly hear of school strikes. The Christian Industrial Home, started by Mr. Katayama and others, alluded to in a former Summary, was opened at Misaki-chō, Kanda, on the 16th instant, under the name of the Kingsley Kwan (館). Members are appointed by a committee. They are required to pay 3 yen per annum.

The *Kirisutokyo Shimbun*, commenting on the tendency of religious thought in 1896, expresses the opinion that it is desirable that Christianity and Buddhism should approach each other in a friendly spirit, and points to indications of the prevalence of this feeling during last year. This organ goes on to observe that there is a party in the Christian Church which advocates closer union with Shintoism on the ground that, to a large extent, it embodies national sentiment. These attempts at combination with other creeds, the *Kirisutokyo Shimbun* says, have their origin in the widespread desire among Christians to nationalise their religion. But what is known as the orthodox party is strongly opposed to altering in any way the form of faith preached by English and American Missionaries in this country, to whom Japanese history, feelings, and peculiarities are of no importance whatever. Among the religious movements of last year the work of the Salvation Army must not be passed over. This is an attempt to play upon the emotions of men in a temporary manner, rather than to inculcate ethical principles that shall take deep root in the mind.

The periodical quoted above publishes a report of the annual meeting of the Young Men's Christian Association held in Tokyo, on February 27th, from which we cull the following particulars. (1) Mr. Matsumura Kaiseki has had charge of the preaching carried on by the Association, and the Sunday audiences have averaged 165, being an increase of 45 in 1895. (2) The Saturday lectures on learned subjects have had an average attendance of 178. (3) The English night school has been well attended, and is supplied with earnest and able teachers both native and foreign. (4) The Summer school held at Hayama in Sōshū was attended last year by 60 or 70 pupils, who enjoyed the benefit of hearing a series of lectures delivered by Dr. Motora. (5) The Magazine called the *Kirisutokyo Seinen*, which dates from March, 1896, has now a portion of its space appropriated to English composition, in which news of Christian work in other countries is given. (6) A Musical Society was opened twice during the year, the first time at the Meiji-jōgakkō, which was burnt, and a second time in a temporary building, prior to the erection of a suitable hall, money for which is now being subscribed. (7) The books belonging to the Association consist of 266 foreign and 200 native works, and 297 volumes have been lent for the use of the members by

various persons. (8) The Reading Room of the Association has had a monthly attendance of 300 persons, and is supplied with 11 newspapers and 26 magazines. (9) The members now number 372, an increase of 101 compared with 1895, of whom 11 are foreigners and 101 provincials.

The *Awayama Hyōron* has articles on "Dr. Katō's religious Views," "The Establishment of a Reformatory," "The Church and Music," "Mission Schools," "Women's Local work," "Relations between Students and Teachers," and other subjects. The views of Dr. Katō referred to are those of which we have already given an abstract in this Summary. The part of Dr. Katō's essay to which the *Awayama Hyōron* takes exception is that in which he represents religion as designed specially for people of weak intellect. The view taken by the Methodist organ we are quoting, is that religion addresses itself to man's moral nature, and the state of his intellect is practically a matter of indifference. The possession of worldly knowledge does not render religion any the less necessary. If, as Dr. Katō argues, general intelligence makes religion superfluous, how is it that so many intelligent people lead immoral lives?

The small Roman Catholic organ called *Koye* is the Ishmaelite of Christian publications—"its hand is against every man." After pounding the Buddhists for some months, it has now commenced on the Protestants. An article lies before us entitled *Protestant no sessaku ni odoroku*, "We are astonished at the Silly Expedients of Protestants," in which the familiar arguments about the supremacy of St. Peter and his successors, the Popes, are retailed for the benefit of readers of the *Koye*. It is a matter for surprise that such a powerful body of workers as the Roman Catholics have no literary organ worthy to rank with the best Protestant and Greek Church periodicals. For statistics bearing on Roman Catholic work we are indebted to other sources. A recent writer of the *Fukui Shimpō* published the following particulars respecting the work of the Tokyo Sarugaku-chō Church. This Church carries on work in Kanda, Hongō, Koishikawa, Ushigome, Yotsuya, having a church membership of over 1,000 persons. The Sunday services are attended by about 200 people, exclusive of Christians. The minister in charge is L'Abbé Topinot. The schools belonging to this body are an elementary school in Koishikawa; the school of the "Morning Star" at Kudan, attended by 180 pupils, about half of whom are foreign; an ordinary elementary girls school in Sarugaku-chō; a high class elementary school; and an English, French and Japanese school. The Bible is not a text book in these schools. The mission does not hold preaching services for unbelievers after the manner of Protestants, but waits for the arrival of inquirers, who, according to the *Fukui Shimpō*, a Protestant organ, visit the fathers in large numbers.

NEWS OF THE DAY.

The Captain and Officers of the German flag-ship *Irene*, gave an "at-home" at Kobe on Sunday.

Mr. C. N. Crosse, barrister-at-law, returned to Kobe by the last French mail after a six months trip to the homeland.

There is some talk among Japanese in Kobe of celebrating the thirtieth anniversary of the opening of the port to foreign trade.

Mr. Sidney Morse, a young tenor of exceptional promise, will give a concert in Kobe this evening. Mr. T. V. Twining is his *ciccone*.

Copies of a translation prepared in H.B.M. Legation, of the Regulations respecting Patents, Trade Marks, and Designs can be had by British subjects on application to the Consulate.

Damage estimated at about 20,000 yen was done by a small outbreak of fire in the Japan-

China Cotton-reeling Company's premises at Osaka early on the 17th, says a Kobe morning journal. The flames spread to the adjoining property but were extinguished without serious loss.

Edward Trickett, once the world's champion sculler, is now "a blood and fire Salvationist," and writes every week in serial form the story of his life, for General Booth's *Social Gazette*.

According to the Paris correspondent of the *Courrier d'Haiphong*, M. de Lanessan, Governor of Cochin-China, has been advocating a Franco-German alliance against England, and it is said that M. Hanotaux holds similar views.

It is estimated by a contemporary that the Indian famine will cost the enormous sum of \$56,069,000. That is the estimate only so far as concerns the budget. Other vast interests concerned will, it is said, suffer to almost as large an amount.

Hopes are entertained of the speedy recovery of Torpedo-boat No. 16, which sank off the Pescadores at the end of 1895, says the *Hiogo News*. The Naval authorities abandoned the search but it was taken up privately and success is practically assured.

One outcome of the strike and riot, remarks the Shanghai correspondent of Kobe's oldest paper, is the proposed formation of a "Truck and Transport Company" with a capital of \$50,000. The prospectus states that the promoters hope to be able to develop the leading features of an American "Express" Company. There ought to be a future for such a company if it is properly worked. But whether the horse can compete with the coolie in Shanghai remains to be seen.

Strange, says the *Kobe Herald*, that the first demonstration of joy that the Queen has been permitted to reign sixty years, should have occurred in Agra, the home of Emperors, but such is the case. We read in a Singapore contemporary that on the occasion of the Hindu festival, *Shevar Try*, as an expression of thanksgiving to God for the long reign of the Queen-Empress, there were festivities and illuminations in all the temples at Agra, and along the banks of the river Jumna.

The programme of the Russian navy for service in foreign waters during the ensuing summer states that in the Far East Russia will be represented by seven modern first-class cruisers, including the so-called giant ships *Rurik* and *Rosia*, seven gunboats, and a few smaller vessels. The Pacific squadron, under Rear Admiral Alexeieff, will also have a couple of torpedo cruisers. The Russian fisheries in the Pacific and Arctic Oceans will be watched by a couple of transport ships.

One of the suggestions made to the Hongkong Jubilee Committee was the establishment of a Queen Victoria Garden where vegetables should be grown for the use of Europeans. But the idea was quashed as being too verdant. An equally amusing suggestion is made in Yokohama: it is that the Jubilee Committee should purchase a steam-roller and present it to the local authorities for use upon the roads in and around the Settlement. Cyclists and others who use the roads frequently would hail the suggestion with delight, we have no doubt, but unfortunately the idea is on a level with the Hongkong Victoria Jubilee Vegetable Garden.

On the assembling of a jury at the Hackney Coroner's Court, recently, a man hurriedly approached the Coroner's officer, and said he came as a substitute for his father. The Coroner's Officer—Why can't he come himself? The Substitute—He is ill. He has got asthma in his knees.—(Laughter.) The Coroner's Officer—That's a new complaint, isn't it? The Substitute—Oh, no, he's had it before.—(Laughter.) The Coroner's Officer—Well, I never heard of asthma in the knees before. Chorus from the other Jurors—"He's kidding you, officer." The substitute, however, stuck to his contention that

his father suffered from asthma, and that his knees were swollen and painful; and he was allowed to serve on the jury.

The statement made by ex-Minister Thurston of Hawaii to the American press regarding the dangers which he alleges Hawaii has caused to dread on account of the influx of Japanese, has aroused some indignation among the members of the Japanese Legation in Washington. "It can be stated in the most positive terms," said Mr. D. M. Stevens, Counsellor of the Japanese Legation, "that the Japanese Government has no designs upon Hawaii, and it can be asserted with emphasis that there is nothing in the present or in the past condition of affairs in the islands which in the remotest degree justifies such an allegation."

The *Hiogo News* announces the death of Mr. G. Grunwald on Friday afternoon, at the age of 46 years. The deceased gentleman went to Kobe only a few months since from Yokohama to take charge of the branch of Messrs. Morf & Co., in which firm he was, our contemporary believes, the senior partner. Mrs. Grunwald arrived from home only an hour or two before his death, having gone on by train in response to a telegram after the arrival in Yokohama of the *Hohenollern*, by which she was to have completed her journey from Europe to Kobe. Another gentleman who travelled down specially on hearing of the critical state of Mr. Grunwald, arrived just too late to see him. The funeral, took place at 4 o'clock on Saturday afternoon and was largely attended. The service was performed by the Chaplain of H.I.G.M. *Irene*. Mr. A. Kleinwort was the chief mourner, and the pall-bearers were Messrs. Popp, Reiff, Schlüter, Mumm, Junker, Ehlers, Rölling and Hagen. On entering the limits of the Concession, Mr. Rizetti's band preceded the funeral procession, playing the Dead March in "Saul." The late Mr. Grunwald, says the *Chronicle*, was born on the 20th January, 1851, at Kreuzburg in Silesia, and was thus 46 years of age at the time of his death. He came to Japan in 1872 as an employé of Messrs. H. C. Morf and Co., at Yokohama, and on Mr. Morf retiring, Mr. Grunwald in 1878 took over the business, the branch at Kobe being established in 1886, when Mr. A. Kleinwort entered the firm.

MODERN INDIVIDUALISM.

Mr. Garrett Droppers speaking at the Commencement Exercises of the Keiojijuku, on February 21st, 1897, made the following remarks:—Recently in reading a work on German Literature by a very competent scholar, I came upon the following sentence:—"In German Literature," says the author, "we find a continual struggle between individualistic and collectivistic tendencies. A struggle which may be said to be the prime motive power of all human progress." In this book the author describes and develops the literature of Germany entirely from this new point of view. He shows how, at one time, social forces and sentiments prevailed in Germany, how at another the individualistic forces have come to the front. He points out, for instance, that at the great migrations of the German people probably individualistic motives predominated, but he also points out that the most characteristic virtue at the time of these tribal movements was *trouw*, i.e. faithfulness, which is not a separating but a binding force between man and man.

Some years ago, in an address delivered at the annual reunion of a learned society at one of the important American Universities, the chief spokesman of the occasion said—"We are in the midst of one of these greater movements, which I can best characterize, according to my sense of it, by saying that it is a movement from liberty to unity. It is the result, largely, I believe, of the intellectual advance of the last generation, bringing in new methods and another ruling idea. Virtually," he adds, "this movement from liberty to unity has already brought us into the presence of a new humanity. The effect of such an inward movement is like that of the old migration of races."

The two expressions of opinion which I have given in the above quotations are characteristic of the times. One man writes a history of literature and finds his subject turning on the presence or absence of a dominant idea, while another whose aim is only to instruct or interest the audience

before him on some living topic, finds the same idea working itself out at the present moment. It is at bottom an old idea, but the new conditions of the age, the changed moral, political, and especially economic circumstances of the times, give this idea a fresh meaning and force, and puts it on a different plane to-day from any it ever previously occupied in history. If I were asked to mention the most carefully read books to-day, I should certainly answer that they were those written on some social-economic topic,—some discussion of the question whether man has some destiny connected with that of society higher than the world at large has hitherto believed possible, some suggestion toward reconciling the great disparity that appears between man and man, some demand on the consciences of men to see and feel the wrongs that exist in our human relations. The idea is indeed old, as old as the moral sense implanted in man, but we approach it to-day with more social definiteness, with increasing momentum, and a large amount of hopefulness. It is taking hold of us that we have obligations which are inherent in ourselves and society, to do something for interests outside ourselves for which we cannot expect a personal reward, an obligation to do something for the realization of a social and not an individualistic ideal.

Individualism is a word of many meanings and uncertainties. Some modern disputants use it in one signification, some in another, with the obvious result of much vain discussion and confusion of thought. I think it easy to distinguish at least three broad senses in which the term is commonly used:—

1. Sometimes in its simplest and lowest sense individualism is equivalent to mere selfishness. That this definition is not defended commonly by advocates of individualism is of no particular importance, so long as it has enough sanction in the vaguely defined consciousness of the popular mind to make it a force influencing a considerable amount of conduct in this world. Take a man whose time for clear thinking is necessarily limited, whose opinions are formed, as it were, by his cursory reading, talk, and experience; make him ambitious of material success, and I say that that man will openly or tacitly justify a most intense selfishness by a vague theory of individualism. The term has just enough of the philosophical twang about it to catch certain ears for whom the word selfishness sounds crass, commonplace, and out of taste.

2. It was soon seen, however, by more careful minds that the doctrine of selfishness, if generally followed, was suicidal. It might, indeed, be the religion in business life, or what not, of a few, and they might, so long as they were exceptions, derive great benefit from it, at least in a material way. But extend the same doctrine to all and its death doom was sealed. Society, in case all or nearly all pursued a line of absolutely selfish conduct, would be very much like the lion that, to satisfy his cravings of hunger, began to devour his own tail. I think there is scarcely one living philosopher or publicist who dares to defend the doctrines of individualism when interpreted as naked selfishness. A very feeble amount of thought would quickly dispel the illusion. So in order to defend the principle of individualism, which like the blessed word "Mesopotamia" has brought such comfort to certain people, a new definition was found, viz., self-interest. This was a more elastic term, fit to include every action from the worst to the best. The definition of self-interest is, as near as I can make it, selfishness plus an enlightened sense of one's future interests: that is, a nucleus of selfishness, but modified by a general sense of the fitness of things. In this world of combating individuals it is often necessary to make mutual concessions to each other's selfishness, and if there were no concession or compromise we should soon come to a dead lock: So we pare away the rough edges of selfishness by a disposition of friendly give and take. Each man, under this view of individualism, still has the right to pursue his selfish purposes so far as he can decently do it, but when he has reached the limits of decency he may show a smiling face to his fellow traveller and may grace his journey through the world with many "fair and courteous speeches."

But certain men who made a study of men's motives and actions in the world, declared that this form of individualism led to hypocrisy and deceit on a most stupendous scale. It was really the Machiavellian theory they declared, and resulted in finesse and diplomacy instead of real human relations. The first view, though suicidal to the interests of society, had yet the merit of honesty—the honesty of the buccaneer who flies the black flag without quailing. But the second proved a sneaking policy after all; and led to all the deceptions, the painful and ungraceful squirming that we find going on in modern Society to a most remarkable extent. It

may produce outward grace and bonhomie, but inward plotting and machinations. So certain philosophers still attached to the term "individualism," though not liking the existing form or expression of it, went a step farther. They now said the doctrine of individualism meant simply the development of one's faculties to the best of one's ability. It was making the most of the qualities that God or Nature had implanted within man, the physical, the moral and intellectual. The differences of talent that exist in the world are not here for nothing, they urged. They are here for a purpose, and probably for a useful, if not divine purpose. According to this school, each man should therefore cultivate his powers and faculties to the utmost, feeling assured that in this way he was contributing the most that was in him not only to his own welfare but to that of his fellow beings. Just as a good shoe-maker is not a hindrance but a benefit to a good tailor, and both, so far as they are honest and skillful craftsmen, a benefit to all others with whom they exchange their wares, so a man with one kind of intellectual talent by exercising it does not interfere with, but promotes the interests of him who is endowed with a different talent; and all talents go to clothe this world of ours in a garment of varied but still harmonizing colours.

But a definition in order to be entitled to the honour of a place in a dictionary of philosophical terms must be clear enough to be distinguished from opposite and conflicting terms. It must have a distinction as well as a verbal difference. The doctrine of individualism was to be distinguished from the doctrine of socialism, or of collectivism, or humanitarianism, or whatever other term has been invented to convey the opposite doctrine. Between these individualisms and collectivism, or humanitarianism, there was supposed to be an irreconcilable feud in the opinion of men, and the respective definitions of the terms must convey some intimation of this difference. Now it can easily be conceived that a man who is so far an individualist as to believe in the fullest development of his own faculties may also be a rank socialist, inasmuch as one of his faculties may be a desire to farther the interests of society rather than his own, and to establish society on a more humane basis. Suppose we imagine a world in which each one of us is doing his best to develop the faculties and qualities implanted in him, but that the best of all these faculties and qualities is that one which makes us interested not in our own well-being but in that of our fellow-men, are we then individualists, or socialists, or what? The doctrine of socialism or collectivism is in its essence the doctrine that society should be constructed on a system where each should promote as far as possible the interests of all and not his own, or at least not his own primarily, but only secondarily. Is it not easily conceivable that the aim to realize this system in all its length, breadth, and variety should occupy the development of one's highest faculties? There is a phrase that has come down from the laboratories of certain men of science into the common life and speech of the people. It is the phrase, "survival of the fittest." But I ask who is the fittest? Is it the man who, relentlessly pursuing his own schemes, regardless of others except so far as it is obviously necessary, achieves success in the world, success in wealth and material power; or is it the man who cultivates his unselfish and kindly qualities, who does not strive for material success, but for real success, who is beloved by his fellow-men and when he dies leaves "a monument stronger than brass, and higher than the Pyramids' regal site." Just as the phrase "survival of the fittest" may in the moral life of mankind mean anything or nothing, the success of the scoundrel or the success of the gentlest soul that ever lived,—so the attempt to define individualism as the development of all one's faculties fails by meaning too much or too little. It may include anything from the most absolute socialism to the extremist form of individualism. This is so true that certain scholarly socialists have maintained that it is only under a socialized organization of society that the individual can truly be himself and make his individuality felt.

Thus, if we merely stick to definitions we do not arrive very far. Such definitions may be excellent as a mental training, they may make clear to us the direction of exact thinking, they may serve to show partially all sides of a complicated and difficult question, but they do not in the end lead to a definite line of demarcation between things or movements quite opposite in their nature, nor do they point out a good road to conduct. It is in the nature, I believe, of all moral distinctions that they are open to the charge of verbal or scientific indefiniteness. You cannot categorically classify particular lines of conduct into separate compartments. Conduct is a search after the ideal, a journey to a distant country guided by the star,

and while philosophy may have a word to say after you have made out the general direction and chosen your road, while philosophy may limit the distance you can travel day by day, and may show you when to work and when to rest, advise you whether it is wise to go straight on, or make an excursion by a by-path, it cannot provide you with the forces that move you on to the goal toward which you tend. The ideal is of its own value and creation. It shines by its own light—nor can philosophy by definition prove your ideals for you.

In the modern struggle between individualism and collectivism, or humanitarianism, we have really the conflict of two ideals, or tendencies—one of which, in its last resort, ends in pure selfishness (tempered only by forms of ceremony; the other of which ends in the supremacy of the commonweal and commonwealth, i.e. the goods of all by each. We may compare these tendencies to the opposition between the negative and positive poles of a magnet, or to the conflict of motives in a man who does not know whether to walk in a northerly or southerly direction. You may take the magnet at its extreme negative pole, or at its extreme positive pole, you may take it midway at its neutral point or you may take it at any point you please, but the opposition is there and cannot be annihilated. The same opposition of ideals we find in the modern conflict between the welfare of oneself and that of the commonwealth. Follow one ideal and you strengthen yourself on that line, follow the other and you have the contrary result. The important point to remember is that they differ not merely in degree, but that they are opposed to one another. They are as unlike as day and night, as motion and rest, as something and nothing.

Practically the rule founded on these two tendencies of conduct can be stated in a simpler way than the technical sociologist would have us believe. The real point, as I think Emerson in one of his essays says, is whether your aims are public or private. His exact words in another of his Essays are, "That is the point that decides the welfare of a people; which way does it look." Have you any end in view that can be of service mainly and effectively to your fellow-men, and to the organization of the society of which you are a part, or have you an end which makes only, in motive and in fact, for your private success. This, it seems to me, is the substance of the controversy between individualists and collectivists, at least so far as to say a man can shape his conduct who wishes to do the best he can. Some day indeed we may be able to do much more than this, but at present the most we can do is to lend a hand as heartily as possible to every cause that has a public end in view, not your own success but the success of those who are often dumb for words through ignorance, who suffering are clamorous for a spokesman. For these ends we are not to have a merely sentimental or academic interest, which is often worse than nothing at all; but an interest that demands attention, courage, and self-sacrifice. The matter can be stated in many ways, but its essence will certainly become clear to the minds of those who are not tied down by interest and prejudice, the catchwords of systems, or a combination of all three, to defend a selfish line of conduct, no matter how fine the word or how elaborate the system employed to hide the naked evil of it. I believe it behooves every one of us in these modern days to ask himself the question whether he is willing to unite with his fellowmen only in so far as such union is advantageous to himself or will unite in the interests of all, if no benefit accrues to himself or even if he may individually suffer loss.

RAILWAYS OF JAPAN.

ANNUAL REPORT OF THE IMPERIAL RAILWAY BUREAU FOR THE 28TH FISCAL YEAR OF "MEIJI" (APRIL 1895—MARCH 1896).

CONTENTS:

General remarks.
Construction Works.
New construction works.
Repairs and protection works.
Doubling works.
Railway Lines and Appendages.
Conditions of Traffic.
Financial Affairs.
Estimates and settled accounts of railway construction expenses.
Estimates and settled accounts relating to Expenditures and Revenue in connection with the Working Capital of Railways.
Estimates and settled accounts relating to Expenditures and Revenue connected with Railways.
Construction Material Fund.

Debit and Credit Account.
Consolidated Railway Fund.
Account connected with the Railway Fund.
Profit and Loss Account.
Staff and general employés.
Private Railways.
Grant of charters.
Existing condition.
Condition of Traffic.
Business Accounts.

GENERAL REMARKS.

In reviewing the condition of railway work during the year under consideration, it is to be noted, in connection with Government Railways, that in continuation of the works in progress during the preceding fiscal year, the construction of the O U and the Hokuriku lines was steadily pushed forward, so that the Hirosaki-Ikarigasaki section of the O-U line was opened for traffic in October, 1895; while with regard to the Fukuoka-Yonezawa section, despite many difficulties—principally due to an outbreak of epidemic during the summer, which at one time wrought considerable havoc and seriously impeded progress—in spite of these difficulties, work went on according to the original programme.

The Tsuruga-Fukui section of the Hokuriku Line was to be completed during the present year, but owing to an untoward occurrence—an unusual inundation—considerable repairs were necessitated, and thus the completion of the work was delayed.

As to private railways, the number of new companies projected increased by leaps and bounds. That was especially the case during the year under review, when, owing to general prosperity consequent on the victorious issue of the war, speculative enterprises became unusually attractive to the general public. The number of applications for new lines of railway exactly doubled that of the preceding year. At the end of the year, for instance, applications totalled 99; the aggregate mileage of lines to be constructed, 3,252 miles, and the capital to be invested 162,550,000 yen. During the year permanent charters were granted to 17 companies, representing 476 miles of railway, and the investment of 19,550,000 odd yen; temporary charters were granted to 16 companies, whose aggregate mileage and capital reached 285 miles and 11,010,000 yen respectively. Consequently, at the end of the year railway companies that had secured permanent charters totalled 40, representing 2,681 miles and 121,130,000 odd yen, while those that had secured temporary charters numbered 23, with a total mileage of 665 miles and the investment of 29,000,000 yen. These companies pushed on the work of construction as quickly as possible, and succeeded in laying over 159 miles in the course of the year.

With regard to traffic, as 172 miles, Government and private railways inclusive, have been opened for traffic during the year, the total length of operating lines has increased to 2,290 miles, thereby increasing the facilities for communication. During the year, however, trains along the trunk lines had, as in the previous year, to be run for military purposes, thereby affecting the work of the ordinary trains, and at times it was necessary to suspend the running of several trains. On the other hand, various circumstances contributed to increase the volume of passenger-traffic, such as the opening of the Fourth Domestic Exhibition, the anniversary of the founding of the city of Kyoto, and so forth; while the unusual activity brought about in trade and industry by the war, and the consequent increase in the volume of goods to be conveyed, tended to augment receipts. Insufficiency of steamers and the greater reliance placed on railways in the matter of transport, increased the volume of wagon traffic, and the goods sent for transportation overflowed the storehouses. In short, the profits that accrued to railway traffic this year were far greater than in the year preceding.

The above remarks represent the general condition of railway business during the year under consideration. Particulars concerning it will be described more minutely under the respective sections.

CONSTRUCTION WORKS.

Of the new construction works taken in hand during the year, the most important were the continuing works of the Hokuriku and the O U lines and the doubling of the line between Kyoto and Kobe; all were started during the year before last. The repairs undertaken for the trunk and branch lines of the Tokaido Railway and the Shin'yetsu Railway, in consequence of damages wrought by floods, were the principal repairs and protection works. Besides, the prolongation of yard sidings at various stations, erection of new or additional buildings, are too numerous to be described in detail.

NEW CONSTRUCTION WORKS. HOKURIKU LINE.

About seven-tenths of the work on this line were completed during the preceding year. The work of construction was steadily kept up, with the result that, except some tunnelling and the laying of rails, the greater portion of the permanent way was completed. On July 29th, a gale visited the districts and inflicted heavy damage on the works, the most serious injury being done to the Tsuruga-Iwashi section, and next in order was the Iwashi-Hino-gawa section. At the Tsuruga Office, for instance, water covered the floor to a depth of over 3 ft. deep. Owing to the strenuous efforts of the officials, the office escaped any serious damage. But such was not the case with the Tsuruga-Iwashi section. Landslips occurred on various hills of the Kinomeyama range, and obstructed the course of streams. The result was that the rivers Kinome, Kabiru, and Hino suddenly rose far above their normal level, forced the embankments at various places, and poured forth torrents of muddy water into the surrounding fields. Down the valleys of the Asoyama were borne large trees and rocks, and the railway tracks that lay in their way had embankments, bridges, culverts, buildings, stone-work, etc., damaged to an extraordinary degree. Embankments to a length of 3½ miles, corresponding to 43,000 cubic *tsubo*, earth-works, the girders of four bridges, three buildings, and stone walls measuring over 1,700 *tsubo*, in area, were destroyed and washed away. The interiors and mouths of tunnels were blocked with earth and stones leaving no space for the passage of men, while bricks, cement, and timber used in the supporting works, and so forth were either carried away or crumbled down. The aspect of the whole length of the section was almost entirely changed. In the Imashi-Hino-gawa section, embankments to the length of one mile and 60 chains, corresponding to over 3,030 *tsubo* of earth works, the girders of one bridge and one arch culvert were destroyed or twisted out of shape. Owing to these extraordinary damages a difficult situation had to be faced by the Railway Authorities in the shape of repairs and restoration works. To add to the embarrassment, the Tsuruga line having been damaged and its communications interrupted at the same time, the avenue for transporting bricks, cement, and other necessary materials was stopped. But the work of repairs admitted no delay, especially to tunnels that threatened to collapse. No moment was to be lost, and it was impossible to wait for the reopening of the Tsuruga line to transport the necessary materials. Consequently, recourse was had to a circuitous marine route *via* Shimono-seki. The materials thus procured barely sufficed to meet urgent needs. In the meantime, winter drew near, making the sea too rough for vessels, and therefore it was not possible to keep up, by that route, the supply of material. Under the circumstances, even the construction of tunnels already in course of building could not proceed steadily. Consequently, as works of other descriptions were taken up after the Tsuruga line was reopened for traffic, and as, moreover, an excessive snow fall took place during the winter, a good deal of the new work on the Imashi-Hino-gawa section was not begun until the middle of March. None the less, the record of progress was not so bad as might have been expected. The remaining portions of the bridges over the Hino, the Ashio, and three other places—all started during last year—were completed, while the work of transforming temporary bridges over the Asamizu and six other streams into permanent structures was commenced. Of these, four were completed, and three are still in course of construction. For 11 piers of a bridge over the Kuzuryo (72 ft., 20 spans) wells have been sunk for nine, while for the remaining two, supposing the depth is 30 ft., 20 ft. have already been dug, and a hard substratum will be reached in a few days. The piling of bricks for abutments and four piers has been completed to an extent of eight-tenths. Again, two bridges were constructed over the Magaridani and Ashiya, while the 1st and 2nd bridges over the Kinome, another over the Kobashi, and No. 6 bridge over the Kabiru, all of which were damaged by the flood, have been successfully reconstructed. Therefore the bridges still to be constructed on the Tsuruga-Morita section are two, namely, one over the Koku and another over the Keisel,—both were damaged by the flood. The transforming of three temporary bridges over the same rivers into permanent structures, and the bridge over the Kuzuryo, as also two flood gates in its vicinity, are also among works to be done. Of 13 tunnels, 11 have been completed, only two, in Hawarayama, being now incomplete. Even of these a portion of a culvert alone remains to be constructed. Notwithstanding these unusual

calamities, the work on tunnels, culverts, and various buildings has proceeded apace, and as earth-works, bridges, the laying of rails, and of gravel in two or three places alone remain to be hereafter taken up, the line will be opened for traffic during the next fiscal year. The principal works undertaken in the course of this year were:—earthworks totalling 44,791 *tsubo*; masonry, 2,937 *tsubo*; the construction of 13 bridges, partial construction of 6 others; 12 culverts; total construction of 6 tunnels, partial construction of 2 others; drainage pipes laid in 38 places; rails laid, 19 miles 64 chains; stations and other buildings constructed cover 994 *tsubo*. The laying of rails during two years totalled 33 miles 34 chains, that is, eight-tenths of the whole length.

O-U LINE (FROM HIROSAKI TO THE FRONTIER OF AKITA KEN.)

The work of construction on the Hirosaki-Ikarigaseki section under the control of the Aomori Branch Office having been already completed to an extent of seven-tenths during the preceding year, it did not require much time to complete the remaining portion during this year, and the section was opened for traffic on Oct. 20th. The work towards the south of Ikarigaseki (36 miles 4 chains to 38 miles 60 chains) was started on Sept. 20th, and is still being actively carried on. To recapitulate, the condition of works of construction is—in earth-works, cuttings to an extent of 1,597 *tsubo* and embankments for 5,240 *tsubo*, unfinished on the Hirosaki-Ikarigaseki section during the preceding year, were gradually taken up and completed. Sections lying southward of Ikarigaseki were then put in hand, and the utmost exertions were made to facilitate progress. For between 37 miles 38 chains and 37 miles 49 chains the route passes under a cliff and in close proximity to houses in Ikarigaseki. The soil being very rocky, recourse had to be had to blasting, which, however, was entailed considerable inconvenience, for debris was liable to fly in the direction of the houses, if the blasting was undertaken in the usual way. Though interfering with the rapid progress of the work, only a small quantity of explosives could be used, so that a far longer period was required than would otherwise have been the case. With regard to bridge-work, the construction of a permanent bridge over the Mitsunouchi-gawa was commenced. Snow soon necessitated the suspension of this work, and up to the present only half has been completed. The 2nd and 3rd bridges over the Hiragawa have been entirely completed during the year, while the 4th and 5th bridges over the same river and the Shirazawa were commenced on Sept. 20th, to be interrupted shortly afterwards by snow, so that only half of the work has been completed up to the end of the year under review. The Karaushi Tunnel was finished during this year, and there is nothing particular to record since the last report was published. The principal results this year were 4,539 *tsubo* of cuttings and 7,232 *tsubo* of embankments, in earth-works (the Hirosaki-Ikarigaseki section is entirely completed, and of the sections to the south of Ikarigaseki, 4 parts); 2 bridges are completely finished and 4 others about half finished; 5 culverts are completed, 3 others completed to the extent of two-tenths; and one tunnel completed. Other principal works undertaken during the year were the laying of underground drain pipes to an extent of 832 ft.; the construction of two stations, and the laying of rails to an extent of 12 miles 40 chains.

O-U LINE (FUKUSHIMA-YONEZAWA SECTION.)

The work of construction on this line, in continuation of the preceding year, steadily proceeded. The second and third tunnels in No. 2 construction, section B, have been completed, while despite the almost unworkable hardness of the ground and consequent difficulty encountered in heading, No. 4 tunnel has been completed, as previously arranged. No. 5 bridge being situated in close proximity to the western mouth of No. 4 tunnel, and therefore being very inconveniently placed, its construction was started after the works of that tunnel had been nearly finished. The erection of abutments was at once taken up and the whole portion finished in due time. At the eastern mouth of No. 5 tunnel, a culvert—the arch of which measures 8 ft.—was constructed. At the eastern mouth of No. 2 tunnel, the foot of the hill rising close by abuts on the cliff of the Matsukawa, leaving only a very narrow space available for the purpose of laying the track. At first, it was designed to pass the track along there partly by excavation and partly by filling in. The wall of the cliff being considered dangerous, however, the original design was subsequently changed and a bridge was constructed. In pursuance of this design, foundations were fixed at the foot of the hill, and the abutments were then filled up. Cutting, embankment work, masonry walls to provide

against land slides, and so forth having been gradually undertaken, the line was prolonged. No. 1 bridge (30 ft. 1 span), No. 2 bridge (30 ft. 1 span), No. 3 bridge (30 ft., 1 span), and No. 4 bridge (40 ft. 1 span) had their girders set in place one after another, and at last the bank of No. 6 Matsukawa bridge was reached. Thus the works west of Yoshizawa, as far as the Matsukawa bridge, have been completed for a distance of 8 miles 25 chains from the starting point, Fukushima. For No. 15 tunnel a boring was completed, then the widening was taken up, and the bricking and building of stone walls in turn, so that the two mouths were neatly finished, when, owing to the approach of the cold season, work for the remaining portion had to be suspended for a while. Continuing the works carried on during the preceding year, a perpendicular shaft of over 300 ft. was dug for No. 16 tunnel and then heading was commenced east and west, which latter section was finished in due time and bored through. The work having been thus pushed forward, attention was directed toward the eastern portion exclusively. By the first part of November the heading proceeding from this portion and that from the eastern extremity met, and the boring was complete. As the tunnel extended over one mile, the air in the interior grew scantier as the excavation went on. Moreover, as the hole was crooked and sloped, gases emanating from lamps or generated by explosives remained in the interior and were not easily expelled, thereby considerably vitiating the air. Though suffering from such troubles, it was impossible to procure proper instruments to cope with the difficulties, the place being remote and enjoying no facilities of communication. Under the circumstances, a ventilator was constructed by modifying the usual hand wind-mill, while at a spot to the westward of the perpendicular shaft, a fire-place was specially provided, with the view of drawing out the vitiated air within; by such and other conceivable means help was extended to the workmen engaged in the interior of the tunnel. In spite of these troubles the boring was completed in one year and some few days, a result entirely unexpected. The widening of the tunnel was attended to as the boring went on, while at the same time bricking and shoring with stone walls were undertaken. Owing to the unusual severity of the weather in winter, after bricking and shoring at the eastern mouth had been carried for a distance of 860 ft. into the interior, the work was suspended. Subsequently, widening alone was undertaken, and the upper and middle portions have been completed, as also eight-tenths of the lower portion. Both in No. 15 and No. 16 tunnels the side-walls are to be lined with stone, and the arches built with bricks.

With regard to bridge-works, one, to be thrown over a small stream running between No. 15 and No. 16 tunnels, has been taken in hand. This is called No. 14 bridge (span 12 ft.). The raising of abutments has been completed. At the western mouth of No. 16 tunnel, where the track comes right up to the river Haguro, a tunnel for drawing off water—measuring 55 ft.—is to be constructed for turning the current, and already a length of 476 ft. has been bored. From the beginning of the construction of this line, tunnels for altering the direction of currents have been cut at four places.

The Sodegasawa embankment on No. 3 construction section is also an important work. The track is to pass over a deep gorge at that place, at a height of 160 ft. As bridging would prove extremely difficult, it was decided to completely fill in the gorge, and the stream running through it is to be drawn off by means of a tunnel along the west bank. In July of this year, the work of constructing an embankment and cutting, for a space of 50 chains, was commenced. For the filling at this place above 45,000 *tsubo* of earth are required.

At the east of the main stream of the Sodegasawa there is a small river, that has also to be drawn off by a tunnel. It will be horse-shoe in shape, 8 ft. wide and 120 ft. long. For the main stream of the Sodegasawa another tunnel, also of the same shape, will be made, 15 ft. wide and 480 ft. long. The smaller one has already been completed, and work on the larger was steadily proceeding, when the epidemic broke out. Steps taken to stamp it out failing to achieve any perceptible success, the workmen became alarmed and, instead of attending to their work, dispersed to various places, trying in that way to escape the epidemic. The local Police quarantined the place and thus endeavoured to stop the spread of the disease. Communication with other places was interrupted, so that work was for a while in a state of abeyance. All places west of this particular locality suffered more or less from the effects of the calamity. The result on this particular tunnel was disastrous, for even after the disappearance of the disease, workmen dreaded to approach, and the progress of the work was checked. The tunnel was finished at

last, and the canal for drawing off the water having been completed, the embankments and cutting were vigorously pushed on, when winter approached and snow began to accumulate, making it impossible to carry on operations until after the thaw. Owing to these causes, progress on this section was but one half of that originally expected. On the same section the abutments of No. 11 bridge (span, 12 ft.) were completed.

No. 6 bridge, situated at the termination of No. 2 B construction section, that is, the Matsukawa Bridge, is the largest on the line and its construction is of corresponding dimensions. The Matsukawa has its source in a remote part of the Itaya range, and, after running through the valleys of Mamare-yama, the current increases in velocity owing to the impediments it encounters in the shape of rocks. At every rainfall the river rises and rushes down in flood. At a place where the river is to be spanned by a bridge, the two banks, owing to the closeness of the mountains on each side, rise perpendicularly, so that the bridge will hang at a height of 120 ft. above the river, thus necessarily increasing the difficulty of construction. The abutments rest on foundations made where the banks project a little. At the east the bridge is situated close to the western mouth of No. 5 tunnel. At this point an arch measuring 20 ft. was constructed, then girders of 150 ft. long are to be fixed in place, next two arches of 20 ft. each, reaching the western bank of the river. The abutments and arches are built of brick and are already completed. A temporary bridge has been thrown over to help in fixing the girders in place, and the bridge will be finished when the girders reach the spot.

The Matsukawa-Akaiwa section of the 2nd construction section being started in the middle of the current fiscal year, nothing particular has yet been completed. All that can be said is that the work of construction has started.

CONSTRUCTION OF LIGHT RAILWAYS.

The permanent line having been extended as far as the Matsukawa bridge, the light railway between Yoshigasawa and the Bridge was taken down and transferred to the west of the Matsukawa. The light railway runs along the right bank, generally parallel with the main route, at the side of cliffs, or is led over valleys, making a long detour around the mountain. It emerges at Sanegasawa via Akaiwa and Ohinata. Thence the line turns right and, after traversing a wide swamp at Minowa, at last reaches the remote valley of the Sodegasawa. From the opposite bank of that valley the line starts anew and, cutting through the centre of the highway leading to Itaya, effects a junction at the western end of that town with the line that emerges at the eastern mouth of No. 16 tunnel. A line then branches to the right, passes along the side of the mountain in a serpentine manner, and, after surmounting the main peak of Itaya at a gradient of 1 to 10 or so, joins the line at Ikkenzuke at the western mouth of No. 16 tunnel. Thence it is prolonged still further along the highway leading to Yonezawa and reaches the town of Ozawa. At Ozawa it effects a junction with the Yonezawa-Ogawa railway, built by the Yonezawa Brick Factory. The total length of this light railway is about 13 miles, and it completes the communication with the western bank of the Matsukawa and Yonezawa.

Construction trains are employed between Fukushima station and the Matsukawa Bridge, while in other places recourse is had to the light railway. These conveniences can not be enjoyed during the winter to the west of the Matsukawa, owing to the accumulation of deep snow. In the thaw snowdrifts come down from the hills near by, and frequently damage the track, making passage along it risky. Materials needed during this season have to be previously obtained, but on occasions of emergency, recourse is had to sledges or human backs. The difficulties experienced are therefore indescribable.

To sum up; the principal works undertaken during the year under review, are 4 embankments aggregating 4,498 *tsubo*; 10 cuttings aggregating 5,177 *tsubo*; 13 masonry works to provide against landslides, their superficial area totalling 646 *tsubo*; diverting of a river at one place to an extent of 165 ft.; underground drainage pipes at one place extending 40 ft.; one culvert; canals for drawing off river water at three places, boring totalling 851 *tsubo*; 5 tunnels with an aggregate boring of 10,432 *tsubo* along the main route; the laying of rails to an extent of 1 mile 60 chains. Again, of bridge-works, the construction of abutments and the fixing of girders have been completed on 5 bridges; 3 others had abutments completed; eight buildings, covering 149 *tsubo* in area, have been erected.

REPAIRS AND PROTECTION WORKS. TOKAIDO LINE.

On July 29th of the current fiscal year the

river Yebi rose in consequence of extraordinary rains in Mino, the water following above the track to a height of 5 ft. Between 264 miles 8 chains and 70 chains of the embankment was breached, and the abutments of 3 bridges and the side wall of one culvert were destroyed, resulting in an interruption of traffic. The damage proved most serious, two or three months being necessary for effecting repairs. Even in constructing a temporary line it was thought necessary to allow a month to pass before a train was run over it. The inconveniences that the public suffered from this temporary interruption of railway communication were immense. It was finally decided to adopt a temporary expedient and to effect such repairs to the damaged portion as would make it possible for the trains to run, then to take up the construction of a temporary line, and lastly perform permanent repairs on the main line. With that object in view, temporary repairs were commenced from 31st of the month and the work was pushed on with such vigour and celerity both by day and night, that it was effected within the short space of 6 days. From the 6th of August, traffic was resumed. The construction of a temporary track was commenced and completed by the 25th of the month. Trains were then run on it and the repairs to the main track were taken in hand. After six weeks, that is, on the 5th of October, these repairs were completed and the usual operations were at once resumed.

The cutting between Hodogaya and Kozu, and the Kokushoji cutting between Shimada and Kanaya, having steep gradients and therefore being liable to suffer from landslides, excavation work was done there. At Kamiyama, situated midway between Gotemba and Sano, a block station was established. At Numazu station a water-tank to furnish a supply of water was constructed. The distance between the Washizu-Toyohashi section and the Hikone-Notogawa section on the Tokaido line is 8 to 10 miles, and is very inconvenient for purposes of operation; two extra stations—at Futakawa and Kawase,—have therefore been established. At Kawase station an embankment 67 chains long was constructed, while the position of four culverts, were lowered by 3 ft. Atsuta station, owing to lack of space, required enlargement, which however, proved impossible. Consequently it was resolved to remove the site of the station 50 chains westward of the original site. The ground was duly prepared, and the station, permanent way, and premises were removed. At Inari Station a cross bridge was constructed; at the Osaka-Tanzaki Section, a crossway was built; while the yard sidings at Shimbashi and 26 other stations were prolonged. Again, at Numazu and 28 other places additional platforms were erected; electric lamps were put up at Yokohama and five other stations. At Shimbashi Station a small turn-table, a steam hammer, and a hydraulic testing machine were established; while at Kobe Station a plant for making nuts was set up. Official residences were erected at Yokohama and 14 other stations, while the buildings at Osaka and 16 other places were either reconstructed or widened. As to other works, for instance, the substitution of iron girders for wooden, erection of additional fences at railway stations of the height of embankments, repairs of masonry to provide against landslides,—these and other matters are so numerous as to make it impossible to enumerate them in detail. The principal works undertaken during the course of the year were as follows:—In earthwork, 29,754 *tsubo*; in stone walls and masonry to provide against landslides, 2,895 *tsubo* (superficial area); buildings, over 8,124 *tsubo*.

OFUNA-YOKOSUKA BRANCH LINE.

In this section cuttings at the mouths of No. 3 tunnel gave way, owing to the continuous rains. The damages were instantly attended to. Some underground drain pipes interfering with the irrigation of the adjacent fields, their position was changed. Besides these a wooden water-tower at Yokosuka Station was repaired, while four additional buildings were erected at Zushi and one other place.

OFU-TAKETOYO BRANCH LINE.

On this section the main building and official residence at the Kamezaki Station, destroyed by fire on March 3rd of the preceding year, have been re-erected. Handa Station ground has been prepared for constructing a goods landing-place and platform, as also the re-filling of stone walls on the coast, and lastly the replacement of some wooden bridge girders.

MAYEBARA-TSURUGA BRANCH LINE.

Owing to incessant storms during several days in July, the rivers running between Kanagasaki and Nagahama rose above their normal level, the force of the water being extraordinary. On the 29th of

that month the embankments were forced through, mountain sides crumbled down, and muddy waters overflowed the surrounding fields, thereby converting them into a big lake. The tracks were submerged, especially in the vicinity of the rivers Ane, Imoto, Yadagase, Tone, and Hikida. In the vicinity of the river Ane, the water rose above the track some 6 ft., while in the vicinity of Tsuruga, it was over 5 ft. deep. In consequence of these extraordinary floods, embankments along the line collapsed in 54 places, stone walls gave way in 35 places; large or small bridges and culverts were destroyed at 16 places, while the wing stone walls collapsed at 21 places. Moreover, abutments were turned upside down, 17 underground drain pipes were washed away, and at the Yanagase and Tone tunnels the entrance and wing stone wall were broken. The damage inflicted was extraordinary, for the whole line almost lost its original aspect. By August 1st, the floods retired and temporary offices were established at various places; exclusive attention being directed to restoration works. Bridges and culverts whose drainage was thought insufficient, had their spans widened, the position of abutments was changed, and canals or ditches were increased in number. Indeed, so complicated and difficult was the work that the labour required was almost twice that of the original construction. To add to the troubles, later in the year snow accumulated in large quantity, and it was felt that had the work of repair been conducted in the usual way, more serious delay would have had to be recorded. But with such vigour was the work carried on, that the Nagahama-Nakanogo section was reopened for traffic on the 26th of the same month, Nakanogo-Yanagase section on the 26th of September, and the Kanagaki-Hikida section on the 22nd of October. The intervening section of Yanagase and Hikida gave the greatest trouble, and it was not till the 15th of December that repairs were practically concluded and the traffic resumed. At the same time, the line in the vicinity of Hikida Station having been built at a gradient of 1 in 300, was reconstructed and made level. The principal works undertaken on this branch during the year were as follows:—Earthworks, 32,431 *tsubo*; masonry, 3,464 *tsubo*; dredging rivers and canals, 1,444 *tsubo*; building of 38 bridges and 21 culverts; erection of buildings covering more than 400 *tsubo*.

SPECIAL TELEGRAMS.

THE GRECO-TURKISH WAR.

INTENTIONS OF THE PORTE.

Paris, April 19.

In consequence of the incursion of irregular Greek bands across the Turkish frontier on the 9th instant, the Sublime Porte addressed a Note to the Powers yesterday, apprising them of its intention to carry on defensive operations, and asserting that Greece alone should be held responsible for aggression. The Note also expresses Turkey's willingness to suspend hostilities upon the immediate withdrawal of Greek troops from Crete and the Turkish frontier.

THE OPENING OF THE WAR.

St. Petersburg, April 19.

Diplomatic relations between Turkey and Greece are totally suspended and their respective Representatives have been recalled.

TURKEY GIVES ORDERS.

The Turkish Commander-in-Chief received orders to act at once so that war between the two countries may be regarded as declared.

GREECE PROVOKED THE FIGHTING.

London, April 19.

On account of the provocative action taken by Greece on the frontier of the two countries, Turkey at last declared war against Greece on the 17th April.

Vienna, April 22.

The Emperor of Germany arrived here on April 21st.

LATEST TELEGRAPHIC NEWS.

(FROM THE "JAPAN TIMES.")

THE WAR IN SOUTHERN EUROPE.

London, April 17.

The Greek Prime Minister, M. Theodoros Delyannis, has asked the Chamber of Deputies for the sum of 23,000,000 drachmas on account of the Army and Navy.

The Greeks now admit that the invaders have recrossed the frontier and that they lost heavily during their retreat.

It is believed that, at a Council of Ministers held at Constantinople, a plan of campaign was agreed upon after a prolonged sitting.

The Turkish Government have decided to act on the offensive in the event of any further incidents occurring on the frontier.

London, April 20.

Turkey has declared war against Greece and recalled her Minister from Athens, at the same time handing the Greek Minister his passport.

Fighting has now commenced along the whole line of the frontier, while the Turkish Batteries at Prevesa have sunk a Greek steamer.

The Greek Flotilla is now bombarding Prevesa (which is situated in the south-western extremity of Epirus at the mouth of the Gulf of Arta).

London, April 21.

The Turkish batteries at Prevesa have been silenced by the Greek ships, and the place is now in ruins.

The Turkish troops are masters of the Maluna Pass, having stormed the Greek blockhouses at the point of the bayonet. The fighting was very severe, and lasted fully thirty hours, during which time at least twenty thousand men were engaged. The hostilities extended for many miles along the frontier.

The German Minister at Athens has extended his protection to Turkish subjects at present residing in Greece.

London, April 21.

The Greeks in Turkey have been placed under French protection.

The Turks have been defeated in the Reveni pass with heavy loss.

The Greek forces in Epirus (Turkish territory) are advancing on Janina.

It is understood that Serbia, Bulgaria, and Montenegro have requested Russia not to interfere.

London, April 23.

The Turks have carried all the frontier passes commanding the road to Larissa, and are now bombarding Thynavos, to which point the Greeks have retired.

The Turks are greatly superior in artillery over their opponents.

Despite a small Greek gain in Epirus, it is an undoubted fact that, so far, the Turks are victorious.

The Greek Police have been ordered to reinforce the Army, whilst their duties will be carried on by civilians.

Russia has sent a Note to the other Powers advising them to remain in an expectant attitude until one or other of the combatants requests their intervention, adding that meanwhile it will be necessary that they maintain the blockade of Crete and hold the island in trust.

[Larissa and Thynavos are both in the provinces of the same name, which are washed by the Gulf of Salonica. Thynavos is six miles on the Greek side of the frontier, and Larissa ten miles farther south.—Ed., J. T.]

BRITISH NAVAL SURPRISES.

London, April 13.

The British West African Squadron under Rear-Admiral Harry H. Rawson, consisting of nine vessels, has arrived at Durban quite unexpectedly. Their object and destination are unknown.

CHESS.

All Communications to be addressed to the Chess Editor.

The Yokohama Chess Club meets on Monday and Thursday in each week, at Clausen's Hotel, No. 66, Main Street, from 5 p.m. to 11 p.m.

Visitors to Yokohama, and Officers of ships (whether Navy or Merchant service) who are Chess-players, are welcome to use the Club during their stay in this port.

The Tokyo Chess Club meets at the Tokyo Hotel, every Friday, from 1 p.m. to 7 p.m.

STEINITZ.

Last news is that the old Champion is in Austria recuperating. Our friend Black Bishop de-

livered a funeral oration on the ancient master a month ago! What is B.B. going to do now? Turn Resurrection-man?

GAME No. 694.

The following game is selected as a specimen of exceptionally lively play. The opening adopted—the Cunningham Gambit—usually leads to games of that description, and is a favourite with Mr. Bird, who has done much to popularise it. White's fourth move converts the opening into a Rook's Pawn Gambit, and the continuation does not form a standard game in the Cunningham Gambit.

38—P to R 4
39—B to Kt 6
40—B takes P
41—R to Kt 6
42—K to B 4
43—P takes R
Resigns.

(a) 12—P to Q R 3 would have preserved the K B.

(b) The bishop should have been taken first.

(c) White could have played 14—B takes P ch, Q takes B; 15—B takes Kt, Q takes B; 16—P to Q Kt 4, with a pawn ahead; or after 14—B takes P, ch, 15—P to Q Kt 4 at once.

(d) The omission pointed out would not have mattered had he not missed a second chance of remaining with a good game with 16—P takes P. The text move not only loses a pawn, but brings him into trouble besides.

(e) Giving up the exchange also is somewhat too generous.

If 21—Q takes Kt, then 21..... Q takes Q; 22—R takes Q, B to B 4, &c. White's game is untenable.

63—B to B 5	63—K to B 6
64—K to Kt 7	Resigns.

(a) Nothing is to be said about the game so far, except that the players seemed to have been afraid of each other, and, therefore, changed off pieces in order to bring it to a drawn ending. The interesting part of it, however, is to come, as the ending turned out one of the hardest struggles of the match. Probably under the impression of a speedy draw, he exchanged Knights consistent

with the previous part of the game. But he should have taken into consideration that White's King was nearer the Queen's side pawns than his own, and, therefore, preserved the Knight.

(b) The following series of moves is beautifully timed, and White eventually wins a pawn by force.

(c) Forced. If 32..... B takes P, then 33—P to Kt 4, P to R 3, ch.; 34—K to R 4, and wins the bishop.

(d) He should have posted the pawns upon white squares. Being upon black squares, he required the Bishop to defend them afterwards, and therefore he could not keep the white King imprisoned.

(e) Best. The chances of a draw increase, White having to Queen his pawn upon a white square.

(f) Better would have been 50..... B to Q 3; 51—B to B 6, B to B 5, and keep the opposition if the King moves.

(g) He has nothing better. He cannot move 53..... K to B 4, because of 54—B to Kt 4, ch.; and if 53..... B to B sq., then 54—B to B 6, P to R 3, which would fix the bishop; or 54..... B to B 6, and White's King escapes. The game is lost now, Mr. Cole playing in first-class style.

GAME No. 697.

BOARD No. 10.

(CENTRE COUNTER GAMBIT.)

WHITE. McCutcheon.	BLACK. H. J. Cobb.
1—P to K 4	1—P to Q 4
2—P takes P	2—Kt to K B 3
3—Kt to Q B 3 (a)	3—Kt takes P
4—Kt takes Kt (b)	4—Q takes Kt
5—Kt to B 3	5—Kt to B 3
6—P to Q 4	6—B to B 4
7—B to Q 3 (c)	7—Kt to Kt 5
8—B takes B (d)	8—Q takes B
9—K to Q 2	9—P to K 3
10—P to Q R 3	10—Q to B 5 ch

13—P to B 3	13—Castles
14—Q to K 2	14—Q to Kt 3
15—P to K Kt 3	15—B to K 2
16—K to K sq.	16—P to K R 4
17—P to K R 4	17—K R to K sq.
18—K to B sq.	18—B to Q 3
19—K to Kt 2	19—P to K 4
20—P takes P	20—B takes K P
21—Kt takes B (f)	21—Kt takes Kt
22—B to K 3	22—Q to K 5 ch (g)
23—K to R 3	23—Kt to Kt 5
24—K R to K sq.	24—R to Q 6
25—Q to B sq.	25—Kt takes B'
26—R takes Kt	26—Q to Kt 5 ch.
27—K to Kt 2	27—K R takes R
Resigns	

(a) 3—P to Q 4, Kt takes P; 4—P to Q B 4, &c., is a more favourable variation.

(b) 4—P to Q 4, B to Kt 5; 5—P to Q B 4, Kt to K B 3; 6—B to K 3, &c., is preferable. The exchange of knights brings Black's Queen into play.

(c) A weak move and the cause of the inferior game he got. 7—P to B 3, followed by B to K 2 or B to Q 3, was good enough.

(d) 8—Castles would have been equally bad because of 8..... Kt takes B; 9—P takes Kt, B to Kt 5, thus destroying his pawns altogether.

(e) The alternative would have been 11—K to B 3, Kt to Q 4, ch.; 12—K to Kt 3, with a much better position than he actually got.

(f) Why bring an additional piece of the opponent's into play? 21—B to K 3 and occupy the open Q file might have enabled him to make a fairly good fight still.

(g) Mr. Jacobs finished the game now vigorously.

A CHESS GAME.

A recorded game of chess, says the *Manchester Weekly Times*, has a beginning, a middle, and an end, and is a story with a real plot, in which all the harmonies of time and of place are scrupulously observed. It is an account in symbols of a contest between two intellects; a relation in cypher of lures, of wiles, of plans and circumventing tactics; of fierce onsets that lead to victory or to disaster; of dogged and unyielding resistance that eventually ends in defeat. "An hour's history of two minds is well told in a game of chess."

THE NUREMBERG CONGRESS.

The following interesting game was played in the Nuremberg Tournament, Score from the tournament book:—

GAME No. 698.

(FRENCH DEFENCE.)

WHITE. A. Albin.	BLACK. G. Mackey.
1—P to K 4	1—P to K 3
2—P to Q Kt 3 (a)	2—P to Q 4
3—P to R 5	3—P to Q R 3 (b)

4—P to Q 4

5—P to Q B 3

6—P to Q R 3 (c)

7—Kt to B 3

8—B to K 3

9—Castles

10—R to R 2 (e)

11—P takes P (g)

12—R to Kt 2

13—Q to B 2

14—R to R 2

15—P takes Kt

16—B to Q 2 (i)

17—R to Kt sq.

18—B to Q 3

19—B to Kt 4

20—B takes Kt

21—P to B 5

22—Q R to Kt 2

23—P takes P a.p.

24—R takes Q

25—B takes R

26—Kt to K sq. (k)

27—B to Q 3

28—P to B 4

29—B takes B, ch.

30—Kt to Q 3

31—K to B 2

32—K to K 3

33—R to Kt 2

34—Kt takes R

35—K to Q 3

36—Kt to Q sq.

39—P to R 4

40—P to Kt 5

41—P to B 6

42—P takes P

43—Kt to B 2

44—Kt to R 3

45—Kt to B 2

46—Kt to Kt 4

47—Kt takes B

48—Kt takes P

Resigns.

(a) A favourite development of Albin's, but hardly to be recommended.

(b) An unnecessary waiting move. 3..... P to Q B 4 at once would prevent the establishment of White's centre.

(c) Eccentric, the intention being to develop the Q R. Albin, however, plays this sort of irregular game very well.

(d) We have occasion to frequently criticise this move. Obviously this square is required for K Kt to K 2; Kt to Kt 3, and then B to K 2.

(e) The better course would have been 10—P takes P, B takes P; 11—P to Q Kt 4, B to K 2; 12—Kt to Q 2, followed by Kt to Kt 3, and the same Kt to Q 4. Albin, however, has the ingenious sacrificing combination that follows in view.

(f) Inferior. It secures White's side even with the simple 11—P to Q Kt 4, neutralising the effect of Black's Q at Kt 3, and the rook upon the open file.

(g) Dr. Tarrasch makes the severe remark that "White having played the opening so miserably, he might assume that the knight being left *en prise* was an oversight." Our opinion, however, is that Albin left the knight to be taken designedly, and a pretty combination it is.

(h) If 12..... Q to Kt 3, then 13—Kt to R 4, B takes Kt; 14—B to R 5, Q to K 5; 15—P to B 3, Q to B 4; 16—P to Kt 4, winning the queen; but Black would have had three minor pieces for it.

(i) White missed the chance here of gaining a piece with 16—P to B 5, threatening with 17—B to Q 2 to win the queen. Black had nothing better than to sacrifice the K B. Dr. Tarrasch makes a simple query to the text move. It is to be regretted that the Doctor's remarks are not quite free from personal feeling in Albin's case.

(j) As the K R P cannot be taken, because of P to K Kt 3, he might have saved a move with 21..... Q to B 2; 22—Q R to Kt 2, B to B 3, &c.

(k) The last chance would have been 26—B to R 4, K to Q 2; 27—B takes B, ch., P takes B; 28—R takes P, K to B 3, followed by R to Q Kt sq., and the game would have been even. The way he played it the Kt falls, and the remainder is plain sailing for Black.

Kobe-NAGASAKI.

The correspondence games between the Kobe Chess Club and Mr. Jordan are drawing to a close. Kobe has resigned game A on the 16th move, and probably by this time Mr. Jordan has scored a victory in Game B. We predicted all this when we analysed the openings. Kobe must get a stronger team if they wish to succeed against the "Man of Nagasaki."

MAIL STEAMERS.

PASSENGERS.

ARRIVED.

Per British steamer **Ancona**, from Hongkong and ports.—Mr. and Mrs. Ballardie, Mr. and Mrs. Bennett, Misses Ballardie (2), Miss MacCallum, Miss MacKae, Madame Martyloff and child, Messrs. P. S. Hollis, G. E. Leon, Owen Jones, G. W. Steele, J. Stewart, A. A. Hankey, E. F. Wiley, L. H. Clayton, Lung Hing-long, and E. H. Holmes in cabin.
 Per British steamer **Coptic**, from San Francisco via Honolulu.—Mr. A. De Block, Mr. G. Van Olden, Mr. Gevers Deynott, Mrs. J. M. Shotwell, Miss Grace Shotwell, Messrs. F. G. Riggs, F. G. W. Ferguson, C. V. Carroll, A. W. Schumacher, H. Windt, M. Lamadrid, Sr., M. Lamadrid, Jr., A. C. Byer, F. E. Fernald, Miss A. Doughaday, Messrs. Leo Zenger, S. Nishimura, A. A. Thomas, S. Asano, Henry Ryder, John H. Gatherwood, Robt. B. Greer, Rev. and Mrs. H. B. Price, Mr. and Mrs. E. R. Smith and child, Rev. G. Heben Jones, Messrs. A. Adelsdorfer, F. E. Peabody, Peter Lee, Otis A. Poole, and Wm. C. Thompson in cabin; Mrs. M. Martens and infant in steerage.
 For Kobe.—Mr. and Mrs. F. H. Loring, Mr. John G. Kearsing, and T. Ralston in cabin. For Shanghai.—Messrs. J. Samson, J. S. Fearon, and E. Quackenbush in cabin. For Nagasaki.—Mr. E. C. Huff in steerage. For Hongkong.—Capt. and Mrs. W. J. Bryan, Mr. and Mrs. R. J. M. Dawson, Messrs. Heinrich Heyn, Herman Kubbe, G. S. Beebe, Jos. A. Shaldon, Ah Lum, Mr. and Mrs. W. F. Allen, Mrs. W. A. Nevills, Misses Mollie Pierce, Winnie Davenport, and Birnie in cabin.
 Per British steamer **Aden**, from London, via ports.—Mr. E. Warahs, and Mr. Beesley in cabin.
 Per French steamer **Sydney**, from Marseilles and ports.—Messrs. Kato Tsunitada, Muraori, Longin, Lagrange, Reynold, Oono, Sakamoto, Mrs. Hanna Tsuyai, Mrs. Ross and child, Messrs. Lennon, Griffin, Papasian, Camoisson, Bourguignon, Miss de Sylva, Mr. and Mrs. Febling and baby, Mr. Louvin, Mr. Reiffinger, and Mr. Kimura in cabin.
 Per British steamer **China**, from Hongkong ports.—Mrs. J. F. Suydam, Mr. H. Suydam, Master Suydam, Messrs. Jno. Lumm, Pekenpock, O. D. Jerauld, H. Bachr, G. C. Pakenham and 2 children, G. W. Woolsey, Brockmann, W. Winmill, G. S. Warren, T. B. Warren, F. Mesa, K. Fuji, W. Schöder, T. B. Packington, Miss Johnson, Mrs. Farnum, Baron V. Gidnam, Mrs. Ritsky, Mrs. S. D. Hepburn, Rev. and Mrs. W. B. Hamilton and child, Miss Farnum, Mrs. J. D. Langer, Mrs. E. W. Tilden, Mr. and Mrs. H. I. Chape, and Miss De Tate in cabin. For San Francisco.—Mr. and Mrs. A. H. Rennie, Miss Hunt, Misses Hunt, Mr. and Mrs. Wyon, Mrs. J. Davis, Mr. and Mrs. J. Cooper, Mr. and Mrs. Burne, child and nurse, Rev. W. S. Ament and family, Miss Walker and 2 daughters, Miss Glover, Miss Wyatt, Miss Pykes, Mr. F. W. Brown, Mr. R. Bredon, Mr. Tom Yuen, Mr. F. E. Woodruff, Rev. A. Lutonow, Mr. W. S. Harrison, Mr. Beaulieu, Rev. E. P. Fisher, and R-v. and Mrs. T. W. Gulick in cabin.
 Per Japanese steamer **Saikyo Maru**, from Shanghai and ports.—Com. T. Mori, I. J. N., Lieut. Fujimoto, I. J. N., Lieut. Takahara, I. J. N., Lieut. Suzuki, I. J. N., Mr. D. Yamagen, Mrs. C. A. Crome, Mrs. Bugbird, and Rev. T. Barth in cabin; Mrs. Nakamura, Mr. Dian Fu, Mrs. Suzuki, Mr. Budsell, and Mr. Graham in 2nd class; 39 in steerage.

DEPARTED.

Per Japanese steamer **Riojun Maru**, for London and Antwerp via ports.—Colonel S. Ishimoto, Inspector S. Yendo, Army-Engineer D. Taki in cabin; Miss S. Nishishita, Messrs. T. Tsuchi, O. Niel, and G. Tsuji in second class.
 Per German steamer **Hohenzollern**, for Hongkong and ports.—Dr. and Mrs. Todd and two children, Mrs. Robert Hay, Mrs. Patton, Mr.

and Mrs. Dittler, Messrs. Masatada Esaki, Ken Shiosawa, S. Hattori, H. E. Tomkins, P. H. Goins, T. B. Pocklington, Chas. J. Frazar, H. Baelr, Chas. H. Royce, H. Pedley, Mr. and Mrs. J. G. Dunlop in cabin; 1 European and 1 Japanese in steerage; 8 Chinese and 1 Indian on deck.

THE GREATEST WONDERS OF MODERN TIME

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BARAK, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoon Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN.

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammation. Mr. J. T. COOPER, in his account of his extraordinary travels in China, published in 1891, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a tea-spoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining 'stock'."

Sold by all Chemists and Medicine Vendors throughout the World. May 1st, 1894.

MILKMAID BRAND CONDENSED MILK

The "Milkmaid" Brand is guaranteed to contain all the cream of the original milk. In the process of manufacture nothing but water is removed, nothing but the best refined sugar added.

Avoid low-priced brands from which the cream has been abstracted, and ask for the "Milkmaid" Brand, the best for all purposes.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, MAY 1ST, 1897.

BIRTH.

On the April 21st, Mrs. WALTER DENING, of a son. MARRIAGE.

On April 24th, at Tsukiji Cathedral, Tokyo, by the Rt. Rev. Bishop McKim, Mr. GAVIN A. FORREST to Miss FRANCIS J. HUNT.

SUMMARY OF NEWS.

Kobe regatta is fixed for May 15th.

THE Greeks are meeting with serious repulses.

CHINA is said to be raising a loan in England to pay off the rest of the Indemnity.

THE Mansion House Indian Famine Fund on March 18th amounted to £435,000.

THE Duchess of York has presented her husband with a baby princess during the week.

THE general meeting of shareholders of the Nippon Yusen Kaisha will take place about the 15th inst.

THE Yokohama Spring Races were held in fine weather this week, on Thursday, Friday, and Saturday.

MRS. CAREW left Yokohama for Hongkong, under escort, on Sunday, per the P. & O. steamer *Ancona*.

THE Authorities gave charters a few days ago to the following Railways:—Chikushi Untan

Railway; Boso Railway; Uwajima Railway; Sakata Railway; Saga Railway and Yoro Railway.

HEAVY rains fell in Yokohama on Tuesday and Wednesday. The season is very backward and cold.

THE Tobacco Monopoly system and the Silk Encouragement Law have been promulgated during the week.

On the 25th ult., about 7 p.m., a luggage van was derailed at Sakuragicho, Yokohama, and four cars were upset.

ONE of the coolies who grossly assaulted Mr. E. L. Conan and others at Nagasaki the other day, has been fined \$5.

VISCOUNT KATAOKA, an Imperial Chamberlain, left for the scene of the recent fire at Hachioji on Monday morning.

THE Japanese Standing Squadron left Yokosuka on Sunday for Kobe, whence it proceeds to the China Sea for a cruise.

THE dead-list of the Hachioji fire grows everyday. Nearly one hundred corpses have been discovered among the ruins.

THE Hochu Water-power Electric Railway Company, having a capital of yen 450,000 was given a charter on the 29th ult.

MR. SONE, Minister to France, is expected to arrive in Japan about the 3rd of May, leaving left Paris on the 27th March for home.

It is reported that H.E. Sir Ernest Satow, British Minister in Tokyo, will leave Yokohama by the *Empress of China* on the 7th inst.

T.I.M. THE EMPRESS AND EMPRESS will leave Kyoto on the 4th inst. and return to Tokyo the following day, after staying a night at Shizuoka.

THE *Nichi Nichi* declares that no other alternative presents itself at present than to have recourse to a foreign loan to save the financial situation.

T.I.H. Princesses Tomi and Yasu, who had been staying at Hayama, Sagami Province, for some time, arrived at Shimbashi Station on Friday afternoon.

IN the recent big fire of Hachioji, the total number of houses destroyed was 8,700; 60 down 202; telegraph posts 22; and electric light posts 41.

THE laying of tramway lines between Shimbashi and Shinagawa, projected by the Shinagawa Basha Kabushiki Kaisha, commenced on the 23rd April.

DURING Saturday night's storm at Kobe, some 74 junkmen were rescued by the Water-police, owing to their vessels foundering at the moorings off Tempo zan.

H.I.M. THE CROWN PRINCE attended a performance of Lumiere's Kinematograph on Monday evening, which was given in the garden of the Akasaka Palace.

PRINCE ARISUGAWA, the Imperial Ambassador to England, has been entertaining the British Minister this week, and Sir Ernest Satow has returned the compliment.

KOREA is again prominently before the public, a proposal having been made to engage some 160 Russians as drill-instructors. The project meets with much opposition.

MR. INAGAKI SHIMESU, an ex-M.P., while taking refreshment at a tea-house in Kanda, Tokyo, on the afternoon of 25th ult., was suddenly attacked by a man named Hayashida, who

was armed with a dagger. Mr. Inagaki was wounded on the head. His assailant was at once arrested.

THE Japanese battleship *Fuji*, built for the Japanese Navy in England, has been attached to the Sasebo Admiralty; and the *Fashima* to the Kure Admiralty.

MAJOR GENERAL HISHIJIMA, Commander-in-Chief of the Mixed Third Brigade, Formosa, who has been suffering from malarial fever, arrived at Shimbashi Station on the afternoon of the 25th ult.

MR. JAMES JOSEPH SYLVESTER, F.R.S., hon. D.C.L., Savilian Professor of Geometry in the University of Oxford, is dead, aged 83. In him the scientific world of Europe has lost one of its foremost men.

THE wife of Lieutenant Mikami Heikichi, I.J.N., of Kojimachi, while on her return from the Mitsui Bank, on the 23rd ult. was robbed by a ruffian of 1,000 yen, which she had just drawn from the Bank.

THE construction plans for a port at Tsuyazaki, Fukuoka Prefecture, were passed by the Authorities the other day. According to the scheme, the reclamation will extend over an area of 228.130 *tsubo*.

Two hundred and seventy-nine contract emigrants from Kumamoto and Hiroshima left for Hawaii by the *China* on the 24th April. The remaining one hundred and ten are to leave Yokohama by the *Peru* on the 13th of May.

MR. INAGAKI MANJIRO, the new Minister to Siam, left Shimbashi Station on the 25th ult. for his new post. Among those assembled at the Station to see him off were Prince Konoye, Count Okuma, Count Soyejima, and others.

LIEUT.-GENERAL YAMAGUCHI, Commander-in-Chief of the Fourth Brigade, has received the Third Class of the Order of the Golden Kite, and a pension of yen 700 per annum, in recognition of his meritorious services during the China War.

SINCE the Navigation Encouragement Law came into operation, the vessels that have passed the official examination are the *Kinshiu Maru* (3,966 tons) and *Ryofun Maru* (4,793 tons), of the Nippon Yusen Kaisha. Those in course of examination are the *Asosan Maru* (1,698 tons), the *Sumiyama Maru* (3,620 tons), the *Asahi Maru* (3,041 tons) of the Mitsui Bussan Kaisha; and the *Yamaguchi Maru* (3,287 tons), of the Nippon Yusen Kaisha.

LITTLE business is done during race-week in the best of years, so it is hardly noteworthy that the record has not been broken. Yet merchants have good cause to grumble at the paucity of business put through in the last week of April. There was not a single recorded sale in yarns or textiles—surely a remarkable thing at this time of year. No great business was done in metals, owing doubtless to holders asking for better prices, which dealers refuse to give. Kerosene has had a dull and disappointing week in view of the known scarcity of up-country supplies. Sugar remains unchanged, large arrivals preventing values from rising. A small spurt in Raw Silk at the beginning of the week, soon died away, and quotations close irregular and nominal. Waste silk has seen no change. Hand musters of new leaf are on show; and the outgoing steamer may take a few half-cheats. About 20 piculs Tosa leaf are said to have been settled in Kobe; but the price has not transpired. Exchange has fallen still further.

SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.

A subject to which frequent allusion has been made in these columns, namely, the horsing of the Japanese troops, is discussed at some length by the *Fiji Shimpō*. Our contemporary calculates that for each trooper three horses must be provided, first and last, and that for land-transport purposes, there must be one or two horses for each infantry soldier. Assuming the correctness of that very liberal estimate, it is easy to appreciate the very great importance of the question. Japanese horses are weak, puny creatures, unfit for military purposes, and when one reads descriptions of the size, speed, and draught-power of European animals, the contrast is most disquieting. Of course the matter has not failed to attract official attention. Some years ago, the breeding of mounts for the Army (*gumba yōsei*) was among the topics of constant conversation, and folks understood clearly that what ships are to the Navy, horses are to the Army. It was then that the Government organized a horse investigation council (*bahitsu chosa kai*), and as a result of its deliberations sent a committee of investigation to Europe and America. But no practical solution of the problem seems to have been found, for in the last session of the Diet, we find the Cabinet introducing a Bill for the examination of stud horses (*tani o-uma kensa hoan*), the purpose of which, speaking briefly, is to effect a general improvement of the breed of horses throughout the country. An approved strain of sires is to be introduced, and the farmers are to be required to comply with regulations for the service of dams during the months of March, April, and May. It is very doubtful whether to rely upon horses used in agriculture is a wise policy on the part of the military authorities. In the Occident the two classes of animals, horses for the farm and horses for the army, are considered independently: the qualities required in the former are not the qualities needed in the latter. That is even truer in Japan's case, for owing to the smallness of the agricultural holdings in this country, and the custom that prevails of entrusting the management of farm horses, in great part, to women and children, there is no need of a big, powerful animal. What is wanted is a docile beast that will carry a couple of bags of rice 8 or 9 miles a day, and will allow itself to be led by a girl or a lad. There are about 150,000 farm horses in the country, and if they could all be turned into a stud, a supply of military remounts might in time be procurable. But it is not right to force the farmer, *nolens volens*, into this project, neither is it wise to forget that in turning the farm horses to such uses, agricultural ends may not be served or military needs satisfied. A better plan would be to form a special bureau in the Department of Agriculture and Commerce to establish breeding places at convenient points throughout the country, and to work independently of the farming classes, making it optional for the farmer to avail himself of the breeding facilities offered by such establishments.

There is no concealing the fact that much uneasiness exists in Japanese commercial and industrial circles at present. The country has passed, and is passing, through the stages proverbially incidental to a victorious foreign war. The spirit of elation evoked by military successes was felt by the industrial and commercial classes, and a fever of enterprise became epidemic. For a time everything boomed. Then ensued the inevitable season of depression, when men began to discover that their expectations had outrun their opportunities. Public securities fell; the shares of private companies dropped rapidly from the inflated elevation that they had attained; it became impossible to realize on scrip that had recently seemed a sound asset, and, in short, the pendulum swung back far beyond zero. Of course the distressed speculators, and the unsuccessful men of business besieged the Government's gates for aid, each urging some nostrum that would suit his own case. Finally, the Government

yielded to this pressure and introduced a Bill for the adoption of the single gold standard; a Bill which the Diet, the great majority of whose members are entirely without financial knowledge, passed with extraordinary rapidity, anticipating some vaguely delightful consequences. Doubtless the country's financiers, in framing that measure, desired to place the monetary system on the basis that seemed soundest. But their proximate purpose was to open the door to the influx of foreign capital. They believed that when Japanese public securities became payable in gold, European capitalists would recognize in them a most desirable investment, and money would flow in from London, Paris and Berlin. It is, perhaps, too soon to form any hard and fast conclusion as to whether those expectations are doomed to disappointment, but the fact remains that although Japan has become a gold monometallic state, the market quotations of her public securities have not undergone any perceptible change in London, nor is there any visible sign of the opening of the flood-gates of Western money; while, on the other hand, the feeling of gloom and depression deepens in commercial and industrial circles. Something of the uneasy feeling is doubtless due to the prospect of prohibitive tariff rates being imposed by the United States upon several important staples of Japanese production, and to reports that the barley and rape crops are likely to prove small. But whatever the causes, and however their various effects be appraised, it is certain that the clamour for official interference is again beginning to swell. This time, the cry is for a foreign loan, and inasmuch as the Government's measure of relief, the gold monometallic Bill has not at once afforded the aid desired, the complainants think that they have a kind of consequential right to demand farther remedial measures by the State. It is not to be denied that the ultimate purpose of the gold law was a foreign loan, and that the sale of Japanese securities abroad was a temporary means of attaining that purpose. That expedient has failed, and the Government is now brought face to face with a problem, the solution of which may have a lasting effect on the national finances. The *Fiji Shimpō*, which we are epitomizing, becomes here somewhat vague. It disavows any general disapproval of foreign loans, but writes in a tone that suggests opposition to any such measure at the present juncture.

The curious and complicated question with which Japan has to deal in Formosa on the 8th instant, is discussed minutely by the *Shogyo Shimpō* from every point of view. Our readers are already so familiar with it that we need not now follow the *Shogyo* into details. On the 8th of May expires the period of two years fixed by the Shimonoeki Treaty during which all the residents of Formosa—Occidentals of course excepted—have to determine whether they will remain and become Japanese subjects, or place themselves finally under Chinese jurisdiction. It is evidently impossible for the Japanese authorities to make any scrutiny into the wishes of each individual Formosan. All that can be done is to adopt reasonable means of bringing the nature of the situation to the notice of the people, and then to fall back upon the broad distinction that whoever has not packed up his goods and chattels, disposed of his property and removed himself, either to China or into one of the settlements, by the 8th of May, must be considered to have announced, *de facto*, his desire to become a Japanese subject. That sounds simple enough. But there is the difficulty that many persons may announce their unwillingness to become Japanese subjects, and, at the same time, declare their incapacity either to leave the island or to move into a settlement. What is to be done with such people? To put them on board ship, carry them across the sea and dump them down in China would be out of the question. To provide places for them in the settlements where no means may be available for their earning their livelihood, would be not less objectionable. And supposing these perplexities overcome; supposing the general division effected, how is any practical distinction to be

subsequently maintained between Chinese that have become Japanese subjects in Formosa and Chinese that cross over temporarily from the mainland? The intercourse between Formosa and the opposite coast is frequent, and large numbers of Chinese are constantly coming and going. New-comers can not be distinguished from old residents. The whole problem is extremely puzzling, and the action of the authorities is regarded with much curiosity.

The *Osaka Asahi Shimbun* discusses the same subject but takes a broader and more statesmanlike view of it. There is no just reason, it thinks, for any vacillation. The Shimonoeki Treaty allowed an interval of two years during which the people of Formosa had to make up their minds as to the course they would take. Two years was ample for the purpose, and Japan will be perfectly warranted in concluding that any person who has not, by that time, announced an intention of continuing his allegiance to China, intends to be regarded as a Japanese subject. It is understood that not a solitary Formosan has yet declared any such intention, and during the two or three weeks that remained at the date of latest advices, declarations, even supposing them to be made, could not be numerous. The Japanese Authorities have nothing to do but to proclaim the restrictions, if any, imposed upon Formosan subjects of the Empire as compared with pure Japanese subjects. Their responsibility ends in this particular matter. The *Osaka* journal then expounds, at some length, its views as to the causes that have prevented the complete pacification and successful administration of the new dominion, and sharply criticizes the Governor-General, the Colonisation Department and the Cabinet for not having yet elaborated any large scheme of industrial expansion in the island. Several times during the last session of the Diet our contemporary urged that a sum of fifty million *yen*, at least, should be voted for the development of Formosa and the defences of the Pescadores, and that, if necessary, the money should be obtained by reducing the appropriations on account of military and naval expansion. But although the Ministry are understood to appreciate the necessity of a large outlay for these purposes, they have not yet formed any clear estimate of the amount or of the source whence it is to be obtained; whether by increased taxation, or by raising a Formosan loan, or by adding to the national debt, or by economizing the military and naval expenditures.

The *Kokumin*, also, writes about Formosa. It quotes some of the sweepingly unfavourable opinions placarded by Chinese rebels in the streets with reference to the Japanese; namely, that they look down on the agricultural class; that they break the laws; that they prostitute justice to selfish ends, and that their general behaviour is that of beasts. Granting that such charges are exaggerated, there is still a large element of truth in them, and the *Kokumin* thinks that the chief cause is the incompetence of persons sent from Tokyo to discharge official functions in the island. Japan ought to have employed her best men for the purpose, but she employed her worst. Under the Ito Cabinet, officials for Formosa were selected by favouritism without any reference to their merits, and no visible improvement has been effected since Count Matsukata came into power. The great majority of the men serving there are persons who could not possibly pass muster as officials at home; or who have failed in business; or who, being crippled by debt, have been tempted by the dual prospect of putting the sea between themselves and their creditors, and obtaining high pay. A few good men went from time to time, but, in nearly every case, they returned after a brief interval. Of course the satisfactory administration of the island is out of the question so long as such officials have charge of its affairs. They ought to be discharged at once, and the men employed in their place should receive salaries sufficient to reward merit and to dispense without any necessity for peculation. The *Koku-*

min further thinks that officials should be urged to get their wives and children to the island as quickly as possible.

Maritime enterprise is the subject of a leading article in the *Meiji Shimbun*. After thirty years of renewed intercourse with the outer world, Japan is at length beginning to have something like a mercantile marine of her own, and the Liberal organ thinks that a strong helping hand should be held out by the State. In March of last year, the Nippon Yusen Kaisha opened a line of steamers to Europe, and in August of the same year, it opened a line to the United States. From the experience gained thus far, the Company expects to lose 3,628,000 yen annually on the European services, and 771,200 yen on the American. In consideration of that estimate a Bill providing for a special subsidy was submitted to the Diet last session, but the time chosen for discussing it was bad. The *Meiji Shimbun* supports the principle of the measure and believes that it will yet be adopted. Still, Japan's maritime enterprise is in its infant stage. The only other company worthy to stand in rank with the Nippon Yusen Kaisha is the Toyo Kisen Kaisha. These two companies have a great national responsibility to discharge. It was understood that the Toyo Kisen Kaisha had ordered some very fine steamers abroad for the purpose of organising a service to America, and it now appears that Mr. Asano Soichiro, the President of the Company, has been in treaty with the Pacific Mail and the Oriental and Occidental Companies, and that the three have agreed to combine for the purpose of establishing, in conjunction with the great Pacific railway companies, a regular service to San Francisco. The P. M. S.S. and the O. & O. S.S. companies will each take off one of the four steamers that they now have on the route, and the Toyo Kisen Kaisha will add three, so that the total number will be nine. The service is to commence from next April. Thus there will be two services from Japan across the Pacific carried on, wholly or in part, by Japanese steamers. The *Meiji Shimbun* hails the prospect with delight, and wishes every possible success to the undertaking.

Some time ago, the leading book-sellers of Japan combined to petition the Department of Education that the price of text-books used at the public schools throughout the Empire should be raised, in consideration of the great appreciation that has taken place in the prices of commodities generally. The Department regarded the petition as just, and agreed to an increase representing about 20 per cent. The change is violently attacked by the *Yomiuri Shimbun*. It declares, in the first place, that Marquis Hachisuka, Minister of Education, ought never to have sanctioned such an alteration without consulting the various localities about their ability to bear it; and, in the second, that the pretext advanced by the book-sellers, namely, appreciation of the prices of commodities, is no reason at all, since the consequences of that appreciation are felt by all classes, not by book-sellers alone, and there is no more warrant for imposing an additional charge upon the distressed buyer than for securing an additional profit to the distressed seller. Marquis Hachisuka and all the parties responsible for the act are roundly abused by the *Yomiuri*. There are some four thousand school-going children in the empire, and, at the lowest reckoning, they pay 30 sen a year each on account of text-books. An increase of 20 per cent. in the price means a total additional outlay of 240,000 yen annually, which may be very welcome to the book-sellers, but will be a terrible burden to the people at large.

The *Hochi* touches upon the same subject, but gives the explanation furnished by the Department of Education, namely that, after due examination, it was found that the price of printing paper and the cost of composition had actually risen to such an extent as to warrant a change of the nature desired by the book-

sellers; and that, unless the petition were agreed to, there was reason to fear lest the book-sellers should lower the quality of the books, or sell them at more than fixed prices. It was therefore thought advisable to agree, but the book-sellers proposal of from 30 or 40 per cent. was cut down to 20 per cent at the highest. The *Hochi*, while noting that explanation, denies that it has any force so far as concerns the contingency of an arbitrary raising of price by the book-sellers: there are means to control anything of the kind. Our contemporary's estimate of the total additional expense to be incurred under the new rate, is the same as the estimate of the *Yomiuri*, namely, 240,000 yen.

In the columns of the *Tokyo Asahi*, the action of the Educational Department is condemned chiefly on the ground that the school-going populace is far too poor to bear the impost.

TEA.

The tea trade of last year was attended by most satisfactory results, but whether a similar phenomenon will be manifest this year remains to be seen. The *Mainichi Shimbun*, which we are quoting, give a general account of the present condition of the tea crop, for the benefit of dealers in this important commodity. Tea-growers predicted last winter, it says, a probable increase in the production of perhaps ten or twenty per cent., as compared with the previous year. But last year saw a decrease of thirty per cent. and even then adulterated tea was exported. The following figures show the comparative values of tea exported in the 28th and 29th years of Meiji:—

	Amount.	Value.
29th year (1896) ...	33,241,463 catties ...	6,370,328 yen.
28th year (1895) ...	38,826,695 catties ...	8,879,173 yen.

A decrease of 85,585,232 catties and 2,508,845 yen, in value, is to be noticed in these figures. This was due to the failure of the crop. Many tea growers recently turned their farms into mulberry plantations in view of the growing prosperity of the silk trade. They neglected fertilizing their tea gardens, and thus brought about a most lamentable decrease in production. The profits realized last year, it is generally supposed, will now give a fresh impetus to tea-growers. Drastic steps were taken last season by various corporations to encourage the use of fertilizers and the adoption of necessary precautions. To the serious disappointment of tea-producers, however, a large portion of Suruga and Totomi are reported to have suffered considerably from cold and frosty weather this spring, and a decrease in the crop is now expected of twenty per cent. Nor is it improbable that other tea districts, such as Miye, Chiba, Gifu, and Kyoto will also suffer from the variable weather. In short, last winter's calculations have been falsified entirely.

As to foreign markets, it would be well to notice that, prior to the shipment of the new teas, the United States Government issued prohibitive regulations with regard to crude and adulterated teas. These regulations are to be applied to green teas from India, Ceylon, and other countries, and it is to be expected that they will have an effect upon the import of teas sent from Japan. Recent information from various districts guarantees greater superiority in quality, and it is to be hoped that this outlook may be realised. Hitherto foreign merchants have competed with each other in purchasing teas in Japan; but this year, owing to the large stocks of green teas still remaining unsold in America, only necessary orders will be filled. Japan must also expect even greater competition from Indian and Ceylon teas this year.

A grand social meeting of International Newspaper Editors will be held at Stockholm, Sweden, on the 25th of June, and the presence of two representative journalists from Japan is requested.—*Chuwa Shimbun*.

COUNT OKUMA ON TRADE.

At a meeting of the Industrial Investigation Council held on the 23rd ult., Count Okuma, acting Minister of Agriculture and Commerce, delivered the following speech:—Gentlemen:—My sudden visit may appear in some respects an intrusion upon your deliberations, but I have a few words to say to you on my own behalf. A moment's consideration will show that in regard to industry the affairs of the country have not yet attained their fullest development. At the time of the Restoration, the Government, in view of the tendency of the age, established Industrial Offices in each city and prefecture. The idea was praiseworthy, but the plans adopted were clumsy, and, as a consequence, excessive interference obstructed the natural course of progress. The history of industry in Japan is sadly marked by failures. Yet the establishment of the *Kwangyokwa*, as the Industrial Offices were called, was not altogether devoid of fruitful result. Imperfect as the institution was, it became the germ of future development. But the seed has not yet grown into perfection, and it is necessary for us to fertilize the roots and prune the twigs. For example, if the trees of a forest are cut down without adopting suitable measures for replanting or reorganization, the administration of forest affairs is seriously affected. That is not true of forestry only: similar results are shown in other branches of industry and commerce. These remarks apply to all sorts of industries. Recently, I have had under review the policy formerly pursued by the Department of Agriculture and Commerce with regard to questions now under discussion. I cannot but perceive the many shortcomings of this Department of State. In my opinion, the public in general are justified in regarding the Department as a source of loss and not of profit. Since I was placed at the head of the Agricultural and Commercial Department, I have devoted my energies to introducing various reforms. I have not failed to discover many things done by the Department that are of no small inconvenience to the people. These I will take steps to remove. Amongst others, the Rules concerning business in staple commodities are too intricate, and I have already determined to revise these rules in such a way as to meet the wishes of both Japanese and foreigners.

JAPANESE SOCIALISTS IN AMERICA.

The *Yorodsu Choho* publishes an account of a queer association formed by Japanese now resident in America. These exiles have affiliated themselves into a society under the name of the "Japanese Socialists," and they may be generally characterized as exhibiting in their lives strong emotional feelings that lead them to commit themselves to violent speaking. Their publications have frequently been prohibited at home as injurious to public peace and tranquillity, and recently they drew up the following rules:—

1. The society shall be called the Japanese Socialist Party in America.
2. The society shall belong to a branch of the International Socialists Union.
3. The object of the society shall be the promotion of social principles.
4. The offices of the society shall be established in San Francisco.
5. The society shall deliver at least once a month socialistic lectures and publish a newspaper at convenient intervals.
6. Each member must pay a fee of twenty-five cents per month.
7. Membership can be obtained through the recommendation of any two of the members.

The society assembles in an underground cellar where the members indulge in vague talk and expressions of discontent. In ordinary times, they engage in agricultural and cattle-rearing pursuits. Recently one of their number was sent to Europe to study social science, while others returned to Japan to propagate their doctrine at home.

THE EUROPEAN SITUATION.

The telegram which we publish this morning from a Tokyo source adds little to our knowledge of the situation in Europe. Through Reuter we were already in possession of information that the Great Powers have conveyed to Turkey and Greece an intimation practically identical with that now alleged to have been suggested by Russia. Writing on this subject, in connection with the news that Turkey had declared war, we expressed the opinion that, after all the demonstrations made by the union of Great Powers, Turkey and Greece would probably be left to settle their difference in an undisturbed ring, unless the Balkan States stepped in. That anticipation appears likely to be fulfilled. Certainly no one of the Great Powers can now interfere actively without provoking the jealousy and umbrage of the rest. The ugliest aspect of the situation is that things seem to be tending towards England's isolation; or rather, towards her support of Greece. There can be no question that the sympathies of the British nation are with the Hellenic Kingdom, or that, had the counsels of Germany, Russia, and Austria been adopted at the outset, Greece would have been subjected to such pressure as must have chilled her courage and crippled her capacities effectually. It was owing to the influence of Lord Salisbury that those drastic expedients were not resorted to, and in all probability an attempt will be made to fix upon England's shoulders some responsibility for Greece's subsequent invasion of Turkish territory. That contingency need not, of course, cause England any special concern, but the difficulty is that Greece having been distinctly the aggressor, Russia's proposal is plainly directed against her, and Lord Salisbury has now perceived that with whatever mercy his policy be tempered, it must not be anti-Grecian. His hesitancy to fall into line with the other Powers under Russia's leadership, is therefore, quite intelligible, but we can not regard without uneasiness this gradual committal of Great Britain to the Grecian cause. Robert Louis Stevenson, in one of his happiest moments of insight, says that it is the destiny of the solemn classic writers whose enforced and often painful acquaintance we make at school, to pass into the blood and become native in the memory, so that a line of Demosthenes or Hesiod speaks not so much of Athens or Helicon as of English scenes and the students' own irrevocable youth. Some sentiment of that kind unconsciously binds Englishmen to Greece, and renders doubly intolerable the idea of her classic territories being once more trod by the feet of the unlovable Asiatic race from whose thralldom England helped so materially to rescue her. Besides, there is the fact, infallibly stimulant of British sympathy, that a weak little Power has boldly entered the arena to fight overwhelming odds. The instinct of every Briton is to help the feeble nation under such circumstances. The Kaiser and the Czar understand British temper thoroughly, and we doubt whether they would not both rejoice, though for different reasons, to see England confronted with the dilemma of having either to step out of the European Council, or to make large sacrifices for the purpose of asserting her title to remain in it. A crisis of some kind can not be delayed long, unless the Sultan conforms strictly with his own declaration

that, having repelled invasion, his troops shall rest on their arms and refrain from any aggressive incursion into Grecian territory—a declaration that Edhem Pasha, with his 150,000 men and fifty Krupp batteries, already seems disposed to set at naught.

RUSSIA & THE EUROPEAN CRISIS.

Reuter informed us by a telegram, dated at London on the 21st ultimo, that Serbia, Bulgaria, and Montenegro were understood to have requested Russia not to interfere between Turkey and Greece. There can be little doubt, we think, that the order of the terms has been accidentally reversed in this message. It should read:—"Russia has requested Serbia, Bulgaria, and Montenegro not to interfere between Turkey and Greece." That Russia had already taken such a step towards the three Balkan States was known, and we must interpret Reuter's message of the 21st as an intimation that, in view of the actual commencement of hostilities and of the declaration of war by Turkey, Russia has repeated her counsel. Reuter's version imparts a ridiculous complexion to an incident in itself natural and simple. The Government in St. Petersburg has never shown any disposition to take independent action in this complication, or to break away from the union of States which laboured to preserve the peace of Europe.

In connection with this question of telegrams, it seems advisable to draw attention to the misleading character of the dates attached to the messages published here. For example, the above telegram, attributing such strange action to the Balkan States, was published in Tokyo on April 22nd, under date "London, April 21st." It is plain that a telegram sent from London on the 21st *via* Shanghai could not appear in a Tokyo Journal which goes to press on the evening of that same day. The same remark applies to all the telegrams now received from Europe. Of course, the journal by which alone a service of telegrams is now received, has no idea of creating a false impression about the time of their despatch, but certainly the value of the messages would be enhanced if the actual day of their leaving London were given, instead of the day on which they reach Tokyo.

NOTES ON NEWS.

The telegram which we publish this morning with reference to the attack upon the King of Italy, is kindly furnished by the Italian Legation. His Majesty seems to have had a narrow escape, for the would-be assassin evidently came within striking distance. Probably the man will be found to be one of those lunatics whose minds become unhinged by brooding upon potentialities of notoriety, but of course the incident may be connected with the present crisis in Europe. Italy has worked in staunch concert with France and England, and the efforts of the three Powers had necessarily to be directed at the end towards the coercion of Greece. In the eyes of many people, however, the Greeks represent Europe and civilization against Asia and semi-barbarism, in this struggle with Turkey, and it is easy to conceive that to strike down the Sovereign of a State apparently opposed to Grecian

aspirations might seem to some modern enthusiast the act of a Harmodius or an Aristogeiton.

Seeing that the export of *habutae* to America last year represented a value of 7,652,300 *yen*, and the export of silk handkerchiefs, 4,617,700 *yen*, making a total of 12,269,900 *yen*, of which amount something like 4 millions goes into the pockets of Japanese manufacturers, the threatened increase of tariff rates by the United States is a serious matter. A comparison between the present and the proposed rates is not very easy to follow, but may be stated thus:—The silk being folded, a cubic inch weighing 10 *momme* is taken as the unit, and the import duty now levied on that quantity is 50 per cent. *ad valorem*. Light goods, however, having come into vogue of recent years, Japanese weavers have developed great skill in producing them, and a cubic inch is now turned out weighing from 5½ to 9½ *momme*. The new law proposes to levy a duty of 70 per cent. in the case of silk weighing 10 *momme* or upwards, and to increase the tax up to 100 per cent. the lighter the fabric becomes. In the case of handkerchiefs, which represent additional labour, the rate is to be as high as 110 per cent. According to the Tokyo *Asahi*, that immense impost is not for purposes of revenue, or even of protection in the ordinary sense of the term, but is intended to kill the trade in Japanese *habutae* and silk handkerchiefs before the Revised Treaties and the new Tariff go into operation. Japan, of course, is helpless in the matter of retaliation since the United States enjoys most-favoured-nation treatment. Her only plan will be to send her products to the States *via* Europe.

Another little political association has been formed. It is called the *Shako Club*, and its promoters are Messrs. Takahashi Nakaji, Sonoda Yasukata, and several of the Governors lately put on the Retired List. It need scarcely be said that the Club is hostile to the present Ministry, and will devote its energies towards overthrowing it.

The complaint that the balance is markedly against the United States in its trade with Japan, seems to be rapidly losing its significance. Taking the returns for the past five years, we have the following:—

JAPAN'S PURCHASES FROM THE UNITED STATES.

Yen.	
1892.....	5,988,063
1893.....	6,090,408
1894.....	10,982,558
1895.....	9,276,360
1896.....	16,373,419

The other side of the account stands thus:—

JAPAN'S SALES TO THE UNITED STATES.

Yen.	
1892.....	38,674,971
1893.....	27,739,458
1894.....	44,323,557
1895.....	54,028,950
1896.....	31,562,341

The principal staples of import from America are kerosene (5,282,000 *yen* in 1896); raw cotton (4,252,398 *yen*); flour (980,203 *yen*); locomotives (416,106); machinery (869,018 *yen*); leather (835,157 *yen*); rails (374,910 *yen*); cigarettes (377,757 *yen*), &c.

In accordance with the new monetary system, the Osaka Mint recently drew up designs for the new gold coins. They have also made new designs for the silver and copper coins.

JAPANESE TOPICS.

Hachioji has again been the scene of a disastrous conflagration. The flames broke out at 3.40 p.m. on the 22nd ultimo, and becoming quite uncontrollable, owing to a strong wind, destroyed nine-tenths of the flourishing little town. It is said that two out of every three fire-proof godowns were burned, and that among the buildings reduced to ashes were the post office, the police barracks, the tax collector's office, the local offices, the primary school, the Thirty-sixth National Bank, the Kotsu and Musashi Banks, and the theatres (Shimizu-za and Sekiya-za). The total number of houses destroyed is put at 2,500, and several lives are reported to have been lost. Great scarcity of provisions resulted, and numbers of men and women were reduced to a starving condition. Relief measures were at once organized by the priests of the Yokuraku Temple, and by the police, who took up their quarters temporarily in the Zenryu-ji.

With regard to the new pretext by the Hawaiian authorities—namely, that the free labourers who attempted to obtain admission on the strength of possessing fifty dollars were really contract labourers, since they had pledged themselves to take service with employers provided by an emigration company, and that, as contract labourers, they should have obtained the previous consent of the Hawaiian Government—with regard to that novel pretext, fresh instructions, says the *Yomiuri Shim-bun*, are to be forwarded to-day to Honolulu by the steamer *China*, Count Okuma having consulted Mr. Denison on the subject. The pretext seems quite untenable, for the definition "contract labourers" obviously applies to men that are already under contract, not to men that are seeking a contract.

It is justly remarked by the *Fiji Shimpō* that whereas the Ito Cabinet appointed only one or two party politicians to be Local Governors, the Matsukata Cabinet carried the innovation much farther, and made quite extensive changes of that nature. Should things continue in that groove, says our contemporary, the number of Governors displaced when a new Ministry comes into power will be greater and greater, and the consequences to the local administrations must be most inconvenient. At the last, indeed, the Governors will probably be chosen by public election. Not many years ago, the administrative methods in the various localities were identical, and when a departmental notification was issued, it received everywhere uniform observance. But now the prefectures are getting to differ from each other as much as American States do, and the orders of the Central Government meet with very varying degrees of attention.

The foreign trade of Hawaii during the second half of last year stood thus:—Exports, 7,326,615 yen; and imports 4,666,143 yen, making a total of 1,199,221 yen.

The scheme of official organization for carrying out the Tobacco-monopoly system has been promulgated by Imperial Ordinance. There are to be sixty-one principal, and an unfixed number of subordinate, stations throughout the country, and 446 experts will be employed. For

the information of readers whose memory does not supply the details of the scheme, as mapped out in the Bill presented by the Government to the Diet during the session 1895-6, we re-produce our own epitome of it:—

All tobacco-leaf grown in the country is to be delivered to the Government at prices fixed by the latter, who will then store it and subsequently sell it at specified rates to manufacturers and others. Growers, or intending growers, are required to send in, by the end of April each year, notices of the area of land to be devoted to cultivation, and must obtain official permission; for the Government, in order to regulate the supply of leaf, reserves to itself competence to limit the area of cultivation. The delivery of the leaf into the Government's stores is to be effected by the end of March, every year. A grower is not permitted to keep back any part of his produce, whether for his own use or for sale, unless he intends to export the leaf, in which case he can obtain a permit exempting him from the obligation of selling the tobacco to the Government. It is further provided that the collection and purchase of the leaves will be effected by special offices established at convenient places throughout the country. The system will go into force from January 1st, 1898, and from the same date the existing Tobacco Tax Regulations will cease to be operative, so that the sale of manufactured tobacco will thenceforth be conducted without the use of stamps.

It will be observed that growers have to send in, by the end of April, notices of the area of land to be devoted to tobacco growing, and upon the strength of information thus supplied the Government will regulate its transactions. Apparently such notices have been called for during the present year, for without them the scheme of buying and storing could scarcely commence from January next. The interesting question, however, is that of experts? Has the Government really succeeded in finding 440 competent experts? We may be allowed to quote once more from articles previously published in these columns:—"The expert knowledge available for the purpose of the buyers offers itself for consideration in the first place. Japanese tobacco varies greatly in quality, no two years giving like results, and, moreover, presents an exceptional number of kinds. More than eighty different varieties are recognised by dealers, their values ranging from 4 yen to 40 yen per picul. Obviously the Government will require experts competent to judge and assess all these different kinds, and on the capability of the experts will virtually depend the success or failure of the scheme." Four hundred and forty experts, are indicated by the official programme. Now it has to be observed that the Government interferes itself between the producer and the manufacturer in this matter. Unless the manufacturer is willing to take the leaf from the official store-houses on the strength of guarantees as to quality furnished by the official experts—a most untenable hypothesis—he will have to employ his own experts. In fact, as between the manufacturer and the grower, there will be as much need as ever for experts. Thus it follows that the 440 official experts will have to be available for the uses of the manufacturers as well as of the Government, unless that large number of trained men already exist over and above the number required for the normal purposes of the tobacco trade. We do not believe anything of the kind, and are obliged to fall back upon unreasoning faith in the Government's knowledge of what it is doing. Another point is that the whole of the tobacco has to be delivered into the Government's stores by the end of March, according to the original system. In other words, all the tobacco leaf of the 1897 crop, together

with any leaf remaining unmanufactured from the previous crop, will have to be inspected and taken over during the first three months of 1898. Speaking roughly, the tobacco leaf grown annually in Japan weighs 670,000 piculs and is valued at 9½ million yen. Hence the 440 experts will have to inspect about 900,000 piculs in 70 days—allowing for holidays—which means 13,000 piculs a day, or about 30 piculs per man daily. That may be possible, but we doubt it. Moreover, the capital required will be at least 12 million yen, whereas the provision in the Budget is only 4 millions. Perhaps the Government expects to sell off the leaf almost as quickly as it buys it, thus releasing capital for fresh purchases. It is difficult to perceive how the programme can work.

The Law for the Encouragement of the Direct Export of Silk was promulgated on the 27th ultimo. Hopes that it had been placed upon the shelf—hopes engendered by the unusually long delay in the issue of Imperial sanction—are consequently futile. If the Department of Agriculture and Commerce adheres to the provisions of the Bill as originally drafted, and does not exercise the discretionary power entrusted to it by the Diet in the sense of lowering the quality of the silk eligible for bounty, the measure may operate as a means of improving sericulture rather than as an instrument for discriminating against foreigners. We do not believe that it was framed for the latter purpose. Men like Viscount Enomoto and Mr. Kaneko Kentaro would not have lent themselves to anything of the kind. But it is a dangerous measure, and may prove thoroughly pernicious.

It is stated that the murderous assault committed on Mr. Inagaki Shimesu was the result of an old feud. The assailant believed himself to have been slandered by Mr. Inagaki, and challenged the latter to explain the cause of his libels. Mr. Inagaki made no reply but laughed contemptuously, whereat the other sprung upon him, and gashed his head in several places.

Commenting on an article in the columns of the *Far East*, a local contemporary says:—"Let us see how the new Press Law can be worked. The power of suspension can no longer be exercised by the Government, but when it commences a prosecution against any newspaper, it becomes suspended from that date. So though it has no longer the power with its right hand, it has by its left." A long time is always needed for the foreign public to obtain a clear idea of Japanese affairs, and the principal source of difficulty is the fact that the local foreign press falls into perpetual blunders in its interpretations of Japanese laws and regulations. We do not mean to suggest that there is any deliberate attempt to mislead, though ample grounds for such a suspicion often present themselves. But we do mean to suggest that if there were a really conscientious desire to get at the truth more care would be exercised. The case in point is a fair illustration. Our contemporary's readers are informed that, so soon as a prosecution is instituted against a newspaper at the Government's instance, the newspaper becomes suspended from that date, and thus the pretence that the Administration's arbitrary power of suspension has been abolished, is quite illusory in practice. Now what could

have been easier than to preface that statement by an enquiry? Every local foreign journal has a Japanese translator on its staff. A simple question addressed by our contemporary to its translator would have elicited the fact that a newspaper against which a prosecution is undertaken by the Government, does not "become suspended from that date," but that the incriminated number alone is suspended. The difference is all-important. Suppose that a Journal, in its issue of April 29th, contains matter of such a character as to call for arraignment at the suit of the Public Procurator. Then the Minister of Home Affairs, or of Colonization, is competent to suspend that particular issue of April 29th, but from April 30th the Journal continues to be published and circulated as before. The theory underlying the law is logical and proper: namely, that since journalistic offences justifying prosecution are offences against public morals or good order, the dissemination of the mischievous matter ought to be prevented pending a judicial decision. If, in a subsequent number, the journal, *sub-judice*, repeats its offence by re-publishing matter of the same nature, then the circulation of the second offending number can also be suspended. Such being the law, our local contemporary's interpretation of it is very misleading, and to allege that the Government remains competent to exercise with its left hand arbitrary power withdrawn from its right, is a singular misconception.

It should be remembered that the new Press Regulations are the work of the Lower House not of the Government. The Government's Bill proposed to continue the Administration's power of suspension, but to limit its operation to a week and to require a clear indication of the incriminated matter. The House drafted a Bill of its own and passed it; a Bill abolishing the Administration's arbitrary power of suspension *in toto*; directing that judicial intervention must always be invoked if public action against a newspaper seemed necessary, and providing that the circulation of an article in respect of which a prosecution had been opened, should be suspended, pending the judiciary's verdict. That Bill embodied the views of the men who for years had been working to secure full freedom of the press. Nothing was less likely than that they should stultify themselves by legislation of the kind attributed to them by our local contemporary. We may note, *en passant*, that the new Press Law went into force from March 24th, and that there has been no prosecution of any journal since then. In other times, a month seldom passed without one or two suspensions.

A resident of this Settlement, writing to a local contemporary, suggests that the Diamond-Jubilee celebration should take the form of a statue to Lord Kimberly, the attitude assigned to his lordship being that of a man blandly emptying his pockets into the hands of a courteous Japanese *entourage*; and a rider is added that any money remaining after the erection of the statue should be spent on a collation of *daikon* and Japanese tea for the British residents. The idea is quaint but not impartial. Lord Kimberly is not entitled to a monopoly of the proposed distinction. A much better title can be established on behalf of Lord Salisbury. For Lord Salisbury, on June 5th, 1890, prepared a

draft of a Revised Treaty for Japan's acceptance, containing the following Protocol:—

It is agreed between the two Governments that the Consular Jurisdiction exercised by Great Britain over her subjects in Japan shall continue to be exercised for a minimum period of five years; that if, at the expiration of that period, the Japanese Codes and Laws now in process of elaboration, shall have been promulgated and shall have been in actual operation for a continuous term of twelve months; Consular Jurisdiction of Great Britain in Japan shall thereupon cease to be exercised; but that otherwise the said Jurisdiction shall continue until the aforesaid continuous term of twelve months during which the Codes shall have been in actual operation shall have elapsed.

That is precisely the basis taken by Lord Kimberly. Thus what Lord Kimberly did in July, 1897, Lord Salisbury was prepared to do in January, 1890. It would be plainly unjust that this community should erect a statue to Lord Kimberly alone. The only comprehensive and impartial scheme would be to burn all British Foreign Secretaries simultaneously in effigy. A few Union Jacks might be added to the holocaust, and arrangements might be made for a wholesale transfer of our allegiance to some Power more able and willing to protect the interests of its nationals. The old boast, *civis Britannicus sum*, has become a voice in the wilderness.

It is frequently insisted that whereas the Anglo-Japanese Revised Treaty grants to Japanese subjects the privilege of owning land in Great Britain, no such privilege is secured to British subjects in Japan. There is a misconception here. The Treaty confers no such privilege on Japanese subjects. Its words are:—"The subjects of each of the High Contracting Parties may, in any part of the dominions or possessions of the other * * * lease land for residential and commercial purposes." There is no question of ownership; only of leasing. So far as the Treaty is concerned, Japanese subjects have not the right of becoming land-owners in the United Kingdom.

SILK.

Reports from Izu, published by our vernacular contemporaries, indicate that the first batch of silk-worms was hatched there on the 15th ult. The instructions of the Silk-dealers Corporation as to employing two kinds of eggs only, have been strictly observed, but it is stated that the quantity of silk produced will be less than the figure for last year. The mulberry trees showed a marked want of vigour in the early spring, and the latest information is to the effect that the trees were recently attacked by multitudes of noxious insects, every stump being infested with hundreds. Energetic steps have been taken to destroy the pest, but there is naturally some anxiety about the result. The weather is somewhat cold for the season, but so far as climatic influences are concerned, no cause for uneasiness has yet presented itself. In the southern part of the same province, however, things are said to be much less satisfactory. Hail storms and frosts during March interfered so much with sericultural operations, that everything is very backward, and hopes of a good crop have been abandoned. It need scarcely be added that these reports have to be taken with all reserve.

MISCELLANEOUS NOTES.

Tuesday was the wedding day of Mr. O. Vieugué, formerly Second Secretary of the French Legation in Tokyo, and Miss Lowther, sister of Mr. G. Lowther, Secretary of H.B.M. Legation.

News has been received of Mr. M. de Bunsen's engagement to Miss Berta Corry, whose father was a cousin of Earl Belmore. It appears that Mr. de Bunsen made Miss Corry's acquaintance when she was travelling, some years ago, in Japan.

It is alleged that the people of Yokohama are not subscribing readily to the Jubilee Fund, and the extraordinary reason advanced by a local contemporary is "a general feeling that we have been treated with so much contemptuous indifference by the home authorities that we have no occasion to celebrate." The writer proceeds to elaborate his point thus:—"In another two years we shall be subjected to all the indignities of Japanese rule, to the pettiness of its laws, to the exactions of its numerous taxes. In less than a year we shall be smarting under tariffs aimed directly at the foreigner." Many strange humours have been attributed to the Yokohama community by its local press, but this is the strangest of them all. After 32 years of probation Japan is to recover the judicial autonomy enjoyed from time immemorial by countries like Peru and Hawaii, and it is pretended that the British residents of Yokohama are too much chagrined by their Government's act of justice towards the country of their adoption to celebrate the Diamond Jubilee of their great and beloved Queen. Profound loyalty, forsooth! Is it possible to libel the British section of the community more grossly? And then "the indignities of Japanese rule." What are these indignities? The newspaper responsible for the statement laboured hard, some time ago, to prove that in Japan the police are entitled to enter a private house without a warrant, whenever they please. It was shown by direct reference to the laws that the assertion is utterly false; that the police have no competence to do anything of the kind. Such is the sole "indignity" that the mischief-making journal could discover: a purely imaginary trouble. It has clung to the falsehood ever since with pitiful persistence, and now it talks of "indignities," well knowing that it could not adduce so much as one solitary fact in proof of its pretence. The "pettiness" of Japanese law is a similar chimera. The laws of the country are excellent—the Criminal Code, the Code of Criminal Procedure, the Commercial Code, the Code of Civil Procedure, and the Civil Code. They are all founded on the best principles of Western jurisprudence. If they are petty, so are the laws of France; so are the laws of Belgium; so are the laws of Germany; so are the laws of Italy. Who is the magnificent *littérateur* in whose haughty eyes the legal systems of the most civilized States of Europe look petty? He is afraid, too, of the "exactions of Japan's numerous taxes." The direct taxes paid by Japanese subjects average 2.20 *yen* per head; average about four shillings and nine pence. What a cruel prospect for an Englishman; the subject of a country where the taxes average thirty shillings, or over 14 *yen* a

head; average nearly seven times the Japanese rate! British subjects in Japan have been living for thirty years in Japan, free from all direct taxation, except a land tax much smaller than that paid by their Japanese fellow-residents; a land tax which does not nearly suffice to repair the roads and police the Settlement. And now they are supposed to be whining about the impending "exactions" of a system seven times less onerous than the system obtaining in their own country! What wretchedly unreasonable folks Britishers are made out to be by such libellers! That is not the kind of men they are by any manner of means. The last touch of all is not the least foolish. "In a year we shall be smarting under tariffs aimed directly at the foreigner." No student of political economy is so ill-informed as to be ignorant that import duties come out of the pocket of the consumer. Nearly all the chief staples of import are destined solely for Japanese consumption, and among the minor staples not many can be found of which the Japanese themselves do not consume more than the foreign residents consume. Yet we are told that the raising of the duties is "aimed directly at foreigners." It is by such displays of giddiness, ignorance, and falsehood that local newspapers bring foreigners into ridicule and excite Japanese prejudice against them.

It appears that the fiction recently circulated as to a proposed trip westward by the editor of the *Japan Mail* within the course of the present year, has found credence, probably because we did not take the trouble to contradict it at the time. But to protect himself from further correspondence on the subject, and to save various applicants from disappointment, the editor begs to say that he has not, and never had, the remotest idea of leaving Japan this year.

Our correspondent, Mr. Woodworth, writes with indignation about what he calls "a man's being robbed of his wife." It is a strange story. The wife's father wanted to have the husband assume his family name. In other words, he wanted his son-in-law to become the legal representative of the wife's family. That is often a matter of great importance in Japan. The son-in-law refused, and the father-in-law, angered by his refusal, found an opportunity to abduct the wife and her two children, carrying them back to the paternal roof. Thus the son-in-law found himself wifeless and childless. Mr. Woodworth asks "what sort of savagery is this that allows a man to be thus robbed of his wife and family?" and "does it not seem high time that Japan should enact laws to guard the marriage relation?" Moreover, he calls the affair "a case of divorce." But surely Mr. Woodworth does not imagine that such doings are lawful in Japan! Surely he does not imagine that a father-in-law can obtain the sanction of the law to detain his son-in-law's wife against her will or to take possession of the son-in-law's children! The whole thing is just as illegal in Japan as it would be in England or America. Unless the woman is a consenting party, she can not be kept for so much as an hour away from her husband's house, and whether she be a consenting party or not, the husband is entitled to carry her back to his own home until she is separated from him by due process of law.

The husband has not divorced her. She is his wife, and simply by application to the nearest Court he can procure an order for her return to his home. As for divorce, there is no divorce in the question. The woman is not divorced unless her husband divorces her, or, a Court of Law grants her a divorce despite her husband's objections. The story told by our correspondent is the story of a most high-handed and utterly illegal act. It constitutes no reason whatever for "enacting laws to guard the marriage relation." Unless the son-in-law is a very silly and weak person, he can get back his wife and children at any moment.

The above remarks apply, in the main, to Mr. Woodworth's previous letter also. He there told us of a mother-in-law who, "by mere caprice, turned out a son-in-law (adopted into the family) and granted a divorce." But a mother-in-law has no power to grant a divorce. Only a husband, or a Court of Law, has that power. When a man has been adopted into a family for the purpose of marrying a daughter of the house and taking the family name, he can doubtless be put out again. Things can be made so unendurable for him that he has no choice but to go. Moreover, it is unlikely that a Japanese married by adoption would make any resolute resistance to leaving the house into which he had been adopted if his wife's family showed a strong desire to get him out. He would recognise their right to revoke the favour bestowed on him, and, of course, taking that view of the matter, he would consent to divorce his wife. But the wife's family could not divorce him against his will. They might separate him from his wife by putting him out of the family—which, indeed, would amount to practical divorce—but they could not legally divorce him.

Mr. Woodworth must not suppose that we are defending the marriage customs of Japan in the matter of divorce. It is so easy for a man of the lower orders to divorce his wife in their country, that the facility often leads to grave abuses. But the subject can not be discussed in that abrupt fashion. With regard to marriage as a means of adoption, the union itself is undoubtedly considered subordinate to its primary purposes, namely, the perpetuation of the wife's family name, and, in the great majority of cases, the continuance of the family business. If a son-in-law thus adopted into a household, prove himself unfit to represent the family or prosecute its business, he is turned out, and as the element of love never had anything to do with the arrangement, his wife is probably as willing to be divorced as he is to grant a divorce. But if she loved him, she could go out into the world with him despite any opposition offered by her parents. They could not obtain a divorce without the husband's consent, and the wife could appeal to the law against a divorce, if she pleased. Very seldom, however, do Japanese wives ask a Court of Law to preserve bonds that their husbands want to break. A Japanese woman does not think of making a man unhappy by living with him against his will, and making herself unhappy, too, for the matter of that. What does Mr. Woodworth recommend "in the case of an adopted son-in-law whose continued presence in a family would render the household miserable and, perhaps, destroy its prosperity? Does he think

that for the sake of preserving the sanctity of the marriage tie the happiness of several people and the fortunes of a family should be sacrificed? What does he recommend, also, in the case of a man and a woman of the lower orders who find that they have made a mistake in their matrimonial venture, and that they are totally unsuited to each other? Their marriage was an experiment from the outset. A very large proportion, probably 75 per cent., of the marriages contracted by the labouring, artisan, and petty tradesman in Japan are frankly regarded as experiments. The prime object is to have a happy and prosperous *menage*. If all hope of attaining that object disappears, there is an unemotional, matter-of-fact parting. A certain slur attaches to the failure, and the higher we ascend in the social scale, the greater the slur becomes. But since the dominant idea is to contrive a happy household, and since success can not be assured without trial, a trial is made. If we are right in this interpretation of marriage among the lower orders in Japan, our correspondent will perceive that the fundamental conception of the thing differs radically from the conception in England or America. There is no finality about the arrangement at first. It acquires finality when its fitness is established. We should greatly like to see the whole subject calmly and dispassionately discussed with due recognition of the Japanese standpoint. It is worthy of discussion. We have given it much thought, but remain with a desire for more light.

Prince George of Greece continues to be called the saviour of the Czarevitch on the occasion of the Otsu affair. Never was credit more wrongly bestowed. It amounts almost to a disgrace to the Prince that he never made the slightest attempt to disavow the action attributed to him. Indeed, we are by no means sure that he is not directly responsible for the falsehood. An interview represented him as showing his big stick, and describing how he warded off the blow aimed by Tsuda Sanzo at the head of the Czarevitch, and various journals took the matter up eulogistically, but Prince George did not so much as raise a finger to correct the error. Our readers know, of course, that he had nothing whatever to do with protecting his Imperial companion.

The terrible calamity brought to the notice of the public by Father Mayrand must evoke sincere sympathy, and we earnestly appeal to our readers for aid, as well as to our local contemporaries for coöperation. It is unnecessary to comment on the horror of nearly a whole town's destruction by fire, and on the loss that the Roman Catholic missionaries have suffered. Their sect, indeed, is not our sect, but their works are the glory of all Christians, for their grand self-abnegation and heroic devotion to the cause of moral progress stand high among the noblest records of the century.

"Citizen George Francis Train" once did us the honour of committing to memory a leading article from the columns of this journal on the traffic in salted salmon at the New Year in Tokyo, and delivering it as a speech of his own at a public dinner. There was some pleasure in observing that our periods, as spouted by the Citizen, were punctuat-

ed by the applause of his convivial audience, but, on the whole, we prefer not to be exploited in that fashion. A somewhat similar sentiment is suggested by a contribution that appears in the correspondence columns of *Tobacco Leaf*. We suggest to the correspondent that literary theft is not far removed from vulgar stealing, and that if he wants to take matter bodily from our columns, he must acknowledge the source, or pay the moral penalty. We have not seen his letter in its entirety, but the *London and China Express* publishes an extract, which suffices for purposes of comparison:—

Japan Daily Mail, Oct. 10th, 1896.

To the radical defects of the system must be added another of a scarcely less serious character. It might naturally have been supposed that, in organizing a monopoly, every possible precaution would have been adopted to prevent leakage of revenue, already a source of considerable loss under the present stamp-tax system. But we find, on the contrary, that one of the most vital safeguards is neglected. For anybody is allowed to buy leaf-tobacco from the Government, and of course to re-sell it, a wide gate being thus opened for illicit dealing and smuggling. The only persons debarred from purchasing are the growers, but it is easy to foresee that combinations of the simplest character between growers and non-growers will provide a ready route for evading the law. A grower may keep back a large part of his produce, acting in collusion with a non-grower, and the latter, having purchased a small quantity of leaf from an official store, will be in a position to incorporate it with the former's illicitly retained produce. These dangers might have been avoided by providing that no leaf should leave the Government's hands unless its immediate destination was a factory, but no such precaution seems to have occurred to the drafters of the scheme.

Correspondent of *Tobacco Leaf*, quoted by *London and China Express*, March 19th, 1897.

To the radical defects of the system must be added another of a scarcely less serious character. It might naturally have been supposed that, in organizing a monopoly, every possible precaution would have been adopted to prevent loss of revenue, already considerable under the present stamp-tax system. On the contrary, one of the most vital safeguards is neglected; for anybody is allowed to buy leaf tobacco from the Government, and of course to re-sell it, a wide gate being thus opened for illicit dealing and smuggling. The only persons debarred from purchasing are the growers, but combinations of the simplest character between growers and non-growers will provide a ready route for evading the law. A grower may keep back a large part of his produce, acting in collusion with a non-grower; and the latter, having purchased a small quantity of leaf from an official store, will be in a position to incorporate it with the former's illicitly retained produce. These dangers might have been avoided by providing that no leaf should leave the Government's hand unless its immediate destination was a factory, but no such precaution seems to have suggested itself to the framers of the new measure.

It appears that the battleship ordered by Japan at the Thames Ironworks, of which Captain J. M. James is the agent in Japan, will be the most powerful armour-clad yet constructed. *Engineering* gives the following account of it:—

The largest battleships in the English Navy are 14,900 tons in displacement, out of which 900 tons of coal being deducted, leaves only 14,000 tons for the weight of vessel, engine, equipment, and armament; whereas in the new Japanese vessel, with a displacement of 14,850 tons and coal-carrying capacity of 700 tons only, we have 14,150 tons for the weight of vessel, &c., which is 150 tons more weight in hull, engines, and armament than in the *Majestic* class. The dimensions of this vessel are as follows:—Length between perpendiculars, 400 ft.; over all, 438 ft.; breadth, 75 ft. 6 in.; draught of water, 27 ft. 3 in.; and displacement, with coal as above, 14,850 tons. The armour is to be made of Harveyed nickel steel and disposed as follows: the hull to have a belt from stem to stern, 9 in. thick all through engines, boiler, and magazine spaces, and 8 ft. 2 in. deep; tapering at the ends beyond from 7 in. in thickness to 4 in. Above this lower belt an additional belt of 6 in. armour is worked to the height of the main deck and for a length of 250 ft., which length incloses the two barbettes, and at each end of this space a curved transverse bulkhead is worked 24 in. in thickness from above the armour deck to the height of main deck, thus forming a complete citadel 250 ft. long. Above the main deck the barbettes, which are circular in form and protected by 14 in. armour, rise to a height of 4 ft. above the upper deck. Between the main and upper decks screen bulkheads are also worked, extending from the barbettes to the ship's side. Within the armour belt, rising up from the lower part of it to a height of about 3 ft. above the water line, is a complete armour deck extending

from stem to stern, 3 in. thick on the flat part, 5 in. thick on the slope, and tapering at ends.

The vessel is to be constructed on the usual system of double bottom, connecting to watertight flats at the ends of vessel, thus carrying the double bottom to the extreme ends. The barbettes are circular in plan, as stated above, and armoured with 14-in. armour, having teak backing 4 in. thick. Each barbette carries two 12-in. breechloading guns of 40 calibres, two guns being forward and two aft. The fourteen 6-in. quick-firing guns are also of 40 calibres, and are each placed in an armoured casemate of 6-in. Harveyed nickel steel. Eight casemates are placed on the main deck, and six on the upper deck are to be fitted with the usual dismounting and stowing gear. The casemates are made water-tight both on the inner and outer sides, by which means the men at the guns are protected from any explosive shells that might enter between decks, and this also prevents water entering between decks should the gun port get damaged. In addition to the above armament, there are twenty 12-pounder quick-firing guns placed on the upper deck, and eight 47-millimetre quick-firing guns on upper and main decks and in the military tops, also four 47-millimetre quick-firing guns on bridges and upper works. The torpedo armament consists of five 18-in. torpedo tubes, one in the stem above the water level and four submerged. The usual torpedo net defence will complete the defensive gear. The total complement of men and officers will be 741, including an admiral and 38 officers.

The propelling machinery will be supplied by Messrs. Humphrys, Tennant, and Co., of Deptford, and will be of 14,500 indicated horse-power; the boilers will be of the Belleville type. The main engines are triple expansion, driving twin screws, and have cylinders of the following dimensions: High pressure, 34 in.; intermediate, 53 in.; low pressure, 84 in.; stroke, 48 in. The boilers will be twenty-five in number, with a total heating surface of nearly 40,000 square feet. The speed of the vessel is to be not less than eighteen knots per hour. The electric light installation will consist of four sets of combined engines and dynamos, the latter the direct current type. Three sets will be of 400 amperes at 80 volts each, and one of 200 amperes at 80 volts. Six 24-in. searchlights of 20,000-candle power each, with some 200 incandescent lamps for lighting cabins, saloons, magazines, store rooms, engine and boiler rooms, coal bunkers, &c., will be provided, the incandescent lamps being of 16-candle power.

The steam steering-gear will be on Cameron's self-regulating principle, worked by steam steering engines in duplicate, in case of possible failure in one set, and the controlling gear is to be on Messrs. Brown's telemotor principle, controlling the helm from the pilot house, the bridge forward, the after pilot-house, and the bridge and steering compartments and from below the protective deck forward.

The boats carried will be fourteen in number, including two 56 ft. vedette boats, fitted with the Thames Ironworks water-tube boilers, one 42 feet launch, and one 30 feet steam pinnace. Each of these will carry Whitehead torpedoes, and be fitted for mining and countermining purposes. The vessel has been designed by Mr. Macklow in accordance with the views of the Japanese naval authorities, and a Naval Commission presided over by Captain Yendo, Japanese Naval Attaché in London, Captain Miyahara, and Captain Takayama, also of the Imperial Japanese Navy. The time for the completion of the vessel is twenty-three months.

Tokyo journals have been exceedingly outspoken about the evil conduct of the petty Japanese officials in Formosa. Our last Weekly Summary of the Vernacular Press embodied a strong article, in which it was pointed out that the junior ranks of officialdom in the new dominion were originally filled with men of three classes, namely, those totally unfit to serve in official capacities at home; those who had failed to make a livelihood in any business in Japan proper, and those who, obtaining posts entirely through favouritism, had gone to the island merely to earn money or to escape from their creditors. Things are mending now, but these unqualified and generally unprincipled persons have done much to impair their country's reputation. The Rev. Duncan Ferguson, of the Presbyterian Mission in Formosa, returned to England this spring, and gave some information to

Reuter's agent. He said, among other things:—

I repeat what I have said elsewhere, that Formosans have been reduced to their present condition through the brutal treatment of the Japanese. It is necessary to explain this. I have no doubt that the Mikado's Government means well by Formosa, and I would not say a word against any high Japanese officials there. For the most part they are men of integrity and intelligence. The difficulty is that their subordinates have too much power. In many cases these are men who could get no work at all in Japan. Among them are non-commissioned officers, soldiers, and coolies, and they seem to have been given, or to have arrogated to themselves, the power of life and death. The much-talked-of civilisation of the rank and file of the Japanese army is the thinnest veneer—a veneer which has worn very badly in Formosa. Things became so bad that in June last the whole of mid-Formosa was in rebellion. Although there was no state of war existing, the Japanese then burned between seventy and one hundred villages in Mid-Formosa, and hundreds of the inhabitants were killed in cold blood. Matters reached such a pitch that all the European community, including the British Consul, lodged a formal protest with the British Minister at Tokyo, and I am glad to say this has had some result on the Japanese soldiery. Deceived by the comparative quiet of the late autumn, the Japanese commanders are talking of sending one brigade of troops back to Japan. This will be a fatal mistake. The fire of insurrection that they have kindled is still smouldering, and instead of being centred in Mid-Formosa has now spread all over the island. The rebels have been rendered so desperate and suspicious that they do not understand their recent improved treatment by the Japanese, and the decrease of the Japanese troops among them would only be the further reprisals.

These utterances must, of course, be discounted. The evidence of other Europeans can not be entirely discredited. Doubtless the truth lies between the two. But even then it is bad enough, and we are glad to think that such excesses are things of the past. As for the protest said to have been lodged with the British Minister in Tokyo, we hear of it for the first time from Mr. Ferguson.

JAPAN AT THE PARIS EXHIBITION OF 1900.

The Commission appointed in connection with the Paris Exhibition of 1900 met on the 26th April, the chair being taken by Mr. Murata Tamotsu in the absence of Baron Kuki, Vice-President. Count Okuma, acting Minister of Agriculture and Commerce, appeared in the capacity of President, and addressed the meeting. His Excellency said that the art products of Japan had always attracted foreign attention, and that, since her victorious war, her manufactures also had begun to attain considerable reputation. It was essential that energetic steps should be taken to bring the country's works to the notice of foreign buyers, and an opportunity so excellent as the French Exhibition of 1900 must not be neglected. The people would then have a chance of showing whether they had really progressed in art, and what special features their manufactures had developed. At the Chicago World's Fair, a few years ago, Japanese works of art appeared to have failed to attain the hoped-for results, and owing to the discouraging effect of the failure, a certain measure of indifference was noticeable on the part of art artisans on the present occasion. But it must be remembered that the Chicago Exhibition had taken place before the war with China, and that Japan's name now sounded very differently in the ears of Western peoples. In order to encourage worthy effort, if, indeed, further encouragement was needed, the Department purposed elaborating a system of prizes and other incentives.

KOREAN NEWS.

The custom of receiving *douceurs* from men that aspire to obtain official appointments has been in vogue in Korea from time immemorial, but does not work as well now as it did in old days. A certain Ye Yong-ik took money from no less than forty would-be magistrates, but failed to procure appointments for more than five. Importuned by the others, he tried to have them employed as the King's bodyguards, but was again unsuccessful. Finally he found his way before the Supreme Court, and is now undergoing a sentence of 10 years' banishment. No one seems to have thought that the provincials who attempted to purchase official posts were to blame, from which we infer that there remains still something of the good old times in Korea.

Quis custodiet is a question that must often perplex the King of Korea, if he allows himself to be perplexed by administrative problems. He sent three secret inspectors to the southern provinces to report upon the doings of the local governors, and now the Prime Minister has advised that the inspectors be recalled and the governors ordered to report upon their doings.

This Prime Minister Kim Pyeng-si is indeed a *rara avis*. A certain measure of ridicule has come to attach to him, so iterated and re-iterated have been his resignations. But having at last made up his mind to remain at the head of the Cabinet, he is behaving with unprecedented candour. The memorial addressed by him to the Throne, advising the recall of the secret inspectors, contains also three other pieces of advice, couched in language which suggests that His Excellency Kim has a gift of sarcasm as well as of integrity. The *Söul Independent* translates the proposals thus:—

(2) The officers of the Army are different from other officials of the Government as they must understand military tactics, the working of the army, and must possess a certain amount of military training and education. A man cannot possess these qualifications unless he is trained and taught especially for this branch of the Government service. It is often necessary to appoint the officers from the ranks on account of their qualifications. But of late the officers of the army have been dismissed in large numbers and others have been appointed in their places, who have no training whatever in military lines. The dismissed officers were not desirable as army officers, but they have all been trained about three years in military life. Therefore they are far superior to the new ones in every respect. Such wholesale dismissal of army officers without cause will produce ill-feeling among them and certainly will weaken the effectiveness of the army. I pray Your Majesty will not dismiss any more of the better trained officers without a necessary cause.

(3) A Government can not maintain its dignity and purity without having a system in making civil appointments. The country has been shocked and surprised to see every day in the Government Gazette the number of appointments of *chusas* in the Privy Council. Three *chusas* have been appointed every day for the last three months for one vacancy in the Privy Council. This matter has caused various gossip among the people and rumours of selling and buying of the rank circulate everywhere. I humbly believe the Acting President of the Privy Council is responsible for this state of affairs, therefore he must be reprimanded by Your Majesty for abuse of his privileges and trust.

(4) The affairs in the interior are in such a state that bands of highwaymen and pirates reign supreme on land and sea. It is the duty of the Government to pacify the interior with every possible means that are at the disposal of the Government. It will be advisable in my humble opinion, to order the commanders of the troops now stationed at various places in the interior to make regular tours of the troubled districts and protect the people from further robbery and murder."

The apparent naivete of the dictum that an officer of the army ought to know something about military affairs, is as pretty as the covert implication that really no such necessity exists in the case of an ordinary official. The King is said to have passed over this military matter in silence, but to have promised to adopt the second and third suggestions.

A "Store of Royal Coffins" is a strange department of a King's household, but there can be no doubt about its importance when it has a Prime Minister for General Superintendent, three Ministers for Superintendents, and three clerks, all of considerable official rank. That is the case with the Royal Coffin Store in Korea. But it should be remembered that a first-class coffin takes two or three years to construct in China and Korea. When the ex-Viceroy Li travelled to Europe in company with his coffin, he adopted a precaution very intelligible to his own nationals, however strange it may have seemed to outsiders.

The *Independent* continues to be horribly troublesome to speculating officials. An unfortunate magistrate at Suksung had been comfortably selling blank census forms for 3 cents each above the proper figure, when he suddenly found his humble occupation denounced in the prying paper. At once he summoned the headman of the wronged towns, tendered an apology, and restored the 3 cents.

A year ago the Japanese Society for the Extension of Education sent five representatives to Korea, who organized, at the Society's charges, a school called the *Keijo Gakko*. On the 11th of April the School celebrated its first anniversary. It has now 85 students. They are instructed in history, arithmetic, geography, the Japanese language, and other branches of primary education, and two Japanese non-commissioned officers teach them drill and gymnastics. Such institutions will do more to render Japan popular in Korea than all the efforts of diplomacy can effect.

Korea seems to be in a disturbed condition. In three copies of the *Independent*, covering an interval from April 13th to April 17th, we find reports from five different parts of the country describing serious outrages committed by bands of robbers, and in Samsu the "Righteous Army" is declared to be carrying things with a high hand. It had killed the magistrate, seized the official buildings, stores, and arsenals, placed cannon in position at the gates, and was completely master of the town at the date of latest advices. Associated with these raiders were some 80 Chinese soldiers or brigands, and 300 more of the same class were expected to arrive shortly.

If we may credit the *Chuo Shimbun* a disturbance that may have untoward consequences occurred on the 17th ultimo, apparently at Chemulpo. The cook of a Russian warship, a Frenchman, is said to have put down fifty *sen* for some fish offered for sale by a Korean. The latter was unwilling to sell the fish for so little, and in trying to recover them from the cook, who had seized them, received some kicks and blows. The Korean bystanders became excited over the outrage, and some kind of fracas ensued, in the course of which the cook got possession of a police-

man's sword and inflicted a severe wound on one of the Koreans. Thus far the story is coherent, but we now suddenly find Japanese constables acting as mediators between the Korean Inspector of police and the Captain of the Russian ship, and the latter is represented as sending a despatch to the Inspector, intimating that the French law-breaker would be dealt with in accordance with whatever directions might be received from the French Consul-General in Söul after consultation with the Korean Government. Of course neither the French Consul-General nor the Korean Government could have any voice in controlling the punishment inflicted on a man serving in a Russian ship. That part of the tale is manifestly absurd. It is added that the Russian captain and the Korean Inspector of Police conveyed to the Japanese Consul courteous acknowledgments of the trouble he had taken, though what he had to do with the matter we fail to see. The Koreans in Chemulpo, however, are said to be planning violent demonstrations should the wounded man die. It is a most mixed narrative.

Some special information from Fusan published in the *Osaka Asahi*, announces that the Korean Government recently transported considerable quantities of telegraphic wires and other materials to Wön-san for the purpose of connecting the Russian and Söul lines.

The leader of the rebels that destroyed the Japanese telegraphic wires and plundered the property of people in Kyong-san-do and other provinces, fled, at the time of his overthrow, to China, but having lately joined a band of gypsies, he returned to Korea. He then murdered the Governor of Sam-sui and quickly recovered power. Owing to a quarrel with his comrades about the division of some plunder, he lost influence and then hid himself. Another revolt, however, is reported to have occurred in the central part of Chhung-chiong-do and the entire district of Chol-la-do, under his guidance. The Governor and his son have been butchered.

As regards trade affairs, the transport of rice from Chol-la-do and Chhung-chiong-do is steadily increasing, and values are rapidly rising under the influence of high quotations in the Osaka market. Considerable business has been done in ox-hides during the past month, but as there were no fresh arrivals lately trade has proportionately slackened. The most important articles of import are bleached cotton fabrics. These are now sold in coarser varieties, ranging in price from two or three *sen* to one *yen* per *tan*; the finer ones are valued at from one *yen* to one *yen* twenty *sen* per *tan*.

THE WHEELBARROW QUESTION IN SHANGHAI.

The Shanghai Ratepayers' Meeting, convened to consider the action of the Municipal Council in postponing the imposition of an additional tax on wheelbarrows, came off on the 21st of April. Mr. Probst, Chairman of the Council, offered an explanation, the gist of which was contained in the following part of his speech:—

The Taotai asked for various concessions and settlements which were all declined, and after much deliberation, it was resolved to meet him so far as to defer the date of increase of tax, provided he issued an official undertaking to enforce the same on a given date. It was therefore resolved to reply that the Taotai must issue a proclamation to the wheelbarrowmen ordering them to obey the Municipal Council, owing to whose clemency and consideration the increased payment would be deferred until the 1st of July, but in such terms as would render him responsible for any further disturbance, and that unless we received his assent to these terms by 10.30 a.m. next day he must

take the consequences. The reasons for this course were obvious; such a settlement once and for all binds the Taotai and prevents any legal quibbles; it is an acknowledgment of our powers to tax, which had been successfully questioned in previous years, and it put an end to further disturbances which might have been very serious. At 30.30 a.m. the Vice-Chairman and I attended the meeting of Consuls and learned that the ultimatum of the previous night had been accepted. Now, Mr. Chairman, ladies and gentlemen, as the matter stands, the Taotai has entered into an agreement from which the Consular Body will not allow him to recede; on the other hand disturbances have been controlled and averted and the position of the Municipal Council in respect to the collection of the tax has been assured. We have waived no principle, but we have attained an indisputable right. Moreover, we have thereby obtained from the highest Chinese official the very assent which was wanting in 1886, the want of which caused the Council at that time to abandon the increase of the same tax, notwithstanding that it had been passed at a Ratepayers' Meeting.

With this explanation the meeting, at which 265 ratepayers were present, showed strong signs of dissatisfaction, and passed, almost unanimously, the following resolution, proposed by Mr. R. M. Campbell:—

That this Meeting of Ratepayers, having heard the explanation of the Council, desires to express the most profound regret that the Council should have so far disregarded the interests and dignity of the community, which they were elected to represent, as to agree to the compromise which has been effected. But, the Consuls having, in good faith, at the request of the Council, entered into an arrangement with the Chinese officials, this Meeting now gives the authority necessary to carry that arrangement into effect.

Immediately on the adoption of the above resolution, the Municipal Council resigned in a body. One point more deserves to be noticed. Our readers probably remember the action attributed to the Consuls, namely, that they had brought pressure to bear on the Council, and had threatened the withdrawal of the naval forces unless the Taotai's requests were complied with. We expressed doubts as to the correctness of that story, and the following quotation from Mr. Campbell's speech shows that our doubts were well founded:—

Now, I have to vindicate myself for having made an attack upon the Consuls at the last meeting in this hall. On that occasion I did not make any attack whatever upon the Municipal Council, because I believed, wrongly, as I now know—I was acting under a misapprehension—that the Consuls were entirely to blame for the state of affairs. I had been told by the Chairman of the China Association, Mr. Dudgeon, by Mr. Skot-towe, who is a member of the China Association Committee, by Mr. Wright, who is a member of the China Association Committee, by Mr. Hewitt, who is a member of the China Association Committee, that at a Committee meeting of that body, of which Mr. Probst and Mr. Alford are also members, they had given them to understand that the Consuls had used such pressure upon them that they found it irresistible, and they had also been given to understand that it had been hinted that the assistance of the men-of-war might be withdrawn from us. That was my foundation for having made that statement. I have been told that it is untrue and that I blamed the Consuls unnecessarily; if I make a mistake I was under a greater misapprehension. I made a mistake, and I am not ashamed to say that I apologise to all the Consuls in Shanghai and regret that I made it.—(Applause.) What I do blame the Consuls for most distinctly is that they are gentlemen who by profession are politicians or judges, or at all event whose minds are so abstracted from the cares of everyday life that they are able, or ought to be able, to take a wide grasp of the affairs that come under their notice.

The new buildings of the French Legation, Idamachi, Kojimachi-ku, having been completed, a grand ball will given there on the 14th of May to which the various Foreign Representatives in Tokyo and others, as well as high Japanese officials, are to be invited:

SYLVESTER.

Thirty-five years ago John Joseph Sylvester, whose death has just been announced, was the principal Professor of Mathematics at the Royal Military Academy of Woolwich. Already he had gained a high reputation as a pure Mathematician, among his achievements being one of a particularly striking character, namely, the demonstration of a theorem enunciated, but not proved, by Newton. More than one mathematician of note—Maclaurin and Taylor, whose names are familiar to every student of the differential calculus; Todhunter, the prince of text-book writers, and even Hamilton of quaternion fame—had essayed to demonstrate the immortal Sir Isaac's casual problem and had failed. Sylvester not only demonstrated it, but demonstrated also a wider proposition of which it became a corollary. Newton himself had not omitted the proof by way of challenging the ability of his contemporaries or successors. Such frivolities never found favour with the greatest of philosophers. If a problem were proposed for solution, his keen love of mathematics led him to solve it—witness Bernoulli's two problems, which, after they had puzzled all continental Europe for six months, were solved by Newton in one afternoon—but he worshipped science too reverently to pervert it into an instrument for testing rival abilities. Sylvester was a man of the same type. He lived, moved, and had his being in mathematics. A professorship in a military college was eminently unsuited to his disposition, for to extreme shyness—shyness that drove him to fly up alleys and round corners rather than encounter cadets outside the lecture-hall—he added an abiding tendency to lose himself in calculations, so that the students, by whom the symptoms presaging these descents into the abysses of thought soon became infallibly recognisable, used to take advantage of the philosopher's fits of abstraction, and pervert the class-room into a pandemonium. Sylvester never succeeded in checking these breaches of discipline, for his return to vulgar life from the empyrean of brachistochrones and osculating planes was always capable of timely detection, and before he had collected his five wits sufficiently to identify his tormentors, perfect peace would reign around him. He could scarcely be called a good teacher in those days, for stupidity repelled him—shocked would perhaps be a truer expression, for of intolerance he had none. It was rather that he could see nothing from the point of view of dull eyes, nor endure to rob a demonstration of its beauty for the sake of making it plain. Yet, though the cadets did not often seek to climb to his solitary heights of philosophic grandeur, and though they were never loath to play upon his moods, they recognised and respected his genius, and many a white-haired officer of Artillery or Engineers will have heard with profound pain of the death of this modern giant of research. How remote was the intellectual existence of such a man from the vulgar crowd's life of toil and toil; how little he had in common with his fellows, and how strange it seems that the splendid processes of such a brain should be numbed for ever by the malevolence of some blindly working bacillus!

THE TOBACCO MONOPOLY.

We hereby sanction the official organization of Stations for the Monopoly of Leaf Tobacco. (Imperial Sign Manual and Great Seal.)

April 21st of the 30th year of Meiji.
(Countersigned) Count Kuroda Kiyotaka,
President of the Privy Council,
Acting Minister President
of State.

Count Matsukata Masayoshi,
Minister of State for Finance.

IMPERIAL ORDINANCE No. 121.

The following system of official organization with regard to Stations for the Monopoly of Leaf Tobacco shall be observed.

Art. I.—In order to conduct affairs relating to the inspection, collection, preservation, and sale of leaf tobacco, special offices shall be established under the name of "Leaf Tobacco Selling Stations," subject to the control of the Minister of Finance.

Art. II.—In districts under the jurisdiction of the Leaf Tobacco Selling Stations, branches shall be established, if necessary, as indicated by the Minister of Finance, with a view to conducting details of business appertaining to the former.

Art. III.—The following functionaries shall be appointed for Leaf Tobacco Selling Stations:—

1. Director.

Directors of first-class Stations shall be of *Seinin* rank; those of second-class Stations, of *Hannin* rank.

2. Clerks, of *Hannin* rank.

3. *Gishu* (Experts).

Directors of Branch Stations shall be appointed from among the Clerks of principal Stations.

Art. IV.—Directors of Leaf Tobacco Selling Stations shall, under the direction and control of the Minister of Finance, superintend affairs relating to the inspection, collection, preservation, and sale of leaf tobacco.

Art. V.—Directors of branch stations shall transact minor details of similar business.

Art. VI.—Clerks shall, under the direction of the principal officers, be engaged in the inspection, receipt or delivery of leaf tobacco, and other miscellaneous affairs of the station.

Art. VII.—*Gishu*, or Experts, shall, under the instructions of the principal officer, perform the duty of judging the quality of tobacco and preserving the same.

Art. VIII.—The fixed number of officials shall be 32 Directors for 1st class Stations; 29 Directors for 2nd class Stations, 1,500 Clerks, and 440 Experts.

Art. IX.—The name, grade, and position of stations shall be in accordance with the following table, and the limits of their jurisdiction shall be determined by the Minister of Finance:—
(The table shows the number of Stations to be sixty-one throughout the country).

KIUSHIU COAL.

A short time ago coal rose to an excessive price, says the *Shogyo Shimpu*, but no serious fluctuations have occurred during the past few weeks, and Chikuzen and Buzen coal seems to have increased in output in view of the growing activity in the market.

The amount of Kiushiu coal produced in March during the past four years is as follows:—

27th year of Meiji (1894).....	278,457,850 catty.
28th do (1895).....	308,592,591 do
29th do (1896).....	354,085,041 do
30th do (1897).....	385,067,614 do

The March output this year shows an increase of nearly sixty per cent. A certain gentleman, who lately returned from a tour through the coal districts of Kiushiu, remarks that should coal continue at its present price, the markets west of Hongkong will probably be captured by Australian coal. A decrease in exports must therefore be expected, and an excess of supply for home consumption will be the immediate result.

JAPANESE SECURITIES.

THE journalistic attacks upon Count MATSUKATA'S gold-monometallic policy continue. Opposition papers invite the public to believe that the Minister of Finance expected the market price of Consols and other State securities to ascend by leaps and bounds so soon as Japan's adoption of the single gold standard became known, and inasmuch as no such ascent has taken place, they pronounce the policy a failure. These critics go so far as to state the exact figure at which the Minister of Finance looked to sell five-per-cent. Consols, namely 120 *yen*, and allege that he can not obtain more than 105. All that sounds singular. In the first place, Count MATSUKATA must have known, and certainly did know, perfectly well that the market price of Consols and other public securities would not rise in Japan until an impetus was imparted from abroad, and nothing of that kind could be anticipated immediately. Japanese Consols were first issued in 1886 and began to be redeemed in 1891. The redemption is to be completed by 1936. Speaking roughly, there are 175 million *yen* worth of these bonds now issued, and only 39 years of the total redemption period remain. Such securities will never be considered a really favourable investment by foreign capitalists. Japan's system of finance is distinctly faulty in that respect. No hard and fast conditions should be prescribed for the repayment of a domestic loan. In the case of a foreign loan conditions may be unavoidable, but the liquidation of a domestic loan ought to proceed solely in accordance with the convenience of the national finances, and instead of condemning holders of scrip to the risk of having their money thrown back upon their hands at any moment, redemption should be effected by purchasing in the open market whatever bonds are offered for sale. Were Japanese Consols regulated in accordance with that method, there can not be the least doubt that they would soon command a high price in the market, for multitudes of capitalists in Europe are eager to find investments paying five per cent., and secured by credit such as the Japanese Government enjoys. We have dwelt upon that point frequently in the past and need not elaborate it now. All leading Japanese financiers understand it thoroughly, but strong reluctance is apparently felt to making any alteration in the conditions under which the State's loans have hitherto been floated. It seems to be thought that the national honour is concerned in adhering steadfastly to the programme originally announced. There is more of romance than of sense in such an idea. If the Treasury proceeded with the redemption of the public debts at the same rate as of old, but instead of determining by lot the bonds to be

redeemed, purchased them in the open market, no creditor could possibly complain of a breach of faith. Indeed, were the truth known, bond-holders would welcome the change. If they want to convert their bonds into cash, they can do so at any moment. The last thing that they desire is to see the numbers of their Consols included in the redemption list after the annual drawing. It is certain, however, that securities liable to redemption at any moment will never really attract European investors. The Treasury is already invested with competence to purchase bonds at its own discretion for the purpose of reducing the national debt. It might very well abandon altogether the system of lots. Then, not till then, will foreign capitalists begin to bid keenly for Japanese public securities. Allusion may be made here to another theory that seems to prevail somewhat widely; the theory that the price of State securities is prevented from rising by apprehensions of conversion. There is an evident contradiction involved in the idea. Appreciation of market price is the first essential preliminary to conversion. Until five-per-cent. Consols cost so much that they give a return of only 4 per cent. to an investor—in other words, until they rise to the neighbourhood of 125—it would be vain to ask their holders to exchange them for four-per-cent securities at par. No one can suspect the Finance Minister of intending to ask the Diet's permission, or the Diet of being prepared to grant permission, for such an act of repudiation as would be involved in substituting four-per-cent., or three-and-a-half-per-cent., bonds for five-per-cent. Consols now selling at a slight discount. There need be no fear of anything of that kind. By-and-by Consols will climb upwards to a certain extent, and the moment that a demand for them begins abroad, their value at home will be affected. But the process will be very gradual. They can be bought in Tokyo at present for 99.50 *yen*. Why should a foreign investor purchase direct from the Treasury at 102 or 103? Sales will have to be made at first on terms very close to those ruling in the domestic market. We do not believe that Count MATSUKATA has been offered 105 by any Western capitalist, unless the transaction is on such a scale that its management by private purchase would be scarcely possible. Still less do we believe that if His Excellency had received a *bond-fide* offer of the kind, he would have refused it, or Consols would continue to be quoted at 99½ in Tokyo. All the talk about the Finance Minister's troubles, and about the failure of his gold-standard scheme, is purely political. Let the experiment be tried of offering the bonds of the Industrial Undertakings Loan without any conditions as to compulsory redemption, and we venture to predict that they will very soon be selling in London and Paris at 125.

KOREAN AFFAIRS.

FROM the writing in the vernacular press, it would appear certain that the Korean Government has entered into negotiations for employing a Russian *mission militaire* of very large dimensions—one hundred and sixty-eight of all ranks is the number mentioned. The uses to which this considerable contingent is to be put are not definitely mentioned, but it is understood that they would be distributed throughout the provinces for the purpose of training the army of the little Kingdom. Our own information bears out the correctness of the rumour, but indicates that nothing definite has yet been arranged. No agreement has been actually signed, nor is it certain that either the Korean or the Russian Government will endorse the project. In Korea a strong party, including the KING himself, are understood to be in opposition, and probably a little pressure from without will turn the scale in favour of greater circumspection. There is, of course, a powerful pro-Russian clique in Korea. There always has been a pro-something clique, except a genuine pro-Korean clique. The idiosyncrasy of the peninsular people seems to be permanent want of confidence in their own ability, and an abiding tendency to look abroad for aid. It may be, too, that the astounding discovery of a surplus in the Treasury has produced delirious consequences. Owing to abundant harvests and to the clever management of the Government's English financial adviser, the Koreans have suddenly found the national purse full, and we know the old aphorism about the equestrian beggar. To maintain and remunerate a hundred and sixty-eight Russians of all ranks would cost three hundred thousand dollars a year, approximately. If Korea's first experience of easier monetary circumstances impels her to launch into such extravagances she ought to be incontinently placed under tutelage. On the other hand, it is difficult to believe that the Russian Government would consent to the proposal. There would be a distinct violation of the spirit, if not of the text, of the YAMAGATA-LOBANOF Convention, signed at Moscow on the 28th of June, 1896. The second Article of that Convention reads:—"So far as Korea's finances and economy permit, the two Governments of Japan and Russia shall leave Korea to organize, by means of her own nationals and without recourse to foreign aid, such a force of military and police as shall be deemed sufficient for preserving order within her dominions, and shall also leave her to maintain them." It is quite plain that the above article does not refer merely to the composition of Korea's military and police forces. The words, "by means of her own nationals and without recourse to foreign aid," can not be intelligently interpreted except in the

sense, first, that the two forces are to be composed entirely of Korean subjects, and secondly, that their organization and training are to be carried out by Koreans. Were Russia herself required to construe the Article under circumstances similar to those now confronting Japanese statesmen, there can not be the least doubt that she would render it in the sense here indicated. Further, if the question offered any room for uncertainty, a recourse is provided by the same Convention. The last Article says:—"If it be deemed advisable that a more detailed or exact explanation should be formulated on the above points, or if other matters requiring conference present themselves subsequently, Representatives of the two Powers shall be accredited to negotiate in a spirit of friendship." The plain intention of this Article is to ensure that Russia and Japan shall maintain towards each other in Korea an attitude of amicable coöperation, and most assuredly that intention would be frustrated were the Russian Government to lend itself to the project now on foot. When Japan, with a degree of energy and earnestness never exhibited by Korea, and with command of resources practically unlimited so far as her immediate purpose was concerned, applied herself to the task of organising and training an army of three hundred thousand men after the Occidental system, her most impetuous enthusiasts did not dream of employing a hundred and sixty-eight foreigners as instructors in strategy and tactics. At no time had she as many as a score in her service. Yet Korea, with a paltry army of forty or fifty thousand men, thinks of having a *mission militaire* seventeen times as numerous as Japan's. The significance of such a programme can not have escaped the Russian Government. They must perceive quite plainly that to endorse it would be to depart flagrantly from the spirit, and, in our opinion, from the text, of the Moscow Convention. The proposed *mission* is altogether too large to be credited with the innocent purpose of mere instruction. That Russia entertains sinister designs, we do not for a moment mean to suggest. In fact, we write on the supposition—almost a certainty, it may be hoped—that the wild scheme will not be sanctioned at Moscow. It would produce a very evil impression on the Japanese nation, and would seriously impair Japan's confidence in the Northern Empire's manner of observing Conventions. Russia is too prudent and too careful of her pledges to lend herself to a proceeding fraught with immediately injurious results and not redeemed by any promise of commensurate advantages. She is probably not a little embarrassed by the giddiness of her partisans in Korea; giddiness that quartered the KING upon her for an unconscionable time, and now seeks to involve her in an arrangement plainly precipitate and unwise.

FRESH PERVERSIONS OF THE TRUTH.

IT becomes again necessary to expose the *Japan Gazette's* blunders. There is no occasion, we trust, to premise that we undertake the task not for the sake of gaining any controversial advantage, but simply because the matters in question possess public interest, and deserve to be guarded against mischievously false interpretation.

The *Japan Gazette* says:—"All the practical advantages Englishmen will enjoy, under the Revised Treaty were obtained by the wise provisions insisted upon by other Powers. * * * England's sagacious representatives neglected the question of the land. * * * The English officials, dressed in a little brief authority, acted with supercilious indifference to the claims of the men whose future they were directing. All representations from Yokohama were contemptuously ignored. Fortunately other nations did not exhibit the same disdain of the interests of their nationals. Germany was the first to make substantial alterations, the great point gained being an improvement in the conditions of land tenure." We need not say anything about the spirit of this writing, or its reckless endeavour to rouse public prejudice against the action of British officials. The facts alone concern us. Is it true that "all representations from Yokohama were contemptuously ignored?" Is it true that "England's sagacious representatives ignored the question of the land?" Is it true that "Germany was the first to make substantial alterations," and that "the great point gained by her was an improvement in the conditions of land tenure?" Every one of these assertions is absolutely untrue. The principal residents of Yokohama knew well that they were individually and collectively consulted over and over again by the various British Representatives in Tokyo with reference to Treaty Revision, and that their views never failed to receive due and courteous consideration. The resolutions adopted by the celebrated public meeting of Sept. 11th, 1890, did not obtain the endorsement of Her Majesty's Government, but we know from official publications that the meeting acted under a complete misapprehension of the situation, and we know that its resolutions, if obeyed by the Secretary of State for Foreign Affairs, would have necessitated the permanent shelving of Treaty Revision, a result which the promoters of the meeting subsequently disavowed all intention of seeking to compass. Passing from that point to the allegation that the British negotiators "ignored the question of the land," reference to the third Article of the British Revised Treaty shows this provision:—"The subjects of each of the High Contracting Parties may trade in any part of the

dominions or possessions of the other * * * and may there own or hire and occupy the houses, manufactories, warehouses, shops, and premises which may be necessary for them, and *lease land for residential and commercial purposes*, conforming themselves to the law, police, and customs regulations of the country, like native subjects." We have it, therefore, in black on white that the British negotiators secured for their nationals whatever privileges of land-leasing were sanctioned by Japanese law. How did Germany improve upon that? We are informed that she, "not exhibiting the same disdain of the interests of her nationals" as Great Britain had exhibited, "was the first to make substantial alterations, the great point gained being an improvement in the conditions of land tenure." Did she make any alterations? Not the most shadowy. Did she secure "an improvement in the conditions of land tenure"? Not the smallest. All that she did was to embody in her Treaty certain provision of Japanese law the benefit of which had already been secured to British subjects. It may be urged that the British negotiators ought to have been equally explicit; that instead of being content with a general pledge, they should have inserted details. They could not. The portions of the Japanese Civil Code covering the question of land tenure did not receive the approval of the Japanese Diet until 1895 and the British Treaty was signed in 1894. There was no uncertainty as to the form that the Code would take. It had been published in 1891, and the revisions subsequently effected were all ready for the Diet's approval in 1894. But until the Code actually became law, no detailed reference to its provisions could be made in a Treaty. The German negotiators, on the other hand, had the promulgated Code before them, and were thus able to embody in their Treaty the provision of Japanese law relating to "superficiaries." That was all that they did. They did not extend by one hair's breadth the privileges of land tenure already secured by the British Treaty. Had there never been such a thing as a German Treaty, British subjects in Japan would still be able to look forward to conditions of land tenure precisely the same as they have now to anticipate. So much for the ignorant and reckless assertions that "Germany was the first to make substantial alterations," and that "the great point gained by her was an improvement in the conditions of land tenure."

The same journal in the same article proceeds thus:—

But it is France that we have to thank for the most important concession. The Treaty tentatively signed by M. Hanotaux was not constructively dissimilar to the English. Happily M. Hanotaux did not have the last word. The Treaty was laid before the Senate and the Senate referred it to a Special Committee. The Committee with a wisdom that might put Downing Street to the blush, did not understand why Japanese should be given the right to hold land in France if the French

were not permitted to own land in Japan, and accordingly decided to have nothing to do with the Treaty unless the right were conferred. Count Okuma, whose liberal views once nearly cost him his life, judiciously yielded the point, so that thanks to a wise discrimination in Paris and an astute statesman in Tokyo one of the worst drawbacks to the new Treaties is about to be removed. It is no credit to the English officials that what London could not effect Paris had only to ask to receive.

As to these statements, they are on a par with what precedes them. No such demand has been made by France or conceded by Count OKUMA. That is all that need be said. The *Japan Gazette's* allegation is pure fiction, and its comments about Downing Street's blushes and the discredit of English officials have no more basis than its own falsehoods. The Franco-Japanese Revised Treaty has not even been presented as yet to the French Chambers; the Committee of the Senate has not formulated any proposal about land tenure; Count OKUMA has not been invited to make any departure from the terms already concluded, and the *deus-ex-machina* doings attributed to France are figments of the *Japan Gazette's* imagination.

TRADE AND COMMERCE.

According to a speech delivered by Count Okuma, acting Minister of Agriculture and Commerce, it seems that he recognizes the injurious influence that Department exercises at present. But he is a man of theory, not of practice, remarks the *Nippon*. He might be able to render meritorious services in the adjustment of theoretical complications, but it is very apparent that he would bungle practical matters. While pledging himself to reform the Department, he has suddenly altered the regulations for official service, for the sole purpose of appointing a renegade Buddhist priest to the Directorship of the Mining Bureau. When the eccentricity of Count Okuma is coupled with the arrogance of the Vice-Minister, the proposed reforms will be as impracticable as an attempt to cross the northern ocean without a boat. The *Nippon* is nothing if not outspoken. It does not like the new Head of the Mining Bureau, that is evident. Otherwise it would not commit the folly of referring to his sacerdotal antecedents as a disqualification for office.

At the Industrial Council held at the Agricultural and Commercial Department the other day, says the *Nippon*, the subjects debated were as follow:—

1. The condition of adulterated fertilizers and the best method for their control.
 2. Whether legal changes are required in consequence of the results attained by the establishment of a Fishing Corporation, or the reorganization, or further regulation, of such corporation.
 3. On the necessity of promulgating or altering laws and regulations, or adopting other measures, according to local conditions, in regard to the development of industry and commerce.
 4. The best methods of promoting forestry.
 5. Number of forests included in the corporate property of each City, Town, or District, and the method of superintendence.
 6. The control of public forests.
 7. Schemes for decreasing the area of scorched fields.
 8. Plans for issuing speedy reports on commercial matters in regard to staples of exports, or of articles for internal consumption in various parts of the Empire.
 9. How samples for articles of export can most speedily be collected for exhibition.
- With regard to the debates, our contemporary remarks that excessive attention has been

directed to problems of marine products and forestry, to the utter disregard of agriculture. Questions relating to forests might more properly be submitted to the Council of the Superintendents of Divisional Forest Offices.

Turning to the Greco-Turkish war, the *Nippon* remarks that the prolongation of the fight will have no small effect upon European and American industries and commerce, as well as upon the foreign trade of Japan. Yet the strong Powers of Europe may bring the war to a close more speedily than is at present anticipated. A telegram from London at the outset of the campaign announced a big appreciation in the prices of commodities; but this news was soon followed by a telegram stating that there really were no extraordinary fluctuations in the markets.

Reports from a branch in America of the Central Tea Dealers' Corporation, contain the following remarks:—Tea dealers in Japan never imagined that the export of inferior tea was beneficial to the country, and were constantly taking pains to improve the quality of the commodity. Nevertheless, the merchants of Kobe and Yokohama devoted their energies to purchasing inferior teas, and exported them to a considerable amount. Under those circumstances, the sales of spurious teas were increased at the expense of superior leaf. A hundred catties of excellent quality tea, which formerly fetched forty *yen*, have now fallen to thirty-five *yen*; whereas inferior teas of fifteen *yen* have risen to eighteen *yen*. Profits are, indeed, irresistible allurements to men. Everybody tries to gain as much as he can at the least possible cost. Exertions thus being devoted to the manufacture of inferior quality tea, the annual export soon exceeded demand. As a natural consequence, the American markets were glutted with old tea at the beginning of the new tea season, and consumers were thus unable to obtain a fresh supply. It is this circumstance that has aroused aversion to Japanese tea among American customers. Last year, the tea market of the States presented an extraordinary apathy unknown in former times, and drastic steps have been taken to prohibit the import of third pickings. Should the present restriction law lead to the prevention of the export of poor teas to America, tea growers in Japan will be roused from their torpor, and great advantages will accrue to the country.

NEWS OF THE WEEK.

The Yokohama Doshin Kaisha held a regular general meeting of shareholders on Thursday, but no dividend was declared.

Messrs. Dell'oro & Co., No. 91, Settlement, Yokohama, have contributed *yen* 60 towards the relief of sufferers by the recent fire at Hachioji.

Mr. Nakano, Governor of Kanagawa Ken, Mr. Umeda, Mayor of Yokohama, and others visited Count Matsukata at his villa at Tomioka on Thursday.

We have to acknowledge with hearty thanks receipt of a cheque for \$100 from Lord Dormer, for the Roman Catholic Mission at Hachioji, recently destroyed by fire.

The Yokohama Fire Insurance Company is to be established backed with a capital of *yen* 15,000,000. Mr. Tomita Tetsunosuke will, in all probability, be appointed President.

James Kenny, a seaman on the British ship *Astracana*, was sent to prison for fourteen days on Monday by James Troup, Esq., H.B.M. Assistant-Judge, for being absent from his ship without leave.

The Mosquito Yacht Club opened their season on Sunday despite the dreary weather. The new launch recently built by the Engine & Iron Works was "chartered" for the day and the jovial Mosquitoes, to quote their Commodore, "buzzed in fine shape." After tiffin at the County Club, Tomioka, the party cruised down the Bay to the forts, and then re-

turned to Yokohama. Everyone seemed to enjoy the fun—moist though the atmosphere was—except "Pat," and he, poor dog, was much upset.

The general spring meeting of the Ryumonsha, that was postponed owing to the death of the fifth son of Mr. Shibusawa Eiichi, will be held at Oji on the 9th of May. Marquis Ito, ex-Premier, will attend the meeting and deliver a speech on the occasion.

The *Hiogo News* learns that Mrs. Carew went ashore at Kobe, late on Monday afternoon, for the sake of exercise. The *Kobe Herald* authoritatively denies the statement, declaring that Mrs. Carew never left the ship; which is certainly the most probable story of the two.

Early on the morning of the 22nd ult., says the *Kobe Chronicle*, a junk was capsized at the mouth of the Ajikawa, Osaka, being struck by the propeller of the steamer *Tanigatawa*, which was on her way from Kobe to Osaka. The three occupants of the junk were drowned.

Mr. Sonoda Kokichi, President of the Yokohama Specie Bank, has resigned the position by reason of ill-health, and Mr. Soma Nagatane, a director, has been chosen to fill the vacancy, with Mr. Takahashi Korekiyo as Vice-President. Mr. Sonoda will still remain on the governing Board.

Lord Ripon, an ex-Viceroy, has been examined before the Royal Commission on Indian Finance. He expressed the opinion that if India were not connected with England, she would have been annexed by Russia years ago, although he did not look forward with alarm to a Russian invasion.

The crew of the U.S.S. *Monocacy*, a few days ago, presented to Paymaster T. J. Cowie a gold-headed cane, as a token of the esteem and regard which he has won for himself during his service as paymaster of that ship. Mr. Cowie, having completed his three years' commission, is under orders to proceed home.

The steel-steamer *Romulus* has been sold to Japanese owners for about £6,400, delivered in Japan, says a home shipping paper. This boat is of 349 tons gross register, was built at Southampton in 1888, and classed 100 A1 at Lloyd's. She has triple-expansion engines of 50 h.p. Her dimensions are:—164.5ft. by 23.1ft. by 11.1ft.

There are rumours about town that an old resident in the foreign Settlement of Yokohama—a man forward in good works and especially where Japanese distress is concerned—was pulled off his bicycle on Monday evening by two Japanese lads, and severely assaulted. We can not obtain confirmation of the story at the time of writing.

On the 25th ult. at the conclusion of the 8th general meeting of the Yokohama Educational Association, Mr. Otani Kahei gave an entertainment to Marquis Hachisuka, Minister of Education; Prince Konoye, President of the Imperial Educational Association; Mr. Nakano, Governor of Kanagawa; Mr. Arakawa, Secretary of the Kencho; and others, at the Sanomo Restaurant.

As the *Saikyo Maru*, of the N.Y.K., was going into the Yokohama dock on Monday, she touched the ground in front of the yard, the strong current swinging her round. It appeared that the dredging operations before the dock had not been completed, the *Saikyo* entering a day sooner than at first expected. She soon got off and entered the dock. A large crowd of spectators were present.

The *Kobe Herald* reports that a notorious thief named Tsunekichi, sentenced once on a charge of highway robbery, and living lately in Aratamachi, Kobe, has been arrested by the Tokushima Police. His accomplices—two women, who used to sell or pawn the things he stole—have also been arrested by a detective attached to the Hiogo Police Station. Tsunekichi broke into the dormitory of the Kobe Girls' School, near Suwayama, on the 2nd ult., and got away with a lot of clothes belonging to

the students and one of the American ladies residing there. He is believed to have broken into several houses on the Hill since the beginning of March last and to have taken altogether about 1,300 yen worth of things.

The new boat-house of the Nagasaki Amateur Rowing Club, at Kosuge, was opened with befitting ceremonies on April 23rd. Five new boats were then named and launched. The ladies who gracefully performed this pleasing function were, Mrs. J. C. Smith, who duly christened the *Blue Bell*; Mrs. W. K. Wilson, the *Marguerite*; Mrs. del Castillo, the *Violet*; Mrs. Correll, the *Sen-Sugi*, and Mrs. Thiele, the *Corn-Flower*. Scratch races took place during the afternoon.

According to the *Tokyo Shimbun*, a Marine Court of Enquiry is shortly to be established by special Imperial Ordinance. It will be composed of higher and district courts. The latter will be established as Ship Inspection Offices in Tokyo, Osaka, Kobe, and Hakodate, for the purpose of conducting preliminary trials in regard to maritime affairs. The Higher Court is to be organised in Tokyo to hear appeals against the decisions of District Offices, under the control of the Director of the Shipping Bureau.

The Law for encouraging deep sea fishing, approved by the Diet in its tenth session, having lately been promulgated, steps are being taken by the Agricultural and Commercial Department to call a Council to thoroughly investigate fishery affairs. The Council will sit on the 28th ultimo. The vessels specified in this Law will receive subsidies without any great trouble, the restrictions of the Navigation Encouragement Law not being applicable. Deep sea enterprise at present undertaken in the country consists in hunting for seals, otters, and whales. The business is carried on by fifteen vessels, including those of the Imperial Marine Products Company.

A horrible tragedy is reported in the *Yushin Nippo*, says the *Kobe Chronicle*. About 2 a.m. on the 21st ult., a burglar entered the home of a resident of Tomikawa-mura, in Yamanaashi prefecture, and inflicted severe wounds on the occupier, his wife, and also on a friend who was spending the night in the house. Before running away the burglar set fire to the house, which was burnt to the ground. The three injured people gave information to the police, and when searching for the culprit, the bodies of the supposed burglar and the daughter of the house were found hanging from a tree about two *cho* away from the scene of the fire. It appears that the girl had been married to the man who was found hanging by her side, but the father of the girl, taking objection to his son-in-law, expelled him. The man was continually pressing to be readmitted to the family, without success, and it is therefore supposed that he wreaked his vengeance in this terrible form.

The *Kobe Chronicle* referring to Mr. Sydney H. Morse's concert at Kobe on Tuesday evening says:—"Six numbers were down to the name of Mr. Sydney H. Morse, and, in view of the tax upon him, the order of the programme was strictly adhered to, no amount of applause eliciting an encore. Doubtless Mr. Morse found the strain of appearing half-a-dozen times quite sufficient, as he is still suffering from the cold contracted upon coming north after a tour through the tropics. His voice proved a pleasing lyrical tenor, very sweet and true in the medium notes, but not quite so successful in the higher or lower ranges; his enunciation and phrasing, though excellent in such pieces as Handel's 'Where'er you walk' (Semele), lack fire and expression in rendering a Scottish ballad like 'The MacGregors' Gathering,' which last night proved somewhat of failure. It is only fair, however, to attribute the result in some measure to the cold from which Mr. Morse was evidently suffering, and which must have militated against expression."

Much interest has been created in Australian business circles by the arrival of Mr. Sakaki, of the Department of Communications. In Sydney, Mr. Sakaki informed the inevitable interviewer

that he was extremely hopeful that the establishment of the Nippon Yusen Kaisha's Australian line would lead to larger trade relations between the two countries. He believed, too, that it would be the means eventually of creating a considerable wool export from Australia. In Melbourne, Mr. Sakaki expressed the opinion that Japan would deal with Victoria very largely in wool, leather and tallow, but he feared the trade would be very one-sided. At present Japan's chief exports to the colony were rice, fish, oil, sulphur and small lines in matting. He saw very little chance of any expansion of trade with Victoria, for owing to the protective policy of the colony, Japanese cheap-labour manufactures were shut out, though likely to find a convenient place of disposal in free-trade Sydney. It was Mr. Sakaki's intention to pass several days in South Australia, subsequently revisiting Victoria and New South Wales. Another Japanese visitor, Mr. K. Fukui, representing the Mitsui Bussan Kaisha Company, has included Newcastle in his tour.

The *Hogo News* says that the Kobe Sports were very successful. The results were:—

1. Putting the Shot.—Roeper (scratch), 29 ft. 8 in.
2. One hundred Yards (Open).—Lightfoot, 12 secs.
3. Long Jump.—Jonas (receives 6 in.), actual jump 19 ft. 9 in.
4. Throwing the Cricket Ball.—Hutton, 27 ft. 4 in.
5. High Jump.—Abell (receives 4 in.), actual jump 5 ft.
6. Hurdles (Handicap), 120 Yards.—Abell (3 yards), 192 sec.
7. Quarter-Mile (Handicap).—1st, Jonas (3 yards); 2nd, Meek (10 yards).
8. Boys' Race (over 12, Handicap) ¼ Mile.—1st, Christensen; 2nd, M. Ellerton.
9. One Hundred Yards (Handicap).—1st, Abell (4 yards) 112 secs.; 2nd, Jonas (3 yards).
10. Pole Jump (Handicap).—Smithers (scratch), 8 ft. 9 in.
11. Half-Mile (Handicap).—1st, Meek (20 yards) 2 m. 18 secs.; 2nd, Thwaites (scratch).
12. Boys' Race (over 5 and under 8), 70 yards.—1st, James; 2nd, Dell Clarke.
13. Girls' Race (over 5 and under 8); 50 yards.—Frances Olmstead.
14. Band Race, Quarter-Mile.—
15. Bicycle Race (Handicap), Two Miles.—1st, Mancini (scratch) 6 m. 23 secs.; 2nd, F. V. Collins.
16. Three-Legged Race.—1. A. Sylva and F. J. Collins.
17. Boys' Race (over 8 and under 12).—1st, Stephens; 2nd, S. Clarke.
18. Girls' Race (over 8 and under 12).—A. Eadale.
19. Sack Race.—Abell.
20. Thread and Needle Race.—Putnam (with Miss Sowler's assistance).

The *Sydney Daily Telegraph* is publishing a series of articles by a recent visitor to Japan on the prospects of Australian trade with Japanese ports, but it cannot be said that the views expressed by him are too rose-coloured. For instance, he says:—"Nothing was more clearly fixed upon me during the time I was in Japan than the fact that 'direct trade' between Australia and Japan is at present unsafe. To the commercial men of England and her colonies no branch of the law is so important as the law of contract. As a nation, when we make a contract, we mean to keep it, and we generally do. The average opinion of the resident foreign merchant in Japan is that the Japanese regard for the sanctity of their contracts varies with the ups and downs of the market. Japan is not quite educated in what the western nations call 'honesty.' To the average person who has never seen Japan and China, their peoples seem to be alike. In business honesty there is a great difference between them. The manager of the Hongkong and Shanghai Banking Corporation says of the Chinese:—"I know of no people in the world I would sooner trust than the Chinese merchant or banker. For the 25 years the bank has been doing a very large business with the Chinese, and we have never met with a defaulting Chinaman." I travelled from Sydney to Hongkong with Mr. H. D. Munro, an officer of the bank, which shares with the Chartered Bank of India, Australia, and China the best business of the East, and he was of the same opinion, and one day at luncheon in Hongkong the present general manager of the Hongkong and Shanghai Bank used nearly the same words. Very different is it with the Japanese. The European merchants and bankers complain not so much of their wilful dishonesty (though they say they are often the victims of it), as of pettiness, constant shilly-shallying, and a general unbusiness-

like behaviour that is as harassing as it is incomprehensible. Professor Basil Hall Chamberlain, Emeritus Professor of Japanese and philology in the Imperial University of Japan, says—"Japan, the globe-trotters' paradise, is also the grave of the merchants' hopes." If this were strictly true, the Australian exporter and importer would do well to turn his eyes away from the Land of the Rising Sun. That it is not strictly true is evidenced by the prosperity of many of the foreign merchants in Japan and the constantly increasing volume of trade which passes in and out of the gates of the Inland Sea."

WRECK OF THE "YIKSANG."

The *Kobe Herald* has gathered the following particulars of the stranding of the *Yiksang*, from Mr. Arthur McGlew, who was the only European passenger on board. The accident happened at about 10.30 on Wednesday night (April 21). The ship was going almost full speed at the time, the danger not having been realized until a few minutes before she struck. The Chief Officer was on watch when the disaster occurred. As soon as the ship struck, rockets were sent up, but no assistance arrived until the following day. An attempt was made to get the ship off, but the reversing of the engines and going full speed astern had no effect. At about 11 p.m. all hands turned to to discharge cargo, and a quantity of bean cake was thrown overboard to lighten ship, but this proved of no avail, the ship having gone on at full tide. All night long the vessel lay on the rocks, bumping at times badly, much to the consternation of the Chinese passengers, of whom there were 36 on board, and who were in great fear until life buoys were given them. At 4 a.m. on Thursday the 2nd Officer and 3rd Engineer left in a life boat for Moji. As soon as day broke a hawser was got out and after a good deal of difficulty fastened to a pine tree on shore, about forty or fifty feet above sea level. The first attempt to get the hawser ashore failed, but a fisherman stripped and sprang into the sea and eventually secured it. When the hawser had been made secure at either end, the 2nd Engineer crossed from the ship to the shore (about a hundred yards distant) by means of a boatswain's chair. It was no easy work getting across, and the journey was watched with a good deal of anxiety by those on board. Before 8 o'clock all was in readiness to land the passengers, lines having been fastened to the chair connecting it with the hillside and the ship. Our informant was the first to be transported across, then Mr. Shimauchi, a Japanese passenger, who joined at Newchwang, and then one by one the Chinese, thirty-six in all. During Thursday afternoon a steam tug was sighted making for the ship but she eventually put back, the weather being too rough for her. The Captain and officers and nearly all the crew remained on board all Thursday night, while Arthur McGlew and the 2nd Engineer passed the night in a fisherman's house, where they were very kindly treated. Indeed, we are assured that throughout the Japanese did all they possibly could to render what assistance they had in their power to give, both fisherfolk and police showing the utmost consideration and kindness. On Friday the sea went down considerably, and, during the morning, it was found possible to communicate with the ship by sampan. In the forenoon too, a tug and lighters arrived from Moji with the 2nd Officer and Mr. Reed (of Messrs. Holme, Ringer & Co., Nagasaki), and not long after work was commenced. Our informant left at about noon and at that time all hands were busy discharging cargo. The tug boat conveyed the passengers (two cabin and 38 steerage) to Moji, which was reached at about 4 o'clock in the afternoon, enabling those who wished to do so to catch the 5 p.m. Osaka Shosen Kaisha mail steamer for Onomichi. There were 12 feet of water in the after-hold when the party left the ship, and the engine room was full, the water being within 3 or 4 feet of the cylinders. The steamer had sunk a good deal by the stern since striking, and her name was barely above water."

SPRING MEETING OF THE NIPPON RACE CLUB.

FIRST DAY.—THURSDAY, 29TH APRIL.

Patrons:—H.I.H. Komatsu-no-Miya, H.I.H. Fushimi-no-Miya, H.I.H. Takashito-no-Miya.

Premature Committee:—Sir Ernest Satow, K.C.M.G., President; Dr. Wheeler, Vice-President; H. E. Count Orfini, W. B. Walter, Esq., Jas. Dodds, Esq., F. Strahler, Esq., A. Dumelin, Esq., and R. D. Robison, Esq.

Executive Committee:—W. W. Till, Esq., E. Knaff, Esq., T. Thomas, Esq., S. Isaacs, Esq., V. Blad, Esq., H. Pinckney, Esq., H. Tennant, Esq., Secretary. Clerk of the Course:—E. Knaff, Esq.

Nature was in a kindly mood on Thursday, the first day of the Spring Meeting of the Nippon Race Club. There was plenty of sunshine "and a hay harvest breeze," but the fleecy clouds kept off the glare, making it pleasant to the eye to watch the races from start to finish. Spring has come late this year, but the last few days have brought things on wonderfully, so that the young crops present a promising appearance in and around the neighbourhood of Negishi. Owing, in great part, to the genial climatic conditions, the attendance for a first day was above the average, the ladies bulking largely, though we must wait till tomorrow for the full glory of "race-gowns." The racing itself was very good, fair fields and capital finishes characterising the day's sport. The "fancy" were rather at sea at times, however, though some of the upsets they attributed to the condition of the course. Yet, all things considered, it was in very fair order, the energetic Clerk of the Course, Mr. E. Knaff, having done all that was possible to make it safe-going. He had to fight against most unpropitious weather all through the training, and for the success he has achieved he deserves the thanks of everyone concerned. We are sorry to hear that Eclair has been scratched for the whole of the meeting, owing to lameness. In regard to the riding, Mr. Nicholson's performances were again a feature of the races, landing both his wins cleverly. Mr. States' stable was unfortunate in never catching the Judge's eye, but probably it will do better before the meeting closes. In the last race, the Debutante's Plate, the only accident of the day has to be recorded. Mr. R. Field's mare Theory, ridden by Kubota, collided with one of the other competitors, and striking the rails turned a complete somersault. The jockey escaped without damage, but Theory's injuries were so serious that she had to be destroyed. Her popular owner received the commiseration of all his friends in the distressing affair.

During the afternoon music filled up the intervals agreeably, the following Programme being played by the Town Band:—

1. The "Big 4" March..... G. Southwell.
2. Overture 2. Op. "Nebukadneser"..... Verdi.
3. Fantasia 4. Op. "Faust"..... Gounod.
4. "Gondellied" Waltz..... R. Dellinger.
5. "The High School Cadets" March... J. P. Sousa.
6. "Der Kladderadatsch" Potpourri..... Latann.
7. Solo Masurka (for Cornet)..... Zikoff.
8. Grand Fantasia "Ireland"..... W. H. Lee.
9. "Donau Wellen" Waltz..... Ivanovici.
10. "Cavatina a. d. Operette "Kathchen" Von Heilbronn..... Conradi.
11. Soldaten Chorus aus "Faust"..... Gounod.
12. "Romaneska"..... Zikoff.
13. "Reveille de Lion"..... Kotski.
14. Selection, "Bohemian Girl"..... Verdi.
15. Musique sur "Rigoretto"..... Verdi.
16. "Il Trovatore"..... Verdi.
17. "Die Schone Augusta Redava"..... Paladilha.
18. "Mandolinato"..... Paladilha.
19. "Turkish Patrol"..... Mirhaelia.
20. Galop.....

Mr. Bayne was the Starter, having Mr. Geo. Philp's assistance with the white flag; Dr. Wheeler was at his old post at the Scales; Mr. Mitchell and Mr. Pinckney were Judges; Mr. F. J. Hall, and Mr. Warming, Time-keepers; Mr. Tennant, Secretary. Mr. John W. Hall, as usual, had charge of the *Pari-Mutuel*; the Club Hotel looking after the refreshments. Details:—

1.—The BAZZAI STAKES, Value \$150, and \$50; for Subscription Country-bred Mares of Spring, 1897; weight, 130lbs. Half a Mile. Entrance fee, \$10.

Mr. Durand's Hermine, 3 yrs., 130lbs.

(Kobayashi) 1
Mr. Durand's Aida, 3 yrs., 132lbs.....Goto) 2
Mr. Tatsuta's Chiyoda, 3 yrs., 141lbs.....(Riki) 3
Mr. R. Field's Thoughtless, 3 yrs., 130lbs.

(Kubota) 0
Mr. States' Tennessee, 3 yrs., 130lbs.....(Sugiura) 0
Mr. Four-in-Hand's Choice, 3 yrs., 131lbs.

(Katsu) 0
Mr. Four-in-Hand's Chance, 3 yrs., 131lbs.

(Ichi) 0
Mr. San Remo's Signorina, 3 yrs., 130lbs.

(Yasu) 0

Eight ran out of fifteen entries, and Chiyoda carried 11½lbs. over weight. Mr. Four-in-Hand and Mr. Durand declared the best to win. Chiyoda got off with a long lead, with Hermine next, and the rest in a bunch. At the Trees, Hermine began to catch up on the leader and, turning into the Straight, passed her. Aida, her stable companion, had by this time got out of the ruck and was gaining fast on Chiyoda. A fine struggle down to the Stand resulted in Hermine landing home by a length, about a length and a half between second and third. Time, 56½ secs.

2.—The NEW COMER'S PLATE, Value \$150, and \$50; for China Subscription Ponies of Autumn, 1896, that have not won two races in Japan at date of entry, and Subscription China Ponies of Spring, 1897; weight as per scale. Three-quarter Mile. Entrance fee, \$10.

Mr. R. Field's Torpedo (late Da Capo), 13h.

oin., 146lbs..... (Mr. Mottu) 1

Mr. Nishimura's Morisan (late Greylags),

13h. 1in., 150lbs..... (Hattori) 2

Mr. Tippecanoe's Rienzi (late Competitor),

13h. oin., 147lbs..... (Miyagawa) 3

Mr. Four-in-Hand's The Rogue, 13h. oin.,

147lbs..... (Ichi) 0

Mr. Avis's Tomtit (late Cartouche), 12h. 3in.,

141lbs..... (Mr. Kingdon) 0

Mr. Worthington's Suma, 13h. 2in., 150lbs.

(Yasu) 0

Mr. Partner's Tantis (late Sunflower), 12h.

3in., 144lbs..... (Goto) 0

Mr. News' Eclipse (late Saruda), 13h. 1in.,

150lbs..... (Hakodate) 0

The Rogue caused the usual amount of trouble before a start was effected, but a good send-off was eventually made. The crowd at first ran well together, Rienzi leading, with Suma close up. At the Shakespeare, both were running neck and neck, and they kept this position until the Bend leading into the Straight. Here the leaders were challenged by Torpedo and Morisan. Suma then dropped back, and Torpedo, Morisan, and Rienzi raced home together, Torpedo getting the better of it by a short head, a neck separating second and third. Suma was fourth, close up. Time, 1m. 38½ sec.

3.—The JAPAN STAKES, Value \$150, for Country-bred Horses, maidens at date of entry, and Subscription Country-breds of Autumn, 1896; weight as per scale. Three-quarters of a Mile. Entrance fee, \$10.

Mr. Nemo's Sasha, 5 yrs., 143lbs. (Ichi) 1

Mr. Four-in-Hand's Rigi (late Recluse),

*140lbs..... (Katsu) 1

Mr. Durand's Tambour Major, 3 yrs., 128lbs.

(Kobayashi) 1

Mr. Sphinx's Mezame, 3 yrs., 128lbs.

(Miyagawa) 0

Mr. Wood's Miyagino, 145lbs..... (Riki) 0

Mr. Yodo's Matsushima, 3 yrs., 134lbs. (Sasaki) 0

Mr. Durand's Frondeur, 5 yrs., 142lbs..... (Goto) 0

* Allowance Deducted. 1 Dead heat.

Tambour Major lead off, with Rigi in close attendance, the rest being in a bunch, save Mezame, who was left at the post. At the Shakespeare, Sasha closed up on the leaders, and at the Trees had overtaken Rigi and then drew level with Tambour Major. Coming down the Straight, Sasha improved his position every stride, winning by three or four lengths. A desperate struggle between Rigi and Tambour Major resulted in a dead heat for second place; the rest nowhere. Time, 1m., 26½ secs.

4.—The TRIAL PLATE, Value \$200, for all China Ponies; weight as per scale. Three-quarters of a Mile. Entrance fee, \$10.

Mr. Four-in-Hand's Kindar, 13h. 3in., 144lbs.

(Ichi) 1

Mr. Worthington's Orion, 13h. oin., 144lbs.

(Mr. Nicholson) 2

Mr. R. Field's Terror (late Usugumo), 13h.

1in., 148lbs..... (Mr. Pakenham) 3

Messrs. Bent and Owen's Express, 13h. oin.,

144lbs..... (Mr. Owen) 0

Mr. Nemo's Opportuniste, 13h. 1in., 150lbs.

(Ichi) 0

Orion, after some little delay, went off with the lead, Opportuniste coming next, the rest in a bunch. In this order they went past the Stand. Going down the dip, Samurai drew up, joining the leaders at the top of the hill. The three then ran together to the five-furlongs, where Maine joined them. Orion had obtained a length by the time the ½-mile was reached, and Maine had taken second place, pressing the leader. Turning into the Straight, Nicholson called on Orion, and Kingdon

A good start. Kindar drew away with Orion, but they were not long together, the grey getting in front. At the Shakespeare, the leader was two lengths ahead of Orion, with Monaco third, and Terror fourth. No alteration took place in the positions up to the Trees, Opportuniste still being last. But Kindar had a long lead as he entered the Straight. Monaco now came back, Terror getting into third place, and the race finished with Kindar six lengths to the good, eight lengths separating second and third. Time, 1m. 35½ secs.

5.—The NEGISSEI STAKES, Value \$150; for Subscription Country-breds of Autumn, 1896, and Spring, 1897; weight, Autumn, 1896, 135lb.; Spring, 1897, 130lbs.; winners at date of entry 5lbs. extra. Five Furlongs. Entrance fee, \$10.

Mr. Durand's Aida, 3 yrs., 130lbs..... (Goto) 1

Mr. News' Etiole, 4 yrs., 135lbs. (Hakodate) 2

Mr. Durand's Hermine, 3 yrs., 130lbs.

(Kobayashi) 3

Mr. Worthington's Rambler, 4 yrs., 135lbs.

(Yasu) 0

Mr. States' Vermont, 4 yrs., *140lbs. (Sugiura) 0

* 5lbs. added for race won last Autumn.

Aida lead off, but Vermont soon drew on level terms. At the ½-mile, Aida again assumed a lead and Hermine came up into second place, Vermont falling back. Half way between the Trees and the bend into the Straight, Etiole challenged the leaders, passing Hermine. But Aida was not to be caught and led home, winning by 3 lengths, five lengths separating second and third. Time, 1m. 12½ secs. Mr. Durand had declared best to win.

6.—The NANKIN STAKES, Value \$150, and \$50; for China Subscription Ponies of Autumn, 1896, that have not won two races in Japan at date of entry, and Subscription China Ponies of Spring 1897; weight as per scale. One and a half Miles. Entrance fee, \$10.

Major Trick's Pantin (late Bellringer), 13h.

2in., 150lbs. (Mr. Mottu) 1

Mr. Four-in-Hand's The Rogue, 13h. oin.,

147lbs..... (Ichi) 2

Mr. States' Utah, 13h. 1in., 150lbs..... (Sugiura) 3

Mr. Hyogo's Himeji, 13h. 2in., 150lbs.

(Mr. Nicholson) 0

Pantin secured the lead from a good start, and as they passed the Grand Stand, almost in a bunch, Mottu was still slightly a head. Going down the dip no alteration was made, but at the top of the Hill Pantin and the Rogue drew clear. At the ½-mile the Rogue was a head in front, but, turning the corner for home, Pantin drew level again and in a few strides had passed the Green and Gold colours, eventually winning by two lengths; poor third. Time, 3m. 28½ secs.

7.—The ALL-AGED STAKES, Value \$150; for Country-bred Horses; weight as per scale. Three-quarter Mile. Entrance fee, \$10.

Mr. Worthington's Traveller, 144lbs.

(Mr. Nicholson) 1

Mr. Tatsuta's Tatsuta, 4 yrs., 135lbs. (Riki) 2

Mr. Nishimura's Hayakaze, *140lbs.

(Takahashi) 3

Mr. States' Idaho, *140lbs..... (Sugiura) 0

Mr. R. Field's Cigarette, 5 yrs., 137lbs. (Kubota) 0

Traveller got the best of a bad start, with Tatsuta in close company. At the ¾-mile the five had drawn together, then Idaho went to the front and led the field. Half-way between the Shakespeare and the Trees, Traveller, and Cigarette came up, Idaho falling back. Turning into the Straight, Nicholson called on Traveller and passed to the front, Cigarette falling behind. Tatsuta and Hayakaze next challenged the leader, and a rattling race to the finish resulted in a win for the chestnut by a length; three-quarters of a length between second and third. Time, 1m. 26½ secs.

8.—The SHANGHAI PLATE, Value \$150; for all China Ponies; weight as per scale. One-and-a-half Miles. Entrance fee, \$10.

Mr. Worthington's Orion, 13h. oin., 140lbs.

(Mr. Nicholson) 1

Mr. States' Maine, 13h. 1in., 147lbs.

(Mr. Kingdon) 2

Mr. Wood's Samurai, 13h. oin., 147lbs. (Riki) 3

Messrs. Bent and Owen's Express, 13h. oin.,

144lbs..... (Mr. Owen) 0

Mr. Nemo's Opportuniste, 13h. 1in., 150lbs.

(Ichi) 0

Orion, after some little delay, went off with the lead, Opportuniste coming next, the rest in a bunch. In this order they went past the Stand. Going down the dip, Samurai drew up, joining the leaders at the top of the hill. The three then ran together to the five-furlongs, where Maine joined them. Orion had obtained a length by the time the ½-mile was reached, and Maine had taken second place, pressing the leader. Turning into the Straight, Nicholson called on Orion, and Kingdon

on Maine, but the older rider landed home a length to the good, a neck separating second and third. Time, 3m. 30 secs.

9.—THE DEBUTANTE'S PLATE, Value \$150, and \$50; for Subscription Country-bred Mares of Spring, 1897; weight 130lb.; winners 3lb. extra each race won. Three-quarter mile. Entrance fee, \$10.

Mr. Yodo's Saikio, 3yrs., 135lbs..... (Sasaki) 1
Mr. Four-in-hand's Chance, 3yrs., 130lbs. (Ichi) 2
Mr. States' Tennessee, 3yrs., 130lbs. (Sugiyura) 3
Mr. News' Echo, 3yrs., 130lbs. (Hakodate) 0
Mr. Tatsuta's Chiyoda, 3yrs., 130lbs. (Hattori) 0
Mr. Worthington's Idler, 3yrs., 130lbs. (Yasu) 0
Mr. San Remo's Signorina, 3yrs., 130lbs. (Sato) 0
Mr. Campredon's Rosita, 3yrs., 130lbs. (Kobayashi) 0

Mr. R. Field's Field's Theory, 3yrs., 130lbs. (Kubota) 0

A rather poor start. The first to get away was Saikio, with Idler next. Theory fell early in the race through collision, and breaking her back had to be shot. Saikio, who was never really challenged, won easily; half a length between second and third. Rosita pulled up lame. Time, 1m. 31½ secs.

CORRESPONDENCE.

A BARBAROUS CUSTOM.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Recently on a visit to one of the Churches North of Sendai, I received into the Church a husband and wife who seem to have been happily married and to have a genuine affection for each other. A few days later, I returned to this church and found that the bride's mother (the son-in-law being adopted into the family), by mere caprice had turned out the son-in-law and granted a divorce!

The Japanese Nation is making strides toward a higher civilization, but it seems to me that as long as Japanese law-makers allow such customs of easy divorce to continue, rupturing family and home relations, this country will not be able to escape the opprobrium of being called barbarian.

I have told this husband and wife that a pernicious custom had allowed the so-called divorce, but that in the sight of God they are still husband and wife, and that as long as they are true to each other no power but death has a right to grant a divorce.

Your obedient servant,

A. D. WOODWORTH.

26, Kasumicho, Tokyo,
April 23rd, 1897.

A RELIC OF BARBARISM.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In the past week I have had my attention called to two cases of divorce, both sufficiently atrocious, but the last was worse than the first. At Ishinomaki, I met a young man who has been married four years and had as fine a wife and two as pretty babies as I have seen anywhere. He mentioned to me the fact that his father-in-law threatened to divorce him if his wife provided the son-in-law did not assume the family name and become his heir. This the son-in-law objected to, and the father-in-law became exceedingly angry.

That night, while the son-in-law was away from his home, the wife's father came and took them all away to Morioka. What kind of savagery is this that allows a man to be thus robbed of his wife and family? In America it was thought sufficiently horrible when a family of slaves was broken up by the greed of the master. But here in Japan it would seem that young married people have no rights which their living parents are obliged to respect. To my mind this is slavery.

Of course it is easy to see that if the parents-in-law are kindly disposed, sensible people their children need have no anxiety in regard to being divorced against their will. But what shall we say of those in high life as well as low who have no respect for marriage, and who, so far as practice is concerned, consider it like so much breeding of cattle?

I have talked with a good many Japanese on this subject, and they all agree with me that the custom of which I have seen two practical results during the past week is a relic of barbarism. Nor can I convince myself that the Japanese will long tolerate this custom so hostile to the well-being of the country, so destructive to virtue. Does it not seem high time that Japan should enact laws to guard the marriage relation?

Yours truly,

A. D. WOODWORTH.

26, Kasumi-cho, Azabu, Tokio.

THE HACHIOJI FIRE.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The conflagration that ruined, on the 22nd inst., the larger part of the town of Hachioji, has thrown a great number of families into the most despairing misery. But nobody has suffered more than the Catholic Mission. It possessed there valuable establishments, founded only last year, and of all that, only a heap of ashes remains.

The fire broke out near our buildings, and, carried forward by a violent gale, it spread so rapidly that the poor people had just time to get out of its way, without being able to save anything, neither the objects necessary for divine service, nor the belongings of the Missionary, all of which fell a prey to the flames. All the Catholics of the town, except two families, have shared the lot of the Mission. One of the poor people, seeing that the fire spread in the direction of the Mission, forgot his own danger to come to our help. But when, after having made useless efforts in our behalf, he returned to his own house, it was only to see it all involved in flames, his wife and children having just had time to run for their lives, but without saving anything.

Among the readers of your excellent paper many charitable persons will no doubt let themselves be touched by the desolation of the Missionary and his poor flock, and will feel inclined to help us. Their aims will be acknowledged with the most sincere thanks, and God will repay them a hundred-fold.

P. A. MAYRAND, Mis. Ap.

P.S.—Benefactors are requested to send their donations to one of the following addresses:—
Catholic Mission, Tsukiji, 35.
Catholic Mission, Yokohama, No. 80.
Or the Editor of the *Japan Mail*.

Kawagoye, April 24th, 1897.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Having just returned from the terrible scene of destruction, occasioned by the disastrous conflagration in Hachioji on the 22nd inst., and finding many of the newspaper accounts very far from being correct, permit me to submit a few details, which were kindly given me at the Central Police Office of Hachioji. I should first say, perhaps, that the fire originated in a *Yoriya* (silk twisting establishment), in the south-western part of the city, called Oyoko-machi, at 3.40 p.m. There was at the time a very strong gale blowing from the south-west, which at once fanned the flames into a most destructive "wild-fire," which very soon baffled all human efforts of resistance. The fire swept with tremendous rapidity, apparently in the shape of a fan, eastward to within the immediate precinct of the Railway Station, and northward across the city to its northernmost limits, leaving only the less important, extreme western section intact. Out of 5,200 buildings, 3,101 were burnt. Within the short space of three hours more than 10,000 people were rendered homeless, and in not a few cases penniless; 37 persons were found to have been burnt to death, and 3 threw themselves into wells and were drowned: 60 of those most seriously injured are cared for by the Government and are in charge of skilled nurses, while those less seriously hurt are in some way cared for by their friends. Many of the latter were taken to neighbouring villages. Up to the 26th instant, the Government provided boiled rice for 1,300 people, since then each person receives 4 *go* of unboiled rice daily, beside other necessities of life. Of the 500 "fire-proof" buildings (*godowns*), 225 did not stand the "proof," and some of the others were badly injured. Among the public buildings destroyed is the *Gunhyakusho*, the chief Police Station, the local Court, the Post and Telegraph Office, the Branch Office of the Imperial Domain, the Tax Collecting Office, the Gendarme Station, 4 Banks, 3 Christian Churches, namely one of the Evangelical Association of North America, one Greek, and one Roman Catholic, 3 Shinto and 4 Buddhist Temples, beside several other large establishments. According to the estimate made by the Government, the total loss amounts to more than 5 million *yen*. Notwithstanding the assistance rendered by the Government, which is beyond praise, and the generous contributions by many private individuals, the distress among these thousands of homeless people, that have lost practically everything, save the clothes they were wearing when this dire calamity overtook them, is indeed very great, and I am sure any assistance rendered by kindly disposed persons will be most gratefully received. Contributions sent to the City Office, or the Chief of Police, will be duly acknowledged and will be judiciously distributed among the most needy.

Yours truly,
F. W. VOEGELEIN.
Tokyo, April 27, 1897.

RAILWAYS OF JAPAN.

(CONTINUED FROM APRIL 24TH.)

SHIN-YETSU LINE.

On this line also the rainfall was torrential for several days at the end of July. As a result several rivers overflowed, particularly the Torii and the Seki. Embankments were forced through, and along the line three embankments and four stone walls that were intended to provide against landslides were destroyed, and the submerged works in the river Torii washed away. Operations were suspended for one day and then necessary repairs were attended to. On August 27th storms again broke over this district, and damaged the upper portion of the cutting situated at 119 miles 58 chains, so that debris fell upon the track, stopping the passage of one or two trains. From 21st to the 29th January snow fell incessantly between Nagano and Naoyetsu; the fall being specially bad between Sekiyama and Taguchi, covering the track by more than 3 feet. At places where the snow drifted it became as deep as 6 feet. Snow ploughs did not satisfactorily serve the purpose of opening a passage, and traffic experienced considerable delay. In fact, trains in this district are very liable every winter to be stopped by heavy snow. Two snow sheds were constructed at the Taguchi-Sekiyama section, where the fall is usually heavy. Encouraged by the satisfactory result obtained, another snow-shed measuring 60 *ken* long was erected this year on the same section. The snow fall was heavier this winter than last, but owing to these provisions the trains were stopped for 2 days only at the Kasli-wabara-Takata section, while in other places the interruption was confined to only one or two trains. The gradient of the Yokogawa-Kumanohira section being very steep, a siding of 17 chains was constructed at a distance of 82 miles 9 chains and 82 links. Not only was the water-tower at Kumanohira a small temporary wooden affair, but the source of the water was shallow and frequently liable to dry up. Consequently, a large iron water-tower was put up in its place and two water-tanks were constructed of bricks. A wooden water-tower at Nagano was also changed for a large one of iron, and additional ash-pits were constructed. The piers of the Oseki-gawa in the Iizuka-Annaka section, formerly of wood, were reconstructed with stone, and iron girders. The wooden girders of the bridge over the Takanosuse-gawa were also replaced with iron girders. The bricks of the fourth span of the bridge over the river Unai cracked, and as the interstices widened, protection work was undertaken during the preceding year. It still being considered not perfectly safe, additional layers of bricks were set to the arch. Pipes provided for farm use at three places in the vicinity of Nagano-Toyono and Shinoi not proving efficient for the passage of water, a span was widened to 6ft. One of the pipe-ways was reconstructed and made into a covered canal, the other two being open. Tanaka station being a depot for goods destined for Matsumoto and Suwa, accumulation of goods is especially large in the sericultural season, so that the widening of the station ground was deemed necessary some time since, and would have been carried out but for the limits of the ground. Now Kanagawa-mura and Oya-mura, which lie midway between this station and Uyeda, being conveniently situated on a highway leading to Suwa and its vicinity, it was decided to construct a station there, and that has been done. Three large and small culverts have been laid on the premises of that station. Owing to the development of business in recent years, and the consequent increase in the volume of goods brought to the stations, an insufficiency of sidings and godowns was felt, so that a siding was laid at Komuro and at three other places, while official residences or landing sheds were built at Takata and one other place. Other small repair works of an ordinary character were also undertaken. The principal works undertaken were as follow:—earth-works, 6,791 *tsubo*; stone walls, 3,583 *tsubo*; buildings, 476 *tsubo*; sidings to an extent of 1 mile 33 chains.

DOUBLING WORK.

The doubling of the line between Osaka and Sannomiya has been begun, the Nishinomiya-Sannomiya section having been already opened for traffic during the preceding year. On the Nishinomiya-Osaka section the laying of rails was completed, but the lack of girders for three large bridges over the Muko and two other rivers made it impossible to proceed further. At last, in March of the present fiscal year, the whole was completed, and the section was opened for traffic from the 11th of the same month. The works of construction on the Mukaimachi-Suita section were all completed with the exception of some metalting, so that it will soon be open for traffic. In the Otani-Kyoto sec-

tion all the earth-works have been completed and the laying of rails finished to an extent of six-tenths, the construction of four iron bridges over the Kamo and four other rivers now only remaining. Operations will commence on this section before long. The principal work during the year was as follows:—Earth-works, 13,841 *tsubo*; stone walls to provide against landslides, 936 *tsubo*; additional works for bridges and abutments in 26 places; doubling of the line for over 26 miles.

RAILWAYS AND APPENDAGES (TOGETHER WITH MILEAGE OF LOCOMOTIVES).

At the end of the year under review the State railways had increased to 792 miles; 127 stations and 3,112 vehicles. Compared with the preceding year, the traffic lines show an increase of 12 miles, the aggregate length of railways 34 miles, the number of stations 3, and vehicles 154, specified below:—

Lines.	Mileage of traffic of rail way.	Rolling Stock.				
		Sta. tions	Loco- motive	Car- ri- age	Wag- gons.	Total.
Tokaido	440.39	84.52	97	143	616	1,850
Shinyetsu	117.03	128.09	23	10	60	2.6
O-U	35.40	39.37	7	6	49	74
Total	592.82	702.18	127	158	705	2,150
Total at the end of last year	580.69	757.47	124	167	678	2,112
Comparative increase	12.13	34.51	3	4	27	143

Figures marked with an asterisk show that the waggons were used in construction work.

The increase in the mileage of traffic lines was due to the opening of the Hirotsaki-Ikarigasaki section of the O-U line during this year; while the increase in the mileage of railway tracks was due to the opening of the same section, the construction or doubling of sidings and the prolongation of yard-sidings. The addition to the number of stations was due to the opening of Futakawa and Kawase, on the Tokaido line, and Oya station on the Shinyetsu line. Vehicles actually in hand at the end of the present year, subdivided according to kinds, and distributed over the respective lines, were as follow:—

Description.	Total.	Tokaido.	Shinyetsu.	O-U.	Construction.	Total.	Total of the pre- vious year.	Relative increase or decrease.

MILEAGE OF LOCOMOTIVES.

The mileage of locomotives during the year under review totalled 5,415,055 miles; coal consumed 1,795,468 pounds; and oil consumed 728,106 pints, as shown in the following table. Compared with the preceding year, the total mileage shows an increase of 488,470 miles, coal consumed 309,752 pounds, and oil 115,801 pints. This increase was due to the development of business and to the increased service of express trains caused by the transportation of troops.

Lines.	Operative mile- age of loco- motives.	Quantity of coal consumed.	Quantity of oil consumed.	Quantity of coal per mile.	Quantity of oil per mile.
		Line.	Consumed.	Pint.	per mile.
Tokaido	4,773,082	5,415,055	597,534	36.00	22.68
Shinyetsu	595,324	263,639	227,303	47.78	39.72
O-U	205,642	85,518	28,877	28.30	23.80
Shimbashi-Aomori	468	72	21	17.22	5.12
Shimbashi-Tokaido	1,257	445	302	35.74	28.08
Total	5,415,055	1,795,468	728,106	37.44	33.44
Total of the preceding year	4,926,585	1,485,716	612,305	33.78	22.43
Relative increase	488,470	309,752	115,801	3.66	1.01

The figures for Shimbashi-Aomori and Shimbashi-Tokaido relate to operation of locomotives

sent to the O-U and the Shinyetsu lines respectively.

CONDITION OF TRAFFIC.

Passengers by State railways during the year totalled 18,764,387 persons, goods conveyed 1,100,059 tons, and parcels, 8,086 tons; and these, compared with the result of the preceding year show an increase of 3,917,778, or 26.4 per cent., in passengers, 88,799 tons, or 8.8 per cent., in goods, and 655 tons, or 8.8 per cent., in parcels. The extended lengths of passenger mileage, and goods mileage (parcels excluded) were 523,044,579 and 76,823,086 miles respectively; or an average mileage of 27 miles 70 chains per passenger and of 67 chains per ton of goods. Compared with the result of the preceding year, the extended passenger mileage shows an increase of 119,507,791 miles, or 29.6 per cent.; goods mileage, 4,489,082 miles, or 6.2 per cent.; while the average mileage per passenger was 56 chains, or an increase of 2.6 per cent., and that per ton of goods, 1 mile 55 chains, or a diminution of 2.4 per cent. Again, during the year, coaching receipts were 5,925,712 *yen*; wagon receipts, 1,808,489 *yen*; total, 7,734,201 *yen*; and these compared with the result of the preceding year, show an increase of 1,462,955 *yen*, or 32.8 per cent., in coaching receipts; and 1,781,879 *yen* or 27.8 per cent. in gross receipts. The reasons for such increases or decreases will be more conveniently explained in connection with the respective lines. (It ought to be remembered that the receipts here mentioned—earnings on the volume of traffic for the year—do not coincide with the receipts given in the section of Finance. This explanation applies to other similar cases.)

TOKAIDO TRUNK AND BRANCH LINES.

On these lines, military transportation, the opening of the Fourth Domestic Exhibition, and the development of the economic world in general, as a result of the victorious issue of the war, eventuated in an extraordinary increase in the volume of passengers and goods, so that though, in consequence of floods, a portion of the line was temporarily closed, and though extensive military transportation not infrequently interfered with the conveyance of ordinary goods, traffic was remarkably brisk. The result was that passengers showed an increase of 26.3 per cent.; goods 4.8 per cent., coaching receipts 35.7 per cent.; wagon receipts, 12.7 per cent., and the gross receipts 29.7 per cent.

SHINYETSU LINE.

On this line also passengers, as compared with the result of the preceding year, showed an increase of 6.3 per cent., goods, 16 per cent., coaching receipts, 7 per cent., wagon receipts, 12.5 per cent., and the gross receipts, 16 per cent. As may be easily seen from the balance maintained among various receipts, the increase in this line was not due to any extraordinary source, but was chiefly due to the development of business in general.

O-U LINE.

During last year, traffic was carried on only on the Aomori-Hirosaki section and that during the four last months of the fiscal year. This year, the Hirotsaki-Ikarigasaki section was opened for traffic. It is not yet possible to make any precise comparison during the two years as to the result of traffic. Supposing, however, that a comparison be made on the standard average volume of traffic and of receipts per day, it will be found that the increase on account of passenger traffic was as much as 48.6 per cent.; goods, 12.7 per cent.; coaching receipts, 39.4 per cent.; wagon receipts, 13.1 per cent.; gross receipts, 51.2 per cent. These increases were due to the prolongation of the traffic lines and the greater facilities afforded for the transit of goods in consequence of the opening of goods services at Shinjo and three other stations, and the exclusive use of waggons for transit of minerals along the whole line. Further, the reason why the rate of increase in the volume of goods and the amount of goods receipts was comparatively less than that of passengers and coaching receipts, is that though the traffic was undertaken only for four months in the year, it was the season when the transportation of goods was most active and when, consequently, the average daily receipts were the greatest throughout the year. In short, during the year under review, while the transportation service received a great impetus owing to the general development of business in the sequel of the war, several incidental causes that tempted the people to travel—as the opening of a Domestic Exhibition; the celebration of the anniversary of the founding of the City of Kyoto, and so forth—concurred in increasing the volume of passenger and goods traffic. Steam coasting vessels constitute an important factor in the transportation service, and these having been requisitioned for Go-

vernment service, goods that used to go by steamer were, to no small extent, consigned to the railways. But the Railways had their ordinary traffic considerably interfered with by military transportation on a large scale. They were under obligation to undertake that work, and in order to carry passengers and goods that were waiting at every spot, special trains had to be organised, yet satisfaction was not fully afforded.

TRANSPORTATION OF TROOPS AND MILITARY STORES.

The troops carried during the year for military purposes totalled 105,944, their fares amounting to 191,673 *yen*; goods conveyed were 20,736 tons and horses 7,727; the freight on both items was 204,490 *yen*,—total 399,163 *yen*. Compared with the result of the preceding year, troops show a diminution of 39 per cent., fares 21 per cent., goods (2 horses are calculated as one ton) 17 per cent., freights 21 per cent., in all a diminution of 21 per cent. During the year, conveyance of troops and military stores on a large scale was undertaken four times, the number of days occupied totalling 88.

EXPRESS TRAINS.

Owing chiefly to the through passage of military trains this year and the consequent obstruction occasioned to ordinary passenger and goods traffic, express trains were used to a very unusual extent, as recapitulated below. Six times in consequence of a journey by members of the Imperial family, or Prince of the blood; eight times in consequence of special application by passengers; 79 times in consequence of festivals and so forth; 106 times in consequence of the number of passengers waiting transport; 583 times for transportation of goods; 28 times for trial operation of locomotives; three times for testing bridges. Besides, trains were expressly run to transport ballast and construction stores; but as these operations were very irregular, it is not possible to ascertain with any precision the number of special trains of the kind.

(TO BE CONTINUED)

VALEDICTORY.

SOME FRIENDLY WORDS FROM DR. BARROWS, PRESIDENT OF THE WORLD'S PARLIAMENT OF RELIGIONS, ON LEAVING JAPAN.

I have spent three happy and busy weeks in this beautiful Island Empire, one of the most interesting of nations, a delight to the studious traveller, and a field of profitable investigation to all who are interested in the problems of religion. At the Congress of the Faiths, held in Chicago in 1893, ten of the voices that spoke at that world meeting were voices from Japan. The representatives of Buddhism, Shintoism, and Christianity who went to America from this land were received with great respect and courtesy. And it has been one of my chief pleasures in visiting this country to meet again several of the friends who had a part with representatives from Christian America and Europe, and with delegates from India and China, in that assemblage. The Christian men who planned and organized the Parliament had in mind an earnest purpose to deepen the spirit of human brotherhood without fostering any temper of indifference, to show what are the common truths of different religions, to set forth the distinctive truths of each, to inquire what light one religion may throw upon another, to indicate the firm foundations of theism and the abiding reasons for faith in immortality and to strengthen the forces adverse to materialism. They felt that here was a large field in which Christianity might enter with joyful confidence.

The Parliament was not called, as I find that some people in India have been taught to believe, because Christian America was weary of the Christian Gospel and sought after something better to be found in Eastern philosophies, nor has the result of the Parliament been any disturbance of Christian faith in Western lands. Since misleading and ridiculously inaccurate reports are in some places current, it has been my duty to say repeatedly in India that there is nothing more grotesque in any of the Hindu mythologies than the rumours as to the wide acceptance in America and England of Oriental philosophies as substitutes for Christianity. The courtesy and curiosity of the American people have been misunderstood. The apostles of non-Christian faiths were received with interest and admiration, and they did something to quicken a desire for further knowledge of Eastern modes of thought. I believe that America will always be hospitable to persons and to ideas. But to affirm that American Christianity was shaken by Eastern speakers at the Parliament of Religions is as absurdly incredible to everyone

who knows as to say that a child's hand had disturbed the foundations of Fujiyama. Almost a half million new members last year espoused the cause of Christ in the Protestant churches of the United States. The advance of the Christian faith in America has been as marked as ever. And I could not discover that the kingdom of Christ in India had made less rapid progress in the last few years than in the years preceding the Parliament.

This Religious Congress meant, as the Christians participating in it believed, that we should joyfully and thankfully recognize all the elements of truth and goodness discoverable in Hinduism, Buddhism, and Islam. In Christian propaganda the sympathetic method of approach is wise, necessary, and fruitful of best results. During a delightful visit which I had a few days ago with Rev. Zitsusen Ashitau, one of the Buddhist delegates to the Parliament of Religions, that kindly and well-instructed man, informed me that on account of the friendly attitude of American Christianity at the Parliament toward the non-Christian delegates, Japanese Buddhists were learning to look upon Christianity with friendlier feelings. And this corresponds with the testimony of the *Indian Evangelical Review* of Calcutta, which says that one result of the Parliament has been "a wide spread approach towards the Christian platform on the part of the more educated members of the non-Christian community. They are pleased with the Parliament of Religions as an expression of Christian love and sympathy towards, and interest in, the devotees of non-Christian religions. Love begets love, and sympathy begets gratitude. This love and this sympathy have drawn many towards Christ who previously stood aloof." If these things be true then we may expect in the Orient, and especially in progressive Japan, an increasing acceptance and championship of the principles of toleration in its truest and widest sense. Tolerance is not merely a willingness, such as is generally manifest in India, that men should hold a variety of incongruous creeds, accompanied by a persecuting spirit and habit whenever converts to Christianity purpose to enter actively upon a life wherein the conditions and environments harmonize with their inner convictions. True toleration means that men are to be defended in their right to worship God according to the dictates of their own consciences without fear or molestation. It means that the American can become a Buddhist or that the Hindu, Chinese, or Japanese may become a Christian without passing through persecution, outrage, dishonour, social ostracism or any other punishment from which Christian converts in India are frequently compelled to suffer.

In my voyage around the world, during which I have met many men of many faiths, I have discovered that the greatest Empire in the world is neither British nor Russian. The greatest of all Empires is that of human kindness. I have also found that the Christian faith alone is vigorous and vital on every shore, and that the leaders in the non-Christian religions are more and more assimilating and adopting the high principles of the Gospel. I have come to see with new clearness that Christ is the fulfilment of all the highest ideals and aspirations of the ethnic faiths, and that Christianity, tolerant, because cherishing an invincible faith in her spiritual victory—not divorced from the moral order of history, but penetrating, explaining and crowning that order—is surely the religion of the coming man.

I have been glad in India and Japan to take part in conferences where Christians and non-Christians met in the spirit of a true brotherhood. Such meetings may do great good and lead to the co-operation of religious men in behalf of needed moral reforms. Why should not Buddhists, Sintoists, Confucianists, and Christians here in Japan unite in favour of ethical improvement, helping to create a conscience that shall protest with increasing force against impurity, intemperance, falsehood, and commercial dishonesty, even as Protestants, Catholics, and Jews in America often work together against drunkenness and other evils? I do not look, however, with any hope to the efforts of those good men who are seeking to find or found a new universal religion. Scholars have tried in vain to construct an artificial language which men shall adopt and use, out of the elements common to the greatest forms of human speech. Religions cannot be manufactured. Reducing Christianity and the non-Christian faiths to their common principles we bring the highest to the level of the lowest, cut each faith off from its history and eliminate from each at least some of the characteristic elements which give it energy, charm, and endurance. Furthermore, Christians, with very few exceptions, see in the historic Christ the substance of their faith, and could not possibly unite in a new system

which would compel them to abandon their preaching of Him who lived and died and rose again for human salvation. The Church of Christ cannot reconstruct its system by taking out of it what the Church in all its branches has always believed. A victorious army in the thick of the battle cannot wisely throw away its long-tried weapons and manufacture new ones.

I leave Japan with pleasant memories of the many friends whom I have met, with warm hopes for the future of its active-minded and progressive people, and with the deepest interest in the earnest and self-sacrificing labours of those who are here working to enlarge and strengthen the Kingdom of God, the commonwealth of truth, fraternity, and love which is yet to embrace all nations.

JOHN HENRY BARROWS.

Yokohama, April 23^d, 1897.

LATEST TELEGRAPHIC NEWS.

(FROM THE "JAPAN TIMES.")

THE WAR IN SOUTHERN EUROPE.

London, April 23.

The Bulgarian Diplomatic Agent in Constantinople has notified the Sultan that, unless *barats* or *firmans* for the establishment of five additional Christian bishops in Macedonia are granted before Saturday next, the Bulgarian Government will issue orders for the mobilisation of the army. The Sultan has given a temporary reply.

The Greeks are now making a most stubborn resistance to the Turkish troops, whose advance southward is being much delayed in consequence.

The Cape Defence Commission recommends the enforcement of compulsory military service to create a local corps of eleven thousand soldiers, to be levied among all white men; and that a substantial increase be made in the strength of the garrison (sent from England).

London, April 24.

Both Turkish squadrons are still in the Dardanelles, and all the captains have signed a joint memorial to the Porte declaring that their ships are unseaworthy.

The Greek forces are gradually being compelled to fall back on Larissa, fighting desperately.

Eight vessels belonging to the British Cape Squadron have arrived at Delagoa Bay.

London, April 26.

The Greeks have been compelled to evacuate both Tyrnavos and Larissa, and are concentrating their forces on Pharsalos. [Pharsalos is the next province southward, and is midway between the frontier and the historic Pass of Thermopylae. The town of Pharsala is about twenty miles from the town of Larissa.]

The Turks have also succeeded in checking the advance of the Greek troops in Epirus.

The Cretan insurgents and Greek allies are investing the town of Candia. Reinforcements have been applied for by Colonel Chermide [presumably Col. Chermide of the British Army Special Service Corps, in command of the forces occupying Candia by authority of the Powers].

It is stated that the object of sending a British squadron of eight vessels to Delagoa Bay, is to indicate to Germany and the Transvaal that the British Government has resolved to uphold the *status quo*.

London, April 27.

The Turkish troops have occupied Larissa, after six days of constant fighting. A decisive pitched battle took place on Friday near Tyrnavos [between the frontier

and Larissa] resulting in the Greeks being completely routed and having to retreat to Pharsala [south of Larissa]. During the general stampede, the Turkish cavalry closely pursued the Greeks, and did great execution among the fugitives. The newspaper and other correspondents, among whom was Reuter's, had narrow escapes.

The Greeks in Epirus have also received a severe check, and have had to retire on Pigadia (? Pigadakia). Their loss was 500 killed and wounded.

London, April 28.

The Greek officers in command at the front have been recalled, and are now charged with cowardice in connection with their retreat last Friday. It is considered that there was no immediate necessity to order a retreat. The order was given at dusk, and the darkness led to confusion and panic; as the companies of soldiers faced about, other companies in the rear mistook them for Turks advancing, and fired into their comrades.

Serious discontent at the conduct of the military operations is expressed at Athens, and strong feeling is exhibited by the populace. The position of the Royal Family is serious.

London, April 29.

The Powers have decided to treat Crete as neutral territory during the war.

The Greeks were in a splendid position at Larissa, and their flight is considered inexplicable except on the supposition that it was due either to sudden panic or to instructions sent by the war authorities at Athens to the officers in command at the front.

The feeling at Athens is now quieter. The Greek Chamber of Deputies has called a meeting together.

BRITAIN AND SOUTH AFRICA.

Three batteries of Artillery have been ordered to South Africa.

ATTACK ON THE KING OF ITALY.

London, April 24.

An unsuccessful attempt has been made to stab King Humbert of Italy, whilst he was driving to the races.

BIRTH OF A BRITISH PRINCESS.

London, April 27.

The Duchess of York has been delivered of a daughter.

AN ANGLO-CHINESE LOAN.

Peking, April 27.

With the object of paying at once the remaining portion of the Indemnity to Japan, negotiations between Li Hung-chang and a British firm about a loan have been brought almost to a successful conclusion. Some Germans are also desirous of furnishing the money, but the Court of Peking is specially avoiding them.

(GOVERNMENT DISPATCH.)

KING HUMBERT.

Rome, April 22.

While His Majesty the King was driving to the races this afternoon, a man, armed with a dagger, dashed against him. The King was able to parry the blow aimed at him, and, without sustaining any injury, drove on to the race-course. The man was quickly arrested.

Rome, April 24.

The would-be assassin of the King of Italy is a blacksmith of no occupation, and is reported to be an anarchist. The cause of the crime is not known yet.

THE CANADIAN TARIFF.

Vancouver, April 24.

The Canadian import tariff has been entirely revised, but tea still remains free of duty.

THE EUROPEAN SITUATION.

It is reported that the Russian Government is making great efforts to limit the present war to the two countries of Turkey and Greece and to maintain the existing concert between the Great Powers respecting Crete. A few days ago, the Russian Government addressed a Note to the Great Powers with that object, stating that the aggressor should not be permitted to reap the profits resulting from the war, and the Great Powers should not interfere unless, and until, requested by one of the belligerents, and intervention, when made, ought to be collective. It is further reported, that all the Great Powers are ready to agree to the Russian proposal with the exception of England, which appears to entertain some objections against it.

THE GRECIAN DISASTERS.

London, April 28.

It is reported that Greece has sustained crushing defeats and that practically the Turks are now masters of Thessaly. The English and Continental press strongly recommend Greece to solicit the mediation of the Great Powers.

(SPECIAL TELEGRAM TO THE "JAPAN MAIL.")

FIRE AT HAKODATE.

Hakodate, April 27.

A fire broke out last night in a large lumber yard here, and the whole place was destroyed.

(FROM THE "N.C. DAILY NEWS.")

MANILA AFFAIRS.

Manila, April 16.

On account of illness, General Polavieja resigned and left to-day for Spain, General Lachambre taking charge as Governor and Captain-General *pro tem*.

(FROM THE "SHANGHAI MERCURY").

BRITISH MINISTER TO CHINA.

Hongkong, April 20.

A laudatory address was presented to Sir Claude Macdonald to-day by the China Association. He leaves Hongkong for Shanghai by the H.M.S. store-ship *Humber* to-morrow.

IMMIGRATION PROHIBITED.

Hongkong, April 22.

An order has been issued to the effect that immigration of Chinese from Swatow and Formosa has been prohibited owing to the Plague at those places.

MURDER OF A FRENCH PRIEST.

Hongkong, April 23.

A telegram has been received at Hongkong from Kweishan, in Kwangsi, reporting the massacre of Father Mazel. The chapel at Soli, near Pese, has been pillaged, and Sylin is menaced.

("LE COURRIER D'HAIPHONG.")

STRIKE OF MINERS.

Paris, April 13.

A miners' strike has taken place at Grand-combe (Gard). It is not regarded as serious.

GREAT BRITAIN AND THE CONCERT.

Mr. Curzon has declared that Great Britain is acting in the fullest accord with the Powers, that she will endeavour to prevent war, and that she will co-operate in blockading Greece.

GREECE AND TURKEY.

The Christians have besieged the Mussulmans at Bérane, near Montenegro.

Paris, April 15.

In the Chamber at Athens, M. Delyannis, the Grecian Premier, was warmly applauded

when he maintained that the action of Turkey had obliged Greece to call out her army which would soon be ready. The rumour is current that a fresh incursion has been made into Turkey by a Grecian party.

An encounter between Greeks and Turks took place in the neighbourhood of Canea.

EXPLOSION IN A GERMAN MINE.

By an explosion in the Oberhausen Mine at Essen ten miners were killed. The explosion was due to fire-damp.

MOVEMENT OF BRITISH CRUISERS.

Paris, April 14.

Fourteen British cruisers passed through the Suez Canal during the month of March. This unusual movement is attributed to the condition of affairs in the Transvaal.

(FROM JAPANESE PAPERS.)

MAJOR-GENERAL HISHIJIMA.

Kobe, April 24.

Major-General Hishijima, Commander-in-Chief of the Third Brigade in Formosa, arrived at this port from the Island last night. To-day he left for Tokyo via Kyoto.

SANYO RAILWAY COMPANY.

The general meeting of the Sanyo Railway Company took place at the Kobe Chamber of Commerce to-day. The report and accounts were read and passed. Mr. Matsumoto Jutarō, President, Messrs. Fujita Denzaburo, Hara Rokuro and Teranishi Seiki, Directors, were re-elected.

FATAL GAMBLING DISPUTE.

Kyoto, April 24.

A party of gamblers quarrelled at Kami-Kyoku, Gobancho, yesterday, and one was killed, while three others received severe wounds in the course of the fight.

NEW CABLES.

Nagasaki, April 24.

The cable-steamer *Okunawa Maru* left this port to-day to lay a cable between Formosa and the Loochoos.

FIRE.

Osaka, April 24.

A store-house belonging to the 10th Cavalry regiment caught fire last night and was destroyed.

Aomori, April 24.

The Joint-stock Steamship Company, with a proposed capital of yen 300,000, is going to present a petition on the 29th inst.

SCHOOL STRIKE.

Matsuyama, April 24.

Some 150 students of a branch school of the Ehime Ken Ordinary Middle School, left school in a body yesterday. They allege non-confidence in the chief instructor as a cause for their action.

NAVAL MOVEMENTS.

Kobe, April 27.

The Japanese men-of-war *Chinyen*, *Fuso*, and *Takachiho* put into this port to-day. The *Takao* arrived last evening. Some other ships are to join the squadron and then it will leave for the China Sea via the Loochoos.

DRESSFUL KOREA.

Sōul, April 27.

A telegram received at the War Board states that the rioters in Ham-gyong-do were driven out of Korean territory; and that Sai Bun-kwan, the rebel leader, was killed by his followers.

The engagement of Russian soldiers has led to a protest from the English party and the old conservatives.

FIRE.

Toyama, April 27.

Fire broke out in Shin-minamicho, Imizugun last night and 104 houses were destroyed.

ORDER RESTORED AT THE

COLLIERIES.

Nagasaki, April 26.

The miners' agitations at the Hajima and Takashima Colliers have subsided.

FATAL FIRE AT ISHINDEN.

Tsū, April 27.

Fire broke out last evening in a school situated within the premises of the Senshiu Temple,

Ishinden (one of the centres of the Shinshū Sect), and destroyed the building. The fire caused injuries to 13 persons and resulted in the death of one.

ENLISTING FORMOSA POLICE.

Nagasaki, April 27.

Two thousand Policemen, to take service in Formosa, are to be enlisted in Nagasaki Ken.

SETTLING A SCHOOL TROUBLE.

Matsuyama, April 27.

The head-master of the Ordinary Middle School has decided to retire, whereupon the students went back to School on the 26th.

FIRE IN TOYAMA.

Toyama, April 27.

A fire broke out last evening in Shinminato-machi, Toyama, and burned down 104 buildings. Eight others were pulled down to check the progress of the conflagration.

RAILWAY DIRECTORS' DISPUTE.

Osaka, April 27.

There is a serious dispute among the directors of the Seiwa Railway Co., the President's choice of officers being challenged. Mr. Yanekura (President of the Tokyo Rice Exchange) and Mr. Taketa have come specially from Tokyo to mediate, but thus far without success. Mr. Okahashi (President) and Mr. Okano (Manager) have resigned.

REPAYMENT OF THE KOREAN LOAN.

Sōul, April 28.

The Korean Government shipped a million yen from Ninsen to-day to repay a portion of the 3,000,000 yen lent by Japan to Korea.

THE IMPERIAL JOURNEY.

Nagoya, April 28th.

T.I.M. the Emperor and Empress will stay a night at Shizuoka, and not at Nagoya, as previously reported.

MR. CONSUL-GENERAL CHINDA.

Kobe, April 28.

Mr. Chinda, Consul-General at Shanghai, and family, arrived at this port to-day by the *Kobe Maru*. To-morrow they leave for Tokyo by the *Nagoya Maru*.

MR. INAGAKI.

Osaka, April 28.

Mr. Inagaki, the new Minister to Siam, is due here to-morrow from Kyoto. A farewell entertainment is to be tendered him at the Osaka Hotel.

OSAKA PORT.

The Osaka Municipal Council held a special meeting yesterday when the construction plans for Osaka port were passed.

BURGLARY AT A BANK.

Mitajiri, April 29.

Last night a burglar broke into the Shoda Savings Bank, and after having carried off its strong box and broken it open in a field, took cash to the amount of 5,003 yen out of the box. Bonds and other things in the box were left intact.

FIRE AT SAKAE.

Sakai, April 29.

A small fire occurred here this morning. MIN YONG-CHU'S OFFICIAL APPOINTMENT.

Sōul, April 28.

Min Yong-chu has been appointment Vice-President of the Board of Legislation.

NEW TEA AT KOBE.

Kobe, April 29.

New tea, 1,200 catties, arrived here from Tosa yesterday, bringing up the total stock of new Tosa tea to about 2,000 catties. It is expected that some contracts for the sale of the Tosa tea will be arranged in a day or two.

TRADING ASSOCIATION.

Miyatsu, Tango, April 29.

The Japan, Russia and Korean Trading Company here held a regular general meeting to-day and decided to remove the Head Office to Kyoto.

FISHERS PATROL.

Takamatsu, April 29.

The Prefectural Assembly of Kagawa Ken has resolved to purchase a steamer at a cost of

yen 8,855, for the protection of the fisheries of the Ken.

KOREA AND THE RUSSIAN INSTRUCTORS.

Sōul, April 29.
The Korean Authorities held a conference last night as to the engagement of Russian drill-instructors, but a decision was not arrived at owing to the protest of the Prime Minister.

MR. INAGAKI.

Osaka, April 29.
Mr. Inagaki, the new Minister to Siam, arrived here to-day and put up at the Osaka Hotel. A farewell entertainment is to be tendered him to-morrow.

KOREAN INTELLIGENCE.

Sōul, April 29.
At the Cabinet Council held last evening in regard to the engagement of Russian soldiers, a large majority were reported to have been opposed to the scheme; the Cabinet, however, rose without coming to any definite conclusion.

The draft agreement relating to the engagement of Russian soldiers for the Korean army is said to comprise 16 articles extending altogether to more than 30 pages.

General Paul von Unterberger, Military Governor of the Ussuri Territory, arrived in Sōul on the 28th inst. He stated that after staying four or five days at the Korean capital he would proceed to Japan to recuperate at Miyazoshita, Hakone.

Min Yong-chu was summoned by the King to-day and proceeded to the Palace: It is believed that the King desires to consult him.

The Korean Minister to Japan was received in audience by the King of Korea yesterday.

THE IMPERIAL JOURNEY.

Kyoto, April 30.
T.I.M. the Emperor and Empress will leave here on the 4th of May, pass a night at Shizuoka and return to the capital the following day.

PRINCE ARISUGAWA.

Kobe, April 30.
H.I.H. Prince Arisugawa and suite are due here from Tokyo on the 3rd of May.

GOLD FOR OSAKA.

Kobe, April 30.
£251.50 of gold bullion arrived here by the P. & O. steamer *Verona*, yesterday and was handed over to the branch of the Yokohama Specie Bank.

THE SEIWA RAILWAY.

Osaka, April 30.
Owing to disputes in the Seiwa Company, Mr. Okahashi, President, has resigned. This step was followed by Mr. Iwade, a director. Mr. Takeda Tadaomi is the new President.

INCENDIARISM AND LOCAL POLITICS.

Akita, April 30.
At Minami-Akita-gun, the election of members of the District Assembly has caused tremendous excitement. Several cases of incendiarism are reported at various places, and six houses have been burned.

ANOTHER SCHOOL STRIKE.

Matsuyama, April 30.
At the Toyo branch of the Ehime Ken Ordinary Middle School, the students of the third class struck in a body on the 29th inst.

EARTHQUAKE.

Naoyaya, April 30.
A slight earthquake was felt here at 4 p.m. to-day.

Nagano, April 30.
A strong earthquake was felt here to-day at 4 p.m.

Matsumoto, April 30.
A strong earthquake occurred here at half past three p.m. to-day.

THE "KREISER."

Nagasaki, April 30.
The Russian sloop *Kreiser* left here for Vladivostok to-day.

KYOTO MUSEUM.

Kyoto, April 30.
The ceremony of opening the Kyoto Museum takes place on the 1st of May.

NEWS OF THE WORLD.

On April 1st, orders were received by Admiral Beardslee to prepare the U.S.S. *Philadelpia* for immediate dispatch to Honolulu.

The President of the United States has named General William F. Draper as Minister to Italy; and Mr. Andrew D. White, as Minister to Berlin.

The *Evening* announces that President Faure has been officially informed of the approaching visit of the Czar and Czarina to France.

By kind permission of Admiral F. V. McNair the Orchestra of the U.S. Flagship *Olympia* will play at the Grand Hotel during dinner this evening.

Six persons, including the owner and chief chemist, have been killed in a fire-damp explosion at the Borsig colliery, near Zabrez. The mine is still burning.

The Emperor of Germany telegraphed, on April 1st, his cordial congratulations to Prince Bismarck upon the occasion of his birthday. The ex-Chancellor was born April 1st, 1815.

Colonel Francis Rhodes, the brother of Cecil

Rhodes, has explained before the Parliamentary Commission that the cost of engineering the Jameson raid was \$250,000 (gold).

Colonel Fred Grant, a Commissioner of Police in New York, son of the late General Grant, has been offered the position of Assistant Secretary of War of the U.S., and has the offer under consideration.

The French Chamber of Deputies has adopted the port duties bill, imposing a tax upon foreign vessels of 1 franc 25 centimes per metric ton upon merchandise and upon each head of cattle or passenger landed.

The English Parliamentary chess party met on the evening of April 1st, to arrange for the match suggested by Mr. J. Henniker Heaton between the House of Commons and the American House of Congress.

The *Daily Mail* printed a dispatch from Cape Town at the beginning of April, saying it was reported that Delagoa Bay has been leased to Great Britain for thirty years at an annual rental of £500,000, and that the Transvaal Government was not aware of the arrangement until completed. The report was afterwards denied in London.

CHESS.

All Communications to be addressed to the Chess Editor.

The Yokohama Chess Club is closed for the season: and reopens on Monday 4th October.

The Tokyo Chess Club meets at the Tokyo Hotel, every Friday, from 1 p.m. to 7 p.m.

SOLUTION OF PROBLEM No. 305.

WHITE.

1—P to B 5

2—K takes B

3—B to Kt 7 mate

2—R to K B 7

3—Kt takes B mate

3—B to K 3 mate

3—B to K 7 mate

Correct answers from W.H.S., J.W.E., and Omega.

BLACK.

1—B takes R ch.

2—B takes Kt

1—B takes R (Kt sq.)

2—B takes R

if 2—K takes Kt

if 2—B takes Kt

SOLUTION OF PROBLEM No. 306.

WHITE.

39 K Kt3	KixP ch.		

NOTES.

- (a) This move was adopted by Tschigorin; it is doubtful, however, whether the play is fully as good as P to K3 or P to Q B4.
(b) White might have played Q takes Kt, but the move selected seems preferable, for it gives him the open Q file.
(c) In order to prevent Black from P to Q B4. The following move, P to Q Kt4, is made for the same purpose.
(d) The only way to dislodge the Black Q B, but the advance of the Q Kt P will enable Black to move P to Q B4, relieving his position.
(e) Black cannot play Q to B8 ch., followed by Q takes Kt ch., for White then moves K to Kt3, and Black is unable stop the threatening mate.
(f) White hardly adopted the best play when he advanced the K P. His pawn at Q4 now becomes extremely weak, and he is obliged to keep his Kt at B3 in order to guard it.
(g) Causes the loss of a pawn, as the progress of the game shows.
(h) P to Kt4 was a more promising play. Black then had a much better chance to attack the King's side pawns with the King.
(i) B takes Kt, followed by P to K4, was probably better. The exchange leaves White with Kt against Bishop, which gives the best drawing chances.

- (k) K takes P, followed by P to Kt4, was hardly any better.
(l) He could not play Kt takes B for P takes Kt ch., followed by K takes P, would have given Black an easy win. Nor could he well play K to K3. Black then would have continued K takes P, and if Kt to Kt4 ch., then K to B4. White being obliged to answer Kt to B2. Black is enabled to gain a move with P to Kt3, continuing then K to Kt5 or K to B5, according to White's Kt or K move.
(m) Black might have prevented this play to moving K to B3, but then he could not successfully advance the Q P.
(n) K to B6 was of no avail. White would have answered K to K5.
(o) After this move a draw was agreed upon. Black has no means to dislodge the White Kt.

GAME No. 700.
(THIRD GAME.)
(GIUOCO PIANO.)

White—H. N. Pillsbury.		Black—J. W. Showalter.	
WHITE.	BLACK.	WHITE.	BLACK.
1 P K4	P K4	21 Q R4	Q KB2
2 Kt KB3	Kt QB3	22 P Kt4	Q K2 (g)
3 B B4	B B4	23 Kt K4	Kt B2
4 Kt B3	P Q3	24 Q R5	K Kt sq.
5 P Q3	P QR3 (a)	25 P KR4	P R3 (h)
6 B K3	BxB (b)	26 R Kt2	R B2
7 PxP	Kt R4	27 K R-q.	P B5
8 B Kt3	Kt B4	28 QR Kt	
9 RPxKt	Kt R3 (c)		
10 Castles	P QB3 (d)		
11 P Q4	Q K2	29 PxP	K RB sq.
12 Q K sq.	Castles	30 P K5	RPxP
13 Q Kt3	P B3 (e)	31 PxP	KixP
14 P R3	B K3	32 R Kt (j)	PxR
15 R B2	QR K sq.	33 KixKt	P Kt3
16 QR KB		34 QxP ch.	Q Kt2
	B B sq.	35 Q K6 ch.	K R-q. (k)
17 Kt KR4	K R-q.	36 R K3	R B8 ch.
18 P Q5 (l)	P QB4	37 K K2	K R B7 ch.
19 Kt B5	BxKt	38 K B3	R B8 ch.
20 PxR	R B-q.	39 K K4	R KR8
		40 Q K8 ch.	Resigns. (l)

- (a) 5..... P to QR3 is a lost move. Tschigorin plays 5..... Kt to B3 in this position, and if 6. B to K3, exchanges bishops in conformity with his theory that the double pawn in the centre is not so dangerous as might be supposed generally.
(b) The exchange is compulsory now, as he cannot withdraw the B to R2 without getting a piece out of the play, as White would take the bishop.
(c) 9..... Kt to B3 would be less favourable in view of White's open K file. Many sacrificing possibilities might occur.
(d) Weakening the Q P. He feels this weakness very much later on, but has made the move, as he intends to develop the Q to K2.
(e) This move has to be made sooner or later. As a matter of fact the initial plan of the defence was wrong, and although every single move afterwards is the right one under the circumstances, he can no more mend matters.

Position after Black's 17th move.

WHITE.

- (f) Up to here White manoeuvred strategically only. The final attack commences with the advance of the Q P.
(g) Black sees the coming danger well enough; but he has no means of averting it. Whether he loses a move or two with the queen, or any other piece makes really no difference.
(h) Temporarily preventing White's P to Kt5; but it has to come sooner or later.
(i) If necessary White could move 28—P to Kt4, and so keep the file closed.
(j) Decisive. Mr. Pillsbury conducted the attack with great judgment and skill. He saw his way clearly; spotted Black's weak points, and kept up a vigorous attack to the end.
(k) If 35..... K to B sq., then 36—Q takes R, ch., R takes Q; 37—Kt to K6, ch., &c.

- (l) For, if 40..... Q to Kt sq., mate in two moves follows.

35 PxP	RxP	70 K K6	Resigns.

NOTES.

- (a) In the fourth game of the match Mr. Showalter played R to K sq.; Kt takes P followed by B to K Kt5, which resulted in the loss of a pawn without adequate advantage in position. The continuation adopted in the present contest is a much superior one and gives White the preferable game.
(b) White could not well play R takes P on account of Black's reply Kt (B4) takes Q P. If then R takes Kt Black answers Kt takes Kt.
(c) Superior to P takes P, which would have relieved Black's game. The latter would have answered B takes P, and if Kt takes K P then B takes R P ch. followed by Q to R5 ch. and Q takes Kt.
(d) Black is unable to maintain the pawn, and for that reason the text play is probably the best. White being obliged to capture with pawn, will obstruct his open K file and the K P remains isolated.
(e) Black could not well play B to K3 on account of Q to B3 followed by Q R to Q sq. He might, however, have moved B to Q3, which pro-

bably was superior to Q takes Q. White then had hardly any better play than B takes B and Black, by answering Kt takes B, followed by Q to K 2 could have fairly neutralized White's attack.

(i) Black had no better play; there was no way of preventing White from R to K 7 play, since Black could not move B to K 3 on account of P to Q 4 reply. A close examination will prove that Black's game was inferior, if not hopeless already.

(g) R to Kt sq. could hardly be played, for if White continues R to K 7 he will win either B P or Kt P.

(h) Necessary, so as to prevent White from B to Kt 7 after R to K 7 has been played.

(i) B to Q 5 would have pretty nearly forced Black to play B to K 3, sacrificing the KBP, yet it is doubtful whether White could have forced a win on account of his double pawn. R to K B sq. as played seems much superior.

(k) White should have played P to Q R 4 so as to prevent Black from P to Q Kt 4 move. By omitting it he gave Black a chance to relieve his queen's wing. Had White played 31, P to Q R 4, followed by R to R 7, Black would have been obliged to answer P to Q R 4, and Q Kt P would have become extremely weak.

(l) He could hardly play R to Kt sq. for P to Q 6 followed by B to Q 5 might have become threatening.

(m) Had Black exchanged rooks he could not have stopped the advance of the Q P.

(n) If there was a chance of escape for Black, it rested with B to Q 2 move. White then hardly could continue otherwise than R to Q 8, and Black answers R (Kt 4) takes Q P, sacrificing the exchange for the Q P.

WATERING APPARATUS

Non-freezing & Ordinary Hydrants and Street Washers.

Garden Watering Boxes and Apparatus.

Gun-Metal, Copper, and Cast-Iron Cocks and Valves.

E. GUESNIER, E.C.P.,
Engineer and Cook Mfr.,
(Successor of ACHILLE CADET)
27, Rue des Tailleurs,
PARIS.

Hydrophobic and Massage Apparatus supplied to the Vichy Co. Vapour Baths (Berthe system).

Apply to BOWES & CO., agents for M. GUESNIER & CO., PARIS.

December 5, 1896.

EXTRA-TERRITORIALITY IN JAPAN.

AN ESSAY read before the Kobe and Osaka Missionary Conference. By D. CROSBY GREENE.
"JAPAN MAIL" Office, Main Street, Yokohama.

ASK FOR

LIEBIG COMPANY'S

And see that each Jar bears Justus von Liebig's Signature in Blue Ink across the Label.

Justus von Liebig

To be had of all Storekeepers and Dealers.

March 6th, 1897.

EXTRACT OF MEAT

FINEST AND CHEAPEST MEAT-FLAVOURING STOCK FOR SOUPS, MADE DISHES AND SAUCES.

Invaluable as an Efficient Tonic in all cases of Weakness.

Keeps good in the hottest climates, and for any length of time.

It's a Far Cry FROM FOREIGN LANDS TO Chicago, U. S. A.

But no matter where you live, we are anxious to do business with you in Clothing, Shoes, Dry Goods, Watches, Jewelry, Sewing Machines, Harness, Saddles, Hardware, Tools, Guns, Revolvers, Ammunition, Bicycles, Agricultural Implements, Vehicles of all kinds, Furniture, Books on every subject. We handle only dependable goods—no trash.

We believe we can send to any class, goods of any kind, perfect in quality, at lower prices, laid down, than the residents thereof can obtain them anywhere else. Our belief is founded on a quarter century's experience. To acquaint you with our facilities we will send you, or any other foreign resident, free of all charges, our "BUYERS' GUIDE," a 2½ pound book, 700 pages, 13,000 illustrations, 40,000 descriptions—It is unique, useful, valuable—and also our "HAND BOOK FOR FOREIGN BUYERS," which contains all necessary information to put you in close touch with our marvelous methods. WILL YOU ASK US TO DO SO?

Montgomery Ward & Co.

111 to 118 Michigan Ave. Chicago, U. S. A.

September 19th, 1896.

THE GREATEST WONDERS OF MODERN TIME HOLLOWAY'S FILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir Samuel Ruge, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN. HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations. Mr. J. T. Cooper, in his account of his extraordinary travels in China, published in 1891, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining stock."

Sold by all Chemists and Medicine Vendors throughout the World.

May 1st, 1897.

MILKMAID BRAND CONDENSED MILK

The "Milkmaid" Brand is guaranteed to contain all the cream of the original milk. In the process of manufacture nothing but water is removed, nothing but the best refined sugar added.

Avoid low-priced brands from which the cream has been abstracted, and ask for the "Milkmaid" Brand, the best for all purposes.

June 14th, 1896.

DINNEFORDS

The Universal Remedy for Acidity of the Stomach, Headache, Heartburn, Indigestion, Sour Eructations, Bilious Affections.

MAGNESIA

Sold Throughout the World.

N.B.—ASK FOR DINNEFORD'S MAGNESIA.

March 6th, 1896.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, MAY 8TH, 1897.

BIRTH.

On the 7th inst. at 120-C Bluff, Yokohama, the wife of L. H. ABEL, of a daughter.

MARRIAGE.

At Tokyo, on the 4th inst., at Her Britannic Majesty's Vice-Consulate before Arthur Hyde Lay, Esq. H.M.'s Vice-Consul, and afterwards at St. Andrew's Church, Shiba, by the Rev. A. E. Webb, LORENZO THOMAS CORKE, Esq. of Azabu, Tokyo, to Miss ROSA McDONALD, of Shimbashi, Tokyo.

DEATHS.

On the May 1st, at No. 69, Bluff, MATTHEW TOWN. SEND BETHUNE MACPHERSON aged 47 years.

On May 2nd, at Kobe, CARL KONPPE, a native of Düsseldorf, Germany, aged 42 years.

SUMMARY OF NEWS.

LORD SALISBURY has returned from Cannes to London.

THE famous New York "Patriarchs" have been disbanded.

THE insurrection in Manila is being slowly but surely put down.

MR. THEODORE ROOSEVELT, of New York, is the new Assistant Secretary of the U.S. Navy.

MARSHAL PRIMO DE RIVERA assumed charge, as Governor-General of the Philippines, on April 23rd.

MARQUIS ITO and Sir Ernest Mason Satow, the British Minister, left Yokohama for England on Friday.

OWING to a heavy rainstorm on Monday, two wash-outs occurred on the Todaido railway and

thus led to the postponement of the Emperor and Empress's return to Tokyo.

THE Spring Meeting of the Nippon Race Club concluded on Tuesday with a most enjoyable "off-day."

RECENT returns of old residents to Tokyo include Mr. T. B. Glover and Professor Basil Hall Chamberlain.

MR. M. T. B. MACPHERSON was buried in Yokohama Cemetery on Monday, amid every sign of deep respect.

A TEMPORARY bridge spanning the Futako ferry on the River Rokugo, Ebara-bun, was swept away on the 3rd inst.

THE Greeks have covered themselves with disgrace during the past week by precipitate flight before the Turkish forces.

M. DELYANNIS, the Greek Prime Minister, refusing to resign, has been dismissed, and M. Ralli has formed a Cabinet.

THE Japanese Standing Squadron is to leave Kobe on the 5th inst. for a cruise in the China Sea, and will not return to Yokosuka until July.

Two weddings of foreign residents of Tokyo took place during the week: Mr. L. T. Corke to Miss Macdonald; Mr. Metz to Miss Summers.

CEYLON proposes, as one of the methods of commemorating the Queen's Record Reign, to procure a statue of Her Majesty for Colombo.

By the N.Y.K. steamer *Omi Maru*, Mr. A. S. Aldrich, for many years Secretary of the Imperial Government Railway Bureau, went home to Australia.

At the last ballot of the Reform Club, London, every candidate bearing a German name was black-balled as a demonstration against the Emperor William.

H.I.H. PRINCE KOMATSU YORIHITO, a Lieutenant serving on board the *Fuso*, has been released from the ship and appointed to the Bureau of Naval Command.

Two hundred and fifty-seven contract emigrants to Hawaii, collected by the Yokohama Emigration Company, left Yokohama for Hawaii by the *Belgia* on the 4th inst.

THE Investigation Committee inquiring into the Ashio copper mine affair, has proceeded so far with its researches that it will be able to present its report about the middle of this month.

H.I.H. PRINCE KAN-IN, Commandant of the First Regiment of Cavalry in the First Army Division, returned to the capital on the 30th ult. from Narashino, Chiba Ken, where military manoeuvres have been proceeding.

THE Central Authorities have instructed the Yokohama Town Office, through the Kanagawa Kencho, that a subsidy of yen 2,055,685 will be defrayed by the Treasury towards the expansion of the Yokohama Water Works.

THE Kogatani Copper Mine, in Ishikawa Prefecture, that comes next to the Aho and Besshi Copper Mines in point of output, has likewise incurred the enmity of the people in the locality. A petition has been presented to the Authorities asking that the Kogatani mine be closed.

SIR MICHAEL HICKS-BRACH, in his Budget statement, said he had found it necessary, in framing the estimates, to keep carefully in view the present war-cloud in the East, whereof nobody can at present foresee the duration and extent. It had been decided that the expenditures for the current year should be £101,791,000 and the

revenue £103,360,000, setting down £500,000 for the Navy Estimates and the increase of the Garrison at the Cape, for the purpose of maintaining a paramount position in Africa.

THE Duchess of Sparta, whilst returning from one of the Hospitals, was jeered at by the mob and compelled to seek refuge in the place she had just left. A carriage was brought round and she was driven away at a gallop to the Palace.

THE Naval Authorities have decided to dispatch Commander Shimamura to the scene of war in Greece in the capacity of military *attaché* to the Japanese Legation in Italy. He left Yokohama on the 7th inst.

THE Nippon Yusen Kaisha, besides the ten steamers already ordered from England, have contracted for three more steamers of about 3,500 tons each. They are to cost yen 800,000 each. Three vessels will be put on the Australian run.

H.M.S. *Redpole* is not going to Behring Sea this summer, her place being taken by a second-class cruiser, as the Fishery Commissioners have to be conveyed about on their investigations on the Pacific side of the Sea.

THE Powers have decided not to mediate until the Greeks, in token of submission to the judgment of the Concert, recall Colonel Vassos and the Greek troops under his command in Crete. M. Hanotaux, French Minister of Foreign Affairs, has had an interview lasting five hours with the Turkish Ambassador at Paris.

THE steamer *Genyo Maru*, of the Osaka Shosen Kaisha, when off Mikuni port, Fukui Ken, on the evening of the 25th ult. struck a shoal, being driven out of her course by a north-westerly wind. The passengers, 250 in all, were safely landed at Shikunaka. During the night the vessel floated and next morning returned to port.

THE following appointments will be officially announced in a few days:—Mr. Kurino, Minister to Italy, to be Minister to France; Mr. Makino, Vice-Minister of the Educational Department, to be Minister to Italy; Mr. Chinda, Consul-General in Shanghai, to be *Chargé d'Affaires* in Brazil; and Mr. Tazuki, President of the Bureau of the Imperial Library, to be Vice-Minister of Education.

THE prospect has been a little brighter this week for some importers, though another seven days' interval has passed without a sale of Yarn, with the exception of some bales landed sea-damaged on the *Yamashiro Maru*. These fetched reasonable rates at the auction. A few hundred pieces of shirtings have been sold during the week, but the price has not been given away. In fancies nothing beyond rumours has to be reported, and woollens are stagnant. Holders have managed to raise prices in the metal market, buyers seeing the sweet reasonableness of the advance in view of the higher first cost, steep freights and depressed exchange. Though prices remain unchanged, kerosene has seen a little movement this week; and sugars remain as brisk as ever. The silk season is nominally drawing to a close, and the week's business has been small and spasmodic. Good news comes from Italy regarding the crop there. The small stock of poor quality waste silk now left in Yokohama offers few inducements and there is therefore next to no business doing. The Tea market opened on the 1st and both outgoing mail steamers for the American continent had good first shipments. Tasters speak well of the cup quality but grumble at the make of leaf. Exchange is very lymphatic as the week closes.

SPIRIT OF THE VERNACULAR PRESS
DURING THE WEEK.

Years ago foreign students of Japan's affairs came to the definite conclusion that her future lay in manufacturing industries, and that, if she was ever to be a wealthy country she must devote herself to placing the produce of her handiwork in foreign markets. It was chiefly for that reason that the development of her commerce with the outer world assumed prime importance. Its dimensions were not a matter of such consequence as the fact that it opened routes destined inevitably to enrich the nation if due advantage were taken of them. Often, in the early eighties, the subject was discussed in these columns, and it must be admitted that the events of the past few years indicate a growing appreciation on the part of the Japanese of the direction in which their energies ought to be applied. We find in the *Nichi Nichi Shimbun* two cleverly written articles on the topic—clever in the sense that they present a sufficiently striking picture of the country's natural endowments and of the capacities of its people, but unsatisfactory in the sense that they do not pass beyond the realm of criticism, and that they fail to clearly indicate any remedy for the state of affairs condemned by the writer. However, our contemporary promises to exchange the negative rôle of fault-finding for the positive rôle of suggestion, on some future occasion. He sets out by stating the truism that the first aim of wise statesmanship should be to determine the basis of a national policy, and that, thereafter, all administrative measures should be shaped in accordance with that policy. It seems somewhat belated that in this thirtieth year of the *Meiji* era there should still be talk of a basis of national policy. The *Nichi Nichi* itself notices the fact with regret, but maintains that the State undoubtedly suffers even to-day from lack of a distinct perspective. For centuries back agriculture has been the chief pursuit of the people. Men, not of the *shisoku* class, conceived no ambition higher than to acquire a tract of land and devote themselves peacefully to a pursuit placed by social canons at the head of all bread-winning occupations. The prejudice in favour of farming still retains much of its potency, but is gradually getting weaker. Not merely the direct effects of railway extension and factory construction have begun to be powerful, but also the indirect effects, chief among the latter being the development of transactions in shares. So profitable and withal so exciting has that kind of business become that those who were at first content to engage in it vicariously, now conceive the ambition of themselves becoming promoters of industrial enterprises, and thus a new impetus has been given to progress: whether it be a wholly sound or a partially dangerous impetus is not debated. But the Administration does not appear to have grasped the situation. Stated briefly, Japan's national policy should be to increase her exports of manufactured goods and to exclude the import of manufactured goods from abroad. Whether that involves the adoption of a protective system, our contemporary does not say; it limits itself to the general assertion. Every conceivable inducement to aim at industrial development invites the Japanese. They are surrounded by countries that offer them an abundance of raw material. They themselves can produce raw material of a most valuable nature. They have an ample supply of coal, their home consumption of the mineral at present being only sixty per cent. of the quantity taken from the mines. They have an abundant population. On the continent of Europe only three countries surpass Japan in the ratio of population to superficies, for Japan has 1,634 persons per square mile to Belgium's 1,649, Holland's 2,201 and Italy's 3,240. As to manufacturing ability, no people in the Occident can compare with the Japanese in manual dexterity. Moreover, labour is cheap, and the land is blessed with a multitude of rivers and lakes constituting an inexhaustible source of water power, which modern science converts into electricity and employs as the most potent factor in manu-

facturing industry. On the other hand, the agricultural resources of the country can not possibly be developed in proportion to the growth of the population. Nature has set hard-and-fast limits in that direction. Unless some means can be found for feeding the teeming millions and utilizing their wealth-producing capacities, the only escape from want and suffering lies in emigration, which means the practical enslavement of the emigrants, for the employment that they find abroad is little better than slavery. From every point of view the basis of the national policy should be the development of manufacturing industry. But it does not appear that the fact is fully recognised by the Government. After the war, public opinion declared in favour, first, of expansion of armaments; secondly, of encouragement of industrial enterprise. The former project has been carried to the stage of practical inception; the latter is comparatively backward. A scheme of State aid to navigation has inspired the opening of several new steamship services. A scheme of ship-building encouragement has induced men to order vessels abroad, and, as a secondary result, to construct docks in Japan. But the general problem of industrial development does not find quick solution, nor does there seem to be much official consciousness of its vital importance. The *Nichi Nichi* elaborates this subject at considerable length, but want of space forbids us to follow it further, especially as it stops short of the really interesting question—how is the required impulse to be engendered?

Another old problem, cognate with the above and invested with some novelty by special circumstances of the time—the problem of emigration—is discussed by the *Fiji Shimpō*. Starting from the fundamental facts that the population of Japan grew from 37,450,000 in 1884 to 42,120,000 in 1894, an increase of 3,670,000 in ten years, and that the area of cultivated land did not increase, and could not possibly increase, in anything like the same ratio, the *Fiji* arrives at the inevitable conclusion that emigration is essential. Besides, even though the excess of population beyond the limits of sustenance did not point imperatively to that resource, the country's interests would dictate it. England's extraordinary wealth and strength are due not to any exceptional moral or physical qualities with which her people are endowed, but to their remarkable success as colonists. All over the world they have established lesser Englands, each of which means a corresponding addition to the mother country's commerce and a corresponding development of her strength. Japan herself has had an object lesson in the effects of colonization. In 1886 her exports to Hawaii aggregated 25,000 *yen*; in 1895, the figure was 392,000 *yen*. That remarkable growth is attributable simply and solely to the fact that her people had settled there in large numbers in the interval. It is no longer possible to affirm that the Japanese are a stay-at-home, unenterprising people. That theory has been completely exploded by facts. In Hawaii, in San Francisco, in Vancouver, in Canada, in Queensland, in New Caledonia, in the Philippines, in Singapore, in Vladivostok, in Korea, in Brazil, everywhere in short, Japanese colonies now exist. Despite the difficulties that present themselves in Hawaii, hundreds still press thither; and despite the dangers encountered in Korea and the scant security that the laws of that Kingdom afford for life and property, the Japanese still cross over and resolutely penetrate to the interior of the peninsula. So far as the spirit of enterprise and the courage to follow fortune in the face of peril are concerned, the qualifications of the Japanese to emigrate to strange lands can no longer be denied. Nor can there be the smallest question that economical necessity and national interest point to emigration as a wise relief and a desirable consummation. The Government should keep these facts in view when dealing with the Hawaiian complication. It is not desirable that the empire's honour should be tarnished by any display of force when the *vis-à-vis* is so weak, but every care must be taken to avoid a precedent hurtful to the free pro-

gress of the people's emigration. The time has come for Japan to think seriously of her people in foreign lands, and to send her war-ships periodically to places where her nationals are earning their bread and opening new markets for their country's products. (With what monotony does history repeat itself!)

The results of adopting gold monometallism are beginning to alarm the *Fiji Shimpō*. It admits all the arguments in favour of eliminating exchange fluctuations, and grants the immense difficulty of determining whether the constant changes in the relative values of the two metals are due to the appreciation of gold or to the depreciation of silver. It also admits that, where theory failed to supply any conclusive answer, Japan's wisest plan was to follow the practical lead of all the civilized countries of the Occident. But, looking at the consequences so far as they can now be viewed, there is considerable reason for uneasiness. One great hope entertained by the Government in framing the Coinage Bill, namely, that a route for the ingress of foreign capital would be opened, does not seem likely to be realized. On the other hand, whatever advantages Japan may derive from the new system in her trade with gold-using countries, she certainly cannot look for anything but disadvantage in her trade with the silver-using countries of the Orient, notably China. The *Fiji* does not state whether the actual course of recent commerce has suggested that inference: it merely lays down the general proposition, and refers to the serious loss that must result if the Chinese markets cease to offer a ready field for the sale of Japanese yarns, marine products, and matches. In the case of yarns, however, there is a special consideration. The Japanese Government, in deference to China's earnest solicitation and in view of compensatory concessions on her part, agreed to leave her a free hand in the matter of taxing goods manufactured within her borders. But China seems to have abandoned the idea of utilizing that concession. She is not levying any impost upon cotton goods produced at Shanghai and elsewhere, and the result is that whereas Japanese manufacturers, deterred by the prospect of heavy taxation and influenced by the hope of being able to place their own yarns in the Chinese markets at cheaper prices than those of yarns manufactured in China, abandoned their original intention of starting factories there, Europeans and Americans adhered to the project and now appear destined to reap the benefits of their perseverance. That fact, combined with the possibility of a further fall in the gold price of silver, may completely turn the tables, and throw open the Japanese markets to yarns produced in China. It is thus very conceivable that the indemnity won by Japan at such a cost of blood and effort may ultimately find its way back to China through the routes of commerce. The *Fiji* does not blame any one, but simply draws attention to these interesting phases of international fortune.

Considerable as has been the development of the cotton-spinning industry in Japan, and successful as have been the results hitherto attained, the *Chuo Shimbun* does not consider the outlook at all hopeful. The fact is that Japanese spinners rely solely upon the home demand. They have not captured any foreign market, nor are they making any resolute efforts to capture one. Gradually the number of factories has increased until now fully a million spindles are at work, turning out about a hundred million catties annually. Still that the domestic demand is not supplied becomes at once apparent when we observe that some ten million catties, valued at 7 or 8 million *yen*, are imported every year. The imported yarns come from England and are of the finest counts, their price running to about 300 *yen* per bale, whereas Japanese mills can not turn out anything finer than 32 counts, or secure a higher price than 190 *yen*, a bale. The explanation of that is to be found in the operatives' want of skill. Japan is still a

child in the matter of cotton-spinning. If her export of yarns has recently shown a tendency to increase, it is not because her capacities for competition have improved, but because the closing of the Indian Mints to silver coinage and the partial interruption of the Bombay mills owing to the plague, have created a temporary opportunity. When no such abnormal advantages operated in Japan's favour, her 16-count yarns were beaten completely in Tientsin and Newchwang by Indian yarns, the difference in favour of the latter being from 9 to 13 *yen* a bale. The same experience was repeated in Hongkong, and Japan's chances of competition are now less than ever, the price of coal having risen from 1 to 2 *yen* per ton since last year, and the rate of wages also having appreciated. But the foundation fact of the matter is that the home markets are too favourable to Japanese manufacturers. So long as mills pay from 10 to 12 per cent. on the capital invested, shareholders will be content, and managers will see no special reason to exert themselves. By-and-by, however, the limits of the domestic demand will be reached, and unless access to foreign markets has been secured before that time, things will fare ill with Japanese manufacturers. Now is the season for more expert and more economical organization.

The foreign trade of the country during the first quarter of the year is analysed by the *Osaka Asahi Shimbun*. Last year, imports exceeded exports by over fifty million *yen*, and the course of trade this year has consequently been watched with some anxiety. It appears from Customs returns that exports, as compared with the corresponding period of last year, show an increase of 39 per cent., and imports an increase of 15 per cent., the total increase of the whole trade being 24 per cent., or 16,480,000 *yen*, approximately. Imports remain in excess of exports, but whereas the difference during the first quarter of 1896 was over ten million *yen*, it is only 6,540,000 this year. The staples of export exhibiting the largest growth are raw silk and cotton yarns, the former being credited with an increase of 5,810,000 *yen*, and the latter with an increase of 1,630,000 *yen*. Of course the improvement in the silk business is easily understood when we remember that exceptional causes operated to reduce the demand of Europe and America last year. Similarly, the development of the export of yarns is doubtless attributable to the prevalence of the plague in Bombay, and the consequent stopping of many Indian mills. Still, when we observe that the import of raw cotton during the quarter increased by 3,920,000 *yen*, it becomes plain that the spinning industry is progressing rapidly. Rice, again, owing to the partial failure of last year's harvest in Japan, as well as the comparative abundance of the Korean harvest and the low price at which the grain was procurable in the peninsula, shows an increased import of 2,470,000 *yen*, and stands third on the catalogue of staples of import. The nation purchased 1,300,000 *yen* worth of machinery more than in the first quarter of 1896, which is unquestionably a good feature. On the whole, the *Osaka* journal takes a hopeful view of the situation, its only source of disquietude being that a total increment of 1,960,000 *yen* is recorded in the case of four articles classed by our contemporary as luxuries, namely, yarns of fine counts, camlets, satins, and watches. The *Asahi* infers that the people have not recovered completely from the fit of extravagance engendered by the victories over China, and thinks that influential voices should be raised against the danger of ruining the country by luxury (*shashi bōku*).

The *Shogyo Shimpō* probably detects some evidences of undue alarm caused by the news that the entry of inferior grades of Japanese tea into the United States is to be interdicted from the beginning of this month. It writes as though tea-dealers and tea-growers, under the influence of that alarm, were disposed to stop the production of all low-class teas, and limit themselves to the best kinds only. That of course, would be most unwise. The taste of

consumers is the first thing to be considered, and it is not imaginable that all consumers will desire the finest grades of tea only. The *Shogyo* has a good deal to say that is very sensible on this subject, but we need scarcely re-produce its remarks.

Mr. Kawashima Jun, a prominent member of the House of Representatives and founder of the Reform Party, is quoted by the *Kokumin* on the subject of sociology in Japan. The article is long, but a great part of it is taken up with an exposition of the doctrines advanced by the two schools of sociologists in Germany. Mr. Kawashima thinks that the great question of labour and capital is not likely to trouble Japan for some time, but he feels considerable uneasiness about the improvement that has taken place, and is still taking place rapidly, in the scale of living as compared with the resources of the lower middle classes, for example, petty officials, police constables, school teachers, and so forth; men who are under the obligation of keeping up a certain appearance, but whose slender means do not enable them to do so. From that source he anticipates trouble, and believes that Japan may find herself confronted by the socialistic problem sooner than she anticipates, though he recognises that great inequalities of wealth and many other outgrowths of the plutocratic civilization of the Occident are still comparatively unknown in this country.

COUNT OKUMA ON TAXATION.

At a meeting of the Japan Economic Society held at the Seiyoken, Ueno, on the 3rd instant, Marquises Ito, Saigo, and Hachisuka, Counts Okuma, Kabayama, and Inouye, Vice-Admiral Ito, Colonel Fukushima and other dignitaries were present. The company numbered altogether 100 or 150. Count Okuma, in the course of a speech, remarked:—If our former revenue amounted to sixty millions *yen*, we can not now assert that the present revenue of one hundred and twenty millions is a remarkable increase. The sum of two hundred and forty millions may seem considerable, but it is one hundred and twenty millions only in gold. Therefore, expenditures that were estimated twenty-five years ago at 120,000,000 *yen*, cannot be regarded as extraordinary when compared with the figures for the current year, which are only double the former amount. Moreover, upon investigation, we find that the prices of commodities have risen fifty per cent., and this simple fact alone justifies the augmentation of the State's annual expenditures. But the expenditures have not increased in proportion, and in some years the amount remained the same, or rather decreased. Ten years ago the number of public functionaries that received salaries direct from the Treasury was 46,000, and their salaries amounted to 12,000,000 *yen*. The number remains stationary at present, but the salaries are a little more than 11,000,000 *yen*, thus showing a decrease as compared with the figures just mentioned. The average salary for officials, from the highest minister to the lowest clerk, does not exceed 250 *yen* per annum, and I have discovered that officials of the lowest classes are now receiving a smaller amount of remuneration than ordinary coolies. I cannot but regret that policemen and overseers of forests, who are discharging most onerous duties for the State, and local prefectural functionaries are receiving salaries lower than the wages given to coolies and labourers. It is thus easy to perceive that the officials of twenty-five years ago were more amply remunerated than those of the present time. Apart from these circumstances, the question of *post bellum* undertakings has led to the expansion of various enterprises, and in consequence, sudden inequalities have occurred between revenue and expenditure. Nor is it improbable that taxes must be considerably increased to provide funds for carrying out the schemes contemplated after the war, yet the amount of the increase will not reach thirty millions of *yen*. That is an insignificant sum. The proposed expansion of the Army and Navy alone will

require an outlay of 340,000,000 or 350,000,000 *yen*, including continuing expenditures. The economic problems now upon the *tapis* are of deep interest. The first question is, can the people bear the ever swelling volume of expenditure? Twenty-five ago, the population of Japan was only thirty-three millions, and it has increased by ten millions since then. In those early days the foreign trade did not exceed forty millions of *yen*, but now it has risen to three hundred millions, an increase nearly eight or nine times as large as the former figures. As to railways, the only line in existence was that between Tokyo and Yokohama. Now the length of railways extends over two thousand three hundred miles. Again, turning to ships, I find that the vessels that were taken from various feudal lords in consequence of the abolition of the clan system and the establishment of prefectures instead, did not exceed ten in number. Even those vessels were in a shattered condition, and besides them Mr. Iwasaki possessed one or two ships of a similar class. At present, however, the tonnage of Japanese vessels reaches 400,000, and I may venture to say that Japan constitutes a centre of maritime enterprise. Now what about spinning? At the time of which I am speaking, there were only one or two thousand spindles, but the number at present has grown to a million. Twenty-five years ago, we had a revenue of sixty millions; to-day we have one hundred and twenty millions coming into the Treasury. But that amount is only nominal, for it is only half as much in gold. Until the 6th year of Meiji salaries were paid in gold. Now the question arises whether it will be necessary to maintain an equality between revenue and expenditures by decreasing the number of officials by half, and economising all other expenses, in view of the expansion of State administration? The army and navy and works of administration are all imperfect, and the growing prosperity of the country necessitates their extension. The affairs of the world are characterized by complexity and a tendency toward expansion. In order to maintain the present status of the army and navy the people are required to defray the expenses connected therewith. The question of increasing taxation thus presents itself. These two problems are therefore fit subjects of discussion and investigation.

MARQUIS ITO.

The public may be prepared to hear that all kinds of political projects are connected with Marquis Ito's trip to Europe. Inferences will naturally be drawn from the analogy between Marquis Yamagata's visit to St. Petersburg in company with the Imperial Envoy to the Czar's Coronation, and Marquis Ito's journey to London simultaneously with Prince Arisugawa's mission to the Diamond Jubilee. But there does not appear to be any reason whatever for supposing that Marquis Ito is entrusted with State business. His trip was suggested originally by Prince Arisugawa, and though the idea received the Sovereign's sanction at the time, practical effect was not given to it until His Majesty, after farewell audience to the Prince in Kyoto when the latter was en route for Europe, telegraphed commands to the Marquis in Tokyo. It is understood that, before leaving the capital, Marquis Ito visited Count Okuma, and assured the Minister of Foreign Affairs that if any occasion arose for utilizing his services during his stay in Europe, instructions might be sent to him with full confidence that they would receive his best attention. The act was graceful, and well worthy of Marquis Ito, who is before all things a statesman, but we may be permitted to hope that no contingency requiring His Excellency's special attention will occur during his absence.

JAPANESE TOPICS.

The estimate for the extensive work of harbour construction, planned by the citizens of Osaka, has been changed from 21,675,000 *yen* to 22,490,400 *yen*. Application was made to the Government for a grant of 4,680,000 *yen* in aid, to be paid in 8 years at the rate of 565,000 *yen* annually. The Government and the Diet approved the total figure but changed the period of 8 years into 10, so that the annual payment from the Treasury became 468,000 *yen*. An extensive tract of State land was also ceded, with the understanding that the proceeds of its sale should go to the work. Four years is the time within which the harbour is expected to be finished, and the sources from which the money is to be derived are these:—

	Yen.
Sale of land and other miscellaneous receipts	1,978,000
Aid from Treasury (four years)	1,872,000
Municipal Loan	17,038,000
Taxation	1,602,400
Total	22,490,400

This bold enterprise on the part of the Osaka folk ought to rouse Tokyo from its lethargy. The people of the capital have been talking of a harbour for 25 years, but do not seem to be any nearer to the practical realization of the project than they were when they began to talk.

The public hears little now-a-days of the once all powerful Liberal Party. Its members seem to have resigned themselves to a quiescent rôle, as though their discomfiture in the last session of the Diet had completely damped their ardour. We read in the *Hochi Shimbun*, however, that they have resolved to enter the field actively once more. Until recently they were of two opinions, some contending that until the Party had succeeded in recovering its strength, any aggressive effort would be futile; others maintaining that the best way to become strong was to adopt a militant attitude. The latter view is said to have prevailed, and Count Itagaki, having endorsed it, is about to solicit Marquis Ito's coöperation. It is to be observed, of course, that the columns of the *Hochi Shimbun* are not the most credible source of information about the Liberals, and that, since Marquis Ito can return to office whenever he pleases, he is not at all likely to enter into an alliance with any body of politicians whose object is to harass the Cabinet.

An audience of fishermen in Japan has to be handled gently by those addressing it. At a general meeting of the Tokyo Bay Fishing Corporation, held on the 28th ultimo, the question of using seines came upon the *tapis*, and the Committee reported that it had been decided to enforce the old regulations strictly. We are not clear as to the exact import of that decision, but it proved very distasteful to members of the Funabashi Fishing Guild who were present. They raised a storm of objurgations, or the Japanese equivalents for objurgations, and their demonstration seems to have provoked the members of another guild, the *Tsukuda-gumi*, beyond endurance; for these latter immediately proceeded to extremities. The Japanese have a very deft way of manufacturing a wicked weapon. A handful of gravel, a few copper cash, or any other hard substances knotted into the corner of a towel, can be used by a stalwart arm with remarkable effect. We

have seen a man's head laid open to the bone by one of these simple contrivances. The *Tsukuda* men fell on hotly with towels containing copper cash, and the other folks responded in kind. Some fifty men were engaged on either side, and there was a long list of minor casualties before the police could restore order.

It may well be supposed that the incident of a big Russian *mission militaire* for Korea is employed by Count Okuma's enemies as a means of discrediting him. The *Chu-o Shimbun*, for example, declares that the Minister is in great perplexity, more especially because it so happens that the new Japanese Representative, Baron Hayashi, has not reached St. Petersburg, nor the new Russian Representative, Baron Rosen, Tokyo. The *Chu-o* thinks that if the Yamagata-Lobanoff Convention were strictly observed by both sides, no such difficulties could occur, but fails to detect, on Russia's part, any very careful desire to abide by the compact. Surely it will be time enough to accuse Russia of bad faith when she actually agrees to send a phalanx of commissioned and non-commissioned officers to Korea. At present, everything is in the air, and the indications are that neither Russia nor Korea seriously contemplates anything of the kind.

Mr. Sonoda Kokichi's retirement from the presidency of the Bank of Japan, an event immensely regrettable from the point of view of the Bank's prosperous management, has induced the *Shogyo Shimpō* to refer to the career of the institution in terms somewhat surprising to those who have always viewed it as a prosperous concern. Established in 1880, when Count Okuma was at the head of Japanese finance, the Bank, we read, did well for a brief period, but in 1882 and 1883 it fell into difficulties from which it was rescued only by the ability of Mr. Hara Rokuro, who became President at about that time. A period of success ensued, owing to the skill with which the Bank's operations were adjusted to the steady downward movement of silver. But in 1889, the Government ceased to make its remittances through the Bank, and this loss of business was so keenly felt that only by receiving exceptional accommodation from the Bank of Japan was the concern able to keep its affairs afloat. It suffered, above all, by the action of the United States in passing the Sherman Bill, for such serious fluctuations occurred in the specie market that a panic was precipitated in Europe, and some houses abroad, with which the Bank had large transactions, went to the wall. At home, too, it had serious trouble with Mr. Nakamura Michita, as well as with the 33rd and 46th National Banks, and owing to all these complications, accentuated by several law-suits, the necessity at one time arose of recourse to the reserve funds for paying a dividend to shareholders. Naturally this state of affairs provoked severe criticism, and involved the holding of an extraordinary general meeting. It was at that epoch, 1890, that Mr. Sonoda assumed the direction of the Bank's affairs, and very soon his great business capacities, his clear insight, and his intimate grasp of financial problems, enabled him to introduce reforms of a far-reaching and most beneficial nature. Thenceforth the field of the Bank's transactions developed rapidly, as may be gathered from the fact

that whereas the amount of foreign bills discounted by it in 1888 was only forty-six million *yen*, it rose to a hundred and forty-nine millions in 1896. So prosperous did its affairs become that the Directors felt justified in proposing an increase of capital, from six million *yen* (four and a half millions paid up) to twelve million (seven and a half millions paid up). Its branches and agencies also, thus far confined to New York, Kobe, London, Lyons and San Francisco, were extended to Shanghai, Hongkong, Bombay and Hawaii, and the number of banks, domestic, and foreign, with which it established business relations, increased five-fold. Doubtless Mr. Sonoda's recent trip to Europe had for its object a further expansion of the Bank's business. That his health should have broken down is a source of universal regret.

From statistics collected by the Department of Agriculture and Commerce, it would appear that the production of silk last year in Japan was very unsatisfactory. The number of households engaged in the work rose to 1,316,553, being an increase of 50,000, or a little less than 4 per cent., over the figure for the preceding year, but the quantity of cocoons aggregated only 1,836,672 *hoku*, a decrease of 421,570 *hoku*, or 19 per cent. In the case of Nagano, Gumma and Fukushima prefectures, the bad record is attributed to injury wrought by frost, but Nagano suffered from unfavourable climatic conditions also, and the same is true of Yamanashi. Mulberry plantations, however, show considerable development. Their area last year was 288,937 *cho* (722,742 acres), being an increase of 12,772 *cho*, or 8.5 per cent. over the figure for 1896. In nearly all the prefectures, but especially Yamagata, Yamanashi, Gumma, and Nagano, this tendency to extend the districts under mulberry plantation was perceptible.

The record in the case of tea, however, is favourable. The area under cultivation was 59,479 *cho* (148,697 acres), being an increase of 1,750 *cho* (3,375 acres), or 3 per cent., over the figure for 1896.

The Emperor and Empress are to return from Kyoto on the 4th instant. Their Majesties will leave the Palace in that city at 8.20 a.m., and set out from the station at 8.55 a.m., reaching Shizuoka the same day at 5.55 p.m. The following morning at 9.30, a start will be made from the *ansai-sho* (Imperial resting place) in Shizuoka, and at 9.40 a.m. the train will pull out, reaching Shimbashi in Tokyo at 4 p.m.

It is pleasant to see that more consideration is beginning to be shown for the leaders of education in Japan. Salaries in this country are low all round, but they are notoriously insufficient in the case of persons engaged in teaching. Hitherto, the President of the Imperial University has received only 3,500 *yen* annually, and the Professors, men whose attainments have made them known from end to end of the country, could not look for larger emoluments than 2,000 *yen* a year. There is quite a long scale of pay for Professors. It begins, we believe, at a thousand *yen* a year and ends at two thousand. But an Imperial Ordinance, issued on the 22nd ultimo, makes a decided improvement. It provides that an additional sum of 500 *yen* annually shall be paid to a Professor

whose services warrant such recognition, and who has been in receipt of the first-grade salary—2,000 *yen*—for at least five years. The increase need not be 500 *yen*; that is the maximum. Presumably at the discretion of the Minister of State for Education, a smaller sum may be granted. Professors Toyama, Yamakawa, Matsui, and Tamii, Directors, respectively, of the Colleges of Literature, Science, Agriculture and Law, have each been accorded an increase of 400 *yen* annually, which brings their salaries up to 200 *yen per mensem*. Why the maximum figure of 500 *yen* was not granted in the case of men so distinguished we are unable to conjecture. Another change made by the same Ordinance is the establishment of two grades of salary for the President of the University—namely 3,500 *yen* and 4,000 *yen*—instead of the single grade—3,500 *yen*—hitherto existing. No practical application of the change has yet been made, however. The salaries of Directors of Public Schools are also affected. Hitherto there has been but one grade for the highest class of such schools, namely, 2,000 *yen* annually. Henceforth there will be two grades, 1,000 *yen* and 2,500 *yen*.

The treatment accorded to the Japanese emigrants who went to Hawaii in the *Kinai Maru* is severely criticised by the *Hochi Shimbun*. We have already described the facts in these columns, and as the *Hochi* merely recapitulates them with some addenda of indignation, we need not follow its comments. But its perplexity as to the motive of the Hawaiian Administration surprises us. Why should there be any perplexity? Is it not quite plain that the Hawaiians are frightened? They have 25,000 Japanese in their islands at present, and they see several other thousands getting ready to cross over. To be swamped by Japanese is the prospect that presents itself to them. We can not wonder that they are alarmed, or that, as is usually the case with perturbed people, they resorted to blundering devices, and are now trying to find an exit from their dilemma by blundering routes. America and Australia have both considered it necessary to legislate against the unchecked irruption of Asiatic labourers, but neither America or Australia was ever faced by such a problem as now confronts Hawaii.

In New York the recent appreciation of gold was unhesitatingly referred to the demonetization of silver by Japan. *Brad-streets* of March 20th says:—

A continuous further decline has taken place in the silver market on the announcement that Japan's plans for the establishment of a gold currency are to be put into execution. It was reported that that country would be a seller of its stock of silver, and other holders who had been waiting for an improvement have apparently let go. As a consequence, the London market fell since Saturday last from 29½d. per ounce to 28½d., the latter being the lowest price since March, 1895, while since the beginning of the present month the total decline has been 1½d. per ounce. The New York market kept pace with London, the commercial price here declining from 63½c. to 62½c.

We read in the vernacular press that there were several arrivals of new tea in Yokohama during last week, but the parcels being small, no prices can yet be quoted as standards. In view of the pending departure of mail steamers, several foreign firms begin to make inquiries, but, on the whole, the attitude of buyers and sellers alike is one of expectancy. Tea of the best quality has changed hands at 48

yen per picul, and the lowest grade has sold for 36 *yen*. The following transactions are mentioned:—

Foreign Buyer.	Japanese Seller.	Catties.	Price per Picul. Yen
No. 180	Katsumi	2,200	36
"	Sasano	1,100	39
"	Nakaya	200	48
No. 36	Yasunishi	200	45½
"	Nakaya	800	47

Telegrams received in Tokyo announce that the Korean Government has resolved to employ a part of its unwonted opulence by paying off a third of its debt to Japan. That the Treasury in Seoul should be in a position to reduce its liabilities by a million *yen* is something that could scarcely have been anticipated.

It is alleged that although the 8th of this month is the last day of the period assigned by the Shimonoseki Treaty for the inhabitants of Formosa to decide whether they will leave the country or become Japanese, not a single person has yet applied to be registered as a Japanese subject. Two explanations of that strange fact are assigned by the *Yomiuri Shimbun*. One is that folks, who, for certain causes, would like to return to China, hesitate to incur the pecuniary risks involved in leaving the island; the other that folks, not unwilling, on the whole, to remain, are too distrustful of the Japanese Authorities to come forward openly and enrol themselves as Japanese subjects. Concerning the former point, the *Yomiuri's* explanation is difficult to comprehend. Of course every owner of real estate must shrink from offering it for sale where the buyers recognise his necessity to get rid of it. But we gather from what our contemporary says that much of the land is held on titles too irregular to be exposed to general scrutiny, and that sales would have to be effected in a hole-and-corner fashion fatal to sound dealing. We do not attach much credit to that view of the case. The second explanation offered appears much more rational, namely, that the Formosans feel very uncertain as to what may be entailed in becoming Japanese subjects. Will it signify enforced cutting off of queues, unbinding of feet, and total abstinence from opium? If they could be reassured upon these points, they might try the experiment. Under Baron Nogi's administration official efforts have been made to show the Formosans that Japan has no intention of interfering vexatiously with their national customs. But the record of the Japanese in the island is not one of tolerance and liberality. It will take some time to convince the Formosans that they have nothing to apprehend. Meanwhile, it may be presumed that all who do not leave the island, or declare their intention of remaining under Chinese jurisdiction, will be regarded as Japanese subjects. We do not see that any other course is possible for the Japanese Authorities. After all, there will be nothing, apparently, to prevent a Formosan Chinese from leaving the island permanently whenever he pleases. He need not have a passport, so far as we know, for crossing over to China, and if he once gets there, it may be presumed that he will have no difficulty in remaining as a Chinese subject. Probably the shrewd Chinese property-holders in Formosa have fully gauged the situation, and come to the conclusion, that whereas a precipitate declaration of allegiance to Japan might bring various

inconveniences in its train, they will be able to make their choice at leisure and with more enlightened eyes by quietly awaiting developments.

We read in the vernacular press that the taxes last year—that is to say, during the fiscal year ended March 31st, 1897—yielded some three million *yen* more than the estimated total. The tax on *saké* was notably prolific. Some had predicted that in view of the imposition of the increased rate, brewers had anticipated the time and manufactured large stocks, and that the Government, whose estimate of revenue was based on the manufacturing returns, would find itself mistaken. But facts have not borne out that forecast. The brewing business increases steadily, and has more than justified the calculations embodied in last year's budget. The same is true of the tobacco tax, the income tax, the customs duties, and so forth.

Another fact noted in the same context is that the sums appropriated by last year's Budget on account of the construction of barracks and works of that character, were not fully employed, and that some twenty million *yen* remain over. A considerable amount may be paid out before the end of June, but it is probable that the greater part of the twenty millions will have to be carried over to this year's account. The Japanese papers speak of the money as surplus, and write as though the incident were more or less a matter of congratulation. But it strikes us differently. The work has to be done, and the sooner it is finished the better for the country, assuming that armament expansion is a necessity.

The Specie Bank's new regulations about interest on current accounts, is that the rate shall be one *sen* per day on every hundred *yen*. There are to be two balances daily, a forenoon and an afternoon, and the interest will be allowed on the smaller sum of the two. On the other hand, interest on accommodation given by the Bank will be calculated on the larger of the semi-diurnal balances.

The Tokaido Railway is again interrupted. Never was there a line more sensitive to the assaults of the elements. We fear that its constructors forgot the old aphorism, "the more haste the worse speed." They showed considerable celebrity in getting the line into working shape, but they have ever since been demonstrating their inability to keep it in order.

The chief injury suffered by the Tokaido line is reported to be on the Futakawa-Washizu and Oiso-Kozu sections. Other places have been more or less damaged, but not seriously. The service of trains is not interrupted, though passengers have to alight twice.

The Kwansei Railway also has suffered. The road is impassable between Tsuge and Seki. Unfortunately there have been casualties on this line in connection with the floods, 30 persons being reported as wounded, but no particulars are to hand at this moment of writing.

One result of the interruption was that the return of the Emperor and Empress to Tokyo had to be postponed. Another, that Sir Ernest Satow was obliged, on the very eve of his departure for Europe, to make a journey to Kyoto. But for the injury to the road, the Emperor

would have reached Tokyo on the 5th, and would have given audience to Sir Ernest on the 6th. But as the Imperial return has been postponed *sine die*, Her Majesty's Minister, with his wonted energy, set out for Kyoto by the evening train on the 4th, and came back to Tokyo on the 6th, the day before his departure by the Canadian Pacific steamer. The line is, of course, passable, but the negotiation of the broken part would scarcely be undertaken by the Emperor.

Mr. Consul-General Hawes is engaged to be married. The lady is Miss Gay, whose mother is a large landed proprietress in Hawaii. An old friend who recently had the pleasure of seeing Mr. Hawes in Honolulu, says that he looks hale and happy, and that time seems to have treated him kindly. Many friends in Japan will offer him hearty congratulations and good wishes on receipt of this happy news.

Mr. Basil Hall Chamberlain has returned to Tokyo after a fortnight's travel in *Kiushu*. Mr. Chamberlain did not enjoy good health in England. For nearly two months he was confined to his room. But he has lost nothing of his old faculty of meeting pain with smiling fortitude, and he counts confidently on the benefits of his recuperative elixir, the air of Japan.

If the Japanese Railway Authorities could only borrow the ear of an outsider to hear a few of the remarks made about their failure to provide sleeping cars on the Tokaido line, they would be thoroughly humiliated. Why do they not take steps to consult the convenience of the travelling public to that small extent? Or, if the convenience of the public be nothing to them, why do they not take steps to save their own reputation? They say that sleeping cars would not pay. Without any desire to be rude we venture to characterise the statement as nonsense. The cars need not be attached to every through train. Their use could be regulated by the demand for them. It is monstrous that in a country where devotion to progress is a national boast, old folks and ladies should be condemned to sit upright during the whole night in a crowded carriage, however willing they may be to pay for sleeping accommodation, and however easily it could be provided. Are the Japanese indifferent to the fact that foreign travellers by their railways observing such an unpleasantly obtrusive evidence of unenterprising management, forget altogether to recognise merits which would otherwise be quickly observed, and go away from the country grumbling at this inexplicable display of backwardness?

The *Japan Gazette* alleges that we accuse it of having concocted the story about the French Senate and the Revised Treaty. We have not done so. We have simply denied that the Senate has formulated any demand about the ownership of land in Japan by French citizens, or that any concession as the ownership of land has been made by Count Okuma. For the rest, whether it be wise or unwise, liberal or illiberal, on Japan's part to withhold the privilege of land-owning from aliens, we are very sure that no Japanese Cabinet could venture to grant the privilege. Rightly or wrongly the people of this country have conceived the idea that such a privilege must be withheld, and a Minis-

try so neglectful of public sentiment as to make the concession, could not remain in office for a month. Several European States do not allow aliens to own land within their borders, and if Japan thinks that her interests dictate a similar restriction, she can not be coerced. On the other hand, if it is possible for a foreigner to obtain the use of land in Japan during a practically unlimited term of years, complaints about his inability to become the actual owner of the land cease to have any real value. For every purpose, whether of residence or of business, the tenure of land provided by the Japanese Civil Code and secured to British subjects by the Anglo-Japanese Revised Treaty, is ample. To rail against its insufficiency is pure sentiment.

A JAPANESE MARCO POLO.

The *Sekai-no-Nippon* introduces us to a gentleman concerning whose doings and their recital by himself we have no opinion to offer.

A valiant youth, named Suzuki Kakutaro, left his native village (Oji, Toshima gun) at the age of sixteen in November of the 23rd year of *Meiji* (1890). His sole purpose was to explore the islands lying at the extreme south of the globe. Immediately after his arrival in Ogasawara, he took ship for the Carolines, and thence proceeded southward until he landed on New Britain, one of the Bismarck Isles, where no Japanese had ever before been. The Archipelago belongs to Germany, and consists of five extensive territories with more than a hundred islets lying at different distances from each other, in the 10th degree of south latitude. These islands have long been notorious for the man-eating propensities of the natives, and are shrouded in noxious mists all the year round. Suzuki, despite the earnest warning of his fellow passengers, effected a landing on one of the isles and stayed there six years, completely studying the topographical features of the place as well as the manners and customs of the natives. The inhabitants go completely naked: they do not cover even their loins. Their nostrils are perforated, and sticks of about a foot in length are passed through as an ornament. Their arms consist of spears and axes, and their most esteemed food is human flesh. Their countenance betrays the devilish wickedness and cruelty of their natures. Perpetual fighting is their business, and upon capturing a foe they form themselves into a circle to eat the limbs of the captive, carving them and roasting them over a fire while the blood is still dripping and the victim shrieking in agony. That is their supreme delight. They celebrate the feast with cries of joy and loud smacking of the lips. But the island being extensive and fertile with numerous productions, some valiant aliens have gone there and amassed wealth. An American woman, though not twenty years have elapsed since her immigration, had acquired property to the value of 4½ million *yen*. She started with nothing, but her shops are now open in sixty different places.

Three more Japanese arrived at the islands after Suzuki, but were slaughtered by the savages. Suzuki was frequently seized with fever and attacked by the natives, but passing luckily through hardships and dangers of all descriptions, he escaped the cruelty of the

inhabitants and returned to Japan. More than once he looked death in the face. Whether these savages were to be classed as cannibals had not yet been determined by the learned men of Europe, but is now settled. Suzuki having completed his practical exploration of the mysterious island, will soon embody the results in a book.

KOREAN TOPICS

It appears to be pretty certain that the idea of employing a large number of Russian military men to organise and train the Korean army has been abandoned, temporarily at all events. The prospect of such a contingency evoked some instructive comments from the leading Tokyo journals, not the least noteworthy being the *Hochi Shimbun's* conclusion that Russia entertains resolutely aggressive designs in the Far East, and that she will not easily loosen the tight grasp with which she has seized all recent opportunities. Her action in Korea is compared with that of England in the Transvaal. With her arms plunged up to the elbow in a European complication which may, at any moment, call for the employment of a powerful force in the Mediterranean, Great Britain has nevertheless sent an eminently strong squadron to South Africa, and is preparing to transport troops thither. To superficial eyes her conduct may seem indiscreet. But it is thus that great Powers preserve their prestige. Whatever be the magnitude of the problem calling for solution in one part of their political sphere, they are careful to show no neglect of interests, however petty by comparison, that present themselves in another part. Russia, understands that principle. She will invite no risks of impaired reputation.

Of all official devices in Korea the favourite is to impersonate a duly authorized tax collector. Never a batch of *Sōul* newspapers comes to hand that does not contain two or three records of that kind of trick. It is marvellous that the provincials should be so perennially gullible, and still more marvellous that the official simulators do not receive deterrent penalties. They have probably acquired by experience a tolerably clear perception of the practical ratio between failures and successes, and so they go into business with open eyes.

The "Righteous Army," which recently occupied *Samen*, aided, according to rumour, by a large party of Chinese brigands, has declared its purpose. It wants to "destroy the new civilized laws and customs"—does it really call them "civilized"?—"that our enemy, the Japanese; have introduced into the country. The magistrates and officials"—we are quoting the notice issued by the insurgents—"compel the people to observe the new laws. This indicates that they are slaves of the Japanese. We asked our Chinese friends to join and help us to restore the old *status* in Korea, and the host of China is now with us." Is it not significant that these rebels recognise the Japanese to be the real promoters of the new order of things in Korea?

We shall not be surprised to hear, one of these days, that the *Independent* has become involved in severe trouble. It appears to print every complaint that reaches it without any attempt to winnow

facts from fiction. For instance, "three citizens of Namwon" write to say that a Royal Inspector, sent to Chulla province to try a magistrate notorious for squeezing, commenced operations by dismissing the magistrate from office and then ordering him to come up for punishment. But the magistrate, instead, sent a substitute in the form of a cheque for 4,000 dollars. Thereat he was immediately re-instated in office and the punitive tribunal adjourned *sine die*. Everybody in Korea must be able to identify the Royal Inspector and the magistrate. But who can identify the "three citizens of Namwon district," or discern how much credence their tale merits?

One asks oneself, on reading the reports of riots, robberies, brigandage and rebellion that arrive perpetually from all parts of Korea, whether the little kingdom always had such an evil record, and whether the outer world remained in ignorance of the fact simply because channels of information did not exist; or whether things have changed palpably for the worse during recent times. We have no opinion of our own to offer on the subject, but we should like to hear what the *Korean Repository* or the *Söul Independent* has to say about it.

Mr. Gale's Korean-English Dictionary has been published. He brought it out in Japan. It contains 1096 pages, and its contents are spoken of in the highest terms. We hope that Mr. Gale will now give to the world some studies not of Korean words but of Korean manners and customs. He has a delightful pen, and evidently possesses keen powers of observation which he has used diligently.

The Emperor of Japan has sent the Grand Cordon of the Chrysanthemum to the King of Korea. Mr. Kato, the Representative of Japan in Söul, presented the insignia to His Majesty on the 22nd of April.

A hundred and fifty coolies are said to be working at the Chemulpo end of the Söul-Chemulpo Railway.

The editor of the *Independent* declares that half a dozen cases have, to his own knowledge, "been decided most outrageously" by the Söul Court, and urges that the Law Department institute a strict inquiry.

Here is the *Independent's* account of the fracas—recently described by Japanese journals and reproduced in these columns—between the steward of a Russian ship and some Koreans in Chemulpo:—

On Saturday afternoon the French steward of the *Otaajny* came on shore to purchase provisions. When trying to buy some fish at the market he got into an altercation and eventually came to blows with the Korean fish-monger. The steward and a friend of his fought the Koreans for a while until they were outnumbered, when they tried to make their escape.

The Koreans overtook them and the fight was renewed with extra vigour, when a Korean policeman came to the scene and arrested the steward. While doing so, the steward drew the policeman's sabre and gave one or two cuts at the nearest Koreans, who were belabouring him with sticks, wounding two of them quite severely; some say they may die.

When the steward was in the General Foreign Settlement with the mob behind him and the policeman urging him on, he saw a Japanese policeman to whom he called for help and was taken to the Japanese Consulate. The other man took refuge in a Japanese house and was conveyed later by the Japanese police to the Consulate.

The Commander of the *Otaajny*, when com-

municated with about the affair, at first declined to have anything to do with it, claiming that the two men were not Russians; but he eventually sent an armed guard to the jetty where the two men were handed over by the Japanese. The Russian Commander, however, expressly declared that he took the two men over, pending the decision of the French authorities in Söul and disclaiming any jurisdiction over them.

Seven thousand six hundred and two private houses and three hundred and eighty-two public buildings constitute the list of edifices destroyed by the "Righteous Army" last year in a single district of Korea—North Kyengsang.

The Prime Minister of Korea recently resumed his pastime of resigning office, and the King his habit of returning the resignation. But the old statesman's importunity seems to have succeeded at last. We have not yet heard who his successor is to be.

CHINESE TOPICS.

Insurrection seems to have broken out again in Tibet, the scene of last year's rebellion. Viceroy Lu, of Szechuan, is collecting troops to march against the insurgents as soon as the mountain passes are free from snow.

The Laou Kung Mow Cotton Factory in Shanghai has now 6,000 spindles at work and hopes soon to have 25,000. There is no talk of any inconvenient taxes being imposed by China. The Company is getting Tls. 74.50 for its 14's and Tls. 77 for its 16's, per bale. Japanese spinners will find difficulty in competing at those prices. Raw cotton is 25 per cent. dearer now than it was when the Company drew up its prospectus, but, on the other hand, yarns are selling 32 per cent. higher. There is evidently a difficulty in training operatives, but the directors are full of hope. We observe that Mr. J. Chambers, an old resident of Japan, has won golden opinions in connexion with the erection of this Company's premises.

Tientsin is now fairly silted up. No steamer can reach the settlement. A plan for deepening the river has been elaborated by an engineer, Mr. de Linde, and the Viceroy is willing to give a hundred million taels towards the work. But three hundred millions are required. Of course the money would be raised at once if matters were under foreign control.

The well-known Dr. John is now making a missionary tour through Hunan, at whose capital town of Changsha resides Chou Han, against whom the worthy doctor has penned so many diatribes. The people of Hunan do not appear to be as black as they have been painted.

There is some anxiety about Mr. Wolf, the German traveller who recently showed such courage and resolution in forcing his way into Changsha. He has been deserted by all his English-speaking servants, and he can not speak any Chinese. It is difficult to conceive a more painful or embarrassing position than that of a foreigner who finds himself in the interior of China without any means of communicating with the natives.

THE CURRENCY.

In the sequel of last year's industrial mania, a pause, on a small scale, occurred in various parts of the country, and many persons appealed to the Bank of Japan for aid. The Bank, which that had in its vaults a part of the Chinese Indemnity, lodged with it at 2 per cent. interest, did not hesitate to meet the emergency by considerable issues of convertible notes. On the other hand, Government and National Bank paper diminished day by day. Still, despite the fact that the amount of gold, silver, and copper coins in circulation had not increased to any appreciable extent, frequent complaints began to be heard about unnecessary expansion of the currency, and not a few financiers declared that unless steps were taken to reduce the volume of convertible notes, the prices of commodities would rise so as to embarrass the poorer classes and disturb the Government's monetary arrangements. Such was the state of affairs until December last. With the new year, however, economic conditions became more settled and the demand for money grew less. The volume of paper discounted by the Bank of Japan gradually decreased, and a corresponding reduction took place in the amount of convertible notes circulating. According to investigations made by the Finance Department, currency at the beginning of March and April this year was as follows:—

	April 1, 1897.	Mar. 1, 1897.
	Yen.	Yen.
Convertible notes.....	179,908,002	183,950,465
Government paper ...	9,045,082	9,166,347
National Bank notes..	13,610,995	16,039,980
Gold, silver, and cop-		
per coins	76,588,740	75,349,149
Totals	279,152,819	284,505,941

This table shows that the volume of currency decreased by 5,353,125 yen during March, and we may add that it decreased by twenty millions as compared with the maximum figure last year, namely, 299,113,334 yen at the end of December. Now, however, the money market is gradually getting tighter, and it may reasonably be expected that a fresh increase in the volume of the currency will take place.

As to the circulation of gold, silver, and copper coins, the reports of the Finance Department show that the amount in the people's hands at the end of last month was 76,588,740 yen, an increase of 1,239,590 yen as compared with the previous months.

The following table shows the details:—

	Yen.
Gold coins	5,330,338
One yen Silver and trade dollars	31,602,359
Silver coins of denominations below	
50 sen	23,757,396
Nickel coins	6,536,603
Copper coins	9,362,042
Total Subsidiary Coins	39,656,042
Grand total	76,588,740

We take the above facts from the vernacular press.

THE REBELLION IN MANILA.

The telegram that we publish this morning from the Captain-General of Manila to the Spanish Representative in Tokyo, shows that the business of stamping out the insurrection is proceeding steadily. It was always anticipated that the kind of work upon which the Spanish troops are now engaged would be slow, the country being exceedingly unfavourable for military operations. Any attempt to push the campaign rapidly might involve needless losses and could not confer any compensatory advantage. It is evident that the rebels are no longer capable of any serious movement. Their strength is effectually broken.

NOTES ON VARIOUS TOPICS.

A chorus of 1,500 voices sang the refrain of the Marseillaise in English, German, Italian, Swedish, and Bohemian at Seep's Hall in Chicago on the 14th of March. These fifteen hundred singers claimed to be a section of 3½ millions of unemployed folk in the United States, who, finding the present order of the world distasteful, vigorously denounce all such things as machinery, trusts, tariffs, and laws. One of the speakers told the meeting some pretty truths:—

"This is but a preliminary movement. What we are working toward is a universal strike. There are 3,500,000 unemployed in America, and over 100,000 in Chicago, all due to the introduction of labour-saving machines. For 1,000 years, this terrific struggle between the classes and the masses has been going on. And yet labour has never had its rights. Isn't it about time that the toilers of the world woke up and demanded the things that belong to them by right of nature? Our only hope is in educating suffering humanity."

The chief claim of these toilers seems to be that they do not toil at all. However, they are sufficiently industrious in the matter of passing resolutions. Here are two of their latest:—

"Resolved, That we call upon the unemployed of this country to organize for such a change as will overturn completely the political and industrial condition that has fostered and made possible millionaires and paupers, palaces and prisons, churches and porches."

"Resolved, That pending the final overthrow of our inequitable system of production and distribution, we demand, as the only temporary relief, the repeal of all laws for the collection of debts of any kind, as this alone can save the mortgage victim from the rapacious clutch of the usurer, the manufacturer from his moneyed master, the tradesman from his commercial owner, and the tenant from his landlord, and will be the most telling blow that can be struck at the money power at present."

If the import trade of the United States remain the same in 1897 as it was in 1896, the new tariff will add 112 million dollars (gold) to the revenue. But various factors making for decrease have to be calculated, so that the net addition to the revenue is not expected to exceed 75 millions in 1897 and 100 millions in 1898. Here is the spirit of the change, as defined by Mr. Dingley, Chairman of the Ways and Means Committee:—

This increase of revenue is secured by transferring wool, lumber, crude opium, argols, paintings and statuary, straw ornaments, straw matting, burlaps, and various other articles from the free list of the present law to the dutiable list; by increasing the duty on woollens to compensate the manufacturer for the duty placed on wool; by raising the duty on sugar about three-fourths of a cent per pound, in order to encourage the production of sugar in this country, which it is believed can be done, and thus give our farmers a new crop, which we now import mainly from abroad; by increasing the duty on agricultural productions affected by Canadian competition, on fine cotton goods, and some advanced manufactures of iron and steel, manufactures of jute, flax, and hemp in order to encourage these and other industries here, and especially by increasing duties on such luxuries as liquors, tobacco, silks and laces, etc.

Meanwhile, it is said that speculators have begun a wholesale importation of everything likely to be affected by the increased rates of the new law, so that, by the time the tariff goes into force, the country will have on hand a stock of goods sufficient for a year's consumption. Of course consumers will have to pay for everything just at though it had been entered at the new rates. So, in the long run, not the revenue but the speculators will reap the profit.

Switzerland is the only country in which an earnest attempt has been made to mitigate the suffering of the unemployed by means of insurance institutions. The first of these was organized in Bern in 1893. Membership was voluntary, and each member had to pay 40 centimes per month, the municipality adding a subsidy, and provision being made for accepting donations from employers. Only members of six months' standing were to be eligible for aid, and then not until they had been unemployed for at least 15 days, and not at all if they had refused any kind of work. Persons deprived of work owing to their own fault or to having joined in a strike, were, of course, denied all title. It appears from the latest statement of accounts that whereas the members have contributed only 24 per cent. of the total receipts,

six times that amount has been paid out in relief. Yet the institution does not prosper. It numbered but 390 members in its second year, and 219 of these had received aid.

By-and-by folks desirous of longevity will have to wear some kind of mask which shall preserve them against not only the inhalation of microbes, but even the contact of flies, since it has been proved that the latter are vehicles for conveying germs of disease. They will also have to give up keeping pet dogs or cats. The latest indictment against these much valued companions is very conclusive:—

Careful investigation has proved that a great part of the diphtheria prevalent in the city and nearly all of the scarlet fever has been traced to cats. They not only are subject to the disease itself, but are also the means of a direct transference of microbes. But diphtheria and scarlet fever contagion has not been the sole extent of the evil. Several cases of smallpox have been reported by health officers in different parts of the country which have been brought about in the same way, that is, by a cat from an infected house bringing disease to the family of a neighbour. Another case is reported in Chicago of contagion where a rabbit was lent as a plaything to a child with measles. Later the innocent dumb beast was sent back, carrying death in its very contact, through the thoughtlessness and ignorance of both families concerned. Innumerable cases of deadly typhus have been met with which have been induced by the same means. Yet people continue to wonder at the spread of disease, and in their entire carelessness permit their household pets to wander about at liberty. Medical journals have been aroused, of course, by the reports of investigators, and by vigorous editorials and reports of specific cases are trying to warn the community at least against a terrible and newly unearthed evil. French publications particularly have offered their assistance in the crusade.

Considerable space was given to a peculiar case of a seamstress in Paris, who in her solitude and loneliness, was in the habit of permitting her dog to lick her face. At one time her pet, who was a large St. Bernard, remained away a whole week from the protecting roof of his mistress. On his return her joy was so unbounded that she fondled him more than ever. Suddenly she was attacked with a severe inflammation of the right eye. The cause was unknown. Several oculists were visited and consulted, but treatment in every case was unsuccessful. The right eye became a swollen, hideous mass, and the sight was totally destroyed. In the course of time the inflammation began to spread to the left eye, and to prevent the certain fatal influence of the other eye it was cut out. Upon careful examination a dreadful discovery was made. Within the member, back of the cornea, was found a tapeworm. This the dog had probably picked up while licking some diseased and foul object when away from home, and had transferred it on his return to his mistress's cheek. Cats and dogs are known to be indiscriminate and careless in the choice of objects on which they exercise their tongues. Then, on account of their zeal in licking the hands and faces of their masters, great danger lies in the transmission of parasites. Contagion by this means is simple and easy, and it is marvelous that a greater amount of hideous parasitic disease has not been the result.

Another long entertained idea is likely to be proved fallacious—the idea that folks in northern latitudes live longer than folks in southern. Cold conduces to the development of stalwart frames, but not to length of years. Dr. Luigi Sambon, of Rome, shows that the Hindu, whose early maturity is well known, reaches, on the average, a surprising old age, and that the inhabitants of southern Europe have the advantage over those in the north. In England, a population of twenty-seven millions can boast only 146 centenarians, whereas Spain with eighteen millions of inhabitants has 401 centenarians.

The new colour process in photography—invented by Danac and Chassagne—is not a device for the reproduction of natural colours. Its principle is that a photographic print is treated in such a way as to enable it to assimilate in the proper places and proportions, colours exhibited to it. The gelatine plate on which the negative is taken has been prepared with a solution the ingredients of which are known to the inventors only. Then from the negative a print is taken on ordinary albuminized silver paper which has been treated with the same solution. This print, when dry, is again washed with the solution, and is finally treated successively with three coloured solutions—blue, green and red—the operation being con-

ducted in a bright light. It is claimed that the print automatically takes up the appropriate colours, and that the three primaries become mixed or combined so as to produce the intermediate tints. No one seems able to account for the result. "How a monochrome negative," said Sir Henry T. Wood, in a lecture before the Society of Arts, "can confer on a monochrome print the power of selective absorption has yet to be explained. I can offer no suggestion on the subject."

The *Baltimore Sun* says this about Japan's monometallism:—"The Japanese Government has decided to adopt the gold standard and to coin silver at the ratio of 32 to 1. The yen is to be of silver, and no gold piece will be worth less than five yen. The currency consists chiefly of silver at present, but the silver yen will gradually be replaced with gold till gold predominates. There is a hint for our bimetallicists in Japan's programme. If they really wish for silver to become again a money metal, in good standing, let them cease to talk about the absolute ratio of 16 to 1—meaning thereby a financial revolution and debasement of the currency—and propose, as the Japanese do, to put 100 cents' worth of silver in the dollar. The sound-money people would look with favour upon that honest sort of bimetallicism, though they recognize the fact that bimetallicism is mere theory and no law can tie the two metals together at any ratio." Years must pass, we expect, before the West comes to understand clearly that what Japan has chosen is not bimetallicism, but gold monometallism.

Mr. Percival Lowell, "at whom some brother astronomers look askance as being something of an amateur, but who manages continually to make a good deal of stir in the world of science," has just moved his plant from Arizona to Mexico, which he considers a better place for winter observations. Even the moving was invested with a dramatic character by Mr. Lowell, who certainly has a genius for raising out of the common groove everything that he touches. *Popular Astronomy* contains an account of the transfer of nearly seventeen tons of material across the Mexican frontier, and from the occasional passing of a glass of pulque to the native workmen to keep their energies alive, to the housing of the telescope in the biggest wooden dome in the world, and the final arrival of Mr. Lowell himself in a hack with the great lens for travelling companion, we have a picture that is essentially Lowellian. It is impossible not to admire the energy and perennial moral elasticity of Mr. Lowell. His brief visits to Japan always left a meteoric trail, and we have not the least doubt that he will manage to write his name among the stars before he abandons them for some new field of intellectual essay.

THE RUSSIAN MISSION MILITAIRE IN KOREA.

The *Fiji Shimo* publishes a telegram from Söul, dated the afternoon of the 4th instant, to the effect that the War Department has finally decided to employ a Russian *mission militaire*, but whether the number will be 50 or 17 is not yet certain. It remains to be seen whether the Russian Government will accede to the proposal. That the effect produced in Japan would be very bad, there can be no manner of doubt, and that the arrangement would be at variance with the Yamagata-Lobanoff Convention seems equally plain. It is altogether a clumsy performance, so unlike Russian diplomacy that until it is an accomplished fact we shall take leave to be skeptical.

Mr. Takahashi Kenzo, Chief Secretary of the Cabinet, came to Yokohama from Tokyo on Wednesday afternoon and taking a launch at the hatoba went down the bay and visited Count Matsukata, the Premier at Tomioka.—*Yokohama Boyeki*.

THE CHINESE INDEMNITY.

THE 8th of May is the day on which the third portion of the Chinese indemnity is to be paid, namely, the first of six yearly installments on account of the hundred million taels still due to Japan. Sir ROBERT HART, says the *Hochi Shimbun*, an English gentleman, now Superintendent-General of Customs in China, seems to have strongly urged the Government of that country to discharge its indebtedness to Japan in one sum, and it is universally believed that his suggestion has been adopted. A telegram from Peking, received by the *Fiji Shimpō*, on the 27th ultimo, announces that negotiations between LI HUNG-CHANG and a certain English merchant have nearly reached a satisfactory conclusion, with a view to pay the whole remaining part of the indemnity at once, and that although the Germans also were willing to provide funds, the Chinese Government had carefully avoided involving itself with them. Is the telegram trustworthy? Possibly not. No telegram on the subject has yet been received by the Japanese Authorities. But intelligence from Europe has already placed us in possession of the fact that the Chinese Government was lately concerting measures to raise a loan in England to the amount of one hundred million taels, with the intention of appropriating half of that sum to the liquidation of the indemnity, and the rest to naval armament.

The *Hochi Shimbun* then proceeds to calculate the advantages that would accrue to China by paying off the indemnity at once. But we need not reproduce these details, especially as they do not appear to be quite accurate. The facts are very simple. China has already paid 106½ million taels, of which total 6½ millions represent interest. The sums still due by her, if she adheres to the programme of discharging the debt by gradual installments extending to 1902, are these:—

On May 8th, 1897	17½ million taels.
On November 8th, 1897	4½ do
On May 8th, 1898	17½ do
On November 8th, 1898	3½ do
On May 8th, 1899	17½ do
On November 8th, 1899	2½ do
On May 8th, 1900	17½ do
On November 8th, 1900	1½ do
On May 8th, 1901	17½ do
On November 8th, 1901	½ do
On May 8th, 1902	17½ do

Total.....115

Of this total, 15 million taels represent interest. By discharging her debt at once, China would not only save these 15 millions, but would also get credit as principal for the interest, 6½ millions, already paid by her. In other words, she could acquit herself completely by handing to Japan 93½ million taels. She would also save 5 payments of 500,000 taels each on account of Weihaiwei. Hence her total saving on those counts would be 23½ million taels. On the other hand, if she raises 93½ million taels in England at 5 per cent., her aggregate payments of in-

terest to the lenders by May 8th, 1902, would be 23½ million taels. It may therefore be supposed that she would lose only ⅙ of a million taels by adhering to the original programme, and discharging her liability to Japan by gradual steps, ending in 1902. But that is an imperfect calculation. Under any circumstances she must borrow money to pay Japan, and even on the obviously untenable assumption that she could obtain the necessary sums exactly at the fixed rates, it will be seen, by a simple calculation, that she would have to pay interest aggregating 14½ million taels to the foreign lenders, in addition to the interest payable to Japan. Hence her pecuniary gain by raising 93½ million taels and discharging the debt at once would be 15½ million taels at least.

It is very probable, however, that China does not regard this question merely from an arithmetical point of view; very probable that she feels a considerable "loss of face" in having to make repeated small payments to Japan. Besides, two other considerations may influence her. One is her desire to get the Japanese troops out of Weihaiwei. It is a perpetual humiliation to her to see that important position occupied by the forces of her victorious neighbour, and to be prevented from restoring its fortifications. The other, and, we suspect, the most potent consideration of all is that, in whatever manner she makes payments to Japan, she must go to Europe for means to make them. She has to hand over 21½ million taels during the course of the present year under any circumstances. Where is she to get it? The process of borrowing from 17 to 20 million taels annually in London for the next six years is impracticable, and if she has to borrow the whole amount in one sum, it would be absurd not to turn it over to Japan forthwith. To keep it in her own treasury would merely involve payment of interest to both Japan and the lenders. We are strongly disposed, therefore, to credit the Peking telegram, and to expect that the whole amount of 93½ million taels will be paid to Japan next month, or, at any rate, in the course of this year.

To Japan, it would probably be a convenience to have the money paid at once. Up to the present, she has received 136½ million taels from China, and, according to the long programme, she is to receive 21½ millions during the present year. Thus her total receipts up to March 31st, 1898, will be 157½ million taels, or 235 million yen, approximately. Now she appropriated 80 millions on account of war outlays; carried 43 millions into last year's Budget, and is to carry 51 millions into this year's. Hence there will remain at the end of the year only 51 million yen in the Treasury. Moreover, that calculation rests on the hypothesis

that the Public Undertakings and Railway Loans of 67 millions are successfully floated. Supposing that a difficulty is experienced in floating those loans—and the contingency is certainly probable—the Government would have to rely temporarily on the Indemnity, and even by drafting the whole of it into the Budget, a deficiency would still remain. Of course, there would be no trouble in placing the Public Undertakings Loan in London, but we are not now considering that alternative: we are only examining the Government's programme as it stands. If, on the other hand, China at once paid over the whole remainder of the Indemnity, 93½ million taels, then Japan, after drafting the already planned portion into this year's Budget, might use other 67 millions, instead of floating the Public Undertakings and Railway Loans, and would still have 94 million yen in the Treasury at the end of the present fiscal year. The years 1897-8 and 1898-9 will subject the country's finances to their severest strain. From April, 1899, the situation will be greatly eased. We do not doubt that Japanese statesmen would be glad to choose their own time for floating either a domestic or a foreign loan. They can tide over this year without recourse to that measure, but the necessity would then be inconveniently imperative next year, whereas, if China pays up at once, there will be plenty of breathing time.

When China borrowed her first 100 million taels from France and Russia, and when such a hubbub was made over the transaction, many persons alleging that she had sold herself, body and soul, to those two Powers, we ventured to deprecate the outcry, and to predict that the second 100 millions, which would be the real *experimentum crucis*, must come from England. We are now at liberty to reflect that China will have an opportunity of counting the real cost of the two loans. From England she will obtain the money and will incur no obligation whatever except that of paying the interest regularly and the principal in due course of time. There will be no Messieurs GERARD or Counts CASSINI to tack political concessions to simple questions of finance. China ought to be able to appreciate the difference. She is not without business faculties. Somehow, England "gets there," after all. There is not much reason to be uneasy about her yet.

The funeral of Mr. Koeppe took place at Kobe on Monday afternoon and was largely attended. The floral tributes were very numerous and beautiful. Messrs. M. & H. Raspe and C. Braess were chief mourners; the members of the staff of the firm and Messrs. Ailion and Schluter acting as pall-bearers. The band of the *Irene* was in attendance, and several officers of the *Princess Wilhelm* followed in the funeral train. The Chaplain of the former vessel performed the last sad rites at the grave-side.—*Hyogo News*.

COUNT OKUMA ON FISHERIES.

At a meeting of the Marine Investigation Council held on the 28th April, in the Department of Agriculture and Commerce, Count Okuma delivered the following speech:—

GENTLEMEN—Only a short time ago I was placed at the head of the Department of Agriculture and Commerce, and I have not yet been able to inform myself fully about marine products. But I may venture to express my views on the general scope of the problem now before you. Our country is an island surrounded on all sides by seas, and naturally offers great advantages in matters of fishing and salt manufacture. Thus the development of marine industry bears a close relation to the welfare of the nation at large. This branch of industry, has made such rapid progress that the number of fishermen has now reached a million, with two hundred thousand boats in their possession. Nevertheless, it is necessary at this juncture that people in general should make up their minds to push with still greater zeal the progress of marine enterprise. I think I may say that the profits of the industry are exceptional. Marine products are useful not only as fertilizers for agricultural purposes, but also for export to foreign countries. Many instances might be cited, indicating the advantages enjoyed by the Japanese. It may confidently be inferred from the universal improvement in their standard of living that their diet, even in the remotest parts of the country, consists largely of fresh fish. On the whole, the demand for marine products had grown to be nearly twenty times as great as it was ten years ago. Statistics indicate that remarkable change, which is alone sufficient to demonstrate the necessity of developing marine industry. The problem of deep-sea fishing is the most important of all maritime questions at present, for it not only concerns the national wealth very closely, but may also materially affect the maritime spirit of the people and even of the Navy itself, unless it be carefully considered. I hope you will all exercise the utmost discretion in debating the questions now before you.

PROFESSOR FENOLLOSA.

Some one has been kind enough to send us a copy of the *Daily States* of New Orleans containing a column, about Professor Fenollosa's affairs. It appears that Mr. Fenollosa lately delivered a series of lectures on Japanese art in New Orleans, and the citizens of that place are naturally interested in him. But the paragraphist of the *Daily States* evidently has no love for the object of his comments, and we presume that the person who takes the trouble to circulate the paragraph is similarly hostile. We shall not follow the New Orleans journal farther than to explain that Mr. Fenollosa, as is not uncommon under the circumstances, has become involved in litigation with his first wife concerning property to which she thinks that she has a title. The property is described as "a valuable collection of prints and paintings," and Mrs. Fenollosa, apparently apprehensive lest the pictures should be removed to Japan, applied for an injunction to prevent that conjuncture. We gather from the account published in the *Daily States* that Professor Fenollosa has been working, more or less, in concert with Mr. Kobayashi, the well known Tokyo dealer in chromoxylograph and *ukiyo e*,—and that Mr. Ketcham of New York, acted as their common agent. For some reason which is not explained, it was decided to terminate the connexion with Mr. Ketcham and to withdraw any objects remaining in his hands. Professor Fenollosa attempted to effect that change on the strength of a telegram from Mr. Kobayashi, but Mr. Ketcham refused to deliver the property, and Mr. Fenollosa obtained an order for his arrest. That led to threats of suit for false imprisonment and malicious prosecution, but apparently no such action has been taken. Professor Fenollosa is now in Japan. He does not appear to have been greatly troubled by all these proceedings. The paragraph in the *Daily States* concludes thus:—

Several works of art have been sold since the divorce, and Mrs. Fenollosa claims one-half of the proceeds. When her suit comes to trial several financiers of world-wide reputation, who bought Japanese prints on her former husband's advice, will be called as witnesses. One of the side complications in the litigation may involve the name of Taen Hi Tsen, a Chinese mandarin of the fourth class.

MONTHLY SUMMARY OF CURRENT JAPANESE LITERATURE.

The subject of female education has been attracting increased attention within the past few months. A project is on foot for establishing a Women's University. In order to consider the best method of effecting that end, a meeting was held at the Teikoku Hotel on March 27th, at which Prince Konoye, Count Okuma, Marquis Hachisuka, a large number of representatives from both Houses of the Diet, and over one hundred newspaper writers were present. Speeches were delivered by Prince Konoye; Mr. Utsumi, Governor of Osaka; by the leading projector of the scheme, Mr. Naruse Nizō; by Count Okuma, Marquis Hachisuka and Mr. Shimada Saburō. Mr. Naruse said that there was no doubt that in the matter of high class education Japan was in the rear of most Western countries. With a population of forty millions, she had only two Universities, six High Schools for male students, and one for females; whereas America, with a population of sixty millions, had 357 Universities, 237 of which were attended by female as well as male students. Taking the total number of the students attending Universities in America, the proportion was 60 male to 40 female students, whereas in Japan the proportion was 99 males to one female. Taking middle schools in America, the proportion, approximately, was 60 female to 40 male students, the corresponding figures in Japan being 90 males to 10 females. In the matter of normal schools, American women were ahead of the men, the proportion being 83 female students to every 17 male. Mr. Naruse then proceeded to state and answer eight objections to high class female education, for which we have no space here. On behalf of the Department of Education, Marquis Hachisuka promised that the new scheme should receive earnest support. Mr. Shimada Saburō dwelt on the necessity of aiming at the development of female character and virtue rather than proficiency in various feminine accomplishments. He was not in favour of making the course of study to consist of a large number of high class subjects, but of making instruction in practical subjects one of the chief features of the education imparted. The aim of female education in America, observed Mr. Shimada, seemed to be to make a woman active and lively, but in England the preservation of female traditions and modes of thought was considered of paramount importance. There was much to be said for both systems. They both reflected prominent characteristics of the female mind.

No. 428 of the *Kyōiku Jiron*, writing on female education in general, observes that there are not more than 14 high class female schools in the whole country, and that there is a great deficiency of suitable teachers owing to the paucity of women's normal schools. The interest taken in this subject is still confined to a narrow circle. The necessity of raising Japanese women to a higher level is not widely felt. The organ we quote does not advocate the introduction of Western methods of education into Japan, but at the same time it is not in favour of being satisfied with the old conservative mode of teaching young ladies simply how to behave at *cha-no-yu* parties, how to arrange flowers, and sing. Since the chief function of a woman is to become a mother and bring up children in an approved manner, female education should be specially designed to fit young women for the duties of married life. It is very plain that in America the tendency of female education is to render women independent of men, and hence to encourage single life. The development of woman's intellect to the extent it is carried in the West is certainly not desirable in Japan. Female education, first and foremost, must aim at qualifying young women to take the part assigned to them in the order of things according to our native sentiments, feelings, and institutions.

In the magazine we have just quoted, appears an address delivered to the Gakushi-kai by

Dr. Inouye Tetsujirō entitled, "Objections to what are called cosmopolitan notions on education." Dr. Inouye shows that the opinions held on the subject of education in Japan are often of a vague and unpractical type and are frequently characterised by great narrowness of view. At the same time, the lecturer is of opinion that the principle which forms the basis of every system of education in the West is purely national, not cosmopolitan, as some writers represent, and that hence Japan's first thought in the choice of educational methods must be how best to fit her sons and daughters for serving the State and thus contributing something to the future prosperity of the nation. Whatever may be said to the contrary, the first consideration with every powerful western State in the matter of education is how best to serve its own interests in the ever growing keenness of competition. Cosmopolitan principles that ignore this fact play no part in moulding the course of advanced modern education. Though in many respects Japanese patriotism has been carried to excess, the feeling that a purely national type should be imparted to all our educational establishments ought to be encouraged rather than condemned. Education has its cosmopolitan aspects, but it must be made national first and cosmopolitan afterwards.

The Hakubunkwan has announced the early publication of a giant work well known to students of Japanese history, the *本朝通鑑 Honchōtsūgan*. The authors of this history are Hayashi Dōshun, Hidetada's teacher, and his son. The work consists of 84 volumes, covering 9,600 pages, and is a record of all events of importance down to 1617 A.D. The subscription price of the new edition issued by the Hakubunkwan is 8 yen 50 sen.

Another *magnum opus* to appear this year is the *史料大觀 Shiryōtaikwan*, a historical work arranged according to subjects. The topics to be embraced are government—home and foreign policy—law, education, literature, fine art, Shinto, Buddhism, economy, customs, ceremonies, and national peculiarities. The matter to be utilised, with the exception of that contained in 2 volumes, has been culled from some 62 extant works. The *Shiryōtaikwan* is to consist of about 1,000 Japanese volumes, the first of which will appear in July next and the remainder within 12 months subsequent to that date. Professors Hoshino, Inouye, Kurita, Kurokawa and other well-known men are engaged on the work, which is being issued by the Tetsugaku-shoin, Hongō, Tokyo. The subscription price is 15 yen.

The publication of four valuable works is announced by the *Hakubunkan*. The first, entitled *三百諸侯 Sanbyaku Shōhō*, furnishes a history of the Three Hundred Daimyō of the Tokugawa era. The author is Mr. Togawa Zanka. The book covers 1,550 pages and the subscription price (up to April 30th) was 95 sen.

The *日本歴史群 Nihonrekishi-hyōrin*, by Mr. Hagino Yoshituki, of the Tōkyō Higher Normal School, is a critical work on the history of the pre-Tokugawa era. The criticisms, however, are not those of Mr. Hagino, but have been collected by him from various sources. The work consists of 2 volumes covering 2,000 pages and was to be sold at 1 yen 20 sen up to April 30th.

The *Tokugawa Taihōki*. This is a second edition of Mr. Komiya Nanryō's noted and valuable work, which is now to appear in two volumes of a thousand pages each and to cost 1 yen 20 sen.

The *世界格言大全 Sekai-kakugen daizen* is a collection of proverbs and wise sayings culled from the literature of various countries, covering 1,300 pages and selling at 60 sen per copy.

The *Shigaku Zasshi* contains notices of a

number of recently published works. In reference to the *Nihon Tokushi Chisu* (Historical Atlas) to which we referred in a former summary, this organ observes that, while being the best thing of the kind that has been published, it does not come up to Western notions of what an atlas ought to be. In some maps the colouring is too profuse, in others it is deficient. The names in many cases are not confined to those that appear in the histories covering the period which the map is designed to illustrate. The first volume of the *國史大系 Kokushi taikō*, noticed in a former summary, has been published, and the *日本書紀 Nihon-shoki*, a work consisting of 30 small volumes, has appeared in one handsome-looking volume. The *Nigaku Zasshi* draws attention to the multifarious works issued by the Military Association called the *倍行社 Kaikōsha*. A long list of titles of books bearing on military affairs is before us, most of which are translations. Modern European wars and the military systems of the great Powers have engaged the attention of military experts in Japan. A dictionary has been compiled and published called the *Doku-futsu-wa Heigo* (兵語) 兵語, "German, French and Japanese Military Dictionary," which costs only 23 sen. In order to show the progress Japan is making in the study of modern military tactics, we would recommend specialists to examine the catalogue issued by the Kaikōsha.

The *Taiyō* reports a lecture delivered to the students of the Keiōgijuku by Dr. Suyematsu on "Literary Styles," in which the lecturer dwells on the importance of lucidity and the use of simple language as far as possible. The habit of introducing difficult Chinese terms, so common with young writers of the present day, Dr. Suyematsu condemns. It is customary, said the lecturer, to despise the pure Japanese style as prolix and lacking in force, and it is supposed that these characteristics will be avoided by the free use of Chinese. But that by no means follows. Unless great care is exercised in the choice of words and the order in which they are placed in the sentence, misunderstanding results. Some very amusing mistakes are made by readers at times. For instance, the saying: *Nodoka naru hayashi ni kakeru o-niwa matsu*, "The kindly pine that in mild weather spreads its branches far and wide," was once read *Nodo ga naru haya shini kakeru oni wa matsu*. "A rattle is heard in the throat (the patient) is about to pass away. The Devil awaits his arrival (in hell)." The same thing occurs in other languages, but Japanese is specially liable to be thus misunderstood. Many writers err in the matter of profuse illustration, others in the use of a superfluity of adjectives, and not a few resort to slang when it is quite unnecessary. Rather than read the Japanese newspapers as they are written, I prefer, says Dr. Suyematsu, to peruse the translations which appear in Yokohama newspapers. In the latter, the meaning is expressed with a clearness which in the Japanese language in its present stage of development is lacking. Our mode of writing needs improvement in many ways and it should be the aim of all young men to cultivate a style that is at once chaste and intelligible. In the choice of words pedantry is to be strictly avoided.

The *Taiyō* has an article on the "Drama" by Ochi Koji, an essay by Dr. Katō on the "Aesthetics of the Fujiwara period," and "The New Style Verses," by Mr. Uyeda Mannen. This writer objects to the comprehensiveness and elasticity given to the new style of verses by Dr. Inouye, contending that the admissions of the learned doctor destroy the distinction which ought to exist between poetry and prose. As long as the term *詩 Shi* (poems) is applied to this class of writing, it certainly cannot but choose to follow traditional usage in the matter of form. In the opinion of Mr. Uyeda, old style verses have

nothing to fear from the new style. At the conclusion of his paper, Mr. Uyeda refers to stage acting, asserting that the only hope of improving the Japanese drama lies in the free introduction of foreign methods and foreign plays.

A recent number of the *Kokumin-no-tomo* has an article entitled *地勢と國民ノ性格 Chisei to Kokumin no Seikaku*, in which the writer compares Japanese national characteristics with physical surroundings and capabilities. Though Asia has a superficies of 2,630,000 square *ri*, it consists of no more than 16 countries, whereas Europe, with a superficies of 660,000 square *ri*, is divided up into 20 parts. Taking these figures and premising that the countries of Europe and Asia are equal in size, each Asiatic country should consist of 164,000 square *ri*, and each European country of 33,000. But the two great continents are not so divided, and Japan finds herself possessed of a very limited territory compared with that of other Asiatic countries. She has no such vast plains as are found in China, Russia, and America. Her rivers are short, rapid, and of little use for navigation. Even the largest river in Japan, the Shinano-gawa, is not more than $\frac{1}{7}$ the size of the Mississippi. Confined for centuries within narrow limits and not allowed free intercourse with the outside world, it is not surprising that Japanese should hold, on most subjects, views lacking in breadth and comprehensiveness. But there is one particular on which Japan may congratulate herself. With an area of 27,000 square *ri*, she has a population of 42,000,000, that is an average of 1,550 to the square *ri*, figures that are exceeded only in Belgium, which has 3,470 and Holland which has 2,230. The conclusion that the *Kokumin-no-tomo* comes to is that, with her rapidly increasing population, Japan can save herself from calamity only by extensive colonization.

A short time ago, Marquis Ito delivered a lecture before the Keizai-gaku-Kyōkai (Economic Science Association) on his experiences as a young man. The following are some of the facts stated by the Marquis in the course of his address. "Students of the present day have little to complain of. Their facilities for study are numerous and diverse. When I was a youth it was not so. The only English-Japanese Dictionary that we had was one compiled by Hori Tatsunosuke, a work full of mistakes and altogether inadequate. There was not a man in the country who was well versed in English. And as for foreign dress, which for many reasons I and my companions found it necessary to don, nothing suitable was to be procured for love or money. It is now thirty-five years since I left Edo for Kyōto, with Hori's Dictionary and Sanyō's *Nihon-Seiki* in my possession. At that time the whole nation was convulsed over the question of opening the country, a strong party advocating the measure and, as it seemed then, an equally strong party, or perhaps I should say a stronger party, denouncing it. The attitude of parties to each other at that time finds its parallel in the "strong foreign policy" party and their opponents at the present day. It is useless to argue in favour of a strong foreign policy. We are not in a position to carry it into practice. Soon after the promulgation of the Imperial edict ordering the expulsion of foreigners from the country, Messrs. Inouye Kaoru, Inouye Masaru, Yamao Yōzō, Yendō Kinsuke, and I determined to make our escape to Europe and thus acquire a knowledge of the state of foreign countries, which it was impossible to obtain in Japan at that time. Had it not been for the kind assistance of Mr. Glover, of Messrs. Jardine, Matheson's, and for the anxiety shown on our behalf by the agents of the firm in Shanghai and London, we could not have effected our purpose. As it was, we were within an inch of losing our heads; for having purchased and decked ourselves in odd-looking foreign clothes and above all had our hair cut with the expectation of embarking in the middle of the night, Mr. Glover informed us, as we all sat crouched together behind a hillock in his garden, that the

Captain of the ship by which we were to go, feared the consequences of taking us and was unwilling to allow us to come on board. As this meant certain death to us, we decided, after deliberation, it would be better to commit suicide than live to be disgraced; and this we determined to do. But Mr. Glover, hearing of our resolve, begged us, in a great state of alarm, to wait while he interceded with the Captain a second time. His intercessions prevailed, and at 2 a.m. with Mr. Glover and the Captain ahead of us, with our hearts in our mouths, we marched by the Custom House guard-box. The orders we received were to pretend to be talking in a foreign tongue and to talk vociferously in an excited manner after the fashion of foreign sailors. This we did, and effectually deceived the officials. After a very stormy voyage we reached Shanghai, where we were taken in hand by Mr. Keswick, of Messrs. Jardine, Matheson's, and given berths on sailing vessels bound for England. At that time I was 23. Mr. Inouye Kaoru 29, Mr. Inouye Masaru about 22, and Messrs. Yamao and Yendō about 28. We did not all sail in the same ship. Mr. Inouye Kaoru and I were together. We had accommodation given us in the fore-castle with the common sailors, and, under the mistaken impression that our object in going to sea was to become sailors, we were constantly ordered to take part in working the ship. Many a time in pouring rain we were to be seen hauling ropes with the crew, and if we went to our berths to steal a nap in the day-time, we were reminded of our duties by means of a stroke with a rope and a voice shouting, "Get up, Yapl!" We were 4 months in reaching London. Here we were rigged out afresh and taken around to see the great sights of the metropolis, and received special help and instruction from Mr. Williamson, Professor of Chemistry in the London University. It was from this gentleman that we first heard of the action of the Chōshū forces against foreigners. Inouye and I both made up our minds that it was our duty to return at once to Japan and try and enlighten our fellow-countrymen as to the military and naval superiority of Western nations and the futility of Japan's continued opposition to their demands. On arrival at Yokohama we found the whole country in a state of confusion. The Edo Chōshū *yashiki* had been burnt and the life of a Chōshū man was not safe anywhere near the Shōgun's capital. We disguised ourselves and assumed Portuguese names, but saw plainly that, unassisted, we could never reach Chōshū. In the meantime the Powers had decided to send an expedition against Chōshū. Under these circumstances we applied to the British Legation for help, and were treated with great kindness by Mr., afterwards Sir Rutherford, Alcock, and, through his mediation, were put on board a French man-of-war and sent to Chōshū, being accompanied by the present British Minister, who, with Messrs. Lowder and Siebold, was then a student interpreter at the Legation. Fearing the consequences of arriving in Chōshū in a foreign man-of-war, we were landed at Himejima (Bungō), and from thence returned to our native province by means of a junk. We succeeded in convincing our *Daimyō* that the policy he had pursued was a mistaken one, and thus saved Japan from the humiliation to which, had she persisted in fighting with foreigners, she must have been subjected." This speech is not correctly reported. Marquis Ito can not have called the *Barossa* a French ship, and can not have described his mission as a success when it was really a failure.

The *Wasuda Bungaku*, among a goodly list of articles, has the following:—"Prose Works in the Kamakura Age;" "the Representation of Chinese characters by Japanese *Kana*;" "the Punctuation of Japanese," and an account of an interview with Count Katsu held by the editor of the *Taiyō*. One of the subjects on which Count Katsu discoursed was the character of modern novelists. He expressed the opinion, with which many will agree, that the only really great living novelist is Rohan.

* There being no division between words in Japanese, if the Chinese characters were omitted in writing, or if the words were carelessly uttered, the above mistake might well occur.

There is no other writer of fiction who shows equal versatility or genius. His age is about 40 and, according to Count Katsu, his best days as a writer are still before him. The works of Kōson, Kōyō, Namiroku and other writers of fiction were passed in review by the Count, the result of his study being that their works are characterised by sameness and display signs of the authors' having written themselves out. According to Count Katsu, the power which Bakin possessed in an eminent degree is wielded by few modern writers, namely, that of cleverly hinting at, rather than clearly stating, the weaknesses of the men whom it is desired to hold up to obloquy. The satire of modern writers arouses bad feeling because it is so clumsy. The art of making caps and leaving those whose heads they fit to wear them, was one in which the old novelists excelled. Modern invective is too direct to be effective, says Count Katsu.

The March number of the *Teikoku Bungaku* publishes a valuable historical account of all the chief literary Japanese Magazines in existence, which is based on a careful examination of their contents and on extensive inquiry as to their objects and editorial staffs. No less than 55 periodicals are passed in review by the *Teikoku Bungaku*. We condense into as small a space as possible, for the sake of future reference, the results of our contemporary investigations, only omitting particulars that have already appeared in these columns.

The *Rikugō* (六合) *Zasshi*; edited by Messrs. Yokoi Tokiwo, Onishi Shunroku and others. This magazine maintains a high standard, is philosophical in spirit and aims at solidity rather than grace of diction.

The 八級 *Hakkō*; issued by the Tōkyō Protestant Episcopal Mission. The *Hakkō* discusses religion, philosophy and literature. Though lacking in blossom, among its fruits is much that is sweet to the taste.

The *Hanshi Zasshi* (Introspection), and the *Mujintō* (Inextinguishable Light). Both Buddhist organs. The former, being ten years older than the latter, has grown wiser with age, being distinguished for liberality of tone and comprehensiveness of view. The *Mujintō* in the past played the rôle of a narrow sectarian organ, but during the past few months, it has shown signs of waking up to the necessities of the age.

The 東北文學 *Tōhoku Bungaku* and the 芙蓉峰 *Fuyōhō*. Both Sendai magazines published under the auspices of the Tōhoku Gakuin, a high class Christian College. Great honesty of purpose is displayed in the pages of these periodicals, but from a literary point of view they lie open to the charge of being mere country organs.

東亞學會雜誌 *Tōgakkai Zasshi*. A recently issued magazine, already noticed in these columns, which pays special attention to Chinese learning, but also publishes articles on scientific subjects. As yet it shows no promise of taking rank with the first class monthlies.

The 東華 *Tōkwa* (Eastern Splendour). A periodical that seems to aim at following in the wake of the *Tanjō* as regards comprehensiveness, but which is still a long way behind.

The 同聲會雜誌 *Dōsei Kai Zasshi* (Philharmonic Society's Magazine). Edited by the graduates of the School of Music and devoted to the discussion of musical and poetical topics.

The *Chitoku* (智徳) *Kai Zasshi*. This periodical, as its name implies, aims at developing intelligence and promoting virtue, and it is said that the cost of its publication is considerable. It is well got up and its illustrations are first class. But beyond this nothing can be said in its praise.

The *Waseda Bungaku* is quiet in tone and extremely practical. It is issued by Count Okuma's famous school. The matter published as miscellaneous in this organ stands in need of improvement.

The *Kabuki Shimpō* is devoted to theatrical subjects, but is a magazine that merits no praise whatever and seems to be going from bad to worse.

The *Kayū* (佳友) *Kai Zasshi* is also issued by the Waseda Semmon Gakkō and is succeeding remarkably well. The matter published is varied and presented in an interesting form.

The *Taiyō*, which has long since discontinued publishing articles in English has, in our (the *Teikoku Bungaku*'s) opinion, fallen off in its purely literary department. Its policy is to enlist the services of a great variety of writers and hence it follows that mediocre productions are frequently published. But there is no denying that it obtains a number of well written articles, such for instance as Mr. Fukuchi's *Aware Ukiyo*.

The *Dai-nihon* is American in style, being modelled on the lines of the "Review of Reviews," but bears the marks of being designed for the perusal of school-boys.

The *Tama-no-ura* is a Nagasaki Christian organ which possesses considerable literary merit. Its excellence as a religious organ, however, is by no means equal to its proficiency in literature.

The *Yamato-Koto* (琴) is devoted exclusively to poetry.

The *Fukun Shimpō* (Gospel News) is a Christian organ quiet in tone, minute in its news, and with a very pleasant literary flavour. Even folks like us can read such a periodical with gratification. By Christians it must be regarded as a great boon.

The 文庫 *Bunko* (Library) is designed for the use of Middle School students and produces some readable matter.

The *Bungaku-Kai* (界) possesses a very strong foreign flavour, but as an exponent of foreign notions is a superior organ.

The *Bungaku-hyōron*, published in Osaka, is a magazine of little merit and not worth extended notice.

The 國光 *Kokkō* is a spirited journal whose professed object it is to bring the light of native learning to bear on modern politics, but which, unless we are mistaken, has also another end in view.

The *Kokka Kyōiku* (State Education), was started by Mr. Izawa Shūji, who is now in Formosa. It has recently been amalgamated with the *Dai Nihon Kyōiku-Kai Zasshi* and hence may be said to have lost its identity.

The *Kokugaku-in Zasshi* is designed for the perusal of elementary school teachers and middle school students, and among a number of articles usually has one or two that are readable.

The 國風 *Kokufū* is an Ise periodical, devoted to teaching the art of verse making.

The *Kokumin-no-Tomo* has fallen off considerably of late and has a very poor supply of useful matter. The return of Mr. Tokutomi to his editorial duties, which may be looked for at no distant date, will doubtless improve matters. But there are qualities about this periodical which from year to year are never lost.

The 江湖文學 *Kōko Bungaku* is well designed to arouse the slothful, to put energy into the weak, and to sober the flippant. It errs somewhat on the side of severity, but on this very account suits the state of certain minds.

The 高等國文 *Kōtō Kokubun* is issued by the Kokugo-denshū (傳習) Publishing House, and contains the reports of lectures that are worth reading.

The *Yeto-gaku Kōgi* (Lectures on English) publishes the lectures of Mr. Inouye Jukichi, but also includes articles on a variety of subjects. The lectures are very useful as aids to the study of English, but the periodical as a whole needs rearranging.

The 天鏡 *Tenrai* is a Niigata Christian organ, which, though somewhat countrified, is doubtless good enough for provincial readers.

The *Tetsugaku Zasshi* is in the hands of literary students belonging to the Imperial University. It is publishing a philosophical dictionary as an appendix, but as only some 10 pages appear monthly it will be years before it is completed.

The 田園文學 *Denyen-bungaku* (The Field of Literature) published in Ise and the 新國學 *Shin-kokugaku* issued in Tokyo are magazines

of about equal rank, neither of them possessing any remarkable qualities.

The 曙 *Akebono* is hardly fulfilling the promises made by its projectors.

The *Kyōiku-jirō* is a first class educational organ. It has continued its even course for ten years and has gained the confidence of a large class of readers. It is a periodical which all persons engaged in education would do well to read. Its only drawback is defective printing.

The *Kyōiku-hōchi* in many respects resembles the above, but is not altogether so trustworthy. It is apt to be carried away by impractical schemes and is easily provoked to anger. Is this to be attributed to the youthfulness of most of its staff?

The *Kyōiku Kōhō* is the old *Dai-nihon Kyōiku Zasshi* under a new name. Among the contributors to its pages are a number of eminent scholars and hence it ranks high among periodicals devoted to educational subjects.

The *Kyōiku dan* (壇), a newly born magazine, aims especially at the reform of educational methods. Its first number, from whatever point of view regarded, may be considered an unqualified success.

If the *Kirisutokyō Seinen* is any indication of what Christian young men are like, we are afraid they will prove anything but attractive.

The *Kirisutokyō Shimbun*, a periodical that has been in existence ten years, is poorly supplied with matter and lacks spirit. It is consistent and that is all one can say.

The *Meiji-Kai Sōshi* founds its moral teaching on reverence for the gods, loyalty to the Emperor, and patriotism, and professes to exclude all contributions that have no bearing on these principles.

The *Meiji-hyōron* does not pretend to be a literary organ and hence cannot be criticised as such.

The *Mesamashi-gusa* aims at producing mirth by grouping authors together in an incongruous manner. Even in cases where serious criticism is called for, this periodical cannot depart from its practice of turning everything into ridicule. A little of this kind of thing goes a long way and we should be sorry to see other organs following in the footsteps of the *Mesamashi-gusa*.

The *Shigaku Zasshi* (Historical Magazine) started with the intention of culling from the histories of various nations matter calculated to reveal the spirit of modern times and develop the intelligence of its readers. But of late it has dwindled down to recording merely local history, and seems to overlook the fact that prior to the production of anything like a scholarly history of Japan, foreign models must be studied and discussed.

The 小文庫 *Shō-bunko*, the *Shō-kokumin*, and *Shōnen-Sekai* are all adapted to school children.

The *Shōshi* (省志) *Kai Zasshi* and the *Ryōnan* 龍南 *Kai Zasshi* are both edited by students of Higher Schools; the former in Sendai, the latter in Kumamoto. They display any amount of youthful spirit.

The *Yogaku Kōgi* is designed for ladies of a certain amount of education and stands at the head of the list of Women's magazines. Next comes the *Yogaku Zasshi*, which is written for women of weaker minds.

The *Shin-sei* (New Voice) is admirably adapted to young readers. In its pages are to be found letters from youthful composers living in the provinces, and the magazine on this account finds favour with a wide circle of young readers.

The *Moyede-gusa* is a Yamaguchi juvenile production with no special literary merit. The *Seinenbun* is well edited and contains much readable matter.

The 精美 *Seibi* devotes itself to the publication of Chinese poetry and prose supplied to it by noted Japanese scholars. It is conservative in type and distasteful to the modern students of Chinese, who advocate the application of more scientific methods in the study of Chinese.

The *Sekai-no-Nihon* is abundantly supplied

† This magazine received full notice in a former summary.

with matter and has, notwithstanding a certain amount of imitation of the *Kokumin no tomo*, a flavour of its own.

It will be seen that the above list is by no means exhaustive. Some very glaring omissions occur, such as the *Shūkyō*, the *Nihon Shūkyō*, the *Uchū Shin Kyō*, the *Bukkyō*, the *Meikyō Shinshi*, the *Shinri*, the *Aoyama Hyōron* and a number of others. The *Teikoku Bungaku* seems to have started with the intention of confining its review to purely literary organs, or to periodicals which devote a certain portion of their space to literature pure and simple, but to have drifted into noticing purely religious organs as well, and then ended with the omission of magazines that are far better edited and more representative than many of those referred to above. Notwithstanding this defect, the *Teikoku Bungaku* is to be commended for its diligence and, while not agreeing with its criticism in every case, we cannot but acknowledge that on the whole the observations of the reviewer which we have epitomized are based on truth.

We are compelled to hold over till next month the notice of several newly published works.

CYCLING NOTES.

England exported cycles to the value of £22,136 in the week ending March 12th, against £11,902 for the corresponding week last year. Melbourne took £6,271 worth.

Experts recommend clips as a distinct power-giving adjunct. They are said to be an immense help in fast pedalling down a hill, since they obviate all danger of the foot's slipping. Moreover, they greatly help to "coax" the pedal at the dead point.

We read in a home journal that the best method of cleaning bearings and chains is to wash them with paraffin, which is said to be such a thorough cleanser that the parts to which it is applied become as bright as new and perfectly free from grit.

The mile has been ridden at the Olympia by Mr. A. A. Chase in 1 minute and 53½ seconds; the two miles, in 3 m. 52½ sec.; the three miles, in 5 m. 48½ sec.; the four miles, in 7 m. 41½ sec.; the five miles, in 9 m. 59 sec.; and the ten miles, in 20 m. 15½ sec.

Linton won the 10-kilometre race in Paris on the 14th of March, his time being 12 minutes. Ten kilometres is 6.213 miles. So the rate was 31.065 miles an hour—a fine pace, certainly, but not so striking when we remember that the present English champion is training to cover 33 miles in sixty minutes.

It is becoming the vogue for pictorial journals to give portraits of well-known lady cyclists in full costume. *Die Radlerin*, a German illustrated periodical, beautiful as to type and pictures, is conspicuously successful in that line. We judge from its portraits that many of the leaders of society and *belles* of the time are now ardent devotees of cycling. Miss Goschen, daughter of the First Lord of the Admiralty, is one of the latest converts.

How delightful it would be if one could have one's tyres guaranteed for a year! That is one of the luxuries of living in England within reach of the Dunlop Company. They guarantee their roadster detachable tyres for one season, and undertake to repair, free of charge, any defects due to fair wear and tear. Presumably a nail on the road comes within the category of "fair-wear-and-tear mishaps." However, if we in Japan can not take advantage of the Dunlop Company's business-like liberality, we have at least the comfort of knowing that our roads, though rutty and hilly enough, are remarkably free from tyre-puncturing obstacles.

It is said that whereas the toilettes of lady cyclists in the London parks are veritable things

of beauty and triumphs of conception, the gentlemen's look shabby and totally uninteresting. A great poet accounts for the difference thus:—

She'll patch her husband's trousers with
The strictest kind of care,
But when her bloomers show a hole,
She buys another pair.

We remember that when cycling began to come into vogue for ladies, we indulged in vain hopes that the era of rational female costume had dawned, and that the ridiculous and utterly impractical dress of the nineteenth-century Occidental lady would give place to something consistent with the dictates of comfort and common-sense. But it seems that the only sumptuary result of the cycle innovation is to open a new field for extravagant fashions. Scarcely an illustrated journal now published fails to devote some part of its space to "novelties" in female cycling costume. If some pentecostal day of reason were decreed by the powers that preside over personal adornment, with what cynical tongues would the civilized world speak of its present phantasies!

THE NEW IRON FOUNDRY.

Mr. Yamaguchi Teiun, Superintendent of the prospected Government Iron Foundry, lately returned from a tour undertaken to determine the site of the works. The place selected by him is Yawata-mura, in the Toga District of Fukuoka prefecture. It consists of three hamlets—Yedamitsu, Ogura, and Okura—and the ground for the foundry extends over the two last, comprising an area of 230,000 *tsubo* (200 acres, about). On the south, it is bordered by a ridge of mountains known as Hobashirayama, and on the north by the sea. Between these limits lies a wide tract of wet fields, which are to be used for the proposed factory. The buildings will stand at a distance of about three *cho* (360 yards) from the nearest shore.

The reasons for selecting that district are that an abundance of coal exists and excellent facilities of communication offer. The manufactured iron turned out at the establishment will not exceed sixty thousand tons annually, and the requirements will be 216,043 tons of coal, 3,280 tons of pig and waste iron, and 88,421 tons of other kinds. Chikuzen and Buzen abound in coal. The quantity annually transported by the Chikaho railway does not fall short of two million tons. One of the editorial staff of the *Hochi Shimbun* has had an interview with Mr. Yamaguchi, and obtained the above information.

DEATH OF MR. MACPHERSON.

The intelligence of Mr. M. T. B. Macpherson's death will awaken poignant regret in Kobe and Yokohama. At the early age of 47 he has fallen a victim to typhoid fever. Mr. Macpherson was one of those thoroughly good fellows who command and deserve popularity everywhere. A partner in the well-known house of Messrs. Browne & Co., he earned the reputation of an able man of business, and in every relation of life he won fast friends. Nowhere will he be more missed than in social and sporting circles, for whether hospitalities or athletics were in question, he always played a leading part. It is said that his health during the past few years had not been robust, and for that reason he was probably unfit to struggle successfully against the attacks of a disease that has proved fatal to so many members of the Far-Eastern communities.

The marriage of Mr. L. T. Corke, formerly of Norfolk, England and Miss Rosa McDonald, of Shimbashi, was solemnised in Tokyo on Tuesday. Mr. H. J. Owen was best man. After the ceremony, breakfast was served at the Hotel Metropole, Tsukiji, at which a goodly company sat down. During the repast some very felicitous speeches were delivered, the toast of the newly-wedded pair being most heartily received.

NEWS OF THE DAY.

Nagasaki Britishers will illuminate the Bund there in celebration of the Queen's record reign, and either have a picnic, a ball, or a dinner as well.

The Hongkong Chess Club is flourishing. The annual report shows a balance in hand of \$185.72, as against \$70.05 brought forward from last year.

The Imperial Museum at Kyoto was opened on the 1st instant. There are about three thousand articles on exhibition, mostly *kakemono* and ancient art relics.

Prince Arisugawa who will attend the Jubilee Celebrations of Her Majesty the Queen of Great Britain and Ireland, travels *incognito* under the title of Count Sawa.

The Secretary of State for the Colonies declines to sanction the permanent charge in Hongkong of 2½ cents a ton on shipping, though it must be continued to the end of the present year.

Dr. Steinitz, the well-known chess player, threatens to bring action for damages against the United States Consul at Moscow and others concerned in his detention in an asylum there.

Prince Onkhomsky, who is carrying valuable presents from His Majesty the Tsar of Russia to His Majesty the Emperor of China, was due in Hongkong by the German mail steamer *Prinz Heinrich*.

Most of the scaffolding of the new Hongkong Club has been removed and it is now possible, says the *Daily Press*, to obtain a clear view of this handsome structure, which will be an adornment to the colony. It is expected to be ready for occupation in June.

Truth says that Prince Yamagata—(our contemporary means Prince Arisugawa, we presume)—has taken about forty rooms in the Hotel Cecil, that magnificent hostelry on the Thames Embankment, for the Diamond Jubilee visit.

The British Government has refused to allow stands to be erected in the public parks for the Queen's diamond jubilee procession. An offer of £70,000 was made for permission to erect a stand in the Greek Park, facing Piccadilly.

The officials of the German Hospital and Consulate are naturally reticent regarding the suicide of the Chief Engineer of the *Princess Wilhelm*, who shot himself with a revolver on Saturday morning, at the German Hospital, where he has been a patient for some time. Mental depression is attributed as the cause of the rash act.

From a telegram appearing in the *Shanghai Mercury* we learn that it has been decided that the Hongkong Jubilee Memorial shall be a Women's Children's Hospital and a Training Nurses Institute. The public has subscribed \$50,000 and the Government \$50,000. It has also been decided to commence a road round the island.

Mr. Jas. R. Ford, of Sydney, returned to Australia by the *Omi Maru*, Captain Young. Mr. Ford says he is hopeful of a big business springing up between Japan and Australia, and points to several lines of goods which have been successfully introduced to the respective countries.

Dispatches from Pretoria and Delagoa Bay say that the whole of Gaxaland is in open revolt. twenty-five thousand natives have rebelled against the Portuguese Government. The principal rising is only about forty miles from the Transvaal border, and the Portuguese troops are mobilizing rapidly. The situation is regarded as most serious.

The battle-ship *Iowa*, the last of the premium battle-ships of the U.S. Navy, earned on April 7th, for her builders, Messrs. William Cramp & Son of Philadelphia, \$200,000 by making an average of seventeen even knots an hour over the regular Government course off the Massa-

chusetts coast in the four hours' speed trial required by the Government under the contract.

It is not perhaps generally known, says the *N.-C. Daily News*, that Rear-Admiral H. H. Rawson, C.B., Commander-in-Chief of the Squadron at the Cape of Good Hope and West Coast of Africa, is a son of Mr. Samuel Rawson, formerly of Blenkin, Rawson & Co., and afterwards a prominent bill-broker in Shanghai.

The Russians are said to intend moving more troops to Wakhan on the Upper Oxus when the snow has melted on the Pamirs, remarks an Allahabad correspondent. They probably mean to establish stronger posts there and to complete their plague cordon. The plague, in fact, is furnishing them with an excellent excuse for moving troops towards the Afghan border.

Captain J. Peterson, of the steamer *Else*, reports that on the 15th of April, on the voyage from Singapore to Shanghai in latitude 20° 40' north and longitude 115° 27' east, he sighted a rock over which the sea was breaking heavily. There was a moderate N.E. wind, but with a heavy swell, at the time. The rock seemed to be of small extent and with about 5 to 6 feet of water over it.

A Calcutta telegram, dated April 6th, appearing in a Ceylon journal says:—"The Hongkong and Shanghai Bank's safe, at Rangoon, has been opened and Rs75,000 abstracted. The lock was found to be untampered, and the small safe containing the keys of the larger one was also intact." The *China Mail* has been informed that all the money, with the exception of 500 rupees, has been recovered.

Messrs. David and William Henderson and Co., Partick, have launched the *Wakase Maru*, a twin-screw steamer built for the Nippon Yusen Kaisha. Her principal dimensions are:—Length over all, 463 ft.; beam moulded, 49 ft. 2 in.; depth moulded, 33 ft. 6 in.; and a gross tonnage of about 6,000 tons. The machinery will be supplied by the builders, and consists of two sets of triple-expansion engines, each having cylinders 20 in., 33½ in., and 56 in. in diameter by 48 in. stroke. Steam is supplied by two large double-ended and two large single-ended boilers, constructed for a working pressure of 200 lb. per square inch.

The Captain of the Italian steamer *Letimbro*, on arriving at Hongkong, reported that on the 25th April, at 1 a.m., whilst steaming to the S.E. of the Bombay Reef (Paracels shoal), he sighted on the N.W. quarter, columns of smoke, and a black hull. Thinking that some steamer had caught fire, he steered for the vessel, and as he got within two miles of the smoke, he found a three-masted steamer, with black funnel, stranded on the S.E. of the Bombay Reef. The smoke originated somewhere before the foremast. The *Letimbro* hoisted the national flag and the code signal, "Do you want any help?" On the S.W. of the steamer, not far away, eleven Chinese junks were at anchor, and one sailing towards the S.W. The *Letimbro* waited some time, but receiving no answer, and judging the steamer might have been grounded for a long time, and that these were boats engaged for salvage purposes, the Captain resumed his course, and made for Hongkong. It is probable that the stranded vessel was the *Himeji Maru* abandoned several months ago as a total wreck.

The *Higo News* of Saturday said:—"A Correspondent informs us that the resignations of Mr. Kozaki and Prof. Ukita, the principal and a leading member of the Professorial Staff respectively, of the Doshisha College (Kyoto), were formally tendered a few days ago. Professor Ukita has come to be regarded as an anti-missionary leader; it is at least certain that his teachings were in many points at variance with the Christian views that the missionary co-operators insisted must be maintained, and he largely contributed to the forced resignations of the foreign teachers. For the election of a new President all the graduates of the Institution

have been summoned to meet to-day. The candidates between whom they will have to decide are Mr. Miyoshi Taizo, late President of the Higher Court, a zealous Christian and founder of the Prison-Gates Mission, and Baron Nakajima, late Minister to Italy. There is a prospect that the former foreign Professors, or some of them, and some new ones will be invited to resume their labours in the Institution under the new régime. Should this anticipation prove correct we believe that a specially interesting chapter in the history of the College would be opened."

Merry wedding bells have been heard quite frequently of late in Tsukiji but on no occasion have they announced a prettier wedding than that which took place on Thursday in Trinity Cathedral, when Mr. H. J. Metz, of Yokohama, was married to Miss Susie E. Summers, third daughter of the late Prof. Summers, formerly of the Imperial University, Tokyo. The marriage ceremony was performed by the Rt. Rev. Bishop McKim in the presence of the United States Consul-General, N. W. McIvor, Esq. The bridesmaids were the Misses Cassie, Lilly, Agnes, Maggie, and Alice Summers, and Lieut. Mackelvey of the U.S.S. *Olympia* acted as best man. The bride was given away by her guardian, the Rev. Wm. Jno. White. She was dressed in a heavy white brocaded satin costume, with court train and Brussels lace veil; and orange blossoms were her only ornaments. The bridesmaids wore white Indian muslin dresses trimmed richly with Valenciennes lace, and large Leghorn hats trimmed with white satin ribbon and pale pink roses. The bride's three younger sisters walked in front strewing the aisle with roses. From the Cathedral the party drove to the Hotel Metropole, where a reception was held. The Tokyo City Band was in attendance and some two hundred friends were present to offer congratulations to the young couple.

The funeral of the late Mr. M. T. B. Macpherson, on Monday morning, was numerously attended, the last sad rites of the Church of England being accompanied by every mark of deep respect and esteem, many who were prevented from attending owing to the heavy rain sending handsome wreaths as a last token of regard for the gallant soul who has passed to his last long home. The Rev. E. Champneys Irwine officiated. As the coffin was borne from Christ Church, the organist, Mr. J. T. Griffin, played the "Dead March" from *Saul*. The chief mourners were Mr. E. H. Gill, Mr. R. M. Stirling, and Dr. Harris; and Messrs. W. Ross, W. R. Bennett, G. Philip, J. A. Fraser, C. Gibbens, and H. Baehr acted as pall-bearers. Among those who sent wreaths, &c., were Mr. and Mrs. J. C. Hartland, Mr. and Mrs. T. Thomas, Mr. and Mrs. G. Syme Thomson, Mr. and Mrs. T. W. Hellyer, Mr. and Mrs. J. A. Fraser, Mr. and Mrs. J. C. Budd, Mr. and Mrs. C. G. B. Dunlop, Mr. and Mrs. E. W. Tilden, Mr. and Mrs. J. L. Smith, Mr. and Mrs. J. D. Hutchison, Mr. and Mrs. A. H. Dare, Mr. and Mrs. B. Hyde Pearson, Mr. and Mrs. J. P. Mollison, Mr. and Mrs. W. Ross, Mr. and Mrs. H. J. Hunt, Mr. and Mrs. J. F. Allen, Mr. and Mrs. J. C. Abell, Mr. and Mrs. Alcock, Miss M. Braess, Dr. Harris, Dr. Munro, Dr. T. C. Thornicraft, Messrs. J. Troup, E. H. Gill, R. M. Stirling, W. T. Payne, C. M. Birnie, C. Gibbens, O. Keil, A. Groom, A. H. Groom, C. M. Duff, H. Baehr, W. Brent, G. Philip, A. B. Walford, W. Sutter, F. J. Hall, F. H. Hooper, F. E. White, F. J. Lias, E. Leopold, C. V. Schmidt, Geo. Hood, F. L. Marshall, M. H. R. Harris, O. H. P. Noyes, M. G. R. Gibson, L. S. Lewis, J. Schedel, M. W. Kochen, C. McGerrow, R. Pohl, A. Pohl, H. A. Schenten, P. Scheuten, G. C. Alcock, H. E. Alcock, W. K. Wilson, E. T. Nicholas, M. Pors, J. Sturake, H. Lucas, Jos. Naudin, Iwasaki Shoten, Hamada Shoten, Morita Shoten, the Nippon Yusen Kaisha, K. Uchiyama, Yamashimata, Takase, K. Ozawa, Yokohama United Club, Kobe Club, Yokohama Cricket and Athletic Club, and Japanese employés of Messrs. Browne & Co.

SPRING MEETING OF THE NIPPON RACE CLUB.

SECOND DAY.—FRIDAY, 30TH APRIL.

The weather was bright and balmy on Friday—Ladies' Day at the Spring Meeting of the Nippon Race Club—but the southerly breeze was very strong and at times more dust was flying than was altogether pleasant. The wind too, militated against anything like fast times being made, and taking one thing with another the sport was not so good as on the opening day. The attendance of ladies was large—though not so many as we have seen on occasion—and, of course, some pretty toilettes were to be noticed. The Diplomatic and Consular Corps were well represented at one time during the afternoon, but there was an entire absence of the Japanese official class, and of outside visitors generally. The ball opened with the China Scurry, which Mr. Avis's Tomtit won easily, Mr. Kingdonup. Saiko was the winner of the Kanagawa Stakes—again a comfortable win. Three stripped for the Nippon Plate, which Hayakaze secured, beating the favourite by about half a length, to the surprise of the fancy, who had pinned their faith on Mr. Nicholson's riding. The event of the day, the Ladies Purse, brought out eight gentlemen riders, but the race was not very interesting. Mr. Nicholson, wearing Mr. Worthington's colours, white, blue sleeves and belt, and mounted on Orion, had the race from the start. Having weighed in, the winner was escorted to the Grand Stand, where Mrs. H. M. Bevis waited—with the Vice-President of the Club, Dr. Wheeler—to bestow the trophy so handsomely set-up by the ladies of Tokyo and Yokohama—a purse of £35. Amid loud cheers, that were temporarily hushed as Mrs. Bevis spoke, Mr. Nicholson received the purse, and then presented the fair donor with a lovely bouquet of lilies of the valley and violets.

Mrs. Bevis said:—"I have much pleasure in presenting you with this purse and its contents, which have been subscribed by the ladies of Tokyo and Yokohama. We all take a very great interest in racing, so well known as the "Sport of Kings," and we were very pleased indeed to see how well you rode and hope that many more successes will be yours in the future. (Applause.)

Mr. Nicholson, in thanking Mrs. Bevis, said: On behalf of the gentlemen riders who took part in this race, I beg you to convey to the ladies of Tokyo and Yokohama our hearty thanks for their handsome and weighty purse. For myself, I have tried on many occasions to win the Ladies' Purse, and I am almost ashamed to say for how many years I failed until to-day. I think I may now congratulate myself on having won this coveted prize and on being able to receive it at your fair hands. (Applause.)

After this pleasant interlude, racing was resumed. Aida landed an easy thing for her backers in the Hokkaido Plate, being the only animal in it. The Niicapa Cup fell to Sasha in quite as easy a fashion. A decent-sized field stripped for the Manchuria Stakes, but an annoying wait took place before a proper start could be effected. The Rogue gave his usual exhibition of restiveness and then the public were treated to the spectacle of three horses racing round the course to a false start. The position was most trying for Mr. Bayne, whose starts have uniformly won approval all through this meeting. The younger men among the Japanese jockeys that now appear at the Yokohama races seem to be utterly indifferent to the starter's flag. They imagine that to steal a start and rush round the course is all that is required of them, and unless their employers take them to task properly the evil will grow beyond all endurance. Owners' instructions regarding thorough obedience to the starter's orders and the fall of the flag should be so explicit that no infringement is possible without a penalty being incurred. Pantin won the race under discussion, Mr. Motu riding in capital form. The Country-bred Handicap fell to Tatuta, out of a field of four. Mr. Avis's Tomtit placed another win to the stable's credit in the

last race of the day, the North-China Handicap. Most of the big owners have had a look-in now, except Mr. States: ill-luck pursues him relentlessly this meeting.

The Band programme was as follows:—

- 1—"Nahant," March W. H. Thomas.
- 2—"Ouverture," "Golden Gate" G. Southwell.
- 3—"Grand Fantasia," "Frivolity" H. L. Jaxone.
- 4—"Forest Park," Waltz W. H. Thomas.
- 5—"Amoretto" (En'tacte) Fabian Rose.
- 6—"Dear one far away," Schottische ... J. O. Casey.
- 7—"New York Sun," March Rosenfeld.
- 8—"Fanfare," Military Ascher.
- 9—"Ernani," Scene and Aria Verdi.
- 10—"Pirate," Fantasia Sullivan.
- 11—"Bravura," Waltz Otto Roeder.
- 12—"Ouverture," "Olivia" J. H. Hyde.
- 13—"Here, There and Everywhere," A. Boss.
- 14—"Mixed Candy" C. Caywood.
- 15—"Blaubart," Quadrille Strauss.
- 16—"Bella Ball," Mazurka James.
- 17—"Glass in hand," Polka Fahrbach.
- 18—"Esmeralda" Sullivan.
- 19—"Honeymoon," March G. Rosey.
- 20—"Galop"

Details:—

1.—THE CHINA SCURRY, Value \$150, 2nd \$50; for China Subscription Ponies of Autumn, 1896, that have not won two races in Japan at date of entry, and Subscription China Ponies of Spring, 1897; weight as per scale; winners at the Meeting 7lbs. extra. Five Furlongs. Entrance fee, \$10.

Mr. Avis's Tomtit, 12h. 3in., 141lbs. (Mr. Kingdon) 1
Mr. News' Eclipse, 13h. 1in., 150lbs. (Hakodate) 2
Mr. R. Field's Torpedo, 13h. 0in., 151lbs. (Mr. Mottu) 3

Mr. Partner's Tantpis (late Sunflower), 12h. 3in., 144lbs. (Goto) 0
Mr. Campredon's Bordelais, 13h. 0in., 147lbs. (Kobayashi) 0

Mr. Tippecanoe's Rienzi (late Competitor), 13h. 0in., 147lbs. (Miyagawa) 0
Bordelais was the first away, but was soon collared by the crowd. Before reaching the Shakespeare, Tomtit worked through to the front, with Eclipse on his quarters. At the Trees, Eclipse came back, leaving Tomtit with a long lead ahead. Turning into the Straight, Torpedo came up into second place, only to fall back again, and Eclipse finished ahead of him some six lengths behind the leader; three or four lengths between second and third. Time, 1m. 20½ secs.

2.—THE KANAGAWA STAKES, Value \$50, 2nd \$50; for Subscription Country-bred Mares of Spring, 1897; weight 130lbs.; winners of one race 3lbs. extra, of two races, Three-quarters of a Mile. Entrance fee, \$10.

Mr. Yodo's Saikyo, 3yrs., 133lbs. (Sasaki) 1
Mr. Durand's Aida, 3yrs., 133lbs. (Goto) 2
Mr. Four-in-Hand's Chance, 3yrs., 130lbs. (Ichi) 3

Mr. Durand's Hermine, 3yrs., 133lbs. (Kobayashi) 0
Mr. R. Field's Thoughtless, 3yrs., 130lbs. (Kubota) 0

Mr. Tatsuta's Chiyoda, 3yrs., 130lbs. (Hattori) 0
Mr. States' Tennessee, 3yrs., 130lbs. (Sugiura) 0
Mr. San Remo's Signorina, 3yrs., 130lbs. (Sato) 0

Mr. Durand declared the best to win. After some little delay, Mr. Bayne got the mares off to a splendid start. Signorina was first on her feet, but a blanket would have covered the lot. At the 5-furlongs, Signorina was leading, with Saikyo second; and at the ¾-mile Chiyoda fell right behind. Before the Shakespeare was reached, Saikyo had overtaken the leader and passing the hotel was half a length ahead of her, with Aida second, and Chance next. At the Trees, Chance has worked into second place, with Saikyo still leading the field. Turning into the Straight, Saikyo was seen to have the race well in hand, and Aida again came up, passing Chance. Saikyo won by three lengths, four lengths between second and third. Time, 1m. 32½ secs.

3.—THE NIPPON PLATE, Value \$150, 2nd \$50, for Country-bred Horse; weight as per scale. One and a Half Mile. Entrance fee, \$10.

Mr. Nishimura's Hayakaze, *142lbs. (Takahashi) 1
Mr. Worthington's Traveller, 143lbs. (Mr. Nicholson) 2

Mr. Field's Cigarette, 5yrs., *137lbs. (Ichi) 3
* Allowance Deducted.

A capital start was effected. Cigarette drew out quickly, with Hayakaze next and then Traveller. At the Trees, Cigarette was leading by a length, and the three entered the Straight without any change in positions. All three drew level coming

down to the lawn, passing the Grand Stand in a line. Going down the Dip, Cigarette bolted, leaving the running to Hayakaze and Traveller. A pretty race resulted, the horses running neck and neck right round to the bend for home. Takahashi then called upon his mount and drew to the front. Nicholson, on Traveller, made a game struggle to collar the leader, but was unsuccessful, Hayakaze winning by about a length and a half. Time, 2m. 57½ secs.

4.—THE LADIES' PURSE, for all China Ponies; to be ridden by members of the Club or visitors, whose names must be sent to the Committee before the meeting and approved by them; weight as per scale, with 5lbs. added. One Mile. Entrance fee, \$10.

Mr. Worthington's Orion, 13h. 0in., 152lbs. (Mr. Nicholson) 1
Mr. R. Field's Terror, 13h. 0in., 155lbs. (Mr. Mottu) 2

Mr. Four-in-Hand's Kindar, 12h. 3in., 149lbs. (Mr. Pakenham) 3
Mr. Nishimura's Morisan, 13h. 1in., 155lbs. (Mr. Nishimura) 0

Mr. States' Maine, 13h. 1in., 155lbs. (Mr. Kingdon) 0
Messrs. Bent & Owen's Express, 13h. 0in., 152lbs. (Mr. Owen) 0

Mr. Nemo's Opportuniste, 13h. 1in., 156lbs. (Mr. Andreis) 0
Mr. Wood's Samurai, 13h. 0in., 160lbs. (Mr. Abenheim) 0

Eight out of the thirteen entries started, and Mr. Bayne got them off well. The last to get away were Morisan, Kindar, and Express. Going down the Dip the field drew out, Terror and Orion leading. At the top of the hill the leaders were two lengths ahead, but Kindar was beginning to draw upon them. At the ½-mile, Orion, Terror, and Kindar were together and they kept company to the Shakespeare. By the time the Trees were reached Orion had secured a slight lead, with Kindar next, and Terror running third. Turning for home, Express made a bid for second position but could not last, and Orion won, amid hearty cheers, by four lengths, Terror passing Kindar near the lawn and securing second place by a short length. Time, 2m. 18 secs. Samurai carried 8lbs. over weight.

5.—THE HOKKAIDO PLATE, Value \$150, 2nd \$50, for Subscription Country-breds of Autumn, 1896, and Spring, 1897; weight, Autumn, 1896, 135lbs.; Spring, 1897, 130lbs.; winners at date of entry 5lbs. extra. One Mile. Entrance fee, \$10.

Mr. Durand's Aida, 3yrs., 130lbs. (Kobayashi) 1
Mr. States' Vermont, 4yrs., 140lbs. (Sugiura) 2
Mr. News' Etoile, 4yrs., 135lbs. (Hakodate) 3
Mr. Worthington's Idler, 3yrs., 130lbs. (Hayashi) 0

Again a capital start. Etoile led up the Hill with Vermont in close attendance; but before the ½-mile was reached Aida passed to the front. At the Trees she was two lengths ahead, with Vermont close up, Etoile falling behind. Coming into the Straight, Aida drew out and was won easily by six lengths, two lengths separating Vermont and Etoile. Time, 2m. 3½ secs.

6.—THE NICAPO CUP, Value \$150, 2nd \$50, for Country-bred Horses, maidens at date of entry and Subscription Country-breds of Autumn, 1896; weight as per scale; winners of one race at the Meeting 7lbs. extra, of two races excluded. One Mile. Entrance fee \$10.

Mr. Nemo's Sasha, 5yrs., 149lbs. (Ichi) 1
Mr. Four-in-hand's Rigi, *140lbs. (Katsu) 2
Mr. Durand's Tambour Major, 3yrs., 128lbs. (Kobayashi) 3

Mr. Wood's Miyagino, *145lbs. (Riki) 0
Mr. King's Maiko, *137lbs. (Mr. Kingdon) 0
Mr. Sphinx's Mezame, 3yrs., 130lbs. (Sasaki) 0
Mr. Yodo's Matsushima, 3yrs., 128lbs. (Miyagawa) 0

Mr. Durand's Frondeur, 5yrs., 142lbs. (Goto) 0
* Allowance Deducted.

All the entrants ran, save one—Yashima. This race saw another splendid start. Going down the Dip, Tambour Major drew away and led the crowd round to the ¾-mile, but before reaching the Shakespeare he gave place to Sasha, who came up in splendid style. Rigi ran into second position at the Trees and in this order the race finished, Sasha winning easily; a couple of lengths between second and third. Time, 1m. 58½.

7.—THE MANCHURIA STAKES, Value \$150, 2nd \$50, for China Subscription Ponies of Autumn, 1896, that have not won two races in Japan at date of entry, and Subscription China Ponies of Spring, 1897; weight as per scale; winners of one race at the meeting 5lbs. extra, of two races excluded. One Mile. Entrance fee, \$10.

Major Trick's Pantin, 13h., 2in., 155lb.

(Mr. Mottu) 1
Mr. States' Utah, 13h., 1in., 150lb. (Sugiura) 2
Mr. Four-in-Hand's The Rogue, 13h., 0in., 147lb. (Ichi) 3

Mr. Nishimura's Morisan, 13h., 1in., 150lb. (Hattori) 0
Mr. Partner's Tantpis, 12h., 3in., 144lb. (Goto) 0

Mr. News' Eclipse, 13h., 1in., 150lb. (Hakodate) 0
Mr. Tippecanoe's Rienzi, 13h., 0in., 147lb. (Miyagawa) 0

Mr. R. Field's Torpedo, 13h., 0in., 149lb. (Mr. Pakenham)

The Rogue gave an exhibition of his temper to begin with, and then Rienzi, Eclipse, and Tantpis raced right round on a false start; some delay consequently resulted. When Mr. Bayne finally got them off Utah sprang to the front and led down the Dip. Tantpis was left at the post. Eclipse fell out at the top of the Hill, and the rest drew together. At the Shakespeare, Utah was still leading the field, with the Rogue second, Rienzi having by now fallen out. At the Trees, the Rogue drew level with Utah and Pantin took third place, having overhauled Morisan. Turning the bend into the Straight Pantin drew to the front, passing the Rogue and then Utah. Mr. Mottu now had the race in hand and won easily by three lengths, two lengths between second and third. Time, 2m. 16secs.

8.—THE COUNTRY-BRED HANDICAP, Value \$150, 2nd \$50; for Country-bred Horses; handicap to be made up after first day's racing; winner after publication of weights 5lbs. extra. One Mile. Entrance fee, \$10.

Mr. Tatsuta's Tatsuta, 4yrs., 144lbs. (Riki) 1
Mr. Nemo's Sasha, 5yrs., 144lbs. (Ichi) 1
Mr. States' Idaho, 138lbs. (Sugiura) 3
Mr. Worthington's Rambler, 133lbs. (Sato) 0

Tatsuta got the best of the start and led the field all the way round. Going down the Dip Rambler threw his jockey and proceeded for a while riderless. At the five-furlongs post, Sasha and Idaho were running together, about two lengths behind the leader, but after the Trees, Sasha passed Idaho. Entering the Straight, Tatsuta lead by several lengths passing the post an easy winner, bad third. Time, 1m. 50½ secs.

9.—THE NORTH-CHINA HANDICAP, Value \$200, 2nd \$50, a Handicap for all China Ponies; Handicap to be made up after first day's racing; winners after publication of weights 5lbs. extra. One and a Half Miles. Entrance fee, \$10.

Mr. Avis's Tomtit, 12h., 3in., 135lbs. (Mr. Kingdon) 1
Mr. Hyogo's Himeji, 13h., 2in., 135lbs. (Yasu) 2
Mr. R. Field's Terror, 13h. 1in., 139lbs. (Kubota) 3

Major Trick's Monaco, 13h., 1in., 135lbs. (Miyagawa) 0
Mr. States' Maine, 13h., 1in., 148lbs. (Mr. Pakenham) 0

Mr. States' Utah, 13h., 1in., 135lbs. (Sugiura) 0
Messrs. Bent and Owen's Express, 13h. 0in., 144lbs. (Mr. Nicholson) 0

Mr. Nemo's Opportuniste, 13h. 1in., 135lbs. (Ichi) 0
Mr. Wood's Samurai, 13h. 0in., 145lbs. (Riki) 0

Mr. States' declared Maine to win if able. Terror led the field past the Stand, with Monaco last. Tomtit soon worked through the ruck and assumed the lead in the back stretch. Turning for home, Himeji ran into second position passing Terror. Tomtit won by a length and a half, half a length between second and third. Time, 2m. 50½ secs.

THIRD DAY.—SATURDAY, 1ST MAY.

Spring seemed to have turned suddenly into early Summer on Saturday, for the heat at Negishi, on the third day of the Nippon Race Club's Meeting, was torrid at times, and as a result a good many sun-burnt faces were to be seen towards the close of the day's proceeding. The attendance was exceptionally good for a third day, and quite a number of ladies were present. The racing was much better than on the previous day, the excitement of a dead heat being added; and indeed close finishes marked most of the events. Mr. Worthington added another win to his string by capturing the Cesarewitch Stakes with Suma, much to the delight of the Kobe contingent, though, curiously enough, he had hardly a supporter in the *pari-mutuel*. Then Vermont (Mr. States), Sugiura up, and Hermine (Mr. Durand), Kobayashi up, ran a dead heat in the Youngsters Handicap amid much excitement. A

record time was achieved in the Prix des Haras, Idaho, a gallant bay, lowering Tatsuta's record of the October meeting, 1896—1m. 55secs.—to 1m. 52½secs. This was a most popular win and Mr. Isaacs was cheered again and again as the pony was led in: with the exception of the dead heat in the previous race, this was his first decisive achievement since the meeting began on Thursday. The China Consolation fell to Morisan, a handsome roan owned by Mr. Nishimura. Chance secured the Juvenile Consolation for country-bred mares, Ichi riding Mr. Four-in-hand's grey in his usual exhaustive style. The Country-breds Solace caused a little trouble, and Kobayashi, who was mounted on Tambour Major—the eventual winner—had to be told that the next time he stole a start or in any other way disobeyed the Starter's orders, he would be warned off the course—the Committee adding that this penalty would be inflicted on the slightest provocation on his part. It is high time that this sensible stand was taken. The China Champion turned up in Orion, ridden by Mr. Nicholson; and the Champion Youngster was Saiko, a very taking brown 3-year-old. Mr. States won the Country-bred Champion with Idaho. This animal has the making of a very fine racer if properly trained and managed; at present it is all nerves. The Country-breds' race concluded the programme, bringing a most successful, and thoroughly enjoyable, meeting to a close.

The Band played the following programme:—

1. "The Gladiators," MarchG. Southwell.
2. Overture, s. Op. "Fra Diavolo"Auber.
3. Fantasia uber, "England Lieder,"F. Eckert.
4. "Golden Beauty" WaltzMillocker.
5. "Sousa's Triumphant" MarchHarlow.
6. "Lieder Potpourri," No. 3F. Eckert.
7. "Prima Vista" PolkaHeyer.
8. Grand Selection "Ermenie"Ferezzi.
9. "See Saw" WaltzShaw.
10. "Lucrezia Borgia," CavatinaDonizzetti.
11. "Princess Royal," Military Schottische, Wiegand.
12. "La Dame du Lac" CavatinaDonizzetti.
13. "Waldendacht,"Art.
14. "The Parisienne" MarchSullivan.
15. "Mikado" WaltzSullivan.
16. Fantasia "Scotland"W. H. Lee.
17. "Pist-Pist" MasurkaBrahams.
18. "Ungarischer Tanz"Brahams.
19. "Amberso" PolkaBarlow.
20. GalopBarlow.

1.—The CRESWITCH STAKES, Value \$250, 2nd pony, \$150, 3rd pony, \$75; a Handicap for all China Ponies; a forced entry of \$20 for all China Ponies entered at the meeting; non-starters half forfeit. Handicap after second day's racing. One Mile.

- Mr. Worthington's Suma, 13h. 1in., 130lbs. (Hayashi) 1
- Major Trick's Monaco, 13h. 1in., 136bs. (Miyagawa) 2
- Mr. States' Maine, 13h. 2in., 147lbs. (Mr. Pakenham) 3
- Messrs. Bent & Owen's Express, 13h. 3in., 137lbs. (Kobayashi) 0
- Mr. Nishimura's Morisan, 13h. 1in., 133lbs. (Mr. Kingdon) 0
- Mr. Hyogo's Himeji, 13h. 2in., 137lbs. (Yasu) 0
- Mr. Nemo's Opportunist, 13h. 1in., 130lbs. (Katsu) 0
- Mr. Wood's Samurai, 13h. 3in., 143lbs. (Riki) 0
- Mr. R. Field's Terror, 13h. 1in., 147lbs. (Mr. Mottu) 0
- Mr. R. Field's Torpedo, 13h. 3in., 135lbs. (Kubota) 0

Torpedo got the best of a very even start, and led the field up the Hill, where Suma passed to the front, with Opportunist second, and Monaco third. Suma was leading by fully a length at the Trees, and Monaco had passed into second position, with Express close up. Turning into the Straight, Express went back and Maine came up challenging the leaders, but without success, Suma winning by a length, with Monaco, half a length in front of Mr. State's representative. Time, 2m. 13½secs.

2.—The YOUNGSTERS' HANDICAP, Value \$200, 2nd pony, \$50, 3rd pony, \$25; a Handicap for Subscription Country-breds of Autumn, 1896, and Spring 1897; a forced entry of \$20 for all ponies of this class entered at the meeting; non-starters half forfeit. Handicap after second day's racing. Five Furlongs.

- Mr. States' Vermont, 4yrs., 133lbs. (Sugiura) †
- Mr. Durand's Hermine, 3yrs., 137lbs. (Kobayashi) †

- Mr. Durand's Aida, 3yrs., 140lbs. (Goto) 2
- Mr. Worthington's Rambler, 4yrs., 124lbs. (Yasu) 0
- Mr. Four-in-Hand's Choice, 3yrs., 126lbs. (Katsu) 0
- Mr. News' Etoile, 4yrs., 132lbs. (Hakodate) 0
- Mr. San Remo's Signorina, 3yrs., 125lbs. (Miyagawa) 0
- Mr. R. Field's Thoughtless, 3yrs., 115lbs. (Sato) 0
- † Dead heat.

Eight started out of twenty entries, and Mr. Duand declared to win with Hermine. After some slight delay, caused by the jockeys trying to sneak past the starter, Mr. Bayne got the Youngsters off to a level start. Thoughtless at once sprang to the front, with Choice a close second, and Vermont third. After passing the Shakespeare, Hermine was rushed to the front, and Choice came back, to be passed by Vermont. Entering the Straight, the purple and gold colours challenged the leader, and a desperate struggle down to the post resulted in a dead heat for Vermont and Hermine; close third. Time, 1m. 12½secs.

3.—The PRIX DES HARAS, Value \$200, 2nd pony, \$50; a Handicap for all Country-bred Horses; a forced entry of \$20 for all Country-breds of this class entered at the meeting; non-starters half forfeit. Handicap after second day's racing. One Mile.

- Mr. States' Idaho, 128lbs. (Sugiura) 1
- Mr. Nishimura's Hayakaze, 154lbs. (Takahashi) 2
- Mr. Tatsuta's Tatsuta, 4yrs., 153lbs. (Riki) 3
- Mr. Sphinx's Mezame, 3yrs., 105lbs. (Sato) 0
- Mr. Nemo's Sasha, 5yrs., 142lbs. (Ichi) 0

Hayakaze jumped off with the lead, but going down the Dip, Idaho went ahead, and Mezame bolted breasting the Hill. At the top Idaho had a lead of two lengths, with Tatsuta second. Going along the back stretch, Hayakaze came up very quickly, getting into third place by the time the Shakespeare was reached. As they turned the corner for home, Idaho increased her advantage; and Hayakaze challenged Tatsuta passing her in the Straight, the race finishing with the leader four lengths ahead, five lengths separating second and third. Time, 1m. 52½secs.

4.—The CHINA SUBSCRIPTION CONSOLATION, Value \$150; a Consolation Race for China Subscription Ponies of Autumn, 1896, that have not won two races in Japan at date of entry, and Subscription China Ponies of Spring, 1897, that have started and not won a race at the meeting; weight as per scale. Three-quarters of a Mile. Entrance fee, \$5.

- Mr. Nishimura's Morisan, 13h. 1in., 150lbs. (Hattori) 1
- Mr. Four-in-Hand's The Rogue, 13h. 1in., 147lbs. (Ichi) 2
- Mr. News' Eclipse, 13h. 1in., 150lbs. (Hakodate) 3
- Mr. Partner's Tautis, 12h. 3in., 144lbs. (Sato) 0
- Mr. Hyogo's Himeji, 13h. 1in., 158lbs. (Yasu) 0
- Mr. States' Utah, 13h. 1in., 150lbs. (Sugiura) 0
- Mr. Tippecanoe's Renzi, 13h. 3in., 147lbs. (Miyagawa) 0

The trouble inseparable from the Rogue's appearance on the Course had first to be gone through, then Mr. Bayne got them off to a capital start. Renzi went away with the lead with Utah in close attendance and Eclipse next. Utah then fell back, the Rogue taking his place. In this order the field ran to the Trees, where Morisan was rushed to the front. Entering the Straight, Morisan led by a length with Eclipse next, and the Rogue third. Coming down to the lawn, the Rogue passed Eclipse and nearly collared the leader, Morisan landing home by barely half a length, two lengths between second and third. Time, 1m. 31½secs.

5.—The JUVENILE CONSOLATION, Value \$150; a Consolation Race for Subscription Country-bred Mares of Spring, 1897, that have started and not won a race at the meeting; weight, 130lb. Five Furlongs. Entrance fee, \$5.

- Mr. Four-in-Hand's Chance, 3yrs., 130lbs. (Ichi) 1
- Mr. Tatsuta's Chiyoda, 3yrs., 130lbs. (Hattori) 2
- Mr. R. Field's Thoughtless, 3yrs., 130lbs. (Hattori) 3
- Mr. Worthington's Idler, 3yrs., 130lbs. (Hayashi) 0

Thoughtless and Chance went off together at the start, but Chiyoda soon passed them and took the lead, with Chance at her tail. At the Trees, Chiyoda was leading by two lengths, with Chance still in second position, and Thoughtless third, Idler bringing up the rear. Entering the Straight Chiyoda still led, with Chance pressing her hard. Half-way up to the Stand Chance drew level, and won on the post by a neck, three lengths between second and third. Time, 1m. 14½secs.

6.—The COUNTRY-BRED SOLACE, Value \$150; a Consolation Race for Country-bred Horses that have started and not won a race at the Meeting; weight as per scale. One Mile. Entrance fee, \$5.

- Mr. Durand's Tambour Major, 3yrs., 128lbs. (Kobayashi) 2
- Mr. Four-in-Hand's Rigi, 4yrs., 140lbs. (Katsu) 2
- Mr. Durand's Frondeur, 5yrs., 142lbs. (Goto) 3
- Mr. R. Field's Cigarette, 5yrs., 137lbs. (Kubota) 0
- Mr. Worthington's Rambler, 4yrs., 135lbs. (Yasu) 0

* All-wance deducted.

After a slight delay, the crowd got off in a bunch, save Cigarette, who was wearing blinkers in view of the previous day's performance. Frondeur took the lead at the Dip, but before the top of the Hill was reached, Tambour Major passed to the front and led the field, with Rigi third and Idler fourth. At the 5-furlongs post, Rigi passed Frondeur, securing second place. At the Shakespeare Tambour Major led by two lengths, with Rigi still second, and Frondeur two lengths behind. At the Trees Frondeur began to draw on Rigi, but Mr. Four-in-hand's representative was not to be caught, and the race finished with Tambour Major three lengths ahead of Rigi, who was two lengths in front of Frondeur. Time, 2m. 57½secs.

7.—The CHINA CHAMPIONS, Value \$250; a Champion Race for China Ponies, winners at the meeting; a forced entry of \$20 for winners of one race, of \$20 for two races, and \$40 for more than two races; weight as per scale. One and a Quarter Miles.

- Mr. Worthington's Orion, 13h. 1in., 150lbs. (Mr. Nicholson) 1
- Mr. Major Trick's Pantin, 13h. 2in., 153lbs. (Mr. Mottu) 2
- Mr. Avis' Tomtit, 12h. 3in., 144lbs. (Mr. Kingdon) 3
- Mr. R. Worthington's Suma, 13h. 1in., 150lbs. (Hayashi) 0
- Mr. Four-in-Hand's Kindar, 12h. 3in., 144lbs. (Ichi) 0

A good start was effected, Orion getting slightly the best of it, with Kindar second, Suma third, Tomtit fourth, and Pantin last. Kindar then drew out and led by two lengths at the top of the Hill, Orion being a length in front of Suma. At the 5 furlongs, Tomtit and Pantin overtook Suma. Drawing towards the Shakespeare the order was, Kindar, Orion, Pantin, and Tomtit. Then Kindar began to come back and was overtaken by Orion; Pantin next passed Kindar and Tomtit came up into third place. A capital race down the Straight resulted in a win for Orion by a length, Kindar finishing second, some lengths ahead of Tomtit. Time, 2m. 15½secs.

8.—The YOUNGSTERS' CHAMPIONS, Value \$200; a Champion Race for Subscription Country-bred Mares of Spring, 1897, winners at the meeting; a forced entry of \$10 for winners of one race, of \$20 for two races, and \$40 for more than two races; weight, 130lbs. Three-quarters of a Mile.

- Mr. Yodo's Saiko, 3yrs., 130lbs. (Sasaki) 1
- Mr. Durand's Aida, 3yrs., 130lbs. (Kobayashi) 2
- Saiko lead all the way round and won by two lengths, never being seriously challenged. Time, 1m. 28½secs.

9.—The COUNTRY-BRED CHAMPION, Value \$250; a Champion Race for Country-bred Horses, winners at the meeting; a forced entry of \$10 for winners of one race, of \$20 for two races, of \$40 for more than two races; weight as per scale. One and a Quarter Miles.

- Mr. States' Idaho, aged, 142lbs. (Sugiura) 1
- Mr. Worthington's Traveller, aged, 145lbs. (Mr. Nicholson) 2
- Mr. Nishimura's Hayakaze, aged, 142lbs. (Takahashi) 3

- Mr. News' Sasha, 5yrs., 142lbs. (Ichi) 0
- Mr. Tatsuta's Tatsuta, 4yrs., 142lbs. (Riki) 0

Another good start. Tatsuta and Idaho led away, running side by side, and in this order they passed the Grand Stand, with Traveller third, Sasha fourth, and Hayakaze last. At the bottom of the Hill, Idaho got the lead, Tatsuta being second and Sasha half a dozen lengths behind. Nearing the top, the others were three lengths further behind. At the ½ mile post, Idaho led by two lengths and at the Shakespeare had increased this to four, Tatsuta still being second, while the others were coming up. The field passed the Trees almost in a bunch, with Idaho leading. Entering the Straight, Traveller ran into second place and Hayakaze passed through to third position. In this order the race finished, Idaho winning by two lengths; close third. Time, 2m. 5½secs.

OFF-DAY RACES, MAY 4TH.

A very fair afternoon's sport was provided at the Off-Day of the Nippon Race Club. The heat was very trying in the direct glare of the sun, but the handful of spectators present found plenty of room and shelter on the Stand and around the Pari-Mutuel. The results of the races were as follow:—

1.—A race for Subscription Country-bred Mares of Spring, 1897, that have started and not won a race at the meeting. Weight 130lbs.; 5 furlongs. Entrance fee \$5. Prize \$100, presented by Mr. Durand. Second pony, entrance fees.

Mr. Tatsuta's Chiyoda, 3yrs., 130lbs. (Hattori) 1
Mr. Four-in-Hand's Choice, 3yrs., 130lbs. (Katsu) 2
Mr. R. Field's Thoughtless, 3yrs., 130lbs. (Kubota) 3

The three got away together, but Thoughtless was soon left about five lengths behind. Choice and Chiyoda raced together until the bend leading into the Straight; when Chiyoda took the lead and held her own to the post, winning easily by about $1\frac{1}{2}$ lengths; about three lengths between second and third. Time, 1m. 18secs.

2.—A race for all China Ponies that have started and not won a race at the meeting. Weight as per scale. One mile. Entrance fee \$5. Prize, \$50 and sweepstakes.

Major Trick's Monaco, 13h. 2in., 150lbs. (Takahashi) 1
Mr. R. Field's Terror, 13h. 2in., 150lbs. (Mr. Motu) 2
Mr. Wood's Samurai, 13h. 2in., 147lbs. (Riki) 3
Messrs. Bent and Owen's Express, 13h. 2in., 147lbs. (Mr. Owen) 0
Mr. Hyogo's Himeji, 13h. 2in., 153lbs. (Yasu) 0
Mr. Partner's Tantis, 13h. 3in., 144lbs. (Hayaashi) 0
Mr. States' Utah, 13h. 2in., 150lbs. (Sugiura) 0
Mr. Tippecanoe's Rienzi, 13h. 2in., 147lbs. (Miyagawa) 0

A good start. Samurai and Terror immediately taking the lead made the running all the way till the Straight was reached, where they were pretty well together. On entering the Straight, Monaco came through his horses, and taking first place won by about a length; Terror second, and Samurai third about three lengths behind. Time, 1m. 58 $\frac{1}{2}$ secs.

3.—A race for subscription country-bred mares of Spring, 1897, that have started and not won a race at the meeting. Winner of race No. 1 excluded. Weight 130lbs. Three-quarters-of-a-mile. Entrance fee \$5. First Prize \$100, presented by Mr. Durand; and Pony, entrance fees.

Only one pony weighing in, this race was declared off.

MATCH— $\frac{1}{2}$ MILE.

Mr. Durand's Frondeur, 142lbs. (Kobayashi) 1
Mr. Four-in-hand's Rigi, 140lbs. (Katsu) 2

The pair got off together, Rigi having the inside of the track. On reaching the Shakespeare, Frondeur had a lead of about ten lengths, which he held to the winning post. Time, 1m. 30secs.

4.—Handicap for all China Ponies, non-winners at the Meeting. Winner of race No. 2 excluded. One mile. Entrance fee \$5. Prize, \$50 and sweepstakes.

Mr. Four-in-Hand's The Rogue, 13h., 135lbs. (Ichi) 1
Mr. States' Utah, 13h., 2in., 134lbs. (Sugiura) 2
Mr. Worthington's Himeji, 13h., 2in., 136lbs. (Yasu) 3
Mr. Wood's Samurai, 13h., 144lbs. (Riki) 0
Mr. News' Eclipse, 13h., 1in., 137lbs. (Mayeda) 0
Messrs. Bent & Owen's Express, 13h., 137lbs. (Mr. Kingdon) 0
Mr. Partner's Tantis, 13h., 3in., 133lbs. (Kobayashi) 0

A good start. Eclipse made the running. At the Shakespeare they were all together and kept so into the Straight, where Utah came through and, taking the lead, led down, looking for all the world as if she would pull it off. A short distance from the winning post, however, the Rogue came up, and passing Utah, won by about $1\frac{1}{2}$ lengths; Himeji third. Time, 2m. 24secs.

NEW COINAGE REGULATIONS.

We hereby sanction the alterations in the Coinage Regulations and cause the same to be promulgated:—

(Sign Manual and Great Seal.)

April 30th of the 30th year of Meiji.
(Counter-) Count MATSUKATA MASAYOSHI,
signed.) Minister of State for Finance,

IMPERIAL ORDINANCE No. 138.

COINAGE REGULATIONS.

Art. I.—Any person desiring to have gold coins minted must send gold bullion to the Mint Bureau.

Art. II.—Bullion for coinage purposes must be more than 990 parts of pure gold per 1,000 parts, and any alloy must be of such a nature as to preclude injury in the process of coinage. When copper alone is in the alloy the pure gold must be above 900 parts fine.

Art. III.—Bullion for coinage purposes must be above 100 momme in weight. This provision, however, does not apply to the minting of coins applied for in accordance with the rules concerning the refining of gold and silver bullion and the attestation of quality.

Art. IV.—Bullion sent in shall be weighed in the presence of the sender or his agent, and a note of acceptance shall be delivered to him.

Art. V.—The quality and nature of the bullion shall be determined by examination.

Art. VI.—When the examination of bullion is completed, the sender shall be furnished with an account as well as with the tables of examination.

Art. VII.—If, on the receipt of these documents, the sender has no objections, he may present the note of acceptance, and demand a certificate for repayment in coin. If he has any objection, he must give notice of such within three days.

Failure to give notice within that period shall be taken as an acceptance of the examination.

Art. VIII.—In case the sender of bullion gives notice of objection in conformity with the preceding article, the bullion shall be returned to him.

In such cases a fee of three yen shall be collected for every 4,000 momme of bullion examined.

Art. IX.—Any decrease in the volume of bullion caused by melting shall be borne by the sender.

Art. X.—The reception of bullion will be suspended between the 16th and 31st of March, besides the ordinary holidays. In case any special suspension is needed, notice to that effect will be issued by the Minister of Finance.

APPENDIX.

The above Ordinance shall be enforced from the date of its promulgation.

We hereby give sanction to the Rules concerning the refinement of gold and silver bullion as well as the attestation of quality.

(Sign Manual and Great Seal.)

April 30th of the 30th year of Meiji.

(Count.) Count MATSUKATA MASAYOSHI
Minister of State for Finance.

IMPERIAL ORDINANCE No. 139.

Rules with regard to the refinement of gold and silver bullion and the attestation of quality.

Art. I.—If any person desires to have gold or silver bullion refined or its quality attested at the Mint, the process of refinement or attestation will be made in accordance with these Rules.

Art. II.—Bullion sent for refinement or attestation must be above 100 momme in weight and must contain more than 750 parts of pure gold or silver to every 1,000 parts. If the bullion is of gold and silver alloy, the two metals taken together must be above 750 parts fine.

Art. III.—Bullion sent in shall be weighed in the presence of the sender or his agent, and a note of acceptance will be issued.

Art. IV.—Bullion sent in for attestation of quality shall be classed with bullion for coinage and delivered to the sender with its quality certified.

If any person applies for attestation of the quality of bullion of gold and silver alloy, or other bullion which cannot be classified as coinage bullion unless it is refined, the quality of the same shall be ascertained by refinement.

Art. V.—Coinage bullion to be prepared at the mint shall be above 100 momme in weight in the case of gold or silver.

Art. VI.—If any person desires to have the quality of bullion attested which he has presented for refinement, or to have the gold portion of such bullion struck into coins, he must give notice of the fact at the time of presentation.

Art. VII.—If any bullion is required to be returned without being refined or attested after examination, a fee of two yen shall be collected on such bullion.

Art. VIII.—Any decrease in weight caused by melting shall be borne by the sender.

Art. IX.—When the quality of the bullion is certified, a fee of three yen shall be collected for every 4,500 momme and any fraction thereof in the case of gold, and 8,000 momme and fractions thereof in the case of silver.

Art. X.—When bullion sent in is refined, fees shall be imposed at the following rates:—

76 sen	for every 110 momme of pure gold	over 950
20 sen	" " " "	silver fine.
80 sen	" " " "	gold over 900
23 sen	" " " "	silver fine.
91 sen	" " " "	gold over 860
27 sen	" " " "	silver fine.
1 yen	" " " "	gold over 800
32 sen	" " " "	silver fine.
1 yen	" " " "	gold over 750
10 sen	" " " "	silver fine.
38 sen	" " " "	silver fine.

The above Ordinance will be enforced from the date of its promulgation.

FOREST LAW.

LAW No. 46.

SECTION I.—GENERAL RULES.

Art. I.—The term "forests" in this Law means forests belonging to the Crown, State forests, detached forests, public forests, forests attached to Buddhist and Shinto temples, and private forests.

Art. II.—Fields, mountains, hills, and other lands which fall within the category of clause (1) or clause (5) of Article VII I., shall be dealt with as forests, and this Law shall be applied thereto.

SECTION II.—CONTROL AND MAINTENANCE OF FORESTS.

Art. III.—If, in regard to public forests or those belonging to temples and shrines, apprehension is felt that the resources for their maintenance are likely to be impaired or will be allowed to run to waste, the responsible Minister shall specify the method of their preservation.

Similar steps may be taken by the Minister with regard to private forests for which apprehension is entertained that there is danger of their being spoiled.

Art. IV.—In the case of trees being cut down in contravention of the method specified according to the preceding Article, the responsible Minister may suspend the cutting, and issue orders to plant trees in the place of those cut down.

Art. V.—In case any person fails to replant trees as specified in the foregoing Article, the Government may take up the work itself and collect the expenses incurred therefor, or classify it as a "detached forest."

Art. VI.—If any person desires to reclaim a forest, he must obtain the sanction of the Governor of a City or Prefecture.

Art. VII.—If any danger or injury is apprehended to State lands, the responsible Minister may suspend the reclamation, provided that he previously defines the area to be dealt with.

SECTION III.—LAND-PRESERVATION FORESTS.

Art. VIII.—Forests standing in places set forth below may be included in the schedule of Land Preservation Forests:—

1. Where trees are necessary for protection against land slips and sand slips which may block a river.
2. Where trees are indispensable for defence against sand drifted by wind.
3. Where trees are necessary for protection against inundations, hurricanes, and tidal calamities.
4. Where trees are necessary to prevent dangers of avalanches and stone slips.
5. Where trees are indispensable for the maintenance of fountain springs.
6. Where trees are necessary for fishing purposes.
7. Where trees serve as marks for navigation.
8. Where trees are indispensable for the public health.
9. Where trees are essential to the maintenance of the scenery of temples and shrines, noted places, and historical ruins.

Art. IX.—If any of these causes cease to exist, or special reasons arise in view of public benefit, with regard to Land Preservation Forests, the forests in question may be withdrawn from this classification.

Art. X.—As regards the scheduling or withdrawal of Land Preservation Forests, application may be presented for that purpose to the Governor of a City or Prefecture, by *Fu, Ken, Gun, Shi, Cho, or Son*, or any other place or person whose interests are directly affected.

Art. XI.—In case the Governor of a City or Prefecture deems it necessary to schedule or withdraw

Land Preservation Forests, or in case he has received a demand for such action, he shall submit the matter to the deliberation of the Local Council for Forests.

The rules concerning the Local Council in question shall be drawn up and published by Imperial Ordinance.

Art. XII.—In case the question of the scheduling or withdrawal of a Land Preservation Forest is submitted to the discussion of the Local Dendrological Council, the fact shall be publicly notified by a City or Prefecture thirty days prior to the session of the Council. Similar notice must also be given to the proprietors of forests, the Public Work Control Office, and the chief Dendrological Office, and notice shall be posted in the local office of a City, Town, or District where the forest stands.

Art. XIII.—In case any forest affairs are submitted to the deliberation of the Local Dendrological Council for the scheduling of Land Preservation Forests, the cutting of trees or the reclamation shall be prohibited from the day of notice as prescribed in the foregoing Article till the day of final decision.

Art. XIV.—If any person whose interests are directly connected with the registration or removal of Land Preservation Forests, objects to such steps being taken, he may present his views in writing to the Local Dendrological Council through the Governor of a City or Prefecture, within twenty-five days from the date of the notice being given as prescribed in Article XII.

Art. XV.—The Governor of a city or prefecture shall then append his opinions to the reply from the Local Dendrological Council, and present the same to the Responsible Minister, together with all documents bearing on the subject.

Art. XVI.—The question of the scheduling or dissolution of a Land Preservation Forest shall be decided by the responsible Minister of State after deliberating with the Local Dendrological Council.

Art. XVII.—The scheduling or withdrawal of Land Preservation Forests shall be notified in the *Official Gazette* and by public notices in cities and prefectures. Notice shall also be given to the proprietors of forests.

Art. XVIII.—In case any person who has a direct personal interest in the scheduling or withdrawal of a Land Preservation Forest, finds that the steps taken to that effect are unsatisfactory, he may institute a suit in the Administrative Court, within ninety days from the date of receipt of information or of public notice issued as prescribed in the foregoing article.

Art. XIX.—No wholesale cutting down of trees or reclamation is allowed in Land Preservation Forests.

Art. XX.—No person shall dig stone or earth, gather sticks, roots of trees, or feed cattle or horses in Land Preservation Forests, unless he has obtained permission from the Governor of a city or Prefecture.

Art. XXI.—The responsible Minister of State may, if he deems it necessary, prohibit or restrict the cutting of trees in Land Preservation Forests.

Art. XXII.—The responsible Minister of State may, with respect to Land Preservation Forests, instruct the proprietors thereof to resort to methods determined by him for the management as well as protection of the same, or restrict their use or amount of profit arising therefrom.

Art. XXIII.—The Responsible Minister of State may order any person who has reclaimed a Land Preservation Forest or any other forest the reclamation of which was prohibited, to restore the same to its former condition by planting a new forest.

Art. XXIV.—If the forest is not planted as prescribed in the foregoing article, or in accordance with the direction provided in Article XXII., the Government may execute the work and collect the expenses incurred therefor.

Art. XXV.—No objection can be raised to the Government's proposal at any time to purchase Land Preservation Forests.

Art. XXVI.—The proprietors of forests who sustain losses in consequence of the same being registered as Land Preservation Forests, may claim compensation at the time when such losses are directly incurred in cases where the cutting of trees has been prohibited.

No compensation, however, shall be made with regard to Crown or State forests.

The losses mentioned in the foregoing Article shall be paid by the applicant in case of demand having been made for the scheduling of a Land Preservation Forest, and by the Government in the case of orders having been issued for a similar purpose.

In regard to compensation to be made in the former case, the Government may defray in aid a sum not exceeding one-third of the amount of compensation.

The method of calculating losses shall be determined by Imperial Ordinance.

Art. XXVII.—In case no understanding is arrived at as to the value, as prescribed in Article XXV., or the amount of compensation mentioned in the foregoing Article, the Local Dendrological Council shall be required to decide the case. If the decision of the Council is considered unsatisfactory, a suit may be instituted in a Court of Law within ninety days from the receipt of the notice of decision.

Art. XXVIII.—The woods scheduled as Land Preservation Forests shall be exempted from land tax and other public imposition.

Art. XXIX.—Woods that stand on Government land but have trees belonging to a private individual, shall be exempted from rent when the same have been registered as Land Preservation Forests.

Art. XXX.—Forests where the cutting of trees was formerly prohibited or suspended, or those which have been maintained for scenery, shall be classed with Land Preservation Forests from the date of the enforcement of this Law, and the restrictions formerly imposed upon such woods shall still remain in force.

SECTION IV.—FOREST POLICE.

Art. XXXI.—Any person who is engaged in the occupation of cutting trees or organising a forest, or selling or buying timber, shall previously present a report to a police-station having jurisdiction, as to the marks and stamps used.

The police-station may forbid the use of marks and stamps resembling those of another person.

Art. XXXII.—Any person pursuing the business of cutting trees or organising a forest is not allowed to object to steps that may be taken by a Forest Inspector or any police officer desiring to inspect notice boards, account books, and implements in his possession.

Art. XXXIII.—No person is allowed to undertake "burning" known as *hiire* in the forest, without receiving permission from the Forest Inspectors or a police officer.

Art. XXXIV.—When the "burning" is undertaken in a field adjacent to a forest, preparations must previously be made for protection against fire.

Art. XXXV.—Burning wood or carrying torches in the forest without substantial cause is strictly forbidden.

Art. XXXVI.—If any person has discovered an outbreak of fire or the presence of injurious insects in the forest or its vicinity, or discovered any person who has committed or attempted to commit offences concerning the forest, he must immediately report the fact to the Forest Inspector or police officer, or a public functionary of *Gun, Shi, Cho*, and *Son*.

SECTION V.—PUNISHMENT.

Art. XXXVII.—Any person who steals the principal or secondary productions of a forest shall be dealt with under the category of Forest Thefts, and be condemned to a fine of not less than two *yen* and not more than double the value of the goods he has stolen, or to major imprisonment for a term of not less than eleven days and not more than two years. The same punishment also applies to cases where artificial labour has been applied to the productions in question. The amount of fines, however, shall in no case fall below the value of the goods stolen.

Art. XXXVIII.—Any forest theft accompanied by the following actions shall be punishable by a fine of not less than two *yen* and not more than double the cost of the goods stolen, or to major imprisonment for a term of not less than two months and not more than two years, provided that the penalty shall not fall below the value of the goods stolen:—

1. When the stumps of trees have been destroyed or concealed so as to hide traces of offence.
2. When charcoal, camphor, dried septoria mushrooms, pine-root oil, or other articles are manufactured out of materials consisting of stolen goods.
3. When mineral ores are taken or refined, or lime, brick, tiles, or other articles are manufactured by the use of the stolen timber as fuel.
4. When ships are used to facilitate the theft.
5. When trees are cut down for purposes of theft.
6. When offences are committed in exercising the right of gathering the products of forests.
7. When offences are perpetrated by more than three persons in collusion or by the engagement of more than five persons.
8. When offences are committed by persons who by contract are under obligation to protect the forests.
9. When goods under distraint are concealed or consumed.

Art. XXXIX.—Any person, who knowingly accepts goods stolen from the forests, or takes in

charge or buys them or acts as broker for the same, shall be punished by a fine of not less than two *yen* and not more than double the cost of the goods stolen, and also by major imprisonment for a term of not less than one month and not more than three years.

Art. XL.—Any person injuring or destroying the trees of a forest belonging to another person shall be punished by a fine of not less than two *yen* and not more than fifty *yen*.

Art. XLI.—Any person setting fire to forests of another shall be sentenced to minor imprisonment, and in case he burns down principal products, he shall be punished with major imprisonment. If the forest belongs to himself, he shall be sentenced to major imprisonment for a term of not less than two months and not more than two years.

Art. XLII.—Any person pasturing cattle or horses in the forests of another without due cause shall be fined not less than two *yen* and not more than fifty *yen*.

Art. XLIII.—Any person removing or destroying marks erected in a forest shall be condemned to a fine of not less than two *yen* and not more than thirty *yen*. If the marks in question refer to articles indicating the boundary, Article CDXX. of the Criminal Code shall be applied.

Art. XLIV.—Any alteration or disfigurement of marks or designs fixed on standing trees, timber, or stumps shall be punished by a fine of not less than two *yen* and not more than twenty *yen*.

Art. XLV.—The reclamation of a forest without the permission specified in Article XI. shall subject the offender to a fine of not less than two *yen* and not more than two hundred *yen*. If the offence refers to a Land Preservation Forest or to woods the cultivation of which has been prohibited, it shall be punished, in addition to the fine, by major imprisonment for a term of not less than eleven days and not more than six months.

Art. XLVI.—Any person cutting down all the trees in a Land Preservation Forest or cutting any trees in contravention of the orders of prohibition or restriction shall be fined an amount corresponding to the value of timber so obtained.

Art. XLVII.—Any violation of Articles XIII. or XX. shall be punished by a fine of not less than three *yen* and not more than thirty *yen*.

Art. XLVIII.—Any violation of Article XXXII. shall be punished by a fine of not less than two *yen* and not more than twenty *yen*.

Art. XLIX.—Violations of Articles XXXIII., XXXIV. and XXXV. shall be punished by a fine of not less than two *yen* and not more than fifty *yen*. In case the offence is accompanied with the burning of another's forest, a fine of not less than two hundred *yen* shall be inflicted.

Art. L.—Violation of Article XXXI. shall subject the offender to a police fine of not more than fifty *sen*.

Art. LI.—Offences against this Law shall not be dealt with according to the provisions of the Criminal Code which refer to the Concurrence of Offences.

SECTION VI.—MISCELLANEOUS RULES.

Art. LII.—The term "reclamation" in this Law refers to burnt fields, fields exchanged for others, and to those the classification of which has been changed.

Art. LIII.—Camphor, camphor oil, bird-lime, resin, or charcoal, prepared or manufactured from materials stolen from the forests, shall be regarded as stolen goods.

Art. LIV.—Expenses to be levied as specified by this Law may be collected in accordance with the Law providing for non-payment of national tax.

Art. LV.—In regard to woods which were laid waste or had no trees planted from a time prior to the promulgation of this Law, the responsible Minister of State may, by fixing a certain period, issue orders to re-organise the forest. In case the organization of the forest in question is neglected, the provisions of Article V. shall be applied.

Art. LVI.—Forests for which orders are issued for reorganization may be exempted from land tax and other public impositions, exclusively, during a period of twenty-five years from the time immediately following the reorganisation.

This provision applies also to fields, mountains, hills, and waste lands where woods are reorganised.

Art. LVII.—In regard to forests in Hokkaido, Okinawa prefecture, and other islands, specified by Imperial Ordinance, the provisions of this Law that refer to Land Preservation Forests shall alone apply.

The process of scheduling or withdrawing Land Preservation Forests shall be determined by Imperial Ordinance.

Art. LVIII.—This Law shall be enforced from January 1st of the 31st year of *Meiji*.

CORRESPONDENCE. FOREIGNERS' AND LAND.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In regard to the matter of foreigners holding land in Japan under lease or superficies, and the supposed delinquencies of the English negotiators in the matter, I have no inside information or knowledge of what was actually done; but from the outside the case seems to have been as follows:—Superficies is a kind of right in land unknown to the English law but found in the German and French laws, which got it from the Roman law. Nearly, though not exactly, the same place which is taken in the civil law by superficies is taken in the English law by long lease, whereas in the civil law leases are treated in a very different manner. Apparently the English negotiators used the legal terms with which they were familiar, while the German treaty-makers used their familiar terminology. The actual result was that, the Japanese law agreeing in the main with the German, the Germans did obtain by their treaty, for themselves and all foreigners, important concessions which the English no doubt intended to obtain and supposed they had obtained. In a treaty between England and the United States the language of the English treaty would have been quite sufficient. It seems to me that the English negotiators,—and the same may be said of the American—can not be entirely acquitted of some slight negligence in not having consulted some competent lawyer familiar with the civil law—unless indeed they did so, and did not get the advice that they should have got;—but to charge them with indifference to the interests of their nationals or any very culpable negligence because they, apparently, fell into an error into which nineteen out of twenty American or English lawyers would have fallen, is going a great deal too far.

LAWYER.

April 30th, 1897.

[We do not follow this reasoning. The plain fact is that the English negotiators obtained for British subjects whatever privileges of land tenure—ownership excepted—were embodied in the civil Code of Japan. Among those privileges was that of leasing land for any mutually fixed term of years, the lessor becoming a superficiesary. We venture to affirm that the English negotiators knew exactly what they were about, and that they had the best legal advice procurable. The Law officers of the Crown are pretty good in England, and, moreover, intimately connected with the negotiators were men thoroughly familiar with the new Japanese Code, and with all such matters as "superficies," "emphyteusis," and what not. Though there were no such thing as a German Treaty, Her Majesty's subjects would be able, we believe, to lease land in Japan after the revised Anglo-Japanese Treaty goes into force, on any terms recognised by Japanese law. It may be claimed, indeed, that the advantage of explicitness is on the side of the German Treaty, but the practical result would have been the same with or without the German Treaty. Above all, "Lawyer" appears to forget that had the German Treaty been concluded at the same time as the English, it could not have contained any textual allusion to "superficies," or "emphyteusis," for such allusion would have anticipated the Japanese Code, which had not yet become law.—ED. J. M.]

ENGLISH V. AMERICAN LOCOMOTIVES.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—A good deal has lately been said about the number of locomotives ordered from America, and the preference shown for them, by Japanese engineers, over those of English make.

Now I do not know what has decided the orders given by private lines for American locomotives, but I do think the reason the Government Railway Department has given its orders to America, is the one factor—time.

Of course it is quite right and proper for the Japanese Government to give its orders just how and where it wishes to do so, but I think the mode of drawing up the specifications for English engines handicaps the British builder when placed in comparison with our consins.

In the specifications issued to British makers every little detail is mentioned, and he is bound down to work in very narrow lines. Many of the requirements are out of date, and the specification generally is old-fashioned. Where out-of-date material is specified, it means delay in getting obsolete stuff made specially, and loss of time, as only the smaller works may still continue to make it. Then again, the English locomotive builder is bound down to a few makers of material, from whom he can buy. In some cases only one maker of material is specified. This handicaps him severely, as if the maker is busy he can ask and get any price from the locomotive builder he may choose.

This is quite different where the American builder comes in. He has an absolute free hand.

A short time ago 18 locomotives were tendered for by American makers, and not even the size of the cylinders was mentioned. The whole specification was but a few lines. In the matter of material he could buy from whom he pleased, and, provided it stood certain tests, use what he liked. Why this liberty to the American, and not to the Britisher; are not both to be equally trusted?

Many people seem to think that the orders going from Japan are so large they have swamped the English builder. How far from true this is, is proved by the fact that the Japanese orders were so small they were not taken any note of in a recently published list of orders received for engines by the large British builders.

The Japanese Government has recently ordered 36 locomotives from England, and 18 from America, and is asking for tenders for 18 more American engines. But orders of over 100 locomotives at a time are very common with English makers. As a matter of fact, England exports very many more locomotives than America does.

I remain, dear Sir,

BRITISHER.

Tokyo, May 1st, 1897.

THE BOUNTY ON DIRECT EXPORT OF JAPANESE SILK.

The following letter has been addressed by the Yokohama Chamber of Commerce to the *Doyen* of the Diplomatic Corps in Tokyo:—

Yokohama General Chamber of Commerce,
8th April, 1897.

To His Excellency EDWIN DUN, Envoy Extraordinary and Minister Plenipotentiary of the United States of America, Doyen of the Diplomatic Corps, Tokyo.

YOUR EXCELLENCY,—The Committee of the Yokohama General Chamber of Commerce desire to ask the attention of your Excellency to the Bill proposed by the Imperial Japanese Government, and at the last session of Japanese Diet (but which has not received Imperial sanction), providing for the payment to direct Japanese exporters of raw silk of a bounty or subsidy upon their shipments from Japan to foreign countries.

This Bill, as originally presented, allowed a bounty of:

Yen 50 per picul on silk of best colour and quality, 2 deniers variation.

Yen 30 per picul on silk of good colour and quality, 3 deniers variation.

Yen 20 per picul on silk of fair colour and quality, 4 deniers variation.

which would amount roughly to about 6 per cent. on the value of the best, 4 per cent. on the value of the good, 3 per cent. on the value of the fair filature of re-reeled silks produced in this country.

The details were, however, altered in Committee by the Diet, so that the amount of the subsidy and the classification of the silk have been left to be determined by the Government Department of Agriculture and Commerce.

According to Article 1, the proposed bounty is restricted to Japanese subjects engaged in the direct export of silk to foreign countries.

It is not payable to the growers and reeler of silk, who might thereby be stimulated to improve their production (in which case no possible objection could have been taken to the measure), but gives to specially-favoured Japanese exporters a benefit not available to others. The grant of this bounty will, indeed, be injurious to the producer of silk, as the bounty-favoured exporter will, by means of the subsidy which he receives, be enabled to sell his silk at lower prices than his competitors, without incurring loss, thereby inducing a decline in value on the markets abroad, which must cause a fall also in Japan, to the detriment of the growers and dealers in silk here.

The Imperial Government of Japan for many years past expressed the desire to revise its Treaties with Western Powers on a footing of equality and upon principles of equity and mutual benefit; and in the new Treaty signed in 1894 between Japan and Great Britain—Art. I.—it is expressly stated that the subjects of each contracting party shall enjoy in the dominions and possessions of the other the same privileges and rights as native subjects; while Art. VII. states "The subjects of each of the contracting parties shall enjoy in the dominions and possessions of the other a perfect equality of treatment in all that relates to bounties, and drawbacks."

It is true that the provisions of the new Treaty do not come into force until July, 1899, but it is surprising to see that, while the Imperial Japanese Government is with one hand signing Treaties

according equality of treatment to Japanese and foreigners, it is with the other offering bounties to some of its own subjects that will directly injure the silk trade of the foreign residents in this country, a trade which their enterprise has fostered and trebled in importance during the last thirty years.

It is evident that the provisions of this bounty, proposed to be given for seven years, will be in direct conflict with the new Treaties; and the Committee of this Chamber consider that they are also contrary to the spirit of the previous Treaties between Japan and Foreign powers.

The preamble to the Japanese Austro-Hungarian Treaty of 1896 expresses the desire of Their Majesties, the Sovereigns of these countries, to facilitate the commercial intercourse between their respective subjects, and Art. VIII. states that at each of the open ports Austro-Hungarian citizens shall be at full liberty to purchase therein, and export to their own or any other ports, all manner of merchandise, not contraband, paying the duties thereon as laid down in the Tariff, and no other charges whatsoever.

In the form in which the Bill has passed the Diet it will be obvious to your Excellency that it is open to the Japanese Government to determine the amount of subsidy and the standard of quality in such a manner as might effectually render competition impossible on the part of foreign firms engaged in the silk export trade, and that the full liberty provided for in the Treaty will no longer exist, and commercial intercourse will be impeded instead of being facilitated as called for.

The Committee of this Chamber venture to hope that your Excellency will bring this question, which greatly affects a trade valued at some four million pounds sterling per annum, before your colleagues, in the hope that concerted action on the part of the Foreign Representatives in Tokyo may result in the Imperial sanction being withheld from a measure which would be unfair and injurious to the merchants so long established in Japan, while being of no real benefit to the trade in other directions.

I have the honour to be, your Excellency's most obedient servant.

W. B. WALTER, Chairman.

AN EVENING AT THE PUBLIC HALL.

Yokohama is favoured with some queer forms of entertainment at times. What stories the walls of the Public Hall could tell, were they gifted with articulate speech: tales of theatrical and operatic derelicts that have drifted here, froited a brief hour upon its boards, and then vanished, goodness knows how, on "outside" steamers. Only last week a comical show was given by a band of Japanese dancers that made the scorners laugh and the judicious grieve, but we venture to think that a greater fiasco than the dancers from Java was the cinematograph exhibition given on Thursday on the Bluff. The show had been pleasantly puffed in hand-bills and advertisements, and on Thursday afternoon a great display of lanterns and flags was made outside the building, stretching from the entrance to the Public Hall to the American and English Hospitals. Despite this, however, the public were wary and only a handful of spectators were in attendance when proceedings commenced. It opened quite promisingly, but soon one very serious-minded gentleman objected to a giddy scene from gay Marseilles. This caused the operators behind to hesitate about other effects that they had in store—result, a demoralization that grew more acute as the exhibition proceeded and entailed longer and longer waits between the scenes. We ought to remark, before going further, that the views were mostly disfigured by an unusual amount of flickering; many were rendered almost indistinct owing to the bad focussing of the light; and all bore the marks of hard service in numerous rents and tears. About half past nine o'clock the band put in a tardy appearance: they were hailed with noisy manifestations of approval and for a time things were livelier. Soon after, an usually long delay induced the majority of the audience to seek liquid refreshments and after the adjournment, the show recommenced with yet longer intervals between the scenes and consequently louder noises from a now fairly jubilant house. About ten o'clock most of the spectators had risen—the males collected in the vestibule around the band, while all the ladies vanished. Then a deputation was formed to ask the management if a little more fun could not be provided for the money? The embassy was successful to the extent of three views: again a stoppage and the band struck up "God Save the Queen," as a hint that all was over. But the patient remnant of a house good humouredly wait-

ed till this musical interlude drew to a close, and then asked for more—photographs. They obtained one—the last. Yet everybody was good-humoured, treating the whole thing as a capital joke; even the band fell into the spirit of the situation towards the close and gave forth some lively tunes after the light had finally gone out in the Hall itself. What other community would have stood such behaviour, we wonder; or have treated it in such fashion?

LATEST TELEGRAPHIC NEWS.

(FROM THE "JAPAN TIMES.")

MINISTERIAL CHANGES IN GREECE.

London, May 2.

M. Delyannis, the Greek Prime Minister, refusing to resign, has been dismissed, and M. Ralli has formed a Cabinet.

THE TURKS ADVANCING.

The Turks have occupied Trikkala without resistance (Trikkala is a province of Thessaly, 28 miles W. of Larissa).

THE BRITISH BUDGET.

Sir Michael Hicks-Beach, in his Budget, statement, said he had found it necessary, in framing the estimates, to keep carefully in view the present war-cloud in the East, whereof nobody can at present foresee the duration and extent. It had been decided that the expenditures for the current year should be £101,791,000 and the revenue £103,360,000, setting down £500,000 for the Navy Estimates and the increase of the Garrison at the Cape, for the purpose of maintaining a paramount position in Africa.

[In 1894-5 the revenue was £94,683,762 and the Expenditure £94,171,487. In 1895-6 the revenue was £101,973,829, and the Expenditure £97,764,357. The Naval Estimates were about 17 and 19 millions in the two years, excluding special expenditure under the Naval Works Act. This half-million must be solely for South Africa, and should probably read "£500,000 for increase of Cape Naval Establishment and Garrison," &c.]

REDUCTION OF POSTAL RATES.

The foreign colonial postage has now been reduced to two-pence.

[This probably should read "foreign and colonial," meaning that the British Post Office reduced its rate for half-ounce letters to foreign countries and British Colonies to two-pence; instead of meaning, as it says, postage in foreign colonies. It does not imply that the Postal Union rate as a whole is altered, but only the rate for letters from England.]

THE BRITISH PREMIER.

Lord Salisbury has returned from Cannes to London.

COLLAPSE OF THE GREEKS.

London, May 3.

The Greek forces in Epirus have been defeated at Pigadia and have retreated to Arta (withdrawing entirely from Turkish soil). At Velesinos (where the Greeks successfully resisted the first attack) they have also met with defeat, and have retreated to Volo.

CURS AS WELL AS COWARDS.

The Duchess of Sparta, whilst returning from one of the Hospitals, was jeered at by the mob and compelled to seek refuge in the place she had just left. A carriage was brought round and she was driven away at a gallop to the Palace.

CONFERENCE PROPOSED.

Lord Salisbury has proposed that a conference be held at Paris concerning the war.

ANOTHER DISGRACEFUL STAMPEDE OF GREEKS.

London, May 4.

The retreat of the Greeks from Pigadia to Arta (previously reported) turns out to

have been, according to later details, very similar to their flight from Larissa; the leadership was deplorably incompetent, an unreasoning panic came over the troops, and their courage, *morale*, and discipline vanished completely.

PLAYING AT WAR.

It appears that throughout the war, the losses on both sides have been remarkably small, in spite of the reports of "desperate and prolonged conflicts."

ABANDONMENT OF THE CONFERENCE.

Lord Salisbury's proposal to hold a Conference at Paris concerning the war has been abandoned.

THE CRETANS OCDURATE.

The Cretans have refused the offer of autonomy [under Turkish suzerainty] and demand annexation by Greece.

THE GREEK STAMPEDE.

London, May 5.

Further details in reference to the Greek flight from Pigadia to Arta show that, out of a total force of 11,000 Greeks who were in the scramble, only 1,000 remained long enough to come under fire at all!

It has transpired that the Greeks are wholly lacking in stores and munitions of war.

MEDIATION BY THE POWERS.

There is a growing impression that the Powers will mediate between Greece and Turkey.

French soldiers (? marines) to the number of 200 have been landed at Volo and are patrolling the streets.

SOUTH AFRICAN AFFAIRS.

President Kruger, in his address at the opening of the Transvaal Volksraad, proposed the closing of all public offices on the occasion of Queen Victoria's Diamond Jubilee.

The South African horizon is still somewhat clouded, but a light is discerned behind, which, it is hoped, by using conciliatory methods, will dispel the clouds.

TERRIBLE DISASTER IN PARIS.

OVER 100 PEOPLE BURNT TO DEATH.

London, May 6.

At a Charity Bazaar in Paris, largely attended by ladies and gentlemen of high position, fire broke out suddenly, and the building was entirely consumed within twelve minutes.

The number of people who had no time to escape is not yet known, but over a hundred charred corpses have been recovered, and several persons of prominence are still missing. Among these are the Duchesse d'Alençon, Countess Mun, Marquise de Gallifet, and General Ternier.

The remains of the unfortunate victims filled fourteen waggons.

THE "TWO THOUSAND GUINEAS."

The following is the result of the Two Thousand Guineas Stakes, run at Newmarket yesterday:—

Mr. Gubbins' Galtee More 1
Lord Rosebery's Velasquez 2
General Owen Williams' Minstrel 3

THE WAR IN EUROPE.

Greece has decided to continue the war.

THE MANILA REBELLION.

(Special Telegram from the Governor-General to the Spanish Minister in Tokyo.)

Manila, May 5, 8.15 p.m.

The villages of Amadeo, Naic, and Indan (all of them in Cavite Province) have been captured. The rebels have suffered great losses.

CHESS.

All Communications to be addressed to the Chess Editor

The Yokohama Chess Club is closed for the season: and reopens on Monday 4th October.

The Tokyo Chess Club meets at the Tokyo Hotel, every Friday, from 1 p.m. to 7 p.m.

SOLUTION OF PROBLEM No. 307.

WHITE.	BLACK.
1—K to Kt 2	1—B takes R
2—Q to B 4 ch.	2—K takes Kt
3—B to B 4 mate	1—B takes B
2—K to B 3	2—R to B 2
3—Q to Q 2 mate	if 2—Kt to Q 4
3—R takes Kt mate	1—Kt takes Kt
2—B to Kt sq. ch.	2—K to B 5
3—Q to B 4 mate	

Correct answers from W.H.S., J.W.E., and Omega.

SOLUTION OF PROBLEM No. 308.

WHITE.	BLACK.
1—R to Q Kt 4	1—Q takes Q
2—R to Q 2 mate	1—Q takes R
2—B takes Kt dis mate	1—Kt to K 6
2—Q to B 3 mate	1—Kt to K 4
2—R to Q 4 mate	1—Kt to Q B 5
2—R to Kt 5 mate	1—B to K 3
2—B to K 4 mate	1—Kt to R 5
2—P to B 4 mate	

Correct answers from W.H.S., J.W.E., I dout, W.D.C., and Omicron.

PROBLEM No. 311. By W. FINLAYSON.

BLACK.

WHITE.
White to play and mate in three moves.

PROBLEM No. 312. By the Rev. J. JESPERSEN.

BLACK.

WHITE.
White to play and mate in two moves.

It is the habit of practical players, says the *Kentish Mercury*, to regard the problem enthusiast with scant favour. They are prone to think of him as engaged in unravelling a stupid puzzle, when, as a matter of fact he is enjoying a poetical fancy of the higher branch of chess. Properly speaking a problem is not a puzzle. It is a work of art, the composer's aim being to display chess in its perfect and most attractive form. "True, the finding of a key of a problem generally presents considerable difficulty; but when the key has been discovered, the next thing should be to admire the charming after-play, the variations, the mating positions, and how they are brought about. It is a poor business to regard a problem as a mere child's puzzle, and to dismiss it as soon as the key has unlocked the treasure-house."

SHOWALTER AND PILLSBURY.

GAME No. 703.

FOURTH GAME—RUY LOPEZ.

White—Showalter.		Black—Pillsbury.	
WHITE.	BLACK.	WHITE.	BLACK.
1 P K4	P K4	21 Kt Q2	QR K sq.
2 Kt KB3	Kt QB3	22 R x R	Kt x R
3 B Kt5	Kt B3	23 Q Kt3	P OKt3
4 Castles	Kt x P	24 P KR3	P KB4
5 P Q4	Kt Q3 (a)	25 Q B2	P Kt3
6 R K sq.	(b)	26 P OKt3	B B2
7 Kt x P	Kt x B	27 R K sq.	Q Q2
8 B Kt5 (d)	Kt (Kt4) x P	28 Q Kt sq.	P Q6
9 B x B	Kt x B	29 P B4 (h)	Q Q5 ch.
10 Q x Kt	Castles	30 K R2	Q x KBP
11 Kt QB3	P Q3	31 Q Q sq.	P KR4
12 Kt B4 (e)	B K3	32 R B sq.	Q R5
13 Kt K3	P QB4	33 Kt R sq.	(i) Kt Kt5 ch.
14 Q KB4	P Q4	34 K Kt sq.	Kt K6
15 Q R Q4	P Q5 (f)	35 Kt B3	(k) Q Q sq.
16 Kt K4	Kt Kt3	36 Q Q2	Kt x R
17 Q B3	Q B2	37 K x Kt	R K7
18 Rt B sq.	RR Q sq.	38 Q Q sq.	Q Q3 (l)
19 Kt (B sq.)	R Q4	39 Kt B2	Q Kt6 (m)
20 P QB4	(g) R K4	40 Resigns.	

NOTES.

(a) B to K2 is the usual play. The text move, however, is satisfactory, and was adopted quite successfully by Lasker. The proper continuation is: 6—B takes Kt; Q P takes B. 7—P takes P; Kt to B4. 8—Q takes Q ch; K takes Q. Another variation results if White proceeds with 6—P takes P; Kt takes B. 7—P to Q R4.

(b) B takes Kt or P takes P, as pointed out in note a, was the proper play. The text move gives White some brilliant winning chances, but by correct defence proves inferior.

(c) Of course he could not play Kt takes P, for Kt to B6 disc. ch would win the queen. Nor was Kt takes Kt good play. White would have answered R takes Kt. The move selected is the best and wins a pawn, as the progress of the game shows.

(d) Brilliant play, which, however, does not prove satisfactory. Had Black answered Kt takes Kt, then White would win with B takes B, followed by R takes Kt. Nor could Black play P to B3. White then would win speedily, with Q to R5 ch, followed by Kt takes Kt P. Black, however, has a safe reply, the one adopted in the game, Kt (Kt4) takes P, which wins a pawn.

(e) Kt to K B3 was probably better. The text move causes loss of time.

(f) Black played admirably well, when he advanced the Q B P and Q P. He secured at once the preferable position.

(g) Of questionable value, for it gives Black a passed P.

(h) A premature play, which precipitates White's defeat. He probably overlooked the threatened Q to Q5 ch, winning the K B P. White, of course, desired to prevent the P to K B5 play which would have badly compromised his game. Q to Kt2 or R to K B sq. was probably better, though White's game was pretty nearly beyond repair.

(i) Evidently he could not play Kt to B3, attacking the queen, for Black would have answered Kt to Kt5 ch, followed by Q to Kt sq.

(k) Q to K sq. was hardly any better. Black continues Q to Q sq. followed by Kt takes R or Kt takes P, with winning attack.

(l) A powerful move, which prevents White to move either Kt, for if Kt (B3) moves, Black wins with Q to R7, and if Kt (R sq.) moves, then Q to Kt6 would follow.

(m) Causes White to surrender. He cannot move the Kt from B2, for Q takes Kt P mate would follow. There is no way of stopping the Q takes Kt mate, except by sacrificing the queen.

GAME No. 704.

SEVENTH GAME OF THE MATCH, PILLSBURY v. SHOWALTER, PLAYED MARCH 5TH, 1897, AT HAMILTON CLUB, NEW YORK.

White—Pillsbury.		Black—Showalter.	
WHITE.	BLACK.	WHITE.	BLACK.
1 P K4	P K4	18 P OKt3	P QR4 (e)
2 Kt KB3	Kt QB3	19 P Kt3	B K3
3 B Kt5	Kt B3	20 Q Q2	QR Kt
4 Castles	Kt x P	21 B Kt2 (f)	Q B4 ch.
5 P Q4	B K2 (a)	22 K R1	B Kt2 (g)
6 Q R2	Kt Q3	23 R K5	Q Q3
7 B x Kt	Kt x B	24 QR Kt	P Q5
8 P x P	Kt Kt2	25 Kt K4	P B4
9 Kt B3 (b)	Castles	26 K Kt1	B x Kt
10 R Kt (c)	Kt B4	27 QR x B (h)	Kt Kt4
11 Kt Q4	Kt K3	28 R x Kt (i)	R x R
12 Kt B5	P B3 (d)	29 Q x RP	QR x P (f)
13 Kt x B ch.	Q x Kt	30 Q x P (B4)	R B8 ch.
14 P B4	P x P	31 K Kt2	KR B7 ch.
15 Q x P	P Q3	32 K R3	Q K3 ch.
16 Q K4	P Q4	33 R Kt4	K R8
17 Q Q3	Q Q3		White resigns.

NOTES.

(a) In a previous game Pillsbury, instead of this ordinary move, played Kt to Q3, which however, may lead to a difficult game.

(b) We prefer the old-fashioned way of continuing the attack by R to Q1, otherwise we should play P to Q Kt3, and develop one Q Kt via Q2.

(c) Here again we should prefer B to B4.

(d) This is always a saving clause for Black in this opening if he can do it safely.

(e) If Kt takes P, 19—B takes Kt, R takes B; 20—R to K8 ch, R to B1; 21—R takes R ch, Q takes R; 22—Kt takes P, &c.

(f) Not much virtue in this; P to Q R4 would have been useful.

(g) Taking a very long shot.

(h) K R takes B would have prevented Black's very pretty after-play.

(i) What else could he do?

(j) Very pretty. If 30—P takes R, Q takes P; 31—R takes P ch, K takes R; 32—Q to K2, with no future prospects.

WILLIAM STEINITZ.

Great master mind, while yet unknown to fame, In mimic battle o'er the chess field hurled His challenge. And when victory surely came, Was justly named the champion of the world.

In years to come, while looking o'er the roll, Of those bright names, so well deserving fame, None will be found, high up upon the scroll, More worthy still than he is of that name.

As Victory crowned him king of Caisars' realm, And fell disease came creeping o'er his brain, 'Twas hard to see Dame Reason leave the helm, And sad defeat came surely in its train.

Chess was his dream, his love, his life, his all, Its honours sought him; and increase of fame, So, should that temple crumble to its fall, If he cared not to live, we must not blame.

But let us hope that Time may yet prove kind, And, health restored, he may regain his will, For we are loath to think that master mind Will not achieve yet greater honours still.

MARSHALL.

GAME No. 705.

The following interesting game was played in a match between the City of London and the North London Chess Clubs. It is a good example of the best style of club play.

White—F. J. Willis. (North London).		Black—H. Wagner. (City of London).	
WHITE.	BLACK.	WHITE.	BLACK.
1 P K4	P K4	19 Kt x B ch (d)	Q x Kt
2 Kt KB3	Kt QB3	20 Q Q2	Q R5
3 B Kt5	Kt B3	21 R KBt	Kt Kt4
4 P Q4	Kt x P	22 B B1	Kt x P ch (e)
5 Q R2	Kt Q3	23 P x Kt	R Kt3 ch
6 B x Kt	Kt x B (a)	24 K R1	Q x RP
7 P x P	Kt Kt2	25 P B3 (f)	B Kt2
8 Castles	B K2	26 R B2	R Kt
9 P OKt3	Castles	27 Q Q3	R x P
10 B Kt2	P Q4	28 B Q2	R B4
11 P KR3 (b)	Kt B4	29 R Kt1	R (Kt3) K
12 Q Kt Q2	B R2		B3
13 P B4	Kt K3	30 Q K2	P KR3
14 KR Q1	P QB4	31 R (Kt1) KR R4	
15 Kt R2	P Q5		B1
16 Kt K4	Q Kt	32 R Kt2 (g)	R x P
17 Kt Kt3	R Kt1	33 K Kt1	R Kt6 (h)
18 Kt B5	R Kt3 (c)	34 Resigns.	

NOTES.

(a) When White follows this line of play before castling, then it is safe for Black to play Q P takes B; for after 7—P takes P, Kt to B4, Black

may play Kt to Q5, which he could not do if White could play R to Q1, as in the game Showalter v. Loeck of the Cable Match.

(b) An inactive move; 11—Q Kt to Q2 was better.

(c) A move prompted by a rather fine conception of the possibilities of attack which the position affords by Kt to Kt4 and R to K Kt3.

(d) The bishop was not doing any good on Q Kt2; he was also hampering the movements of the White queen, owing to Black's threat of playing B takes P. If, for instance 19—Q to Kt4, why not then play 19—B to B1, directing the effective range of the bishop against Black's king's side, instead of relieving Black's game by this necessary exchange?

(e) Black has utilised in a masterly manner the time and opportunity which White has frittered away in the last few moves.

(f) If 25—R to K Kt1, B to Kt2 ch. wins.

(g) 32—K to Kt1 at once was better.

(h) A pretty finishing touch.

MAIL STEAMERS.

THE NEXT MAIL IS DUE

From Europe, via Hongkong	per N. D. Lloyd	Wed'day, May 15th.
From Hongkong	per P. & O. Co.	Saturday, May 15th.

PASSENGERS.

ARRIVED.

Per British steamer *Empress of Japan*, from Vancouver:—Mr. A. M. Archibald, Dr. and Mrs. Brooks, Mr. J. B. Bradshaw, Mr. J. Blaydon, Mr. Dr. J. N. Boyd, Mr. A. E. Cooper, Mr. A. J. De Souza, Miss Y. Enouye, Mr. W. M. Grieg, Mr. R. N. Harter, Mr. and Mrs. H. J. Hunt, Mr. I. Ishimaru, Mr. Nicholas Krukoff, Mr. and Mrs. Chas. J. Morse and two children, Mr. Geo. Munro, Miss M. E. Moore, Mr. and Mrs. C. J. Moss, Mr. K. Noro, Mr. Powell, Miss Angela Reyner, Mr. Shepherd, Mr. H. Shugio, Miss Mary Takayanagi, Miss Helen Takayanagi, Mr. A. E. Tiew, Miss Williams, Miss Wetmore,

and Mrs. Yokokawa in cabin; 3 in 2nd class; 67 in steerage.

Per British steamer *Empress of India*, from Hongkong via ports:—Mr. H. Clover, Mr. W. C. Eaton, Lieut. R. Sterling, R.N., Mr. C. H. Wilkinson, Mrs. Bell Irving, Mr. F. J. O. Minchen, Col. and Mrs. Eden, Mr. Macauliffe, Miss L. Patterson, Mr. G. B. Whitney, Mr. E. C. Rich, Mr. J. P. Rodger, Mr. H. S. Cross, Mr. F. Saeinger, Mr. Wegner, Mr. R. N. Ohey, Lieut. J. H. Dathan, R.N., Mr. W. D. Oelhermann, Mrs. Morgan, and child, Mrs. W. D. Rose, Mr. and Mrs. M. Adler, Rev. and Mrs. Davis, child and infant, Mr. A. Fullerton, Dr. E. H. Horsey, Mr. D. M. Clerkson, Lieut. J. Harvey, Mr. and Mrs. Franklin, Mr. N. J. Scroth, Mr. Fleet, Capt. and Mrs. Dugdale, Mr. S. Nicholson, and Mr. J. H. Riley in cabin; 6 intermediate in second class, and 489 passengers in steerage.

Per British steamer *Tacoma*, from Tacoma Wash and Victoria:—Mr. R. E. Gill, and Mrs. E. D. Bailie, 3 children, and amah in cabin; Mr. John Johnson, and Mr. C. E. Roach in second class.

Per British steamer *Gaelic*, from San Francisco:—Mrs. A. N. Carter, Mr. W. G. Carter, Mr. Lay H. Everhart, Mr. John Reynolds, Mr. Yeend Duer, Mr. Max Diethy, and Mrs. E. E. Wood and 2 children in cabin. For Shanghai:—Dr. John Fyler, Col. J. Courtney Hixson, and Rev. F. H. James in cabin. For Hongkong:—Mr. F. B. Marshall, and Mrs. F. B. Marshall in cabin.

Per Japanese steamer *Satsuma Maru*, from Shanghai and ports:—Mr. and Mrs. K. Shima and infant, Mr. Gaybuvitch, Capt. K. Tada, Dr. and Mrs. Miyagawa, Mr. Fong, Mr. Sho Mo Yei, and Mr. Allen in cabin; 20 Japanese and 8 Chinese.

DEPARTED.

Per British steamer *Empress of Japan*, for Hongkong via ports:—Mr. and Mrs. F. Grey Smith, Mr. and Mrs. Jno. W. Bolles, Mr. L. H. Clayton, Mr. W. W. Wimmill, Mrs. Ivanoff and infant, Mrs. Rybakoff, Miss Tokmakoff, Lieut. Stepanoff, Dr. Bell, Mr. and Mrs. Bickerton, Mrs. F. P. Ball and infant, Messrs. Ball, E. J. Hughes, Jas. Flood, J. J. Johnston, Jno. C. Bancroft, E. H. Sharp, Geo. Murakami, Mrs. G. W. Middleton and amah, Messrs. Snell, Henderson, Robins, Andrews, Johnson, Fox, Cheng Heu Cho, and J. S. Happer in cabin.

Per Japanese steamer *Saikio Maru*, for Shanghai and ports:—Mr. F. S. Goodison, Mr. Alberico Brocca, Major General Y. Kurose, Major Yeto, Mr. F. Kogetsu, Mr. R. Inouye, Madam Frigue, Miss J. Joubert, Miss L. Joubert, Mr. Francis Steenackers, Miss F. Nomura, Miss R. Nomura, Mrs. Markeloff and child, Captain Y. Kawahara, Captain J. E. Poole, Mr. H. Bruhn, Mr. J. Logan, Mr. K. Nishimatsu, Mr. N. Takatsu, Commander John F. Merry in cabin; Captain S. Ohno, Mr. and Miss Taki, Mr. J. Furuya, Mr. K. Sekiguchi, Mr. T. Shibata, Mr. Lars Berner, and Mr. A. Young in 2nd class; 4 Chinese and 54 Japanese in steerage.

Per British steamer *Belgie*, for San Francisco and Honolulu:—Mr. U. Ammann, Dr. and Mrs. S. Asano, Dr. and Mrs. C. B. Atterbury and two children, Baron Bradsky, C. Broderson, Mr. and Mrs. W. Barrie and child, Mr. and Mrs. R. Bertram, Mrs. C. E. Colahan and child, Mr. H. Goghlan, Mr. Morgan Davis, Rev. and Mrs. F. Dillon, Mr. and Mrs. Reynet, Mr. Emile Gille, Mr. Grun, Mr. J. Gray, Mr. M. Gray, Mr. and Mrs. Paul Guynemer, Rev. and Mrs. W. B. Hamilton and child, Mrs. Horikawa, Mr. W. R. Kip, Mr. H. S. Kip, Miss Layton, Mr. J. Layton, Mr. Chas. Legrand, Mr. John Louvatscheff, Master Leach, Rev. J. B. Lewis, Rev. and Mrs. H. M. Lawson and child, Captain J. W. Lee, Mr. W. B. Meikle, Lieut. D. P. Menefee, U.S.N., Mr. A. Medrose, Mr. Granville Sharp, Mr. Frank Shaw, Mr. J. Clinton Spencer, Mrs. A. P. Spencer, Lieut. B. Strolman, Mr. Todo, Mrs. C. F. McWilliams, child and amah, Mr. M. M. Wyckoff, Mr. R. Yezoye, and Mr. K. Yokikawa in cabin.

Per Japanese steamer *Omi Maru*, for Melbourne via ports:—Mr. and Mrs. J. H. Scott, Mr. and Mrs. W. Wynd, Miss D. D. Barlow, Mr. S. Nakajima, Mr. H. Ogura, Capt. R. J. McIvor, Mr. R. Ford, and Mr. A. S. Aldrich in cabin; Mr. S. Tanaki in second class, and 20 Japanese and 6 European in steerage.

The British steamer *Tacoma*, Captain T. A. Whistler, R.N.R., reports:—Left Tacoma Wash the 16th December at 8.30 p.m.; experienced a continuation of strong westerly winds which increased to a gale on 21st and 22nd; crossed the 180° of long. on 27th in lat. 51° north. Arrived at Yokohama, 6th May.

Per British steamer *Empress of India*, for Vancouver, B.C.:—Mr. M. Adler, Mrs. M. Adler,

Mrs. Bell-Irving and maid, Mrs. C. H. Blackman, Mr. P. J. Boland, Mr. N. E. Borden, Miss N. J. Borden, Miss C. S. Brayton, Mr. H. S. B. Brindley, Lieut. C. K. Burnett, Marquis of Camden, Miss V. Campbell, Mr. Carter, Major-General Cherry, Mr. J. Crossley, Mrs. J. Crossley, Miss Crossley and maid, Mr. R. J. M. Danson, Mrs. R. J. M. Danson, Mr. E. Schmidt Dargitz, Mr. Lieut. R. N. Dathan, Mrs. Davey, Captain Davey, Rev. REPORTS.

The British steamer *Gaelic*, Captain William Finch, R.N.R., reports:—Left San Francisco the 21st April, and arrived in 15 days, 5 hours, and 39 minutes.

LATEST COMMERCIAL.

IMPORTS.

Dull and drooping generally. Yarn.—Not a bale sold for the last three weeks, with the exception of some damaged ex *Yamaguchi Maru*, which went to auction and fetched reasonable prices. Shittings.—About 300 pieces only are reported sold but the price has not yet transpired. Fancies.—Nothing done beyond a rumoured sale of Prints, which requires confirmation. Woollens.—Stagnant.

COTTON PIECE GOODS.

	PER YARD.	PER PIECE.

THE GREATEST WONDERS OF MODERN TIME

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN.
HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammation. Mr. J. T. COOPER, in his account of his extraordinary travels in China, published in 1891, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining 'stock.'"

Sold by all Chemists and Medicine Vendors throughout the World.
May 1st, 1897.

MILKMAID BRAND CONDENSED MILK

The "Milkmaid" Brand is guaranteed to contain all the cream of the original milk. In the process of manufacture nothing but water is removed, nothing but the best refined sugar added.

Avoid low-priced brands from which the cream has been abstracted, and ask for the "Milkmaid" Brand, the best for all purposes.

June 14th, 1896.

DINNEFORDS

The Universal Remedy for Acidity of the Stomach, Headache, Heartburn, Indigestion, Sour Eructations, Bilious Affections.

MAGNESIA

Sold Throughout the World.

N.B.—ASK FOR DINNEFORD'S MAGNESIA.

March 6th, 1896.

YOKOHAMA: SATURDAY, MAY 15TH, 1897.

MARRIAGE.

At Trinity Cathedral, Tsukiji, Tokyo, on May 6th, by the Right Rev. Bishop McKim, and before the United States Consul-General, N. W. McIvor, Esq., Mr. HAROLD JAMES METZ, of Yokohama, to Miss SUSAN ELIZABETH SUMMERS, third daughter of the late Prof. Summers, formerly of the Imperial University, Tokyo.

SUMMARY OF NEWS.

THE Nippon Ginko (Bank of Japan) will shortly open a branch at Osaka.

UP to the 11th instant 400,000 catties of new tea had been received in Yokohama.

JAPANESE trade is losing ground in Korea and Chinese increasing month by month.

THE Yokohama Rice, Salt and Grain Exchange received its charter on the 11th instant.

A FIRE in Higashi, Okayama Prefecture, on the night of the 6th instant, destroyed fifty houses.

OVER 21,800 yen have been subscribed in aid of the sufferers by the recent disastrous fire at Hachioji.

A MAN EATING tiger has been killed by some Hongkong sportsman on the West River above Canton.

THE excitement among the farmers of the districts in Tochigi Ken, devastated by the Ashio copper mine poisoning, still continues, and fear-

ing further trouble a large force of gendarmes was despatched from Tokyo to Tochigi on the 10th inst.

THE Osaka Mint in April last issued 6,717 five yen gold coins, 41,066 silver yen, and 399,000 twenty sen silver pieces.

Mrs. J. H. Longford, wife of H.B.M.'s Consul at Nagasaki, was assaulted by a jinrikisha coolie at Kobe on the 11th instant.

THE office of the proposed Government Iron Foundry is to be opened at Yahata-mura, Fukuoka Prefecture, on the 1st June.

THEIR MAJESTIES the Emperor and Empress are still in Kyoto, and it is reported will remain there till the end of the current month.

THE laying of the section of the Formosa cable between the Island and Yayeyama, 188 miles, was completed on the 3rd instant.

THE British volunteers with the Greek forces appear to have upheld the credit of their nationality, though fighting for a lost cause.

By an explosion of the powder magazine of the 16th Infantry Regiment at Shibata, Niigata Prefecture, on the 5th inst. six soldiers were badly hurt.

ON the 3rd instant, in a storm off the coast of Takachi-mura, Niigata Prefecture, a number of fishing boats, with over thirty fishermen, were lost.

EARTHQUAKES occurred at Tokyo, Kumamoto, Mitto and Nagano on the 9th, and at the last named place on the 10th instant. No serious damage was done.

ALL the Foreign Ministers and Secretaries were entertained by Count Okuma, Minister for Foreign Affairs, at his private residence at Waseda on the 10th instant.

A LARGE area of rice fields at Yokotomura in Niigata Prefecture are in the market for sale, on account of the constant inundations to which they are subject.

M. BIDONALIC, a Bangkok barrister, has entered action against the *Times of Ceylon* and the *China Mail* of Hongkong, for £1000 damages for alleged libel.

MESSERS. Samuel Samuel & Co. of Yokohama, as agents for the Rothschilds, have purchased 40 million yen's worth of Japanese War Bonds for four million pounds sterling.

THE Chinese Government is reported to have ordered three large iron-clads and four torpedo-boats from England, while other torpedo-boats are to be constructed at Port Arthur.

THE new Yokohama Docks were formally opened on the 15th instant. One of the Docks, the second in size, has been finished some weeks and three steamers have been docked already.

A CONFERENCE of the Chiefs of the Post and Telegraph Offices throughout the country will be held in Tokyo for a week from the 18th inst., to discuss the departmental Budget for next fiscal year.

At a meeting of the Yokohama City Council held on the 8th instant a scheme for the reclamation of a considerable extent of foreshore from Otamachi to Minato-cho was discussed and decided on.

THE Japan Trading Association, at a meeting recently held, decided to petition the Government to enter into negotiations with the United States Government with a view to a revision

of the new Tariff Law, the provisions of which were regarded by the Association as ruinous to the Japanese export trade to the United States.

THE new Japanese battle-ships *Fuji* and *Yashima* are still lying in the Thames, their armaments not being yet complete. It is reported that they may stay to take part in the Queen's jubilee celebration.

Mr. Matsumoto, President of the Government Railway Bureau, accompanied by several experts, has been despatched on a mission to the United States and Europe to investigate and report upon railway systems and organization in those countries.

ON the 6th instant the steamer *Matsumoto Maru*, while on a voyage from Shikabe-mura, Oshima Province, to Hakodate, struck a sunken rock and had to be beached. Passengers, crew, and part of the cargo were saved, but the vessel is a total loss.

It is reported that the Russian Government has vetoed the engagement of Russian military instructors for the Korean army, a question which has seriously exercised the Japanese Government and press, as it was regarded as contrary to the spirit of the Moscow convention between Russia and Japan regarding their action in Korea.

A TEA-FIRING coolie who recently made an unprovoked and serious assault on Mr. A. J. Wilkin, an old resident of Yokohama, when the latter was riding a bicycle, has been sentenced by the Yokohama District Court to six days' detention, extenuating circumstances being found. The Public Procurator has appealed against the "extenuating circumstances."

ON the 8th instant some 600 insurgents, apparently with a view to plunder, attacked Twatutia, the foreign suburb of Taipei, Formosa. In the fight which ensued between the insurgents and the Japanese troops and police, one Japanese soldier and one police constable were killed and eight wounded, while the insurgents' loss is said to have been 100 killed, 50 wounded and 17 made prisoners. Twenty-seven houses in the settlement were more or less damaged and three burned down.

IMPORTERS generally have done a very indifferent week's business, though the slight rise in exchange has had a cheering influence and imparted a little life into some branches of imports. In cotton piece goods very little has been done, and in yarns, though there have been enquiries and offers these have been for the most part unacceptable to holders. In fancy cloths and woollens nothing has been done. In metals business has been rather brisker at former quotations. The kerosene market is still very dull but it is expected that a move will be made should exchange continue to rise. In sugar little has been doing though the arrivals of brown have been considerable; in other brands a fair business has been done. In exports the business in raw silk has been stagnant, as buyers are all waiting for the new crop, the prospects for which are bright; a few transactions have taken place in waste, but nothing of consequence. In the tea trade firing is now in full swing. A good business has been done, and several shipments made; the heaviest by the *Peru*. The prospect of a steep duty on Japanese tea imported into the United States after July 1st, which the tea men say will amount to 100 per cent. *ad valorem*, will doubtless have the effect of rushing the market, so as to get the tea landed in America before the date mentioned, and a busy time may therefore be expected for the next two months. With a little more substantial rise in exchange a considerable improvement in business all round may be looked for.

SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.

The period of comparative quiet that Japan enjoyed in the sphere of her foreign relations until March last, has been somewhat rudely disturbed by troubles about immigrants in Hawaii and the employment of a Russian *mission militaire* in Korea. Two or three weeks ago, the Tokyo newspapers were much occupied with the former topic; during the past week, their columns have been equally devoted to the latter. All are agreed that in lending a large number of military men to train the Korean army, Russia violates the spirit of the Yamagata-Lobanoff Convention. But there is a disposition on the part of some to lay the whole blame of the complication on the shoulders of the Ito Cabinet, and with that object they do not hesitate to argue that the Moscow Convention can not be interpreted in the sense of directly prohibiting the course now attributed to Russia. These organs apparently set party interests above the dictates of patriotism. It is at all events evident that the affair has suggested strong distrust of Russia's designs in the peninsula, and that, from a diplomatic point of view, it was anything but a prudent move on Russia's part; or, perhaps we should be more correct in saying, on the part of the Russian who prompted it. Another subject that continues to provoke much discussion is the new American tariff. The Japanese are convinced that the exceptionally high rates about to be imposed on their silk fabrics, fancy matting, straw braid, and porcelain have nothing to do with either revenue or protection, but are frankly prohibitive, and it comes to them as a sharp shock that their special friends, the people of the United States, should discriminate so invidiously against them. They recognize that America has always bought from them more than she sold to them, but they naturally fail to see in that fact any ground for legitimate complaint. England, they say, might set up precisely the same case with regard to her dealings with the United States. Altogether, the behaviour of the Washington tariff-makers perplexes and perturbs them greatly, especially since it threatens to fatally arrest the development of several promising branches of manufacture.

When Count Okuma, writes the *Nichi Nichi Shimbun*, undertook to inform the Diet about the understanding that existed between Japan and Russia, his statement was received with great interest by the nation, but people felt that it was not exhaustive. The vital question of the training of Korea's military forces did not appear at all in the convention concluded by Marquis Yamagata and Prince Lobanoff, and it was incredible that such an omission should have been made by a statesman of Marquis Yamagata's experience and a soldier of his reputation. Count Okuma, however, explained that, in the interests of the State, it did not seem expedient to publish details more minute than those already submitted by him to the Diet. There was, then, something that could not be told, and the general impression is that inasmuch as some pledge had already been given by Russia to assist Korea in the training of the latter's forces, it was not possible to embody anything on that subject in the Yamagata-Lobanoff convention. Be that as it may, the purpose of the convention was to safeguard the peace of the Orient by preserving the balance of power, and there can be no question that such a purpose is defeated when Russia pours officers and non-commissioned officers into Korea under the pretext of training the Korean Army. Once admit the propriety of such a pretext and there ceases to be any possibility of limiting its application. Russia may send not a hundred, or a hundred and sixty, military instructors, but a thousand, or sixteen hundred. Under no circumstances could such procedure be reconciled with the plain intention of the Moscow Convention. The former Japanese Cabinet certainly intended to insist on the conscientious observance of the Convention, and it must be pre-

sumed that the present Cabinet is animated by a similar resolve. But unfortunately Count Okuma can not be acquitted of negligence in that he failed to enter a strong protest against the first employment of Russian drill instructors by Korea. His tacit acquiescence in the engagement of a Colonel and several officers could not fail to diminish the force of any objection urged against the enlargement of the practice thus inaugurated. Still, it is not to be supposed that Japan can tamely suffer the conjuncture by which she is now menaced. The Yamagata-Lobanoff Convention provides for the opening of further negotiations in the event of any occasion demanding a mutual agreement. The present is undoubtedly such an occasion. What instructions Count Okuma may have sent to the Japanese Representative in Seoul we can not know, but it has been reported, on authority seemingly trustworthy, that Russia repels the imputation of having influenced the Korean Government in this matter, and attributes her own action solely to Korea's request. Nevertheless, every one knows that Korea is simply doing what she has been told to do. There has further been talk of reducing the proposed number of drill instructors, or of postponing the date of their employment. But neither their number nor the time of their engagement is the question. The gist of the matter is whether, in rendering Korea such assistance, Russia is not deliberately violating the spirit of a Convention concluded for the manifest purpose of preventing the preponderance of either of the High Contracting Parties' influence in the peninsular Kingdom. We are told, also, that Russia has avowed her willingness to submit the matter entirely to the decision of the Korean Government. Nothing of that kind is endurable. The Cabinet in Seoul is not to be the interpreter of a Convention between Japan and Russia. This empire can not submit to any such humiliation. It is a grave matter, calling for prudent but resolute handling. The *Nichi Nichi* is not of those that talk of strong foreign policy and measure the competence of a Foreign Minister by the degree of his self-assertion. Its sole desire is to secure the foundations of lasting tranquillity, and it considers that they are seriously threatened by this contingency.

The *Nippon* writes vigorously but not intemperately on the same subject. It recalls the sacrifices that Japan has made to secure Korea's independence and to lead her into the path of progress, and notes that the efforts of this country in the cause of the little Kingdom were largely defeated by Russia's action in the matter of Liaotung; action that threw doubts upon the sincerity of Japan's intentions, discredited her in Korea, and involved friction between her and Russia in the peninsula. Thus it finally became necessary to conclude the Yamagata-Lobanoff Convention, which, in effect, constituted a new obstacle to the achievement of Korea's independence, since it provided that Japan and Russia alike should stand aside and abandon to its own devices a Kingdom not yet competent to walk alone. Still, nothing now remains but for both parties to the agreement to observe it faithfully, nor is it to be denied that if they are sincerely animated by a desire to secure Korea's independence and promote her civilization, means to do so can be found without transgressing the limits fixed by the Convention. In point of fact, the Yamagata-Lobanoff Convention is cognate with the Tientsin Convention. China's deliberate violation of the latter drove Japan to war, and it is not to be reasonably anticipated that the Moscow agreement will be found to possess more binding force. Thus the question of the engagement of Russian military men by Korea has now arisen. Whether the Russian Government is a consenting party, can not yet be known, but we prefer to believe that it is not. For the obvious intention of the Lobanoff-Yamagata Convention is to provide for the complete abstinence of the two contracting Powers from interference in Korea's affairs, and for her independent working out of her own progress. Even in the event of the unavoidable employment of either Russian or Japanese troops in

the capacity of guards, it is provided that their numbers shall not pass a fixed limit, and in view of such an agreement, the entry of a considerable body of Russian military men into the peninsula in the capacity of tactical instructors, is a plain violation of the Convention. Should Russia agree to take such a step, upon her shoulders will rest the responsibility of having impaired her relations with a neighbouring Power, and disturbed the tranquillity of the Orient. We do not believe that Russia seriously contemplates anything of the kind. Yet it is a fact that the employment of a large number of Russian military men has entered the realm of practical projects, and it further appears to be a fact that several of the Seoul statesmen are opposed to it. We are driven to the conclusion that it is a device conceived by the Russophile party in the peninsula, on the one hand, and, on the other, an endeavour on the part of Mr. Waeber, the Russian Representative, to carry away with him some agreeable gift for presentation to his Government when he returns to St. Petersburg. But the gift is a little too heavy to be quietly transported. There certainly have been events that furnished reasonable materials for Russia to doubt Japan and Japan to doubt Russia; events subsequent to the retrocession of Liaotung—for example, the affair of October, 1895, and the affair of February, 1896. But the two empires seemed to be on the verge of understanding each other better when this military-instructor incident came upon the tapis. If the Russian Government be party to it, then the discussion must assume a different complexion. If the Russian Government be not a party to it, then some one else is responsible. Finally, if Mr. Waeber has exceeded his instructions, why is he not ordered to point out to the Korean Government that its project of employing Russian military men is opposed to the spirit of the Yamagata-Lobanoff Convention? A word from him in that sense would settle the matter. Why does he not speak the word?

Once more the *Yhi Shimpō* discusses the subject of the new American tariff, in so far as concerns its bearings upon Japanese manufactures. The general proposition that every independent State is competent to raise or lower at will the duties levied by it upon goods coming from abroad, can not be questioned for a moment. But in exercising that power impartiality must be observed: all foreign nations must be treated alike. To impose prohibitive duties on imports from one particular country, differentiating from all the rest, is an intolerable violation of the first principles of comity. Yet that is what American legislators seem inclined to do. The rates that they have fixed for Japanese silks, fancy matting, and cotton carpets are such as to kill the commerce in those articles. Nor can there be any doubt that prohibition is the object contemplated. Japanese silks are to be excluded in the interests of American weavers; Japanese matting and carpets, because their import promises to assume large dimensions. It comes to this, that for the sake of promoting the interests of a small body of manufacturers, the framers of the new tariff are willing to subject the whole mass of consumers to grave inconvenience, and to impair their country's relations with a friendly nation. Japan can not forget, and has no desire to forget, all that America has done for her. She has sought to furnish some slight evidence of her gratitude by ordering men-of-war in the States, and by opening steamship services between her shores and the Pacific coast; services that will contribute as much to the latter's development as to her own commercial convenience. It would be a pity that all this should be marred by unwise subserviency on America's part to the selfish interests of the few. The result would be that Japan's trade would be diverted into other channels, and that her people would conceive a dislike for American goods.

There appears to be no longer any room to doubt, writes the *Kokumin Shimbun*, that the employment of a Russian *mission militaire* has

been agreed upon. Despite the opposition of the American party in Korea, despite the opposition of the British Representative, this victory rests with Russia. In point of fact, the origin of this matter must be sought in the distant past. The fault lies with the Yamagata-Lobanoff convention. From the time of the conclusion of that document, Russia had a free hand. Hitherto, Korea had regarded Japan as her natural protector, but the Moscow agreement openly placed Russia on an equal footing. It was, in fact, an instrument for extending Russian influence in the peninsula. That it interdicts the employment of Russian military men to train Korea's forces, is an untenable contention. The much-quoted second article provides that "the Japanese and Russian Governments shall leave to Korea, in so far as the financial and economic conditions of that country permit, the creation and maintenance of indigenous armed forces and police in sufficient proportions to maintain internal order without foreign aid." There is not a word in the article that can be construed as forbidding the employment of a Russian military mission to train Korea's forces. On the contrary, the condition "in so far as the financial and economic conditions of that country will permit," creates a discretion of which Russia can always avail herself. It is inconceivable that the Ito Cabinet should have given its consent to such an agreement. One of three courses now offers. The best is to contrive a combination with America and England for the purpose of defeating this project of a Russian mission. The second, and less desirable plan, is to arrange that if the services of foreign military instructors are necessary, they should be either English or American. The third policy is to urge Great Britain and the United States to take part with Japan, so that some future opportunity may be seized to correct the present incident, Russia being left meanwhile to pursue her own route. Under any circumstances, the Ito Cabinet must be pronounced guilty of having concluded an agreement that renders Russia virtually paramount in Korea, and creates among the Koreans an entirely false impression of Japan's intentions. The question now is whether Count Okuma by the exercise of diplomatic ability, can restore the confidence of the Korean Court and the Korean people in Japan's sincerity of purpose, and whether he can secure the co-operation of England and America. It is an opportunity to recover lost ground and to wipe out the disgrace of the Liaotung affair.

The *Mainichi Shimbun* takes a view somewhat similar to that of the *Kokumin*, though not by any means so far-reaching. It expresses strong regret that Marquis Yamagata failed to insert in the Moscow Convention a clause definitely settling the question of the employment of Russian or Japanese troops by Korea, and it seems to suggest the inference that, in the absence of such a clause, Russia is free to do as she pleases. Moreover, it goes so far as to allege that Marquis Yamagata desired to provide against the contingency, but was unable to obtain the consent of the Russian plenipotentiary, who explained that the matter would be independently arranged between Russia and Korea. The *Mainichi's* apparent purpose is to lay the bulk of the blame on the shoulders of the Ito Cabinet, but, at the same time, it does not attempt to deny that a Russian *mission militaire* of the kind contemplated would be contrary to the spirit of the Yamagata-Lobanoff Convention.

The *Yomiuri Shimbun* also discusses the American tariff question. Its remarks are interesting chiefly as illustrating the fact that it possesses a very clear knowledge of the economical fallacy of a protective tariff, which robs the nation at large for the sake of putting money into the pockets of a favoured few, and which, while professing to foster the growth of industry, really hampers it by supplying it with artificial nourishment and depriving it of ability to compete in the open markets of the world. The *Yomiuri* dwells on all this at great length.

It further notes that whereas the present duty upon Japanese *habutaye* and silk goods entering America is 45 per cent. *ad valorem*, the new tariff raises it to 96 per cent.; similarly, the duty on silk handkerchiefs is raised from 50 per cent. to a maximum of 110; that on cotton carpets, from 20 to a figure varying between 35 and 80; that on fancy matting, from nothing to 25; that on strawbraid, from 15 to 30, and that on porcelain from 30 to 60. Such rates are simply prohibitive, and that they are intended to discriminate against Japan is proved by the fact that the duty upon French silks is to be only 70 per cent. America was chiefly instrumental in opening Japan to foreign commerce. Apparently she is now about to close her own ports to Japanese commerce. She is, in short, adopting a policy diametrically opposed to the principles hitherto believed to govern her national conduct. Some pretence is advanced that these new rates are for purposes of revenue. The plea is untenable. A tariff framed for revenue purposes differs radically from a protective tariff—the difference is lucidly expounded by our contemporary—and, under any circumstances, the idea of raising revenue by destroying its source is plainly absurd. The *Yomiuri* concludes a long and ably written article by urging Japanese manufacturers to combine at this crisis of their enterprise, and to spare no effort likely to avert the threatened catastrophe.

Two long articles are devoted by the *Shogyo Shimpō* to discussing the action of the United States with regard to the tariff and the legislation proposed in France for levying increased duties on Japanese raw silk. The chief purpose of the article is to induce Japanese manufacturers and chambers of commerce to take up the matter vigorously in order that their protests may strengthen the hands of the Government. There appears to be an idea that representations are hopeless, and that nothing remains except resignation, but the *Shogyo* strongly condemns such a spiritless policy.

The operation of the Trades Tax, one of the imposts resorted to by the Government to obtain funds for carrying out the *post bellum* measures, is creating great discontent throughout the country. The levying of the impost presents much difficulty. For example, $\frac{1}{1000}$ of the proceeds of wholesale transactions and $\frac{1}{1000}$ of the proceeds of retail sales, have to be paid. The Government estimates that the wholesale transactions taxable under this law aggregate 588,177,000 *yen*, and the retail transactions, 1,011,476,000 *yen*. But evidently there must be immense difficulty in determining what falls under the category of wholesale and what of retail, and since the tax in one case is three times the tax in the other, strong inducement is offered for deception. Again, 1 *yen* per *employé* is to be paid. Here, too, there is room for much embarrassment and prevarication. If every person engaged on the premises of a tradesman, not excluding apprentices or learners, is to pay 1 *yen*, much hardship will be experienced; and if distinctions are made, endless complications will arise. Then again, $\frac{1}{100}$ of the rent of premises is to be levied, and the taxable total in this category is supposed to be 47,766,000 *yen*. But when people leasing premises have to pay 4 per cent. of the rent to the State, it is evident that innumerable attempts to evade the law will be made, and it is further evident that such a tax does not touch the wealthy classes who live in houses of their own. It hits the lower middle, and lower, classes only, and the impost will ultimately fall upon the unhappy tenant. The *Fiji Shimpō*, from which we are quoting, analyses the operation of the Trades Tax at considerable length, not omitting the clauses that relate to banking, insurance, money-lending, printing, manufactures, photography, and so on. Our contemporary concludes that the tax is, in its nature, vexatious, and that the cost and trouble of collecting it are incommensurate with the revenue obtained. At the same time, as the Government looks to get $7\frac{1}{2}$ million *yen* from

the impost, it can scarcely be abolished unless some substitute is devised.

Diamonds and champagne for ladies that lead society in the cities; camlets and watches for country dames—these are symptoms of extravagance that inspire the Osaka *Asahi* with much alarm, and suggest three articles full of bitter truths. Like all reformers, the Osaka journal is a lauder of the past. It recalls the fact that the utmost simplicity of life and economy of habits were characteristic of the men that overthrew the luxurious, effeminate Bakufu Regency—characteristic of Sanjo, of Iwakura, of Saigo, of Kido, of Okubo. But things have changed for the worse. Once more the country is tending towards the self-indulgence that history proves to be the inevitable precursor of decay and disaster. The victories won by Japan in the war have turned the heads of the people. The indemnity wrung from China has seemed to every man to have swelled his own pocket. People hitherto content to live in humble style, have begun to buy silks and drink *sake*. Men that never dreamed of riding in any carriage save a third-class, have begun to look with envious eyes on the soft cushions of the first-class. Folks that hesitated to spend a few *sen* on presents when they returned from distant journeys, have begun to think nothing of squandering handfuls of *yen* on Kyoto crapes and *nishijin* girdles. Workmen have demanded a rise of 30, 40, 50 per cent. in their wages. The Government has launched out upon a gulf of national extravagance. Thus the Osaka journal proceeds through a long indictment. It is keenly alarmed, and thinks that the national horizon is ominously clouded, but we must leave our readers to fill in for themselves the details of a diatribe which applies with greater truths probably to any Occidental country than to Japan.

JAPANESE VISCOUNTS ON ELECTORAL PURITY.

Certain Viscounts belonging to the Japanese peerage have issued the following circular to the Nobles with regard to the re-election of members of the Upper House:—A moment's consideration will show that the Imperial Diet is instituted to represent popular sentiments and to approve the wishes of the Emperor, and therefore its members incur no small responsibilities, and are required to discharge their functions with the utmost discretion. Any bungling in the election of members is certain to impair the promotion of the national welfare. A proper election depends simply upon the conscientious decision of the electors who are called upon to exercise their great function with judgment. It is on this point that serious anxiety is entertained by us. If any of the electors are induced to act from private interests or sympathies in disregard of justice and equity, their proceedings will be contrary to the wishes of the Emperor as well as popular sentiment, and they will be unable to face the State without shame. It is a subject of universal talk that abuses have frequently occurred in elections for supplying vacancies in the House. Remarks of this nature cannot fail to be a source of regret and grief. The second general election is at hand, and it is to be hoped that not only will the former abuses be avoided, but also that efforts will be made to select men of ability, justice, and impartiality, so that the permanent interests of the country may always be kept in view and all private sympathies or party feeling be rejected. The ultimate object to be accomplished is to prove ourselves loyal to the State in justice and candour. We trust all will join with us in working for the country's good.

The French warship *Eclairer* arrived at Hongkong from Saigon, on May 3rd. She is a third-class cruiser of 1658 tons, and has an indicated horsepower of 2408. Her armament consists of eight 5.5in. B.L. guns and six 1-pr. revolving cannon.

JAPAN'S GOLD STANDARD.

Not until the receipt and publication in London of a telegram from Her Majesty's Representative in Tokyo did Englishmen understand clearly that what Japan had done was, not to adopt bimetalism, linking the precious metals together by a ratio slightly different from that ruling in the open market, but to return to gold monometal sm, relegating silver to the rank of subsidiary coin. Mr. Walter S. Sandeman, writing in the *Morning Post*, with remarkable perspicacity put his finger on the brightest point of the Japanese scheme, namely, the hypothesis that the Tokyo financiers, believing in the remonetization of silver and the consequent depreciation of gold, had resolved to turn to the latter metal in order to secure for their manufacturers and producers the continued advantages of cheap money. In other words, being fully alive to the benefit that Japanese trade had derived from the sale of its staples in countries whose currency constantly appreciated in terms of Japanese money, and being apprehensive that the tables were now about to be turned owing to the appreciation of Japanese money in terms of European and American currency, the statesmen of Japan had discarded silver and adopted gold. Mr. Sandeman, interpreting Japan's new monetary legislation by the light of that reasoning, gives her credit for great foresight. We ourselves believed at first that some such theory had exercised considerable influence on her financiers. Certainly it was advanced very emphatically in the columns of more than one leading Japanese journal. But we are bound to note that no trace of any prescience of the kind can be detected in the speech delivered by Count Matsukata when the Monetary Bill was submitted to the Diet. On the contrary, the Minister of Finance based his whole argument on the fact that silver had become a discredited metal, and that its continued use in Japan must have the effect of augmenting the already-too-high prices of commodities. It was impossible to reconcile His Excellency's apprehension with the fact that no appreciable fall in the gold price of silver had taken place during the period indicated by him as that of an extraordinary rise in the prices of commodities in Japan. But without diverging into arguments of that kind, we limit ourselves here to recording that, although a probable reversal of the monetary conditions which have been so favourable to Japan, that is to say, a probable depreciation of gold in terms of silver, doubtless reconciled many Japanese thinkers to the adoption of gold monometallism, no evidence of reasoning in that sense is to be found in the official programme.

It has been contended that Count Matsukata was probably right in ascribing a great part of the recent rise of prices in Japan to the depreciation of silver in terms of gold. People taking that view urge that for a long time the mutual divergence of the precious metals did not make itself felt in Japan, but that when it began to be felt, the effect was rapid and marked. They support their argument by reference to the case of China, where a rise in the price of commodities synchronised with that in Japan. With regard to China, however, a special explanation presents itself; namely, that the currency of popular use, namely, copper cash, having appreciated largely in silver price owing

to scarcity, the silver price of commodities underwent corresponding appreciation. In China the real unit of value is the cash, and when the supply of cash became inadequate for purposes of circulation, so that 800 cash exchanged for a dollar which had previously been worth a thousand, it followed inevitably that the purchasing power of silver declined. The same phenomenon may be said to have taken place in all the gold-using countries of the Occident, if for cash we substitute gold. Thus the fact that prices rose in China simultaneously with their rise in Japan, does not by any means show that the same cause was operative in both countries. Before we assume anything of that kind, it is necessary to be sure that no other factors of disturbance worked independently in either country. But in truth such factors are very apparent: the scarcity of cash in China's case, and the effects of a victorious war in Japan's. It has been the unvarying experience of all nations that a marked inflation of prices takes place after a successful foreign war. Why should we expect that experience to be falsified in Japan's case? Why should we assign remote and hypothetical reasons for an occurrence attributable to causes not only patently active but also of well established potentiality? If we compare the changes that took place in the media of exchange between 1870 and 1881, with the changes that took place between 1881 and 1897, it becomes difficult to attribute the recent rise of prices in Japan to the fall in the gold price of silver. In 1870, the dollar was worth four shillings and six pence, and the paper yen exchanged for a silver yen at par. In 1881, the dollar had fallen to three shillings and eight pence, and the paper yen exchanged for only fifty-six cents. In other words, the silver price of the unit of value, the paper yen, had depreciated in the course of eleven years from 54 pence to 24-94 pence, or more than 54 per cent. Yet, during the whole of that time, the price of commodities, measured in paper yen, did not appreciate more than ten per cent. on the average. Now between 1881 and 1897, a period of 16 years, the sterling price of the yen fell from 44 pence to 25 pence, a drop of 43 per cent. Moreover only 5 per cent. of the fluctuation occurred during the last two years of that period. Yet we are asked to believe that an appreciation of 40 per cent. in the prices of commodities, which took place during precisely those two years, is attributable to the fall in the gold price of silver. It is difficult to accept such an explanation. We believe that the divergence between silver and gold had very little to do with the recent inflation of prices in Japan, and that the explanation is to be sought in the operation of causes which would certainly have sufficed to produce the phenomenon without any aid whatever from the appreciation of gold.

THE UNITED STATES TARIFF AND JAPANESE GOODS.

A lengthy telegram, said to have been sent from Washington by Mr. Hoshi Toru to the Foreign Office in Tokyo, is published by the *Nichi Nichi Shimbun*. It runs thus:—"Finance Committee of the Senate has examined the new Tariff Law, and has reported it to the Senate with various amendments. A comparison of the original text and the amendments, so far

as important Japanese staples are concerned, stands thus:—The 380th Article of the Tariff provides that Japanese Silk-Piece-Goods, of from 6 to 7 *momme*, shall be taxed at the rate of 4 dollars per pound. The amended article reads that Silk Piece-goods, of from 5 to 10 *momme*, shall be taxed at the rate of 3 dollars a pound. The duty on Silk Handkerchiefs is to be the same as that on Silk Piece-goods, but an additional duty of 10 per cent. *ad valorem* is to be imposed, according to the quality of the goods. This additional duty stands as in the original Tariff. With regard to Fancy Matting, the original Tariff provides that a duty of 8 cents per square yard shall be levied on Matting valued at 10 cents per square yard or under, but the amended article reduces the duty to 4 cents. Again, the duty on Matting valued at over 10 cents per square yard is fixed by the original Tariff at 8 cents a square yard together with an *ad valorem* duty of 25 per cent., but the amended Article excises the 25 per cent.

In the case of Cotton Carpets, the duty fixed by the original Tariff is 6 cents per square yard, together with an *ad valorem* duty of 35 per cent., for Carpets valued at 30 cents a square yard and under; and 12 cents a square yard together with an *ad valorem* duty of 40 per cent. for Carpets valued at more than 30 cents. The amendment in the former case is 5 cents per square yard together with an *ad valorem* duty of 35 per cent. for Carpets valued at 15 cents and under; and in the latter case, 10 cents a square yard together with 35 per cent. *ad valorem* for Carpets valued at over 15 cents per yard. With regard to Tea, a duty of 10 cents a pound is to be levied until January 1st 1,900, but after that date there will be no duty. The Tariff is to go into force from July 1st. The above amendments are to be discussed by the Senate from the 18th instant."

Mr. Hoshi Toru has been very successful in this matter. The amended duties are still very heavy, but they show a marked improvement as compared with the originally proposed rates. There is, of course, no assurance that the Senate will accept the amendments, but at all events, legislative attention has been directed to the matter, and we may fairly hope that the situation will be more or less improved.

DEPARTURE OF THE BRITISH REPRESENTATIVE.

Sir Ernest Satow left Tokyo by the 10.25 train on May 7th to catch the *Empress of India*, which sailed for Vancouver at noon. A great number of notables assembled at Shimbashi to bid him farewell, conspicuous among them being Their Excellencies Count Kuroda, Acting Minister President of State; Count Okuma, Minister of State for Foreign Affairs; Count Kabayama, Minister of State for Home Affairs; Marquis Hachisuka, Minister of State for Education; Lieut.-General Viscount Kawakami, Vice-Chief of the Staff; Mr. Edwin Duu, United States Representative; Count Orfini, Italian Representative; Mr. Yü, Chinese Representative; Mr. de Testa, Netherlands Representative; Mr. de la Barrera, Spanish Representative; Baron de Cartier, Belgian Chargé d'Affaires; Captain Comte de Pimodan, Military Attaché of the French Legation; Major Cologan, Military Attaché of the Spanish Legation; Mr. Inigo, Naval Attaché of the Spanish Legation; Mr.

Miller of the United States Legation; Mr. Paul May, Secretary of the Belgian Legation; Dr. Weipart, Secretary and Interpreter of the German Legation; Mr. Watanabe Koki, formerly President of the Imperial University; Mr. Mitsuhashi, Secretary of the Foreign Department; Mr. Watanabe Kyoshi, Member of the House of Peers; and many others, Japanese and foreigners. Sir Ernest was accompanied to Yokohama by Mr. G. Lowther, Secretary of Legation; Mr. J. H. Gubbins, Japanese Secretary; Mr. R. Paget, Second Secretary, and Mr. A. H. Lay, Acting Vice-Consul in Tokyo. In Yokohama the British Consular staff and many residents awaited Sir Ernest at the *hatoba*, and then accompanied him in a steam-launch flying his Excellency's flag, to the mail packet. We believe that the Minister does not propose to be absent from Japan for more than six months. He returned on Thursday evening from Kyoto, whither he had proceeded by the night train on Tuesday in order to have farewell audience of the Emperor.

A JAPANESE MARCO POLO.

The *Sekai-no-Nippon* introduces us to a gentleman concerning whose doings and their recital by himself we have no opinion to offer.

A valiant youth, named Suzuki Kakutaro, left his native village (Oji, Toshima gun) at the age of sixteen in November of the 23rd year of *Meiji* (1890). His sole purpose was to explore the islands lying at the extreme south of the globe. Immediately after his arrival in Ogasawara, he took ship for the Carolines, and thence proceeded southward until he landed on New Britain, one of the Bismarck Isles, where no Japanese had ever before been. The Archipelago belongs to Germany, and consists of five extensive territories with more than a hundred islets lying at different distances from each other, in the 10th degree of south latitude. These islands have long been notorious for the man-eating propensities of the natives, and are shrouded in noxious mists all the year round. Suzuki, despite the earnest warning of his fellow passengers, effected a landing on one of the isles and stayed there six years, completely studying the topographical features of the place as well as the manners and customs of the natives. The inhabitants go completely naked: they do not cover even their loins. Their nostrils are perforated, and sticks of about a foot in length are passed through as an ornament. Their arms consist of spears and axes, and their most esteemed food is human flesh. Their countenance betrays the devilish wickedness and cruelty of their natures. Perpetual fighting is their business, and upon capturing a foe they form themselves into a circle to eat the limbs of the captive, carving them and roasting them over a fire while the blood is still dripping and the victim shrieking in agony. That is their supreme delight. They celebrate the feast with cries of joy and loud smacking of the lips. But the island being extensive and fertile with numerous productions, some valiant aliens have gone there and amassed wealth. An American woman, though not twenty years have elapsed since her immigration, had acquired property to the value of 4½ million *yen*. She started with nothing, but her shops are now open in sixty different places.

Three more Japanese arrived at the islands after Suzuki, but were slaughtered by the savages. Suzuki was frequently seized with fever and attacked by the natives, but passing luckily through hardships and dangers of all descriptions, he escaped the cruelty of the inhabitants and returned to Japan. More than once he looked death in the face. Whether these savages were to be classed as cannibals had not yet been determined by the learned men of Europe, but is now settled. Suzuki having completed his practical exploration of the mysterious island, will soon embody the results in a book.

JAPANESE COMMERCIAL AND POLITICAL TOPICS.

The United Japanese Chambers of Commerce, awakening to the gravity of the issues involved in the new American Tariff, have held a meeting at Hiroshima, and passed a resolution declaring that as the increase of duties contemplated by the new Tariff is evidently prohibitive, and intended to be prohibitive, no remedy is open to Japan except to rescind the most-favoured-nation clause in the Treaty with the United States, and to engage in a war of tariffs. The resolution says that America has always been most friendly to Japan and that she is regarded with the utmost good-will by the Japanese, but that self-defence dictates recourse to retaliative measures at the present crisis. This action on the part of the Chambers is natural enough, and will doubtless have the effect of strengthening Count Okuma's hands. But it comes somewhat late in the day, and considering that America's sales to Japan are greatly less than her purchases from Japan, the weapon that the Chambers propose to wield is not altogether trustworthy. Fortunately, however, Count Okuma, whose solicitude for the interests of commerce is well known, lost not a moment in dealing with the question, and the Legation in Washington, acting under his instructions, has succeeded in persuading the Finance Committee of the Senate to recommend very substantial reductions in the Tariff. Whether the Senate will adopt the amendments remains to be seen, but certainly had not the Foreign Office in Tokyo and the Japanese Legation in Washington taken vigorous steps, the Tariff would have become law without any further regard to Japan's claims.

While it is true that the United States buys from Japan more than it sells to her, it is also true that a very marked increase has taken place of late years in Japan's purchases from the Great Republic. Here are figures taken from the Custom's Returns:—

	1891. Yen.	1893. Yen.	1894. Yen.
Japan's Sales to America	38,674,971	27,739,458	43,323,557
Japan's Purchases from America	5,988,053	6,090,408	10,982,558
Japan's Sales to America ...	54,028,950	31,532,341	
Japan's Purchases from America	9,276,360	16,373,479	

It was a forgone conclusion that the delay in revising the Treaty with Austria-Hungary would furnish Count Okuma's enemies with a weapon to attack him. Hence we are not surprised to find the *Sekai-no-Nippon* contemptuously recommending the Count to concede the Austro-

Hungarian demands incontinently, since he has not the ability to resist them. The Government of the dual monarchy is understood to have stipulated originally for a special conventional tariff of its own, but rumour says that it has abandoned that claim, as indeed it might without much sacrifice, seeing that its total sales to Japan in 1896 were valued at 40,400 *yen*, a magnificent figure, which nevertheless shows a development of nearly 300 per cent. in five years! We should think that Japan could very well afford to make every concession desired by Austria-Hungary in connection with such a trade, and that Austria-Hungary would not be at all likely to insist on a special conventional tariff for the sake of an international commerce of four thousand pounds sterling.

People that find difficulty in discovering any reasonable relation between Austria-Hungary's extreme caution in this matter and the pettiness of the interests she has at stake, are disposed to suspect her of creating intentional delays at the suggestion of some other State. No suspicion of that nature can be entertained for a moment. A great State like Austria-Hungary would not consent to be the cat's paw of any Power. In our opinion the explanation of Austria-Hungary's tardiness is to be sought in the fact that every question has to be debated independently at Vienna and Buda-Pest. If there is a consensus at both capitals, things move rapidly enough. But if there is a difference of opinion, then an interchange of views becomes necessary, and the time that can be wasted over that kind of business, unless very great zeal be brought to the task, is easily conceived. Add to that mechanical cause of tardiness the fact that European complications have occupied the exclusive attention of the Dual Monarchy for some months, and a sufficient explanation is furnished. Still this long procrastination is beginning to reflect upon the capacity of Austro-Hungarian statesmen, and since there are no really considerable interests at stake, a settlement ought to be devised as speedily as possible.

JAPANESE TOPICS.

It is stated by the vernacular press that Mr. Doi Michio, business adviser of the Konoike Family, has done a very pretty stroke of business. He has sold his house and land in Osaka to the Bank of Japan for a price representing 500 *yen* per *tsubo*. The place is situated in Naka-no-shima, between the Oe and Yodo-ya bridges. It belonged to the Godai Family, by a representative of which once wealthy house its garden was laid out and planted. Mr. Doi bought it for 150 *yen* per *tsubo*, and as it measures 1,500 *tsubo*, he now clears five hundred and twenty-five thousand *yen*. 'Tis a remarkable record. But of what nature can the garden be? Fifteen hundred *tsubo*—an acre and a quarter—is a petty plot of land after all. Were it crowded with the most valuable trees, shrubs and rockery stones in Japan, a hundred thousand *yen* would surely cover the whole. The celebrated Fukagawa park, which Baron Iwasaki Yanosuke converted from an unsightly waste into its present beautiful form, out of romantic respect for the wishes of his dead brother, Yataro, contains about as great a profusion of rockeries as any canon of

Japanese taste permits. There are thousands of stones, each presenting some feature dear to the fancy of the landscape gardener. Yet the value of the whole is not supposed to exceed half a million *yen*, and the Fukagawa park covers an area of a hundred and twenty thousand *tsubo*, if we remember aright. What manner of place, then, can the Doi *yashiki* be? Or does land in Osaka command such immense prices—sixty thousand pounds sterling an acre? Osaka now boasts some fifteen hundred factory chimnies. Gardens are out of place there. It occurs to us, further, that the Bank of Japan is a most lordly institution. It pays three quarters of a million of dollars for a site to locate a branch.

The *Chuo* calculates that, at the present rate of exchange, the third installment of the Indemnity—namely 16,666,666½ *Tls.*—to be paid in London by China, on the 8th instant, is the equivalent of £2,741,748 7s. 3.; that the interest on that amount for half a year, is equivalent to £68,543 14s. 2d., and that the contribution of 500,000 *Tls.* on account of the occupation of Wei-hai-wei, represents £82,252 9s. Thus China's total payment is £2,892,544 11s. 5d. We do not know how these figures are arrived at. They make the tael worth more than 3s. 3d., whereas it is quoted at 2s. 8½d.

The expectations as to the dates of completion of the new ships already ordered for the Japanese Navy are said to be these:—

The *Chitose* (line-of-battle ship; ordered in England); to be finished in November, 1898.

The *Kasagi* (line-of-battle ship; ordered in England); to be finished in November, 1898.

The *Shikishima*, (line-of-battle ship; ordered in England); to be finished in May, 1900.

A first-class cruiser, ordered in Germany; to be finished in July, 1899.

A first-class cruiser, ordered in France; to be finished in January, 1900.

The tax on *Saké* constitutes the most prolific source of State Revenue in Japan, after the Land Tax—the latter yielding 38½ million *yen* annually, the former 29½ millions. In the Government's scheme of *post-bellum* finance the rates levied upon the various kinds of *Saké* were increased. This change was made by a law passed in the 9th Session of the Diet, namely, the 1895-6 session, but it was, at the same time, enacted that the fiscal year in the case of *Saké* should commence on October 1st, and that the tax should be paid in four installments; the first between the 1st and the 15th of July; the second, between the 1st and 15th of September; the third, between the 1st and 15th of December, and the fourth, between the 1st and the 15th of March. The new system did not go into operation until the 1st of October last. Consequently, no payments have yet been levied under it. The first will fall due in July next, and naturally the prospects of the tax have been anticipated with considerable curiosity by the country's financiers. The Government's estimate put the addition to the Revenue at 11,415,985 *yen*, the total yield being entered in the Budget at 29,823,852 *yen*. But an unexpected factor has influenced the result. Formerly, people that brewed *Saké* for domestic use only received special consideration, be-

ing permitted to manufacture a maximum quantity of 1 *hoku* on payment of a license fee of 80 *sen*. The latter impost was raised to 2 *yen* under the new system, and it was moreover laid down that domestic brewing would be interdicted in the case of any person paying direct national taxes to the extent of 5 *yen* or upwards. That change, combined with an alteration in the rates levied upon Mixed *Saké*, seems to have had the effect of greatly reducing domestic brewing and correspondingly increasing the activity of the regular brewers. It is estimated that the latter have made arrangements for an increased output of some 500,000 *hoku*, which means an addition of 3½ million *yen* to the revenue from the tax. The money is badly wanted by the Treasury, so it is to be hoped that these forecasts will prove correct.

Japanese capitalists evidently expect that the shares of the Industrial Bank (*Kangyo Ginko*) will appreciate largely in value, as has been the case with the shares of all other banks enjoying official protection. Up to the 5th instant, the applications for shares opened at the Department of Finance aggregated about seven times the required amount, and fully three thousand applications remained to be opened. Moreover, the applications from the provinces were not to be opened until the 11th. Thus, on the whole, each share will probably be found to have been subscribed for fifteen or sixteen times over. Under the circumstances, applicants for less than ten shares will be in the position of getting no return whatever on the money lodged by them as security. The *Nichi Nichi* says that the small shareholders will probably combine to make a *pro-rata* distribution of stock to all the minor applicants.

In the action for libel brought by Mr. Oishi Masami, Vice-Minister of Agriculture and Commerce, against the *Yorodzu Choho*, which had accused him of immoral conduct, counsel for the defendant pleaded that the writer and publisher had not been influenced by malice, and had not intended to attack Mr. Oishi personally. Their sole aim was to promote the cause of good morals in the interests of society. Counsel, therefore, applied for permission to produce evidence in support of the truth of the charges preferred. But the Judges of the Tokyo Local Court, where the case came up for hearing on the 5th instant, rejected the application, thus declaring their opinion that the series of slanderous articles in the *Yorodzu* were purely of a personal and malicious character. On Monday the Court delivered judgment. Defendants were found guilty and fined 15 *yen*, with two months' major confinement. They at once appealed.

Japan may still be a long way from serious danger of big strikes or socialistic upheavals, but that her people have a strong tendency to combine for the purpose of enforcing their opinions, is beyond question. The recent history of the Ashio-mine agitation illustrates the fact. Several times the people of the devastated districts have combined to make demonstrations, even travelling all the way to Tokyo, and invading the premises of more than one Department of State. Another attempt to compel official attention is now reported from the north. It appears that the farmers made arrangements to assemble in large numbers during the night of the 3rd instant, their intention being that one

party should proceed by river to Tokyo, for the purpose of presenting a petition to the Emperor on his way back from Kyoto, while another was to march to Tochigi, in order to rescue their comrades from jail and to attack the prefectural offices. The deluge of rain that fell that night interfered with the programme, for the leader of the demonstration, who happened to be in Kiryu, sent a telegram advising postponement, in view of the weather. The following morning, however, some seventy of the agitators came together, and betook themselves to the summit of Taihei-san, a mountain historically famous as the place chosen by the Tengu section of the Mito party to build a beacon fire in the closing days of the Shogunate. The number of these temporary hermits increased rapidly, but the police finally discovered their whereabouts in the recesses of the mountain, and dispersed them. It is said, however, that about 30 have made their way to Tochigi, and some anxiety is felt lest an attack should be made upon the Kencho there.

There seems to be so much doubt about the number of Japanese subjects now in Hawaii that the following figures, being the census return of last September, will be interesting:—

Hawaiians (pure)	31,019
Hawaiians (mixed)	8,486
Americans	3,086
British	2,259
German	1,432
French	101
Portuguese	15,191
Norwegians	378
Japanese	24,407
Chinese	21,606
South-sea Islanders	455
Others	600

Total 109,020

The *Fiji Shimpō*, from which we take the above figures, asserts that with the exception of the 3,086 Americans, all the other elements of population are opposed to annexation by the United States.

The torrents of rain that fell on the 3rd instant, especially during the night, seem to have been productive of considerable injury. In Kanagawa prefecture all the rivers rose to a great height. The bridge over the Sukumo river at Yumoto collapsed, and two landslips occurred between Yumoto and Tonosawa, one of them burying a cottage, but not, apparently, causing any casualty to life or limb. The tramway between Odawara and Atami suffered, as did the railway near Nebukawa; and the Tama river having risen about 7 feet, broke embankments that were in process of construction, and carried away material collected for building them.

The following Regulations with reference to the sale or letting of real estate to foreigners in Formosa have been issued by the Governor-General.

Art. I.—The sale, granting, transferring, mortgaging or pledging land to foreigners is not permitted.

Art. II.—Beyond the limits of the space allotted for purposes of mixed residence at the open ports, it shall not be lawful to rent houses or lands to foreigners, or to sell, grant, transfer, mortgage or pledge houses to them. Provided that foreigners in the employ of the Government or of the people may rent houses outside the settlements by permission of the Governor-General.

Art. III.—Persons desiring to lease houses or lands to foreigners within the limits of the foreign settlements, or to sell, grant, transfer, mortgage or pledge houses to them, or,

as provided in the last clause of Art. II., to rent houses to them outside the limits of the said settlements, must first report the matter to the local Governor of the district and obtain his permission. The same provision shall apply to ceding to foreigners the power of sub-letting.

Art. III.—Any violation of Art. III. shall involve a fine of from 2 to 25 yen.

With regard to the production of silk last year in Japan, we stated in a previous issue that returns compiled by the Department of Agriculture and Commerce showed an increase of 50,000 families engaged in sericulture as compared with 1895—the total number of families being 1,306,253, but a diminution of 42,151 *koku*, or 15 per cent., in the quantity of cocoons. The figures for the past seven years are given thus:—

1890.....	1,172,272	<i>Koku</i>
1891.....	1,580,240	do
1892.....	1,480,075	do
1893.....	1,686,894	do
1894.....	1,797,842	do
1895.....	2,258,173	do
1896.....	1,836,672	do

Official returns corrected up to the end of March show the following figures for the whole empire:—

Number of Commercial Joint Stock Companies.....	882
Aggregate amount of their capital.....	126,660,985 yen.

Compared with the preceding month, there is here an increase of 22 in the number of companies and 1,829,700 yen in the amount of capital.

Number of Industrial Joint Stock Companies.....	889
Aggregate amount of their capital.....	153,324,006 yen.

Compared with the preceding month, there is an increase of 76 companies and 1,877,000 yen of capital.

Number of Agricultural Joint Stock Companies.....	82
Aggregate amount of their capital.....	1,982,755 yen.

Compared with the preceding month, there is an increase of 2 companies and 26,000 yen.

The total number of companies under the above three headings is 1,852; and their total capital, 281,667,741 yen.

It is certainly suggestive that on the very heels of a telegram from the Governor-General of Formosa, at Taipeh, announcing that the people seemed tranquil, and that no commotion or confusion appeared likely to attend the advent of the time when all the Chinese inhabitants of Formosa must either consider themselves Japanese subjects or leave the island—it is suggestive that on the very heels of such a telegram should come another message giving intelligence of fresh insurrection and an attack upon Twatutia. Obviously the Governor-General's means of obtaining an insight into the state of public feeling are not very accurate. Indeed, we suspect that one of the chief difficulties experienced by the Japanese in pacifying and administering Formosa, is the lack of a good police force conversant with the language of the country.

In Tokyo it is believed that the six hundred men who assaulted Twatutia do not belong to the ordinary bandit type, but are genuine rebels against alien rule. The belief is founded on the time chosen by them for their enterprise—the morning of the 8th of May; the morning of the anniversary of the island's cession to Japan. It is more easily conceivable, we think, that the desperadoes consisted

partly of brigands and partly of Chinamen who, fearing to make open act of allegiance to Japan, and seeing that their days of grace had expired, felt that nothing remained but recourse to insurrection. Formosa is proving a hard nut to the Japanese. All accounts agree in attributing efficient and conciliating methods to the present Governor-General. Since his arrival in the island seven months ago, there has been no whisper of ill-treatment of the natives, and we are without any reason to attribute this last outbreak to official abuses or private excesses on the part of the Japanese. It appears necessary to infer that deep-seated hostility to Japanese rule exists in some quarters, and that the hopelessness of armed protests has not yet been fully brought home to the minds of the people.

Twatutia is a suburb of Taipeh. It is the site of the foreign settlement. The attack began at 3.30 a.m. on the 8th instant, and the insurgents must have taken the guards by surprise at first, since they succeeded in carrying away 44,860 yen in coin. We are without any information whether the money belonged to Japanese, foreigners or Chinese. But it was probably Chinese property, for no official funds would be likely to be stored in Twatutia, and had a foreign bank or hong been broken into, the telegram would scarcely have failed to note the fact. Looking at the list of casualties, the hypothesis is suggested that the whole affair was merely a plundering raid. On the side of the rebels, 100 are said to have been killed, 40 or 50 wounded, and 17 taken prisoners. On the side of the Japanese, 2 were killed—a policeman and a coolie—and 4 were wounded, a soldier, a policeman, and two gendarmes. It was a veritable slaughter. If the so-called "insurgents" were really animated by any deadly intentions against the Japanese, or if they possessed any lethal weapons, they showed singular inability to give effect to the former or to employ the latter. We are told, too, that 17 houses were raided—"houses belonging to the citizens," which, of course, means belonging to Chinese—and that three were burned. On the other hand, militating against the supposition that the disturbance was caused by mere marauders, we have the intelligence that the attack was apparently renewed at 5 o'clock on the afternoon of the same day. The telegram sent from Taipeh at 5 p.m. on the 8th says:—"The assault is now going on." If after losing 157 of their numbers by death, wounds or seizure, and putting only 6 of their enemies *hors de combat*, the remnant of the six hundred advanced again to the attack thirteen hours later, they must have been remarkable desperadoes.

Confirmation of the statement that the employment of a Russian *mission militaire* in Korea had been abandoned, is furnished by the *Yomuri Shimbun*, which contains the following editorial paragraph:—"The opponents of the proposal to engage a hundred and sixty Russian military men in Korea having gained the day, the Cabinet in Söul decided, after consultation, that the project must be abandoned. But when that decision was made known to the king, His Majesty again directed the War Department to arrange the matter, and the Minister of the Department, after frequent meetings with the Russian *Chargé d'Affaires*, Mr.

Waeber, finally entered into a secret agreement to engage 24 Russian officers and non-commissioned officers. But the Japanese Government having, from the outset, regarded the employment of Russian military men in Korea as a violation of the Moscow Convention, Count Okuma sent instructions to Mr. Motono, the Japanese *Chargé d'Affaires* in St. Petersburg, to approach the Russian Minister of Foreign Affairs and ascertain his views, whereupon the Minister stated that his Government knew nothing about any project for employing Russian officers and soldiers in Korea, and that no report on the subject had been received from Mr. Waeber. His Excellency further added that whatever course might be adopted by Korea, the Russian Government would do nothing to disturb the friendly relations between Japan and Russia, and had therefore no intention of lending military men to Korea. Count Okuma took another step also. There being evidence that the United States Minister in Söul had worked with Mr. Waeber and endeavoured to promote the latter's plans, Count Okuma approached the United States Government on the subject, and the latter telegraphed to its Representative in Korea that he must abstain from all interference with the Far-Eastern Question, such interference being contrary to the policy of the United States. The British Representative, on the other hand, was from the first opposed to the idea of a Russian *mission militaire* in Korea, and it thus became evident that the programme, if pushed, would offend several Powers. Its abandonment had become virtually assured when a telegram from Söul, dated 4 p.m. on the 9th, conveyed information that the Russian Government had instructed Mr. Waeber by telegraph to decline to entertain any proposal made by the King of Korea for employing Russian drill instructors."

Without accepting the above account in all its details, we may be assured that this cloud upon the horizon has been dispersed. It is very much to be doubted, in our opinion, whether the Russian Government was at any time in agreement with the proposal. The whole conception was so clumsy as to be quite inconsistent with the usual methods of St. Petersburg diplomacy. If Russia wanted to have the Korean army trained by her officers, she could easily have managed the matter, without recourse to a procedure that was bound to attract attention and provoke resistance.

From the accounts given by the emigrants who went to Hawaii in the *Kinai Maru*, it appears that a serious disturbance was barely avoided. We described in a recent issue how small-pox had been found among the passengers in the ship after their landing at the quarantine station, and how the Customs authorities had decided that only 120 out of 682 were duly qualified for admission. The vernacular press now gives slightly different numbers. It says that the *Kinai* reached Honolulu on the 9th of April, and that, after examination on the following day, 133 of the immigrants were permitted to land, the remaining 540 being detained at the station. On the 17th, however, permission was extended to the latter also, and they were about to avail themselves of it when two boats arrived with intelligence that permission had been with-

drawn. Great excitement ensued, the labourers objecting strongly to be turned back. At this juncture a number of Hawaiian soldiers and police appeared upon the scene, and used their clubs freely, some also brandishing drawn swords, and blank cartridges were fired from the battery to intimidate the Japanese. The latter became so much exasperated that it seemed as though a riot was inevitable. But the efforts of Mr. Shimamura, the Japanese Consul-General, and the exhortation of other responsible Japanese at last prevailed, and violence was prevented. It is alleged that the men who failed to obtain permission to land were duly provided with 50 dollars each.

Some points in the above account lend it an apocryphal air. In the first place, the *Kinai* reached Honolulu on the 10th of April, not the 9th. In the second, small-pox was discovered among the immigrants on the morning of the 12th, and it is therefore quite incredible that any of them should have been granted access to the island on the 17th, fourteen days being the maximum period of incubation in the case of small-pox, eighteen days being the period of quarantine in Hawaii. Assuming that the sufferers from small-pox were segregated on the 12th, and that no fresh cases occurred, it is nevertheless certain that the remaining immigrants would not have been released from quarantine before the 30th of April, at soonest. If any attempted to obtain their freedom on the 17th, they must have been breaking quarantine.

FINANCIAL TOPICS.

It is now certain that the long talked-of purchase of Japanese public securities by Messrs. Samuel Samuel & Company has taken place, but as to the nature of the bonds selected, some doubt still exists. One authority speaks of War Bonds, another of Consols, and yet another of Public Undertakings Bonds. We are inclined to think that the last have been selected, for the purchasers would naturally prefer whatever securities had the longest period to run before redemption. Now the last issue of War Bonds was made in 1896, and the bonds then issued become liable to redemption from 1901, whereas the Public Undertakings Bonds to be issued during the present year, will not become liable to redemption before 1902. Besides, the total amount purchased by Messrs. Samuel Samuel & Co. is forty million *yen* worth—face value—and since the whole issue of War Bonds in 1896 was only 35,000,000 *yen*, it would be necessary to fall back on the bonds of 1895 to make up the aggregate. The 1895 bonds, however, become redeemable in 1900, and are consequently a less advantageous investment than the Public Undertakings Bonds. We are inclined to believe, therefore, that the securities purchased are Industrial Loan Bonds.

The issues of War Bonds up to the present aggregate 125 million *yen*, namely:—

	<i>yen</i> .
August, 1894...	30,000,000
November, 1894...	50,000,000
October, 1895...	10,000,000
March, 1896...	10,000,000
Do, do...	25,000,000

It is understood that no more of these bonds will be issued. If forty million *yen* worth of them have been purchased from

the Government by Messrs. Samuel Samuel & Co. the inference is that of the 1895 and 1896 issues, nearly the whole was taken up by the Bank of Japan, and that the latter has now transferred them to the British firm.

Whatever be the nature of the securities sold by the Government, the result is that a sum of 40 million *yen* flows into the Treasury. The only difficulty in Japan's financial position is that, in order to balance her income and expenditure during the current year, she has to raise a sum of 61 million *yen* in the form of a Public Undertakings Loan, and there seems at present to be very little prospect of floating such a loan successfully in Japan. Foreign capital is essentially necessary, and there can be little doubt that one of the motives underlying the adoption of gold monometallism was to attract foreign capital, not by recourse to a direct loan, but by the sale of Japanese public securities abroad. A successful transaction of that nature would be the only speedy vindication of the gold-monometallic policy, and, on the other hand, if no such transaction could be effected, Count Matsukata's policy would be proportionately discredited. It is for that reason that the section of the vernacular press hostile to the Cabinet has been urging the advisability, and even the necessity, of a direct foreign loan, for, inasmuch as a direct foreign loan on a gold basis was always possible, recourse to it now would be virtually an admission that the adoption of gold monometallism had not worked any tangible improvement in the financial situation. The Cabinet may, therefore, congratulate itself on the sale of 40 millions' worth of bonds. Nothing of the kind could have been hoped for prior to the demonetization of silver. That much, at any rate, may be said in favour of the monetary change for which Count Matsukata and his advisers are responsible. There will now be no occasion to offer the Industrial Bonds at once in the home market. A favourable opportunity can be quietly awaited.

By way of contrast to the difficulty of placing any ordinary five per cent. loan in the home market at present, we have the fact that the applications for shares in the Industrial Bank aggregate 143½ million *yen*. The Bank's capital is 10 million *yen*, and it has been subscribed more than fourteen times over. We may note, for the information of those not conversant with Japanese finance, that the establishment of two banks for the encouragement of industries and agriculture was among the measures included by the Government in the *post-bellum* programme, and approved by the Diet in the 1895-6 session. The first of these banks is the Industrial Bank—*Kwangyo Ginko*, literally, the "industry-encouragement bank"—the capital of which has just been so readily subscribed. It is to be a joint-stock concern, having its head office in Tokyo, with a capital of ten million *yen*, subject to increase if approved by the Government. Its charter is to run for 100 years, and its chief business is to make advances on the security of real estate, the money to be repayable by installments spread over a period of not more than 50 years. The Bank receives State aid to the extent of 62,500 *yen* annually. Of course the avidity shown by the public to obtain shares is of a purely speculative character. The shares of the only two banks now connected with the Govern-

ment, namely, the Bank of Japan and the Specie Bank, are selling at more than 100 per cent. premium, and the not unreasonable expectation is that the shares of the new Bank will quickly command a high price. The face value of the shares being 200 *yen* each, the total number is only fifty thousand, whereas the number applied for is seven hundred and ten thousand. It is stated that no applicant for less than 14 shares will receive any at all.

Since writing the above we find a most positive assertion in the *Yomiuri Shimbun* to the effect that an agreement was signed on the 12th instant between Baron Iwasaki, President of the Bank of Japan, and Mr. W. F. Mitchell, representing Messrs. Samuel Samuel & Co., in the sense that the former sells to the latter Japanese War Bonds, to the extent of 40 million *yen* (face value), at the rate of £102 for 10 Bonds (1,000 *yen*); that is to say, a premium of over 2 per cent., approximately, if we consider the present rates of exchange only. But since the sterling value of the *yen*, according to the new monetary system of Japan, is 2s. 0½d., or, more correctly, the sterling value of the 10-*yen* gold coin is 20s. 5½d., it follows that the sterling value of 1,000 *yen* is £102 8s., very nearly, so that the price paid is really a fraction below par, from the point of view of the buyers. Baron Rothschild is said to be the capitalist involved.

FORMOSA.

Telegrams from Formosa state that very few of the inhabitants of the island seem likely to return to China in consequence of the expiration of the period of undefined nationality. The exodus will probably be confined to Chinese from Amoy and its vicinity, who have been carrying on trade in Formosa. Whether any departures have actually taken place, is not stated.

CHINESE TOPICS.

Nothing ever done by Li Hung-chang becomes him better, in our opinion, than the following letter, addressed by him to the Rev. Gilbert Reid, on the eve of the latter's departure from Peking for America:—

Peking, China, 12th April, 1897.

To Rev. GILBERT REID,

Founder of the Mission to the Upper Classes of China, Peking.

DEAR SIR,—Having on various occasions gladly shown my interest in the good work recently organised by you among the educated and official classes of China, through whom the masses may be readily enlightened by means of Western knowledge; and knowing also of the many years of self-denying labour you have devoted to the welfare of the people in various parts of China,—it is with much pleasure that I offer you this testimony on the eve of your departure for the United States.

I have admired the bold and tireless energy with which you have faced the difficulties of your present task. It is unfortunately true that suspicion, prejudice, and self-sufficiency are peculiar traits of educated Chinese, especially noticeable in their estimation of other countries—perhaps because of the isolation of China from Western influence for so many centuries; but whatever may be the case, the lamentable effect is seen in the present backward state of China among the nations of the world.

The social, educational, and official systems of China have tended to give to the educated classes control of the destinies of the nation. Whether such a monopoly of power be good or bad need not now be considered: it exists; and the practical question is how to turn it into beneficial and useful channels.

You have set about solving this problem in a way that should commend itself to every friend of

humanity. Unquestionably, if you can give to the blind leaders of our people light and learning enjoyed in the West, they, in turn, will lead our people out of their darkness. I think I may claim to have many friends in the United States, where you now go. The cordial reception I met with wherever I went there made a deep impression upon my heart and has greatly endeared your people to me. If it would interest them to know that I regard you highly and will give you a helping hand in your future efforts to bring more light into the world and encourage higher aims and aspirations, you may use for that purposes this letter from

Your friend,
[Signed] LI HUNG-CHANG,
Senior Guardian of the Heir Apparent;
Classical Reader to His Majesty the Emperor;
Senior Grand Secretary of State;
Minister of the Foreign Office; and Earl of the First Rank.

The people of Shanghai have been afforded an opportunity of witnessing tactical manoeuvres by the German-drilled Chinese troops at Woosung. The men seem to have acquitted themselves fairly, and doubtless foreign confidence in China's belligerent potentialities will gradually be restored as battalion after battalion passes through the hands of Count von Nayhauss and his comrades. But we can not forget what a magnificent body of men were the Tientsin regiments in the days of the great Viceroy—perfect, to all appearances, in the technique of their craft, and physically imposing. But when the day of test came, where were they?

As if to point the moral of this reflection we are confronted with an account of a review of six thousand men at Tsingkiang-pu, by the Governor of Kiangsu. The review lasted two days, and the *N.-C. Daily News* says that the soldiers were "put through the curious system of evolutions known as foreign drill." Is it not to be strongly suspected that the tactics inculcated by the German officers will become "a curious system of evolutions" so soon as the Teutonic eye is no longer within range?

The Grand Canal has probably performed its final function as an avenue for the transport of tribute rice to Peking. The boats engaged in the work last year found it a year's task, the voyage up and down. They are unlikely to repeat the experiment, especially as the Viceroy of Chihli has memorialized the Emperor, urging the abandonment of the route. The ditch will doubtless be suffered to silt up.

The missionaries in Tsing Kiang-pu have scored a signal victory. Last December a proclamation was issued over the name and seal of the Local Magistrate. It re-ventilated the stock scandals so often circulated against Christian propagandists in China. Four months later, the Taotai and the Magistrate officially presented two tablets to the Dispensary of the American Presbyterian Mission. They were magnificent affairs, and their erection was signalized by music and fireworks. The Taotai's tablet bore the inscription "Relieving the world with a pitying heart"; the Magistrate's, "Rejoicing in good works without weariness." Consular interference has exacted that reparation for the obnoxious proclamation. It was a well rounded-off episode.

Mr. Wolf, whose fate recently caused some anxiety, since, after his intrepid insistence on admission to Changsha, he was known to have been deserted by his servants and to be without any means of communicating with the people, has returned in safety to Wuchang. He appears to have been "taken into the city and

escorted back to his boat so secretly that few people were aware of the fact." Moreover, one result of his visit is said to be an increase of anti-foreign sentiment in Hunan. To be sure, forcing one's way into a society unwilling to receive one, is not the best way to awake its hospitable instincts.

Mr. Griffith John has contributed to the *N.-C. Daily News* an interesting account of a trip just made by him to Hunan. It was his third visit to the conservative province. Last year, he and his companion barely escaped with their lives. This year, they barely escaped with their lives. There is a hopeless monotony about the record. Nevertheless, the veteran missionary had the pleasure of baptizing 13 Hunanese. They had been waiting for some months to have the ceremony performed, and though fully warned of the danger they ran, as well as of the missionaries' inability to protect them, they insisted on being received into the Church.

We were delighted with Hunan as a province. Hunan is a little kingdom in itself, and self-dependent for all the necessities of life. Its area is about 83,000 square miles, and its population is not less than 20,000,000. It is one of the richest of the eighteen provinces—richest in mineral wealth, richest in navigable waters, and richest in cultivated land of exhaustless fertility. The mineral resources of the province are very great. The area of its coal-fields is estimated at 21,000 square miles, and the area of the coal-fields of Great Britain is estimated at 12,000 square miles, and the aggregate area of all the coal-fields of the principal coal producing countries in Europe is given at 20,720 square miles. Thus the area of the coal-fields of Hunan is a little larger than that of the whole of Europe, and very much larger than that of Great Britain. And the coal is of every kind and quality—lignite, anthracite, and bituminous. But this is not all, side by side with these coalbeds, you have iron ore and iron stone in richest abundance, and of the best quality. The province is rich also in timber and stone. All the timber and all the granite stone used in this valley come from Hunan. It is a well-watered province. Its four main rivers, together with their numberless branches, give ready access to nearly all its principal cities and towns. The Siang is a fine stream. At Changsha, and a long way beyond, we found it quite half a mile in width. The country through which we passed is simply charming for the beauty of its scenery. To gaze on the everlasting hills, on both sides of the river, as we passed through the Siang valley, was a daily feast. At Hengshan you have the famous Nanyon, one of the five sacred mountains of China, with its 72 peaks, 10 caves, 38 springs, and 25 streams. We had many a delightful view of this grand mountain range both in going and coming. The missionaries of Hunan, in the days to come, will not need go to Kuling for health and recreation. They will find in their own province, if I am not greatly mistaken, sanatoriums in abundance, equally attractive and not less salubrious.

Here is a report that conveys an idea of the quantity of silk used by the Imperial Household and the Boards in Peking:—

Shu Chen, Superintendent of the Hangchow Government Silk Looms, sends his annual report of the quantity of silks, satin, etc., and fine cotton cloths manufactured during 1896 for the use of His Majesty and the Imperial Household and for the Boards at Peking. During the year under review memorialist having previously arranged with the Likin Bureau of Hangchow for the requisite funds to work his looms for the purpose of sending the usual annual supplies to Peking, got a monthly grant from the said Bureau of 10,000 strings of copper cash (one "string" of cash equals 1,000). This cash memorialist turned into silver sycee at market rates. In August 1896 memorialist was able to send under charge of trustworthy deputies to Peking 300 pieces of silks, satins and gauzes, for the special use of Their Imperial Majesties the Emperor and Empress and Empress Dowager; 100 pieces of the same stuff for use of Court officials; 764 pieces of silks, pongees and raw silk for the use of the inmates of the Palace; 200 catties weight of silk thread and floss for stitching the clothes of the same; 1,000

pieces of fine cotton cloth for the Imperial Households of their Imperial Majesties and 1,000 pieces of satins, satinets, pongees and raw silks for storage in the godowns of the Board of Revenue, for government gifts, etc. The above have already been delivered at their destinations and the fact has also been recorded. After employing the necessary artisans and weavers at the looms, memorialist was able to send a similar quantity of silks, satinets, pongees, etc., like those mentioned above to Peking, the bearers of the stuffs having started overland from Hangchow in the month of December last with instructions to deliver the goods as usual to the officers of the Imperial Household department and the Board of Revenue. The total sent by the Hangchow looms, including both times, aggregated 4,550 pieces of silks, satins, etc., 400 catties weight of silk thread and floss and 2,000 pieces of cotton cloths. A detailed account of expenditures in regard to the same will be sent in another memorial.

The Emperor of China is evidently uneasy about his army. In a recent Decree His Majesty says:—

We annually expend immense quantities of treasure on our troops because by their means we have to prepare to prevent aggression and encroachments from without. Of late years our Viceroy and Governors have been in the habit of looking upon this duty of inspection as so much writing on paper. Hence the army has fallen day by day into worse plight, neglect, and inefficiency. This is in truth failing in their duty to us and the confidence we have reposed in them. We would therefore, once more, exhort the Viceroy and Governors to be more alive to their duties and use every care in examining the troops under them, and to denounce truthfully to us the officers of regiments which have proved themselves to be incapable, weak, old or ill disciplined. No leniency must be allowed.

MARQUIS ITO ON JAPAN'S LOANS.

Marquis Ito in a recent speech, remarked:— It is hardly necessary for me to observe that the finances of Japan before the Restoration were not properly adjusted. Turning to the beginning of the *Meiji* era, I find many interesting things to dilate upon in respect to the financial condition of that time. When, in the 3rd year of *Meiji*, Count Okuma replaced Mr. Yuri Kosei in the Finance Department, the foreign representatives, finding that the currency of the day was burdened with a good deal of debased coin, asked the Government to take some remedial measures. Neither I nor Count Okuma knew the quantity of gold or silver contained in the debased coins, or how they were to be classified. The treaty provided that one hundred dollars of foreign coin should be exchanged for three hundred and eleven pieces of silver *bu*. Strong representations were constantly made to me that the quality of the white metal in pieces of that denomination had depreciated to a serious extent. I could make no reply, and endeavoured to get the silver analysed by officers of the mint, but without success. I eventually resolved upon undertaking decisive negotiations on the subject with the foreign representatives. Count Okuma and I repaired to the Takanawa Legation, where we met Sir Harry Parkes, who, producing two gold *bu* from his pocket, requested me to determine which was genuine and which counterfeit. Neither of us could answer. Then Sir Harry said:—"If you officials of the Japanese Government cannot determine the quality of the coins, we foreigners of course are unable to tell anything about it. You have therefore either to exchange them for legitimate coins on your own responsibility or allow them to circulate as legal currency." These remarks necessitated the speedy adoption of measures for perfecting the exchange of the debased for genuine coins. Inconvertible paper, having already been issued to the amount of five million *ryo*, further recourse to it was not possible, and I was obliged to adopt the plan of making compulsory loans to feudal lords, in new paper, so that they might take it to their respective fiefs, giving cash in exchange. To my great surprise the feudal chiefs exchanged the paper loans so issued in Tokyo and Osaka. Volumes of paper poured into those two cities, while specie was taken into the pro-

vinces. The financial embarrassment became most serious and we could see no remedy for it. Yet it was impossible to leave the matter to adjust itself. I therefore gave instructions to the officials of Tokyo *Fu* to borrow the sum of fifty million *ryos* from a merchant for three months. This amount was distributed among the *Daimios*. The foreign Ministers were still continually making representations about the matter, and I was frequently questioned as to whether I would be able to exchange such an enormous amount of debased coin for genuine tokens. Knowing that any delay on the part of the Government might lead to even greater difficulties in adjusting the State finances, I replied to Sir Harry Parkes, von Brandt, and other foreign Ministers then in Japan, that I would exchange the coins within two days. On the day appointed I called more than one hundred clerks of the Exchange Office, and despatched them to Yokohama to take practical steps to effect the exchange. The amount thus exchanged, however, during three days did not exceed three hundred and sixty thousand *ryos*, and the coins presented for exchange in Hakodate, Niigata, Kobe, and Nagasaki amounted altogether to no more than sixty thousand *ryos*. In regard to the money obtained from the *Daimios*, counterfeit coins were rejected, and satisfactory results being obtained, we evaded the difficulty. So far as the actual condition of affairs was concerned, the financial administration was based, not on national resources, but upon taxation necessitated by the requirements of the State. No national loans could be tolerated at that time. The idea of public loans was first realized when the abolition of the clan system came about, the *Daimios* being then obliged to run into debt owing to the change of administration. Still we knew nothing of foreign loans. In the 3rd year of *Meiji*, (1870), on the persuasion of Sir Harry Parkes, a foreign loan was raised to the amount of one million pounds, viz., five million *yen*, with a view to appropriate the same to the construction of a railway. The railway question evoked much criticism, but was eventually put into practice. In the 5th year of *Meiji*, a sum of two million pounds was borrowed from Europe. This is known as the second foreign loan. Steps were then taken to collect taxes in gold, and the pensions of the *Shiaku* were designated *kin-rokukosai* (gold pension bonds). Thus the problem of public loans first began to ring in the ears of the people at large. The grand principle adopted by Japan in olden times was that of seclusion, and the progress attained by her is not therefore attributable to the introduction of foreign capital. The foreign trade of Japan in imports and exports, in the 4th or 5th year of *Meiji*, did not, as Count Okuma recently said, exceed thirty million *yen* in value, but it is wonderful that the amount increased to sixty-five or sixty-six million in the 18th year, and finally to two hundred and thirty millions in the 27th year (1894). While popular enterprises have attained such an extraordinary development, no foreign capital had ever been introduced—a fact which has no parallel in the history of nations. The events of the 27th and 28th years of *Meiji* necessitated the adoption by Government of drastic measures for various undertakings in co-operation with the people; who were no less zealous in schemes of general improvement. The present prosperity of the country is virtually the result of the zealous co-operation of both Government and people. Not only is the expansion of the Government's estimates a source of surprise, but the extension noticeable in the enterprises of the people is a phenomenon that strikes one very forcibly. Yet it seems necessary for economic circles to be very cautious at this juncture, lest they be assailed by panic hereafter. Panic must indeed be expected and it behoves us to prepare defensive schemes against it. Any relaxation of precautionary measures will certainly bring about disaster, just as huge embankments are easily destroyed by ants making little holes in them. If this should happen, hundreds of Count Okumas or Count Inouyes would be of no avail to prevent the inevitable catastrophe. From a financial point of view I may be allowed

to assert that, what is most needed at present by the economic societies of the country are statistics. Nothing is more indispensable than to ascertain the progress, by statistics, of the nation in general. It is with regret that I find no statistical reports existing at present to show the general features of various organizations of the State. Investigations by economic communities in this respect are absolutely essential. In support of my views I may quote a few remarks with regard to Italy and Spain. The former possesses a revenue of sixty-eight million pounds. It is estimated that each Italian holds property valued at seventy pounds and possesses fifteen pounds invested in the national debt. As for the latter country, it may be seen that despite its population of seventeen millions and a revenue of thirty-four or thirty-five million pounds, it has a national debt amounting to three hundred million pounds. Half the revenue therefore has to be paid out in interest on loans. The financial embarrassment of those two countries can easily be imagined. Of course it is undeniable that if the people of any country are rich, the revenue of the Government can easily be collected. But defective as our statistics are, it is possible to say with certainty that our country is not even worthy to be compared with the two countries above mentioned. That is the most important point to which we must direct our attention in view of the expansion of everything. The question of introducing foreign capital requires investigation by Japanese economists. As for me, I do not insist that to obtain a loan from a foreign country is unprofitable to the State. But the State must make due provision to meet the responsibility thus incurred. Further work of investigation thus devolves upon the economists. If, on the enforcement of the revised treaties, transactions in the nature of individual enterprises are entered into with foreigners, the relations involving both parties may be purely private and not national, and there is nothing to be feared in the matter, as no obligation rests with the State. But so far as the national debt is concerned, it is not only necessary to scrutinize statistics, but also to claim the attention of the public at large. Last of all, I may add, especial discretion must be exercised in regard to a foreign loan. That is all the more true with regard to a country whose organization is unique in the world,—a country that has effected extraordinary progress without the introduction, so far, of foreign capital.

JAPANESE MATCHES.

Hongkong, Shanghai, and Tientsin have been the chief markets for the export of matches from Osaka and Kobe. Despite the depression of trade last year, the matches exported from the latter port amounted to 464,700 boxes. The economic activity of those markets having revived this year, there has been a constant tendency towards an increase in the export of the commodity. The export in January was 16,497 boxes; in February 21,600 boxes; in March 31,770 boxes; and in April 34,616 boxes, thus showing an increase of 1,220 boxes in January, 1,446 boxes in February, 2,032 boxes in March, and 1,845 boxes in April, as compared with the corresponding periods of last year. The value of matches, however, has not risen in proportion, in spite of the increase of wages and in prices of materials. Safety matches of all kinds are now quoted at only one *yen* higher than the former rate. A box of best quality matches containing 600 dozen, costs 16 *yen* 50 *sen*, and a box of sulphur matches, 14 *yen* 50 *sen*. Sulphur matches with shorter sticks, comprising 1,200 dozen, are sold for 22 *yen* 30 *sen*, while *kobos* fetch 24 *yen* 30 *sen*. No great disparity is noticeable in the prices as compared with the quotations of last year. This is simply owing to the fact that along with the mania for new enterprises, competition was resorted to in the match industry, without regard to future demands, and manufacturers are reported to have sustained heavy losses. The above remarks are taken from the *Osaka Asahi Shimbun*.

COUNT ITAGAKI ON THE CABINET.

At a meeting of the Liberal Party held in Kyoto on the 5th instant, Count Itagaki delivered the following speech:—As I am not now President of the Liberal Party, I make no pretence to represent the views advocated by head-quarters. But I may take the liberty of expressing my opinions upon the spirit and principles that should animate the Party. As regards our feeling towards the Matsukata Cabinet, I intend to speak more in detail at Osaka, but it may be worth while to make a few general remarks on the point at the present moment. Observation shows us that the proceedings of the present Cabinet are unconstitutional, and thus furnish us with materials for an attack. It is generally said that great personages or men of extreme loyalty, are produced exclusively in Satsuma. Nothing can be more fallacious than such an assumption. Ideas calculated to promote national prosperity or the welfare of the Crown do not emanate solely from the brains of Satsuma people. The chief aim of Satsuma statesmen is to secure immediate profit. This fact can be substantiated by reference to their action at the time of the expedition against Choshu, prior to the Restoration, when Choshu alone stood firm in support of the Imperial cause. About the 6th year of *Meiji*, I happened to hold council with the late Marquis Kido at my former lord's mansion, in regard to the presentation to the Authorities of a memorial for the organization of a representative system of government. I fully agreed with the Marquis's ideas on the subject, but the memorial having prematurely appeared in a newspaper, the feelings of that great statesman were wounded. Yet that conference must be regarded as the germ of Constitutional Government in our country. Coming to more recent years, I may state that, owing to Count Inouye's influence, I was admitted to the Cabinet in the 8th year of *Meiji*. Marquis Ito, who bears the relation of a disciple to Marquis Kido, took steps to draft a Constitution in his official capacity, while I, as a private individual, directed my efforts towards establishing a constitutional form of Government. Such was the nature of our co-operation, and it can be traced from a very early date. Statesmen must select for their political friends, whether in Government or among the people, those who will always direct their attention to fundamental schemes for the benefit of the State. The Liberal Party, in accordance with the principles of justice, has propagated ideas of equality and love, and it is necessary that its advocates should always be furnished with well-tryed instruments with which to repel its enemies. The so-called instruments of civilization are eloquence in speech and writing. I have to admit with great regret that persons endowed with these essentials have recently decreased considerably in our Party. It is further a most deplorable fact that our Party is not altogether free from treacherous members. Nor is it improbable that we have grown infirm with age, and it is absolutely necessary for us to encourage the younger men in the provinces, so as to introduce new elements into the *Yifu-to*. The present Cabinet had already exhausted its schemes of administration, and was compelled to resort to the last and meanest policy of "purchasing members of parliament," although the electors themselves can by no means escape the charge of having singled out representatives capable of being purchased by the Government. A fact that has presented itself painfully to my mind since arriving in Kyoto is the corruption of eminent personages who were full of spirit at the time of the Restoration, but now appear to love nothing but money. Bribery prevails in public now-a-days. Loans were exacted from Yamashiroya Wasuke and Mitani Sankuro. The former in consequence killed himself by disembowelment; the latter became bankrupt. These shameful stories taint the praiseworthy record of the abolition of clans and the establishment of prefectures. The foreign tour of the late Prince Iwakura was a source of disappointment to me, and before he returned clamours were raised for

the Korean expedition and for the expansion of popular rights. Then the South-western insurrection sprang up, and gave an impetus to the people to labour towards their present prosperity. Even some of the persons who approved of my resignation of the post of Home Minister have deviated from the principles of morality, a fact which illustrates the frailty of human nature. The discomfiture our Party suffered in the last session of the Diet is in no way to be regarded with shame, inasmuch as we were not defeated politically by the Government, but by its pecuniary machinations.

THE "MAINICHI" ON CURRENCY.

The *Mainichi Shimbun* publishes the following article under the heading "Depreciation of Silver and enforcement of the Coinage Law":—Article XVI. of the Coinage Law provides that the *yen* silver shall be circulated as legal tender without limit of time and at the rate of one *yen* gold, until the old coins are exchanged for new. Thus the successful enforcement of the new Coinage system will depend largely on the relative values of gold and silver. If the ratio between the two metals remains at 1 to 32, as determined by the Coinage Law, the Government may not only be saved from any loss in the process of exchange, but may expect to obtain brilliant results by the enforcement of the Law. The depreciation of silver, however, has suddenly recommended, and the relative values of the two metals are now 1 to 34. The old gold coins of our country are quoted at 204 *yen*, and we cannot predict the value which the yellow metal will stand at on the enforcement of the Coinage Law in October this year. If the present conditions continue, the matter will constitute a problem to which we ought to direct our utmost attention. Should the relative values of gold and silver be 1 to 34, and the market price of gold 204 *yen*, it is obvious that the public will be inclined to exchange their silver for gold—for instance, two hundred *yen* in silver for an equal amount of new gold coins (one hundred *yen* of the old gold coins being valued at 204 *yen*). Although it is impossible to know the exact amount of silver likely to be presented for exchange, yet investigations completed on the 1st instant show that the currency in the interior available for exchange is as follows:—

(1) One <i>yen</i> silver and trade dollars...	31,602,359
(2) Convertible notes	180,626,193
(3) Government paper	9,045,082
(4) Bank notes	13,610,995
Total	234,884,629

From the point of view of financial convenience, it can scarcely be supposed that such an enormous amount of currency should be presented for exchange, and it will be seen that the maximum to which the people may claim against the Government for conversion of the currency into gold coin cannot be more than two hundred and thirty-five million *yen*. Will the Government sustain any loss in the exchange? Supposing there may be some loss, what will be the approximate amount? It must be remarked that as the Government has to give for every 200 silver *yen* 200 *yen* in new gold which has a silver value of 204 *yen*, the loss on every hundred *yen* of silver being two *yen*, the total loss on 235,000,000 *yen*, the estimated amount for exchange, will be 4,700,000 *yen*. Moreover, it is necessary for the Government to provide a gold reserve of two hundred millions prior to the enforcement of the Coinage Law. We believe that the authorities have made provision against all these contingencies.

During the month of April, the Kanagawa Kencho issued 265 passports to 319 foreigners who were desirous of travelling in the interior. Classified according to nationality they were 143 British, 55 Americans, 43 Germans, 20 Dutchmen, 18 French, 12 Russians, 10 Swiss, etc.—*Nichi Nichi Shimbun*.

"JAPANESE SELF-TAUGHT."

"*Japanese Self-taught*, being a collection of colloquial phrases and extensive vocabularies in English-Japanese intended as a *Vade-Mecum* for commercial and General Use, by the Author of 'Kelly and Walsh's Hand-book of the Japanese Language.'—Kelly and Walsh, Limited, Yokohama, Shanghai, Hongkong, Singapore. Price, 4s. 6d.

We owe this book to the enterprise of Messrs. Kelly and Walsh. The author is anonymous. He was commissioned to compile "a practical and helpful book on the Japanese language," and he has executed the commission so well that it seems a pity he should have denied himself credit by hiding his name. The plan of the work is simple. In the first place, we have rules for pronunciation; in the second, a large number of phrases chosen with practical skill; in the third, various vocabularies; in the fourth, tables of weights and measures; and in the fifth, paradigms of verbs, adverbs, pronouns and other parts of speech.

The rules of pronunciation are not always in accord with our preconceived ideas. It is true that ears differ almost as radically as tastes. We recall a case of three sinologues disputing about the sound of a Japanese word. Unable to agree, they wrote down the ideographs representing it and summoned a Japanese savant to read them. The result was that all three found equal confirmation of their several contentions in the savant's rendering of the sound. But we doubt whether the personal equation's admissible limits can be stretched far enough to reach the rules now before us. The learner is told, for example, to pronounce *gi* like "ghee," or like the "gi" in "gimlet." Are such directions consistent? Does "ghee" represent the sound of "gi" in "gimlet." Again, the sound of *gyū* is rendered by "be-yew-oo;" that of *gyū* by "ghee-yew-oo;" that of *guwa* by "goo-wah;" and that of *nas* by "nah-aye." It would be an interesting experiment to try whether the original words in these cases would be identified by a Japanese from an accurate rendering of the transliterated sounds. We do not think that they would.

There are 58 pages of phrases—503 phrases. Among the whole number it may safely be said, we think, that not a single useless phrase occurs. That is a conspicuous merit of the work; the wise care exercised in the selection of examples. Having acquired these 503 sentences, a learner would have travelled far towards the bourne of speaking Japanese. Of course there is room for criticism. No two compilers of examples for purposes of instruction would be likely to fully endorse each other's selections. But, on the whole, we think that the author has done excellently well. If there be any warrantable objection, it is that his polite renderings are not always sufficiently polite. He gives two forms of each phrase; the vulgar colloquial and the polished social—an order which might, perhaps, have been advantageously reversed—and he adds a literal translation for the purpose of indicating the spirit of the language's construction. His vulgar colloquial forms are admirably idiomatic and accurate, but his refined renderings do not reach the same standard. Omission of the honorific *go* is a marked defect. A Japanese does not say *anata no iken wo ukagaito gosaimasu*; in such a case *go-iken* is essential. Nor is it really polite to say "*dotchi ni shite mo onaji wake de gosaimasu*" in society the expression would be *idsure ni itashite mo*. Here, again, is a so-called "polite" form of address which in reality borders on the rude:—*sonnani hayaku itte wa ikemasenu*. There are many instances of this insufficient polish:—e.g. *Anata wa toshi hodo ni wa miyemasen*; *Olema wa torasemasenu*; *Isso ni itadakimasho*, etc. In a few, very few, instances we find what seem to be misconceptions. *Are wa roku-jiu datta'ke* is translated "he may be sixty years old." Surely that is not the English equivalent of the Japanese idiom? *Roku-jiu datta'ke* means "sixty he was said to be, I think;" or "it was sixty I heard he was, I think." Then again, does a Japanese ever say, *Itte to wo akete kudasai*? It is one of the essential peculiarities of the Japanese language that the order of the verbs is always reversed in such expressions as "go and take," and "go

and look," etc. A Japanese would say, *to wo akete kite kudasai*, just as he says *mite kite kure*, and *molte itte kurenaike*. While these criticisms suggest themselves, however, and can not justly be omitted, we are frankly persuaded that the vast majority of the phrases deserve all commendation, and that they will prove a most serviceable equipment for any student in daily intercourse with the Japanese.

The most praiseworthy part of the volume, in our opinion, is that containing the vocabularies. There the student will find a host of words needed constantly for the every-day purposes of business or conversation, yet not easily discoverable in the pages of any English-Japanese dictionary hitherto published. This section of the work stands on a very high level. The only regrettable feature is that the words are divided into groups instead of being collected into one alphabetical index. The former method has, indeed, some academical advantages, but the latter is incomparably superior from the point of view of convenience. It is not practical that before proceeding to look up a word one should have to reflect whether it belongs to the category of "principal maladies," or "properties of the human body," or "commerce," or what not. On the other hand, if a student desires to study the terms appertaining to any special subject, this book will be invaluable. On the whole, therefore, we welcome it as a most substantial aid to the acquisition of one of the most difficult languages in the world.

MODERN HISTORY.

The *San Francisco Chronicle* of a recent date contains the following paragraph:—

Captain James, better known in Japan as Admiral James, sails for his home in the realm of the Mikado this morning. He has been on an extended visit to England for the purpose of negotiating for the construction of warships for Japan, and also to make arrangements for transferring so much of the trade of the Land of the Sun-flower as possible to Great Britain.

Captain James once held a commission in the British navy, and years ago went out to Japan to teach her sailors seamanship, gunnery and other arts of modern warfare. For years he has taught Japan's infant navy the science of gunnery, he holding the rank and pay of Admiral. He also took out from England to Japan a number of war vessels, including the cruiser *Naniwa*, sister-ship of the *Charleston*.

After the Japanese navy had secured an educated staff of officers for itself the foreign officers or instructors were dismissed, the Japanese Government being desirous of showing the world that it could run its own navy. Admiral James was retired on a pension, which he still enjoys. Becoming weary of idleness, he applied for the agency of some large shipbuilding firms in England, and was instrumental in selling several vessels, war, ships both old and new, to the Japanese Government, to his own financial advantage.

Admiral James is averse to being interviewed, and particularly as to the object of his secret mission to England.

"I do not mind saying, however," he explained, "that my trip has something to do with naval affairs—shipbuilding, in fact—but as nothing has been settled yet, it would be very premature to discuss it. You people here seem to want a monopoly of the Japanese trade. You can't have it; that is all."

Admiral James was given a farewell dinner last evening by Dr. H. G. Richards, whose guest he has been while in this city.

Amid a deal of pure romance—especially with regard to Captain James' connection with the British Navy—this paragraph contains one admirably faithful touch. "You people here seem to want a monopoly of the Japanese trade. You can't have it: that is all." There is a genuine Shinagawa stridency about that statement. We recognise it.

The Japanese wine bearing the trade mark of a bee, and generally known as *Kozanbudo-shu*, for which Mr. Kondo Rihei, Honcho, Nihonbashi, Tokyo, is the agent, has received gold medals at the International Sanitary Exhibition in London and the International Sanitary Competitive Exhibition in Paris.—*Hochi Shimbun*.

THE UNITED STATES BI-METALLIC COMMISSION.

PRESIDENT MCKINLEY has lost no time in meeting the obligation imposed by the bi-metallic "plank" of the platform upon which he was nominated. The resolution adopted by the Republican convention, and endorsed by the party and its candidate, was in the following words:—"We are opposed to the free coinage of silver except by international agreement with the leading nations of the world, which we pledge ourselves to promote." In fulfilment of this promise, the President has appointed a monetary commission, which will start for Europe this month, to investigate the prospects of bi-metallism, and to take such action as may, if possible, lead to a final settlement of the silver question by the Powers of Europe and America. The chief of the commission is Senator WOLCOTT, of Colorado, who will be assisted by ex-Vice-President STEVENSON, and General PAINE of Massachusetts. Mr. WOLCOTT is a native of Massachusetts, in which State he resided until 1871. Then, at the age of twenty-three, he removed to Colorado, where he acquired great wealth and political distinction. He has always been a Republican, and adhered to that party in the recent campaign, notwithstanding his faith in the silver theory of the Democrats. The State which he represented in the Senate was strongly in favour of free silver, but he believed that the main purpose in view might be carried out more surely, if slowly, by the universal adoption of bimetallism. A doubt as to his ability to serve in the commission has been raised in consequence of a constitutional provision forbidding any Senator to occupy a civil office created during his congressional term. If this rule is strictly enforced, Mr. WOLCOTT may be disqualified; but he does not himself appear to apprehend any difficulty, and speaks with confidence of his speedy departure. To the inquiry of a newspaper correspondent respecting the plans of the commission he has answered thus:—

"Our errand is entirely of a diplomatic character, and our object will be to endeavour by diplomatic means to induce the countries of Europe to enter with the United States into an agreement in support of international bimetallism. The date of our departure is not yet determined. We will not start, however, until after the United States Ambassadors to the three interested countries—England, France, and Germany—have reached their posts and are ready to lend us their assistance."

The second member of the commission, Mr. STEVENSON, of Illinois, was Vice-President of the United States in Mr. CLEVELAND's last administration. He was one of the most vehement supporters of Mr. BRYAN, in the late contest, and

in several public speeches followed the Democratic candidate's lead in denouncing the idea of consulting foreign countries on the subject of American finance. His objections usually took this interrogative form:—"Why even the suggestion of an international agreement? Why humble ourselves at the feet of England, that she may consent to something that will not redound to our benefit?" Mr. STEVENSON's consent to act in conjunction with Senator WOLCOTT indicates either that his expressions of disbelief were for campaign purposes only, or that his views have been modified by reflection. What his present expectations are, may be judged from the following statement made by him to an Illinois journalist, after receiving the news of his appointment:—

"I am a bimetallist. I regard the restoration of silver to its proper money function as the supreme question in our country and throughout the world. In this country the increase in the volume of business is beyond computation. In the light of this fact the rehabilitation of silver is a prime necessity. Should its demonetization become the settled policy, the evil days upon which we have fallen but dimly foreshadow consequences yet to come. Whatever our views may be as to the ability of our Government to maintain the unlimited coinage of silver without the co-operation of the leading countries of Europe, it may be safely assumed that every friend of silver in our country will welcome international bimetallism. As to the impossibility of success of this commission, it is known that the trend of public sentiment in European countries as well as our own is undoubtedly favourable to bimetallism."

General PAINE is a lawyer and millionaire of Boston, better known to the public as an ardent amateur sailor and as the builder of the *Puritan*, the *Mayflower* and the *Volunteer* than as a politician or financier. He won great popularity by thrice successfully opposing the endeavours of British yachtsmen to regain the *America* Cup. Until the recent national election he was connected with the Democratic Party, but finding it impossible to adopt Mr. BRYAN's extreme principles, he joined the Republicans on this occasion, and voted for Mr. MCKINLEY. He has long been an advocate of universal bimetallism, and has declared his conviction that "the day is not far distant when the necessities of commerce will compel an international use of silver as well as of gold in the currencies throughout the world."

It cannot be said that the appointment of the commission awakens much enthusiasm. The prevailing impression, on the contrary, appears to be that it is doomed to failure. The gentlemen selected by the President are cordially commended on all sides, but no practical result is expected from their labours, except by a few, who welcome the creation of a "nucleus around

which the bi-metallic sentiment of the world can unite and grow." The silver doctrinaires of the United States are of opinion that the newly-formed body is powerless to take a single effective step. MR. BLAND, the father of the silver movement, thus delivers himself:—"It will amount to absolutely nothing. It is merely a device to amuse the people. The *personnel* of the commission is admirable. In fact, it is entirely too good for this exhibition of impotency." MR. BAILEY, the Democratic leader in the House of Representatives, says:—"There can be no fair criticism against the *personnel* of the commission. But I have no expectation that it can accomplish anything." In England, the tone of comment is even more skeptical. *The Times*, as might, indeed, have been anticipated, admits no possibility of immediate solution of the difficult problem. Its estimate of the commission and its prospects was thus pronounced in an article published on April 13th:—

We believe that all the indications in Europe and the Far East point to the failure of such an undertaking. It is improbable that all the enthusiasm of Senator Wolcott, conjoined with the business abilities of Mr. Paine, and the Democratic silver sympathies of ex-Vice-President Stevenson, will bring about the conference desired by President McKinley. It is still more improbable that the commission will effect anything without a conference. Separate agreements with the United States are out of the question when the nations of Europe do not wish to agree among themselves in favour of bimetallism. The commission will have a good time and will be received everywhere with courtesy. President McKinley will be able to point to its labours as redeeming his election promises, and to their failure as showing that if America wants free silver she must procure it for herself at her own risk. The sooner these points are made clear the sooner may we expect American business to assume a more healthy appearance. It may, therefore, be hoped that this roving commission will not unduly protract its interesting but futile experiments upon the stability of the financial convictions now governing European policy.

THE EUROPEAN SITUATION.

THE telegram from Paris, published in this issue, indicates a strong probability of the speedy restoration of peace in Europe. Greece has been thoroughly beaten, as was inevitable unless some other Power came to her assistance, and since the Great States have been postponing intervention only until she made act of submission by soliciting their services, they will doubtless now step into the breach with alacrity. Germany alone appears to be holding back. Her policy, or rather her EMPEROR's policy, seems to have been consistently actuated by a desire to avert all disaster from Turkey; which is only another way of saying that her unique aim has been to prevent a general war. There is not a particle of silly sentiment about Germany. Her charity begins at home, and ends there, for the matter of that. The sound bones of a Pomeranian grenadier are worth more in her eyes than a hecatomb of Greeks, for all the shades of *Ida* or the songs of *SAPPHO*. She has had from the first a clear perception of the fact that the one really

serious peril of the situation was disaster to Turkey. It is over the revisionary interest in the Sick Man's estate that Europe will inevitably fall out, and Germany has shown an iron resolve to postpone the catastrophe. For that reason she would have taken Greece by the throat to hold the truculent little blusterer from flying at Turkey; for that reason she desired, when the fight had irrevocably commenced, to check any interference in Greece's favour; and for that reason she is now reluctant to save the aggressor from the bitterness of drinking the cup of defeat to the dregs. The KAISER does not want to be again confronted by these terrible risks. He appreciates the enormous sacrifices that Europe has made since 1871 to preserve peace by warlike preparations so stupendous as to render the thought of war intolerable, and it must seem in his eyes wretchedly farcical that a fragment of an effete nation like Greece should be suffered for an instant to hold the match near the European magazine. It is impossible for sober-minded folks not to sympathise with such a policy. Those that know the modern Greek know him to have no more claim to civilized consideration than the Turk has. In truth, they hold the Turk the higher of the two. If the Asiatic element is to be eliminated from Europe, the last nation worthy to be entrusted with the task is the Grecian nation. It may give us a pleasant warmth up the small of our backs, such as Captain CUTTLE'S way of putting things gave Mr. TOOTS, to see old England still brimful of the sentimental impulses that have always made her back the little man, and to note that the fresh romance of perennial youth is still with her. Sitting securely behind the silver streak, she can afford to indulge these delightful feelings. But Germany is painfully near the magazine. The effects of its explosion would reach her first. If she has been unrelenting, it is because her circumstances lend terrible vividness to the perils of the situation. Unfortunately that aspect of the case is not likely to strike the average Britisher. For him the resultant of the diplomatic and international forces that have been at work for the past two months will be a vague consciousness that Germany and England are driven still farther apart; that in a European crisis they have been found with different sympathies. Yet Germany's action has been prudent and logical. People say that she and Russia encouraged Turkey to declare war. What if they did? If Greece declined to be content with fair concessions, and declined to listen to the counsels of Europe, what remained but to beat her into a reasonable frame of mind, and with what instrument other than Turkey was the beating to be administered?

The Emperor WILLIAM presents himself to us just now in the light of a wise, strong man, who has not suffered his duty

to his country—and to the world, for the matter of that—to be weakened by any intrinsically valueless sentiment. Greece has sinned egregiously against Europe, and the interests of Europe demand that she should receive such a punishment as shall deter her from repeating the offence. If Russia had not succeeded in keeping the Balkan States quiet, the Occident might now be ringing with the din of war, and that success would scarcely have been possible for Russia had not Germany's cold, unflinching resolve created a situation from which neither the Balkan States nor any coadjutor of Greece could hope to derive advantage. That will be history's verdict, we are persuaded, and it is much to be desired that, in our own generation, we should endeavour to emulate the calm impartiality of the historian.

THE WELCOME SOCIETY OF JAPAN (KIHIN-KAI).

WE doubt whether it ever before happened that a society organized for such useful and unselfish purposes as the *Kihin-kai*, attracted so little public attention and obtained so little support. Just four years ago, the idea of forming a society of the kind received practical application. Already it had been pretty generally recognised that Japan was destined to be a permanent attraction to tourists, and that the tide of travellers setting annually eastward would prove a veritable river of Pictolus. Somebody calculated that, on the average, every visitor from the West spent a thousand *yen* in Japan, and from that point of view four or five thousand arrivals meant four or five million *yen* brought within reach of Japanese bread-earners. Probably the estimate was considerably below the mark, but it seemed good enough, as it stood. Analysing the inducements that the country offers to tourists, it is easy to see two principal reasons, scenery—in which are included climate and general novelty—and art products. The former is always there. By and by, indeed, when the factory chimney obtrudes its ugly presence with greater insistence among the cherry blooms and pine billows that constitute as conspicuous a feature in Japanese towns as does the church spire or the cathedral dome in European, and when the exquisite opalescence of atmosphere that we have all loved so dearly and appreciated so little, is degraded into a canopy of smuts and murky fog, the searcher for scenery will turn his feet elsewhere. But even then there will remain the things of beauty that the Japanese art artisan produced in the past and is producing in the present with greater industry and success than ever. To preserve that particular realm against vitiating influences, while, at the same time, bringing all possible facilities within the tourists' reach, were the main pur-

poses contemplated by the Welcome Society. Its founders had no axe of any sort to grind. They simply wanted to widen and deepen the channel of the golden stream flowing to the shores of Japan, and they put their hands pretty liberally into their pockets for that end, knowing that no mechanism can be contrived and worked without "the eternal agent." But all that, we can imagine the reader saying, is vague. What could a society of amateurs hope to effect in the way of preserving the realm of art in Japan against vitiating influences? Simply this, it could save the tourist from being ruthlessly deceived and exploited to the extent of making him eschew Japanese works of art altogether. The promoters of the Society saw that dealers and guides had established a connexion against which strangers were powerless. Each played into the other's hands; the dealer paying the guide handsomely to bring the victim to the slaughter; the guide taking care that custom should be turned from the portals of any dealer not a party to the arrangement. Of course something of that is inevitable in all countries. The mouth of the ox is not muzzled anywhere. But in Japan the abuse is flagrant because the opportunity is greater. Columns might be written descriptive of the wiles employed in this sunny land to send the buyer on his way foolishly rejoicing, and perhaps, after all, no great harm is done, for, in ninety-nine cases out of every hundred, the buyer continues to rejoice: his eyes are never opened to the chicanery practised against him. But the founders of the *Kihin-Kai* wanted to do something by way of clearing the air, and transforming the guide into a genuine guardian of the tourist's interests. They have encountered immense difficulties, and we can not honestly say that any large measure of success has yet attended their efforts. But they have not been deterred, and since their industry is untiring and their aim excellent, we have faith that they will achieve their purpose, and we gladly afford them some little aid by giving publicity to their latest departure, which is the compilation of a very beautiful tourists' map of Japan. Recourse has been had to every trustworthy source of information in preparing this map, and heavy expense has been incurred, some part of which will doubtless be recouped by the sale of advertising space, for the map—which measures 35 inches by 23—is folded into a handy little volume, and its back thus becomes divided into 27 pages available for advertisements. The lithographers have not yet finished their work, but from the portion already completed we are able to infer that the map will be the best thing of its kind hitherto published in Japan. It shows not only all the places of interest and the routes for reaching them, but also the steamship services, whether in home waters or abroad, and the railways in course of construction. On the margin at

the bottom of the sheet the following is to be published:—

It has been recognised by Japanese and foreigners alike that difficulties of a very exceptional kind stand in the way of the mutual understanding essential to sincere friendship between the Far East and the West. With the hope of removing, or, at any rate, diminishing these difficulties, a Society was formed in 1893 by the initiative of a number of Japanese noblemen and gentlemen, assisted by several influential foreign residents. It was called the *Kihin Kai*, and its objects were to extend a welcome to foreign tourists and to render them every assistance during their stay in Japan. Maintained altogether by the voluntary contributions of its members and well-wishers, the *Kihin Kai* has no selfish end of its own to serve. It aims uniquely at bringing within the tourists' reach means of accurately observing the features of the country and the characteristics of the people; visiting public buildings and places famous for scenic beauties; seeing objects of art, both ancient and modern; entering into social or commercial relations with the people; in short, affording them all facility and convenience toward the accomplishment of their several aims, thus indirectly promoting, in however small a degree, the cause of international intercourse and trade.

2. Supervision of Guides.—Arrangements have been made with the guilds of licensed Guides, and the Society has them under its control. If a tourist applies to the Society, it will gladly secure for him the services of a trustworthy guide at a fixed rate of remuneration.

2 Facilities and Convenience of Travel.—If a tourist places himself in communication with the Society, the latter will spare no pains to supply full information with regard to any route that he contemplates taking; furnishing details as to distances, the character of hotels and restaurants, (to which letters will be given, if desired), and other matters of interest or convenience; and will adopt every available means of adding to the security and comfort of his journey. Guide-books, volumes containing information about the country, catalogues of works on Japan, lists of Japanese productions, advertisements relating to facilities of travel et cetera, are kept in the Society's library, to which the tourist can have access at all times.

3. Sight-seeing.—In addition to places and buildings open to the general public, there are others to which the tourist can obtain admittance if introduced by the Society, special privileges being accorded to the Society in that respect. Among such places are: The Imperial Botanical Gardens at Shinjuku; the *Koraku-en*, a spacious landscape-garden formerly belonging to the Prince of Mito, within the precincts of the Tokyo Military Arsenal; the Imperial Diet; the Court of Cassation; the Court of Appeal; the Prisons; the Hospitals; the Governmental and other Schools and Universities; the principal Factories; the Castle of Osaka; the Imperial Mint; the Fencing Saloons, &c., &c.

4. Introductions to Manufacturers and Merchants.—If a tourist, desiring to buy, or make contracts for, Japanese articles modern or antique, wishes to know the best places to procure them, the Society will direct him to manufacturers and dealers whom it judges trustworthy, and, if requested, will furnish written introductions.

5. Introductions to Japanese Nobles and Gentlemen.—According to the rank or personal record of a tourist, the Society will introduce him, at his request, to any Japanese nobleman or gentleman, if the circumstances seem to warrant such introduction.

6. In the case of a distinguished tourist, the Society may make arrangements, at its own cost, to entertain him, so that its members and friends may make his acquaintance.

Japan abounds in scenic beauties; its climate is temperate, and each season of the year has special charms. But the best time to visit the country is spring or autumn.

Here and there in almost every province are mineral springs, hot or cold, all having hygienic or medical efficacy of some kind; and in their vicinity are to be found hotels providing every convenience for bathing. The tourist can select any spring that suits his case, and stay there for health purposes.

In all the large cities hotels have been built and are kept in European style, with foreign beds, furniture, meals, drinks, etc. Even in places without hotels in foreign style, there are Japanese inns, clean and comfortable. The tourist need not anticipate any difficulty in the matters of lodging.

While staying in various parts of the country, the tourist may ask the proprietor of the hotel at which he is lodging to give information about, or to show him the way to, temples, shrines, noted places, etc., or to get him permission to see antiquities, etc. kept in temples or shrines. His request will be

complied with and promptly attended to, for most of the hotel proprietors in the country are either members or friends of the Society; but, if any proprietor happen not to stand in that relation, the Society, if requested, will send him letters to smooth the tourist's way.

The hotels and restaurants, shops and stores, interpreters and others, whose names appear on the back of this map, are regarded as honest and trustworthy by the Society. But if anyone of them fail to justify this recommendation, the tourist is requested to inform the Society of the fact by letter.

The Society, as previously stated, is maintained by subscriptions from sympathizers and by contributions from its own members. Tourists are therefore charged only fifty *sen* each, as a fee to cover a part of the expenses involved in the services rendered them. But the Society will be pleased to receive contributions from any tourist desirous of expressing his satisfaction with the treatment extended to him, or wishing to aid the objects of the Society.

A tourist paying the fee of fifty *sen* is entitled to one copy of this map, the possession of which, made evident by its presentation at the Office of the Society, will secure to him at any time the services of the Society.

This map can be obtained at the Society's office or from its agents. It bears the name of its holder and the Society's seal.

NEWS OF THE WEEK.

Kobe oarsmen have decided that Shepherd shall stroke the Interport Four, on the 22nd, and the selection of a crew will be decided by himself and Hutton.

The Yokohama Custom House has sanctioned the establishment of the Central Bonded Warehouse Company at Takashimacho. Iron materials, cotton, grain, cement, etc., may be landed direct by the Company and stored in its bonded warehouses.

Mrs. J. H. Longford, wife of H.B.M.'s Consul at Nagasaki, had a very unpleasant experience with some *jinrikisha* men at Kobe on Tuesday, one of whom seized her by the arm and shook her. The British Consul at Kobe has made a complaint to the Governor about the affair.

On Monday the Tokyo Local Court delivered judgment in the suit for libel brought by Mr. Oishi Masami, Vice-Minister of State for Agriculture and Commerce, against the editor and publisher of the *Yoroku Choho*. Defendants were found guilty and fined 15 *yen*, with two months' major confinement. They at once appealed.

A telegram from Nemuro of the 9th instant reports that the engines of the *Kwantu Maru*, a steamer of 240 tons, broke down when off Shikotan. Some of the crew reached Nemuro in a boat and the *Matsumaye Maru* had been sent from Hakodate to the assistance of the disabled steamer.

The Bishop of Bath and Wells has sent invitations to over 100 bishops to meet at Glastonbury on Aug. 3, with the object of drawing attention to the existence of the British Church before the arrival of St. Augustine and his companions, and to the connection of the Church of England with that church, and through it, with some of the earliest efforts to spread the gospel in the West.

At the annual general meeting of the Kobe St. Andrew's Society, Mr. J. C. Abell was re-elected president, and Mr. R. Home Cook was elected vice-president. Messrs. J. Marshall, J. M. Maitland, J. Ralston, A. Cameron, J. Hall and R. Paton were elected as a committee. It was decided unanimously by the meeting that St. Andrew's Day should be celebrated by a ball, as in former years.

The brewers are well to the fore just now in church-building, remarks the *Kobe Chronicle*. Lord Burton has already built at Barton-on-Trent what is described as one of the most beautiful of modern churches. His lordship is about to erect another in a suburb at a cost of

£20,000, provided an endowment of £300 is forthcoming, of which his firm give half; Mr. Hamar Bass, M.P., is building a new church for All Saints' parish on the same conditions; and Mr. Gretton, another brewer, is erecting a church at Skelton at the cost of £20,000.

On Wednesday afternoon, about half-past four o'clock, a *belto*, named Yamamoto, employed at No. 83, Settlement, Yokohama, while driving an empty carriage, collided with an electric light post at the corner of the Yato-bashi. The carriage was considerably damaged and the horse received injuries which are likely to prove fatal. A policeman belonging to the Kagacho Police who was near the spot at the time rendered what assistance was possible.

Maneyama Kotaro, the tea-firing coolie who was arrested by the Bluff Police on the charge of having assaulted Mr. A. J. Wilkin at Honmoku the other day while that gentleman was riding a bicycle, has been tried in the Yokohama District Court, and sentenced, under extenuating circumstances, to six days' detention. The Public Prosecutor in charge of the case, however, thought the extenuation unreasonable and has appealed to a superior tribunal for re-trial.

Dr. Lawson, of Hongkong, tells us in the *Lancet*, that the plague is well-known in Equatorial Africa. It has flourished in Uganda, which is practically on the equator, and 4,000 feet above sea-level with the usual afternoon temperature in the shade of 96 deg. in the dry season. This supports what has been pointed out by some that plague will rage anywhere, irrespective of temperature, and that therefore the advent of the hot weather does not necessarily involve the dwindling of the pestilence, as many appear to imagine.

According to the vernacular press, it appears that the Department of Communications has entered into a contract with the Great Northern Telegraph Company for decreasing the fees for press telegrams as distinguished from private telegrams. Each word now costs 76 *sen*. This is to be reduced to 22 *sen* a *rin* from July 1st to September 30th and to 24 *sen* from after October 1st. Telegrams for Hongkong and London via Shanghai are also to be dealt with at the same rate during the same period, whereas private telegrams are to be charged 55 *sen* 5 *rin* per word until the 30th September, and 60 *sen* after October 1st. Similar reductions will likewise be made for telegraphic communications beyond Shanghai.

When the Hon. Ho Kai returned to Hongkong bad health was assigned as the cause of his not remaining in Shanghai. The *N.C. Daily News*, however, put the matter as follows:—"Mr. Ho Kai, of Hongkong, who came up here recently to assist H.E. Sheng, has thrown up his appointment in despair of any good being done while the schemes for progress in China are in the hands of the mandarins. Mr. Ho Kai has returned to Hongkong, and will probably join H.E. Wu Ting-fang as Secretary of Legation at Washington, as originally intended." Dr. Ho Kai denies this statement, and says bad health caused him to abandon the post. He does not intend to go to America.

Practically all the missing money from the Rangoon branch of the Hongkong and Shanghai Bank has been recovered. Two Chittagonians recognised the missing servant in the vicinity of Rangoon, seized him and brought him to the Police Station, where he was searched and found to be in possession of notes valued at R73,540 and a small sum of silver. The captors of the thief are entitled to a thousand rupees reward and to five per cent. of the amount stolen.

In prosecuting his researches under the auspices of the Palestine Exploration Fund with a view to determining the exact line of the old wall of Jerusalem, Dr. Bliss has come upon "the stairs" mentioned by Nehemiah "that go down from the city of David." The stair consists of thirty-four large broad steps leading down to the "Pool of Siloam," precisely as

Nehemiah says, indicating a way of communication with the Ophel ridge and Temple-hill, which most authorities believe to be the site of the royal palace and "king's garden." It is not unlikely, says a Boston paper, that these steps, laid bare after the lapse of centuries, may turn out to be a portion of the "ascent" which so astonished the queen of Sheba.

According to the Berlin correspondent of the *Standard*, it is doubtful if Sir Halliday Macartney will be retained at the Chinese Embassy in London. The new Minister to Russia, Yang Yui, will not arrive there till May, when he will be introduced by Iau Shing Chang, who has acted as Minister at Berlin and St. Petersburg. The Chinese Legations in Austria-Hungary and Holland will be merged in that of St. Petersburg, and the Italian and Belgian Legations in that of London, though it is under consideration whether *Chargés d'Affaires* will not be appointed for Vienna, Rome, Brussels, and the Hague.

A weird story of the plague, remarks an exchange, comes from Bombay. A party of searchers, making its rounds, came upon a party of natives in a house, intent upon a game of cards. Something in the stolid appearance of one of the players attracted attention, and an officer placed his hand on the man's shoulder. The figure swayed and fell over prone on the floor—stone dead! It was only another attempt at concealment. On the approach of the search party the friends of the dead man had hastily propped him up and stuck some cards in his hand. The dodge was as bold as it was gruesome, and its detection was purely accidental. What a subject for a Holbein or a Doré—that grim group in the plague-stricken house, with a dead man holding trumps! Nothing more ghostly or more cynically horrible than this Bombay tableau is to be found in "The Dance of Death." And yet the hiding of the dead and dying is an everyday incident. The awful labours of the Poona searchers have, so far, been rewarded by the discovery of thirty hidden cases and eleven corpses.

Gun construction in England is keeping pace with ship building, a fact which accounts for much recent rapid work in completing ships. In the 22-inch wire-wound gun British ordnance experts claim to have the best of any similar ordnance. It weighs 46 tons and has thrown shells of 850 pounds with a charge of 640 pounds. In February last, three shots were fired at a mark 5,000 yards distant, and the shots fell within a rectangle of four yards by two yards. United States naval guns of 12-inch calibre weigh 45.2 tons, and throw a shell of 850 pounds, but the charge being only 325 pounds the muzzle velocity reaches only 2,100 foot seconds, while the British gun attains 2,367 foot seconds. The French 12-inch gun weighs 45.9 tons, but the shell weighs only 644 pounds, and is therefore not so effective as the projectile of the other guns referred to, notwithstanding the high muzzle velocity of 2,625 foot seconds.

Writing under the heading, "The peregrinations of a storeship," the Nagasaki paper says:—One of Her Majesty's storeships—we do not like to mention names—came into harbour on Saturday morning and made all the sailor men in the place sit up with amazed curiosity. She had apparently some object in view, but the same was indefinite; as she simply prowled round about and in out of the harbour like a thing possessed. This singular behaviour was soon observed by Admiral Oxley on the *Grafton*, and worried him immensely; then he got nervous or something, and a few minutes after the storeship had dropped her anchor, he signalled to her to pick it up again and get out of the harbour and come in like a decent respectable British man-of-war. Well, the Admiral's orders carry weight on British storeships, and the prowler quietly stole out of the harbour again. An hour later she returned and started on another private tour of inspection, apparently with the object in view of occupying the entire harbour. Ultimately she again dropped anchor, and came to rest near the

Boston; but she first had the privilege of picking up her moorings twice by order of the Admiral. Whether it was that the Admiral was too fastidious in the matter, or the storeship was too eccentric, it is not within our province to say.

The *Hongkong Daily Press* in announcing the arrival of Mrs. Carew in the Colony, said:—Mrs. Carew had a first class cabin to herself on the main deck of the *Ancona*, and second class fare, which was privately served to her, and during the whole of the voyage she seemed to be in robust health. For the first two or three days Mrs. Carew remained for the most of the time in her cabin and was seen on deck only for about half an hour in the morning. On the first day everyone on board made a point of catching a glimpse of the murderess, but this curiosity soon wore off and afterwards no one took much notice of her. During the last three days of the voyage she spent most of her time on deck, when she either read books or conversed with the warder or the Chinese amah. She appeared to be quite indifferent and there was no trace of a careworn look in her face. The *Ancona* arrived in port at five o'clock on May 3rd, and a pinnace at once went alongside, but Mrs. Carew asked to be allowed to have her breakfast before landing and this request was granted, the meal being served, as on previous occasions, in her room. About 9.30 she was taken ashore and quietly removed to Victoria Gaol.

The extraordinary tightness noticeable in the money market at present is chiefly owing, remarks the *Mainichi Shimbun*, to the universal mania for subscription to the bonds of the Industrial and Commercial Bank. It would be quite unreasonable to suppose, however, that the present state of affairs will continue for any length of time. The report of the general transactions of the Bank of Japan for the week ending the 24th ultimo, showed that the deposits received by the Bank had increased by 2,830,000 yen, while the report for the week ending the 1st instant indicates a further augmentation, making a total of 20,720,000 yen. The deposits in the Bank never before reached such an enormous amount. On the 17th of last month, the Bank had deposits of 4,700,000 yen only in its vaults, yet in two weeks' time it became possessed of twenty millions yen. There can be no doubt that this sudden increase in the amount of deposits is to be attributed to the fact that payments for subscription to the new enterprise were entrusted to the Bank by the Commissioners of the Industrial Bank. If, at the end of this month, steps are taken by the Commissioners to return the money to shareholders who have received only a proportion of the shares applied for, a very large sum must be expected to be drawn from the vaults of the Bank for distribution.

Various applications, remarks the *Nippon*, have been made to the Government by influential merchants in Tokyo, Osaka, and Yokohama, for permission to establish Bourses in those places. Amongst others, Mr. Nakano's party in Tokyo has applied to have monetary transactions placed on the same footing as trade in particular commodities, while Mr. Hishiya's party are preparing petitions for the organization of similar institutions. The responsible officers of the Agricultural and Commercial Department are at variance with the Department of Finance and the Bank of Japan in their views on the subject, but as no substantial grounds can be found for forbidding the establishment of Bourses, it is supposed that permission will ultimately be granted for their institution. Gold and silver can, however, by no means be recognised as mercantile commodities, and special provisions are accordingly to be devised for their control. The Government seems disposed to give permission for transactions in silver only, to the exclusion of gold, for the time being. Whatever may be the case, the policy of the Agricultural and Commercial Department in regard to the question of bourses will shortly be determined.

GERMAN NOTES.

Freitag's library, comprising over seven thousand volumes on the history of civilization in Germany, has been secured for the Frankfurt Public Library.

The North German Canal is lighted along its entire length of sixty-two miles by electricity. This is said to be the longest distance in the world lighted continuously in that way. There are 5,000 poles in use.

The Authorities of the Prussian State railway recently showed their appreciation of the long and faithful service of certain employés by distributing the sum of 90,000 marks among 2,520 men. Of this large number, 39 had been in the service 50 years, 375 at least 35 years, and 1,206 for 25 years.

During the debate in the Reichstag over the Naval estimates, the Conservatives declared that the Naval authorities should dismiss all the notorious Socialist employees in the department. The Minister of State for the Navy, in reply, said that the Naval authorities knew their duty and that any workman taking part in Socialist agitation would be dismissed.

According to the new *Preussischen Jahrbücher*, persons who are credited with being in possession of such a moderate fortune as a million marks and over, totalled in Germany last year five thousand two hundred and twelve. The wealthiest Prussian lives in Frankfurt-on-the-Main, and bears the name of Rothschild. The next is Krupp, and the third is the Prince of Pless.

The business of manufacturing floor-paper in Einsiedeln, Germany, is said to be flourishing. In the form of a pasty mass the paper is spread upon the surface to be covered and is then submitted to pressure. The material behaves like plaster-of-paris, and is noiseless under the foot, and particularly effective in preserving a uniform temperature. Having no joints, the flooring presents a perfectly smooth surface.

Notwithstanding the fact that the "women's movement" is not as far advanced in Germany as in some other countries, women are steadily gaining ground and are achieving distinction in several universities. The last is that of Miss Ellen C. Hinsdale, of Michigan. She passed a successful examination in the University of Göttingen in German and Anglo-Saxon studies in philosophy, and has received the degree of Doctor of Philosophy from that noted institution.

There is an active movement on foot in Germany, under the direction of Professor Nikolaus, of the University of Berlin, to celebrate the four-hundredth year since the birth of Melanchthon by the erection of a memorial at his birth-place, Bretten, in the Grand Duchy of Baden. It is proposed that the memorial should take the form of a museum containing Melanchthon's works and writings, with letters, relics, and personal memorials relating to him. The undertaking is "graciously encouraged" by the Grand Duke of Baden, who has already assumed the patronage of the scheme.

The sentiments among Germans with regard to the Greeks are obviously very mixed. There are some that sympathize with them, but the majority seems to be of the opinion set forth by Rear Admiral Werner in the *Gegenwart*, Berlin. He says:—"Those that know the Greeks are aware that they are a very depraved race, and that morality and justice fare scarcely better in Greece than in Turkey. Among the French, a person of very low character is called a Greek. It is very doubtful if peace would reign in Crete if Greece had possession of the island. It also is a question whether the Greek Government deserves a better title than the individual Greek. We need only remember its attempt to repudiate the foreign debt, by which many Germans have suffered. The very army, such as it is, and the fleet were built with loans on which Greece refuses to pay even the interest. It is possible that the Powers will ultimately be forced to appoint a receiver for Greece."

MIXED RESIDENCE IN FORMOSA.

NOTICE NO. 22 OF THE FORMOSA OFFICE.

The limits of mixed residence in the open ports of Formosa are hereby determined as follows:—
April 21st of the 30th year of *Meiji*,
(Signed).
Baron NOGI KITEN,
Governor-General of Formosa.

The limits of mixed residence in Keelung include the entire district of Minor Keelung along the summit of the hill from a point about 300 metres leading up to the Gijū bridge, and a tract of land marked out towards the shore from the point where a mountain stream impinges, at a distance of about 100 metres from the battery.

The limits of the district for mixed residence in Tamsui include all those portions of land extending straight to the eastern end of Hohotogai from the right of the small hill of Bishito, and then across the southern end of Genkutsugai straight through, leading to the back of the foreign cemeteries along the stream on the left side of the English Consulate.

Limits of mixed residence Twatutia:—Twatutia is recognised as a portion of the port of Tamsui, and the northern extremity of Mokōgai, viz. Kohingai, being taken as the starting point, the district extends to Kakōgai, and then passing over the ditches on the side of Rokkevanga, emerges on the new road leading straight to Yenggan; then again extends to the southern end of Daiyōōdōō from a point about two-thirds along that road, terminating at the river Tamsui.

The limits of mixed residence in Takow comprise the district eastward of the foreign settlement, on the slope of Saracen Head, and westward of the public cemeteries for natives, on the right side of the Bay. As for the left side, the concession includes the mouth of the Bay as well as the town of Takow, and then extends to Kiusho Church along a distance of about 300 metres to the sea shore, and covering Reigaiyo.

The limits of mixed residence in Anping include the entire town of that name.

The limits of mixed residence in Tainan comprise the district marked by the Shonannon and a stream running through the middle between the Daitomon and the Shōtōmon, and also the town in its present form outside the Taisai-mon.

THE BAPTIST CONFERENCES.

The annual conference of missionaries of the American Baptist Missionary Union was held this year in the Theological Seminary, Yokohama, and opened its session on Saturday, May 1st, at 10 a.m. The Rev. H. H. Rhees, D.D., of Kobe, President of the former Conference, occupied the chair. The annual sermon was preached by the Rev. W. Wynd, of Osaka, from Matthew 28: 19, 20, on the subject, "The Great Commission," and was very helpful.

The election of officers resulted as follows:—
President, Rev. S. W. Hamblen, Sendai.
Vice-President, Prof. E. W. Clement, Tokyo.
Secretary, Rev. R. S. Thomson, Kobe.
Executive Committee—Rev. C. H. D. Fisher, Tokyo; Rev. A. A. Bennett, Yokohama; Rev. R. A. Thomson, Kobe.
Statistician, Rev. J. H. Scott, Osaka.
Preacher (next year), Rev. E. H. James, Sendai.
Alternate, Rev. H. H. Rhees, D.D., Kobe.

The reports of committees followed: Bible Women's Work, by Miss Mead, of Sendai; Sunday-schools, by Mrs. Fisher, of Tokyo; Publication, by Rev. H. H. Rhees, D.D., of Kobe. The report of the last committee aroused a long and lively discussion on the subjects of publications and translation. Finally, a committee was appointed to revise the rules for publication, and they later in the session presented a full report, which was adopted. In accordance with this report, a committee of one from each station was chosen to take charge of all matters relating to publication. This committee consists of Rev. H. H. Rhees, D.D., of Kobe; Rev. E. H. Jones, Sendai; Rev. C. H. D. Fisher, Tokyo; Rev. C. K. Harrington, Yokohama; Rev. W. Wynd, Osaka; and Rev. G. W. Hill, Chofu. This committee has since met, outlined its work, and selected a literary committee, consisting of Dr. Rhees, Rev. C. K. Harrington and Rev. A. A. Bennett. It has also requested the mission's translator, Rev. F. G. Harrington, of Yokohama, to begin at once a careful revision of the New Testament (Dr. Brown's version) for a new edition.

The committee on the Kobe Boys' School reported no progress, and asked to be discharged. This request was granted.

The report of the Hymn-book Committee was adopted; and a hearty vote of thanks was given to the committee for their arduous and faithful labours, which had resulted in giving the mission an excellent hymn-book.

The report of the Executive Committee of the Theological Seminary was read by the President, Rev. J. L. Dearing, of Yokohama; and that of the Examining Committee was presented by Rev. J. H. Scott, of Osaka. Both reports showed clearly that thorough and consecrated work had been accomplished during the past year, and that the Seminary was steadily growing in favour and influence. Four excellent men were graduated on the 30th of April.

The report of the Tokyo Baptist Academy was presented by the principal, Mr. E. W. Clement, and set forth the encouraging condition of that young school, which is slowly outgrowing its present quarters in Tsukiji.

The reports of the various girls' schools, as presented by Miss Mead, of Sendai; Miss Kidder, of Tokyo; Miss Hawley, of Yokohama; and Miss Church, of Himeji, were also, on the whole, encouraging. They made it very evident that these schools are quietly doing a noble work among girls and women, and thus reaching right into many homes which would otherwise be inaccessible.

A committee of one from each station (Rev. E. E. Jones, Sendai; Mrs. J. C. Brand, Tokyo; Rev. A. H. Bennett, Yokohama; Rev. J. H. Scott, Osaka; Rev. H. H. Rhees, D.D., Kobe; and Rev. G. W. Hill, Chofu) was appointed to prepare special reports on evangelistic work for the next conference.

The committee on resolutions, among other things, recommended a vote of thanks to the ladies of the Methodist mission in Hakodate for their great kindness to Miss Minnie Carpenter during her long and severe illness in their house. This resolution was unanimously adopted by a rising vote.

Rev. D. W. Hamblen, of Sendai, was re-elected corresponding editor of the *Baptist Missionary Review*; and was given a vote of thanks for his several years of painstaking service in the position of Secretary of the conference. It might also be very properly added that he made an excellent presiding officer, and by his skill expedited considerably the business of the conference.

At 11.30 a.m., Tuesday, May 4th, the conference adjourned to meet again Friday, April 22nd, 1898, in Tokyo. The session, as a whole, was very profitable.

Tuesday afternoon the "Union Conference," which includes also missionaries of the Southern Baptist Convention, convened, with Vice-President Jones in the Chair. The following officers were elected:—

President—Rev. N. Maynard, Kokura.
Vice-President—Rev. W. B. Parsley, Yokohama.

Secretary—Rev. R. A. Thomson, Kobe.
Mrs. H. E. Carpenter, of Nemuro and Yokohama, then read an excellent paper on "The Holy Spirit and the Missionary," which was discussed by Revs. F. G. Harrington, Rhees, Jones and Hill.

Rev. F. G. Harrington presented a report on vernacular literature, which was ordered to be printed in the minutes for convenience of reference.

The *Baptist Kyōho*, a monthly vernacular magazine, edited by Rev. R. A. Thomson, of Kobe, was adopted as the organ of the conference.

The report of *Gleanings* was adopted; and Prof. Henry Topping, of Tokyo, was re-elected publisher and editor of the same.

The experiment of an evening session was tried and proved successful. First on the programme was a paper on "Evangelistic Work" by Rev. E. H. Jones, who, in Sendai and vicinity, has shown remarkable skill and tact in carrying on street-preaching without interference by the police or opposition from the crowd. This paper evoked a very interesting and profitable discussion on methods of evangelism. "Our Girls' School" was the title of a very instructive paper by Miss Clara A. Converse, of Yokohama, who, as a most successful worker in that field, could speak with authority. This likewise called forth an interesting discussion, in which ladies also participated. One paper belonging to the programme of the Union Conference was, by common consent, read during the A.B.M.U. Conference during the consideration of the subject of publication. Its theme was "Our Translations—Importance, Style, etc.," and the writer was Rev. J. L. Dearing, of Yokohama. It was an able, impartial, and clear-cut discussion of the subject. All these papers are to be printed in the minutes and thus widely circulated.

It is the general impression that this conference was one of the most successful ever held. It

tended toward greater unity and harmony in the work of the mission; and it culminated, the last day, in deep spiritual feeling.

JAPAN AND NORTH AMERICA.

[WRITTEN SPECIALLY FOR THE "JAPAN MAIL."]

The Kurosiwo current, during many thousands of years, has been carrying storm-tost crews, boats, ships, and merchandise from the Philippines to Japan, and from Japan and Manchuria to North America. Full effect ought to be allowed for the arrival by this path of new inhabitants, of languages, customs, and traditions such as have been entering during many ages. The language of the Philippines does not appear to have left much trace in Japan, but some customs of the Philippines have been noticed in Japan. In North America, out of the languages in use with the Indians, I purpose to take the *Dakota*, spoken in Minnesota and Dakota and compare it with Japanese. The Sioux Indians speaking the *Dacotaw* on the high-land which gives origin to the Mississippi and Missouri rivers. Their country is in about the 45° of latitude and they are somewhere near 60° of longitude East of Vancouver. Such a position in America corresponds to that of Hii and Yabagatai in Chinese Tartary. On the hypothesis of Asiatic origin, the Indian tribes coming from Asia would in this instance probably follow the Fraser and Columbia rivers to the Rocky mountains. From these they would emerge on the vast plateau once spotted by countless herds of buffaloes but now deserted. Across this spacious territory they would move, living on buffalo flesh, still following the upper waters of the Missouri and farther on the Mississippi, to the locality where they now are. Speaking a language allied to the Mongol, the Dakota people may be distant cousins of the Japanese. If so, how distant will that cousinship be and how long ago did the Mongols, Japanese and Dakotas separate from each other?

Now that high education is fast elevating the Japanese people, such questions as those proposed will in a few years come more and more to the front. Let us attempt to anticipate what to our successors will be familiar subjects of inquiry and make some brief comparisons. The Sioux, or Dakota people, are more like the Mongols than the Japanese in race characteristics. We should expect, therefore, that in language they would be more akin to Mongolian than to Japanese, and this I shall be able to show in really the case. If then it can be made plain that there is a relationship between Japanese and the best known of the north American Indian languages, and a still closer connection between that Indian language and the Mongolian, no small aid will be given to the Japanese who study their own language scientifically and desire to see it correctly placed in the paradigm of the world's languages.

The word *dakota* means the connected, or united tribes, as we learn from the Grammar and Dictionary of the Smithsonian Series. The Japanese *tsugu*, *tsugi*, *tsugida*, is an old word identical with the Chinese 結 *so*t, connect, join. The Mongol is *chigla-ho*, to unite. It is our own word *social*, through the Latin *socius*, "ally." The Social War in Roman History was a war of the allies with Rome. We have here a primitive root existing in all languages here mentioned and consequently many thousand years old. My information on the Dakota is derived from Mr. Riggs' philological works. He lived for many years among the Dakota people teaching them the Christian religion. The Smithsonian Institution published his works. There can be no doubt about this root, and for scepticism on the conclusion I draw there is no room. This and many other examples show that the nations using this root for allied tribes were once living in close proximity and it was the tendency to wander that divided them.

The Dakota has a rich alphabet. The vowels indeed are limited to five, *i, e, a, o, u*, like Japanese, but the consonants are twenty-four. They contain the aspirated *k, t, p* of Sanscrit, Chinese and Mongol, the sibilants *sh, s, zh, z*, the nasals *m, n*, and *ng* with the divided consonant *l* and the simple surds *k, t, p* of Sanscrit, English, and Japanese. In the construction of the syllable the Dakota rejects *k, t, p* as final letters and retains *ng, n, m*. In this respect it resembles the Japanese and the Polynesian languages. The roughness of the syllable is a concomitant of a severe climate. A mild climate is a check on the roughness of syllables. That the Japanese syllable has so few final consonants is due to climatic softness. So it is with the oceanic languages of the Pacific. Consequently it is probable that the vocalic softness of Dakota syllabification is due to a milder climate long

ago. There are no reasons to believe that the climate of North Asia and of North America has increased in severity during the last few centuries. Professor J. D. Whitney, in his work on Climatic Changes, says "there are satisfactory reasons for believing that the earth's surface is decidedly cooler than it has formerly been. Refrigeration has been going on through all the geological ages." This, he at the same time points out, has nothing to do with the cold of the glacial period, in the universality of which he has indeed no faith. A change in local conditions effected a change in local climate causing the glacier, and that was all. Professor Whitney may be right in this, as it would appear, and if he is right, then the Japanese current is to us of still more exceptional importance as affecting the distribution of the human family, and the development of language. The various families of human speech were formerly developed rapidly in Asia when the climate was warmer and Siberia a more habitable country than at present.

The possessive pronouns in Dakota are *mitawa*, my; *nitawa*, thy; *tawa*, his; *ungkitawapi*, our; *nitawapi*, your; *tawapi*, their. They precede their nouns, as in *minagi*, my soul, *mi-ishta*, my eye, *wapa*, my head. The Mongol for my soul is *manas sunis*. Your eye is *chi nu nidun*. Their is *terinet*. The possessive pronouns then closely resemble those of the Mongols. The Dakota people are consequently more akin to the Mongols than to the Japanese, and probably they may have arrived in America from the mouth of the Amoor, being carried in boats eastward by the Japanese current till they reached some point near Vancouver. Certainly the identity of these three pronouns in Dakota and in Tartary is a striking fact: which goes a long way towards settling the question of the origin of the North American Indians.

Let the conditions be noticed here carefully. A Mongol for our pronoun "your," says *chi ni* in the singular, or *tani* in the plural. A Chinese says *ni ti* for "your." *N* and *t* are interchangeable. Consequently in the second personal pronoun, the Chinese, Mongols, and Dakotas have the same word. *Ch* also is only a modification of *f*. In the first personal pronoun, the Mongols and Dakotas have *bi*, *ma*, the same with our *my*, mine. The Chinese, like the Japanese, lack this pronoun. This pronoun entered the vocabulary of Asia later and is first met with in Tartary. It wandered to Italy and Greece, to India, and Persia, to Germany and England. It also reached the upper waters of the Mississippi. Wherever it went it was accompanied by emigrants who preferred to keep this old Asiatic word rather than replace it by another. The love of old words, especially of household words, in daily use, is a powerful element in language. The Pantheon in Rome was erected in the time of Augustus and still stands. There is a church in Jersey which was built in the year 1111, and is therefore nearly 800 years old. They have not been attacked by fire, and they have stone roofs. So it is with words. They last as long as men choose to use them. They do not grow old by any tendency to decay. They may be and are thousands of years old. The formative parts of grammar are all transitory and may fall like leaves from trees. It is different with words, the types of things, which, when favoured by circumstances, continue living from primitive ages down to our own day.

The evil resulting from the isolation doctrine in language is very great. When Lyell published his theory of uniformity varied by slow and even changes, a great improvement in geology was the result. As soon as investigators apply this principle to language they begin to make progress. The glacial period was limited to Europe and America and has been shown not to belong to Japan or to China. It is open to us to hold that in these countries there has been a slow and regular diminution of heat for many centuries. The same must have been the lot of Siberia, where not so very long ago the mammoth lived and thrived in green forests and mild air such as are now unknown in that part of Asia.

In claiming for the Dakota tribes a comparatively recent immigration into America, the appeal may be made to their vocabulary and grammar, with due allowance for the climatic conditions to which they must have been unaccustomed in Asia. The nature of the resemblances presented by their vocabulary to Japanese, Mongol, and European speech may be judged by examples such as the following. A lake, *mda*; mouth of a river, *mdots*; powdered, *mdu*; mellow, *mdu mdu*; male, *mdoka*. In Japanese *midzu* is water, *matru* is powder and in Chinese 水 *mat*. In Mongol *murun* is river and *mu* is water in Manchu. In Latin compare *molis*, soft, *mas*, male. In English, *mere* a lake, *meal*, from *mal* to grind, should be compared with these words.

Assuming the truth of the uniformitarian prin-

ciple which is the foundation of Darwin's Origin of Species, we may say that so far as the Dakotas are separated geographically from Mongols, Japanese, Chinese and Europeans in our time, there is nothing unreasonable in holding the identity of the words above mentioned and a thousand more. The grass lands of central Asia invite the shepherd races to unlimited wanderings, and all these nations were probably shepherds at one time. For the sake of fishing in the Amoor any Asiatic people who began to live in boats, would sometimes be carried out to sea as far as the Japanese current, and this current is specially adapted to convey them, when they have lost the control of their boats, to the Western Coast of North America. It was in this way that the Kurile and Aleutian islands became inhabited and that the mound builders in Ohio were pressed upon and extinguished by Indian races coming from the North-west who were less civilized than themselves. As to the notion that we must not compare Latin words, for example, with Manchu and Japanese words, it is philosophically unsafe. It is out of date in these Darwinian days; for it is taking for granted what has never been proved, it is a hindrance to the student. The changes of languages are best understood on uniformitarian principles, and the current system of teaching the grammar of languages ought to be revolutionized. It is time that this were done, for it is only in this way that grammar can be made interesting to the learner. In Dakota *yuta* is eat, Mongol *ida*. For "I eat" a Sioux Indian says *wata*. His word *wa*, I, is Japanese. But the Japanese have lengthened the word to *ware* and *watakushi*. The Sioux says *nid* for "there is not," the Japanese says *nai* and this becomes final *n*, in *arimasen*, there is not, and *dsu* in *kanaradsu*, certainly, and *kawaradsu*, impossible. There is no doubt on the point that *n* becomes *d*, and *d* by sibilization becomes *dsu*; grammar ought to be taught not with the imitation of the parrot but with the operation of the mind. Then the little thinker sees his way, and grammatical technicalities become clear to him.

Of course if, as is most likely, it was by migration across the Pacific that the red man reached North America, we must expect in his language similarities not to Mongol only or to Japanese only. We must expect a newly worked up grammar and an independent selection of roots. *Nita*, thou art dead, *mata*, I am dead, are Dakota expressions. *Ni* is Chinese and is our English thou. *Ta* is the Chinese *he* or *it*, "die," and our word die. *Ma* is our word me and *ta* is our word dead.

For "his food is the buffalo" the Sioux will say *tatangha woyute tawa*. *Tatangha*, or *tat*, is the Japanese *ushi*, Mongol *sir* and *shar*, "ox," Engl. "steer," Lat. *taurus*. *Tawa* is equivalent to the Japanese *ano*, are, Mongol *tere* "he." *Wo yute* is food, Mongol *ideshi*. The Japanese have lost this root and taken *taberu* in preference. But the Dakota also has *tatangha tawote*, buffalo his food, which is in the order found in Mongol and Japanese, as in *are no tabemono*, his food. The postposition of the possessive must then be regarded as a change in syntax made in America by the Indians themselves. Yet in Mongol *gesser minu* is found, meaning my gesser. Gesser in Mongol is a legendary hero originating like the German Kaiser and the Russian Czar, in Caesar. Even in English we may put mine after substantives by poetic license, as "mother mine," the Dakota people say *mininta*, die in water, that is water in die. For "on the ground" they say *makan* or *makata*. But *da* and *ni* are Japanese case suffixes for in. The Dakota has then the same mode of declension as the Japanese and in Mongol *da* and *dor* are used as case suffixes for "in," also in the same way as in Japanese.

The result of this inquiry, briefly stated, is that the origin of the Dakota language can be explained as Asiatic. It contains elements which seem to be Polynesian, but the main stock of the vocabulary, and grammar ally it to the Mongol and Japanese. As to the vocabulary generally, the theory of one common vocabulary for all the languages of Asia is the most suitable and most accordant with facts. For instance, among the Dakota numerals, two is *nung*, the Chinese *liang*; *ung* is use, the Chinese *yung*; arrive at home is *hda*, the Mongol *haireho* and Chinese *kwei*; *hpe*, to cover, is the common root *kap*, to cover, in use throughout Europe and Asia.

[Tartar mother language]

Japanese	Tamul	Mongol	Finnish	Dakota
Korean	Telugu	Turk	Esthonian	with some
Aino	Malayalar	Manchu	Hungarian	other
	Canarese			Indian
				languages

I place Dakota here tentatively, pending the results of further research. It seems to possess Polynesian elements to some extent.

JOSEPH EDKINS.

PARISIAN GOSSIP.

(FROM OUR OWN CORRESPONDENT.)

Paris, April 3, 1897.

A feeling of weariness is coming over public opinion at the slowness of the pacification of the near East. An ironical smile was recently produced by the Sultan's soliciting the United Powers to formally hand him their Collective Note, so that he might commence at once to make Turkey great, glorious and free. Time is money. A positive broad grin, however, has been caused by the Cretans declaring war against the Six Powers, and bombarding their Admirals.

The delay in not coming to the point between the mainland adversaries is not disadvantageous to Greece. It enables her to accumulate sympathies, receive the sinews of war from patriots, and gives time for volunteers to arrive. Then the snow on the hills will be in a melting mood. Two facts steadily make way, that the Powers, whether six, or less, are unable to arrange the imbroglio, and that the plank in their platform—the maintenance of the Ottoman empire—is essentially rotten. The Kaiser is viewed as simply laughing at the other Powers; he gives them his benediction, but will not send a single *piche-khaube* to Crete, where a veritable *corps d'armes* would be required to dig out the insurgents, who want to be married to Greece and will not wait seven years to celebrate the union. The Powers have committed the blunder of leaning on the side of Turkey; that has exasperated the Cretans while alienating outsiders, who never lose sight of the hideous atrocities and organised misgovernment of the Porte. To this must be added the healthy, sceptical belief that each of the Six Powers has its own ends in view; so unity is like friendship—but a name.

In the absence of concrete events in the Levant, the French are deeply occupied with the "re-surrected" Panama Scandals. But the interest on the present occasion is of a peculiar and special character. The period for wailing and gnashing of teeth has gone by; the 1,500 millions of francs that the Company swindled out of the pockets of cooks, cabmen, and costermongers, plus religious people in search of usurious interest and the redemption of their bonds by gambling lotteries, have been swallowed up, save the few millions reserved to pay the Bologna Government, year by year, in order not to foreclose on the big ditch and thus keep the grave clothes above ground. Nor are the French particularly anxious to know the names of the legislators, Ministers included, who accepted bribes, they possess all the delinquents now, not forgetting the "unctuous rectitude" of Burdeau, a burning and shining light among the impures, to whom a grateful, but bamboozled people decreed a national funeral to honour his integrity. They clinched their admiration by erecting a monument to his worth. No; what the French study is the struggle between justice and the opposition of the implicated to once more paralyse her action. In a word, to make a clear exposure of all the iniquities. The latter is not at all hopeful.

A great deal of attention is being given to the Transvaal, or rather to M. Krüger, that is not at all of a flattering character. The correspondents of French journals paint the present condition of the Rand as serious, and its future most gloomy. A letter in the *Débats* from Johannesburg, bearing date 6th March, alludes to the patience of the foreigners as having come to the snapping-point, and they will appeal to England. The writer avows that, within a year, the Boer Government has several times violated the 1884 Convention, which imperils the independence of the Transvaal. It is difficult to comprehend, adds the shrewd Frenchman, why M. Krüger courts such serious difficulties and launches the country into such grave dangers. By his absurd and arbitrary conduct affecting industries and interests, he is losing all European sympathy—Dutchmen and Germans of course excepted. By seeking a conflict with England he drives public opinion to his side.

Up till now, the public not infrequently winked at the whitewashing of historical scoundrels. The Municipality goes farther: it will celebrate them in marble. Marat, whose name is synonymous with massacres, denunciations, provocation to murder and pillage, is to have his statue in the lovely and quiet park of Montsouris, one of the most picturesque spots of the capital. The statue is already prepared. It was made by Boffier. Formerly its erection had been rehearsed as it were, in the park, but it was removed in obedience to popular protestations. However, of late Marat has become the *mode*; a complete edition of the works of that strange *ami* of the people has been purchased at

public auction for 6,000 francs. But the volumes had been the property of Marie Antoniette. She delighted also in the *Carmagnole* jig. In a museum, a statue, even of a monster, remains a work of art, if well executed; but when erected in a public situation it has another signification; it suggests a hero, and worship. Now the gospel of Marat is still too advanced even for the incoming century. Why not place a statue of Charlotte Corday, that "angel of assassination," near by?

Since the recital of the *Medusa* raft, no tale of the seas has evoked such a widespread horror as the story of the survivors of the shipwrecked *Villedesaint-Nazaire*. From 10 o'clock on the 8th of March, till nine on the evening of the 12th, 29 persons in an open boat in the Atlantic Ocean were buffeted, after rowing away from the sinking packet, by waves and storm, here and there, without compass, trusting to a passing sail to rescue them. The occupants of the boat had no water; and a few biscuits formed all their food. One ship approached them within a mile, and then sailed away. Thirst soon set in and hands were held out to catch a few drops of falling rain. Some drank sea water and delirium quickly ensued. The victims in the last stage displayed strange fantasies; one believed he was present at a ballet, kissed hands to the dancers, and then jumped overboard. And when the *Yanariva* rescued them, one of them opened his arms to the ship, laughed, pressed his bosom and leaped into the sea. Of the 29, six died from madness and seven from cold. One brave fellow, though dressed only in drawers and a worsted vest, steered the boat without ever quitting his post, during three days and two nights. The passenger saved, a West Indian, ever since the scare, has his eyes staring in a look-out fashion, speaks but little, and declines to wear other clothes than those he wore when in the boat. How the latter survived the storm and the mountainous waves is not the least wonderful part of the terrible story.

It is to be hoped that the "Memoirs" of Jules Simon, will soon follow those he has given of "Autres." In the latter it is related, that on the very day Jules Simon underwent an operation for cataract, he dictated, one hour before the surgeons arrived, his daily article for a newspaper. The operation over, he quietly remarked, that "iron, like faith, saves." He felt he would recover his sight and did so. But all is possible with resolute old age. It seems as if the late Flourens was right in his philosophy: at ninety we are only commencing to be young men. Jules Simon had a hard fight in his early days. He was assistant professor of Greek to the late Victor Cousin, at 83 francs per month. He lodged in a garret, and the light of its window, visible at the small hours of the morning, was pointed out to students as an example. When his *déjeuner* consisted of only two sous' worth of dry bread and water, and his dinner of cabbage soup, oil and beans, and bread, with unfilleted Seine water *ad libitum*, he was translating *Plato* for Cousin, and he admitted he looked back to those days as the happiest period of his life. Stendhal, whose celebrity was only developed after his death, avowed that all he earned by his life-writings was fifteen sous a day. Zola pays his shoe-black more than that.

There are free offices at every Mayoralty where persons in search of employment can register their names and the work they seek, gratuitously; there are newspapers which insert the "wants" of the working classes out of place, free of charge, yet only the regular agencies appear to be able to secure situations; in return they expect fees. Thus a waiter who secure a place at the ordinary wages of 200 fr. a month, pays 40 fr., and other employments in proportion. The agents are not wrong in claiming to place 94 per cent. of the annual one million of applications for work. Why do employers seek their services? Because they in a sense become responsible for those they recommend.

THE JAPAN BREWERY COMPANY, LIMITED.

REPORT.

The Directors have the pleasure to present herewith the Accounts of the Company for the business year ended 31st March, 1897.

The Sales of the past year again show a large increase and there are good indications of a further satisfactory development of the Company's business to be expected during the year into which we have now entered.

Large new stables for the increased number of horses required, with quarters for the bettoes, have been completed on Lot No. 104-E, and the increased business necessitated a further enlarge-

ment of Cellarage and other buildings which have been executed during the year under review.

The Working Account for the year shows a profit of \$94,713.99, which, added to the sum of \$8,879.00 brought forward from last year, makes the Profit and Loss Account amount to \$103,592.99.

From this sum an interim Dividend of 10 per cent. amounting to \$15,000, which was paid in November, 1896, has, to be deducted, together with Directors' Fees and part Bonus to Staff paid, amounting to \$2,250.00.

This leaves a balance of \$86,342.99 for distribution, which the Directors propose to dispose of as follows:—

To payment of a final dividend for the year of 15 per cent.	\$22,500.00
To Reserve fund	50,000.00
To Bonus to Staff	4,041.00
To be carried forward to next year ...	9,801.99

\$86,342.99

Owing to the departure for Europe of Mr. J. Dodds, the Directors have invited Mr. W. R. Bennett to a seat on the Board.

The Retiring Directors are Messrs. W. Gordon and J. D. Hutchison, who, being eligible, offer themselves for re-election.

By Order of the Board of Directors,
JAMES STEWART, Secretary.
Yokohama; 10th May, 1897.

GENERAL BALANCE SHEET FOR THE YEAR ENDED 31ST MARCH, 1897.

DR.—LIABILITIES.

To 1,500 Shares at \$100 each fully paid up	\$150,000.00
To 900 Debentures at \$100 each	90,000.00
To Reserve Fund	25,000.00
To Reserve Fund, Special	12,475.76
To Bills payable: £2,990.16.3 at 2/- ...	29,908.12
To Suspense Account	2,362.50
To Sundry Creditors	7,919.00
To Balance of Profit and Loss Account	86,342.99

By Working Account for year 1896/7 ...	94,713.99

\$103,592.99

JAMES STEWART, Secretary.

I have examined the foregoing accounts and compared them with the Books, Vouchers and Securities in the possession of the Company, and find them to be correct.

R. S. SCHWAB, Auditor.

HELLAS, HAIL!

WILLIAM WATSON, in the *London Chronicle*

Little land so great of heart,
'Midst a world so abject grown—
Must thou play thy glorious part,
Hellas, gloriously alone?
Shame on Europe's arms, if she
Leave her noblest work to thee!

While she slept her sleep of death,
Thou hast dared and thou hast done;
Faced the Shape whose dragon breath
Fouls the splendour of the sun.
Thine to show the world the way,
Thine the only deed to-day.

Who are these would bind thy hands?—
Knaves and dastards, none beside.
All the just in all the lands
Hail thee blest and sanctified—
Curst, who would thy triumph mar,
Be he Kaiser, be he Czar.

Not since first thy wine-dark wave
Laughed in multitudinous mirth,
Hath a deed more pure and brave
Flushed the wintry cheek of Earth.
There is heard no melody
Like thy footsteps on the sea.

Oh! that she were with thee ranged,
Who, for all her faults, can still,
In her heart of hearts unchanged,
Feel the old heroic thrill;
She, my land, my loved, mine own!—
Yet thou art not left alone.

All the Powers that soon or late
Gain for Man some sacred goal
Are co-partners in thy fate,
Are companions of thy soul.
Unto thee all Earth shall bow;
These are Heaven, and these are thou.

FOR GREECE AND CRETE.

ALGERNON CHARLES SWINBURNE, in the *Nineteenth Century*, London

Storm and shame and fraud and darkness fill the
nations full with night:
Hope and fear whose eyes yearn eastward have
but fire and sword in sight:
One alone, whose name is one with glory, sees and
seeks the light.

Hellas, mother of the spirit, sole supreme in war,
and peace,
Land of light, whose word remembered bids all
fear and sorrow cease,
Lives again, while freedom lightens eastward yet
for sons of Greece.

Greece, where only men whose manhood was as
godhead ever trod,
Bears the blind world witness yet of light where-
with her feet are shod:
Freedom, armed of Greece, was always very man
and very God.

Now the winds of old that filled her sails with
triumph, when the fleet
Bound for death from Asia fled before them strick-
en, wake to greet
Ships full-winged again for freedom toward the
sacred shores of Crete.

There was God born man, the song that spake of
old time said: and there
Man, made even as God by trust that shows him
nought too dire to dare,
Now may light again the beacon lit when those we
worship were.*

* Watson and Swinburne must regret these grand lines now
too.—J.M.]

LONGEVITY OF ANIMALS.

On this subject the *Journal d'Hygiene* (Paris) prints an interesting article. Man lives to all ages, says the writer, but in the animal kingdom, on the contrary, the duration of life is almost exactly equal for all individuals of the same species. But we can know with exactness the real duration of life only for animals in servitude; we do not know whether it is the same in the savage state. Rabbits and guinea-pigs live 7 years; squirrels and hares, 8; cats, 9 or 10; dogs, bears

and wolves, 20; the rhinoceros, 25; the ass and the horse, 25 to 30; the lion, 30 to 40 (a lion in the London Zoological Gardens reached the age of 70 years); the camel, 40. The length of life of the elephant is uncertain; according to Aristotle, Buffon, and Cuvier, it lives two centuries; some authors say even four or five. After his victory over Porus, Alexander consecrated to the sun an elephant that had fought for the Indian monarch, and gave it the name of Ajax; then, having attached an inscription to it, he set it at liberty; the animal was found 350 years later. The ancients attributed to the stag a fabulous length of life, but Aristotle observes that what is reported on this subject has no good foundation. . . . Buffon says that the stag takes 5 or 7 years to attain full growth and should live seven times this period, that is, 35 or 40 years. Though precise observations are wanting, we know that fishes, especially the large species, live a very long time. According to Bacon, eels reach 60 years. Carp have been known to live at least 150 years, and they them seemed to Buffon as lively and agile as ordinary carp. Dolphins, sturgeons, and sharks live more than a century and attain huge size. Pike have been seen weighing 1,000 pounds, which indicates a very long existence. A pike caught at Kaiserslautern in 1497 was 19 feet long and weighed 350 pounds; it bore in its gills a copper ring with an inscription stating that it had been put in the pond of Lautern by order of the Emperor Frederick II., that is, 262 years before. Whale-fishers have exterminated the huge whales of the polar seas; those that were formerly met with were of prodigious dimensions. It is supposed, with some probability, that they live several centuries and that they may even reach an age of 1,000 years. The longevity of fish is attributed to the long duration of the development, to their low temperature, and to their feeble vitality.

On the other hand, we meet another class of animals whose passions are lively, whose vitality is very active, and who still live a long time—we mean birds. But it is not known with any degree of precision how long these live, except that their longevity is great. We see the same swallows returning to their accustomed nest for a considerable number of years. An eagle died at Vienna at the age of 103 years. According to Buffon, the life of the crow is 108 years, and no observation authorises us to attribute to it, with Hesiod, 1,000 years. A parrot, brought to Florence in 1633 by the Princess Provère d'Urbino, when she went there to espouse the Grand Duke Ferdinand, was then at least 20 years old and lived nearly 100 more. A naturalist whose testimony cannot be doubted, Willoughby, had certain proof that a goose lived a century; and Buffon did not hesitate to conclude that the swan's life is longer yet; some authors give it two and even three centuries. Malleton possessed the skeleton of a swan that had lived 307 years. This is quite enough to prove that among the larger animals and also especially among birds, the duration of life, relatively to their bulk and height, is very long; it is, on the contrary, very short with insects; many of these live less than a month, rarely a few years, while the life of the ephemera is but 7 to 12 hours, and in this brief space they accomplish the principal functions that nature requires of organized bodies: they are born, reproduce, and die.

LATEST TELEGRAPHIC NEWS.

(FROM THE "JAPAN TIMES.")

THE ANGLO-AMERICAN ARBITRATION TREATY.

London, May 7.

The treaty of arbitration between the United States and Great Britain has been brought up for final disposal in the United States Senate and has been rejected.

THE PARIS DISASTER.

There is general mourning in Paris on account of the terrible Charity Bazaar fire (reported last week) and all the theatres are closed.

The Empress of Austria is prostrated with grief for the death of her sister, the Duchesse d'Alençon.

THE WAR IN EUROPE.

The Greeks have abandoned Pharsala, and are now awaiting the Turkish attack

at Domoko. Valesino has also been abandoned.

[Domoko is about ten miles south of Pharsala and 25 miles north of Thermopylae.]

ANOTHER GREEK RETREAT.

London, May 9.

The Greeks have abandoned Volo without attempting to defend it.

In retreating from Pharsala (as previously reported) the Greek troops lost heavily.

THE PARIS DISASTER.

It is now found that the Marquis de Gallifet and the Comtesse Mun did not lose their lives in the Charity Bazaar fire at Paris, as at first feared.

Up to the present 146 bodies have been recovered from the *débris* and identified. The total number of those who perished has not yet been ascertained.

DEATH OF THE DUC D'AUMALE.

The Duc d'Aumale has died from the effects of the shock caused by the death of the Duchesse d'Alençon.

THE TRANSVAAL "UITLANDERS."

The Transvaal Volksraad has repealed the Alien Immigration Law.

THE GREEKS COME TO THEIR SENSES.

London, May 10.

The Greeks, in their headlong flight from Pharsala, left behind them large quantities of munitions of war, provisions, artillery, and the Crown Prince's personal effects, all of which fell into the enemy's hands.

The Turkish army entered Volo peacefully, the town having been evacuated by the Greek troops and deserted by its inhabitants. The Greek fleet had also withdrawn from Volo, this being demanded by the Turkish General, Edhem Pasha, as the condition on which he would spare the town from destruction.

The general feeling at Athens is now very much less warlike than before.

The agitation that has been going on against the Royal Family in Greece has also subsided.

The Greek Government has sent a Note to all the Powers, announcing that it will gradually recall its troops from Crete. Consequently the Powers will offer to mediate between the combatants, but will insist on Greece placing her interests absolutely in their hands.

It is expected that an armistice of 15 days will be arranged.

BETTER FEELING IN SOUTH AFRICA.

Mr. Chamberlain has stated that the repeal of the Alien Immigration Law by the Volksraad has greatly relieved the tension that existed between Great Britain and the Transvaal.

CRETE.

London, May 11.

The Greek Government has decided to recall all Greek troops from Crete. This practically amounts to a complete surrender to the Concert of Europe and an appeal for its intervention. Up to the present time there has not been the slightest opposition to this from the Greek people; but the Cretan insurgents are still obdurate and refuse to submit, notwithstanding the recall of Colonel Vassos.

TERMS OF PEACE.

It is believed the Sultan would be satisfied if he could get a reasonable war

indemnity, together with a slight rectification of the frontier giving strategical advantages to Turkey.

SOMEBODY WHO DID FIGHT.

The British volunteers on the Greek side, under Captain Birch, fought heroically at Pharsala, and six of them, including Captain Birch, received wounds.

GREECE AND THE POWERS.

London, May 12.

In addition to the withdrawal of the Greek troops from Crete, Germany has insisted that Greece shall bind herself to acquiesce in the autonomy of Crete, and shall accept without any reservation the measures proposed by the Concert of the Powers. The Powers have presented a note making these the conditions of intervention and Greece has submitted.

THE HORRORS OF WAR.

Many of the inhabitants of Thessaly fled to the mountains on the approach of the Turkish army and are now undergoing most terrible sufferings. It is said that these refugees number 360,000, and that 100,000 of them are now making their way to Athens.

The Turks [as there has not yet been any armistice declared] are preparing for an immediate advance on Domoko; the Greeks are there encamped in the open and greatly dispirited by heavy rains and cold weather.

Greek troops to the number of 30,000 remain inactive at Arta, where they are suffering from the ravages of typhoid fever and dysentery.

THE BRITISH DUTY ON TEA.

The House of Commons has rejected a motion brought forward to reduce the duty on tea to twopence per pound.

THE CHESTER CUP.

London, May 13.

The race for the Chester Cup was run yesterday, with the following result:—

Count Schomberg	1
Piety.....	2
Shaddock.....	3

THE POWERS AND TURKEY.

The Ambassadors of the Allied Powers at Constantinople are urging the Porte to agree to an armistice, Greece having formally notified her unreserved acceptance of the conditions named by Germany and defined in the Note presented to her by the Powers, namely, that she should not only withdraw all her troops from Crete but should also bind herself to acquiesce in the autonomy of the island (under Turkish suzerainty).

The Porte, however, does not readily consent to an armistice, the war spirit having become very strong in Turkey.

The Greek troops at Arta have begun to embark (for home).

[SPECIAL GOVERNMENT DISPATCHES.]

THE CHINESE INDEMNITY.

A telegram received from London states that the third installment of the indemnity, together with the semi-annual interest and the yearly payment on account of the occupation of Weihaiwei, a sum £2,892,544 10s. 5d. in all, was paid over by the Chinese Minister in London on the 8th inst., and at once deposited in the Bank of England.

THE IMPERIAL ENVOY.

Shanghai, May 8.

His Imperial Highness Prince Arisugawa

arrived here on the 7th instant, and passed the night at the Japanese Consulate, resuming his journey on the following day.

THE PARIS DISASTER.

London, May 8.

The Empress of Austria's sister, the Duchess d'Alençon, was one of the victims of the fire at the Charity Bazaar in Paris on the 4th instant.

THE U.S. TARIFF.

Washington, May 8.

The Financial Committee of the Senate has reported on the Tariff Bill, recommending considerable reductions. The clause relating to the retroactive enforcement of the new Tariff has been altered in the sense that the new rates shall become operative from the 1st of July next. The Committee recommends the imposition of a duty of ten cents per pound on tea until January 1st, 1898.

RUSSIA, THE POWERS AND GREECE.

According to a telegram received in Tokyo on Saturday, it is reported that notwithstanding the recent note of the Russian Minister for Foreign Affairs, the Great Powers would not be averse to intervention, could they be sure of its acceptance by Greece. Greece, however, seems at present by no means disposed to terminate hostilities, and the latest telegrams from Athens state that the new Greek cabinet is determined to continue the fighting.

GREECE GIVES IN.

Received in Tokyo, May 11.

A telegram from Paris states that Greece has formally requested the mediation of the Great Powers, but that Germany's attitude in the matter appears to be rather reserved. It is further reported that the Sublime Porte is not averse to peace, but will not consent to an armistice. It will, it is added, demand only a trifling war indemnity and a slight rectification of the frontier, and will also grant autonomy to Crete.

MEDIATION OF THE POWERS.

London, May 12.

Greece having met with more reverses and seeing the futility of further resistance to the Turkish advance, the Powers offered to mediate on the 1st instant. They propose an armistice as a preliminary to the discussion of the final settlement. To this offer Greece yielded at once. A similar offer is now to be made to Turkey, which is expected to give a favourable answer thereto. The terms of peace, it is anticipated, will be moderate, including only the payment of a war indemnity and a few other claims.

THE PHILIPPINE REBELS.

(Governor-General of the Philippines to the Spanish Minister.)

Manila, May 13.

Mender-Nuner, Maragondon and Fernate, the last villages where the Cavite rebels were entrenched, were captured yesterday.

(FROM "L'AVENIR DU TONKIN.")

THE RUSSIAN FOREIGN MINISTER.

Paris, April 26.

M. Mouraviev has taken over the duties of Minister for Foreign Affairs in Russia.

AUSTRIA AND RUSSIA.

The Emperor of Austria and M. Goluchowski have gone to St. Petersburg.

THE WAR IN EUROPE.

It is stated that all the Powers are disposed

to take steps to bring about peace, but it is necessary that Greece should first of all declare that she will listen to the advice of the Powers.

(FROM JAPANESE PAPERS.)

TEA SALES IN KOBE.

Kobe, May 10.

A total amount of 35,100 catties new season's tea was sold here on the 8th and 9th inst. The price ranged from yen 30 to yen 40.

THE KYOTO FINE ART EXHIBITION.

Kyoto, May 10.

The ceremony of prize distribution at the Kyoto Fine Art Exhibition took place to-day. Viscount Hijikata, Minister of the Imperial Household Department, was present.

DEATH SENTENCE ON A MURDERER.

Matsuyama, May 10.

Ohashi Tatsukichi, who murdered his father the other day, was sentenced to death at the Local Court to-day.

MORE RETURNED EMIGRANTS FROM HAWAII.

Kobe, May 10.

The steamer *Kinai Maru* arrived here this morning conveying over 300 returned Hawaiian emigrants.

CHINESE LABOURERS FOR SIBERIA.

Nagasaki, May 10.

500 Chinese labourers from Chefoo called here en route to Vladivostok.

EARTHQUAKES AT NAGANO.

Nagano, May 10.

Earthquakes occurred here last night at 9.20 p.m. and 9.25 p.m.

RUSSIAN TROOPS FOR VLADIVOSTOCK.

Nagasaki, May 10.

A Russian steamer conveying 951 soldiers called at this port and left for Vladivostok this morning.

KOBE TEA MARKET.

Kobe, May 11.

46,900 catties of new season's tea changed hands yesterday. The price ruled from yen 29.50 to yen 52.

THE ASHIO MINE AFFAIR.

Mayebashi, May 11.

The farmers in the devastated districts being still in a turbulent condition a strong force of gendarmes has arrived here from Tokyo.

Sano, May 11.

About 700 farmers in the devastated districts started from Tochigi last night.

JAPANESE RELIEFS FOR KOREA.

Soul, May 11.

The new reliefs for the Japanese garrison arrived here this afternoon.

JYU-TO MEETINGS.

Toyohashi, May 11.

A political lecture meeting of the *Jyu-to* was held at Asakusa Theatre last night. The audience numbered over 2,000. Count Itagaki and suite started for Tokyo this morning.

Naoyedzu, May 11.

A social gathering of the *Jyu-to* was held at the Injo temple here to-day. A political lecture meeting is to be held to-night.

THE GOVERNOR OF VLADIVOSTOCK IN JAPAN.

Nagasaki, May 11.

The Governor of Vladivostok and suite arrived from Chefoo this morning. In the afternoon they left for Kobe by the *Kobe Maru*.

KOBE TEA SALES.

Kobe, May 12.

The second shipment of new season's tea from this port was 17,979 catties.

DISSOLUTION OF A COMPANY.

Osaka, May 12.

The Nihon Seigo Kaisha (Steel Factory of Sakai) at a special general meeting held yesterday decided to dissolve the Company on account of its disorganised condition and the absconding of the President and other principal officials.

THEIR MAJESTIES' STAY AT KYOTO.

Kyoto, May 12.

Their Majesties the Emperor and Empress will stay here during the current month.

INUNDATIONS AT TSUSHIMA.

Tsushima, May 12.

Owing to the excessive rainfall the lands in Kaisai-gun are inundated and some damage has been done to the wheat crops.

POLICE FOR FORMOSA.

Nagasaki, May 12.

213 police constables left here for Formosa to-day.

HAWAIIAN AFFAIR.

San Francisco, May 12.

In regard to the Japanese Emigration question the Hawaiian Authorities have requested the mediation to a certain European Power.

THE QUESTION OF RUSSIAN MILITARY INSTRUCTORS IN KOREA.

Soul, May 12.

Officials documents presented by Mr. Waeber, Russian Minister to Korea, are to the effect that the engagement of Russian drill-instructors will be postponed until the middle of June by order of the Russian Government.

Soul, May 12.

An order given by the Russian Government to Mr. Waeber, Russian Minister at Soul, is to the effect that as the engagement of the Russian drill-instructors affects the peace of the East, the matter shall be postponed until the arrival of the Japanese Minister in St. Petersburg. The Russian Minister to Japan, who is expected to arrive in this country early next month, has been ordered to Korea en route to Japan.

REPAYMENT OF KOREA'S JAPANESE LOAN.

Kobe, May 12.

Yen 600,000 out of 1,000,000 repaid by the Korean Government to Japan was brought to this port by the *Chusetsu Maru* last evening and at once handed over to the Kobe branch of the First Bank.

KOBE TEA SALES.

Kobe, May 13.

Some 51,100 catties of new season's tea changed hands yesterday. The price ranged from yen 31 to yen 52.

CASUALTY TO A STEAMER.

Osaka, May 13.

The steamer *Setsu Maru*, of the Osaka Shosen Kaisha, struck a sunken rock yesterday morning, early, in a thick fog and gale, and foundered. The passengers and mails were saved. There is a prospect of raising the vessel.

RETURN OF JAPANESE TROOPS FROM WEIHAIWEI.

Bakan, May 13.

The steamers *Toyohashi Maru* and *Asagao Maru*, with time expired soldiers, arrived here from Weihaiwei this morning and at once left for Yokohama.

EXCITEMENT AT MAYEBASHI.

Mayebashi, May 14.

A political lecture meeting is to be held at Kirifu-machi to-day and at Ota to-morrow. The police-superintendent, inspectors and a number of constables have proceeded to the scene to keep order. Much excitement prevails among the farmers.

FOREIGN REPRESENTATIVES AT SENDAI.

Sendai, May 14.

The *Chargé d'Affaires* of the United States and the Chinese Minister arrived here from Tokyo last night.

An Austrian noble together with the Austrian Minister also arrived last night from Tokyo. This morning they left for Matsushima.

BURGLARY AT MIYAZAKI.

Miyazaki, May 14.

A burglar broke into the house of Mr. Senda, Governor of this Prefecture, last night and made off with over yen 700, together with a quantity of clothing.

GENDARMES FOR KOKOA.

Osaka, May 14.

Some 32 gendarmes ordered to Korea to protect the telegraphic lines there left here last evening for Ujina, whence they take steamer for Korea.

CHESS.

All Communications to be addressed to the Chess Editor.

The Yokohama Chess Club is closed for the season: and reopens on Monday 4th October.

The Tokyo Chess Club meets at the Tokyo Hotel, every Friday, from 1 p.m. to 7 p.m.

SOLUTION OF PROBLEM No. 309.

PROBLEM No. 313.

By I. ZIMMERMAN.

White to play and mate in three moves.

PROBLEM No. 314.

By T. R. SHAW.

(First prize in Weekly Irish Times tourney.)

White to play and mate in two moves.

PILLSBURY WINS THE MATCH.

(San Francisco Chronicle.)

Jackson Showalter, after having made as gallant a fight as it was perhaps possible for a man to make, has been compelled to relinquish the championship honours he has won so long. Pillsbury, from the very beginning of the present contest, has been a strong favourite, and critics everywhere predicted for him a speedy victory, and it is, consequently, not a matter for surprise that he should eventually run out a winner. As the matter stands, Showalter is being congratulated on every hand for the excellent showing he made. He is

actually being placed on an even plane with his successful rival, and has plenty of friends willing to wager that a second contest with Pillsbury would have a different termination. Be that as it may, chess players generally throughout the United States are greatly pleased, not that Pillsbury has done less, but because Showalter has done more than was expected of him, and has proved himself to be a player of which the country might justly be proud.

The nineteenth game was played on Saturday, 10th April, and resulted in a victory for Showalter. The twentieth game was played two days later. Pillsbury obtained a strong position and defeated the Kentuckian after a capital game. The twenty-first and decisive game of the match was played on Wednesday, 14th April. At its close the score stood: Pillsbury, 10; Showalter, 8; drawn, 3.

GAME No. 706.

- | | | | |
|------------------------|------------------------|--------------|-------------------------|
| WHITE. | BLACK. | WHITE. | BLACK. |
| White—J. W. Showalter. | Black—H. N. Pillsbury. | | |

| 23 R K B sq. | P B3 (e) | 51 B P ch. | K K5 |
| 24 B Q5 ch. | K R sq. | 52 R Q7 | P B5 |
| 25 Q R K sq. | P Q B4 | 53 P P | K P |
| 26 B K7 | R Q sq. | 54 K K2 | R K17 ch. |
| 27 P Q5 | P K R3 | 55 K Q3 | R R7 |
| 28 P B4 | B B4 | 56 R K7 | K B4 |
| 29 Q R K2 | K R2 | 57 P Q6 | Black resigns |
| 30 B B6 | P R3 | | after a few more moves. |

NOTES.

- (a) This novelty marks the departure from White's line of play in the fourth game, viz. 6—R to K sq. Kt takes B; 7—Kt takes P; 8—B to K15; 9—Kt takes P; 10—B takes B; 11—Kt takes B; 12—Q takes Kt, and Black is a pawn ahead, with a safe game.
- (b) Giving up the pawn in order to develop his game.
- (c) Better than holding on to the pawn by 10.... Kt takes B, when might follow: 11—Kt takes Kt, P to B4; 12—B to Kt 3, ch.; K to R sq.; 13—Kt to Kt 6 ch., &c.
- (d) 17.... P to B3 seems altogether better.
- (e) If 23.... B to K4 sq.—B to Q7 wins a pawn.
- (f) Well played. Now that Black's rooks are dislocated he cannot accept the proffered exchange, as the Q P could not then be stopped.
- (g) Much better than the temporary gain of a pawn, 43—R takes Kt P. Showalter's play hereabouts resembles the built-up moves of a skilful endgame.
- (h) If Bish-p interposes it is taken off, and the pawn marches on without impediment.
- (i) More Kling and Horwitz.
- (j) The only resource. The rook cannot move, and if 47.... B to Kt 8 (he must cover R to K4, ch.), then 48—B to Kt 5; B to K5, ch.; 49—R takes B, P takes R; 50—B to Q7, ch., &c.

GAME No. 707.

- | | | | |
|------------------------|------------------------|--------------|---------------------|
| WHITE. | BLACK. | WHITE. | BLACK. |
| White—J. W. Showalter. | Black—H. N. Pillsbury. | | |
| 1 P K4 | P K4 | 14 B Q6 | R Kt sq. |
| 2 Kt KB3 | Kt QB3 | 15 B B2 | Q K K15 |
| 3 B K15 | Kt B3 | 16 B R | K B |
| 4 Castles | Kt P | 17 Q Q6 ch. | B K2 |
| 5 P Q4 | Kt Q3 (a) | 18 R K sq. | |
| 6 B R4 | P P | | P K K13 |
| 7 P QB3 | P P (b) | 19 Q Q2 (f) | Q R4 |
| 8 Kt P | B K2 | 20 Kt Q5 | B Q sq. |
| 9 Kt Q5 | Castles (c) | 21 Q B3 | P B3 |
| 10 R K sq. | B B3 | 22 Kt P | B R4 |
| 11 B B4 | Kt K sq. (d) | 23 Kt QP ch. | and mates |
| 12 R Kt (e) | Q R (f) | | in 4 more moves (g) |
| 13 Kt P | Q K5 | | |

NOTES.

- (a) As Showalter, with 6—B to R4, appears to have discovered the correct reply to 5.... Kt to Q3, no doubt Pillsbury will back up: but it may 5.... B to K5.
- (b) Hazardous to the point of recklessness.
- (c) 9.... P to Q Kt 4 seems the best of a bad selection.
- (d) A protecting move (against 12—Kt takes P) that guards nothing, as White immediately shows.
- (e) The B Queen was driven to K Kt 5 in view of the brilliant continuation.
- (f) Far better than 10—R takes B, Kt takes R; 11—Kt to Q5, Q to K3; 12—Q takes R, Q takes Kt, and the attack is over.
- (g) A magnificent game. Though White's play is in strict accordance with the modern school, it everywhere suggests an old master.

STEINITZ AT WORK AGAIN!

Steinitz played twenty-two games simultaneously in Vienna a few days ago, winning seventeen of the number and losing two, the balance being drawn. The veteran leaned heavily on his cane while walking around the tables.

GAME No. 708.

The following is one of the consultation games played by Mr. Lasker during his recent visit to the St. George's Chess Club, Birmingham, Mr. Lasker's opponent in this game being Messrs. Hyde, Bolus, and Bodfish.

(RUY LOPEZ.)

| 10 Kt B3 (b) | B K3 | | B x Kt |
| 11 K R K sq. | P Kt3 | 33 R (K6) x | Q B3 |
| 12 B K13 | Kt R4 | | Q B3 |
| 13 Q K3 | Q B3 | 34 R K5 | Q Q sq. |
| 14 Kt Q4 (c) | P B4 | 35 R B3 ch. | K K12 |
| 15 K Kt K2 | Q R K sq. | 36 R K6 | Q Q8 ch. |
| 16 P K K14 | Kt Kt2 | 37 K K12 | P K R3 |
| 17 P K5 | Q R5 | 38 R K7 ch. | K K13 |
| 18 Kt K4 (d) | P B4 | 39 R (B5) K | |
| 19 P x P | B x Kt P (e) | | P K15 |
| 20 P Kt | R B6 | 40 R (K5) K | |
| 21 Kt B6 ch. | K x P (f) | | 6 ch. K K14 |
| 22 K x R ch. | K B sq. | 41 R K17 ch. | Resigns (i). |
| 23 Kt K13 (g) | R x Q | | |

NOTES.

- (a) We have suggested this continuation, having tried it not unsuccessfully on various occasions, chiefly against Mr. Mortimer at the British Chess Club, the object being to provoke 5.... P to B3, which weakens Black's king's side, and closes the diagonal of the intended B to Kt 3. The text move seems the best reply.
- (b) White has now the superior game, Black having a double pawn and a weakened king's side pawn, owing to P to Kt 3.
- (c) Gaining time, by attacking the Q B 2, to bring this Kt back to K2, and so prevent Kt or Q to B5.
- (d) A pretty manoeuvre, which was initiated with the bold P to K Kt 4.

Position after White's 19th move.

- (e) A clever counter-attack, which might have succeeded against a good many players but Lasker. There are a number of dangerous variations in it; but a correct line of play which renders it unsound. However, the allies had no choice, and selected the variation which offered the best chance.
- (f) 21.... Q takes Kt, then 22—Q takes R, ch., K takes P; 23—Kt to K13, forcing the exchange of queen.
- (g) Simplicity itself. He remains with two rooks and knight for the queen.
- (h) They might have retained the bishop with B to B6; but they would have lost eventually in another way.
- (i) Mate being unavoidable.

Nos. 2/100, Plain	100.00 to 105.00
Nos. 2/60, Gassed	72.00 to 80.00
Nos. 2/80, Gassed	86.00 to 95.00
Nos. 2/100, Gassed	116.00 to 127.00

RAW COTTON.

	PER POUND.
American Middling	\$23.00 to 23.50
Indian Broach	22.00 to 22.35
Chinese	21.00 to 21.50

METALS.

Moderate trade at previous rates. Buyers are now hopeful that exchange will improve yet further so as to press less hardly on the market generally.

	PER POUND.
Flat Bars, 1 inch	\$3.90 to 4.00
Flat Bars, 1 inch	4.10 to 4.20
Round and square up to 1 inch	3.90 to 4.20
Iron Plates, assorted	4.00 to 4.40
Sheet Iron	5.00 to 5.10
Galvanized iron sheets	10.00 to 10.50
Wire Nails, assorted	6.60 to 6.90
Fin Plates, per box	5.50 to 6.00
Pig Iron, No. 3	1.90 to 1.95

RHOSHINE.

Nothing fresh in this market. Exchange is rising again; sellers and buyers alike feel more cheerful.

American	\$2.05 to 2.07
Russian	2.00 to 2.05
Langkat	—

SUGAR.

Brown—Arrivals from the South have made the market more quiet. White Java—Current sales. Refined—Steady.

	PER POUND.
Brown Takao	\$3.60 to 3.65
Brown Manila	4.40 to 5.00
Brown Daitong	3.15 to 3.20
Brown Canton	3.30 to 4.20
White Java and Penang	6.60 to 6.70
White Refined	7.00 to 9.00

EXPORTS.

Very little doing. Japanese are trying to push off their remaining stock but buyers are wary. Crop prospects are too good all round to tempt exporters into making shipments of old crop just now. We withdraw quotations, prices being nominal and irregular.

RAW SILK.

QUOTATIONS.

THE GREATEST WONDERS OF MODERN TIME

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN. HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations. Mr. J. T. COCHRAN, in his account of his extraordinary travels in China, published in 1891, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a tea-spoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining 'stock.'"

Sold by all Chemists and Medicine Vendors throughout the World. May 1st, 1896.

MILKMAID BRAND CONDENSED MILK

The "Milkmaid" Brand is guaranteed to contain all the cream of the original milk. In the process of manufacture nothing but water is removed, nothing but the best refined sugar added.

Avoid low-priced brands from which the cream has been abstracted, and ask for the "Milkmaid" Brand, the best for all purposes.

June 14th, 1896.

DINNEFORD'S

The Universal Remedy for Acidity of the Stomach, Headache, Heartburn, Indigestion, Sour Eructations, Bilious Affections.

YOKOHAMA: SATURDAY, MAY 22ND, 1897.

DEATH.

At the Occidental Hotel, San Francisco, Cal. on April 30th, Miss HARRIET G. BRITTON, for many years resident at No. 2, Bluff, Yokohama.

SUMMARY OF NEWS.

A TELEPHONE service was opened in Kyoto on 20th inst.

CRICKET has commenced in Yokohama for the season 1897.

MR. YANO FUMIO, the newly appointed Minister to China, has left for his post.

YOKOHAMA Regatta was held on Saturday in anything but propitious weather.

MR. SYDNEY MORSE'S Concert at the Public Hall on Tuesday was a great success.

A CONFERENCE of the prefectural Governors

throughout the country is to meet in Tokyo on the 2nd June.

MARQUIS SAIONJI, former Minister of Education, is now reported to be lying seriously ill at Paris.

A BRILLIANT fancy-dress ball was given at the French Legation, Tokyo, at the beginning of this week.

MR. CHINDA SUTEMI, late Consul-General at Shanghai, was appointed *Chargé d'Affaires* to Brazil on the 17th inst.

THE *Formosa Daily News* made its first appearance at Taipeh on the 8th. It was printed in Japanese, Chinese, and English.

MR. MURODA YOSHIBUMI, *Chargé d'Affaires* in Mexico, was appointed Minister to Peru, in addition to his former post, on the 17th inst.

THE Osaka Shosen Kaisha has stopped running its steamers between Kobe and Yokohama since it took up the services to Korea and Formosa.

It is proposed to open an Exhibition of naval arms, spoils of the late war, ships' machinery, and other marine appliances in Ueno Park in the autumn.

NEARLY all the Chinese in Formosa are quietly remaining as heretofore, as Japanese subjects, except at Tainan, whence several have left for China.

A NUMBER of Infantry belonging to the Second Regiment, Tokyo, arrived at Yokohama this morning by the *Seitoku Maru*, from Weihai-wei.

VISCOUNT TAKASHIMA, Minister of War and Colonization, will, it is said, resign the latter post shortly and Baron Hasuba will most likely succeed him.

JAPAN joined the International Railway Conference in Belgium this year and 200 yen per year is to be contributed towards the expenses of the Conference.

PRINCE WI-WHA OF KOREA, whose sojourn in Japan appears have caused some anxiety to the Korean King and Court, is leaving on a trip to the United States.

THE Emperor and Empress are prolonging their stay at Kyoto, and the Crown Prince has left the capital to join them, owing, it is said, to the prevalence of measles in Tokyo.

WORK on the Uraga dock, which commenced two years ago, has been suspended on account of a breach of contract between the Dock Company and the Town Council.

It is reported that Viscount Aoki, Minister of Germany, has been ordered home, but the Viscount has requested Count Okuma to permit him to postpone his departure for a while.

It is reported that Count Okuma, Minister of Foreign Affairs, and of the Agricultural and Commercial Department, will resign the latter post and may probably be succeeded by Count Goto.

A BOAT belonging to the Japanese cruiser *Kai-mon*, while conveying a landing party to Twatua Formosa, on the 8th inst, capsized in a squall of wind, and a lieutenant and eight seamen were drowned.

A STRANGE disease has broken out in a district in Fukushima Prefecture among human beings and domestic cats, from which many persons have died, and almost all the cats in the district have succumbed.

MR. SATO SHINJIRO, President of the Yokohama Trading Co., has been sentenced to a fine of

33,000 yen for defrauding the excise by illegally selling 800 casks of Japanese wine. He has appealed against the decision.

A STRIKE of shipping coolies in the employ of the Nippon Yusen Kaisha, which lasted for several days, caused great inconvenience and loss to the Company and shippers. It came to an end on the 16th instant, by a compromise.

THE Japanese Authorities will shortly carry out the scheme of raising native soldiers in Formosa. The term of their engagement is fixed at four years, at the expiration of which term they are to be placed on the reserve for another four years.

THE Compagnie Nationale's steamer *Canton*, which sank a few months ago at Tourane after striking a rock while leaving the port, has, we learn from Saigon papers, been floated. She is to be taken to Saigon for repair if the dock is at liberty; otherwise she will go to Singapore.

ONE case of black plague was reported at Anpei, Tainan Prefecture, Formosa, on the 5th inst.; 81 cases at Tainan from the 6th inst. to the 15th; one case in Taichu Prefecture on the 13th inst., and three cases on the 14th inst.; the total number from the outbreak up to date is 294.

THE Chinese Government has decided to pay off the balance of the war indemnity to Japan shortly and is said to be negotiating a loan of 100,000,000 taels from an English syndicate for the purpose. By this means they will save a large sum in interest and obtain other advantages.

THE report and accounts of the Club Hotel, Limited, for the year ended 31st March, 1897, have been issued. The gross profits for the year are \$25,240, inclusive of \$2,309 brought forward, of which, after meeting outgoings, \$7,417 is left for distribution. It is proposed to pay a dividend of 4 per cent., in addition to the interim dividend of 3 per cent. already paid, and to carry forward \$1,017.

THE investigation made by the Department of Agriculture and Commerce into the Ashio copper mine poisoning affair has concluded, and the decision arrived at, after the sanction of the Cabinet has been obtained, will be communicated to Mr. Furukawa, owner of the mine, and to the farmers and other residents of the districts devastated by the poisoned matters from the mine. It is said that the regulations are such as to remove the grounds of complaint.

IMPORTS are as dull as ever, the trade of the week being very small. Yarns opened with sales of doubles, mostly for arrival, then a fall took place in exchange, and buying ceased. Something has been done in shirrings at low figures, but woollens found no buyers. Fancy-cottons are quiet and nominal. Metals have moved fairly well, the low exchange favouring the trade somewhat, and tending to keep prices firm. Kerosene is dull, deliveries not being large, while quotations are sagging. Business is as brisk as ever in the sugar trade, though prices, in view of large arrivals, have fallen again. A fair daily trade has been done in raw silk for Europe, fine filatures being most in demand at irregular prices. Crop news from all parts of the world are uniformly good. Waste silk is finished for the moment, the season closing without the slightest sign of life. The flurry caused in tea circles by the contemplated new tax in the United States has subsided, and the week closes quiet after a period of great activity. Settlements to date are 50,000 piculs, and export about two million pounds. The bottom has fallen out of exchange again.

SPRIT OF THE VERNACULAR PRESS DURING THE WEEK.

No less than five of the leading Tokyo journals devote their editorial columns to the discussion of the American Tariff question. They are the *Fiji Shimpō*, the *Hochi Shimbun*, the *Nichi Nichi Shimbun*, the *Tokyo Asahi Shimbun*, and the *Yomiuri Shimbun*. It seems to astonish the Japanese nation that the legislators of the United States should suddenly reverse the conspicuously friendly policy hitherto pursued by them towards Japan, and should strike a deliberate blow at several of the growing industries of this country. The *Fiji Shimpō* has always lent its powerful voice as leader of the chorus that used to sing the praises of American justice and moderation, and is now proportionately disappointed to find its faith shattered. It publishes a long article recalling chapters of history very familiar to white-headed residents, but probably unknown to, or unthought of by, the young generation. Mr. Townsend Harris' celebrated passage at arms with Sir Rutherford Alcock is probably one of the most prominent features that present themselves in any portrait now drawn by Englishmen of the former's career in Japan, and not unnaturally concluding that the fault was all on the side of the American, they relegate Mr. Harris to a low place among diplomats. Yet he was an extraordinary man; a man who could rise far above the prejudices and passions of his time, and exhibit in all his public and private acts that rare courage so admirably eulogised by a subsequent poet of his own country:—"They are slaves who would not be, in the right with two or three." After Mr. Harris' example had borne fruit, after imperious contempt for everything Oriental had ceased to be a cardinal principle of Occidental conduct, it was comparatively easy for men of liberal instincts to preach the doctrine of sympathy and toleration. But Mr. Harris stood alone in his day, and to the open hostility of his colleagues he added risks of personal peril and the weight of grave responsibilities. When the Mito *Ronin* attacked the British Legation at Tozen-ji; when the British and French Representatives, deciding that the Japanese Government could no longer be trusted to protect their lives and property, pulled down their flags and retired to Yokohama, Mr. Harris kept the stars and stripes floating over Zempuku-ji. His belief in the good faith of Japanese officialdom never wavered, and he alone had the perspicacity to perceive that by visiting upon the heads of the Tokugawa Government the sins of its enemies, the British and French were merely playing into the hands of the anti-foreign section. He has his reward, but it did not come in his life-time. Japan now remembers him as the man who first understood her; the man who gave her uniformly friendly and wise counsel; the man who helped her to make treaties which, though not perfect from the point of view of a quarter of a century afterwards, were yet incomparably better than anything she could have hoped to obtain without his aid; the man who showed her plainly the routes leading to her best interests and therefore, also, to the best interests of her treaty friends. Before Mr. Harris left Japan, the people of this country had learned to differentiate Americans from all other nationals, and to trust them as one trusts the members of one's own family. A striking proof of that confidence was furnished in the transactions with Mr. Pruyn, the successor of Mr. Harris. The Japanese Government handed to him, at various times sums of money aggregating eight hundred thousand dollars, for the purpose of purchasing war-ships in America, and never thought of obtaining any security except his simple receipt. The *Fujiyama Kan* and the *Asuma Kan* (originally the *Stonewall*) were the results of that transaction, and though the arrival of the second vessel was long delayed owing to internecine troubles in America, no one in Japan ever entertained any doubt of the issue. Above all the American nation differentiated itself from other Occidental peoples by the restoration of its share of the Shimonoseki in-

demnity, an act never to be forgotten. The upshot of America's long and consistent policy of genuine friendship towards Japan was to beget a corresponding sentiment of amity on the Japanese side. To be an American was to possess a passport to Japanese good-will. In the remotest parts of the country, if a traveller said that he was American, he could confidently count on a hearty welcome. The American language commanded the attention of ninety-nine students out of every hundred; not the English language but the American language. The commerce between the two countries did not, indeed, satisfy either side. The balance was largely in Japan's favour, and that fact constituted a source of perpetual regret to the Japanese. Of late years, however, the rapid rise of manufacturing industry has afforded an opportunity to redress the balance in some slight degree by purchasing American machinery, and the Japanese have gladly availed themselves of the occasion. It was a sentiment of friendship, too, that dictated the ordering of two cruisers in America. Economically and technically speaking, Japan seemed likely to do better by placing her orders elsewhere, but gratitude must have some potency, and, besides, she believed that unless American ship-builders could count on giving satisfaction, they would not have taken the orders. At no time, in short, did the friendship of the two people appear heartier than at the moment when the new American Cabinet sprung the mine of a Tariff virtually prohibitive of Japanese imports. Were it a Tariff merely for revenue purposes or for protection, there would be little to say. But it is a prohibitive Tariff. The effect will be to completely alienate Japanese friendship. Very probably the obnoxious measure is nothing more than a political manoeuvre, due to the machinations of a group of office-lovers, but its results will be none the less fatal unless the American people take steps to avert them. The *Fiji*'s article is but imperfectly summarized here. For many years the apostle and propagandist of philo-Americanism in Japan, the leading vernacular journal naturally finds this conjuncture as astonishing as it is unwelcome.

The *Nichi Nichi Shimbun* imports less sentiment into its review of the situation. It has little hope that the modifications of the Tariff by the Finance Committee will be accepted by the Senate, and it concludes that, even if they are accepted, the rates will remain practically prohibitive. As to its effects upon the growing industries of Japan, which find their best market in the United States, the *Nichi Nichi*'s comments may easily be imagined. What seems most interesting in its essay is the plea it advances on America's behalf; a plea cognate with that put up for the mockers at the Crucifixion—"they know not what they do." The horizon of an American business man does not extend beyond the range of this individual interests. He has no real conception of national economy; no sound idea of national finance. The profits of a small section of the community are set by him above the profits of the whole. This narrowness of vision is proverbial. If will be corrected sooner or later, but in the meanwhile, the American people themselves and all those having trade relations with them, must look to suffer heavy losses. The latest action of the Washington Cabinet can not fail to come as a rude surprise to the Japanese, who suddenly find an attitude of most unfriendly exclusiveness adopted towards them by the people that they regarded as their best friends. But the question has probably not presented itself to America in a national aspect, any more than other economical and commercial questions do. She is pursuing her usual short-sighted, shallow policy, and the suffering will not fail to fall upon her own shoulders as much as upon those of her friends. What Japanese statesmen must do is to spare no efforts to make the true bearings of the question apparent to the officials and people of America.

The *Hochi Shimbun* takes the striking view that Japan finds herself now occupying to-

wards America a situation parallel to that occupied by America towards Japan forty years ago. Just as the United States then expounded to Japan the unwisdom of excluding foreign goods, and the violation of natural laws involved in a policy of isolation, so Japan has to expound the same truths to America to-day. That is the gist of the *Hochi*'s writing. It does not fail to remark that the new fiscal programme of the United States is inconsistent with any pretence of friendship towards Japan, and that its economical unwisdom has been already demonstrated by experience, but its main point is that America is now following the very route from which she so resolutely and successfully turned Japan forty years ago.

That the proposed Tariff rates are intended to strangle the trade in Japanese imports, and that the result must be to impair the friendly relations between Japan and America, is a conviction shared by the *Tokyo Asahi* and the *Yomiuri*. The former does not endorse the suggestion that Japan, by way of retaliation, should impose upon American kerosene such a tax as to effect its displacement by Russian oil, but, like the *Yomiuri*, it hints that self protective measures may become unavoidable. The serious character of the blow that will be dealt to the infant industries of Japan if the increased imposts are levied, and the marked want of consideration betrayed by such a policy, are dwelt upon at some length. It is pointed out that one consequence of destroying the commerce between the two countries will be the closing of the Nippon Yusen Kaisha's newly opened steamship service to Seattle, and the abandonment of the Toyo Kisen Kaisha's project to place two large steamers on the San Francisco route. With regard to the duty of ten cents per lb. upon tea, the *Yomiuri* is unable to understand it, and falls back upon the report that the tax has been instituted in deference to the wishes of a number of New York tea merchants, who, finding themselves loaded with a quantity of last year's leaf, have devised this scheme for getting rid of it. The imposition of the tax was preceded by a great deal of talk about the necessity of preventing the import of inferior grades of tea, but it is difficult to see how any such result can be secured by a method of the kind. We need not follow our contemporaries' arguments at greater length. The upshot of their contention is that America aims at the destruction of Japan's industrial development, and is indifferent to the sacrifice of her friendship.

The Diet voted a sum of over nine hundred thousand *yen* to cover expenses connected with the Paris international exhibition of 1900, the money to be paid out as a continuing outlay from 1897 to 1901. It is evident that such a sum can not suffice to make advances to exporters; it will barely be enough to cover costs of freight and insurance, and travelling expenses of officials and others. There is much reason to apprehend, therefore, that the articles sent to the Exhibition will be of a cheap and inferior character. Japanese manufacturers have incurred considerable loss, from time to time, in connection with foreign exhibitions, and they naturally hesitate to launch out upon any costly schemes. Besides, they are deficient in capital. They can not afford to invest large sums with the risk of having their exhibits returned upon their hands. It would seem, therefore, that unless capitalists come to the rescue, the country's manufactures will be poorly represented. On that subject the *Fiji Shimpō* writes. It points out that an international exhibition in such a capital as Paris is always a unique opportunity, and that, what is more important, the approaching exhibition will be Japan's first chance of presenting herself industrially to the world since her war with China. A strong appeal is made to men of means to assist the country's struggling artisans, and enable them to do justice to themselves and their art. A suggestion has been made that a good plan would be to buy up any choice objects shown at the various

domestic exhibitions during the next three years, and to send them to Paris in 1900; but the *Fiji* traverses that idea on the ground that such articles, being intended for the home market, would not be suitable for sending abroad. The best plan is to place funds at the disposal of manufacturers, so that they may have a free hand to carry out their ideas.

The Government having sold 40 million *yen* worth of loan bonds to Messrs. Samuel Samuel & Company, there arises the question, what effect will that transaction produce upon the money market in Japan. These bonds were deposited by the Treasury with the Bank of Japan and the interest on them formed an item of revenue. It will, therefore, be the Government's object to lose no time in converting the money obtained for them into some interest-paying form. The price is to be paid in London, and will be lodged in the Bank of England, just as the installments of the Chinese Indemnity have hitherto been lodged. It must, therefore, be carried to Japan, and that may be effected by means of bills of exchange, or by transporting it as bullion. In the former case, the Government would receive convertible notes at this side in return for the gold in London, and by re-issuing those notes through the Bank of Japan, interest would accrue, and no appreciable change would take place in the volume of the currency. But if the second plan be pursued, namely, the transport of the gold in the form of bullion and its subsequent coining in Japan, then convertible notes must be issued against the new stock of coin, and the volume of the currency would be swelled to that extent. Hence the ultimate economical effect of the transaction depends upon the Government's method of procedure. These are the views of the *Shogyo Shimpō*. Our contemporary also takes the opportunity to point out that it is a mistake to suppose that the Treasury's finances are eased by the sale of these bonds. An increase of revenue or a decrease of expenditure could alone confer financial convenience, and the conversion of securities into specie does not add anything to the State's income or subtract anything from its outlay.

JAPANESE SILK IN AMERICA.

Some reports from a branch in New York of the *Doshin Kwaisha* (Foreign Trade Company) of Yokohama are very timely. "Last year the silk trade in America reached its climax of depression, showing a considerable decrease in the amount exported. So far as the actual state of business in America is concerned, the silk trade of Japan will continue prosperous for three or four years to come, for the following reasons:—

- 1.—Silk has been excluded from articles of luxury and has become of daily necessity.
- 2.—Last year's depression having decreased production, no considerable stock remains on the American market.
- 3.—The new Cabinet having adopted a protective tariff, not only will the import of inferior silk be prevented, but the credit and safety of the merchants engaged will be increased.

"The present Government's enactment for preventing the import of silk goods is framed for the purpose of stimulating the silk industry throughout America. Silk formerly exported from Japan in the shape of woven goods will now be imported into America as raw silk. The enforcement of a protective taxation will certainly increase the export of raw silk."

The Report of the Silk Dealers' Association in New York shows that silk goods imported into America during the year ending June last amounted to \$23,529,700 in value, against 8,003,450 cattie of raw silk.

The following table shows the export from different countries:—

	Sale.	Value.
Japanese silk.....	29,521	\$14,517,351
European silk.....	6,919	6,092,265
Hongkong and Shanghai silk..	19,772	6,140,843
Oriental silk through Europe...	315	117,875
Totals.....	56,527	\$26,868,334

From the above it appears that Japan occupies a prominent position. One-half the silk used in the United States comes from Japan.

THE CONFERENCE OF THE UNITED CHAMBERS OF COMMERCE.

The sixth meeting of the United Chambers of Commerce throughout the empire has been held in Hiroshima since the 7th instant. Among the most important questions introduced for discussion were the following:—

1. Amendment of the Regulations for the union of the various Chambers of Commerce.
2. Representation to be made to the proper authorities urging the necessity of imposing responsibility upon the Minister of Communications for any loss of, or injury to, registered mails, by the Postal Department.
3. Representation to the Minister of Finance with regard to the postponement of the period of exchanging the notes issued by banks which have been closed.

The first of the above questions was passed with slight alterations; the second, after much discussion was reserved for further investigation, while the third was withdrawn for presentation next session.

Another important question introduced was to effect alterations in the provisions of the Commercial Code with respect to joint stock companies; the alterations proposed were:—

1. To rescind the provisions regarding the required sanction for the initiatory and actual organization of companies.
2. That every company shall, after the general initiatory meeting, effect registration within fourteen days.
3. That no issue of share certificates shall be permitted until after the payment of one tenth of the capital proposed.
4. That any transfer of stock effected before one tenth of the total value of the shares has been paid up shall be invalid.
5. That a petition shall be forwarded to Government for organising provisions with regard to the amalgamation of commercial companies as prescribed by the Commercial Associations Law.

"FIRST STEPS IN COMPOSITION."

First Steps in Composition, by J. N. SEYMOUR, B.A., M.B., Tokyo, Z O P. Maruya & Co.

Some years ago it was our pleasant task to notice a capital little work by Dr. J. N. Seymour compiled for the purpose of engrafting the rules of English syntax upon the minds of Japanese students. We have now before us another brochure by the same author, entitled "First Steps in Composition." Concerning the purpose of the work the author gives this statement in his preface:—

It is much to be regretted that composition should be so studiously neglected. In many schools the only methods of studying English are translations from that language into Japanese, and a scamp through some book of grammar which has been compiled only for pupils whose mother tongue is English. Small wonder then that, even amongst such students as enter the Higher School, few can compose a simple sentence without making some egregious grammatical blunder. Repeated drill in grammar with practical exercises is necessary. This little book might probably be enlarged with advantage, but as I cannot reckon on having time for such work in future, I publish it in its confessedly imperfect form.

There are 40 lessons, each intended to illustrate the use of some particular part of English speech, as the interrogative conjunction, the indicative mood, verbs like take, bite, be, and blow, the three perfect tenses, adverbs of manner, and so on. There is also a vocabulary, containing all the words used in compiling the lessons, together with their English equivalents. The book is printed in Roman letters and in the *Kana* syllabary, a separate volume being given to each form. Simple and carefully chosen, the sentences are excellently suited to illustrate the grammatical subjects to which they refer. Indeed, it appears to us that, though primarily intended for the use of Japanese students of English, these "First Steps" would be most serviceable to English students of Japanese also, for while conveying much necessary information, they are happily free from the two common errors of such works, namely, a tendency to carry the learner into deep water before he has acquired ability to keep his head above shallow.

JAPAN'S FINANCIAL POSITION.

The discreditable methods of administration adopted by the Matsukata Cabinet, remarks the *Seikai-no-Nippon*, are now beginning to entail serious consequences in various directions. The so-called Government merchants in Tokyo have, after a secret conference among themselves, resolved to forward a memorial to the Government advocating the raising of a foreign loan, so as to promote their own interests on the one hand and to back up the policy of the Government on the other.

Many practical business men in Osaka also have, it seems, resolved upon a similar scheme, under the belief that financial circles in Japan would be thrown into disorganisation if a fresh internal loan were raised to the amount of sixty or seventy million *yen*, and that a financial panic would be the inevitable result. Some critics are inclined to attribute these proceedings to the artifices of the present Cabinet, which will soon, our contemporary predicts, take steps for raising a foreign loan.

The *Seikai-no-Nippon's* reasoning leaves a great deal to be desired in point of clearness. So far as we understand the situation, the desire of the present Cabinet is to avoid recourse to a direct foreign loan. One of the objects of adopting gold monometallism was to avoid any such necessity by opening the European markets to Japanese public securities. If consols, war bonds and so forth could be sold freely in London, Paris and Berlin, foreign capital would flow into the country, and the financial tension would be relieved. A foreign loan on a gold basis could have been obtained at any time within the past ten years on excellent terms. But the Japanese Government naturally shrank from the risk of contracting a debt in a currency to the appreciation of which no limit could be assigned. If, however, the adoption of gold monometallism did not obviate the necessity of direct recourse to European capitalists, then one purpose of the change would have been defeated, and the financial policy of the Matsukata Cabinet correspondingly discredited. Ever since the gold Bill was passed it has, consequently, been the endeavour of the Opposition journals to prove that a direct foreign loan was unavoidable, yet now we have the *Seikai-no-Nippon* accusing the Cabinet of manufacturing a measure which may justify it in contracting such a loan. The thing is manifestly absurd.

THE STRIKE OF THE NIPPON YUSEN KAISHA COOLIES.

The strike of the Nippon Yusen Kaisha's coolies has terminated and the men are at work again. It is stated that they yielded unconditionally, the Company making no concessions. But that seems very unlikely. Compromise is the almost inevitable end of all disputes in Japan, and it is difficult to believe that the coolies would have abandoned their position so quickly unless they had obtained some of their demands, or at any rate some promise. In view of the various difficulties that have occurred of late between employers and employed, the often-repeated statement that Japan is still far from serious labour troubles will have to be modified. Almost on the threshold of her industrial career, the labourer is beginning to assert himself pretty strenuously.

U.S. DIPLOMATIC APPOINTMENTS.

Ex-Congressman Bellamy Storer, of Ohio, is to be U.S. Minister to Belgium; Huntington Wilson, of Illinois, is to be Second Secretary of the U.S. Legation in Tokyo; and Judge William R. Day, of Canton, Ohio, an old personal friend of President McKinley, has been appointed Assistant Secretary of State. Mr. Sewall, the new U.S. Minister to Hawaii, is a son of Arthur Sewall, the recent Democratic candidate for Vice-President, but is himself a strong Republican and opposed his father in the election.

FINANCIAL TOPICS.

From the 1st of July next, every pound of Japanese tea entering the United States will have to pay a duty of 10 cents, or more than 20 *sen*. The significance of the tax becomes very striking when we examine the Customs Returns. The value of Japan's total export of tea, (excluding dust tea) was 6 million *yen* in 1896, of which aggregate the United States' share was 5 millions, in round numbers. The exact figures were, total export, 6,059,167 *yen*; America's share, 4,957,065 *yen*. Further, the quantity sent to the United States was 29,430,266 lbs., so that the average price was less than 17 *sen* per lb. Hence the proposed duty is 120 per cent. *ad valorem*, approximately, and upon a trade the total value of which is 2,478,534 dollars (gold), the American Government will levy duties aggregating 2,943,026 dollars. It is upon the consumer that the tax ultimately falls, but where such an immense duty is charged, the fate of the trade becomes problematical. Will American drinkers of Japanese tea consent to pay more than twice the price at which it has hitherto been procurable?

Japan's Ordinary Revenue for the year 1897-8 is 121,428,569 *yen*, and the Ordinary Expenditure, 122,983,561 *yen*. The latter figure includes 3 millions added to the Reserve. Consequently the actual Expenditure is 119,983,561 *yen*, and the balance in favour of Revenue is 1,445,008 *yen*. Her Extraordinary Expenditures total 142,179,733 *yen*, out of which 98,421,413 *yen* represents naval and military outlays under the scheme of national armaments' expansion, and the remainder—with the exception of 1,895,791 *yen*, which is due to exceptional and temporary causes—represents productive outlays on account of enterprises for developing the resources of the country. All these Extraordinary Expenditures are specially provided for, in part by the Chinese Indemnity, in part by a Railway Loan and a Public Undertakings Loan. Whatever portion of them is not covered by the Indemnity, must be regarded in the light, not of regular outlays for which annual provision has to be made, but of an investment undertaken by the nation; an investment the capital for which is provided by the nation in the form of loans, and which has nothing whatever to do with the regular incomings or outgoings of the State, except that the returns from the investment will by and by go to swell the Treasury's receipts, and the interest and sinking fund of the loans will appear in the ordinary expenditures under the heading "Service of the Public Debt." When we speak of a nation's annual expenditures, we do not refer to exceptional and temporary disbursements, made on account of some special project, and provided for by special financial measures, any more than we include in the yearly expenditures of a private individual the capital he raises to put into his business, or the money he spends on building his warehouses.

We adduce the above figures by way of illustrating a statement that we find in the columns of a local contemporary speaking of the purchase of 40 million *yen* worth of Japanese bonds by Messrs. Samuel Samuel & Company. The *Japan Gazette* says:—

This 40,000,000 is only a portion of the 150,000,000 *yen* loan long ago issued but very meagrely sub-

scribed for. Her expenditure is now about double her revenue, so that ere long the expedient will again have to be adopted. Good-bye then to her independence, for no master is more exacting than a European creditor. It was, however, inevitable.

Our readers can now judge for themselves how accurate it is to allege that Japan's expenditure is now about double her revenue. Nothing could be more misleading. As for the "150,000,000 loan long ago issued but very meagrely subscribed for," we are perplexed to understand what is meant. Japan has never issued a 150 million *yen* loan. She issued a thirty million *yen* loan in August, 1894, which was subscribed several times over; she issued a fifty million *yen* loan in November, 1894, which was subscribed more than twice over; she issued a ten million *yen* loan in October 1895, which was floated without any difficulty, and she issued a thirty-five million *yen* loan in March, 1896, of which a large portion had to be taken by the Bank of Japan. These four loans aggregate 125 million *yen*. The three first were quite successful; the last alone did not find takers, capitalists being engrossed by more lucrative industrial and commercial enterprises. What is "the 150 million *yen* loan long ago issued but very meagrely subscribed for"? It has never been heard of outside the office of the *Japan Gazette*.

SALE OF JAPANESE BONDS.

Various histories are published by the vernacular press with regard to the course of the transactions that have culminated in the sale of a large quantity of Japanese bonds to a foreign firm, Messrs. Samuel Samuel and Company. It is not clear that any very marked interest attaches to the circumstances preceding the event, but certainly one point needs correction, namely the singular position assigned to the Chartered Bank of India, Australia and China, and to the Japanese that negotiated with it. Our contemporaries state that Messrs. Amemiyama and Yokoyama were the media through whom the negotiations were conducted, and ask the public to believe that the Bank was treated with the scantest ceremony, being, in fact, used simply as an instrument for putting the screw on Messrs. Samuel Samuel and Company. The latter, according to Tokyo journals, hesitated to close with the terms fixed by the Treasury as the lowest acceptable. Thereupon the Bank was approached, and just as it began to show signs of acceding to the Treasury's proposals, Messrs. Samuel Samuel and Company raised their offer to the required point. Immediately the firm received the preference, and the Bank was incontinently thrown overboard. The flagrant discourtesy—to use no stronger term—of such procedure does not appear to strike them sufficiently to elicit any comment. The fact is, however, that the Bank was not victimized, nor was any attempt made to victimize it. Not Messrs. Samuel Samuel and Company, but a syndicate composed of Messrs. Samuel Samuel and Company, the Hongkong and Shanghai Bank, and the Chartered Bank of India, China and Japan, are the buyers of the bonds. That statement suffices to dispose effectually of the notion that a game of fast and loose was played with the Bank in the interests of the Treasury.

It is further stated that the syndicate—

we shall no longer speak of Messrs. Samuel Samuel and Company alone—have acquired a monopoly of the purchase of Japanese Government bonds during the space of a year. That, too, according to our information, is incorrect. It does not appear that any contract has yet been signed, and we are consequently not in a position to speak of exact conditions, but nothing can be less likely than that the Treasury should pledge itself to deal with one purchaser, and one purchaser only, for the space of a year. Very probably the syndicate will acquire a preferential right of purchase during that period: in other words, they will be entitled to the first refusal of all bonds offered by the Treasury for sale, provided that other would-be buyers do not outbid them. There is not the smallest probability, we imagine, that the syndicate will ask, or the Treasury consent to grant, more than that. Of course, when we speak of bonds offered for sale by the Treasury, we refer to bonds already issued. It is not within the competence of the Treasury to make a private sale of the stock of any new loan. For example, if the Public Undertakings Loan is floated this year, the bonds must be put up for public tender. They can not be previously disposed of to any firm or syndicate. The bonds that form the object of negotiation between the Yokohama syndicate and the Treasury—or, to speak more accurately, between the Yokohama syndicate and the Bank of Japan—are War Bonds issued in 1896 and 1897. Ten million *yen* worth of these securities are issued in the latter year; thirty-five millions in the former, and doubtless a very considerable portion of both issues, as well as some fraction of the eighty millions issued in 1894, were taken by the Bank of Japan. With these, of course, the Bank is free to deal. Thirty-five millions are to be handed over for certain, with the option of other five millions. We do not know whether all the bonds in the keeping of the Bank will be exhausted by the transaction, but it is not likely that many millions will remain.

We have already explained that by paying £102 for bonds of an aggregate face value of £1,000 *yen*, the syndicate acquire securities redeemable in gold coin of the intrinsic value of £102 8s. There is another point to be considered. As we understand the terms, the period for taking delivery is to be three months. Now the interest on Japanese State securities is paid semi-annually, in June and December. If, then, the three-months period commences in June, and if delivery be taken at the end of August, the bonds will carry 3½ per cent. interest, and will cost the syndicate only 98½. The transaction looks very promising for the buyers. We should say that they will net from 3 to 4 million *yen*. It is not surprising to hear that a disposition to effect another large purchase is manifesting itself. If an investment well secured and paying good interest is judiciously placed on the London market, tens of millions of pounds are readily subscribed, whereas the Yokohama syndicate's operation amounts, thus far, to some four millions only. It is true that no margin of appreciation offers in the case of these bonds. Securities of which the certainly outstanding term is so short, can not hope to command a high price in the market. Still, a premium of even 3 or 4 per cent. means a fine transaction where the pur-

chase cost is only 98½, and where millions are dealt in. At the same time, the Japanese Treasury finds its account. War Bonds are now selling in Tokyo at an insignificant premium of ½ per cent., and if ten or twenty millions were thrown upon the market, depreciation would set in at once. It is very doubtful whether forty million yen worth of bonds, with coupons attached, could be sold to-day for 37 million yen in Japan, whereas the Treasury is to receive 42 millions from the Yokohama syndicate.

A question raised by the vernacular press with regard to the above transaction is this:—"How will the Treasury deal with the money handed over by the syndicate in London? How will it contrive to make it pay interest, as do the bonds for which it is obtained?" The question appears to us to be quite insignificant. The Government itself disburses with one hand the interest that it collects on these bonds with the other. Except as a matter of account, the item might be omitted altogether from the Budget. For example, the Extraordinary Revenue for 1897-8 contains an item of 1,724,185 yen, under the heading of "interest on deposits." That signifies that the Treasury has deposited with the Bank of Japan 5-per-cent bonds of the aggregate face value of 34,483,700 yen. On the other hand, the Expenditures include an item of 29,710,378 yen, under the heading of "Service of the National Debt," and that total is made up thus:—

Sinking Fund, Interest and Cost of Management	27,280,881
Interest on Deposits	1,724,185
Redemption of Subsidiary Notes	705,312
Total	29,710,378

Thus we have the item "Interest on Deposits, 1,724,185 yen," appearing on both sides of the account, and to strike it out altogether would affect the totals but not the balance. The Treasury has no occasion to trouble itself about converting into an interest-bearing fund the 4,200,000 sovereigns that it will receive from the syndicate. Its procedure, we presume, will be to transport the gold to Japan and deposit it in the Nippon Ginko's vaults, where it will represent an additional buttress of the new gold monometallic system. As a matter of fact, convertible notes have doubtless been already issued on the security of these bonds. When the Treasury floats loans to meet the national liabilities, it can not itself subscribe the loan and quietly store the scrip away in a strong room. If the whole of a loan is not taken up by the public, the Treasury's only recourse is to deposit the unsubscribed part with the Bank of Japan, and receive from the latter notes wherewith to meet the expenditures on account of which the loan was floated. There is nothing obscure about these transactions, though they become enshrouded in mystery when some writers undertake to discuss them.

JAPANESE EMIGRATION.

It is alleged that the Japanese Government appreciates the unwisdom of attempting to forcibly open routes for emigration to countries where the influx of Asiatics has come to be regarded with strong disfavour. The United States of America, the Australian colonies, and Hawaii are examples of nations that have grown more or less hostile to the advent

of Japanese labourers. After all, nations have just as much right as families to choose their own associates. If the head of a household is entitled to determine who shall live under his roof, the inhabitants of a country are entitled to determine what races shall have access to their shores. It is true that Occidental peoples have never recognised any such principle in their intercourse with Oriental. They have always insisted that a nation has no natural right to choose between isolation and comity, and if Japan or China were to attempt to impose upon the coming of Australians and Americans the same restrictions that Australia and the United States impose upon the immigration of Asiatics, the Western World would be profoundly shocked and thoroughly angry. "One law for me, another for thee" is still the rule. But there is a strain of sound common sense in the minds of Japanese statesmen. They do not propose to waste their strength upon the hopeless task of unriddling that "something amiss" so often conspicuous in the world's affairs. The wiser plan is to take things as they are, not to chafe and fume because they are not as they ought to be. Mexico and Brazil are just as anxious to receive Japanese labourers as Hawaii, America, and Australia are to reject them. Let them go to Mexico and Brazil. To force their company upon unwilling nations might injure interests far more important than the fortunes of a few scores of adventurers—the interests of commerce and comity.

Hawaii's real sentiments have been made clearer than ever by the experience of the *Kinai's* emigrants. Not that the stories told in the columns of the vernacular press about the rough treatment extended to the *Kinai's* folks are true. We pointed out, when reproducing the stories, that the dates given threw doubt upon the incidents described, for the *Kinai* was unquestionably quarantined on April 10th, and as the period of quarantine in Hawaii is 18 days, it was impossible that permission to land could have been given to any of her people on the 17th of that month. The point is, however, that some five hundred Japanese labourers who reached Honolulu in the *Kinai* appear to have been turned back on the same pretext as that alleged in the case of the immigrants previously rejected, namely that, although they possessed the \$50 prescribed by law, they could not be regarded as "free labourers," since they were under contract to an emigration agency, and being contract labourers, they should have obtained the previous sanction of the Hawaiian Authorities, a preliminary not observed by them. It is a pretext almost deserving the epithet farcical. Originally, indeed, it may have been advanced in good faith, but that the Hawaiian Government repeated it after its utter untenability had been officially demonstrated, indicates a determination to keep out the Japanese at all hazards. None of the rejected immigrants were contract labourers in the sense of the Hawaiian laws. A contract labourer, according to the law's definition, is a man having a hard and fast agreement with a Hawaiian estate-holder to work on the latter's plantation for a term of at least two years. If an immigrant has no such agreement, but is a mere seeker for chance labour, in order to gain admission to Hawaii he must possess a sum of \$50 by way of

guarantee against the contingency of his being thrown destitute on the public's hands. The intention of the law is plain—security against destitution, the security to take one of two forms, employment furnished by specific and tangible contract, or possession of a round sum of money. Now the agreement that existed between the recent Japanese emigrants and the emigration company was simply an additional guarantee against helpless destitution. Each emigrant had paid a sum of 12 yen to the company on condition that a passage back to Japan should be provided for him in the event of his failing to find work. It was for all the world as though he had taken a return ticket, in order to safeguard himself against the risk of being left, high and dry in Hawaii, without the means of finding his way home. To regard such a transaction in the light of a labour contract as contemplated by the law, was a subterfuge so shallow as to be undeserving of serious notice. One can conceive the bare possibility of the Hawaiian Authorities' advancing that pretence once, under a misapprehension as to the real nature of the agreement between the emigrants and the company, but that they should have advanced it again after the true facts of the agreement had been made clear, indicates a blind resolve to exclude the Japanese by any means, fair or foul. Probably the policy of exclusion will prevail, if its representatives can carry the Administration with them. The Japanese are too sensible to attempt to force their company on hosts so markedly reluctant. But from a legal point of view the Hawaiians are hopelessly in the wrong, and they will have to pay for their blundering.

FANCY DRESS BALL IN TOKYO.

On Monday evening the completion of the additions to the French Legation in Tokyo was celebrated by a fancy dress ball. The changes, made in the building are cleverly designed and very effective. The former somewhat narrow and inconvenient hall has been converted into a spacious and handsome salon; two prettily decorated rooms *en suite* have been rendered available for dancing, and a third room with wide folding doors affords an excellent place for sitting out. His Excellency the French Minister and Madame Harmand received their guests in this last room. About three hundred people were present, and dancing commenced shortly after ten o'clock on a floor in admirable condition. It would be a hopeless task to attempt to describe the costumes. Many of them were veritable works of art, and a more picturesque scene could scarcely be conceived than the ball-rooms presented, especially during some of the figures of the cotillon, when the general effect was heightened by the favours which were really charming. Medieval costumes predominated, on the whole, and it must be confessed that they bore eloquent witness to the good taste of our ancestors, and awoke regrets for the days when men were not condemned to the dull uniformity of the ugly swallow-tail. There can be no second opinion about the ball: it was one of the most successful entertainments ever given in Tokyo, all the arrangements as perfect as the hospitality was graceful and cordial.

THE JAPAN TRADING ASSOCIATION'S MEMORIAL.

The *Tokyo Shimbun* states that the Japan Trading Association lately presented a memorial to the Ministers of Foreign Affairs and of Agriculture and Commerce, with regard to the alterations proposed to be made in the United States Customs tariff. The memorial runs as follows:—

We, the members of the Japan Trading Association, recognise that the foreign commerce of our country is yet in a state of infancy, and that despite our efforts to remove all the obstacles in the way and to devise schemes for progress, our aim for a perfect development of business may fail to be accomplished. On this point our Association entertains serious anxiety, and we consider that both Government and people ought to co-operate and direct their attention to the matter. The trade between Japan and America occupies a most prominent position in our foreign commerce, and of late years it has shown signs of satisfactory progress. Moreover, as we have opened a direct line of communication with America, we have every hope of the growth of our trade with that country. For that reason we have to congratulate ourselves. But it is absolutely indispensable that steps be taken by the two countries to remove all the impediments in the way of commerce, to promote mutual facilities, and to develop business generally. Of late, however, the proceedings of the American Congress have been in opposition to those aims, and on the basis of a protective policy prohibitive duties have been levied on our manufactures, especially silk fabrics, carpets and fancy matting. If the Bill for imposing such heavy duties is passed by the Senate and put into operation, it will have the effect of bringing our American trade to a standstill, and every hope of progress which manifests itself at present will meet with a premature end. We therefore beg, in the interests of commerce as well as of the State, that your Excellencies will, prior to the enforcement of the Bill above mentioned, suggest to the United States Government the necessity of reconsidering the matter and of restoring the commercial relations between the two countries to a more satisfactory basis, in order that the merchants engaged in the American trade may be saved from serious loss and disappointment. We also beg that similar measures may be taken with France in connection with her hostile attitude towards our silk trade.

SENTIMENT.

"For years past Europe has given Japan all the secrets of its complicated mechanism, and has spent no end of money in order to gracefully receive the envoys of the Far East, and Japan has largely profited by it." That is a sentence from a resolution adopted by the Haiphong Chamber of Commerce. It is necessary to be explicit about the provenance of the phrase. Otherwise nobody could possibly suspect that a body of grave merchants had been guilty of endorsing such fatuity. That Japan has helped herself freely from the stores of European material civilization, and that she has benefited largely by the process, is beyond question. We have never observed the slightest disposition on the part of her publicists to ignore the fact. They admit it in the frankest way. But what then? Why should Japan's progressive readiness to take what is good, even though alien, be cast in her teeth? And what sentimental folly it is to build upon that foundation an edifice of European altruism! In selling machines, ships, appliances, books, expert labour and scientific instruction to Japan, Europe has not been actuated by a particle of philanthropy. She insisted on the opening of Japan precisely because a new market would thus be afforded for those various commodities. She would sell the same things to Fijians and Kanakas if they could put up cash to buy them. Hypocritical babble like that

of the Haiphong Chamber simply tends to make Europeans ridiculous in the eyes of discerning Japanese. And what shall be said of the assertion that "Europe has spent no end of money in order to gracefully receive the envoys of the Far East?" Why not speak of the far larger sums, by comparison, that Japan has spent to gracefully receive the envoys of the Far West? Does any person of mature years pretend to imagine that all these graceful receptions, by whichever side organized, owed their origin to anything beyond a clear perception, or a shrewd hope, that profit would result to the organizer? Li Hung-chang was hospitably entertained in Germany, and hospitably entertained in France, but our recollection is vivid of the chagrin expressed when the ungrateful ex-Viceroy failed to make due recognition of his hosts' kindness by ordering armaments at Stettin and iron-clads at Cherbourg. Japan has been uniformly hospitable, lavishly hospitable. But no one supposes that her hospitality has been disinterested. She had her own axe to grind.

It never seems to strike the people who talk about Japan's borrowing from and copying Europe that there is another side to the picture. They forget how Europe has borrowed from and copied Japan. Since Europe seated itself at the feet of artistic Greece and resigned itself, during eighteen centuries, to the creed that higher canons than those of the Grecian artist were beyond the range of human intellect, nothing has occurred to seriously disturb that faith except contact with Japanese art. In every field of decoration Europe now shows the effect of Japanese influence. She has copied Japan frankly, and has "largely profited by it." Do we find the Japanese claiming that they have laid Europe under any sentimental obligation to them, or charging Europeans with being "imitative but not initiative?" There should be no hesitation in facing the facts. Folks that follow the romantic and impractical example of the French merchants in Haiphong, will find themselves objects of ridicule.

CHINA AND THE INDEMNITY.

It is very confidently asserted by more than one Tokyo journal that Sir Robert Hart has lost his influence with the Chinese, the basis of that belief being that nothing is heard of the Inspector General of Customs in connexion with China's new loan, the name of Dr. Dudgeon only being mentioned. History does not seem to be very fresh in the memory of writers propounding such a theory on such grounds. After the failure of the Detring-Fournier Convention in 1884, the Tonquin War was brought to a conclusion by Mr. Campbell in Paris. Sir Robert Hart did not figure in the transaction, yet it was all managed under his direction. If Dr. John Dudgeon is the apparent agent in this business of the loan, we may be very sure that Sir Robert Hart is the power behind the Throne.

We showed in a previous issue that by raising 93½ million taels in England and paying off the remainder of the indemnity on the 8th instant, instead of following the procedure of payment by installments, spread over a period of 6 years, China's saving would be at least 15½ million taels. But, of course, her most profitable plan now is to defer complete liquidation

until May of next year. She has handed over the installment of 17½ millions due on the 8th of this month. Of that amount 16½ millions represent principal now finally disposed of, and ½ of a million represent interest for which she will get credit as principal if she decides to discharge the whole debt on the 8th of May, 1898. On the 8th of November, she will have to make a further payment of 4½ millions on account of interest, and that sum also will be credited as principal if she pays off by next May. Thus, by the end of this year, her payments of principal and interest will aggregate 127½ millions, and a final payment of 72½ millions will conclude the transaction. At present, she has paid a total of only 123½ millions, and to close the transaction at once, she would have to borrow 76½ millions, the interest on which between the present time and May, 1898 would be 3½ millions. Hence the account stands thus:—

	Tls. Millions.
Interest for one year on 76½ million taels borrowed now for purposes of final liquidation, which interest would be lost by immediate discharge of debt	3½
Interest for six months on 4½ millions, due on November 8th, 1897, which interest would be saved by discharging the debt at once instead of waiting until May 8th, 1898	½
One year's contribution on account of Weihaiwei, which would be saved by paying off at once	½
Total saved by deferring final payment until 8th May, 1898, instead of making it now	3½

We conclude, therefore, that China will not discharge the debt in full until the last day of her three years' grace, namely, May 8th, 1898, and that, consequently, the money will not become available for Japan's purposes during the present fiscal year. Hence the floating of the Public Undertakings Loan, in part at any rate, will be necessary.

Since writing the above we learn that a telegram has been received in Tokyo announcing the conclusion of a loan by China in England and the probable payment of the remainder of the indemnity in July. If that be so, China's object must be to get the Japanese troops out of Weihaiwei. She is not guided solely by economical considerations.

THE FORMOSAN AFFAIR.

The raid made by the Hakkas on the 8th instant, though it was repulsed without much difficulty, indicates a very unquiet state of affairs in Formosa. All accounts agree that for several days previously to the event rumours of its probability had been rife, and had received credence from the Japanese Authorities. That being so, it is plain that if sufficient means of preserving law and order were available, the raiders ought never to have reached within striking distance of Twatutia. Measures should have been organized to crush the insurrection before it attained dimensions sufficient to seriously endanger life and property. We do not under-rate the difficulties of the task that the Japanese have to perform in Formosa, or the profoundly discontented spirit that seems to animate many of the natives. Insurrections in the interior at places difficult of access, where a force of military or police can not be easily massed, are, perhaps, temporarily inevitable. But the march of 600 raiders upon a suburb of the capital, and the fact that they were left unmolested long enough to loot

and burn on a considerable scale, indicate either faulty administration or deficient resources on the Japanese side. Doubtless the language presents a serious difficulty. The Japanese must be content to rely upon information collected by natives who may themselves be in collusion or sympathy with the insurgents. Still, in this recent case information seems to have been forthcoming, and the point is that instead of adopting precautions to keep Tawatutia and Taipei far beyond the range of disturbance, the Japanese were obliged to prepare for receiving the raiders in the vicinity of those places, or, at any rate, were not able to establish a complete cordon of protection. More vigorous and thorough measures are evidently needed. The task ought not to be more arduous than was that awaiting the British in Burmah, yet the pacification of that vast territory—extending over an area larger than the main island of Japan, may be said to have been fully completed within a twelve-month. Japan is very deeply interested in the world's verdict about her administration of Formosa, and though her people seem to recognise the fact, and to be aware that they are on public trial in the matter, their practical efforts can scarcely be said to rise to the level of the occasion.

KOREAN NOTE.

The editor of the *Sōul Independent* is a Korean. We can not tell how largely his character has been modified by American education. But it were well for his country if many of its people shared his enthusiasm for liberty and courage. He writes thus about Greece:—

It seems the whole nation has sprung to arms as by a spontaneous impulse; the spirit of revenge and the sense of righting deeply wounded wrongs are flaming from every peak and foot-hill upon the Thessalian border. Every mountain pass along the Southern edge of Epirus and Larissa, bristled with bayonets; every road that leads to the Ottoman frontier is thronged with brave warriors in whose veins flows the blood that made Thermopylæ and Salamis the wonder of all lovers of gallantry, valor and devotion.

She knows too well that she cannot cope with the combined navies of Europe, but she would not submit to their dictation. She courts catclysm and invites defeat rather than turn deaf ears to the cry of humanity, faith, honour and nobility.

If the Christian Powers of Europe are willing to exterminate the Greeks in order to sustain a tottering pagan throne at Constantinople, Greece says, so be it. There is not a Greek in Crete who would purchase his life and safety at the cost of dishonour and humiliation. There is not a Greek in Greece who would forgive the infamy of the Sultan.

It seems to us the old gaudium certaminis has blazed anew in the children of Macedon, Athens and Sparta; and we are gazing upon a tragedy worthy to take place with the noblest and the highest heroism in the whole history of the world. We are witnessing an apotheosis of chivalry, more magnificent than any we have known or heard of since the days of the Templars and the Paladins—since the days of Richard and Godfrey de Bouillon. The scene thrills this generation and makes us believe that there are yet left some people in every land to whom the dollar is not the emblem of desert; who can love and die for righteousness; who hold liberty and honour above life; who consider no odds, no peril, no slavish calculations where duty, faith and manhood are involved.

Alas! Alas! Or to adopt, as more apposite, the French form of the interjection, "Helas! Helas!" Look on this picture, then on that!

The students of the Government schools in Korea have decided to cut their hair and abolish the top-knot. Probably that is a fresh example of some villainous Japanese machination. Will there be

another insurrection! Shall we have another diatribe from Bishop Corfe.

Domestic broils are unfortunately frequent in Korea. Officials treat each other very unkindly, and no rod reaches them from head-quarters. The magistrate of Kumku has requested the Royal Inspector of Chulla Province to aid him in driving out the Government Inspectors of gold mines in his district. It appears that the Secret Inspector arrested the Mine Inspector and "treated him very cruelly." The Mine Inspector reported his reasons to the Department of Agriculture and Commerce. That Department referred the matter to the Law Department. The Law Department said it was very wrong. Then the former Department asked the latter Department to investigate. But the Kumku magistrate seems to be the only practical person in the party.

A drunken lieutenant of the Pyengyang regiment had a fight with a drunken sergeant of the same corps. The lieutenant got two lovely black eyes and a maimed arm in the encounter; the sergeant emerged scathless. The War Office sentenced the sergeant to imprisonment for life and the lieutenant to lose a week's pay. Military law in Korea is finely discriminating.

Military officers in Korea appear to be truculent and bibulous. The case of the pugilistic lieutenant related above is capped by that of two drunken officers who, while passing in front of the Palace in Sōul, observed a policeman and immediately proceeded to knock him down and beat him with their swords.

The students of the Japanese Language School do not seem to be popular with the War Office in Sōul. The latter reported them to the Educational Department for breaking the gymnastic apparatus and windows of the Military School. But the Educational Department, after due investigation, found that the charge was baseless. It is to be hoped that the Schools in Sōul are not about to join the political mêlée.

The Royal Commission, recently appointed to revise the Korean laws, is incapacitated by an epidemic of resignations. There were originally 11 members. Four of them never attended. Then one resigned. A successor was appointed. He resigned. The Commission recommended 7 experts. They were nominated. Four of them resigned. Then Commissioner Yun resigned. There now remain only two Korŕan and four foreign members, who, of course, can not go on with the work.

The latest agitation in Sōul has for its object to compel the King to call himself "Great Emperor of Great Chosen." The King is diffident, but apparently he is not to be allowed any discretion.

A correspondent of the *Sōul Independent* asks why the magistrate of Samsu, who was killed six weeks ago by the "Righteous Army," has now been gazetted as having voluntarily resigned his post. The editor surmises that "it is one of the inexplicable actions which emanate from the art of inconsistency which prevails in Korea."

FRANCE AND THE REVISED TREATY.

We observe that the French Senate is still credited with having assumed an attitude of opposition to the Revised Treaty with Japan, on the ground that the privilege of owning land in this country is withheld from French citizens. Where the idea had its origin we can not discover. "There is no smoke without fire," and possibly some talk of the kind has been heard in Paris. But we are in a position to say that not the faintest official echo of it has reached Japan. Our readers may remember the assertion advanced at the outset by a Yokohama local journal, namely, that the Senate had refused to endorse the Treaty in its present form, and that Count Okuma, with his usual liberality, had agreed to concede the privilege of land-ownership. That was pretty explicit, but scarcely tenable in view of the fact that no communication whatever on the subject had reached Count Okuma. Still the same journal clings to its belief that the Senate has taken that line. We hope that events may warrant our contemporary's random shot, but we recommend our fellow-residents not to build any expectations on such a foundation. In our opinion the Japanese Government might have safely granted the privilege in question, but the Japanese nation does not think so, and the Government must abide by the nation's verdict. On the other hand, the practical significance of the question does not amount to a row of pins. Foreigners will be able to acquire all the land they want on terms perfectly suited to business or residential purposes of any kind. What more need be sought for? This fictitious agitation about a matter that has no tangible meaning is simply mischievous.

THE EUROPEAN SITUATION.

The conduct of the Sultan of Turkey, as represented by the latest telegrams, presents a strange contrast to the attitude assumed by him when the chances of the fight were still more or less uncertain. Then, he was all conciliation and moderation; now, he is defiant and exacting. It looks as though he thought that he had the ball at his feet, and could kick it without any risk of hurting himself. At all events his present procedure is contemptuously indifferent to the mandate of the European Powers. The one maxim that they all agreed to lay down at the commencement of the trouble was that no territorial acquisition should be permitted to either Greece or Turkey. Yet the Sultan now declares that unless Thessaly be included in the Turkish dominions, his troops will be ordered to advance on Athens. Perhaps His Sublime Majesty thinks that he has taken the exact measure of Europe's foot, and that events are still a long way from culminating in the march of a quarter of a million of men to the defence of Thessaly. It is hard, indeed, to imagine the setting in motion of such a force by concerted Europe; harder still to conceive the Powers agreeing to give a mandate to any one of their number, and hardest of all to suppose that any one of them would accept it unless the conditions were such as the rest could not endorse. A Russian army crossing the Danube and a British fleet steaming up

the Dardanelles, appear to be the most probably factors in the sequel of the complication, yet it would certainly be a most striking reversal of historical traditions and indications if England and Russia joined forces against Turkey. We can not suppose, however, that the Sultan is quite so obdurate or reckless as his utterances indicate. The probability is that he is waiting to be coerced—that is to say, coerced with sufficient earnestness to justify abandonment of the legitimate fruits of victory. He has to consider his own subjects, whose natural view of the situation is that Greece having been the aggressor and Turkey the victor, full compensation to the one and punishment of the other are only right and proper. The Sultan must be helped to avoid national obloquy. If that be the difficulty, things may have to be pushed very close to the verge of a serious war before Europe recovers control of the situation. On the other hand, there is just a bare possibility that the Sultan really means what he says, and that he counts on the permanent paralysis of the Great Powers for active purposes. If so, that most desirable consummation, the expulsion of Turkey from Europe, may be the crowning triumph of the nineteenth century. We should like to think it, but we can not. Turkey will yield, if events do not move too fast for her, a contingency that European diplomacy, however cumbersome its motions, should be able to avoid.

CHINESE NOTES.

The German officers engaged in drilling Chinese troops at Woosung have had an experience that does not fall within the category of ordinary duties. After the recent inspection by the Governor of the province, it was decided to discharge about one half of the native-drilled troops, who were in four camps of 500 each, replacing them by a corresponding number of foreign-drilled men from the forts. The discharged soldiers were given 3 months' extra pay, but they clamoured for seven months', and, on May 7th, broke into open mutiny, looting the officers' quarters, pulling down the houses, and threatening to shoot the General in command. An appeal for aid was made by telephone to the forts, and seven companies of infantry under Major von Reitzenstein, with a battery of artillery under Major Lieut. Maaschke and a squadron of cavalry under Count Nayhauss, marched to the rescue. The distance from the forts to Setzelin, the scene of the mutiny, is 8 miles, and the guns had to be dragged the whole way by hand, a task which was accomplished in 3 hours. At 2 p.m. the camp was reached and a cordon formed round it. The mutineers, who were outside, greeted the troops with shouts of "foreign devil" (*Yang Kueitse*), but when the order to load was given, they fled inside. They were then required to give up their arms, but they refused to do so, whereupon the German officers proceeded to enforce the mandate, taking away the rifles and ammunition and breaking the heads of the lances, halberds and tridents. The principal ringleader was seized, tried by drum-head court-martial and summarily decapitated. It is stated that not a single Chinese official was present at the execution, all having fled. Throughout the night of the 8th the camp and magazine were guarded, and on the morning of the 9th three more of the ring-

leaders were executed. The other three camps were disarmed without difficulty. The German officers say that the troops under their command behaved splendidly.

Mr. Joseph Welch sends the following interesting letter to the *North China Daily News*—

SIR,—The *Poochi* to-day (May 8th) brought musters of new season's Black Teas from Wenchow, and amongst them were the first teas made by machine-rolling in the north of China. To have made a tea which is superior to that found in nine out of ten drawing-rooms in Shanghai out of the despised Wenchow leaf, would in itself have been a triumph, even if the maker had been an expert from Ceylon; but to find that an ordinary native tea-man, with the help of a Jackson's tea-roller, and after an hour's explanation of its uses, a tea-boy interpreting, is able to convert tea leaf from an article which both American and English importers detest, and warn buyers against, into an article fragrant, palatable, and of double the ordinary strength, reveals to one the possibilities which lie hidden in China leaf, and the bright promise in store for China tea if it is properly treated.

This successful experiment goes even farther: it shows that, with a little improvement in the means of storing the leaf during preparation, the only vitally necessary machinery required is a good roller, and that money spent in siroccos, etc., would be money thrown away.

The cost of rollers, which can be worked either by hand or by water power, is within the means of any tea-man, so we should no longer hear that the cost of machinery will be prohibitory to the introduction of the new process.

The machine used in the present case is one which I imported for the Hankow Tea Guild eleven years ago, but which lay in a godown rusting and unused until I bought it back from them a few months ago. Some improvements in rollers have doubtless been made of late years, but this one is so simple that it was taken to pieces in Shanghai by a fitter, and it was put together again in the country near Wenchow by local men without the assistance of a fitter or any engineer to put it in working order.

The folly of the Indian Government's financial policy in raising artificially the value of the rupee, and thus imposing a crushing tax on the industries of India and Ceylon, is China's opportunity for regaining her decadent tea trade, and once regained by using improved methods of curing, it will stand by its own merits. A Ningchow, Oanfa, or Keemén tea cured by the new process would be "a thing of beauty."

The Rev. W. A. P. Martin, D.D., L.L.D., read a paper entitled "The Signs of the Times," at the recent meeting of the North-China Tract Society in Tientsin. The essay is epitomized in the following terms by a correspondent of the leading Shanghai journal:—

It was an interesting paper, showing the changed attitude of the official class in Peking towards the teachings of the West along educational and scientific lines. They were willing to meet foreigners as never before—listen to them, and learn from them. Even the most conservative of them are in favour of the establishment of schools for teaching Western science in every province of the Empire. He gave facts and incidents illustrating these statements. We were led to infer that this change was largely if not entirely the result of the late war with Japan—forced upon them by the facts brought to the surface by that affair, and not from any inherent desire to change from, or improve upon, the old methods. No intimation was given of there being a desire on the part of any of these great men for any improvement along the lines of moral reform by the introduction of honest and truthful methods in all matters, without which science and learning only add to the power of the higher classes to oppress and increase the misery of the lower.

An object lesson in the truth of Dr. Martin's remarks has been furnished by the posting of an official notice at the examination hall in Weihsien (Shantung province) to the effect that the new subjects for examination shall include foreign arithmetic, chemistry and geography. The *litterati* are said to be much perplexed about means of acquiring these branches of knowledge.

The contingency of Ching-tao's becom-

ing a Russian naval station is invested with new interest by the intelligence that the place, if opened to foreign trade, would deprive Chefoo of all its commerce. The principal road to Chefoo is so bad that prohibitive expense is incurred in transporting merchandise thither, and it is said that the products of Shantung—straw braid, mats, beancake, pongee silk, pottery, glass-ware, marble, coal, iron, lead, copper, mica and building stone—can be carried to Ching-tao (at the entrance to Kiao-chau Bay), at one half of the expense involved in taking them to Chefoo. Of course the same consideration applies to imports.

The Viceroy of Chihli has become sufficiently solicitous about the condition of the Peiho to issue a proclamation, ordering Wu Taotai to confer with the two Tientsin Taotais, and devise measures for improving the river. This council of Taotais has decided upon the outlines of a programme, namely, to close by sluices several of the canals that drain off water from the Peiho, and to make a number of cut-offs below Tientsin, so as to straighten the bed of the stream. It does not promise well for the success of this scheme that it involves the sacrifice of interests vested in the canals to be sluiced.

The Special Russian Embassy to China, which is headed by Prince Uchtomsky, was entertained at luncheon by Taotai Liu of Shanghai, on the 11th instant, among the guests being the Consuls, the commanders of the war-ships in port, and a number of the Chinese and foreign residents. The Embassy carries 48 large cases full of presents. They are said to have been selected by the Czar himself, and to have cost 300,000 roubles. His Majesty has sent the grand cordon of the Order of St. Catherine to the Empress of China.

A most gloomy forecast of the tea trade for this season is furnished by "A.K.C." in a letter to the *N.-C. Daily News*:—

The export of Congou from Hankow and Shanghai to England and America last season amounted to 18,500,000 lbs. with the result that fine teas are unsaleable at over 6d. per lb.

This season the first crop alone is estimated at 900,000 half-cheats or 55,000,000 lbs.

Russia is overweighted with a heavy stock and is not expected to take more than half the above quantity, leaving 27,500,000 lbs. to be shipped to England and America, or, say, 10,000,000 lbs. more than last season, even if no later crops come forward. With tea practically unsaleable with a moderate export, it is easy to predict the condition of the markets under present conditions. It is doubtful whether England and America can take the increased supplies at any price.

Happily buyers seem to be fully alive to the gravity of the situation, indeed it is rapidly producing consternation among the natives.

The famine in the north and east of Szechuan seems to have been cruelly severe. A traveller who has just returned thence reports having seen numbers of dead bodies, and heard that about one-half of the population of one town had perished of starvation, or the fever that follows in its wake. The Government has sent a hundred and twenty thousand piculs of rice by way of relief, but there is difficulty in carrying the grain beyond Ichang.

Serious anti-Christian riots are reported from Linching in Shantung. Two thousand rioters are said to be in league for the purpose of destroying all Roman Catholic property in the district. There has been one fierce fight, in which three Christians

were killed, seven or eight wounded, and three or four captured.

Yokohama does not stand alone in the paucity of its subscriptions for the celebration of the Diamond Jubilee. The Shanghai Committee announce that they find themselves compelled to considerably curtail the programme for the festivities during the day "in consequence of the subscriptions not amounting to half the estimated requirements."

HAWAIIAN NOTES.

The *Naniwa* arrived at Honolulu on the morning of May 5th. Her crew were placed in quarantine, but the officers and civilians on board were allowed to land and go where they pleased—a most peculiar method of quarantine.

Here is the latest skit in Hawaii; it purports to be an intercepted telegram:—

Mikado to McKinley—Sandwich-Hawaii, your ward, throwing stones into my backyard, hurting my chickens. What shall I do?

McKinley to Mikado—Thrash the naughty fellow. Take it out of his hide (and Treasury) but send war back to me.

Hawaii to McKinley—Help! Help! The Mikado is going to hit me (in my pocket).

McKinley to Hawaii—Serve you right. When you are licked within an inch of your life, let me know it, you d—bl— little conceited fool.

The *Hawaiian Independent*, writing of the Japanese complication, says:—

We firmly believe that the Government has sought for all these entanglements in order to compel the United States to interfere on their behalf. This is a policy so puerile in conception that even a tyro in statesmanship can see through it and much more readily the trained minds of the Great Republic.

The census of Hawaii in 1890 and 1896 stood thus:—

	1890.	1896.
Hawaiians	34,436	31,019
Part Hawaiians	6,186	8,485
Americans	1,926	3,086
British	1,344	2,250
Germans	1,034	1,432
French	70	101
Norwegians	227	378
Portuguese	8,602	15,191
Japanese	12,360	24,407
Chinese	15,301	21,616
Polynesians	588	455
Other Nationalities	419	600
Haw. Br'n Foreigners	7,495
	89,990	109,020

It appears from these figures that whereas the total growth of the population in five years was 19,030, the growth of the Japanese element was 12,047, and the growth of Japanese and Chinese together, 18,362. In fact, the population would remain virtually stationary—its total increase in five years being only 668—but for Japanese and Chinese immigration. We can not be surprised that the American residents feel uneasy.

THE EMEUTE IN FORMOSA.

Information received from a special correspondent of the *Fiji Shimp* in Formosa contains the following:—

At 3 a.m. on the 8th instant, rebels numbering about two thousand, made a furious attack on Tōmon, Hokumon, and Twatutia, setting fire to the last mentioned town and plundering it. The troops of the garrison were despatched thither, and succeeded in repulsing them by 6 o'clock. Very few Japanese were wounded or killed. Of the native insurgents some thirty were captured and sixteen were killed. But on the side of the Japanese one Tax Inspection Office, and three commercial houses were burnt to the ground, and money was carried away by the rebels from thirty houses to the amount of over forty thousand yen. One of the sufferers is said to have been robbed of several thousands of yen. The *Fiji* notes with regret that the loss of influence and credit on the part of the gendarmes is beyond description.

TEA.

The period between the first and 12th of May, says a vernacular paper, constitutes the most important portion of the new tea season. Sales this year, however, show a decrease of 374,500 catties, as compared with the corresponding period of last year. This decrease of almost twenty per cent. is chiefly due to the late development of the tea plants in various parts of the empire. Yet no anxiety need be felt on that account. Despite the diminution in quantity the amount realized by sales totals 621,430 yen, against 595,357 yen last year, showing an increase of 26,100 yen, or three per cent. The competition among foreign merchants in Yokohama has driven up the price of the article to a very considerable extent, present quotations being unapproached since the 19th year of *Meiji* (1886). While the average price last year was \$29.66, it has risen to \$39.07 this, an increase of about 33 per cent. Again, the average daily price last year between the 1st and 12th May, was \$31.08 maximum and \$26.66 minimum; this year the quotations have been \$40.26 and \$35 respectively for the two extremes.

The *Yomiuri Shimbun* states that the Tea Dealers Guild of Yokohama is discussing a proposal to forward a telegram to President McKinley to the following purport:—"The Customs Tariff Amendment Bill, now under consideration by the Senate of the United States, will not only seriously affect the tea trade of Japan, but will also impair, to a considerable extent, the friendly feelings existing between the two countries. It is to be hoped that, as the insignificant gains to be secured by the proposed tariff are certain to prove of serious disadvantage in the future, full consideration will be given to the question."

JAPANESE TRADE AT INCHEON.

A report from the Japanese Consul in In-chon, Korea, as published in the *Tokyo Asahi Shimbun*, shows that foreign trade in that town during January last amounted to 669,576 yen in value, excluding gold and silver coins and bullion, a decrease of 180,923 yen as compared with the previous month. The following table shows the comparative amount of exports and imports for the two months:—

	DECEMBER, 1896.		Imports from	Exports to	Re-exports
	Yen.		Yen.	Yen.	Yen.
Japan	189,687	506,491	9,254	
China	136,810	6,290	1,967	
Total	326,497	512,781	11,221	
	JANUARY, 1897.		Imports from	Exports to	Re-exports
	Yen.		Yen.	Yen.	Yen.
Japan	206,289	387,349	3,096	
China	70,840	1,469	533	
Total	277,122	388,818	3,629	

In the above table an increase of over 16,000 yen is noticeable in the imports only from Japan, all other figures indicating a marked decrease. These inequalities of trade are due to the sudden decrease in the import of shirtings and in the export of rice and beans. Yet on the whole the market presents a prosperous condition. Demand for muslin, calico, etc. is increasing day by day in view of the forthcoming new year of the Korean calendar. Stocks which glutted the market found sale, and imports are likely to be increased at no distant date. The trade at In-chon has increased on the side of Japan, and decreased on the side of China, until the figures for Japan represent nine-tenths of the transactions, those for China only one-tenth. The exports and imports last month were as follow:—

IMPORTS FROM			
	Japan Yen.	China Yen.	Total Yen.
Shirtings.....	67,359.....	29,752.....	97,111
Cotton yarn.....	41,285.....	910.....	42,195
Silk textiles.....	6,162.....	10,883.....	17,045
Straw bags.....	12,856.....	—.....	12,856
Cotton fabrics.....	12,178.....	243.....	12,421
Kerosene oil.....	9,855.....	2,300.....	21,155
EXPORTS.			
Rice.....	351,504.....	44.....	351,552
Beans.....	29,022.....	—.....	29,022

JAPANESE IN SAIPAN.

The *Nichi Nichi Shimbun* contains the following:—

On the 1st of January some Japanese residents in Saipan, an island of the Mariana Archipelago, belonging to Spain, hoisted their national flag crossed by that of Spain, in front of their shops, with the intention of celebrating the New Year. The Japanese national flag was of calico, but owing to the impossibility of obtaining Spanish flags of similar stuff, the Japanese made a flag of paper, with the Spanish arms painted upon it. The Spanish authorities, as well as the Catholic priests, rebuked them for this, alleging that their action with regard to the Spanish colours amounted to contempt.

The Japanese managed to pacify their objectors by pointing out that the paper flag was inevitable owing to inability to purchase proper Spanish flags. On the 12th of April similar reproaches were made owing to a similar action on the part of the Japanese. But this time Mr. Miyazaki, Manager of the Branch of Messrs. Nonaka & Co., of Osaka, was called to the Administrative Office and eventually sent to prison. This affair has a serious relation to Oriental commerce as well as to the personal rights of Japanese living under the protection of the Spanish throne. Mr. Nonaka, it is said, has resolved to petition the Minister of Foreign Affairs that steps be taken to make a strong representation to be Spanish Government upon the matter; and the Foreign Department seems to have arrived at the conclusion that this illegal imprisonment of a Japanese by the Spanish authorities is too serious to be overlooked.

THE FRENCH TREATY.

Commenting upon the revised draft of the French treaty, the *Shōgyo Shimpō* intimates that the treaty is now under discussion in the French Senate, and seems likely to be rejected on account of the provisions relating to the ownership of landed property. Should this be the case, the French Government will be compelled to ask that the old treaty be renewed for a time. But such a demand must be decidedly opposed even if Japan runs the risk of abrogating the French treaty altogether. Moreover, the revision of the Austrian treaty has made no progress whatever. We cannot help thinking that this procrastination on the part of Austria-Hungary is due to the influence of some other Great Power, though we are told by foreign journalists that such an idea is born of the imagination and is not creditable to those who conceive it. If the delay in the revision of this particular treaty blocks the way much longer serious consequences must be apprehended.

DEATH OF MISS BRITTAN.

Many people in Japan and elsewhere will read with regret the following note, taken from the *San Francisco Chronicle* of May 1st:—

Miss H. Brittan, an elderly maiden lady who had been engaged in missionary work in the Orient for a number of years past, died at the Occidental Hotel last evening. She arrived here on the steamer *Doric* on Thursday, and was so prostrated from the long sea voyage that she was compelled to take to her bed as soon as she reached the hotel. She failed rapidly, and passed away at 6 o'clock last evening. General debility, due to old age, is assigned as the cause of death. She was 74 years of age.

Miss Brittan was engaged in missionary work in India for many years, but later removed to Japan, to continue her labours. She returned from the Orient with Mrs. J. M. McCauley and Mrs. Alexander and the latter's family, who had been engaged in missionary work in Tokyo. These friends ministered to Miss Brittan's wants during her last hours, but after her death they attempted to shroud the affair in mystery by declining to give any information upon the subject. The deceased had friends in the East, and it is probable that the remains will be shipped to them for interment.

COUNT ITAGAKI AT OSAKA.

Count Itagaki was present at a social gathering given recently by the promoters of the Osaka harbour. During the course of the proceedings the Count spoke as follows:—

Gentlemen:—I have for years seen the necessity that exists for constructing a harbour at Osaka and there is no doubt that the people of Osaka fully recognise it too. Osaka is the centre of commerce and industry in Japan, and it is not improbable that its development has been largely due to the facilities of marine communication that it enjoys. Its future progress therefore, can only be secured by the reconstruction of the harbour. I have felt that this should be one of the *post bellum* measures. The most prominent undertaking after the late war has been the expansion of the army into twelve Divisions. That alteration in the military organization necessitates the provision of a port where eight Divisions of the army can be embarked in time of need. No harbour is better suited for the purpose than Osaka. Comparing this city with Hiroshima, we find that in point of accommodation the former is by far the more convenient, for it can lodge the whole twelve divisions while Hiroshima can find room for but one-sixth. Moreover, it would take but fifteen days to muster eight Divisions in Osaka, but thirty-three days are required to take them to Hiroshima. As to embarkation too, Osaka has greater conveniences. It can transfer the troops of eight Divisions to ships in five days and a half. In the late war with China, seven-tenths of the goods and materials needed were procured in Osaka, and it is one of the chief principles of military economy that troops should go on board ship along with their provisions. Yet during the Japan-China war, the troops were shipped at Hiroshima and their provisions at Osaka. It is scarcely necessary to point out that during war-time every day is valuable, but owing to the above cause much precious time was lost. From an industrial point of view I may assert that, despite the necessity for promoting agriculture and by that means expanding the national resources, especial attention must be directed to the development of commerce and industry. Now Osaka is the centre of these two sources of productive wealth. In speaking thus I do not in the least mean to flatter the residents of this city; I want only to show you that my zeal for the interests of the country is still unimpaired. The Osaka harbour scheme now in contemplation is not the result of my efforts; it sprang out of an opportunity which naturally matured. The plan was contemplated in the days of Mr. Watanabe, but failed of execution owing to the citizens devoting all their efforts to business with the feudal chiefs of Kwansei. The fortune of Osaka were at a low ebb in those days. Yet those misfortunes were but a prelude to its present prosperity. Had the scheme been carried out at the time, it would have been most imperfect, but I am confident that the present plans are well adapted to the requirements of the times. The public, I gather, advocate the engagement of European engineers to carry out the work, yet I do not think that foreigners are altogether faultless. Many of the engineers of our own country have attained considerable experience in harbour-building, and the work, I confidently believe, could be carried on under their management, provided that the responsibility for any bungling is borne by them. Apart from these matters, I may be allowed to make a few remarks with regard to some other enterprises of the city. Electric railways are now the vogue, and one has already been laid in Kyoto. While I held the post of Home Minister in Tokyo, applications were sent to me for permission to construct such railways in the capital, but I rejected them on the ground that enterprises so profitable as electric railways ought to be undertaken by the city itself instead of by private individuals. I was also of opinion that the poorer inhabitants, if unable to live in the heart of the city, ought to be carried out to their homes by the electric trains free of charge. I was subsequently informed that the City Assembly of Tokyo have decided not to undertake the construction of electric rail-

ways as a municipal enterprise, presumably since many of its members are among the shareholders of the company now about to be organized. I openly declared at the time that the citizens of Tokyo who had elected such members must have been mentally blind, and that street railways would never be permitted to be laid until they had roused themselves from their torpor. According to latest information it seems that permission is to be granted by the present Cabinet. If that is true, nothing can be more unfortunate. Any bungling in enterprises of this kind is a source of permanent embarrassment to the people, and I cannot but regret it. In Kyoto permission was given to private individuals, and Osaka capitalists have lately been making application, but I hope that if the scheme is ever carried out it will be undertaken as a municipal enterprise.

VARIOUS TOPICS.

A Tokyo correspondent writes:—"Three days ago, while visiting the wistaria blooms at Kameido, I lost my watch. Not having discovered the loss until my return home, I could not be certain about the locale of the accident, nor even know whether I had dropped the watch or been robbed of it. The chain remained, and with that I felt disposed to be content. But a friend said, "report the matter to the police, they are pretty smart." I did so, with little hope, however, for my report was necessarily vague. Within forty-eight hours, I received news that the watch was forthcoming. It had been picked up by a citizen, who had at once conveyed information to the police. I beg you to publish the fact, not merely for the sake of the credit it does to the finder of the watch and to the police system of Tokyo, but also because it will encourage others to avail themselves more readily of police aid than they do now."

We supplement the above by saying that to fail in reporting any loss of property to the police is a great mistake. There exists an excellent system in Tokyo. Finders of lost property who duly give information to the police, are entitled to receive from the owner a reward of from five to twenty per cent. of the value of the property, the owner being free, of course, to fix the remuneration within those limits. On the other hand, any one that refrains from giving information of property found by him, is liable to be treated as a receiver of stolen goods. Probably from eighty to ninety per cent. of all the property dropped in the streets are carried at once to the police, whose habit is to write out an accurate description, take the name and address of the finder, and then restore the article to him for safe keeping until the owner puts in a claim. The only defect of the system appears to be that these details are not fully advertised. But is that a defect? The theory of the police is that a loser of property should at least take the trouble of making his loss known to them. If he does so, no occasion exists for public advertising. If he does not, then probably he would not take the trouble to read advertisements, and any how he does not deserve to recover his property. We agree with the police.

A Hawaiian, says the Tokyo *Asahi*, has the distinction of being the pioneer of mixed residence in Japan. Since the abandonment of the extra-territorial system by Hawaii in 1894, it has been lawful for Hawaiian citizens to settle where they please in Japan, and to enjoy all the privileges granted by law to Japanese subjects. A Hawaiian whose transliterated name reads G. N. Blude (or Brude?), has registered himself as a resident in the house of Mr. Nihakawa Toramatsu, No. 15 Yoshiwara-cho, Yokohama. That is the first example.

There is much perturbation in Japan about the imposition of an import duty of 10 cents per lb. upon tea entering the United States. Representatives of persons interested in the tea trade from Tokyo, Kyoto, Shizuoka and Miye waited recently on the Vice-Minister of Agricul-

ture and Commerce, and explained to him that the proposed duty meant a tax of 20 yen per picul upon tea costing the same price in Japan. The duty, in short, would be equivalent to a tax of 100 per cent. *ad valorem*. They further said that if the costs of transportation, insurance, etc., were added, the tea would have to be sold at 65 yen a picul in the States in order to cover outlay; from which calculation the effect that such a duty must produce on the trade might be inferred. It seems that their object in visiting the Department of Agriculture and Commerce was to bespeak official assistance, and to explain that they were about to organize a strong agitation against the impost. There is little hope that agitation at this end will effect much. We give figures elsewhere.

The designs for the gold and silver coins of the new currency have been published in the *Official Gazette*. All the coins, gold and silver alike, have the same decoration on the face, a wreath of *Kiri* leaves broken by a sixteen-petalled chrysanthemum. The reverse, in the case of the silver token, remains as at present, but the gold have a multiple rayed sun in a scalloped octagonal medallion in the centre, and a cord beading round the edge, the space between the beading and the medallion bearing the ideographs *Dai Nippon Meiji San-junen*, and the denomination of the coin. The five-yen gold coin is about the size of a four-penny bit, the ten-yen and twenty-yen pieces, somewhat larger than a six-pence and a shilling respectively.

The question of permanent buildings for the Imperial Diet is again on the *tapis*. We read in the *Yomiuri* that a committee of nine, including Messrs. Furuichi, Chief of the Engineering Bureau in the Home Department, Tatsuno, a Civil Engineer, Nakane, Chief Secretary of the House of Peers, Okuda, Chief Secretary of the House of Representatives, and Mr. J. Conder, Government Architect, planned a wooden building to last for fifty years and to cost eight hundred thousand yen. But it having been decided that a more durable structure was desirable, plans are now to be made, on the basis of an outlay of four million yen. Our contemporary adds the singular statement that three years will be required to draw the plans, and that the work itself will take 18 years, and it accounts for that wonderful estimate by advancing the still more wonderful theory that architectural science does not permit the construction of more than 250,000 yen worth of building in a year. The site, we are told, will be Nagatacho.

Statistics are published showing the development of mulberry and tea plantations during the past three years:—

MULBERRY PLANTATIONS.

1894.....	253,889 cho (634,722 acres)
1895.....	266,104 cho (665,410 acres)
1896.....	288,937 cho (723,342 acres)

TEA PLANTATIONS.

1894.....	59,000 cho (147,500 acres)
1895.....	57,728 cho (144,320 acres)
1896.....	59,479 cho (148,697 acres)

The four Prefectures where the chief increase of mulberry planting took place were Yamanashi, Yamagata, Gumma and Nagano. The cultivation of tea, it will be seen, remained almost stationary, the only increase being in Shizuoka Prefecture.

JUNK SUNK WITH LOSS OF LIFE.

A large Japanese junk, named the *Shirakawa Maru*, which left Marugame, Kagawa Ken, about 1 a.m. on the 9th inst., for Shimomura, Bizen Province, collided, when off Kakagun about 3 a.m. the same day, with the steamer *Seiko Maru*, of the Matsuyama Steamship Company, which was going to Tadotsu from Kobe. The par (at once foundered). The passengers and crew were nearly all saved by the *Seiko Maru*, but four passengers out of 32 are still missing and are believed to be drowned.

JAPAN AND THE TARIFF QUESTION.

MANY Japanese publicists appear to be persuaded that the prime purpose of the greatly increased rates proposed by the Dingley Tariff is to put an end to Japanese imports in the United States; that the Tariff is, in short, neither a protective measure, not yet a revenue measure, but a prohibitive measure. That view is not consistent with facts, and it would certainly be regrettable that a wrong and mischievous impression should be created on the subject. Any one reading the comments of the vernacular press is forced to conclude—we ourselves, until we had made an independent examination of the Tariff, were forced to conclude—that Japan is specially discriminated against, and that, in fixing the new schedule of duties, the legislators of the United States set before themselves the object of excluding Japanese manufactures altogether. The Tariff offers no justification of such a doctrine. In so far as its protective clauses are concerned, it certainly aims at preventing the import of all manufactures likely to compete injuriously with domestic products, and to that extent Japanese manufactured goods falling within the competitive category are severely handicapped. Take the case of cotton carpets (*Sakai dantsu*) and fancy matting (*hana-gosa*). These two articles being virtually a Japanese specialty—for China's export of fancy matting is insignificant—the duties imposed on them may appear discriminatory. But they are in truth protective. The case is summed up in a statement made by Mr. CROW, Sheriff of Philadelphia:—"The product of our ingrain carpet looms has decreased from fifty thousand yards to twenty thousand yards annually, and in the meanwhile the importation of Chinese and Japanese mattings has gone up from twelve thousand yards in 1892 to thirty-six thousand yards in 1896." Thus the plain purpose of the Tariff is to prevent the displacement of domestic ingrain carpets by the cheaper substitutes that China and Japan provide. From an economical point of view we do not for an instant defend such legislation. It is outrageous. But the real sufferers by the outrage are the people of the United States, who will be obliged either to leave their floors uncovered, or purchase coverings at a price factitiously enhanced in the interests of a few industrials to whom artificial profits are thus secured by robbery of the nation at large. But apart from that wider aspect of the question, what we have to note is that Japan is not a special sufferer. European countries stand in the same limbo. British manufactures, French manufactures, German manufactures, are all taxed in a correspondingly huge proportion, some for purposes of revenue

pure and simple, some with a protective aim. From the beginning to the end of the Dingley Bill we find only one specific reference to Japanese goods and even then Japan does not stand alone. Fancy matting (*hana-gosa*) is taxed under the clause:—"Floor mattings, plain, fancy or figured, manufactured from straw, round or split, or other vegetable substances not provided for, including what are commonly known as Chinese, Japanese and India straw mattings, valued at not exceeding ten cents per square yard, eight cents per square yard and twenty-five per centum *ad valorem*." Here, it will be seen, Indian and Chinese goods are penalized precisely in the same manner as Japanese. *Sakai dantsu* falls under the provision, "carpets, carpeting, mats and rugs made of flax, hemp, jute or other vegetable fibre, valued at not exceeding thirty cents per square yard, six cents per square yard and thirty-five per centum *ad valorem*; valued above thirty cents per square yard, twelve cents per square yard and forty per centum *ad valorem*." It may, indeed, be contended that owing to the low prices of Japanese matting and carpets, specific duties of 8 cents and 6 cents per square yard, respectively, become excessive imposts. That is true, but against it we must set the fact that the *ad valorem* tax levied on the more expensive products of other countries represents an enormous charge. Japanese silk fabrics, as *habutae* and handkerchiefs, have to pay, owing to their exceptional lightness, duties proportionately higher than similar goods of French manufacture, but there is no reason whatever to suppose that the framers of the Tariff entertained any idea of discriminating against Japan in this matter. All manufactures of silk fall under a general classification, and it is fair to note that silk articles, being essentially luxuries, are legitimate objects of taxation for revenue purposes. Finally as to tea, the proposed duty of 10 cents a pound doubtless seems an immense impost from the point of view of Japanese tea growers. The quantity of tea sent to the United States by Japan in 1896 was 34,977,876 lbs., and its total value at the place of shipment being 5,163,518 *yen*, the price per pound was a little less than 15 *sen*, or about 17 *sen* in the United States. A duty of 10 cents (gold) consequently represents a tax of 118 per cent., which may well appear prohibitory, and which will not bear at all so heavily upon the higher priced teas of China, India and Ceylon. Still, it is very doubtful whether the consumption of Japanese tea in the States will be appreciably affected. The retail price there is from 30 to 50 cents a pound, whereas the teas of China and India cost at least twice as much. The difference in price will remain just as great as ever, and though some members of the poorer classes may

reduce their consumption from 2 lbs. to 1½ lbs. a month, or from 3 lbs. to 2 lbs., there will probably be little change in the total demand. At all events, Japanese tea-growers should not run away with the notion that unfriendly discrimination is exercised against them. In all countries tea is counted a luxury, and regarded as a legitimate object of taxation. The Americans, indeed, are conspicuously liberal in their attitude towards tea, and there is a strong probability that the Senate, influenced by a feeling of tenderness for "the poor man's breakfast table," will reject the Financial Committee's proposal of a ten-cents tax. But in any case we see no legitimate grounds for alarm, nor any warrant for accusing America of unfriendly action towards Japan. The Tariff, as we have already said, is a disgrace to the intelligence of American legislators and an outrage on the American public at large. Japan, however, is an altogether paltry sufferer when compared with Great Britain, for example, and still more paltry when compared with the sixty millions of American consumers. There ought not to be such an outcry. The Japanese themselves have just been engaged on the task of raising their Tariff to an extent that causes much concern to foreign importers, and with the exception of one local journalist, proverbial for giddy utterances, no one has accused them of anti-foreign motives. While for the sake of the country's growing industries we sincerely hope that the rates of the Dingley Tariff may be reduced, we deem it not altogether amiss, perhaps, that the Japanese should acquire some practical experience of the feelings that their own fiscal policy has engendered among foreign communities.

THE HAIPHONG CHAMBER OF COMMERCE & THE FRANCO-JAPANESE TREATY.

WE read the following in the Hong-kong Daily Press:—

At a meeting of the Haiphong Chamber of Commerce held on the 12th April last, the Franco-Japanese treaty was considered by the members. On the 2nd March last, Messrs. Dousdebès, Malon, and Gage were appointed as a Committee to examine the treaty and they now presented the following report on the subject which was drawn up by M. Malon:—

"Gentlemen, the members of the Committee you appointed at a sitting of the Chamber on the 2nd March, 1897, to present a report on the application to Tonkin of the Franco-Japanese treaty, believe that it will be interesting to state in the first place that all three are acquainted with Japan, having either visited or lived in the country.

They consider it necessary, in order that the situation shall be clearly understood, to point out to you that one of the principal characteristics of the Japanese people is their hatred of foreigners. This feeling is disclosed in thousands of ways to the Europeans who visit Japan or negotiate business matters with them. It was this feeling that engendered the outrages committed by the Japanese against the Czarévitch when he travelled simply as a tourist in the Far East, and against Li Hung-chang when he ought to have been doubly protected as an old man and a plenipotentiary of a conquered nation. This hatred of foreigners is directed to all, French and others, and it is only the arm-chair colonials (unfortunately so

numerous in Paris) who designate the Japanese as "the French of the Far East."

Having made this explanation we will not examine in this report the treaty of the 4th August, 1896, article by article; we have attentively read the treaty from beginning to end; we will merely point out some of the most dangerous defects.

In the first place, we find in various articles the following form, evidently borrowed from the treaties made between European nations:—"The French in Japan and the Japanese in France shall enjoy the same rights and privileges as those which are or may be granted to nationals."

The European nations or the issue of European races, eager for liberty and having in the main the same political and moral aspirations can, without inconvenience to the contracting parties, employ the above form, but we consider that this interpretation is dangerous for France in the present case, as the other contracting party is of the yellow race. In effect, the rights and privileges which are or may be granted to an Asiatic people by its own Government may be suitable for that people without being suitable for the French people. Notice that the rights and privileges of the Japanese, by which it is said we shall profit, are not known to us. They may be susceptible of such modifications as to become to us Europeans veritable vexations and even a danger. What will be the Japanese code in a few years? It will perhaps follow the Asiatic spirit by punishing with death some offences which would be met with a few months' imprisonment according to the French code. People who know the Japanese only by hearsay assimilate them too quickly with our old European races. Without doubt they have a perfect armament, swift vessels, and a flourishing trade, but what trouble have they had to organise all that? For years past Europe has given Japan all the secrets of its complicated mechanism and has spent no end of money in order to gracefully receive the envoys of the Far East, and Japan has largely profited by it. Imitators by temperament, the Japanese have quickly copied European procedure and they are, to-day, in a measure, ready to produce and export the majority of the objects required in Europe and America. The last named country is considering the matter very seriously. Such is the situation that we affirm that French imports into Indo-China will gradually fall off if the treaty of the 4th Aug., 1896, is promulgated in the colony.

We have often protested against the application in this country of the general customs tariff, but since France is actually protectionist, let us point out the danger as good patriots. Hand labour in Japan is at a low price; the charges for transport between that country and Indo-China, especially by the Japanese steamers, will be so much lower than freight rates between Marseilles and Haiphong, that French products will not be able to compete with those of Japan. Already, at this moment, certain Japanese products, such as matches, clocks, beer, &c., challenge our protectionist tariffs. What will it be when Japan enjoys for its products entering Indo-China the minimum tariff? (Article 7 of the treaty.)

Therefore, not only in the interest of local commerce, but above all in the interest of the placing of metropolitan products in our colony, we suggest that you should strongly oppose the application of the treaty of the 4th August, 1896, to Indo-China. Article 22 provides that the provisions of the treaty shall be applicable to the French colonies for which the French Government may claim that benefit. As far as Indo-China is concerned that benefit will be negative.

Concerning the mother country, we wish to point out to the French Chambers of Commerce that the day when the Japanese manufacturers go with their workmen to establish mills or workshops in France in accordance with article 3 of the treaty, it will be impossible for our countrymen to resist them. As to reciprocity, it is not true. Europeans will never be able to create in Japan prosperous establishments with a European personnel. The reason is simple. The Japanese workman has, as a rule, a salary of only fifteen or twenty francs a month; female hands have only half that. And these Asiatics are already manufacturing all our products, such as clocks, lamps, furniture, carriages, jewellery, hats, watches, boilers, colours, shoes, beer, umbrellas, crystals, chemical products, electric apparatus, printing presses, machines of various kinds, coloured paper, printed cloths, pumps, &c.

In conclusion we must add that we have learnt, in Japan itself, that the Government has advanced funds without interest to various growing industries, similar to those of Europe. How then can we compete against these people who pay such a low price for hand labour and get their capital for nothing.

To sum up, we consider that the treaty herein

reported on is all to the advantage of the Japanese. "The future will prove it."

In consequence of this report, all the conclusions of which it approved, the Chamber of Commerce unanimously passed a resolution pointing out the danger which the application of the treaty would present to Indo-China and asking that the treaty should not take effect in the colony.

Had the compilers of the above report limited themselves to the hallucination of explaining that, apprehensive of the competition of cheap Japanese manufactures, they considered it unwise to abrogate the right of imposing protective duties on Japanese goods entering Indo-China, there would have been no legitimate cause of complaint against their views. It is true that such views represent the *ne plus ultra* of unpractical romance.

A protective tariff finds its sole excuse—not justification but only excuse—in the contingency that it fosters nascent domestic industries. From the consumer's point of view, it is a monstrous fallacy and injustice. Now for the purposes of this particular argument all the French colonists in Tonkin are consumers. It is not to promote the growth of their own local industries that they protest against the extension of the Franco-Japanese Treaty to Tonkin. Their presentment of the case is this:—"At present we pay high prices for French manufactures sent to us from the mother country ten thousand miles overseas. We fear that we may be tempted to buy in preference Japanese manufactures, which, being produced under more economical conditions and in our vicinity, will be procurable at much lower prices. Therefore we desire to impose upon Japanese manufactures such duties as shall render it impossible for us to buy them cheaply." It is probable, on the whole, that no body of thinking men, above all a body of practical merchants, ever committed themselves to such a foolish proposition. If a Japanese Chamber of Commerce passed a resolution of the kind, we can imagine what exquisite ridicule would be poured upon it from the vials of French wit. Still, if the members of the Haiphong Chamber wish to guarantee themselves against the unpatriotic economy of supplying their every-day wants at a minimum of cost; if they desire to condemn themselves to pay needlessly high prices, that is their look out. It is within their competence to be as childish as they please, and nothing is permissible to us except to regret that doctrines so extremely unenlightened should emanate from any community of Occidentals. It must be noted, however, that the whole of the Haiphong Chamber's contention in this respect is a pure phantasy. The Tariff appended to the Revised Franco-Japanese Treaty carries with it no obligation of reciprocity. It limits the amount of duties that may be imposed by Japan upon French goods entering her territory, but it sets no limit whatever to the duties that France may levy on Japanese goods entering

French territory. Even though Indo-China were brought within the purview of the Treaty, the French colonists in Tonquin would retain just as full a measure of competence as ever to guard themselves against the danger of supplying their every day wants cheaply. There would be nothing, so far as the Treaty is concerned, to prevent them from taxing Japanese products and manufactures out of the Indo-Chinese markets. What are we to say of a Chamber of Commerce which, in passing public and deliberate judgment upon an international agreement, begins by committing itself to one of the silliest economical fallacies ever conceived, and goes on to denounce the agreement on the strength of a misconstruction that the slightest attention would have obviated?

The resolution contains other pronouncements even more disgraceful to the intelligence and liberality of its framers. The suspicion that Japan's Code may be so altered in a few years as to "follow the Asiatic spirit by punishing with death some offences which would be met with a few months' imprisonment according to the French Code"—that suspicion, if it has any value at all, means that Japan is never to be admitted to equal intercourse with Occidental peoples. The Japanese Criminal Code and Code of Criminal Procedure have been in satisfactory operation for more than 15 years. They are Codes modelled on those of France herself, and during the whole time of their enforcement there has not been the slightest indication of a tendency to increase the penalties prescribed by them. On the contrary, a committee of legal experts is now engaged in the task of revising them on the basis of affording fuller protection to accused persons. If 15 years of successful practice constitute no guarantee in the eyes of the Haiphong Chamber of Commerce, obviously no length of time would be conclusive. So profoundly are the members' judgments warped by racial prejudice that they are quite incapable of estimating the value of solid facts. "The other contracting party is the yellow race." There lies the whole pith and marrow of the trouble. These French gentlemen, units of the most highly civilized and perhaps the most liberal nation in the world, disgrace themselves by the wretched admission that the principles of justice and magnanimity must be banished from a transaction where one of the parties is Asiatic. And in the same breath they "consider it necessary to point out that one of the principal characteristics of the Japanese people is their hatred of foreigners." What shall we call the principal characteristic of the three men who drew up this report and of the Chamber that adopted it? Is it reasonable to expect that the patience and good-will of any people, however long-suffering and friendly, could survive such displays of racial dislike as that made by the Hai-

phong Chamber of Commerce? It was Japanese hatred of foreigners, we are told, that "engendered the outrages committed against the CZAREWITCH and against LI HUNG-CHANG." If any events were calculated to demonstrate the non-existence of such hatred, the outrages in question were precisely those events. Had there been the slightest attempt on the part of the Japanese press to condone the acts of TSUDA SANZO and KOYAMA TOYOTARO, or the slightest indication that any section of the Japanese public approved their acts, the Haiphong Chamber's libel might be defended. But each of those lamentable outrages evoked universal and unequivocal execration. The assassin of Viscount MORI, the would-be assassin of Count OKUMA, found admirers, but not a solitary whisper of extenuation was heard in the case of the attack upon the CZAREWITCH and the Viceroy. It was left for the Haiphong Chamber of Commerce to deduce the sentiment of a nation from the acts of two solitary fanatics, such as every crisis begets in every country, and to ignore altogether the acts of the nation itself. On which side is the hatred? Frankly and honestly, can any one, after perusing this resolution of the Haiphong Chamber of Commerce, hesitate to say on which side the hatred and prejudice are really operative?

THE STREETS OF TOKYO.

IT is satisfactory to find that the condition of the Tokyo streets is at length beginning to evoke strong protests from the vernacular press, or, at any rate, from the leading Tokyo journal, the *Fiji Shimpō*. We have often alluded to the subject, but of course it scarcely falls within the province of a foreign newspaper to write strongly on such topics. The Japanese must know pretty well by this time what outsiders think of the streets of Tokyo, and, besides, they are themselves well able to contrast the manner of road repairing and road making pursued in their capital with the methods followed in Europe. We do not pretend to assert that streets in a worse condition may not be found in many Occidental cities, but we do say that for dust, mud and ruts, Tokyo is about as bad as any capital we have ever visited, Peking always excepted, and that the unscientific devices resorted to for making and mending the thoroughfares are surprising in a country so progressive as Japan. There has always been a great difficulty to contend with, the water works that exist and the water works that do not exist. Owing to the want of water distributed according to modern rules, no supply is available for sprinkling the streets; and owing to the presence of water distributed in defiance of modern rules, the streets are perpetually in process of being torn up. It is a feather in the cap of Japanese engineers that they

were able, two and a half centuries ago, to construct an aqueduct by which Tokyo receives, from a river 20 miles distant, more water than the supply required in London. But it redounds little to the credit of the citizens of to-day that the wooden pipes for distributing the water have not yet been replaced by iron, and that never a month passes without some streets being turned temporarily into a morass owing to the necessity of replacing a decayed pipe by a sound one. However, that source of road destruction will soon disappear, and there will remain only the flagrant defects of the present system of road making and road repairing. It is alleged that broken stone is unprocurable in Tokyo, and that genuine macadamizing and sound mending are consequently impossible. The statement should be modified to read that broken stone is not procurable except at considerable expense. It is procurable in abundance if the municipality would only organise means of procuring it, and recognise that money spent in the improvement of the thoroughfares in a great city is the most profitable kind of investment. We are obliged to confess, however, that the *Fiji's* manner of estimating that profit does not commend itself to our intelligence. Our contemporary assumes that there are about a hundred thousand carriages, *jinrikisha* and waggons in Tokyo, that the daily cost of up-keep averages fifty *sen*, and that five *sen* would be saved were the roads kept in good order. That represents a total economy of five thousand *yen* daily, or 1,825,000 *yen* annually. But on such a basis of calculation the saving on account of a *jinrikisha* would be eighteen *yen* a year, which is obviously a greatly exaggerated estimate. Another of the *Fiji's* conceptions is that a third of the population of Tokyo go out of doors every day, and that, in consequence of the state of the roads, each of these wayfarers suffers a loss of half a *sen* through wear and soiling of garments and foot-gear. From that source three thousand *yen* daily result—the population being put at 1½ millions—or 1,095,000 *yen* annually. But such aspects of the question seem to us insignificant. It is not wear-and-tear suffered by vehicles, or by clothes and boots, that has to be primarily considered, but the incalculably greater injury to health, the immense access of discomfort, the vast loss of time and the serious waste of human power. The dust clouds that sweep through the streets with every puff of wind render Tokyo one of the most unsalubrious cities in Japan, and cost the lives of hundreds of children every year. The mud, the boulders used to fill up ruts, the coats of river-bed gravel thrown down loosely and never rolled in, constitute so many obstacles, adding a large per-centage to the toil of progression and transport, and appreciably reducing the efficiency of human labour. These are factors of real importance.

The condition of the main streets in the city proper may not seem so flagrantly bad, though it is evil enough. But the roads in the suburbs are terrible. The capital of Japan is like a town with lines of circumvallation to protect it from intercourse with the adjacent districts. The immense quantity of supplies that a million and a half of people draw from the neighbouring country for daily use have to be dragged citywards over roads so faulty that the labour of carriage is nearly doubled. The contemplation of such waste is appalling. Tokyo can not begin to call itself civilized until it renovates its arteries of communication. Did the citizens groan under a heavy burden of taxation, there might be some excuse for the parsimony shown by them in this vital matter. But we read in the *Fiji* that their local taxation amounts to only 1.89 *yen per capita* against 3.43 *yen* paid by the people of Kobe, and 1.92 *yen* by the people of Nagasaki. Nothing is said of Osaka, but Osaka thoroughfares are Elysian compared with those of Tokyo. In truth Tokyo is a sleepy city. Not inaptly was the term "dream" applied to the vast scheme of improvement mapped out by some of its sanguine progressionists half a dozen years ago. Season after season its people toil uncomplainingly through streets converted into quagmires by tram-cars. The sound of the electric carriage rolling smoothly and cleanly through ancient Kyoto, has not yet reached the dull ear of the metropolis. Its citizens, choking in the dust-simooms of mid-summer, are scarcely yet sensible of the plashing of fountains in their chief suburb, Yokohama, and when their familiar demon sweeps down on them in winter nights with roar of flame and storm of sparks, they still tickle him with antiquated toy-squirts, ignorant that he has been effectually exorcised by their hydrant-using fellow-countrymen in places still classed as "rural." Seated on the sea-shore, visions of the advantages of a maritime city are wafted to them across half a dozen miles of mud-flats from a forlorn group of inaccessible steamers, and with railways touching their outskirts on four sides, they have not so much as a solitary line connecting their wards. They are placid and patient folk. Cartloads of coarse gravel shot down at their doors do not disturb their equanimity by a hair's breadth; they look calmly and admiringly at acres of water-works' pipes lying unused for months in their thoroughfares; they wait for conflagrations to widen their streets, and after they have been condemned for a quarter of a century to the purgatory of roads that would make a European "see scarlet," they begin to count the cost of washing their socks or tinkering the tires of their waggon wheels. It would pay the city to import a small colony of wide-awake, go-ahead citizens from Osaka or Kyoto. A little of their enterprise would eventually leaven the great metropolitan lump of somnolent inertia.

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

Several Christian organs note with satisfaction the growth of Reformatory Work in Japan. Mr. Miyoshi Taizō, formerly President of the Court of Cassation, has taken the greatest interest in this work, having devoted all his earnings to the establishment of a Reformatory (感化院) in Tokyo. In connection with this project a table of statistics has been published, which gives the number of criminals under the age of 20 from 1882 to 1894:—

Year.	Males.	Females.	Total.
A.D. 1882	8,216	800	9,016
1883	11,212	1,237	12,449
1884	10,614	1,447	12,062
1885	12,678	1,870	14,548
1886	12,332	1,687	14,019
1887	11,341	1,574	12,965
1888	10,045	1,393	11,438
1889	11,470	1,431	12,901
1890	17,742	2,221	19,966
1891	20,446	2,486	22,932
1892	22,309	2,947	25,246
1893	23,407	3,043	26,450
1894	24,442	3,228	27,670

Total ... 196,304 25,354 221,658

It will be perceived that with the increase of population has come a larger increase of juvenile criminals and, as Mr. Miyoshi contends, it is high time that Japan adopted the methods pursued in Western countries for the reclamation of this class of offenders after they have left prison.

Attention is called by the *Kirisutokyo Shim-bun*, in a leading article, to the rapid growth of Christian benevolence. Some years ago, says this organ, it was with great difficulty that money was raised for benevolent objects, but now liberal support is given to a number of charitable institutions. When the Meiji Jogakkō was burnt to the ground a short time ago, subscriptions to a fund for a new building came pouring in from Government officials and others. The same may be said of Mr. Naruse Nizō's Female University scheme. It has met with the support of the highest Ministers of State. Mr. Hara Taneaki's Reformatory, and the Taki-no-gawa Orphanage, patronized by Princess Iwakura, are other instances. These efforts all originated directly or indirectly from Christianity. It is important to note that when Christians combine with non-Christians in benevolent works, there is a danger of Christianity losing some of its distinctive qualities, of its compromising in order to meet the views of outsiders. In its constant contact with society Christianity must either change society or be changed by it. It is the duty of its professors to see that the former is the rôle played by their sacred religion.

In the pages of the magazine from which we have just quoted, appears a statement of the views of Mr. Ozaki Hiromichi, the head of the Dōshisha, on a variety of Christian subjects, of which we give an epitome. (1) The importance of aiming from the very first at rendering churches entirely independent of foreign aid cannot be over-estimated. Upon this, not infrequently, the future existence of a body of Christians depends. It is said that the failure of Christian missions in Turkey is to be attributed to the fact that self-support among Turkish converts is practically unknown. (2) Ecclesiastical Government should be elastic. It is a mistake to think that any one form suits all times and all circumstances. The Kumiai Christians earnestly maintain that churches should be allowed full liberty in the choice of ecclesiastical systems of Government. (3) The difficulties of evangelistic work are exaggerated by some churches, which wait for an elaborate organization before doing anything. The simplest and most effective way of spreading the gospel is for every Christian to set about influencing those around him or her. (4) The most urgent of Christian duties is the instilling of Christian doctrine into

the heart of the nation. Christianity floats on the surface of the national mind, but has not reached its depths. (5) Much time and labour are wasted over unpractical schemes, over the establishment of societies whose permanent stability is more than doubtful. What can be effected in the way of union, by all means effect, but it is useless to attempt the impossible. There is no use in the church encumbering itself with all the useless ornaments and paraphernalia of an ancient *daimyō* on a journey. (6) Socialism has been much discussed of late. But it is in no sense an urgent question in Japan. Neither the spirit of individualism nor the struggle for existence is felt much in Japan compared with Europe, though there is no saying what the future may have in store for us. (7) It is only lately that, consequent on the abolition of military superiority, the mass of the people has had an opportunity of asserting itself. Individualism is only in the first stages of development and needs to be encouraged rather than checked. (8) There is throughout the country too much ambition and too little steady application to the work in hand. Ambition has its uses, but becomes injurious when it renders men dissatisfied with the appointments they hold and careless of how their duties are discharged.

The *Nihon Shūkyō* furnishes its readers with a *résumé* of Dr. Inouye Tetsujō's views on religion, from which we take the following:—Among Buddhist sects the Hossō shū and the Kegon-shū are the most advanced as regards philosophical teaching, but these sects are not prosperous at the present time. The men that are being prepared for ordination at the 大學林, Daigakurin (Buddhist University) are, according to information obtained from one of the professors of the institution, a very inferior set of men, including a large number of bastards, sons of beggars, and young men of uncertain parentage. The instruction given to these candidates for holy orders is of very imperfect character. The educational system followed is out of date and little attention is given to modern learning. In a knowledge of general subjects the students at this University are behind the scholars at elementary schools. The students are forbidden to eat meat, and consequently are for the most part a weakly set of men, who stand little chance of success in a world of keen competition. Added to all this, their lives are by no means of an exemplary character. History abundantly shows that Buddhism prospered most in ages when society generally was in a very backward state, and that it deteriorated in a corresponding ratio to the progress of the nations that accepted its teaching. To cite a few instances, in China, in the Tang era, (A.D. 518–922), lived numbers of noted scholars by whom the people of China were enlightened, and Buddhism, as a consequence, exercised little influence over men's minds. But the situation was reversed in the Sung era, when society retrograded and Buddhism advanced. In Japan Buddhism prospered during the Tokugawa era, but has deteriorated since. As regards Buddhist doctrines, however, much value they may have as philosophy, it cannot be affirmed of them that they have the power to improve society to any great extent. It cannot be said that Christianity is much better off than Buddhism so far as appreciation by the educated classes goes. Out of the 1,500 graduates of the Imperial University there are not more than five or six who have in after life shown any special zeal in spreading Christianity. There are those who regard the present state of deadness in the Christian Church and indifference among unbelievers as a reaction from the excessive fervour of former days. We cannot agree with that opinion. To us the antipathy to Christianity seems likely to be permanent. But there is another way of regarding the whole subject. May not the thing called religion have merely altered its appearance and leading characteristics without losing its most valuable elements? Apart from rites and ceremonies, apart from creeds and dogmas, will there not always exist in the minds of men, feelings,

aspirations and hopes of a thoroughly unworldly type? And do not these constitute the very essence of true religion? The attempt to construct a new system on eclectic principles is utterly futile. No such system could possibly exercise any powerful influence on men's minds. For it has been proved over and over again that eclecticism in religion is another name for weakness. The great ancient creeds wield authority as long as they are believed in, but the patchwork systems spun out of men's brains have never done more than interest a few novelty-loving minds.

Mr. Nunokawa furnishes to the *Nihon Shūkyō* a number of statistics bearing on the condition of the lower classes, which, he maintains, need help from benevolently inclined persons. The following details are culled from his tables. In 1891 there were in Tōkyō 13,931 double *jinrikisha* and 2,548 single ones. In 1895 a marked change had taken place; double *jinrikisha* had decreased to 8,253 and single had risen to 32,071. This change, it is interesting to note, Mr. Nunokawa attributes to an alteration in the sentiments of the nation. In 1891 and a few years prior to that date, the pro-foreign wave may be said to have reached its height. The foreign custom of man and wife going out in company was finding favour in the metropolis. Then came the reaction, involving an increased demand for single *jinrikisha*. The following figures show the number of pullers in thickly populated districts. Asakusa leads with 7,320, next comes Fukagawa with 4,397, then Kanda with 3,758, followed by Shiba with 3,455 and Shitaya with 3,442. Akasaka stands at the bottom of the list, having only 951 pullers. Among the lower orders old paper and rag buyers are very numerous. That occupation, it is said, yields quite a handsome profit to poor people, so much so that persons engaged in it can afford to lie idle half their time, if so inclined. The total number of rag and paper buyers in Tōkyō is 3,061. Shitaya has 473, Kyōbashi 471, Asakusa 408, Koishikawa 285, Shiba 249, Honjo 244, while Nihonbashi, with 64, and Akasaka, with 45, stand at the bottom of the list. A still poorer class of rice earners are the men who pick up the scraps of paper thrown away by passers-by. Of these there are in Tokyo 834, Shitaya having 583 and Asakusa 188. The *geta*-menders, who go round from house to house in Tokyo number 797; the purchasers of broken glass 2,348. The lodging-houses called *Kichin-yado* or *Kojiki-yado*, where a night's food and lodging can be had for about 3 *sen*, number in the whole of Tokyo 187, of which 72 are in Honjo, 42 in Fukagawa and 41 in Asakusa. Azabu has only 2 such places. Mr. Nunokawa purposes publishing in the *Shakai-sasshi*, a new magazine to appear this month, a full account of the condition of the poorer classes in the capital.

The *Seikyō Shimpō* discusses the bearing of the new Criminal Code on morality and religion. It is maintained by some, says this organ, that the minuteness of the new laws will make escape from punishment more difficult, but we are of opinion that unless some religious and moral influence is brought to bear on the classes from which criminals come, increased sharpness will prove more than a match for the administrators of the new laws. The *Seikyō Shimpō* thinks that reform among the occupants of the bench and the members of the bar is much needed.

The *Kokumin-no-tomo*, or rather Mr. Tokutomi, its editor, who has been on a visit to Russia, has given umbrage to the *Seikyō Shimpō*, by asserting that religion in Russia is a mere tool of the Government and is employed as a means of robbing the people of their rights and their freedom. The writer refers to the effects of the study of advanced Biblical criticism in Japan. He says that there is no denying that many have been turned aside from the Christian faith by reading German rationalistic Commentaries. Publicity has been given to unorthodox criticism in the Imperial University and from certain Protestant

pulpits, and as a consequence the faith of weak Christians has been much shaken. The *Srikyō Shimpō* concludes by asserting that the adverse criticism referred to is not to be feared, since it was only invented as an excuse for the unbelief of men who had other grounds for rejecting Christianity.

In the pages of the *Shūkyō*, Dr. Kitajima Wataru defines modern Unitarianism. Though, as its name implies, the body calling itself Unitarian championed in former days the cause of the unity of the Godhead as distinguished from the doctrine of the Trinity, it no longer confines itself to this narrow function. Its main object now, according to Dr. Kitajima, is to unite in one system truths derived from a variety of sources. That is vague, Dr. Kitajima admits, but he sees a charm in its vagueness. Just as various atoms combine in their own way to produce iron, lead or other valuable substances, so, says this authority, do particles of truth that lie scattered in various systems form themselves into a body. Nothing is final. Bodies form, dissolve, and the elements of which they are composed go to form other bodies. The Unitarian welcomes light and knowledge from whatever quarter derived. If asked to enumerate the distinctive characteristics of a modern Unitarian, says Dr. Kitajima, I reply:—(1) He is a man who holds reason in high regard and who is prepared to follow its dictates on all occasions. (2) He is a man who cultivates to the utmost his own conscience and who thinks it the greatest of crimes not to follow its lead. (3) He is endowed with the power of distinguishing between good and evil. By the study of various religions, concludes Dr. Kitajima, is the true nature of religion to be discovered. Mux Müller says, "He that knows only one religion knows not what religion is." The Japanese are privileged to have the representatives of various creeds in their midst and to be able to profit by them all.

The number of the *Shūkyō* from which the above is taken, discusses the question of nationalism *versus* individualism, urging the necessity of confining nationalism within philosophical limits, not allowing it to crush individualism or act as a strong anti-cosmopolitan influence. We read in this magazine that Messrs. Yokoi Tokiwo, Onishi Shuku, Anezaki Masaharu, Kishimoto Nobuta, Kitajima Wataru and others have formed a Society called the 丁酉懇話會 *Tei-yū Konwa-Kai*, which is engaged in the discussion of ethical subjects. We hear of other societies of the kind being formed. There is a strong antipathy to the extreme nationalism advocated in certain quarters, and the voices of the preachers of individualism *versus* nationalism are to be heard on all sides.

The Hikaku Shūkyōkai (Comparative Religions Society) has been engaged in the discussion of the various forms of abstinence practised in Japan and in surrounding countries. Three distinct kinds of abstinence were considered (1) Temporary abstinence for the sake of some special benefit to be derived, such as abstinence from tea or salt after praying for recovery from sickness, in token of self-abasement and submission to the will of the gods. (2) Abstinence which is prompted by the beneficial effects it produces; such as refraining from *saké* when *saké* proves injurious to the system. (3) Abstinence prompted by the general feeling that self-abnegation is meritorious in the sight of the gods, on the principle that the more the suffering the greater the reward.

In the *Shtnri* Dr. Christlieb is continuing his discussion of the philosophy of Kant; the Rev. H. Minami writes on "Christianity and the knowledge of men;" and Mr. Anezaki on the "Origin of the Buddha-Kaya theory."

The *Rikugō Zasshi*, in addition to devoting considerable attention to the discussion of

* Evidently named after the time when it was formed, *Tei* being one of the *Yikkan* or 10 calendars, and *yū* or *tori* being one of the honorary signs.

socialism, has learned articles on "the Atomic theory of Buddhist philosophy;" "the Characteristics of Chinese philosophical thought," and finds space to have a fling at that anti-foreign, bigoted Society, the Kummin-dōi Kai, whose establishment was noticed by us in the January summary.

The *Sekai-no Nihon* ridicules the attempt of certain scholars to resuscitate the system of ethics that made loyalty to superiors and filial piety its basis. It has been proved, says this organ, that these two principles are inadequate to form the foundation of modern ethical teaching.

A book entitled "Dr. Inouye and Christianity," and "A discussion of the Methods of Reconciling Religion and Education," has been published by the Tetsugaku-Shoin, consisting of 1,200 pages. The volumes, three in number, are a reproduction of the numerous articles on the above named subjects contributed by Dr. Inouye Tetsujirō to various periodicals.

The widest difference of opinion prevails among contributors to religious literary organs and to other magazines on the amount of progress being made by Buddhism and Christianity in Japan at the present time. The majority of writers represent both creeds as being out of favour with the bulk of the nation. But the *Taiyō*, we observe, holds an opposite opinion. It maintains that within the past few months there has been a distinct revival of interest in both religions, and that it has been brought about by the new activity of Buddhist and Christian Sects. The Buddhists have reorganized their parochial system and put a stop to numerous abuses connected with the administration of ecclesiastical finances. They have also made an attempt at popularizing their teaching, which, while leaving much to be desired, is a step in the right direction. There is no doubt that many Buddhist doctrines are too metaphysical for popular ears and that that is one reason why, as a reformer of men's lives and as an enlightener of public opinion, Buddhism does not compare with Christianity. There is still a strong scholastic tendency among the younger priests which, if not checked, bids fair to remove Buddhism from the sphere of practical religion and make it a mere pleasure-ground for metaphysicians. We, says the *Taiyō*, whose article we are epitomising, prefer the old priests to the young, for the simple reason that their teaching is more adapted to the comprehension of the masses and deals with the affairs of everyday life. Christianity is displaying fresh forms of activity. Evangelization societies like the 有志傳道隊 *Yūshi dendō tai*, the *Shinsengumi-dendō kai* and the *Kyōseigun* show that a new wave of religious feeling is passing over the land. In addition to this, Christians have in many quarters been taking the lead in discussing social subjects and in devising measures for the elevation and enlightenment of the lower orders. In another article on Buddhism, the *Taiyō* insists that the only possible way of making Buddhism a power in the land is by reforming the priesthood. No attention will ever be paid to the moral discourses of men who are known to be living immoral lives. There was a time in the history of Buddhism when its priests were an ornament to religion. They degenerated sadly during the latter part of the Tokugawa era. The appointment by the Bakufu of Hayashi Dōshun, an eminent Confucianist, to the supreme control of scholastic affairs, a post that had hitherto been filled by Buddhist priests, signified that even in the matter of learning Buddhism had begun to decline. The writer of the article from which we have been quoting is the well-known *Shakū Unshō*, a man who lives a most austere life, taking only two meals a day and eating only vegetables.

According to the *Kyōrin*, the organ of the *Shintō* sect known as the *Yingū-ha*, an important decision has lately been made by the representatives of the chief *Shintō* sects. Fearing that one of the effects of mixed residence and

increased facilities for spreading Christianity may be the discontinuance of much of the ancestral worship, for the encouragement of which *Shintō* shrines exist all over the country, it has been decided to petition the Government with a view to a separation of all *Daijingu* rites and ceremonies, and to their classification as *Koku-ritsu* or *Koku-shiki* (National Ceremonies). Since the worship of ancestors throughout Japan rests on the worship of the Imperial manes in Ise, it is not at all improbable that the petition will be granted. For some time past, shrewd *Shintō* priests have realised that their only chance of survival after the inauguration of the new order of things lies in imparting to their religious performances a more marked air of nationality than they have of late years borne, and they now have come to the conclusion that the most effectual way to do this is to solicit Imperial patronage and to make the observance of certain rites a national duty which no patriotic Japanese will be likely to neglect. The *Fukun Shimpō*, commenting on this decision, expresses doubts as to the possibility of the scheme being carried out. Having declared in the Constitution that subjects shall be free to choose their own religion, the Government may not find it easy to interfere in favour of rites that have hitherto always been regarded as religious. The project will have its opponents and hence its adoption is by no means certain.

The *Bukkyō*, somewhat late in the day, makes an earnest appeal to its readers for subscriptions to a Famine Relief fund which has been started by the Buddhist fraternity in Japan. Descriptions of scenes of distress, with illustrations, are furnished, and all recipients of divine mercy are exhorted to show their gratitude to Buddha by helping their fellow-men. The same magazine gives an account of a disturbance in the Jōdo sect connected with the erection of temples in memory of the soldiers who perished in the late war. It is said that a sum of 100,000 yen has been raised for this purpose and that the priests who have shown special zeal in collecting money are to be rewarded for their services by promotion. Against this proceeding there has been a strong protest, the 宗弊 *Shūsui*, one of the organs of the Jōdo-shū, taking up the matter very warmly. At a meeting of Councillors held in Shiba on March 1st the business manager of the sect, Date Reiken, was declared to be thoroughly corrupt and a vote of want of confidence in his administration was passed. He has since resigned his position, but the sect is still in a ferment over the affair and the rival factions are hurling anathemas at each other as openly religious bigots know how. This makes the fifth big dissension in Buddhist ranks within twelve months. So that we are hardly surprised to find Dr. Katō saying, *Konnichi no Bukkyō to wa tenka no ranmin nari* (乱民): "There is no such disturber of the peace of the empire as modern Buddhism." The troubles in the other sects have by no means been settled. The *Yiji Shimpō* thinks that nothing short of the resignation of the Chief Abbot will allay the excitement in the Otani-ha, whose conduct, according to this journal, will not bear investigation. The Nichiren zealots, as was anticipated, have lost their case in the Court of Appeal, and have had to pay all costs. But their blind bigotry has not abated one jot. They have already given notice of appeal to the Court of Cassation and furthermore have published a book entitled 本宗綱要 *Honshū Kōyō*, in which they have attempted to make mince-meat of their adversaries.

The plague appears to be rapidly disappearing from Bombay, the total deaths for the last week in April being only 310 from that cause.

The Governor-General in Council at Simla has directed that the 21st and 22nd June be observed as public holidays throughout British India. Beyond this it is not intended that there shall be any public recognition in India of the Diamond Jubilee.

NEWS OF THE WEEK.

The *sinrikisha* man who assaulted Mrs. J. H. Longford in Kobe last week, has been sentenced to ten days' police detention.

Earthquake shocks occurred at Guadaloupe about the 1st of May, by which four persons were killed and forty injured.

A telegram from Iwate, dated the 16th inst., reports that nine Englishmen in three boats, had drifted ashore at Ofuna-watari, Iwate Ken.

The plenary Presbyterian Synod at Sunderland, on April 29, rejected the petition containing the charges of heresy against Dr. Watson (Ian MacLaren), only seven men supporting it.

Mr. Raymond Blathwayt, the so-called "Prince of Interviewers," who has been on a professional tour in India, was thrown from his horse while riding in Colombo three weeks ago and had his arm broken.

It is proposed to light a great number of bonfires all over England on Jubilee night, and a meeting of Members of the House of Commons interested in the matter is to be held. It is suggested that all the bonfires should be lighted simultaneously.

The Japanese man-of-war *Kaimen*, while at anchor off the coast of Hozan, near Twatutia, on the 8th inst., sent landing parties ashore to the defence of that town. During the return of the boats one capsized owing to the strength of the wind, and Lieutenant Tanimoto and eight others were drowned. Another report received at the Admiralty states that although the boat containing Lieutenant Tanimoto and eight others was upset, the Lieutenant himself and four others were saved, but four men are still missing.

We learn from the *Boyski Shimbun* that on the 14th ultimo a Mr. Murata Katsunosuke, of Tokyo, obtained an attachment of the property of Mr. S. Severim, a Portuguese subject who has been in jail awaiting trial for a month or more, the debt alleged to be owing by him to Mr. Murata being over 1,000 yen. Mr. John T. Wagen of Yokohama, has now put in a claim that the property attached belongs to him and not to Severim, and has taken action in the Yokohama Chihō Saibansho for the recovery of \$120 from Mr. Murata.

The private railways for which charters, permanent or temporary, were granted by the Communications Department from the 22nd ultimo till the 10th instant were as follows:—

	Miles.
Kanabe Railway	26
Kyōki Railway.....	66
Chikushi Railway.....	7
Yōō Railway	35
Sakata Railway	3
Saga Railway	13
Uwajima Railway	15
Kishiu Railway.....	7

In consequence of the extension of marine affairs since the late war, the Naigai Kaiji-kai (Home and Foreign Marine Investigation Association) of Ichibancho, Kojimachi, Tokyo, is contemplating establishing the Teikoku Kaiji Hakuran-kai (Imperial Marine Exhibition), with the object of exhibiting naval arms, spoils, ships' machinery, fishing implements and so forth. Mr. Toda Mankichi, Manager of the proposed exhibition, is now engaged between Tokyo and Yokohama in obtaining the assistance of leading capitalists. The Exhibition is to be opened in Ueno Park this Autumn.

Since the late war with China, the *Mainichi Shimbun* notes, a considerable increase has taken place in the demand for condensed milk, both imported and of home manufacture. Imports during the past three years were:—27th year of Meiji (1894), 165,462 yen; 28th year of Meiji (1895), 139,467 yen; 29th year of Meiji (1896), 176,950 yen. Although it is impossible to give an accurate account of sales of the home product for last year,

it is generally supposed that the amount has been double the value of the imported article during the past three years, being no less than 633,168 yen worth, or 2,356,000 cans. The process of manufacture in Japan has not yet attained perfection. The two most prominent companies in Tokyo have inaugurated the use of vacuum pans, no foreign apparatus being utilized in other parts of the empire. Kyoto, Fukushima, and Shizuoka occupy a conspicuous position next to Tokyo in the production of milk, the quality of which is said to be in no way inferior to the imported commodity.

Death has been busy in the foreign Settlement of Kobe. At 1 a.m. on Wednesday, Erica Jessie, the five-year old daughter of Mr. and Mrs. Robert Young, succumbed to that most insidious of all diseases, diphtheria. Deep and general sympathy was evoked at this sad termination of a life that seemed full of happy promise. The same morning Mr. Carl Randewig, a native of Halberstadt, and well known to the German community in Yokohama, passed away at the International Hospital at the age of 33.

A report compiled by the Agricultural and Commercial Department shows that the industrial expenses of various Cities and Prefectures this year are to be distributed as follows:—

	Yen.
General husbandry	191,316
Silk	128,264
Tea	18,958
Marine products	62,427
Cattle rearing	25,099
Forestry	30,662
Commerce	93,971
Observatories	77,841

The loyal Briton, who watches from a comfortable seat the passing through London's streets of the pageant that will be one of the main features of the coming Queen's Jubilee will have to pay a pretty penny for his pleasure, remarks an American paper. It then quotes the following circular that has been issued in London:—

"QUEEN VICTORIA'S JUBILEE PROCESSION."

We are now offering some of the finest positions for viewing the procession.

Seats on first floor at	£10, £12 and £15
Seats on second floor at	8, 10 and 12
Windows on first floor at	50, 75 and 100
Windows on second floor at	40, 50 and 60
Seats on upper floors and roofs from	2 to 5

Book early with remittance to secure good position.

The Tokyo Rice Exchange lately reduced the amount of security deposits from five per cent. to two per cent, and the proper authorities having sanctioned the change, the following scale has been drawn up:—

Transactions.	Security.
YEN.	YEN.
Above 8 below 9	1
Above 10 below 11	2
Above 12 below 13	3
Above 14 below 15	4
Above 9 below 10	1.50
Above 11 below 12	2.50
Above 13 below 14	3.50

There is no doubt that these reductions will have the effect of increasing business at the exchange.

The period for payment of security deposits on the shares of the Mercantile Exchange in Yokohama expired on the 15th inst., and the organizing committee are making preparations to hold the first general meeting by the 25th inst., so that rules may be drawn up and officers elected. Official sanction for the incorporation of the company is expected to be obtained by the 15th of next month, and the first call of ten yen per share is to be fixed for July 10th, and the second for October 1st. The business of the Exchange will be commenced about November next. The new building for the offices of the Company are situated in Aioicho Sancho-me, and will be completed during October.

As the gold monometallic system is to be enforced from the 1st October this year, says the *Fiji*, the Osaka Mint, having received full instructions from the authorities as to the form, etc., of the new coins, will proceed with

the work of coinage with the greatest possible promptitude and energy. The work of striking twenty yen pieces has already begun, and now the new five yen pieces will be taken in hand. It is said that the indemnity money received from China up to the present time, together with gold bullion sent to the Mint from London, aggregates some forty millions of yen in value. In order to turn this into new gold coins the working hours of the Mint are to be from 6 a.m. to 8 p.m. every day, no holidays being taken on Sundays.

According to the *Fiji Shimpō*, the Directors of the Yokohama Dock Company, whose No. 2 Dock was opened a month or so ago, propose to double the capital of the Company, and construct in all three docks. The proposed changes are to be laid before the shareholders at the ordinary general meeting to be held in July next. The ground available for the construction of docks, including those already completed and in course of construction, covers about forty thousand *tsudo* (33 acres), of which about half is to be occupied by the three docks and the remaining portion of the ground will be appropriated for slips for repairing small vessels, and workshops. The whole scheme, of course, requires a considerable period of time to complete, and changes in the programme may be expected.

The general abstract of marriages, births, and deaths in Great Britain for the year 1896 was recently presented to Parliament. The summary shows that the enumerated population on 6th April, 1891, was 29,002,525, and the estimated population in 1896 was 30,717,355. The total number of marriages in England was 484,890. The births were 917,201; of this number 466,632 were males, and 450,569 females. The deaths were 527,929, of which number 271,293 were males and 256,636 females. In London, the estimated population to the middle of 1896 was 4,211,955. In 1891 the number was 4,211,743. The total number of marriages was 79,738, and births 135,796. Of this number 69,536 were males, and 66,260 females. The deaths were 81,979, and of this number 42,214 were males and 39,765 females.

Viscount Nomura, Minister of Communications, has notified that vessels may be inspected at the following offices:—Tokyo Shipping Inspection Office, for Tokyo, Shinagawa, Yokohama, Kanagawa, Yokosuka, Niigata, and Matsugasaki; Osaka Shipping Inspection Office, for Osaka, Kobe, Hyogo, and Sakai; Nagasaki Shipping Office, for Nagasaki, Moji, and Tokitsu; and Hakodate Shipping Office, for Hakodate. The inspection of Japanese junks will be undertaken at times specified below:—Junks of 1,000 *koku* burden, from July 1st to Sept. 30th; junks above 700 *koku* burden and below 1,000 *koku*, from July 1st to Dec. 31st; junks above 500 *koku* and below 700 *koku*, from July 1st to March 30th. It is said that steps are being taken by the Government to establish Shipping Inspection Offices at Yokosuka, Kobe, and Moji, besides the four places mentioned above. The scheme will be carried into effect in July of this year.

Judgment in the Iron Pipe Scandal case was given at the Tokyo Chihō Saibansho on the 18th inst. Mr. Hamano, Manager of the Nippon Jutetsu Kabushikikaisha (Japan Iron Company); Mr. Okochi, Director; Messrs. Okoshi and Nambu, sub-Directors, were sentenced to four years' major confinement and a fine of yen 40, with police supervision for one year and six months; Mr. Noro, chief expert, and Mr. Okuyama, assistant expert, to three years and six months' major confinement and a fine of yen 35, with police supervision for one year; Mr. Horikane, assistant expert, to three years' major confinement and a fine of yen 30, with police supervision for ten months. Two other assistant experts and three workmen were sentenced respectively to two years and four months' major confinement and a fine of yen 20, with police supervision for nine months, and seven months' major confinement, a fine of yen 10, and public supervision for six months.

CORRESPONDENCE.

THE FRENCH FANCY DRESS BALL.

TO THE EDITOR OF THE *Japan Mail*.

SIR,—I have read your account of the fancy dress ball at the French Legation last Friday. It would have been too much to expect that you should put the editorial wits to some rough usage in the interest of our costumes and of our sisters at home, who, next to talking of furbelows and chiffons, love to read of them. Yet I deem it a sign of the degeneracy of the times that you men have so little knowledge of the art of dressing, and above all, that you have come to pride yourselves upon your ignorance. You like us to be smart and *chic*, and you are prompt enough to signify your royal disapproval if our frocks fit badly or do violence to fashion, but nine out of every ten among you don't carry away from a ball room more than the foggiest notion of the costumes you have seen, and as to sitting down to describe them in print, why I think, Mr. Editor, you would rather be fined half a dozen pairs of 16-button gloves than make the attempt. And you ought to be fined. Just think what anxious planning and crafty contriving prefaced the display that you dismissed with half a dozen lines, and think, too, whether no duty devolved on you to throw light upon the meaning of costumes which, as mere assemblages of laces, gauzes, silks and ribbons, lacked half of their real value. Now confess frankly: you'd have described the affair in detail had you known how, but you didn't know. Like all your fellow-men, with a few honorable exceptions, your faculty of observing frocks and coiffures has been impaired by disease. And yet I think you have seldom seen a prettier spectacle than the ball room presented at the French Legation, when, under the brilliant electric lights and to the strains of soft music, there flitted about, through the mazes of the dance—I'm afraid that's a little hackneyed but 'twas an atmosphere of sweet old fashions and I would not be out of harmony with it—there flitted about dainty figures from Dresden vases, Alsatian and Valentin beauties, lovely reflections from Watteau's canvases, piquant belles of Directoire days, vivandieres, fairies, Kate-Greenaway tots, stately Sapphos, saucy sailor lasses, brilliant Japanese princesses and many an other graceful creation such as is seldom seen in Tokyo. A very imperfect summary, you will probably say, Sir, since I haven't spoken of the red-coated heroes of the chase, the eighteenth-century noblemen in all their bravery of silken hose, diamond buckles and ample ruffles, the gorgeous hidalgos, the gallants in satin, spangles and powder, the lilliputian Chinamen and the Grenadiers of the Guard. But I don't intend to speak of them. You can describe yourselves. Besides, I couldn't do justice to some of your costumes. A weak woman can only wonder at the splendid courage of men that come to a ball tricked out as if they were going to cut purses on a highway or carry baggage on a wharf, or as if they'd been sleeping on one cheek in a coal-hole and only woke up just in time to catch the coiffon. So I shan't meddle with your male masquerading—not but what many of you looked very nice and would be horribly conceited if I told you truly what we thought of you—but because you imagine that we don't understand your make-shifts as clearly as we appreciate your successes, and 'tis better that you should remain in the bliss of your ignorance than be instructed to your sorrow. So I will just tell you a little about ourselves.

Let me begin with Miss Harmand. I heard some lynx-eyed person—I think 'twas yourself, Mr. Editor—say that she represented a bat. That just shows how imperfect your powers of observation are. She represented Night. Her black gauze dress, cut as only a Paris *modiste* can cut, was woven with gold to show the sheen of moonlight; her feet and ankles were strewn with stars; she wore a wide belt also spangled with stars; on her head was a crescent moon surmounted by a bat, and on her shoulders a pair of bat's wings, too realistic for anything.

I'm not going to say how any one looked. 'Tis for you men to do that. Besides, I haven't adjectives enough, and I don't believe the dictionary has either.

Madame Harmand wore a Parisian gown of Dresden-China silk, and had her hair *poudré*. Her ornaments were diamonds.

The Countess de Bondy was dressed as a Swedish peasant, her costume actually obtained from the locality where it is worn. The colour was dark blue with bright trimming and silver ornaments. She carried a wooden spoon in her hand, and her golden hair streamed down from beneath a picturesque cap.

The Countess Pimodan had a rainbow crape gown with iris flowers; a ceinture of pale green *moiré* and an iris coiffure.

The Viscountess du Dresnay wore a fancy costume, *à la Watteau*, of pale green silk, flowered brocade and point lace, looped up with pink and having garlands of roses round the skirt. She had a pale green hat strewn with jewels.

Madame Revon was a study in eglantine. She had a white crape dress entwined with sweet briar, and her long black hair floated down from an eglantine tiara.

The Marchioness Nembrini appeared as a magicienne—a blue silk robe, covered with golden stars and other emblems of her profession, and an astrological hat.

Madame de Speyer wore a Sardinian costume—genuine Sardinian—of yellow silk trimmed with white-and-red striped ribbon, and head gear in character.

Madame de Somow's costume was Roumanian—red, white and blue with glittering sequin ornaments.

Madame Inigo personified a Valentinian peasant girl. Her gown was of pale yellow silk, delicately striped, with *fichure* of crêpe-de-Chine; her hair, plaited elaborately, was deftly disposed round a number of golden pins.

Madame Carcer wore an Empire dress of yellow silk with yellow feathers—a study in yellow.

Madame Wilde had a golden bronze gown, striped and flowered, with decoration of roses, and a fancy coiffure.

Madame Bougouin wore a Vivandière costume of blue and red, with gold buttons and white waistcoat.

Mrs. Brinkley represented a Japanese *Ohimesama*, with robes of glowing silk, embroidered in red, white, gold and green, and an elaborate coiffure of white-and-silver cherry bloom.

Mrs. Conder was dressed as a Kyoto *ningyo* (supposed to have been sculptured by her husband, who appeared as the celebrated carver Hidari Jingoro); robe of wistaria-purple *shions*, profusely embroidered with maple leaves and sprays, and *poupée* coiffure.

Madame de Bérigny wore a fairy costume in white and silver, with silver wings and flowing golden hair.

Mrs. Tilden was dressed as a sailor girl in a bewitching costume of white and blue.

Mrs. Nishikawa wore a fancy dress, picked out with red roses; her hair *poudré*.

Madame Sato was dressed as a butterfly; white silk gown, covered with butterflies in various colours.

Miss Pourtales wore a Louis-Quinze costume, *à la Watteau*, of white silk gauze over pink silk brocade, with powder and patches *à la mode*.

Miss Münster appeared as a Valkyrie. She wore a cuirass of fish-scale silver armour, with helmet, shield, spear and linked armlets of the same metal, the helmet surmounted with white swan-wings; a skirt of pale blue embroidered with silver, and golden tresses unbound.

Miss Dun appeared in an Alsatian costume: a red skirt, black velvet bodice and white muslin apron. Her hair was plaited down her back, and her coiffure was a simple black bow.

The Misses Eldridge wore carefully studied fancy costumes in black and white of the Directoire era, with powder and patches. They had richly feathered hats, and carried shepherdess sticks.

Miss Divers was a harpless Sappho; her robe

of white draped silk with gold trimmings, and three gold bands for coiffure.

Miss Nishikawa personified Japan. She wore a white and red robe with decoration of chrysanthemum and cherry blossoms, a rising sun on her head and a flag draped on her back.

Miss M. Nishikawa wore a pale blue fancy dress with bright red pompons.

Miss Terry appeared as the ace of clubs, the idea carried out in all the details of her costume, from tiara to fan.

Miss Matsuno wore a Polchinelle costume of white with red pompons and white conical hat.

Miss von Fallot represented a lady of modern Greece: a caftan of dark green trimmed with sable; gauze veil spangled with sequins.

Miss F. von Fallot wore the costume of a Brittany fisher-girl, with bright red skirt looped up over white and blue underskirt; frilled coiffure and white cap.

Miss Lay appeared as a Kate-Greenaway lassie, a study in pale green and pink with wide-brimmed hat.

Miss Hayes wore a court dress of old Japan, rich, glowing silk and harmonious colours.

Miss Mair wore a Spanish costume, a picturesque study in black and red.

I hope that none of your stern readers will be so irreverent as to skip these notes. I have made them brief because my object is to supply the central idea and leave fond memory to fill in the details. To me the whole affair is a delightful reminiscence, and with your permission I should like to offer a suggestion. It is that each guest should have his or her photograph taken in costume, and that the whole be inserted in an album for presentation to our host and hostess as a memento of their charming hospitality.

Yours sincerely,

M. M.

FRENCH SHIPS AND GUNS.

TO THE EDITOR OF THE "JAPAN MAIL."

DEAR SIR,—I noticed in your issue of the 8th inst., two paragraphs on French ships and guns, which were reprints from home papers. They show how little one can trust assertions tainted by political polemics.

The *Jaureguiberry* and the *Bouvines*, which are given as uncompleted, are in active service, the former since the 16th of February of this year, the latter since January 1896. As to rapidity of construction, the French can build as quickly as others, when the necessary credits are allowed. The battleship *Gaulois*, of 11,200 tons displacement, was launched last year at Brest, nine months after keeling, that is seven months less than for the *Kaiser Frederick III*, which is given as an example.

In regard to the French 12" gun, which is cited in comparison with the new English 12" gun, the paragraph ignores the fact that the French gun is of the old system of ten years ago (*modèle 1887*). Besides, the most important information has been omitted, in the case of the English gun, viz. the velocity. Under these conditions, the comparison is without value.

Sincerely yours
Tokyo, 13th May.

A.B.

THE WELCOME SOCIETY OF JAPAN.

(Kihin-kai).

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I was much interested in your recent article on the above subject, and I wish the newly formed Society every success.

It has occurred to me that there is a useful subject that they might very well take in hand, and that is, the publication of an authoritative timetable of the Japanese Railways. You, Sir, know very well the difficulty that there is in obtaining any trustworthy information on this subject from the authorities of the various railways, even weeks after changes have been made in the working schedules of their respective lines, or after they are supposed to be definitely settled. One instance will be sufficient.

A fortnight ago, I wished to make a little trip in the neighbourhood of Oyama and Gotemba, and I got a Japanese friend to work out the times from a Japanese up-to-date time table. He informed me that the 6 a.m. train from Shimbashi stopped at Oyama and Gotemba, and also gave me the times for return trains. When I applied for a ticket, I was told that the train did not stop at either station, but that I could book to either Ko-

dzu or Yamakita, with which I had to be content. I received the same information both at Kodzu and at Yanakita, where I finally alighted. After this, of course I could not trust the information as to the return trains. A friend who travelled through by the same train informed me by post card that it actually stopped both at Oyama and Gotemba.

Six weeks hence, some hundreds of foreigners will be undertaking the vexatious and tedious trip from Yokohama or Tokyo to Kanizawa. Those who start by an early train will find, after cooling their heels for some hours at that inhospitable place, Takasaki, that they would have done just as well if they had left three hours later. On the return journey they will find that with nominally half or three-quarters of an hour to spare at Takasaki, they arrive there too late, or that there is no connection at all, and that they have to lie over there all night, and have to turn out at an unearthly hour next morning in order to reach Yokohama by mid-day.

Part of this inconvenience is no doubt due to railway mismanagement which is foreign to my present subject; but a considerable part is due to the impossibility of obtaining information sufficiently accurate to enable one to lay one's plan beforehand. As the *Kihon-kai* appears to be strongly and influentially supported, it may be expected that they will be able to obtain fairly reliable information tolerably up to date.

I would suggest that they issue to annual subscribers (of whom I shall be happy to be the first) a time table printed in English, of the size of an ordinary post card. That when any new line is opened, or any change is made in the working schedule of an existing line, the information be printed on a post card, and mailed to each subscriber. That when this additional information reaches a sufficient amount, which under existing circumstances will occur about twice a year, a fresh edition be posted to each subscriber. That copies of these time tables be supplied, for sale, to the principal booksellers and stationers, and to the staffs at the chief stations. That subscribers, on production of their stamped subscription copy, be entitled to purchase any numbers of additional copies at a certain fixed rate, and that the general public can purchase them at a rate, 25 or 50 per cent higher, in each case including loose up-to-date slips corresponding with the post cards above suggested.

Lastly, I would suggest that the *Kihon-kai* should arrange with the leading railway companies for advance information, and should protect their publications by copy-right.

As I am in full sympathy with the object which the Society has in view, I have great pleasure in once more wishing them every success, and in offering them the above suggestions for what they may be worth.

Yours truly, W. SILVER HALL.
94, Tsukiji, Tokyo, 17th May, 1897.

THE ARBITRATION TREATY.

TO THE EDITOR OF THE "JAPAN MAIL."

Dear Sir,—It seems, according to telegraphic information, that the Arbitration Treaty has been finally rejected by the American Senate. To those of us who have watched its course this is more of a disappointment than a surprise. In the form in which the Treaty left the hands of Lord Salisbury and Mr. Olney, it never seemed to have any prospect of ratification at the hands of the Senate. It requires a two-thirds vote to ratify, and though no vote was taken on the Treaty in its original form, there is good ground for the belief that less than half the Senate were in its favour. It is doubtful whether Lord Salisbury and Mr. Olney were themselves entirely satisfied with the Treaty, which may be said to have been more than anything else an expression of good will between the two great English-speaking peoples. It is the opinion of men whose good-will toward both countries cannot be doubted that the working of such a treaty might have readily been the cause of much disappointment and ill-will. Both countries are animated by the spirit of arbitration, and any question of dispute likely to arise between them can be settled by a special agreement to arbitrate that particular question. A general treaty can add little if the spirit is present, while it might have seemed to make some questions open to arbitration which are really not so. This latter is the real reason which has served to defeat the Treaty in the U.S. Senate. There can be no doubt that some questions of a national character might have arisen under this treaty as originally presented which the U.S. would never agree to arbitrate, and a refusal in the face of a general arbitration treaty might have put the U.S. in a bad light before the rest of the world. Questions that are open to de-

termination according to International Law would not cause any trouble, but International Law is a body of precedents and is in process of formation. Some questions the Americans—no point is made here as to whether they are right or wrong—will never consent to submit to arbitration, the Monroe Doctrine, for example, though as yet it finds no recognition in International Law. The question of the disposal or annexation of Cuba or Hawaii belong to the same class. Some leading American statesmen put the ownership and control of the Nicaragua Canal in the same class, though it would seem that so long as the Clayton-Bulwer Treaty remains in force this question at least would have to be arbitrated. The results flowing from this last mentioned treaty were not foreseen at the time it was made, and have worked distinctly against what the Americans consider their highest interests. The arbitration treaty was feared for this very reason. To use a slang expression; they feared it might be "loaded" "I No ill-will or "Anglophobia" was involved in the final vote—individual expressions to the contrary notwithstanding. For certain conspicuous "Jingo" were on the side of the Treaty unless all forecasts were wrong, while men who have never shown any such tendencies were against the Treaty. This too, even after it had been amended so as to remove all foreseen dangers. It would be equally a mistake to consider the rejection of the Treaty as a slap at the principle of arbitration, for the U.S. may truly lay claim to be the most universal user of this method of settling international disputes. Some will think that it would have been better had the Treaty never been made if it was only to be rejected. With this idea I cannot at all agree. The spirit of the two peoples has been fully displayed in a way not possible otherwise, and the moral obligation to arbitrate all questions that it is possible to arbitrate has been established. I don't know how the Treaty might have worked, but I feel safe in saying that about all the advantages have been gained that could have followed its actual ratification, while the possibilities of the failure of the treaty have been avoided.

Yours, etc.

J. W. D.

JAPAN BREWERY COMPANY, LIMITED.

The Eleventh Ordinary General Meeting of the Japan Brewery Company, Limited, was held at the Company's offices, No. 123, Bluff, on the afternoon of the 17th instant. Mr. H. Baehr was in the chair, and there were also present Messrs. W. Gordon, J. D. Hutchinson, W. R. Bennett (Directors), and Messrs. H. C. Litchfield, F. Cummins, C. W. Ure, Dr. Hatton, H. Heckert (Chief Brewer), and J. Stewart (Secretary).

The SECRETARY read the notice convening the meeting and the Chairman suggested that the minutes of the last meeting should be taken as read.

On the motion of Mr. Ure, seconded by Mr. Cummins this was carried.

The CHAIRMAN said—Before moving the adoption of the report and accounts now before you, I should like to say a few words. The Directors hope that the year's result will be considered as satisfactory by shareholders, as it is looked upon by the Board. The Company's business has again steadily and largely increased and this has caused a considerable enlargement of buildings. Large new stables for the increased number of horses, with rooms for waggons and for bettoes were completed on Lot 104 B, which property has in many ways proved to be a valuable acquisition, at the same time giving us very much needed room on the old premises. The Company has purchased Bluff Lot 122 B, with the dwelling and out-houses thereon, adjoining the Brewery premises. In view of the growing business, further extensions and improvements of the buildings, plant, etc., may soon be necessary, and the Directors have taken steps to be prepared for all emergencies. Nothing has been written off this time from plant and machinery, except the ordinary wear and tear; the Directors are averse to writing down these accounts any more for the present, because both plant and machinery are kept in perfect order and are, together with the landed property, worth more to-day than our figures show. Under such circumstances the Directors have not touched these accounts, but let them stand as they were. They have also left untouched the special reserve of \$12,475.76 which is held for adjustment of exchange and which may perhaps be dealt with during the year now commenced, after the effects of the new gold standard law will be perceptible. The charges and general current expenses are higher again, than in the previous year, but the increase

was caused by the larger business done. With regard to the distribution of balance of profit and loss account, amounting to \$86,342.99, the Directors propose to pay a final bonus to the staff of the Company on the same principle as last year, amounting to \$4,041.00, to pay a final dividend of \$22,500, equal to 15 per cent, bringing the total for the year up to 25 per cent., to add \$50,000 to Reserve Fund, which will then stand at \$75,000, and to carry forward the balance of \$9,801.99 to next year's account. As to the bonus, a portion of it is payable under contract in lieu of salary. I am glad to say, that our Chief Brewer, Mr. Heckert, returned from his vacation towards the end of last year, and resumed full charge of his duties again. During his absence his post was temporarily and ably filled by Mr. von Mann, our Assistant Brewer. The Directors have also great pleasure in bearing testimony to the zeal with which the staff of the Company has been working during the year under review, when the increased business often taxed their powers to the fullest extent. Of the Directors, Mr. Shibusawa has resigned his seat on the Board, and owing to his departure for Europe, we have also lost the services of Mr. J. Dudds; for many years Chairman, and the Directors have in the meantime invited Mr. W. R. Bennett to a seat on the board, which has been accepted by that gentleman. The increase of business will necessitate the election of a second Auditor and a proposal to this effect will be brought forward. This closes my remarks, and I have only to add, that I shall be glad to answer any questions, with any information within my reach, which shareholders may desire to obtain.

Mr. Ure asked whether the insurance on the buildings of the company covered the re-instatement as existing now.

The CHAIRMAN—It is insured on the principle that we are over-insured about 13 per cent., that is, insured about 13 per cent. above the cost, taking to-day's value. I could not give you the exact figures, but that is the principle. We take the cost of buildings and plant—what it would take to replace it to-day.

The CHAIRMAN then proposed that the report and accounts as presented be adopted.

Dr. HATTON seconded the motion, and it was carried unanimously.

The CHAIRMAN said the next business was the election of two Directors to fill the places of Messrs. Gordon and Hutchinson, who retired by rotation.

Mr. CUMMINS proposed that the two retiring Directors be re-elected.

Mr. Ure seconded and the motion was carried unanimously.

The CHAIRMAN said it had been found advisable to appoint an additional auditor, and he proposed the reelection of Mr. Schwabe, and the election Mr. Guinness as the additional auditor.

Mr. CUMMINS seconded the motion and it was carried *nem con*.

A vote of thanks to the CHAIRMAN brought the proceedings to a close.

FORMOSA.

THE ATTACK AT IWATUTIA.

(FROM OUR CORRESPONDENT.)

May 9th.

On May 8th, the Chinese remaining in Formosa and living outside the treaty ports became subjects of Japan. It was thought that the day might be taken as an occasion for a rebellion, as the north has been infested for a considerable period with a troublesome class of natives—half rebels and half brigands. Their exploits during the last few months have been limited nearly exclusively to armed robbery. Rumours have been rife, however, for some time that a large party of rebels were making preparations to attack the Capital and Twatutia, with the intention of destroying the Foreign Consulates and business houses at the latter place, believing that such an act would embroil Japan with Foreign Countries and eventually result in the evacuation of the island. Whether the rebels ever really had such designs is unknown, although it is true that small armed parties came near the city on several occasions. But their acts were those of pure brigandage and nothing more—rich Chinese to be held for ransom and loot seeming to be their only objects. On the 7th, the military department at Taipei received information from loyal Chinese that, on the early morning of May 8th, Taipei and Twatutia would be attacked by about seven hundred outside rebels, assisted by certain Taipeifu and Twatutia Chinese; that the party would be divided into three bands, and that after the loyal residents at Choho, Shakko, and other neighbouring villages had been dealt with, those in sym-

pathy with the rebels would join in an attack on Taipei and Twa-tutia, under the leadership of the most famous chief in the north, Sen-sin, a character well known to the Japanese. The Japanese Authorities had confidence in the report and accordingly prepared a fitting reception. Troops were stationed on the principal roads approaching the Settlement, including a large force at Shakkō, a village to the east of Taipei. It was thought that this would be sufficient to guard against any rebels entering the city or surrounding suburbs, and consequently that the attack would not occur. The Chinese, however, occasionally rise above their average level and exhibit accessions of cuteness and ability quite surprising even to old hands. It was so in this case. A Chinese theatre near a large joss-house had been giving performances for some days, and, on the night of May 7th, an unusually large crowd attended. It is now pretty certain that this audience was largely composed of rebels. After the performance, these persons hid in the neighbourhood, no doubt receiving shelter from the bad characters of Twa-tutia, for the Settlement has its share. Some Japanese buildings in the vicinity could have been attacked without much difficulty, but the rebels, or more properly brigands, avoided them, confining their attentions exclusively to breaking into the houses occupied by rich Chinese merchants, one after another, along the principal street, about three blocks distant from the nearest Foreign hong. Some fifteen or twenty houses were thus broken into and many valuable goods and money were secured. Rich silks, opium money, etc., fell into their hands to the estimated value of fifty thousand dollars. An attempt was then made to fire the town; but after destroying three houses the flames were got under control. The Japanese forces, quite unprepared for this antic, were still outside the Settlement to prevent the enemy's entrance.

Meanwhile the rebels to the east of the Settlement, after standing up to heavy fire for two hours, and the Twa-tutia rebels, now surrounded by the Japanese, who were closing in about them, began to retreat. Several hundred went to the mountains, one hundred passed over the railway bridge which leads from the Settlement; and no doubt a large number returned to their mud huts in or near the Settlement to once more become smiling "My b'long good man" subjects of Japan. A Japanese coolie of the old school attempted to win glory and renown by cutting off the head of a Chinese rebel who had been previously shot by the soldiers, and carrying it through the streets with a swagger that would have done credit to a conqueror of the world. He marched along with the gory head in one hand and a large sword in the other to the police station. His reception must have been a surprise to him, for he was taken into custody at once and will be punished in accordance with the law which provides against mutilation of the dead.

The firing was very heavy for more than two hours; a considerable portion at close range. The number killed and wounded was, however, very slight, principally owing to the poor marksmanship of the rebels, and the fact that a large part of the fighting took place before daylight. The exact rebel loss has not yet been ascertained, but bodies were left on the field to the number of nearly one hundred, and 19 prisoners were taken. The Japanese loss was 3 killed and 7 wounded, of whom two will probably die. Some of the rebels were dressed in Chinese garments, all white, others in garments all black; while one band wore uniform jackets bearing the round badge peculiar to Chinese uniform, upon which were the Chinese characters "Fochow army." Some 160 rifles were captured, nearly all German Mausers. Much of the stolen property has been recovered. The most important gain to the Japanese was the capture of the well-known rebel chief, Sen-sin (Tsu-sin), who had succeeded in evading capture ever since the arrival of the Japanese. Sen-sin, during the Chinese occupation, was one of the highest military officers in the army. Since the Japanese occupation he has received constant aid from Fochow. No doubt, if the truth were known, it would be found that some of the high officials of China have been supporting the rebellions which have disturbed the north on several occasions. Yesterday morning, during the fighting, the Chief was fatally wounded and fell into the hands of the Japanese, together with 22 other rebels who were guarding him. During the January rebellion of last year Sen-sin made an attack on a loyal Chinese household of twenty-two persons, killing all but the master, who succeeded in escaping to Twa-tutia. This man remained in Twa-tutia, and yesterday was called to the police station to view the body of Sen-sin, who was then dead. He immediately recognized him as the rebel leader and the murderer of his family, and was so enraged at the sight that the gendarmes were forced to restrain him from attack-

ing the lifeless body. The dead chief was dressed in rich silk garments, and from a number of papers found in his possession he appeared to have been of a literary turn of mind. Last night and to-day all has been quiet, and it is hoped that the lesson given the rebels yesterday will be sufficient to discourage them from returning again.

AMERICAN CHARITIES.

On a Pacific ocean steamer I once met a much-travelled gentleman who talked intelligently on many subjects. Discussing the missionary question one day, he said that he would not be so much opposed to the American people sending men and money to Christianize Asia if they would only do some missionary work in our own cities. He had lived in Baltimore, Philadelphia, and New York, but could not remember having ever seen a missionary in one of those cities, but over here in Asia he found them everywhere.

I looked at my friend a moment to see if I could take him seriously, and then had to laugh at the situation. I had taken him to be a gentleman of good judgment and close observation and was much surprised to see him betray such childish ignorance. He seemed not to have thought that he could meet a hundred missionaries in the American cities every day and not know what their business was. And he was much surprised when I told him that a careful investigation would show that in the three cities he mentioned there were more men and women engaged in real missionary work than in all China and Japan; and many times the amount of money was spent in that work. But it is possible for the human mind to get so steeped in prejudice that it refuses to be governed by facts. It prefers to revel in pet theories regardless of truth or veracity. I clip the following from a Chicago paper, showing that even in that great wicked city they do righteousness as well as preach it:—"During the last week of January, food supplies were distributed to 15,403 families, and coal to 9,519. The first week in February, food was furnished to 11,662 families, and coal to about 6,000."

The Chicago Tribune estimates that the American people gave last year in charitable purposes the enormous sum of \$33,670,000. This is only special donations and does not include the regular amounts raised for church and educational work. Yet that is nothing more than they ought to do, although such a sum of free-will offerings would have staggered the mind of any other age. The American people hold property valued at sixty-five billions of dollars—\$65,000,000,000—a sum so vast that the human mind cannot grasp it. And yet not long since an editor of an English newspaper at Nagasaki was protesting against the great sum of \$20,000 being spent by American missionaries in Korea for educating and uplifting the 12,000,000 ignorant and degraded people of that kingdom. He called it a waste of money and thought it a pity that the American people could not find a more important method of spending their money. One church in New York spends annually \$38,000 on night schools, charity hospital work, and such like, and there are hundreds of churches that could pay the whole \$20,000 spent in Korea and not be deprived of a single luxury.

The life of such a man as T. H. Yun (Yun Tchi Ho) in the King's Cabinet of Korea, is worth all the missionary money ever spent in that country. For more than ten years he was an exile from his native land. He is an exceptionally fluent English speaker and writer, is at home in Japanese, Chinese and French, and is a sincere believer in the Christian religion. A writer in an American paper has this to say about him:—"Recalled to his native land by order of the King, he has been rapidly advanced until now a member of the Cabinet, he fills the post of Minister of Education. A local preacher in a Methodist Church, this man of providence fearlessly exhorts in street or chapel by night and holds audience with high officials by day on the great questions of State. A Daniel in an Oriental court, we trust he will be kept and used to the leavening of the life of ten millions of Koreans."

WILL PATILLO.

May 8th, 1897.

A DIAMOND JUBILEE RETROSPECT.

One of the pleasantest articles in the Reviews for April is by Sir Algernon West. It appears in the *Nineteenth Century*, and is entitled "Social Changes during the Queen's Reign." Sir Algernon writes as "one who saw the coronation procession from Lord Carrington's house in Whitehall," and "who, when six years old, ran a

race with the great Duke of Wellington from Walmer Church to the Castle." He is well qualified, therefore, so far as age is a qualification, for his task, but he displays no senile garrulity, and is not a "laudator temporis acti." On the contrary, he shows pretty clearly that he is in full sympathy with the present, if he cannot altogether suppress an occasional regret for the past.

CHANGES IN DRESS.

The well-dressed gentleman of 1837 was a different personage from his successor in 1897. He wore "a pair of dove-coloured trousers, with two fluted stripes down the sides, and buttoned under the foot with broad straps of the same material; the boots, of course, were Wellingtons, which were "sine qua non" with a man of fashion in those days; a coat so high in the collar that the back of the head rested upon it. The scarf, never folded less than twice round the neck, like a waterfall, bugled out from a double-breasted waistcoat, cut very low, and was ornamented with two pins joined with a gold chain." For evening the dress was a blue coat with tight sleeves and brass buttons, and a waistcoat of flowered or brocaded silk. No man in pre-Crimean days—we rather fancy Sir Algernon West should have said pre-Exhibition days—ever wore a beard or moustache, unless he was a cavalry officer. The Peers used to drive down to the house of Lords in full dress, with their orders and ribbons, and bishops wore episcopal wigs; Bishop Blomfield, who died in 1852, was the last to do so. Sir Algernon reminds us that orders, decorations, and medals were very few; Queen Victoria has, during her reign, enlarged or instituted fourteen Orders.

"The late Lord Clanwilliam was one day struck by seeing a civilian decorated with a ribbon and star, and asked who he was. No one could tell him, until at last he ascertained that the wearer was our ambassador at Paris. 'Then,' said Lord Clanwilliam, 'if all a man gains in diplomacy is that nobody should know him on his return, I shall resign my diplomatic career'—and he did."

DANDIES AND MASHERS.

Dandyism was at its zenith at the beginning of the reign. Grantley Berkeley in the fifties delighted in wearing two or three different coloured satin waistcoats and three or four gaudy silk neckcloths round his throat. And as late as 1842, Lord Malmesbury tells us, Mr. Everett wore a green coat at a dinner party at Lord Stanley's. "At this time," says Sir Algernon, "Lord Cantelupe, Count D'Orsay, Lord Adolphus Fitzclarence, and Sir George Wombwell were essentially dandies and arbiters of dress and fashion; Charles Grey and Frederick Byng, who was always called the 'Poodle,' were the mirrors and the terror of the young men and the fashionable clubs. Now the reign of the dandies has succumbed to the aggressive inroads of swells and mashers. But, ah! those dear dandies of my boyhood, with their triple waistcoats, their many-folded neckcloths, and their wristbands turned back over their coat sleeves—all have departed; the most beautiful, genial, and witty of them all, Alfred Montgomery, who was in the Queen's household at the time of her accession, passed away only the other day.

AMUSEMENTS.

The theatre has undergone many changes since 1837. The Italian Opera House, which at the Queen's accession was called Her Majesty's, was in its glory.

The pit, which occupied the floor of the house, gave access to the boxes, and was appropriately called "the Pops' Alley." Here Rubini, Mario and Grisi, Lablache, and later on Cruvelli, Sontag, Albani, and Jenny Lind, delighted audiences as fashionable as those which now again fill the grand tier of Covent Garden; and the ballet with Cerrito, Taglioni, Fanny Elssler, and Rosati, adorned an art which, alas! has now degenerated into a taste for vulgar breakdows and tarax-boom-de-ayes. The theatres were at this time few and the prices low; impecunious young men of fashion in my early days used to take advantage of half price and the dress circle, for stalls had not then destroyed the pit, to hear the Keans, the Keeleys, and Buckstone, while Rachel and Ristori satisfied the lovers of tragedy. Vauxhall, with its thousands of little oil lamps, was at its zenith, to be succeeded by Cremorne, and then by various reputable and dull entertainments at South Kensington. At this time there was no public place or club where a lady could dine, and I recollect a most respectable peer of the realm, who on expressing a wish to dine in the coffee-room of the hotel in which he was staying with his wife, was told by his landlord that he must get a third person to join their party.

High play is much less common than it was. Mr. Banderet, the old proprietor of Brooks's Club, recollected when the packs of cards used there were reckoned by scores a night. "Now cards are not called for at all, except sometimes on the

occasion of a rubber at the meetings of the Fox Club, which are held there. In the early forties, long whist with ten points to a game was still played; and now I am told that even short whist is being supplanted at the Portland and Turf Clubs by Bridge whist, écarté, and bézique."

DINING IN THE FORTIES.

Great changes in dinners, says Sir Algernon West, occurred during the forties. Formerly, a large turbot with red festoons of lobster was an inevitable dish at a London dinner party; a saddle of mutton at the head of the table, carved by the host; and a couple of chickens with white sauce and tongue in the middle, was a necessity, and led to various conventional compliments as to whether the hostess or her neighbours should carve them.

"Sir David Dundas used to tell of a chicken being launched on his lap, and the lady with a sweet smile saying:—'Would you kindly give me back that chicken?' With six side dishes and two bottles of champagne in silver coolers the table was complete. The champagne was only handed round after the second course, and was drunk in homœopathic doses out of small tubes of glass which contained little but froth. Lord Alvanley was the first who had courage to protest, saying, 'You might as well expect us to drink our wine out of thermometers.'"

The writer goes on to tell of the difficulties of smokers sixty years ago. They were sent across a sloppy yard to smoke in the harness-room, or possibly allowed to use the servants' hall. "No gentleman ever smoked in the streets till after the Crimean peace; and ladies never sullied their lips with tobacco, or even allowed men to smoke in their presence." Whether, on the whole, society is better or worse than it was two generations back is a moot point. Mr. Charles Villiers, who is no mean authority, is quoted by Sir Algernon West as having answered the question a little dubiously: "He supposed human nature was human nature at all times, but one difference was manifest. In his golden days every young man, even if he was busy, pretended to be idle; now every young man, if he was idle, pretended to be busy; and that meant a good deal."

LATEST TELEGRAPHIC NEWS.

(SPECIAL GOVERNMENT DISPATCHES.)

HOSTILITIES SUSPENDED.

London, May 19.

Pressed by the Great Powers, especially by the Emperor of Russia, the Sultan has at length given orders for the suspension of hostilities. His armies, however, have gained in the meantime further victories. The Powers appear unanimously agreed in considering the Turkish terms of peace preposterous.

DISTURBANCES IN BRAZIL.

Washington, May 19.

Disturbances—though not serious—have broken out in Bahia, Brazil, and the Government is making endeavours to subdue them.

(FROM THE "JAPAN TIMES.")

A LOAN FOR INDIA.

London, May 16.

The Secretary of State for India has given notice that he will be open to receive tenders on the 21st day of May for a loan of £3,500,000, bearing interest at 2½ per cent., the minimum rate at which the same will be issued being 95.

FRENCH FOREIGN POLITICS.

The French Press are discussing the Kaiser William's recent ostentatious advances to France, which they regard with mistrust. The majority of the papers prefer a *rapprochement* with Great Britain.

TURKISH MILITARY MOVEMENTS.

It is reported that a Turkish movement, having for its purpose the surrounding of the Greek Army, is actually proceeding; hence the delay in reference to the armistice applied for by the Ambassadors of the allied Powers on behalf of Greece.

TURKEY'S MILITARY VITALITY.

It is understood that the Powers, es-

pecially Russia, have no desire in any way to promote the aggrandisement of Turkey, whose martial vitality has been an unpleasant surprise.

A GREEK GAIN.

The Greeks have re-entered Epirus and re-occupied Philippiada.

THE POWERS AND ARMISTICE.

The Ambassadors of the allied Powers are still urging the Porte to suspend hostilities.

TURKISH DEMANDS AND THE POWERS.

London, May 17.

In reply to the repeated requests of the Powers, the Porte has given an answer, refusing to grant an armistice unless an assurance is given that its demands will be granted. They are that Thessaly be annexed to Turkey, and an indemnity of ten million pounds be paid by Greece. Unless these conditions are accepted, the Porte declares that orders will be given to the Turkish forces to advance.

The Ambassadors of the Allied Powers are trying to induce the Sultan to modify his conditions.

The Powers, including Germany, are determined not to agree to the annexation of Thessaly, by which the whole of the Balkans would be set ablaze.

DESPERATE FIGHTING.

Desperate fighting has taken place at Griboro, situated between Arta and Philippiada, the result being that the Greeks have been compelled to fall back on Arta, with a total loss of 558, including 38 officers.

The Turks are advancing on Domokos.

PROSPECTS OF THE U.S. TARIFF.

London, May 17.

The election of a Democratic Senator for Florida places the Republican Party in a minority of one, which will have an important effect on the Tariff prospects.

WAR NEWS.

The Greek troops in Epirus fought splendidly. The fighting was kept up almost without interruption for forty hours, but after storming several positions, the Greeks were obliged to retire, owing to exhaustion and want of provisions.

GERMANY AND THE POWERS.

It is understood that Germany has been throughout pursuing towards Greece a separate policy from the other Powers.

THE PORTE & GREEK FINANCES.

The Sultan's Ministers are now advising him to insist upon European control of the Greek finances.

THE GREEKS BEATEN BACK.

London, May 19.

After one day's fighting, the Greeks abandoned Domokos and retreated to the Othrys mountains.

THE POWERS AND THE PORTE.

The Ambassadors of the Powers at Constantinople drafted a Note on Sunday, which virtually ignored the demands made by the Porte for an indemnity of 10 million pounds and the annexation of Thessaly, but which repeated the request for an Armistice, adding that they cannot see Greece crushed. The German Minister, however, refused to sign this, whereupon fresh parleying took place.

The Sultan has ordered Edhem Pasha to suspend hostilities for the present.

THE BRITISH CAPE SQUADRON.

The British Cape Squadron, under Rear-

Admiral Rawson, has left Delagoa Bay after a stay of one month.

THE CZAR AND THE ARMISTICE.

London, May 20.

The present suspension of hostilities between the Greeks and Turks is due to a direct appeal made to the Sultan by the Czar of Russia.

THE SITUATION AT CONSTANTINOPLE.

The Ambassadors of the allied Powers are still conferring on the subject of a reply to be presented to the Porte in answer to its Note respecting the indemnity and the annexation of territory.

GERMANY AND THE POWERS.

It is now stated that Germany is willing to join the other Powers with a view to the termination of the War.

LORD SALISBURY ON THE SITUATION.

In a speech, Lord Salisbury stated that though an armistice is granted, it will not diminish to any extent the difficulties as to the solution of the problem.

THE NEWMARKET STAKES.

The Newmarket Stakes were run yesterday with results as follow:—

Mr. J. Gubbins' Galteemore	1
Mr. P. Lorillard's Berzak	2
Mr. S. D. Rose's Frisson	3

(FROM JAPANESE PAPERS.)

COUNT KURODA AT KYOTO.

Kyoto, May 21.

Count Kuroda, Premier *ad interim*, arrived here from Tokyo to-day and at once proceeded to the Palace.

THE NEW MINISTER TO CHINA.

Kobe, May 21.

Mr. Yano, Minister to China, left here by the *Kobe Maru* to take up his new post.

THE NAGOYA CHAMBER OF COMMERCE AND THE U.S. TARIFF.

Nagoya, May 20.

The Nagoya Chamber of Commerce held a general meeting yesterday and decided to present a petition to the Authorities urging that in case the new Tariff Law in the United States comes into operation, Japan should adopt a similar course with the United States.

KOBE TEA SALES.

Kobe, May 21.

12,100 cattiees of new tea changed hands yesterday. The price ranged from *yen* 46 to *yen* 27.

DOCKYARD OFFICIALS TO PROCEED TO EUROPE.

Yokosuka, May 21.

Three chiefs of sections of the Shipbuilding Yard, Yokosuka, have been ordered to proceed to England to study shipbuilding.

The Japanese men-of-war *Yoshino* and *Isumi* went into dock to-day.

THE JAPANESE SQUADRON FÊTED.

Kagoshima, May 21.

The Kagoshima Military Society gave an entertainment to welcome the Japanese men-of-war *Matsushima*, *Chinyuen*, *Fuso* and *Takao* yesterday which Vice-Admiral Aikura, Commandant of the Standing Squadron, and many other officers attended.

THE RELIEFS FOR WEI-HAI-WEI.

Bakan, May 21.

The steamers *Toyohashi Maru* and *Asagao Maru*, conveying reliefs of over 800 soldiers of the Third Army Division, called in here to-day en route to Wei-hai-wei.

RUSSIAN TROOPS FOR VLADIVOSTOCK.

Nagasaki, May 21.

A Russian Volunteer Fleet steamer conveying 959 soldiers from Odessa called in at this port to-day en route for Vladivostock.

FOUNDERING OF A STEAMER.

Ujina, May 21.

The steamer *Rikumo Maru* sunk off Mitajiri yesterday.

CHESS.

All Communications to be addressed to the Chess Editor.

The Yokohama Chess Club is closed for the season: and reopens on Monday 4th October.
The Tokyo Chess Club meets at the Tokyo Hotel, every Friday, from 1 p.m. to 7 p.m.

| | 17 Q Kt4 |

White mates in five moves (a).

(a) White forces the mate very prettily by 1—Kt (a) to Kt5 ch., K to Kt sq. (b) of course if P takes Kt, Q to Kt7 forces mate in two; 2—Kt takes P ch., B takes Kt; 3—B takes B, and then follows in any case R to K5, &c.

NAGASAKI-KOBE GAMES.

The remaining game drags its slow length along and the Nagasaki cat is still playing with the Kobe mice. How long will they be able to evade him, we wonder?

| 22 P Kt3 | 23 Kt B7 |
| 23 P B4 | 24 P R8 Q (i) |
| | Resigns. |

NOTES.

(a) Superior to Kt to B3, as played by Kamen; in his match with Showalter.

(b) Brilliant play. Should Black capture the Q P, White would continue Kt to K4, forcing the exchange of rooks. White then would obtain the command of the open Q file and a powerful king side attack. The play seems sound, and Black did not care to accept the offered sacrifice of Q P.

(c) Had White played P takes P, Black would have answered P takes P. White then could not capture the Q P, for Kt to Kt5 would follow, threatening Q takes K P ch., as well as Q or Kt takes Kt. The move selected is probably the best, for it cuts off the open diagonal for Black's bishop.

(d) P to Kt3 or Kt to K sq., perhaps, better. Black had to stop the threatening Q to B ch., followed by it takes R mate. He selected the Kt to R4 play, in view of a possible attack resulting from Kt to B3 continuation. Since White with P to Kt3 move, stops this play, Black's Kt will be poorly placed at R4.

(e) Strong play. Black, of course, gets the opportunity to save a bringing this Kt into play, but White is enabled to establish a powerful attack by continuing Kt to Kt4 and Kt to B6 ch., or Kt to R6 ch.

(f) Causes the loss of two pawns, as the progress of the game shows. Black, however, had no satisfactory defence. White threatened Kt to R6 ch., followed by Q to R8, winning at once.

(g) K to Q sq. was probably better, yet the game was beyond repair.

(h) Brilliant play, which wins at least the exchange. Should Black capture the bishop then B to R8 wins the black rook, the continuation selected by Black loses a piece.

(i) B takes B was hardly any better. White would have continued B to Q R8, winning the Q P.

(k) By capturing the pawn the black Kt will be too far away to stop the advances of White's R P. But Black's game was a hopeless one, anyhow.

(l) Causes Black to surrender. White, with queen ahead, wins easily.

| | 65 Q B5 ch. |
| | 66 K Q6 |
| | 67 K K7 |
| | Resigns. |

NOTES.

(a) As the regular defence often leads to complicated positions, Black no doubt feared a salted variation, which he evades by this novelty.

(b) He has no time for P to B4, as P to K6 is threatened.

(c) Quiet but effective. It consolidates White's defence, and compels that opening up of the K Kt file for the attack.

(d) A desperate remedy; but he saw no satisfactory way of protecting the K Kt P.

(e) R takes P appears safe enough. If 33.... P to K6; 34—B takes P, P takes Kt, ch.; 35—K to Q sq., and wins; or 33.... B takes Kt, ch.; 34—K takes P, P to K6 ch.; 35—K to B sq., P takes P, 36—R to Kt B, ch., and mates in three.

(f) If Q to B3, then R to K sq.; 37—P to Q5, B to R3, all which is now avoided.

Position after Black's 43rd move.

WHITE.

(g) There seems no objection to 44—Q to K3, B to Q3; 45—Q to Kt5, ch.; K to R3; 46—P to B6 and wins. If 44.... B to B3; 45—Q to Kt5, ch., and wins Q P, and at last the game.

MAIL STEAMERS.

THE NEXT MAIL IS DUE

From Canada, &c....	per C. F. R. Co.	Tuesday, May 25th.
From Hongkong.....	per C. F. R. Co.	Thursday, May 27th.

TEA.

Market closes quiet after a period of great activity. The threatened duty in the United States caused a "furry," and now that there seems a chance of said Tariff being defeated or modified in the Senate, there is a decided calm in the air. Settlements to date are 50,000 piculs and export about 2 million pounds.

THE GREATEST WONDERS OF MODERN TIME

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the druggist at Khartoum to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN.

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations. Mr. J. T. GOSSET, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining 'stock.'"

Sold by all Chemists and Medicine Vendors throughout the World.

May 1st, 1897.

MILKMAID BRAND CONDENSED MILK

The "Milkmaid" Brand is guaranteed to contain all the cream of the original milk. In the process of manufacture nothing but water is removed, nothing but the best refined sugar added.

Avoid low-priced brands from which the cream has been abstracted, and ask for the "Milkmaid" Brand, the best for all purposes.

June 14th, 1896.

DINNEFORD'S

The Universal Remedy for Acidity of the Stomach, Headache, Heartburn, Indigestion, Sour Eructations, Bilious Affections.

MAGNESIA

Sold Throughout the World.

N.B.—ASK FOR DINNEFORD'S MAGNESIA.

The Physician's Cure for Gout, Rheumatic Gout and Gravel; the safest and most gentle Medicine for Infants, Children, Delicate Females, and the Sickness of Pregnancy.

YOKOHAMA: SATURDAY, MAY 29TH, 1897.

SUMMARY OF NEWS.

THE plague appears to be spreading in Taiwan, Formosa.

THE Bank of Japan will shortly open branches at Nagasaki and Sendai.

OVER three thousand Chinese have left Formosa rather than become Japanese subjects.

THE Diamond Jubilee subscription in Hong-kong amounted on the 15th inst. to \$31,270.

THE Prince of Wales opened the Blackwall tunnel, under the Thames, on the 25th instant.

BARON IWASAKI gave a large garden party at his Komagome suburban residence, on the 22nd instant.

THE Japanese second class cruiser *Taka-sago* was launched in England on the 18th instant.

A VERY successful strawberry and floral fête was given by the King's Daughters in the Public

Hall, Yokohama on the 28th instant, in aid of the funds of the Ladies' International Reading Room.

AT the general elections in July next the number of members of the House of Peers will be increased by twenty.

AN explosion occurred on the 22nd instant in a gun powder factory at Itabashi. One workman was fatally and another slightly injured.

THE revised Treaty between Portugal and Japan was sanctioned by the Emperor on the 23rd inst. The exchange of the treaty will take place in Paris.

THE organization meeting of a proposed Women's University was held at Osaka on the 16th inst. Count Okuma, Foreign Minister, was among those present.

ON the 24th instant, a naval seaman belonging to the Yokosuka Admiralty station, was run over and killed by a train at a crossing on the Yokohama-Yokosuka line.

NEGOTIATIONS between the Japanese *Chargé d'Affaires* at Honolulu and the Hawaiian Government with regard to the emigration question were opened on the 13th instant.

OVER a million and half francs has been subscribed in Europe to a fund to carry out the object of the Charity Bazaar in Paris, recently so disastrously destroyed by fire.

DURING ten months from the 1st of July of last year up to the 30th of April, 22,372 bales of raw silk were exported from Yokohama to America, and 20,583 bales to Europe.

COUNT INOUE, while staying at the Shoten-en at Sakaha, on the Tokaido, was robbed of a gold watch worth over yen 3,000, and 400 yen in paper money, on the night of the 18th instant.

THE gross profits made by the Hokkaido Colliery and Railway Company from January to April last inclusive exceeded by 102,301 yen the amount for the corresponding period last year.

A VERY severe hail storm and squall visited Yokohama, Tokyo and other places on the evening of the 25th. Considerable damage was done by lightning in some districts and by hail in others.

THE Yokohama City Council will raise a loan of two million odd yen at 6 per cent. interest, repayable within thirty years, to defray the cost of the necessary extension of the Yokohama Water Works.

ON the 15th inst., in a thunder-storm at Toda gun, Miyagi Prefecture, a woman was struck by an electric flash and burnt to death. Another woman was also burnt by the lightning, but not fatally.

THE "Queen's Birthday Cup" presented to the Yokohama Yacht Club by Mr. Gerard Lowther, H.B.M.'s *Chargé d'Affaires*, was won in a sailing race held on the 24th instant by Mr. Laffu's yacht *Mary*.

COUNT MATSUKATA, Minister President, Count Kuroda, Premier *ad interim*, Count Okuma, Foreign Minister, Prince Konoye, President of the House of Peers, have all been summoned to Kyoto and had audiences with the Emperor during the past ten days. It is alleged by verna-

cular papers that these audiences presage some important changes in the Cabinet.

ACCORDING to a report of the Scholars' Assembly in the United States, there will be a solar eclipse on the 21st of January next, and the best place for observation will, it is said, be the southern portion of India.

MR. MAKINO, Vice-Minister of the Educational Department, has been appointed Minister to Italy, and Mr. Tsuzuki, President of the Imperial Library, has been transferred to the post of Vice-Minister of Education.

SIX sealers in a boat belonging to the American schooner *St. Lawrence*, lost their schooner off Keizan Cape and were drifting about when picked up by the steamer *Tomoemino Maru* and brought to Hakodate on the 20th inst.

THE M. M. steamer *Sydney*, which left Shanghai for Europe on the 22nd inst. had to return to that port owing to a breakdown of her machinery. Her passengers and mails were transferred to the *Yarra*, which left Shanghai on the 27th.

IN a cricket match played on Her Majesty's Birthday between the Yokohama Cricket and Athletic Club and the Navy, the latter won on the first innings by 44 runs. The opening match of the season was played by the Club on Saturday the 22nd.

THE 15th National, or Noble's Bank, one of the principal banks in the country, commenced business as a joint-stock company on the 20th instant, its old charter having expired on that date. It is said that the Bank has a capital of 18,000,000 yen and a reserve fund of 4,500,000 yen.

MR. G. Lowther, H.B.M.'s *Chargé d'Affaires*, gave a most enjoyable garden party at the Legation in Tokyo, on the 24th inst. to celebrate the Queen's Birthday. Admiral Sir Alexander Buller and his officers celebrated the same event, by an "at home" on board the flagship *Centurion* on the following day, the 25th.

THE apathy in imports still continues the most striking feature of the Yokohama market, though prospects are much brighter than they were a fortnight ago. Some five million dollars' worth of stuff is popularly supposed to be locked up in local foreign godowns awaiting purchasers, but the principal reason for this state of affairs is the resolute stand recently taken against "long credits." Import merchants find it pays in the long run to refuse to deal with men who want excessive accommodation or with those speculators who calmly ignore contracts should the market turn the least point against them. Trade, therefore, is in a healthier condition than it has been for a long time and godowns only open for safe business. There have been one or two sales of yarns, doubles, both plain and gassed; and some enquiries for shirtings. The metal market moves along gently without too much animation and quotations remain unchanged. Kerosene is still dull. Brown sugars have had a quiet week, but whites are steady and well-held. Not much is doing in raw silk. Crop news continues good all round, the Japanese out-turn being expected to be an increase on last year. The cheap lots of waste silk now on the market are reported to be of too poor a quality to tempt shippers. Not very much is being done in tea for the time of year, buyers evidently waiting for further news from consumers. Exchange continues weak.

SPiRiT OF THE VERNACULAR PRESS DURING THE WEEK.

The necessity of making such reforms and preparations as would justify her demand to be admitted to the comity of nations on equal terms has been an undisguised blessing to the Japanese nation; a spur without which its rate of progress would have been much slower. Treaty Revision having now been virtually accomplished, it might be supposed that the liberal impulse due to the hope of achieving it would lose much of its potency. But there remains the need of getting ready for mixed residence, and we find Japanese reformers making frank use of that pretext to plead for further improvements. The *Nichi Nichi Shimbun*, for example, contends that the present postal system will be found very imperfect when the country is completely thrown open to alien intercourse, and that steps should at once be taken to effect changes. Our contemporary's chief points of criticism are that the delivery of letters is uncertain and often very slow; that the privacy of correspondence is not amply safeguarded, and that the post office does not accept due responsibility for the safe transmission of registered letters or parcels. The fault lies with the Postal Regulations and they ought to be amended without delay. No concrete instances of abuses falling under the above categories are given: the *Nichi Nichi* confines itself to general allegations. Assuredly its comments are justified, but not the least interesting feature of them is the spirit they display. Evidently the Japanese do not yet believe that what is good enough for themselves should be good enough for their Occidental visitors also.

The increase of criminals during recent years in Japan, especially the increase in the number of second offenders, in attributed by the *Fiji Shimpō* primarily to defects in the prison system. No proper arrangements exist for separating convicts and suspects, or preventing free intercourse between confirmed criminals and first offenders. The inevitable consequence is that the jails serve as nurseries of law-breakers. Moreover, the prison buildings leave much to be desired, from a sanitary as well as an executive point of view. At the root of all the trouble is the fact that prison expenditures have to be borne by the localities instead of being a charge upon the Treasury. That is a method entirely opposed to the principle recognised and acted upon in the most enlightened countries of the Occident—France, for example, where, by legislation in 1855 and 1875, the cost of maintaining prisons was imposed upon the national funds; and England, where a similar course was pursued in 1865 and 1877. Japanese statesmen have not ignored the principle, but, in 1881, owing to the pressure of financial difficulties connected with preparations for the resumption of specie payments, they were unwillingly condemned to transfer prison expenditures to the charge of the various localities, and when, on the opening of the Diet, the Government introduced a Bill with the object of reverting to the more wholesome system of State payments, the measure was thrown out by a majority in the Lower House, politicians having set their minds so firmly upon effecting a reduction of the Land Tax that they could not be induced to endorse any measure which, by increasing the Treasury's outlays, impaired its ability to dispense with a part of its regular income. The error of attempting to reduce the Land Tax has now been recognised, however, and it is time that the outlay connected with the maintenance of prisons were defrayed from the proper source. Not only is the incidence of the burden most unequal under the present system, some prefectures having to devote 25 or 30 per cent. of their total expenditures to prison support, while others escape with five or ten per cent., but, what is much worse, the people of the provinces being persuaded that the responsibility must soon be transferred to the Treasury, can not be induced to vote money for the repairs or improvement of the jails, or to take any trouble about the selection and superintendence of jailors. The *Fiji* contends that the duty of jail superintendence ought not to be entrusted to the Home Office,

under any circumstances, but should devolve upon the Public Procurators, whose training and legal knowledge adapt them specially for such work.

Mr. Shimada Saburo himself contributes, over his own signature, to the *Mainichi Shimbun* an able article on the subject of the New Trades Tax, concerning which so many complaints are heard from all parts of the empire. He recognises that new taxes generally provoke discontent at first, but it is to be observed that although three new taxes have just been put into operation in Japan, the *Salt* Tax, the Registration Tax, and the Trades Tax, the last alone has become an object of popular invective. The fact is that the law is defective. The conception of such an impost may be good enough, but the provisions for levying it are open to serious criticism. No standards are laid down for the guidance of the tax collectors. They have to rely upon their own estimate of the taxable value of a trade or occupation. It would seem that the Government formed a kind of general idea of the total amount of revenue that the tax should yield, deducting their figures from returns of the aggregate sums involved in various money-earning transactions throughout the empire. Then the total was divided among the prefectures according to some statistical analysis of the latter's respective wealth, and orders were issued that such an amount should be collected in this prefecture, and such an other amount in that. As for the tax-collectors, they had no recourse but to obey instructions. If they succeeded in collecting more than the amount at which their district was assessed, the credit was theirs; if they failed to collect that amount, the fault was theirs. Naturally great hardships have been suffered by the people, and glaring discrepancies are observed in the methods of assessment adopted in different localities. It is abundantly plain, in short, that the law has been badly drafted and that it will have to be carefully amended in the sense of providing clear and definite standards for the guidance of collectors. The Government is to blame. Not merely has it badly discharged its legislative functions, but it also stands convicted of neglecting the warning addressed to it on this very subject last year by the Tokyo Chamber of Commerce and other Chambers throughout the country. Mr. Shimada apprehends that the Administration will incur much unpopularity in connexion with the measure. The text of the law can not, of course, be revised pending the Diet's next session, but in the meanwhile some efforts may be made to render the methods of the collectors more uniform and reasonable.

The same subject is discussed by the *Shogyo Shimpō*, which gives the following figures as the Government's estimates in connexion with the above tax:—

Total Sales of products, manufactures etc.	Yen
... ..	1,599,653,605
Total contracts	7,220,000
Total fees of middlemen	1,185,200
Total rents of buildings	47,766,417
Total number of employes	1,875,913
Total number of artisans	2,082,948
Total capital paid up	644,402,054

On the above estimates the Government expected to levy a net tax of 7,551,177 yen annually, but the expectation does not seem likely to be fulfilled owing to the defective nature of the Law. Among the seven items it is plain that the tax-collectors are in a position to assess only one with any degree of certainty, namely, the item relative to capital. For figures in all the other cases they are obliged to rely on the statements of the persons to be taxed, or else to resort to arbitrary methods of calculation, the former plan being evidently futile, and the latter inevitably productive of serious discontent. The *Shogyo* thinks that this Trades Tax can not be relied on, and that some other source of revenue will have to be found.

The *Yomiuri Shimbun* writes in nearly the same strain as the *Mainichi*, quoted above, but gives prominence to the facts that the responsibility for the drafting of the Trades Tax Law rests with the Ito Cabinet, and that the present

Cabinet has recognised the necessity of seeking the consent of the Diet, next session, to various revisions. It was estimated that the tax would yield a net revenue of 7½ million yen, but, judging by present indications, the figure will not exceed 4 millions. Both the *Yomiuri* and the *Mainichi* are agreed that the drafting of such a law demands not only great skill but also the most accurate research, and that, while the absence of due standards opens the door to all kinds of abuses—as arbitrary and dishonest conduct on the part of officials—it also deprives the law of income-yielding capabilities. What with the prohibitive tariff rates imposed by the United States upon Japanese goods, and the vexatious operation of this new law, the commercial and industrial progress of the nation does not promise well.

The *Hochi Shimbun* writes at considerable length about administrative abuses in Formosa. It thinks that the fiasco made by the rebels in their last attempt, and their subsequent behaviour indicate a steady improvement in the pacification of the island. But it deems the misconduct of the Japanese official classes a far more prolific source of disorder than any efforts on the part of the rebels. There are no specific charges in the article. The writer limits himself to general accusations of corruption and incompetence, and declares that Formosa threatens to become what Hokkaido was in the old days, a nest of official bandits.

SEVERE HAIL-STORM.

Yokohama was visited on Tuesday evening with one of the severest hail-storms that have occurred for a long time. From shortly after 6 o'clock squalls of wind blew in fitful gusts across the harbour from the east and north-east, while dark, lowering clouds, and flashes of lightning were seen in the same quarter. By half-past six the storm broke upon Yokohama, and hail stones as large as peas pelted and railed down with great violence, driven before the sharp gusts of wind. After the hail came rain, and it was past 7 o'clock before the storm passed away to the westward. So far, we have heard of little damage having been done except among the flowers and growing plants, but crops in the surrounding country districts must doubtless have suffered. It would appear that the storm has been experienced over a wide area and has gradually travelled from the south and east, as telegrams from Maebashi and Osaka report severe storms accompanied at the former place by hail.

SUGAR MANUFACTURING.

A statistical report published in the *Fiji Shimpō* shows that the consumption of sugar in Japan for the 29th year of *Meiji* amounted to 3,500,000 piculs, valued at twenty million yen. Of this amount 1,240,000 piculs, valued at 5,280,000 yen, was of home, and 2,260,000 piculs, valued at 14,927,000 yen, of foreign manufacture. One can not but think that Japanese manufacturers of sugar should have devoted their utmost energies to the promotion of this industry to avoid increasing imports, in view of the enormous consumption in the interior. Yet the development of sugar production is really extremely slow. There are various causes for this, the principal of which are the following:—(1.) The technical processes in the manufacture of sugar being yet in a state of infancy, the profits from the enterprise are not sufficient to cover the expenditure, and no substantial return can be made. (2.) Scarcity of the raw product. (3.) While the sugar manufacturing industry in foreign countries is, as a rule, protected by various governments, no bounty is extended to this industry in Japan, and the promoters are unable to compete with foreign manufacturers. The *post bellum* influences, however, have led to the expansion of all sorts of enterprises, and sugar manufacture has now an opportunity for improvement in the acquisition of Formosa, whence an abundant supply of raw sugar can be obtained.

JAPANESE NOTES.

The surplus revenue of the 29th fiscal year, namely 1896-7, is stated to be about 5 million *yen*. Commenting upon this, the *Yomiuri* observes that rumour estimates the total accumulations of surplus revenue now in the Treasury to be some 23 millions, and adds that the estimate is baseless. This question seems to be intensely perplexing to the editors of vernacular newspapers. We hope to make it clear to our readers soon.

Count Okuma leaves Tokyo to-day and will spend one night at his Oiso villa, resuming his journey to Kyoto on the 23rd. His Excellency intends to travel through without breaking the journey and will be received by the Emperor in audience on the 24th. It is stated that His Majesty desires to receive information on several subjects of foreign policy.

It need scarcely be stated that this journey of Count Okuma to Kyoto has greatly accentuated the rumours recently current as to changes in the Cabinet. During the past ten days repeated meetings have taken place between the leaders of the administration, and special significance seems to be attached to a conference held on the evening of the 14th instant at the residence of Count Saigo, when Counts Okuma and Kabayama and Viscount Takashima were present. Since that time constant correspondence has been exchanged between the principal members of the Cabinet. Moreover, a Private Secretary was despatched to Count Matsukata at Tomioka, and Viscount Takashima visited the Premier there on the 19th, remaining until the following day. On his return a special Cabinet Council was convened, and it was then, according to rumour, that Count Okuma's journey to Kyoto was decided. The topics to be submitted by the Count for the Imperial consideration are, of course, unknown, and conjecture, as usual, magnifies their importance. On the whole, however, it does not seem extravagant to conclude that some changes in the composition of the Cabinet will be carried out after the return of Count Okuma from Kyoto and Count Matsukata from Tomioka.

Public curiosity has been not a little increased by a rumour of the sudden departure of Count Kuroda from Kyoto. Count Kuroda, as most of our readers know, is acting Minister President of State. It is alleged that, in consequence of a decision adopted by the Cabinet Council on the 20th, His Excellency set out for Kyoto by the mail train of that evening, boarding the train at Shinagawa. The Tokyo *Asahi* is responsible for the assertion.

The public is informed by a vernacular newspaper that the Treasury has been again approached by the Syndicate which recently concluded an agreement for the purchase of forty million *yen* worth of War Bonds. The Syndicate is now represented as desirous of purchasing the Public Undertakings Bonds, of which 61 million *yen* worth have to be issued this year, according to the Budgetary programme. Evidently the newer the issue of Japanese securities, the greater their value as an investment. The Public Undertakings Bonds (*Yigyo Kosai-shsho*) of this year, for example,

will not become redeemable until 1902, and that their redemption will be completely effected before 1950 seems to us decidedly improbable, although the official scheme contemplates an earlier date. In reply to the Syndicate's second application, the Treasury is said to have explained that the details of the issue are not yet arranged, that the time is not fixed, and that it is not even certain whether there will be any issue. We are inclined to doubt the correctness of the story, for the Syndicate must be very well aware that the Government has no competence to conclude a private agreement about Loan Bonds prior to their issue. The Bonds recently sold to the Syndicate had already been issued; they were actually held by the Bank of Japan, which, of course, had absolute power to dispose of them. But the new Industrial Bonds will have to be offered to the public at large, Japanese as well as foreign, and persons desiring to purchase must put in tenders in regular form. It is doubtful, however, whether there will be any issue this year. Certainly there will not if China pays the balance of the indemnity at once, since it would be palpably bad economy on the Treasury's part to keep about 110 million *yen* lying idle in its strong rooms, and at the same time to float an interest-bearing debt. If China be guided by financial considerations alone, she will not discharge the remainder of her indebtedness until next May, but according to present indications, her intention is to discharge it in July.

The long-talked-of appointment of Mr. Tsuzuki Keiroku to be Vice-Minister of Education is now gazetted, as is also the nomination of Mr. Makino to be Minister to Italy.

The Japanese public is to be congratulated on the fact that His Majesty the Emperor has decided to increase the emoluments of policemen and jailors. The following Imperial Ordinance has just been issued:—

IMPERIAL ORDINANCE No. 149.

PAY OF POLICEMEN AND JAILORS.

Art. I.—The monthly pay of Policemen and Jailors shall be as follows:—First class, 15 *yen*; Second class, 14 *yen*; Third class, 13 *yen*; Fourth class, 12 *yen*; Fifth class, 11 *yen*; Sixth class, 10 *yen*; Seventh class, 9 *yen*.

Art. II.—The pay of Policemen and Jailors on appointment shall not be higher than the rate fixed for the Sixth Class. Provided that this restriction shall not apply to officials of *Hannin* grade or upwards, or to persons who hold certificates of good service as policemen or jailors. Such persons, however, shall not be entitled to higher pay than that of which they were previously in receipt.

Art. III.—Policemen or Jailors that are in receipt of Fifth-class or higher pay, shall not be eligible for advancement to a higher class until they have served one full year in the lower. Provided that this restriction shall not apply to the case of Policemen or Jailors appointed to be heads of sections.

Art. IV.—The provisions of the Second and Third Articles shall not apply to men that have made a specialty of criminal procedure, or that show special talent for interpreting or in other capacities.

Art. V.—The monthly pay of Police or Jailor Probationers shall be from 6 to 8 *yen*.

The remaining Articles contain provisions with reference to retirement, dismissal, death, illness, &c. Unfortunately the Ordinance has an appended provision to the effect that it need not be put into operation before the 31st March, 1898; that is, until next fiscal year. The pay

of policemen has hitherto been from 8 to 10 *yen* monthly, so that the raising of the inferior limit to 9 *yen* and the superior to 15 *yen* is a substantial change. We should like to see something similar done, though on a still more liberal scale, in the case of Judges, Public Procurators, and School Teachers.

The negotiations with the Hawaiian Government were formally opened on the 13th instant. Mr. Consul-General Shimamura, proceeding to the Foreign Office in Honolulu, presented his credentials as plenipotentiary, and handed in the instructions that he had received from Tokyo. The Hawaiian Plenipotentiary intimated that an answer could not be given immediately, but the Hawaiian Government desired by all means to settle the matter amicably. It is evident that a more reasonable attitude must be assumed by Hawaii, if she really wishes to arrange things pleasantly.

It is stated that no less than three thousand five hundred Chinese of the middle and upper classes are leaving Tainan for China, rather than become Japanese subjects, and that many others would go if they had the means to pay their passage. Three principal reasons are assigned for the exodus; first, that if they remain and pass under Japanese rule, they will be obliged to cut off their queues; secondly, that they fear the plague; and thirdly, that they think the opium regulations will have the effect of raising the price of the drug to a prohibitive figure.

The plague does indeed appear to be gaining ground in Tainan, and we should not be surprised to hear that all the Chinese had fled *en masse*. From the 23rd of March to the 20th of April, the number of cases was 184, namely, 9 Japanese and 175 Chinese. Of these, 4 Japanese died and 133 Chinese. The average seizures per day were, consequently, 4.7, and the average deaths 3.5. The rate of mortality was over 74 per cent. One imagines that some steps should have been taken to procure the new remedy.

The Sanyo Railway Company's line from Hiroshima to Mitajiri *via* Ise is expected to be open for traffic in July at latest.

THE QUEEN'S BIRTHDAY AT THE BRITISH LEGATION.

Mr. G. Lowther, H.B.M.'s *Chargé d'Affaires*, gave a garden party on the 24th instant at the Legation in Tokyo to celebrate the Queen's Birthday. The proverbial sunshine of the day did not assist at the ceremony, but the rain, though it threatened once or twice to become a very practical downpour, fortunately held off until the party had broken up. Almost all nationalities were represented among a great concourse of guests, Yokohama contributing a numerous quota. Marquis Saigo, Minister of State for the Navy, Marquis Hachisuka, Minister of State for Education; Count Kabayama, Minister of State for Home Affairs; Viscount Nomura, Minister of State for Communications; Vice-Admiral Viscount Ito, Baron Iwasaki, and many other Japanese notables were present, as were also all the Chefs de Mission and members of the Corps Diplomatique, Vice-Admiral Sir Alexander Buller and several British naval officers.

A spacious stage had been erected at the western end of the grounds, and from five o'clock a band of thirty fencing experts gave a really admirable display of swordsmanship, spear contests, and Japanese retiarian exercise. All these ancient military practices have of late acquired new and vigorous vogue in Japan. Five years ago such a spectacle as Mr. Lowther provided for his guests would scarcely have been possible in Tokyo; so many masters of fence could not have been brought together. But *Kenjutsu* and *Fujutsu* in the good old style have re-established their title to consideration, and there could be no mistake about the skill and earnestness of the highly trained muscular fellows that took part in the contests on Monday. Subsequently the stage was utilized for dancing, to the music of a Japanese naval band from the Yokosuka Admiralty. Refreshments were served in a large building, specially erected for the purpose, and at numerous small tables set up in the grounds, and the sun was just setting as the last of the guests took their departure.

THE EUROPEAN SITUATION.

The Sultan, as was to be expected, has yielded to the pressure of the Great Powers and agreed to suspend hostilities. Presumably his hesitation was in deference to the sentiment of his own people, who could scarcely be expected to forego all the fruits of victory unless they were confronted by the absolute mandate of *force majeure*. The Greeks have recovered some part of their title to public sympathy by the courage that their recent fighting displayed. They had not the remotest chance of success from the first, and it must be confessed that bravery is a quality scarcely to be expected from any troops when the odds against them are hopelessly large. Of late, however, they have been fighting for their hearths and their altars, and under those circumstances, if under any, some heroic impulses could not fail to be felt. It is now permitted to hope that peace will be restored, and that the danger of a wide-spread conflagration in Europe is over. The Powers are interpreted as unanimously agreed that Turkey's demands are preposterous, a conclusion which doubtless refers, in the main, to the cession of Thessaly. That Greece should pay an indemnity seems perfectly natural, and that her finances should be placed under some sort of European control is equally sesential. With a population of 2½ millions, approximately, she has a debt of 32½ million pounds sterling; or, more accurately, her indebtedness amounts to £13.4s. per head of population, and the charge on account of it would be 15s. 10d. *per capita* did she pay, which, however, she does not. If Japan's financial position were similar, she would owe 5,544 million *yen*, and her annual appropriation on account of the service of the public debt, interest and amortisation, would be over 320 million *yen*. Evidently there is no room to add to Greece's burden, and the foreign holders of her bonds will make their voices heard if anything of the kind is attempted, especially on such a scale as the Sultan proposes. Indeed it is difficult to see how she can afford to pay anything at all. The war has already drained her shallow purse pretty completely.

BARON IWASAKI'S GARDEN PARTY.

The celebrated park of Baron Iwasaki's suburban residence at Komagome was thrown open on the 22nd instant to about a thousand guests, Japanese and foreign. It was a superb day, a little windy at first, but ultimately calm, the atmosphere sparkling with sunshine and the temperature delightfully balmy. A Japanese landscape garden on a large scale, especially a garden of traditional beauty and historic associations, needs no description and, indeed, defies any. The hundred-acre park at Komagome is now among the chief celebrities of Tokyo—a park where one may see every variety of scenery, from a landscape of placid lake, picturesque rockery, softly sloping sward and trees at once noble and graceful, to the homely rusticity of rice-field and farm-house, the formality of Dutch flower-beds, and the comfortable practicality of an English fruit garden, with viney, espaliers, and even humble gooseberry bushes. The old and the new are here in close neighbourhood, for laburnum and lilac blossom within a stone's throw of the same pine-reflecting lake where, two centuries ago, the lady Yanagisawa used her fatal gift of beauty to work out one of the saddest tragedies in Japanese annals, and from the island where a Shogun lost his honour and his heart may be seen, across vistas of forest and shrubbery, a glimpse of conservatories heated with steam and stables lit with electricity. An old-style Japanese park is never entered directly from the road. There is always an inner gate, more or less remote from the outer. Some idea of the extent of the space between the two at Komagome may be gathered from the fact that about eight hundred vehicles found room on Saturday to dispose themselves comfortably in the interval, without encroaching at all upon the avenues of approach. Baron Iwasaki stood just within the inner gate to receive his guests, among whom were Marquis Yamagata, Marquis Saigo, Marquis Hachisuka, Count Okuma, Count Kabayama, Viscount Nomura, Viscount Takashima, the Representatives of France, Germany, the Netherlands, Belgium, Russia, Spain, Italy, the United States and Great Britain, Lieut.-General Viscount Kawakami, virtually all the leading residents, foreign and Japanese, of Tokyo and several from Yokohama. Ladies had not been invited: their presence alone was wanting to make a perfect scene. It was impossible at first to suspect that a thousand guests were present: numerous as they were, they only sufficed to lend a pleasant semblance of animation to the long stretches of restful wood and winding valley. But when, from four o'clock, they gradually assembled at the southern pavilion, where refreshments had been provided, the size of the concourse made itself strikingly apparent. Each person on arrival had been handed a pretty little volume, which, being unfolded, displayed a coloured map of the grounds, with all the points of interest, especially the refreshment hall, indicated in Japanese and English. This hall was one of the sights of the day. It was not a new structure; its time-mellowed thatch indicated several years of service. But the numerous pillars on which it is supported had been thickly wrapped in greenery until they bore the semblance of portly columns cut out of solid moss, and from the lofty roof festoons of artificial wistaria depended, so that the whole building seemed to have grown

where it stood. Raised on a plateau of considerable height above the surrounding ground, this spacious edifice, with its wealth of purple blossom waving above long rows of velvet green pillars, its background of forest and the graceful curves of its roof outlined against a rich blue sky, formed a decorative picture of remarkable beauty. All around tables and chairs had been placed under trellises from which also wistaria sprays hung. So ample were the preparations that every guest found a seat at once, and so numerous the attendants that every want was supplied without a moment's delay. We do not think that a more perfectly organized, picturesque, and enjoyable garden party was ever given in Japan: certainly none has come within our experience.

PRINCE GEORGE OF GREECE AND THE OTSU AFFAIR.

We have now read for the first time an extract from a letter purporting to have been written by Prince George of Greece to his father and published in the *Review of Reviews* for June 1896. Mr. Otis Cary's copy of the extract, in his letter which will be found in our correspondence columns, gives us a new explanation of the story circulated so assiduously about Prince George. Hitherto we had supposed that the life-saving act attributed to the Prince was due to mere idle rumour; that it originated in irresponsible talk. But the *Review of Reviews* attributes it circumstantially to Prince George's written statement. We can only express profound surprise. There has not been any official account of the affair published. But all the facts were carefully sifted at the time, and according to the evidence collected—evidence that offers no semblance of uncertainty or prevarication—Prince George had neither hand, act nor part in the affair. What happened was this. At the head of the file of *jinrikisha*, which were advancing at a foot pace, rode the Governor of Shiga, preceded, of course, by police officials. Then came the *jinrikisha* of the Czarewitch; then that of Prince George, and so on. Tsuda Sanzo stepped up from the right and delivered a blow which laid open the Czarewitch's head. The Czarewitch at once leaped from his *jinrikisha* on the left side and ran away. His sudden spring had the effect of throwing down the man in the shafts. Tsuda Sanzo attempted to follow his victim. He ran across behind the now empty *jinrikisha* and immediately before Prince George's, whereupon the leading coolie of the latter vehicle tripped him and he fell. Before he could rise, one of the Czarewitch's coolies had seized him, and there the attack finally ended. That the Czarewitch was pursued to a house by Tsuda, that he ran out again, and that he would then have received another blow had not Prince George's stick disabled the would-be assassin, is all fiction. Nothing of the kind occurred. The wounded man did make his way into a house, but he was not followed thither by Tsuda, and he did not leave the house until his hurt had been temporarily bandaged. We do not see what more is to be said. The facts are as we have related them, according to the best testimony.

A MAIL STEAMER BREAK DOWN.

Information has reached the Agent of the Messageries Maritimes Company at Yokohama, by wire, that the M. M. mail steamer *Sydney*, which left Shanghai for Europe on Saturday last, has returned to that port owing to a break-down of her machinery. Her passengers, mails, and cargo have been transferred to the steamer *Farra*, which will leave Shanghai for home on Thursday, the 27th inst. The Yokohama passengers, mails, and cargo by the *Natal* will therefore tranship to the *Sydney* at Shanghai instead of to the *Farra*, as previously advertised.

FOREIGN TRADE OF JAPAN.

Foreign trade last year, remarks the *Nichi Nichi*, fell into a state unknown before, owing no doubt to the inflation of *post bellum* undertakings as well as the unusual depression of the markets in America. The result was an excess of imports to the enormous total of fifty-four million *yen*. The condition continues. Imports between January and April show an increase of 12,405,487 *yen* as compared with exports. Usually when imports were in excess of exports, the amount of gold and silver shipped abroad was in excess of that imported. But this year the contrary is the case, and the general course of business does not seem to be normal. The anomaly is to be attributed to the receipt of the war indemnity from China. The following table gives details:—

Exports from January to March	37,898,885
Exports during April	9,814,001
Total.....	47,712,886
Imports from January to March	44,030,205
Imports during April	16,088,108
Total	60,118,373
Total of imports and exports	107,831,259
Excess of imports	12,405,487
Gold and silver exported from January to March.....	2,067,589
Gold and silver exported during April.....	161,186
Total	2,228,775
Imports of gold and silver from January to March.....	27,263,708
Imports of gold and silver during April	8,299,052
Total	35,562,760
Excess of imports of specie	33,333,985

According to the investigations of the Finance Department, as published in the *Nippon*, it appears that the foreign trade of Japan during April last amounted to 11,550,000 *yen* in exports and 18,160,000 *yen* in imports, showing an excess of imports of 6,600,000 *yen*. The imports since January of this year have been in excess of exports by over 12,700,000 *yen*, falling short only of two millions as compared with the amount of 14,700,000 *yen* recorded last year. If trade continues in the present condition there will be an excess of thirty or forty millions in imports this year. The total exports and imports this month amount to 29,740,000 *yen*, showing an increase of about six millions as compared with 23,000,000 *yen* last year.

With regard to vicissitudes in the staple exports, we find that, although there was an increase of 550,000 *yen* in silk, 470,000 *yen* in *habutaye*, 440,000 *yen* in cotton yarn, and 280,000 *yen* in coal, the export of rice decreased by 460,000 *yen*, while more or less reductions also occurred in marine products, porcelain wares, and silk manufactures.

Turning to imports, it must be remarked that this year there was a serious depression in the import of cotton thread, calicos, muslin de laine, and woollen cloths, each item showing a decrease of some 400,000 *yen* as compared with the figures for last year. But as there was an increase of one million *yen* each in raw cotton, machines, rice, &c., and of 600,000 or 700,000 *yen* each in sugar, kerosene oil, and iron, the balance still indicates an increase in imports of over six millions.

Some persons were inclined to suppose that the export trade this year would be more hopeful than it was last, and that an excess of imports would be impossible. Unfortunately, however, the question of the alteration of the tariff now under discussion in America has virtually crippled all trade connected with raw silk, silk handkerchiefs, and fancy matting. The prohibitory regulations against spurious and inferior teas are already in operation, and if the revised tariff is to be enforced along with them, the foreign trade of Japan can hardly avoid serious loss.

As regards the exports and imports of gold and silver, an increase of eight million *yen* in imports is noticeable, the export being limited to silver to the amount of 220,000 *yen*. The import of gold aggregated some 8,280,000

yen, while silver did not exceed 20,000 *yen*. Nevertheless, as the transportation of the war indemnity—the gold of which is necessary for providing the new coinage—will be completed in May, it is supposed that no such extraordinary inequalities in exports and imports as have recently occurred will be seen in future.

RISE IN WAREHOUSING CHARGES.

From the *Shogyo Shimpo* we learn that the Tokyo Soko Kwaisha (Tokyo Warehousing Company), Kome Soko Kwaisha (Rice Warehousing Company), and Mitsui Sokobu (Mitsui Warehousing Department) lately resolved to increase their rates for warehousing goods. The first two companies are to enforce the revised rates from the 1st of July next, and the last from the 1st June. Rice and other grain are hereafter to be insured, and the rates have been raised for other commodities also. The following table will show the changes:—

Commodities.	New Rates.	Old Rates.
	Yen.	Yen.
Rice, 100 bags, per month	1.100	0.090
Foreign rice	1.050	1.035
Beans, for every 100 <i>yen</i> in value, per day	0.015	0.014
Peas, for every 100 <i>yen</i> in value, per day	0.014	0.012
Chinese peas, for every 100 <i>yen</i> in value, per day	0.014	0.012
Engen peas, for every 100 <i>yen</i> in value, per day	0.014	0.012
Black peas, for every 100 <i>yen</i> in value, per day	0.014	0.012
Barley, for every 100 <i>yen</i> in value, per day	0.033	0.017
Chikurin wheat, for every 100 <i>yen</i> in value, per day	0.016	0.013
Sugar, for every 100 <i>yen</i> in value, per day	0.015	0.014
Sediment sugar, for every 100 <i>yen</i> in value, per day	0.015	0.014
Molasses, for every 100 <i>yen</i> in value, per day	0.015	0.014
Thread, spun, for every 100 <i>yen</i> in value, per day	0.007	0.008
Bombay cotton, for every 100 <i>yen</i> in value, per day	0.006	0.007
China cotton, for every 100 <i>yen</i> in value, per day	0.012	0.010
Bingo mats, for every 100 <i>yen</i> in value, per day	0.014	0.030
Vegetable seeds, for every 100 <i>yen</i> in value, per day	0.020	0.016
Imported wine, for every 100 <i>yen</i> in value, per day	0.012	0.011

PERSONAL EFFECTS AT AMERICAN CUSTOM HOUSES.

The duties devolving upon an American customs official under the Dingley Tariff will be of an interesting character. Here, for example, is the clause relating to clothes and personal effects of travellers entering the States:—

657. Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall only include such articles as actually accompany and are in the use of, and as are necessary and appropriate for the wear and use of such persons for the immediate purposes of the journey and present comfort and convenience, and shall not be held to apply to merchandise or articles intended for other persons or for sale; and in case the persons thus arriving are citizens or residents of the United States, the articles exempted shall not exceed one hundred dollars in value, nor shall the exemption apply to residents of other countries entering the United States more than once in each year:—*Provided, however*, That all the wearing apparel and other personal effects of residents of the United States, so returning, as may have been taken by them out of the United States to foreign countries, and which have not been advanced in value or improved in condition by any process of labour or manufacture in such countries, shall be admitted free of duty, without regard to their value, upon their identity being established under appropriate rules and regulations to be prescribed by the Secretary of the Treasury.

Fancy a lady limited to a wardrobe worth 100 dollars! Why it would scarcely pay for a third-class passenger's outfit. Still more wonderful is the idea of having one's clothes registered on leaving home and officially identified on return. The labour involved in such processes is curious to contemplate. How the American public can be induced to submit tamely to these outrages, we are at a loss to conceive.

A NEW NEWSPAPER IN FORMOSA.

The enterprise of Japanese journalists is very praiseworthy. Their experience, even in Tokyo, can not be called rosy. Many that devote their intellect and energies to newspaper work in the capital, do not make their bread out of it, to say nothing of their butter. The record ought to be different, for the Japanese are a reading people, and more than thirty years have elapsed since the agent of the first vernacular journal published in Japan found that several of those upon whose subscriptions he had counted were content with one specimen, and could scarcely be persuaded of the possibility of getting a new copy every day. On the whole it may be said, we think, that journals have wider vogue here than in almost any other country, for even the *jinrikisha*-drawer and the maid of all work spell out a daily in the intervals of their toil. Still journalism can not be called a paying profession in Japan. A few, a very few, of the leading journals bring a fair income to their proprietors—of course we use the epithet "fair" in a comparative sense—but the great majority are kept alive for some purpose independent of mere pecuniary profit. Hope, however, continues to spring eternal in the newspaper desert as elsewhere. Already two daily journals have been started by Japanese in Formosa. One is called the *Taiwan Shimbun*. It is printed in Japanese script; has been for some time in existence, and being in command of a new field, offers features of considerable interest. The other has just been started. Its title is the *Taiwan Nippo*. It has three departments, a Japanese, a Chinese and an English. The Japanese is intended to convey information of Formosan affairs to folks in Japan proper; the Chinese, to impart a knowledge of things Japanese to the inhabitants of the new dominion; and the English, to discharge both functions for Occidentals. This journal promises to be a genuine acquisition. It is of considerable dimensions, well printed, and, so far as we can judge, ably edited. The English section is to be tri-weekly. It must be confessed that English effusions by Japanese journalists are, for the most part, exasperating. They would be magnificently courageous did their authors possess a little more experience of the difficulty—may we not almost say the impossibility?—of communicating one's ideas through the medium of a foreign tongue. Some conspicuously gifted individuals attain such a perfect acquaintance with the structure of an alien language that they can write it without offending against grammar or syntax. But how many are there that can really express their thoughts in any language save that of their native land? In Europe the difficulty is appreciated. Frenchmen or Germans do not write articles in English, nor do Englishmen write articles in German or French. There are exceptions, of course, but they only prove the rule. Any and every Japanese, however, is ready to pen an English essay. Twenty or thirty years hence there will be more reluctance, but just now the callow student rushes in where the ripe scholar fears to tread. These reflections are not excluded by perusal of the *Taiwan Nippo's* English. But they become impertinent in the presence of the last paragraph of the article:—

The editor of the English department is unexperienced, and quite sensible of his own imperfection in the use of his slight knowledge of English. He is afraid that inaccuracies as to the meaning and grammatical mistakes are for him unavoidable. Still we are told that language is given to a man that he may convey his thoughts to another. We trust on the whole to be able to accomplish this. If we do no more and even that with bad style and incorrectly we beg the pardon of our candid readers.

Such modesty disarms criticism. Besides, it is evident that this writer is more than commonly equipped for his task. We wish all success to him and the enterprise with which he is connected.

ANOTHER INSTANCE.

A new example of what is construed as anti-foreign feeling occurred last Saturday in Yokohama, and has been communicated to a local contemporary by one of the parties concerned. We reproduce the letter, for, although the affair is in itself trivial, the inferences drawn from it are not unimportant:—

SIR,—I shall be much obliged by your allowing me to give a brief account of my experience of the courtesy of Japanese officials. On Saturday last, in company with several friends from Tokyo, I had gone on board the *Coptic* to take leave of some old residents who were sailing for America. When about to return to shore, as our launch had not yet come alongside, we in the meanwhile entered one that turned out to be a Japanese launch belonging to the Kencho. After waiting a few minutes it left the ship with us still on board, and after proceeding a hundred yards or so it lay to. This had evidently been arranged; and the newspaper says:—"It was evidently a deliberate plot to humiliate the foreigners, since any objections ought to have been raised at the ship's side." Are those conclusions warranted? To us it appears that another, and a far simpler, explanation may be found. The persons in authority on the launch would naturally suppose that the six foreigners were there by invitation, and on the strength of that supposition would have raised no immediate objection. But on discovering that the foreigners had come on board uninvited and without seeking permission—a discovery made, probably, after the launch had proceeded a short distance on her shoreward trip—the intrusion was resented. We fail to detect any evidence of pre-arrangement or of a deliberate plot to humiliate the foreigners. There may have been pre-arrangement; there may have been a deliberate plot; but to assume that there was, on the strength of such slender evidence, betrays a spirit just as dangerous in its way as any anti-foreign feeling that may still linger in the breasts of a small section of the Japanese nation. Let us perform that mental process so strongly resented by some of our fellow-residents: let us suppose the positions reversed—that is to say, let us suppose that six Japanese, without invitation or inquiry, had boarded a private steam-launch under the control of foreigners to whom they were total strangers. The supposition is scarcely possible, but still we can subject our imaginations to the strain of conceiving it. What course would the foreigners in authority take? The fact is that the Japanese have become particular, morbidly particular, in some instances. They are determined not to be "put upon;" determined that the foreigner shall not presume upon his nationality, but shall be guided, in his intercourse with them by the same canons of consideration and deference that guide him in intercourse with men of his own race. Undoubtedly that spirit of self-assertion is abroad; undoubtedly also it sometimes runs riot, and impels ignorant or giddy folks, such as labouring men and students, to acts grossly rude, if not outrageous. It is hard for the foreigner to bridle his temper or smother his just indignation when an opprobrious epithet is hurled at him by some low boor or bumptious school-boy, but the feat becomes doubly hard if such acts are regarded as simply anti-foreign, or construed in the exaggerated sense attached to the steam-launch incident by "One of the Foreigners" and by the journal to which he appeals. All these angles that have resulted from several years of unobserved chafing and unnoticed friction will be smoothed away in process of time, and pending that most desirable consummation what the foreigner has to do is to behave so that he shall always be in the right, and to bring to the notice of the authorities every instance of unmerited rudeness or unprovoked aggression. It will not do to make complaints like that of the steam-launch, where the initial error was on the side of the foreigners, and most assuredly nothing can be less wholesome or more mischievous than to nurse far-fetched suspicions of premeditation or deliberate plotting on the part of the Japanese. Patience, care and a little breadth of vision are alone needed, so far as we can see.

ONE OF THE FOREIGNERS.

Tokyo, May 25th, 1897.

It must be confessed that the experience here related was remarkably exasperating and even humiliating. To be roundly slanged and then ignominiously carried back and put on board the *Coptic* whence they had come, might well excite the wrath of the six foreigners. As for the Japanese "chief constable" his conduct savoured of churlishness as well as discourtesy. He might have been obliging enough to give a shore passage to the six foreigners, and under any circumstances he should have treated them politely. But the question necessarily presents itself—why were the foreigners there? Is it usual, is it in any sense correct, to board a steam-launch without either seeking permission or receiving an invitation? Such things are occasionally done in the case of hotel launches which are supposed to be intended, more or less, for general convenience; but that half a dozen persons should step into a private steam-launch without leave or licence, and should remain there without offering any kind of explanation of their presence, is a proceeding unusual and indefensible. And the Japanese have learned by this time to distinguish ordinary and proper acts from extraordinary and improper. In an English port the notion of putting oneself on board the first steam launch that came handy, and expecting to be carried in her to one's destination, would never occur to a rational man. There is more freedom in the East; less regard for conventionalities. Still we can not avoid the conclusion that the six foreigners were hopelessly in the wrong when they boarded a private steam-launch without apology or inquiry of any kind. Possibly they have some satisfactory explanation but it does not appear in the letter reproduced above, and we have nothing to guide us beyond the facts there related. Two wrongs, however, do not make a right. The incivility of the Japanese police-constable is not excused, though it may be largely condoned, by the *sans-gêne* of the foreigners. But it is not with those phases of the affair that we are concerned so much as with the inferences drawn by the correspondent whose

letter we have quoted, and by the journal to which it was addressed. The correspondent writes:—"After waiting a few minutes the steam-launch left the ship with us still on board, and proceeding a hundred yards or so, it lay to. This had evidently been arranged;" and the newspaper says:—"It was evidently a deliberate plot to humiliate the foreigners, since any objections ought to have been raised at the ship's side." Are those conclusions warranted? To us it appears that another, and a far simpler, explanation may be found. The persons in authority on the launch would naturally suppose that the six foreigners were there by invitation, and on the strength of that supposition would have raised no immediate objection. But on discovering that the foreigners had come on board uninvited and without seeking permission—a discovery made, probably, after the launch had proceeded a short distance on her shoreward trip—the intrusion was resented. We fail to detect any evidence of pre-arrangement or of a deliberate plot to humiliate the foreigners. There may have been pre-arrangement; there may have been a deliberate plot; but to assume that there was, on the strength of such slender evidence, betrays a spirit just as dangerous in its way as any anti-foreign feeling that may still linger in the breasts of a small section of the Japanese nation. Let us perform that mental process so strongly resented by some of our fellow-residents: let us suppose the positions reversed—that is to say, let us suppose that six Japanese, without invitation or inquiry, had boarded a private steam-launch under the control of foreigners to whom they were total strangers. The supposition is scarcely possible, but still we can subject our imaginations to the strain of conceiving it. What course would the foreigners in authority take? The fact is that the Japanese have become particular, morbidly particular, in some instances. They are determined not to be "put upon;" determined that the foreigner shall not presume upon his nationality, but shall be guided, in his intercourse with them by the same canons of consideration and deference that guide him in intercourse with men of his own race. Undoubtedly that spirit of self-assertion is abroad; undoubtedly also it sometimes runs riot, and impels ignorant or giddy folks, such as labouring men and students, to acts grossly rude, if not outrageous. It is hard for the foreigner to bridle his temper or smother his just indignation when an opprobrious epithet is hurled at him by some low boor or bumptious school-boy, but the feat becomes doubly hard if such acts are regarded as simply anti-foreign, or construed in the exaggerated sense attached to the steam-launch incident by "One of the Foreigners" and by the journal to which he appeals. All these angles that have resulted from several years of unobserved chafing and unnoticed friction will be smoothed away in process of time, and pending that most desirable consummation what the foreigner has to do is to behave so that he shall always be in the right, and to bring to the notice of the authorities every instance of unmerited rudeness or unprovoked aggression. It will not do to make complaints like that of the steam-launch, where the initial error was on the side of the foreigners, and most assuredly nothing can be less wholesome or more mischievous than to nurse far-fetched suspicions of premeditation or deliberate plotting on the part of the Japanese. Patience, care and a little breadth of vision are alone needed, so far as we can see.

An official order regarding the future working of the Ashio Copper Mine was submitted by the Tokyo Mining Bureau to Mr. Furukawa, owner of the mine, on the 27th instant, and in the meantime an Imperial Ordinance relating to the remission or reduction of the land tax in the devastated districts will be gazetted. In case the farmers in the devastated districts still insist upon shutting down the mine, the Authorities will have to adopt measures according to circumstances.

TRADE WITH AUSTRALIA.

The *Shogyo Shimpō* remarks that the following articles ought to be exported to Australia with prospects of great success:—

1. Bamboo wares, blinds (all kinds), baskets, tea-tables, book cases, corner shelves.
2. Matting, plain or figured. Best quality. Mats should be one yard wide and forty yards long.
3. Men's hats. Straw and rush hats by preference.
4. Silk textiles and handkerchiefs, neck-ties, pin-cushions, and photograph frames. Silk goods chiefly for ladies' garments, *habutae*, *ayaginu*, *chirimen*, and *kai silk*. The width must be, in general, twenty-two inches.
5. Hulled rice.
6. Lacquered wares: gold lacquered trays, cabinets, handkerchief and cigarette boxes, book cases, ornamental corner stands.
7. Wall paper.
8. Earthen and porcelain wares. These wares were not exported direct to Queensland until the 28th year of *Meiji*. In the 29th year trial shipments were made, but the Japanese productions being of inferior quality they fared badly in competition with foreign goods.
9. Beer.
10. Printing paper, Japanese or foreign.
11. Umbrellas, shoes, boots, matches and soy.

It may be worth while to note that the fullest attention should be paid to the period of the year. The temperature in Australia differs considerably from that of Japan. The south wind there is extremely cold and the north wind warm. November to February constitutes the summer season, whereas the three months of July, August, and September are winter.

AMERICA'S DEBT TO ENGLAND.

Considering that America has not a cent of foreign debt, in the ordinary acceptance of the term, it must seem strange to speak of the money she owes to England. Yet she does owe an enormous sum, and we are occasionally reminded of the fact by indirect means. Thus, during nine months ending March 31st, 1897, America's exports exceeded her imports by \$323,381,519. Her exports of silver during the same period were \$24,278,008, and her imports of gold, \$62,078,415, so that she ought to have had a credit of \$286,281,118 abroad. It is more than probable, however, that the value of her imports, as entered in the Customs Returns, was considerably less than their real cost. There is also a possibility that European investors unloaded some of the American stocks usually carried by them. Still, the correction to be applied on these two accounts can scarcely have exceeded \$100,000,000, and it would follow that 180 millions went to discharge America's indebtedness to Europe, especially to England. What is that indebtedness? Statisticians of acknowledged ability put it at five thousand million dollars, the interest on which, at 4 per cent., is 200 millions. They further calculate that Americans spend about 60 millions annually in Europe, and that they pay 35 millions annually to foreign—chiefly British—ship-owners, over and above what American vessels earn in the export trade. Thus the final result is that the United States have to transmit to Europe every year a sum of 295 millions dollars, of which it is supposed that 240 millions go to England.

THE HIGHEST WATERFALL IN THE WORLD.

In British Guiana or Venezuela—it is impossible to say which until the Schomburgk line is drawn under the new arbitration treaty—there is a mountain called Roraima. It was discovered 60 years ago and has never been explored, being ascended by balloon only. It is 7,500 feet high, with precipitous sides, and the top is supposed to be some twelve miles in diameter. There is probably a lake somewhere near the summit, for a waterfall tumbles thence 2,000 feet at a leap, and then rolls 3,000 feet farther down a slope. This huge cataract, the biggest in the world, is visible from a distance of 30 miles. A book has been written with the object of inducing the British Government to order the exploration of the mountain, for scientific men believe that on its summit new flora and fauna will be found.

THE TRADES TAX.

The *Nichi Nichi Shimbun* makes the following statement in regard to the Trades Tax Regulations lately enforced:—

When the problem of taxing trades was first introduced in the Diet, various Chambers of Commerce perceived that serious abuses would arise from the intricacy of the proposed method of taxation, and consequently requested the Diet, as well as the officials concerned, to reconsider the scheme. Now that the law has been enforced, it has entailed not only endless trouble in the process of collection, but has also proved incompatible with the legitimate principles of taxation, for it involves various points of injustice. According to the Regulations, taxes are levied upon the reserve funds of insurance companies. But as such reserves are nothing more than a part of the premiums received from the insurers the money has to be paid back in the case of the withdrawal or expiration of their contract, or of death. It does not in any way constitute the property of the company, being a sort of temporary deposit. Again, houses to let are appraised at the discretion of the Revenue Inspectors alone, and this gives rise to many unjust proceedings. Of two hundred innkeepers in the Nihonbashi district, over seventy are complainants against the new law. The capitals of railway companies are also to be taxed. Some secure a greater amount of profit than others, while the capitals of others may be comparatively insignificant. Taxation on the general amount of capital will surely have the effect of entailing a heavy burden upon enterprises of little or no profit. A trading company having a capital of a hundred thousand yen may have invested ninety thousand yen in buildings for offices and the remaining ten thousand yen in general business. In such cases the company has to bear just double the amount of taxes as another using all its capital for business. Inconveniences and disadvantages of this nature are almost incalculable under the present law. Moreover, to make the matter worse, the impetuosity or superciliousness of the Revenue Inspectors has, on more than one occasion, led to serious abuses and rendered the legitimate observance of the law almost impracticable. A clamour for the rescission of the enactment has consequently sprung up. In order to attain that end, the various Chambers of Commerce throughout the empire are to be divided into seven sections, each of which is to hold a council under a chief Director for the purpose of collecting materials for the compilation of a report showing the inconveniences involved in the taxation of trades. General meetings of these Chambers of Commerce will be held in Tokyo, in June or July, so as to forward the movement against the obnoxious tax.

EXPORT OF COTTON YARN.

The *Mainichi Shimbun* publishes the following in regard to the export of cotton yarn:—

Owing to the prevalence of the plague in Bombay since January this year, and the consequent decrease in the export of cotton yarn thence, the demand for Japanese manufactures suddenly increased. Formerly 16's were chiefly exported, but after January a demand arose for 20's. This is owing to the substitution of Japanese yarn for Bombay goods in the interior of China. The following table shows the average prices of cotton yarn for the two years:—

	1896—Yen.	1897—Yen.
January.		
16's	95	90
20's	100	93
Feb.....		
16's	92.50	91
20's	94	95
March...		
16's	93	90
20's	95	93

Latterly the price has risen by one yen as compared with the corresponding period of last year, and there is a tendency towards a farther rise. Contracts for delivery in June or July have been concluded at 96 yen 50 sen minimum, and 97 yen 50 sen maximum. The export to China

during March amounted to more than the figures for the first three months of last year taken together, thus:—

	1896—Yen.	1897—Yen.
January	157,159	558,579
February.....	213,814	794,270
March	188,250	1,041,332

The increase in the export of cotton yarn leads inevitably to an enlarged import of raw cotton. The figures are:—

	1896—Yen.	1897—Yen.
January	3,159,117	3,285,935
February.....	2,038,078	3,498,595
March	2,597,013	4,894,249
April	3,960,580	5,033,105

QUARANTINE AT VICTORIA.

The quarantining of the *Empress of China* at Victoria on her last passage across evoked a good deal of vehement protest from her luckless passengers. One gentleman, signing himself "A," filled several columns of the *Daily Colonist* with letters on the subject, and in the first described the situation thus:—

The R. M. S. *Empress of China* arrived from China and Japan with a full complement of 140 cabin and 600 steerage passengers. Nine days before, when out from Yokohama, two cases of smallpox were discovered amongst the Chinese. The men were immediately placed in hospital, and with their attendants, strictly isolated, and are now in a fair way to full recovery. Every person on board was promptly vaccinated in accordance with the regulations, and every care taken that there should be no communication between the Chinese and European passengers. Since then there has been no further outbreak. In former instances when such a thing happened, these steerage passengers were taken out of the ship at the quarantine station; they and their quarters were disinfected, and then the ship and saloon passengers allowed to proceed. Judge, then, what was first our incredulity and then horror, when it was known that the health officer had ordered every person on board—officers, crew, and passengers of every class—to be landed for a sixteen-day period of quarantine on shore, and that, as the first step, every one of us and our baggage should be put through the disinfecting process in vogue here.

We thus found ourselves face to face with this situation: We were to be taken out of our comfortable cabins in batches of a dozen or so at a time; stripped naked and subjected to a foul chemical bath; our clothes taken from us to be fumigated and baked, we sitting meanwhile in a shed, clad in an old blanket gown and pair of slippers, which had previously been used to cover the nakedness of no one knows how many Chinese. Neither ladies nor children, no matter how delicate, were excepted from this odious and revolting operation. Next, all our baggage was to be landed and exposed for a period to sulphur fumes, and then baked to a temperature of 200 degrees, a proceeding which is calculated to, and actually does, destroy nearly every article subjected to it. As to ourselves, we were next to be marched to the quarantine buildings, and invited to take up our stay there for the full period mentioned, and as much longer as the health officer meanwhile might think fit to inflict. In the building in question there was not accommodation for more than half our number; neither was there bed, table chair or any other article of furniture, only the bare roof and floor. To remedy this, it was proposed to land all the ship's bedding, etc., so that the ladies and children might have a measure of comfort, and all for whom there was no accommodation were to be placed under canvas. Adjacent to this place was the small pox hospital, with a number of cases in it, so that every opportunity should be given us of contracting the disease who had escaped it hitherto.

As soon as the orders were posted all the passengers met under the chairmanship of Everett Fraser, Esq., to consider the situation. At this it was unanimously resolved to forward a protest, giving reasons, to the Canadian Government, and requesting its interference. This was immediately done by telegraph; the Chinese Jubilee Embassy at the same time wiring Lord Salisbury and the Peking Government. Besides this, the officials of the company were straining every nerve to get the orders reconsidered. Next, it was unanimously resolved to resist by every means in our power these unprecedented, intolerable and entirely unnecessary orders of the health officer, so that if they are to be carried out in our persons it will only be done by sheer brute force.

Several letters were filled with daily descriptions of the unnecessary inconveniences—from

the passengers' point of view—caused by the orders of Dr. Watt, the quarantine officer. Sympathy was evoked in Victoria, B.C., for the unfortunate people, which took the form of gifts of flowers, and the stationing of a musical band near the ship. Then followed thrilling tales of the medicated bath drill which was ordered for all and sundry. Finally the passengers obtained release and sped on their different ways. One of them before starting for London wrote a letter to the *Japan Mail* part of which we reproduce:—"This quarter of the globe is suffering from an acute attack of Quarantine Mania. All steerage passengers—no matter whether the ship has a clean bill of health or not—get their fourteen days at William Head, and saloon passengers are also quarantined if the slightest pretext can be found for it. At this William Head station there is neither accommodation nor appliances to deal with the vast number of people—chiefly natives of China and Japan—who are being collected there, and incredible suffering is the result. The present Government of Canada is not friendly to the C.P.R., and their influence with it appears to be nil. The newspapers and the people are loud in their outcry for the strictest quarantine."

MASONIC INSTALLATION.

The annual installation meeting of the Orient Mark Lodge of Japan, No. 304, E.C., took place on Tuesday evening at the Masonic Temple, Yokohama. There was a very fair attendance of Mark Masters from Tokyo as well as from Yokohama. Wor. Bro. Geo. Hodges was the Installing Master, and performed the ceremony with impressive solemnity. The full list of officers is as follows:—

S. E. Unite	W.M.
E. P. Fallister	I.P.M.
H. Moss, P.M., for R. N. St.	
John	S.W.
A. B. Brown	S.O.
G. Hodges, P.M.	Treas.
C. T. Benney, for L. Ph. von	
Hemert	Reg. & Sec.
L. Stornebrink	D. of C.
L. Dewette, for Thomas W.	
McIlraith	M.O.
C. F. Rhine	S.O.
Rev. W. J. White	J.O.
J. B. M. Barrett	S.D.
F. C. Herb	J.D.
A. Macdonald	I.G.
F. W. Thomas	Steward
H. Ivison	Tyler

After the Lodge was over the Brethren sat down to a most enjoyable banquet under the presidency of Wor. Bro. Unite.

KOREAN NOTES.

The former Minister of Justice in Korea, Mr. Cho Pyensik, has memorialized the King, or employed others to memorialize, praying that steps be taken to execute every one implicated in the murder of the Queen. It is said that the persons named by the memorialists are chosen as being out of favour with the Court. The King has replied that steps will be taken, and that the memorialists need not press the matter.

Koreans certainly do quaint things. Among the folks that have contributed money to promote the agitation for the adoption of the title of Emperor by the King, is Ye Yongik, recently Governor of North Pyengyang, who was sentenced by the Supreme Court, a few days ago, to ten years' banishment.

Three hundred Japanese troops arrived in Seoul on the 10th of May to relieve the guards hitherto stationed there. The officials of the War Office gave a farewell banquet to the officers of the returning guards.

The funeral, grave, and other matters connected with the death of the Queen of Korea constitute unending pretexts for wasting money. The latest expenditure is a sum of over twenty-

eight thousand dollars to buy 164 acres of land for the new royal sepulchre.

The present situation in Korea with regard to the affair of the Russian *mission militaire* seems to be one of suspense. According to correspondence published in the *Fiji Shimpō*, under date the 14th instant, innumerable conferences have taken place between the Minister of War and the Russian Representative, the former warmly supporting the project and the latter endorsing it. The King, too, was induced to signify his assent in emphatic terms. Nevertheless, in deference to the excitement manifested by the Japanese nation, some change of programme seemed prudent. It took the form of reducing the number of the proposed mission, first by one half, then by two-thirds, and finally to 20 members instead of the original 160. On that basis an agreement was concluded between the War Department and Mr. Waeber. But at this stage the Russian *Chargé d'Affaires* naturally desired to have the Foreign Minister openly associated with the negotiation. Steps to that end were taken, with the result that the Foreign Minister not only refused to cooperate, but even tendered his resignation on the ground that matters directly concerning his functions had been arranged behind his back and without his knowledge by his colleague of the War Department. The King refused to accept the resignation, but it was again tendered, and the Minister seems resolved not to remain in office. On the 12th instant, the Minister of War also sent in his resignation in consequence of the same trouble, but the King's attitude in this latter case was not known at the time of despatching the correspondence from which we quote. Meanwhile the business of the *mission militaire* has, of course, been suspended, and there are rumours that it finds so little favour with the Government in St. Petersburg as to be in danger of complete abandonment. The *Fiji's* correspondent is careful to contradict the report, industriously circulated, that the British Consul-General has been offering strong opposition to the project of the *mission*, and that the delay in concluding the agreement is due mainly to his action. At all events, the progress of the affair has been arrested, though the issue is not yet clearly discernible.

According to the above accounts, the Minister of War has been the principal supporter of the Russian military-instructors project. But the *Yomiuri Shimbun* publishes special correspondence, dated the 19th instant, which represents the same Minister in a new light. He is now said to have issued to Li, Principal of the Military College in Seoul, instructions that a body of troops should be organized and trained after the Japanese system. This Li was formerly in Japan and graduated at the Kyododan, a military institution ranking below the *Shikwan Gakko*. On learning of the action taken by the Minister of War, the Russian Colonel now serving as chief military instructor in Korea, waited upon the Minister of the Household, and declared that if troops were to be organized and drilled according to the Japanese system, no further need existed for the Russian drill-instructors, and they would at once return home. The Minister pacified the Colonel, and then communicated with the War Department, the result being that the order previously issued to Li was cancelled. We find this story difficult to believe.

Intelligence is published by the same journal to the effect that Russian influence being how paramount in Korea, to be connected with Russia or a Russian is an object of high ambition. It used to be said in Japan that though men were commoners no commoner was a man, and so it may now be said of Korea that though men are Koreans no Korean except a Russo-ophile is a man. The fashion is to become naturalized Russian subjects. Just now there are a number of these "half Russians" in Seoul. A few days ago, twenty of them engaged in a street broil, beat two stone-masons nearly to death, and sent the police flying ignominiously. But being regis-

tered as Russian subjects, the Korean Government is powerless against them. Here, again, our credulity is severely taxed. To be a Russian subject does not confer a licence to set the law at defiance. The *Yomiuri's* special correspondent is more sensational than sensible.

FORMOSAN NOTES.

With reference to the *émeute* of the 8th instant at Twatutia, we took occasion to note that the arrangements made by the Japanese Authorities for preventing loss of life and property did not seem at all efficient. Warnings that trouble impended had been received, and were credited sufficiently to justify preparations, yet, in the issue, the insurgents made their way into Twatutia, and robbed and burned to their heart's content. Certainly that is not a record to boast of, nor can there be much doubt that blame attaches to the military. The same view appears to be taken by the Japanese themselves, for we find in the *Fiji Shimpō* an indictment that might almost have been copied from these columns. Nor does the explanation offered by our contemporary—not by way of justification, however—improve the appearance of the situation. It amounts to saying that the Japanese troops were completely out-witted. In the first place, the main body were drawn away to a long distance from the place; then the force subsequently sent to Twatutia's defence was deceived by a feigned attack on the West side, and while it was occupied in repelling that imaginary danger, the insurgents quietly walked in from the east, and had an uninterrupted interval of pillage. Such is the gist of the *Fiji's* account. It is further alleged that a number of resignations will be tendered and accepted in connexion with the affair, and that prospect furnishes to the *Fiji Shimpō* a theme for a leading article, urging upon the Government the absolute necessity of selecting the new officials with far more care than has hitherto been exercised in discharging that duty. That is an old subject of complaint. Everybody appears agreed that the men sent to Formosa have been, for the most part, quite unqualified for the difficult functions awaiting them there. Considering that the administrative tasks to be performed in Formosa were of an exceptionally perplexing character, and that Japan's administrative capacities were to be on trial there in sight of all the world, it is astonishing that the best men the country could furnish were not selected to go there, instead of the worst. But the mistake has been recognised now, we may hope.

CHINESE NOTES.

A subscription for the relief of the famine-stricken folk of Chungking was started some time ago in Shanghai, but it produced a total of 103 Tls. only. There was naturally some perplexity as to the manner of distributing such a pittance among so many thousands of sufferers, but it was finally decided to divide the amount among the four Protestant Missions in the city, to be used for relief purposes at their discretion.

Messrs. Cammell & Co., of Sheffield, have secured the contract for the rails of the Tientsin-Pekin line. Messrs. Carnegie & Co., of Pittsburg, were supposed to have been the successful tenderers, but apparently the Chinese attempted to impose some prohibitive conditions at the eleventh hour. It is thought that very scanty profit can be realized on the contract.

Tientsin is to have water-works. A company has been formed and a prospectus issued. According to present indications, the English settlement alone is to be supplied. The French are looking for artesian wells in their quarters.

A bicyclists' association has been formed in Shanghai. Already 112 members have registered their names, and it is expected that the list will ultimately comprise 200.

Seeds of disturbance are again beginning to be sown in Chéngtu, the scene of the terrible

massacre two years ago. The talk of foreigners' kidnapping children has been revived, and inflammatory posters are displayed, accusing Russia, France, England, America and Japan of wanting to swallow up China, and declaring that the country has been carefully mapped out by foreigners for partition.

The following details have been published about the murder of a young French Priest in Kuangai:—

The murdered missionary after a stay of about four months at the Roman Catholic Bishopric of Kueishen, situated about half-way between Outcheou and Nanning on the West River, left for Loli, by way of Pésé, in company with two Chinese. He arrived safely at Pésé on the 15th of March and wrote to the Bishop that everything was quiet. On the 17th March he sent his card to the Chinese Prefect, giving him notice of his arrival, to which he received no answer. On the 19th the Rev. Mazel started out for Loli, arriving there on the 22nd. About 40 li from Loli he fell in with a number of Chinese who stated that about forty or fifty of their mules had been stolen by robbers, from whom they were flying. On his arrival at Loli he intimated his arrival to the military mandarin. There were frequent indications of the existence in the neighbourhood of a band of marauders, but it was not till 1st of April that the Rev. Mazel observed any cause for alarm. On that day, however, he observed a band of marauders approaching, and immediately took steps to repel any attack. He barricaded the back door, and armed with his gun, took up his position at the front entrance prepared to sell his life dearly. The marauders approached the house, and dividing in two parties, one party proceeding to the back of the house whilst the remainder occupied the priest's attention in front. The party operating in the rear tore down the barricades and burst open the door. The mob then rushed in and shot the missionary down near the front door. His naive interpreter, who stood by him, was also killed. The ruffians then mutilated the bodies of their victims in a dreadful manner.

It is believed that the object of the murder was revenge for the strict rule exercised by the French on the borders of Tongking, as the murderers decamped without interfering with the furniture or effects in the house.

Tientsin has subscribed six thousand taels for the proposed Jubilee Memorial Hospital.

The Hankow correspondent of the *N.-C. Daily News*, writing under date of the 15th instant, says:—

A somewhat more active market has prevailed during the past few days, although transactions, the greater part being in Keeméus, do not total a large amount. In Hankow kinds, more attention has been paid to the Oonfas, which appear to be the best teas in a crop which has been characterised as the worst in a large experience; these teas carry a certain amount of flavour and are strong in cup, but are very wanting in appearance. Oopacks and Oonams are almost entirely neglected as these, generally speaking, are little better than common Congou. In Kiu-kiang kinds, a desultory business has been passing, except for a small spurt in Keeméus; these are certainly very low in price though whether they are cheap or not it is almost impossible to say; quality of later packs shows no improvement, while some of the third packs seem very strong there seems almost an entire absence of flavour. Ningchows in a few instances seem fine but the generality of the teas from this district are so thin that buyers seem afraid to operate to any extent. For London almost no transactions seem to have been recorded.

Settlements are as under
Keeméus.....26,390 1/chs.
Ningchows.....16,108
Hankows.....30,000 " (about)
Of the Keeméus full 16,000 appear destined for Russia.

Out of 15 events at the Pekin Spring Races, 9 were won by Sir Claude MacDonald.

The second billiard match (spot barred) between John Roberts and Peall, under the same conditions as the previous match, has concluded, with the result that Roberts is defeated by 627 points. The match was 24,000 up, Roberts conceding a start of 12,000 to his opponent, the stake being £1,000. Peall won the previous match by 310 points.

JAPANESE POST-BELLUM
FINANCE.

[No. 1.]

NATIONAL finance is always a perplexing subject to persons not officially connected with it, and the difficulty of arriving at any clear understanding is enormously increased in Japan's case by the fact that the accounts are not directly accessible to readers unacquainted with the ideographic script. Thus the average foreigner, if questioned on the subject, is prone to dismiss it as an incomprehensible muddle, or to excuse his own ignorance by avowing a belief that the Japanese themselves do not understand their own accounts, and that no real accuracy is achieved, or even aimed at, in the compilation of the estimates. As to the latter point, it may be of interest to know that the annual Budget, when presented to the Diet, is now accompanied by what is called a "book of details" (*Meisai-sho*), and by a volume bearing the long title of *Kaku Tokubetsu Yotei Keisansho* (detailed account of estimated special expenditures). These are portly tomes. As submitted to the Diet in its recent session, for example, the *Meisai-sho* contained 610 pages, and the *Keisansho*, 441, each page measuring the same, approximately, as a page of the *Encyclopædia Britannica*. Every member of the two Houses received a copy of these books, and thus found himself in possession of 1,051 pages of solid explanations and figures, from which the most minute information was derivable about every item of the national accounts. Another idea entertained by many foreigners is that the Japanese public is supplied with estimates only, and has no means of knowing how far the financial forecast for each year has been verified by facts. That, too, is a misconception, but not without partial justification. It is natural to suppose that when submitting the estimates for, say, the 30th fiscal year, the Minister of Finance should simultaneously submit a statement of the results of the 29th year's working, so that any surplus or deficit could be at once dealt with. But such a course is not possible. The Japanese fiscal year ends on March 31st, and the Government is not competent to open its accounts for the next fiscal year without having previously submitted estimates of them to the Diet, which meets in November or December. On the other hand, the Diet requires time to examine and discuss the estimates. Hence it is considered necessary to introduce the estimates in the Lower House on the first day of the session; that is to say, more than three months before the commencement of the fiscal year to which they relate. Even by observing such timely procedure, it has never yet happened that the estimates reached the Upper House sufficiently early in the session to receive full investigation and discussion at the

latter's hands. Under such circumstances, the settled accounts—*kessan*, as they are called—of each year can not be presented simultaneously with the estimates for the next. Still, it seems not unreasonable to expect that when presenting the estimates for, say, the 30th year, the settled accounts for the 28th year should be available. In practice, however, the compilers of the settled accounts do not attain that standard of celerity. They are a year behind it, so that, when required to consider the estimates for 1897-8, the Diet has no conclusive figures of past experience to guide it later than those of the year 1894-5. But that inconvenience is more apparent than real, for though the settled accounts are not officially laid before the Diet, it has tolerably full knowledge of the financial results of the year immediately preceding. Thus, when the Budget for 1897-8 was handed to the House of Representatives in December 1896, the members knew with some degree of certainty what results had been obtained in the fiscal year ended on the 31st of the preceding March.

It will be interesting, therefore, to present our analysis by comparing the estimates with the actual results during recent years; since we shall then be in a position to determine how far the Finance Minister's forecasts are verified by facts.

Year.	A.			B.		
	Estimated Revenue.	Actual Revenue.		Estimated Expenditures.	Actual Expenditures.	
	Yen.	Yen.		Yen.	Yen.	
24th year (1891-2)	83,462,532	78,887,535		77,012,252	83,555,831	
26th " (1893-4)	88,045,213	89,042,210		81,133,861	81,581,972	
27th " (1894-5)	91,143,138	92,399,683		85,839,521	78,128,641	
28th " (1895-6)	90,194,657	98,201,815		89,180,518	83,241,433	

We have here put down the actual figures for the fiscal year ended March 31st, 1896, for, although they have not yet been embodied in a settled account and submitted to the Diet, they have been compiled by the Cabinet Secretariat, and may be accepted as virtually accurate. Further, we have purposely excluded the year 1892-3 from the table, because the Budget for that year did not pass the Diet, and the Administration having been consequently obliged to work upon the lines of the preceding year in matters of expenditure, no comparison of any value can be established between the estimated and actual outlays. Examining the table, we can not conclude that the figures show very accurate agreement between forecasts and results. The discrepancy in the 24th fiscal year, however, is attributable to the terrible earthquake of 1891, which not only reduced the tax-paying capacity of a considerable section of the nation, but also called for unexpected appropriations of State funds, amounting to several millions. Further, with regard to the 27th year (1894-5), when the actual expenditure fell short of the

estimates by 7½ million *yen*, the explanation is that considerable sums, which would have been included in the ordinary Budgetary outlays under normal circumstances, were charged to the war account. Chief among such sums were the costs of maintaining troops and ships; costs which, in times of peace, would have appeared in the regular Budget, and were actually embodied in the estimates, but had to be ultimately transferred to the war ledger in consequence of the military and naval forces' being engaged in belligerent operations outside the dominions of Japan. The difference of 8 million *yen*, approximately, between the actual revenue and the estimated revenue for the year 1895-6, is due to unexpected increments in the returns from such sources of income as the *Saké* Tax, the Posts and Telegraphs, the Railways, the Customs and so forth. This development will be clearer by-and-by when we come to examine the growth of the revenue under its various headings.

The general tendency of Japan's national accounts is to show a surplus of income at the end of the fiscal year. That being a point of importance in forming a sound idea of the country's financial condition, and also in analysing the annual Budgets, we append figures showing the Revenue and Expenditure during the nine-year period commencing with the fiscal year 1887-8 and ending with the fiscal year 1895-6:—

B.					
REVENUE AND EXPENDITURES DURING 9 YEARS.					
	1887-8.	1888-9.	1889-90.	1890-1.	1891-2.
	Yen.	Yen.	Yen.	Yen.	Yen.
Revenue	86,058,890	86,583,691	92,339,001	85,870,633	78,887,535
Expenditure	79,453,036	81,501,084	79,773,671	81,125,403	83,515,891
Difference	6,605,854	5,379,607	12,565,330	4,745,230	4,663,353
	1892-3.	1893-4.	1894-5.	1895-6.	
	Yen.	Yen.	Yen.	Yen.	
Revenue	81,786,314	89,042,210	92,399,683	98,201,815	
Expenditure	76,734,740	81,581,972	78,128,641	83,241,433	
Difference	5,051,574	7,460,238	14,271,042	14,960,382	
		* Increase.	* Decrease.		

(N.B.—Expenditures on account of special State-Railway Construction, and Revenue derived from the sale of Railway Bonds, since the year 1893-4, are not included in the above Table, being unnecessary for the purpose immediately in view.)

Out of these nine years the national income failed to exceed the outlay once only, namely, in the year 1891-2, when a terrible calamity compelled large and quite exceptional expenditures.

The arithmetical result of the above nine years' working was to leave surpluses aggregating 60,431,065 *yen*, and as the year 1887-8 opened with a surplus of 2,102,184 *yen*, it would seem that the total fund in the Treasury at the commencement of the present fiscal year (April 1st, 1896) was 62,533,249 *yen*. But from that total a sum of 23,430,000 *yen* had been taken for the purposes of the War with China, so that the actual remainder was 39,103,249 *yen*. We shall by-and-by show how that accumulation was disposed of, but for the present it is sufficient to note that, at the commencement of the fiscal year 1896-7, that is to say, at the commencement of the period when the country embarked upon its programme of *post bellum* enterprises,

a sum of over 39 million *yen* was lying in the Treasury.

It will doubtless be thought strange that such accumulations of revenue should have been allowed to grow year by year, and to lie unused in the Treasury's vaults. If no means offered of employing the money profitably, steps to reduce taxation would have been natural under the circumstances. But the fact is that the Government desired to apply the fund partly to purposes of naval increment, and partly to the establishment of an iron foundry, as well as to the inception of other productive enterprises. The Diet, however, could not be induced to endorse the official plans. It did not condemn them on their merits, but its hostility to the Cabinet prevented it from agreeing to anything proposed by the latter. Not until 1893 did the conflict terminate in what may be termed a compromise, the EMPEROR, on the one hand, ordering that ten per cent. of all official salaries should be subscribed to a ship-building fund, and the Diet, on the other, agreeing that the accumulated surplus, or, at any rate, a considerable portion of it, should be devoted to purposes of naval expansion. We shall explain, in due order, the programme thus inaugurated, but need not here pursue the subject farther than to point out that, despite the agreement thus concluded as to the use of the funds held by the Treasury, each year's financial record continued to show a surplus, so that, when the war broke out in 1894, the Government found itself in possession of a considerable fund on which it could draw for immediate needs.

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

For some time past regret has been expressed in many quarters that Japanese scientific men do not take steps to make known to foreigners the results of their investigations in a more thorough manner than is done by the memoirs issued by the Imperial University. As is no doubt known to some of our readers, all the different branches of scientific inquiry have their literary organs, in the pages of which, from month to month, technical subjects are discussed with the minuteness and thoroughness that specialists so much appreciate. These organs usually consist of records of the transactions of societies. There is the *Sugaku butsurigakkai Kiji* (記事) "Transactions of the Mathematics and Physics Society," the *Dobutsugaku Zasshi* "Zoology;" the *Shokubutsugaku Zasshi*, "Botany;" the *Tokyo Jinnrigakkai Zasshi*, "Ethnology;" the *Chishitsugakkai Zasshi*, "Geology" and many others, medicine being specially well represented. The only attempts that have hitherto been made to bring the contents of these magazines to the knowledge of foreigners have consisted of the publication of tables of contents in a European language, or, in some cases, of the devotion of a certain number of pages of a magazine to the discussion in English, French, or German of subjects of importance. To the credit of Japanese Zoologists we are now able to state that an English record of their investigations and discussions will be regularly published every quarter under the title of *Annotations Zoological Japonenses*. It is to be hoped that other learned bodies will follow the lead of the Zoologists. With investigators in their midst

of world-wide fame like Dr. Kitazato and others, the Japanese should do more to render accessible to Occidental men of science the results of their study. We may mention that Dr. Gotō Seitārō is to edit the Volumes of Zoological Transactions. The first number was announced to be issued last month.

In connection with the above, it is pertinent to observe that a scientific magazine of long standing, the *Tōyō-gakuei Zasshi*, is to be remodelled and henceforth promises to report on the progress of science the world over; Professors Nagaoka, Sakurai, Mitsukuri, Ishikawa, Miyoshi and others have agreed to contribute to the revived organ.

The *Waseda Bungaku** publishes a concise account of the subjects that are attracting most interest in contemporary ephemeral literature. First and foremost is the reform of criminals. Many schemes for effecting that object have been discussed by the leading newspapers and by magazines. Next come socialistic topics, followed by the consideration of the best methods of eradicating the numerous superstitious beliefs from the minds of the unenlightened masses. Dr. Inouye Yenyū's 妖怪百物語 *Yokwai hyaku Monogatari* "A hundred wonderful short stories," now being published in the *Asahi Shimbun*, are, according to the *Waseda Bungaku*, creating quite a sensation. The *Kokumin-no-tomo* and the *Kokumin Shimbun* have been devoting space to a number of out-of-the-way topics such as "Tales told by *hanashika* and the character of this class of popular orators," "Yase and secrets connected with them," "the music of common people," "the food of the lower classes," the lives of *benrō*, *jinrikisha* men, beggars and even procurers." The discussion of such subjects being a novelty and the method of treatment being attractive, a large number of readers is assured. The *Hanasei Zasshi* is publishing, under the title of 七八賭博, an account of the method of gambling known as *Chii-ha* (七八) practised in Tōkyō and Yokohama, originally introduced by the Chinese. Count Okuma's famous school has given birth to another magazine, the *Waseda Gakuhō*, the first number of which appeared in March. Printing is cheap in Japan and contributors are paid very little, if at all. Hence all the great schools of the country have their magazines, which are kept supplied with matter by the students and teachers, and in many cases are not read by outsiders. That is not the case, however, with the *Waseda Gakuhō*, for the first number contains articles from the pens of Dr. Hozumi, Mr. Inagaki Manjiro, and other prominent men.

The *Kōko bungaku* is of opinion that Dr. Inouye Tetsujirō's objection to the Chinese style of verses on patriotic grounds savours more of the prejudice and narrow mindedness of a raw student than of the enlightenment of a College professor. "Has not Dr. Inouye borrowed largely from the Chinese in the past? Has he not studied their poetry and written Chinese poems himself? Whence this sudden aversion to Chinese thought and literature? Carried away by the spirit of narrow nationalism prevailing in some circles, Dr. Inouye seems to be incapable of appreciating the merits of the literature of our continental neighbours." But in our (*Japan Mail's*) opinion little importance is to be attached to the utterances of the *Kōko-bungaku* on contemporary writers. It is at present figuring as one of the most vituperative of modern magazines. Glancing through its *saisurōku* (miscellaneous) items—we find that they consist of a series of snarls. We are told that "Japanese scholars are only scholars in name"; that the contributors to the *Teikoku-bungaku* adopt the manner of learned men; that the students of the University have no spirit, that they pervert learning and

* The dotage of a man who, having spent most of his days in Japan, succeeds in writing in German a philosophical treatise that is discussed in some of the best magazines of Germany and France, is a very enviable kind of dotage. That fact Dr. Katō has achieved in his old age.

flatter men of position; that Dr. Suyematsu's address on literature (summarised by us last month) is unscholarly and valueless, and that Dr. Katō Hiroyuki is in his dotage and so on. Spleen, pettiness, and conceit have each contributed their quota to the youthful utterances printed in the pages of the *Kōko-bungaku*.

The *Tōyōetsugaku* thinks that it is time that the 100-essay craze was checked. Mr. Fukuzawa's imitators are now so numerous that the reading public is fairly satiated. We are reminded, says this organ, of the notice seen on the road side when oranges are cheap, *hitoyama hyakumon*, "a pile for a hundred cash," by the piles of short essays that now glut the literary market. Writing on the subject of inserting illustrations in magazines, the *Tōyōetsugaku* observes that there is no house that can compete with the Hakubun Kwan in the production of first class pictures suitable for books, and hence that the illustrations published by the *Taiyō* are a happy contrast to the daubs with which so many other publishers are satisfied. The magazine we are quoting does not see the object of inserting illustrations in learned magazines. The idea that their sale will be increased by the presence of a few badly drawn and worse printed pictures is ridiculous. Learned readers take no notice of such things and the non-learned can obtain in the picture line better worth for their money elsewhere.

Both the Doctors Inouye contribute learned articles to the *Tōyōetsugaku*. In addition to these, Mr. Hirota Ichijō discusses the question of whether 列子 Siet-tsz, the Chinese philosopher, referred to Shaka Muni when he used the term 西方. Dr. Shimada Chōrei contributes a paper on the remarks of Confucius respecting the sun, and Mr. Matsumoto Aichō, a well written article on the warriors of old Japan, of which we give a short epitome. From very ancient times there existed in Japan a class of men who deemed it the highest of all honours to die for their lords. One of the famous sayings of these warriors used to be:—"It matters little whether one dies fighting at sea and the corpse finds a watery grave, or fighting on land and one's bones moulder beneath the mountain sod, so long as one dies by the side of one's lord, so long as life is not thrown away in an unworthy manner." And again, "However many the arrows that strike the forehead, take care that none ever reach the back." Under the Fujiwara rule [about A.D. 800-1100] the military class found it necessary to become owners of land in order to obtain power. They settled themselves in various parts of the country and to them was applied the term 住人 *jūnin* (residents) to distinguish them from ordinary peasants. The thrifty among them rose to power, and the titles, 大名 *daimyō*, 高家 *kōke*, 小名 *shōmyō*, and 家老 *kāro* gradually come into use as indications of the relative importance of the land-owning warriors of that age. All the male members of the households of these men were regularly drilled and rendered proficient in the art of war.* The members of each household formed a small body of troops, which were commanded by the head of the house. The titles applied to the rank and file were *ivenoko*, (sons of the house), 郎黨 *rōdō*, or 家人 *kenin*. The feeling of regard for each other between master and servants was most ardent. Among these ancient warriors there sprang up a code of honour and a disregard for life—apart from what they conceived to be its chief object—which has elicited the admiration of all students of ancient history. Although the exact date of the origin of the method of suicide known as *seppuku* or *hara-kiri* is not known, Minamoto Tametomo (A.D. 1177) is generally considered to be one of the first who adopted the practice. The training of the warriors of those days was somewhat severe, judged from a modern standpoint.

* So important were archery and horsemanship considered by these warriors that *bushi no iye* and 弓馬 *kōba-no iye* (bow and horses) became synonymous terms.

From very early youth they were taught to ride and shoot with bow and arrow, and their courage was tested in contests with wild boars, bears, and other animals, so that the ancient *samurai* grew up deeply imbued with the notion that the true warrior need fear no foe, however formidable. To conquer or to perish in the attempt was equally honourable, and with most of the soldiers of those days there was not a pin to choose between them. The subject is, we observe, to be continued in the next issue of the *Tōyōetsugaku*.

According to the *Sekai-no-Nihon*, the beginning of the present year has been marked by a great dearth of new works of fiction. The Hakubun-kwan, says this organ, burnt their fingers last year over novels, which they purchased at high prices. They are now overstocked and refuse to go on publishing. The consequence is that a number of men who have hitherto been living by their pens are confronted with gloomy prospects. Several changes in the literary world are noted by the *Sekai-no-Nihon*. One is the diminution in the number of reviews of books, and that species of criticism known as 合評 *Gappō*, noticed by us at some length in a former summary. The *Seinenbun*, one of the magazines which has made a specialty of this class of writing, hitherto a monthly periodical, is henceforth only to appear as a quarterly. Articles on current literature (時文 *Jibun*) have also decreased considerably. Another new feature to be noted is the part that interviewing is playing in furnishing material to newspapers and magazines alike.

Mr. Owada Kenju, the compiler of the *Nihon-daijiten*, noticed by us some months ago, is about to publish a dictionary to be called *Nihon-shōjiten*, which is to cover 1,900 pages, and up to May 31st may be obtained from the Hakubun-kan at 60 sen. The *Daijiten* is 1,798 pages in length, shorter than the present work, if the pages are the same size, which, however, judging, by the title of the later work, is not likely to be the case.

The magazine from which the above is taken doubts the real utility of the numerous periodicals called into existence for the sake of reviving the study of Chinese. There are the *Shinabungaku*; the *Shinagaku*; the 東亞說林 *Tō-a-Setsurin* and the 東亞學會 *Tō-a-Gak-kai-Zasshi*; the 陽明學 *Yōmeigaku* (a magazine that discusses the philosophy of Wang Yang-ming, who died A.D. 1529); the 朱子學 (Study of Chu-tsz), died A.D. 1200. There is nothing new about the method of treating old philosophical systems pursued by these new literary organs, and hence their *raison d'être* is by no means apparent. Were Western scientific methods of study and research made use of in writing the history of Chinese thought, and were a careful comparison of Occidental and Oriental ideas drawn out, the case would be different. But nothing of this kind is attempted, says the *Tōyōetsugaku*, by the authors of Chinese renaissance to whom we refer.

Questions of considerable interest have been addressed by the *Sekai-no-Nihon* to its readers. They are as follow:—(1) What books exercised most influence on your mind when young in assisting you to form a purpose in life? (2) What books affected you most in after life? (3) What books possess a constant charm for you whenever read? More than seventy persons have replied to these questions. Their answers and their reasons for the opinions they hold form an interesting chapter of psychological history. Owing to pressure of matter we have only space for a very brief summary of the inquiry. We may revert to the subject on a future occasion. In reply to question 1, the *Analekts* of Confucius stands at the head of the list; next comes Mr. Nakamura Keiū's *Saikoku-rishshihen* (Smile's Self-Help), then the works of Mencius and Chwangsz (莊子), and the record of the deeds of China's greatest heroes, the 諸葛遺言

Seikeni-gen. As it is impossible to give a complete list of answers, we select a few of the more striking ones. Mr. Shaku Sōyen, the eminent Buddhist, replies to Question 3:—The books that to me have a lasting charm are *jōruri* (musical dramas), *uta* (operatic songs), *chōbōkure* (songs sung by travelling musicians), *dangi* (sermons or lectures on religion), and *dodoitsu* (popular songs). Though from one point of view this class of literature ranks low, it has a flavour that is not surpassed by any thing in the language. Captain Kimotsuki Kaneyuki, in reply to the first question, writes:—“Surrounded as we are by the ocean and endowed with mathematical faculties, the books which furnish the most suitable material for the guidance of youth in search of a great purpose in life are the lives of the Taikō, Date Masamune, Yamada Nagamasa (of Siamese fame), Tokubei (of Indian fame), Sukeyaemon (of Luxon), and the like. The deeds and sayings of these men collected and subjected to a process of distillation will be found to produce an essence full of life-giving power to those who partake of it.” Mr. Otagawa Toyojiro, replies: Adam Smith's “Wealth of Nations;” to No. 2, Mill's “Political Economy;” and to No. 3, Works on Money and Banking. Mr. Tanabe Taichi says that he is not sufficiently brazen-faced to send an answer to the questions propounded. Mr. Uchimura Kanzo, like many other modern scholars with whom we are acquainted, observes that, in the matter of fiction, he only reads foreign novels, that he never opens a Japanese work of romance. There we must leave this interesting subject.

A translation of a course of lectures on Philosophy, delivered at the Imperial University by Professor Koeber, has been published under the title of 哲學要領 *Tetsugaku-yōryō*. The translator is Mr. Shimoda Jirō and the publishers are the Bungaku Shobō, Haruki-chō, Hongō, Tōkyō.

In imitation of Morley's “English Men of Letters” and other books of the kind, Messrs. Shiwoi, Omachi and Takeshima have in hand a work to be called the 國文學大綱 *Kokubungaku-tai kō*, which will give a full account of 12 representative Japanese writers, beginning with Keichū Ajari. Special attention will be given to the literary characteristics of the ages in which the various writers lived. The work will be published in installments, commencing this month and extending to September, 1898. The price per vol. is to be 20 sen. The Dainihon Zusho Kwaisha, Ginza, Ichōme, are the publishers.

The *Teikoku-bungaku*, commenting on the collapse among a large class of modern scribblers, which has been specially noticeable during the last few months, says that this was bound to come. Swarms of young writers have embarked in an enterprise for which they were in no sense properly equipped. In the matter of knowledge and mental power they are painfully deficient; hence their failure. The *Meiji-hyōron* and the *Waseda Bungaku* both call attention to the same matter, and express the opinion that the literary world is to be congratulated on the change. With fewer writers and more thorough treatment of subjects discussed, magazines will be better worth the perusal of subscribers.

The *Teikoku Bungaku* discusses the whole subject of modern versification very earnestly. Taking for text a new poem called *Hinuma-yama-no-uta*, from the pen of Dr. Inouye Tetsujirō, Mr. Omachi Keigetsu, in an article, the first of a series extending over sixteen pages, entitled “Archaisms and Colloquialisms in Poetry,” argues that there is little merit in the style which Dr. Inouye is labouring so zealously to establish. Mr. Omachi quotes largely from Western poetry to show that the very idea of poetry as distinct from prose includes the observance of certain fixed rules as to form. Hence, if the advocates of the new-style verses claim to be ranked as poets they are bound to

conform to the canons established in this country. There is no denying that the essential difference between thought expressed in poetry and thought expressed in prose is one of form. Precisely the same thoughts are in the West constantly expressed in both ways. Hence the attempt of Dr. Inouye and others to render popular a style that is neither poetry nor prose ought to be resented by scholars as calculated to introduce confusion and as offering no particular advantages. Modern prose proves equal to the task of expressing any kind of thought that Japanese desire to express. Hence what is the use of wasting time and energy over the attempt to elaborate a species of writing that is distinctly hybrid and that perpetuates the weaknesses rather than combines the merits of both its parents. This in a few words is the line that is taken by Mr. Omachi and his fellow-thinkers and we entirely agree with these writers. When asked whether they claim to be poets, Professor Toyama, Dr. Inouye and their *confères* say, no. They have been earnest students of Western thought and are anxious to transmit Western ideas to Eastern minds. Is not modern Japanese prose the quickest and safest medium to which to resort? If eminent men in Europe whose minds are permeated with poetical ideas find abundant scope in the pages of a modern novel for the expression of the subtlest and most fanciful of their notions, surely solid, practical, academic Japanese of the type of Professor Toyama and Dr. Inouye need not attempt to create a new style of verse wherewith to convey the stern logic of facts, with whose statement and explanation their lives and work are chiefly concerned.

In the pages of the same magazine a writer advocates the translation of Western poetry to a greater extent than has hitherto been attempted. This writer is of opinion that a beginning should be made with Wordsworth, Shelley, Heine, Victor Hugo, and the like, and that the master poets should be left to a later date. Persons who are anxious to introduce to Japanese readers the finest Western thought would spend their time to greater advantage in translation of work of this kind than in the production of the literary eccentricities known as New-Style verses.

We read in the *Shigaku Zasshi* (Historical Magazine), that Mr. Murakami Nawojirō, a post-graduate* of the Imperial University, has been engaged in historical investigation in Formosa. He left the capital for that purpose in October last and returned in March. Before crossing to Formosa Mr. Murakami made a collection of works bearing on Japan's connection with Formosa in ancient times, at Nagasaki, Hirato and Omura. In Formosa he succeeded in obtaining some interesting manuscripts bearing on the relations of the Dutch and the Chinese in Formosa, one of these being a Deed of Loan, drawn up in Dutch and Chinese, mortgaging certain lots of land in the Dutch settlement to Chinese as security for money lent by the latter. One interesting fact, alluded to by Mr. Murakami, is the use of the Dutch alphabet for writing the native dialect for some time after the departure of the Dutch from the island. Mr. Murakami purposes publishing the 30 odd manuscripts that he obtained and distributing them among scholars who are making a study of Formosa. On his way home Mr. Murakami visited Amoy, Foochow, Hongkong, Macao, Canton and Shanghai, continuing his investigations at each place.

We observe that a historical magazine to be called the *Dai Nihon Bukkyō shi* is to take the place of the defunct 佛教史林 *Bukkyō Shirin*. Mr. Murakami Senjō and others have expended a good deal of labour on this effort, and the first number of the new organ was to appear at the beginning of this month and to cover 700

* Post-graduates are allowed to study at the University free of charge for five years. Many of the teachers now serving in High Class Schools have availed themselves of this privilege.

pages. It is reported that the history to be published will be the most exhaustive that has ever appeared in Japan.

At a meeting of the Tōkyō-Chigaku-Kyōkai (Geographical Society), held on March 23rd, Mr. Satō Denzō read an interesting paper entitled *Taiko no Musashi no*. "The plain of Musashi in very ancient times." It is generally supposed, says Mr. Satō, that prior to the erection of a Castle on the site of the present Imperial Palace by Ota Dōkwan, the plain of Musashi was nothing more than a swamp covered with wild growth, but that is a mistake. Numerous evidences exist to show that from very ancient times this plain was thickly populated by a race of men who were neither Japanese nor Aino, but who may have been Esquimaux. In confirmation of this theory, Mr. Satō exhibited to his audience a collection of antique objects.

With a view to contributing something towards the preservation of Japan's great sights and scenes from the ravages of vandalism, a magazine has been started called the *名勝雑誌 Meishōzasshi*. The first number contains articles from the pens of Messrs. Kurita Kwan, Naitō Chisō, Konakamura Yoshinori, and others, showing the part that natural scenery and monuments of art must ever play in the education of a people, and urging the necessity of making a stand against that ever growing body of men who are ready to sacrifice everything to their love of pecuniary gain.

To us it seems, says the *Kyōiku-jiron*, that the recent school disturbances are an imitation of the procedure of members of the Diet. The careless and irresponsible agitation going on among political parties has affected the great educational establishments of the country, where we find teachers divided against the Director, against each other, or against the students; and where the students, like the members of the Diet, while ignoring all personal responsibility, do nothing but call attention to what they conceive the weakness of their superiors. The cure of this evil must be effected outside the school. If they do these things in the green tree, what will be done in the dry? If the men whose years and position in the State call for sobriety, dignity, and public spirit, display little of those qualities, what can be expected of raw students?

In the *Kyōiku-jiron* Colonel Fukushima is represented as saying that the one thing that his extensive journeys have taught him is that the prosperity and happiness of nations depend entirely on the extent to which they are educated, and that the material prosperity of the Chinese, when compared with the state of many other Eastern nations, shows how fortifying was the nature of the teaching of their great sage Confucius, whose precepts furnish a guide to the mass of busy workers that inhabit the great continent. The truth or error of Colonel Fukushima's theory respecting the secret of happiness and prosperity depends entirely on the definition given to these terms.

The Tōkadō, situated in Imagawa-Kōji, Kanda, lately issued a new monthly magazine called the *新著月刊 Shincho-gekkkan*, the object of which is to take note of all new books, plays, and poems and to furnish a review of contemporary literature. Messrs. Mizutani, Ihara, Kosugi, Gorō, and Shimamura are its chief supporters. It is said to be a much higher class organ than the *Bungei Kurabu* (Club). It will aim at procuring advanced copies of books about to be published, which it will bring out in successive numbers of the magazine.

What surprises us very much in our examination of current literature is the limited scope and aim of so many of the existing periodicals. A few scholars become impressed with the necessity of calling public attention to some special subject, and without considering whether that subject is of a character to bear being dis-

cussed for a series of years, and whether already existing organs do not offer ample opportunities for the treatment of all topics of general interest, they determine to start a magazine of their own. The *Kyū-bakufu*, which has just been launched, is a case in point. Its object, as its name implies, is to publish matter bearing on the Tokugawa era. Count Katsu, Viscount Enomoto, and Mr. Otori Keisuke are its chief promoters and Mr. Togawa Zanka is to be its editor.

The *Taiyō*, from month to month, presents to its readers a goodly array of articles. Among contributors to its pages are to be seen the names of many of the best modern writers. The number before us, besides discussions on such subjects as "Shaka Muni's family history," "the Moon in lyrical poetry," "the improvement of theatrical performances," the philosophy of 荀子 *Xunzi* and the like, contains some very timely remarks on the dearth of really good translations of foreign works. The writer despairs of anything great being effected in this line without Government aid. The sale of learned works in Japan is not sufficiently large to pay the translators and the publishers of the bulky volumes that crowd the shelves of Western scholars. And yet the need of many of these works is felt every day. The Government already grants money for numerous literary objects and it should be urged to set aside a sum for the purpose of enabling thoroughly efficient translators to give the time and attention required for the production of trustworthy renderings of the written thoughts of the world's great teachers.

The opinion of Mr. Kuroda Kiyoteru, the artist, respecting the want of modern religious pictures in Japan is given in the *Taiyō*. Mr. Kuroda says that among his acquaintances in Japan there is no artist who believes in religion, and hence the production of a painting that shall express vividly religious ideas is out of the question. The whole spirit of the age is unfavourable to the class of art that flourished in Italy so remarkably in the days of Michael Angelo. The article on the improvement of the Japanese stage referred to above is by Mr. Tsubouchi. The gist of what he has to say is that however desirous he and others may be to introduce foreign plays and modes of acting, Japanese audiences are not yet prepared for such a radical change. He therefore thinks that the best way to set to work is to curtail the plays now in use, so as to allow of their being concluded in one performance, and thus make it possible to exhaust in the course of a month the stock of popular ancient drama. That would have the effect of satiating the audiences with Japanese subjects and making them desire a change, and would thus afford a suitable opportunity for the introduction of foreign plays.

The *Shinri*, a religious organ, has in the space devoted to literature, a notice of Dr. Rathgen, formerly of the Imperial University, which may prove of interest to his many friends in Japan. Dr. Rathgen is now a Professor at the Marburg University. Quite recently he published a bulky volume in German on "Japan's National Economy and State Economy" (*Japans Volkswirtschaft und Staatshaushalt*). Last October he delivered an address which was subsequently published, entitled *Die Entstehung des modernen Japan*, in which he dealt with the political and social organisation of the Japan of the pre-Meiji era and sketched the various changes which followed in the wake of the abolition of feudalism. The secret of Japanese progress, according to Dr. Rathgen, is the presence in their midst of a spirit of dogged perseverance, called *makeshi damashii*, and an intense love of their country, which makes them desirous of doing their very utmost to bring her up to the level of the most advanced nations. The tone of Dr. Rathgen's address is that of one who has an intense admiration for the Japanese as a nation and yet shows that the speaker has made a special study of their political and economic system.

STRAW BRAID.

The effect of the Dingley Tariff upon straw braid is referred to *inter alia*, by the Japanese press. Straw braid is not specifically mentioned in the Tariff, but it doubtless belongs to the category of "straw manufactures not specially provided for," and thus becomes liable to a duty of 30 per cent. *ad valorem*. The United States, however, does not offer a particularly favourable market for Japanese straw braid. Out of a total export of 2,234,353 *yen* in 1896, America took only 282,312 *yen*. Even Hongkong stood higher on the list, with purchases aggregating 294,993 *yen*, and Great Britain was incomparably the largest customer, being credited with 1,343,000 *yen*. This manufacture is so remarkably cheap, namely, 40 *sen* per bundle, that an *ad valorem* tax of 30 per cent. is not likely to injure its sale.

MONTHLY CUSTOMS RETURNS.

The following is a summary of the Customs Returns for April, showing the foreign trade of the Empire for the month:—

	1896. SILVER YEN.	1897. SILVER YEN.
Exports	9,744,057.750	11,555,452.430
Imports	13,565,451.010	18,163,524.940
Total exports and imports	23,309,508.760	29,718,977.370
Excess of imports		6,608,072.510
CUSTOMS DUTIES.		
Exports	140,408.274	
Imports		424,884.262
Miscellaneous		18,394.460
Total		583,686.896

TOTAL VALUE OF EXPORTS TO AND IMPORTS FROM VARIOUS FOREIGN COUNTRIES.

Capt. Dundas, R.N., Naval Adviser to the Chinese Government, has begun work by examining the junior officers of the Pei-yang Squadron, past and future, in torpedo science.

TO MISS OR MRS. M. M.

J'ai lu avec intérêt votre spirituelle correspondance à propos du *French fancy dress ball*, par laquelle vous avouez beaucoup de courage et d'impartialité dans vos bienveillants jugements.

Je parie que vous êtes belle et gentille... peut-être blonde? ... Je pense que vous serez assez aimable pour faire bon accueil à une page de mon histoire, qui peut-être va vous concilier avec *one cheek sleeping in a coal-hole*.

Ne m'en voulez pas si j'ai abusé de votre amabilité et croyez que, pour ma part, puisque vous aviez déclaré *I shan't meddle with your male masquerading*, je suis orgueilleux de me trouver parmi les quelques uns que vous avez daigné, comme que ce soit distinguer.

Je serai bien heureux Madame ou Mademoiselle si jamais l'occasion de pouvoir mettre mes hommages à vos pieds se présentera.

H. HAMBOUN.

24-5-97.

Marquis de l'Ecuador.

EXTRAIT DE L'HISTOIRE DE HAMBON-HAMBOUN, MARQUIS DE L'ECUADOR.

Mon père feu le Duc de l'île de San Fernando, qui comme vrai Brésilien était noir, fut en Europe suivant l'exemple de ses ancêtres; là ayant rencontré une jolie demoiselle, blanche naturellement, la prit en mariage et l'emmena à son île bien aimée.

Les premiers mois s'écoulèrent très-gaîment pour le jeune couple Hamboun-hambun, lorsque voilà que la jeune épouse, après avoir déclaré que bientôt elle serait mère, dans le doute si la chair de sa chair serait blanche ou noire, alla consulter l'oracle qui lui répondit:—Ton enfant sera noir ou blanc selon que les premiers rayons de lumière tombés sur lui seront de ce côté ou de l'autre côté de l'équateur.

La pauvre femme qui en bonne patriote voulait avoir un fils blanc, demanda, pria, supplia le Duc pour faire un voyage au pays natal. Il y eût maintes discussions, maintes projets, un tas de difficultés à vaincre, enfin un beau jour on s'embarqua pour l'Europe.

A peine à bord ma mère craignit que c'était trop tard... elle mit toute sa bonne volonté pour me retarder l'heure fatale des premiers rayons de lumière, et il en arriva, que mon premier cri en sortant de ma prison obscure se trouva lancé en l'air juste au moment où l'on passait la ligne.

Voilà pourquoi, selon la prophétie de l'oracle, je me trouve être Hamboun-hambun, voilà pourquoi j'ai reçu le titre de Marquis de l'Ecuador, lieu de ma naissance.

["M.M." will be charmed to find himself mistaken for a handsome, attractive and gold-haired person. He is old, bald-headed and—if he will pardon us for saying so—very ugly.—Ed. J.M.]

NEWS OF THE WEEK.

Bishop Evington, of Nagasaki, and Mrs. Evington, are passengers by the *Empress of Japan* for England.

The steamer *Rion Maru*, plying between Osaka and Baku, struck a sunken rock off Mitajiri, Yamaguchi Prefecture, on the morning of the 20th inst. in a thick fog, and sunk immediately. All the passengers were saved.

Mr. D. Younger, boatsman's mate of the *Empress of Japan*, was found dead, on the 17th instant, beside the No. 1 Dock at Kowloon, Hongkong, where the *Empress* was in dock. An examination showed that his death was caused by heart disease.

A Chinaman named Gensho-yei, residing at No. 130, Settlement, was arrested by the Kagacho police on the 24th and sent to the Saiban-sho, on a charge of having entered No. 130 Settlement on the 22nd instant and stolen some articles of clothing valued at \$6, which he sold to a man at No. 160 for \$2.30.

The annual meeting of the shareholders of the Yokohama Public Hall Association called for Wednesday, May 31st, had to be adjourned

owing to the want of a quorum, the perennial story. It now stands fixed for the 2nd June at 5 p.m. The account shows the receipts for the year to have been \$2,318.48, and a credit balance of \$846.45.

La Croix, a religious paper published in Paris, states that General Primo de Rivera, before leaving for Manila, consulted in Madrid the superiors of the religious orders, and promised them they should have greater power in the Philippine Islands, and that the Government would modify the decrees of 1891, which are considered to be rather liberal.

On the 22nd inst. at about 11 a.m., fire broke out in the Kyobashi Ward Office, Nichome, Tsukiji, Tokyo. Fanned by a strong wind the flames spread rapidly and the temple called the Kenkaden, belonging to the Nishi Hongan-ji Sect, was also destroyed. By desperate efforts the fire-men got the flames under control at 12 p.m., the neighbouring houses being saved.

Monday was observed by most people in Yokohama as a general holiday, in honour of the Queen's Birthday. A liberal supply of bunting was hung out in the Settlement and on the Bluff. A cricket match was played during the day between a naval eleven and the Y.C. & A.C., and in Tokyo, Mr. Gerard Lowther, H.B.M.'s *Chargé d'Affaires*, gave a garden-party at the British Legation. Unfortunately the day was chilly, with drizzling rain at intervals.

Admiral Sir Alexander Buller, K.C.B., and officers were "at home" on the flagship *Centurion* on Tuesday, in honour of the Queen's Birthday. The huge battleship was gaily dressed in flowers, foliage, and bunting, her terrible engines of war looking most peaceful in their bright apparel. Sailors are proverbially delightful hosts, and on Tuesday their reputation was, if possible, further enhanced. The function was in every way a success.

A Kobe paper states that the approximate distribution of the British squadron in Eastern waters on June 22nd will be as follows:—Chefoo and Nagasaki, *Centurion*, *Alacrity*, *Redpole*, *Handy* and *Immortalité*; Yokohama, *Grafton* and *Hart*; Kobe, *Narcissus*; Shanghai, *Daphne*. Hankow, *Algerine* and *Esk*; Foo-chow, *Archer*; Amoy *Plover*; Hongkong, *Victor Emmanuel*, *Undaunted*, *Humber*, *Rattler* and *Phoenix*; Singapore, Penang and Selangor, *Pique*, *Iphigenia* and *Pigmy*.

Mr. Thos. Simpson, sub-editor of the *Japan Gazette*, left by the N.Y.K. steamer *Kanagawa Maru* for England on Thursday. A painstaking, conscientious journalist, with a happy gift of description, Mr. Simpson, during his four years in Japan, has made himself deservedly popular among all with whom he has come in contact. An hour or so before the steamer left Yokohama, his journalistic confrères here took occasion to make him a small present as an expression of their regard and esteem, and several afterwards accompanied him to the *Kanagawa Maru* to bid him *bon voyage*.

Telegrams received regarding the American Customs Tariff, remarks the *Nichi Nichi*, are many and heterogeneous. Some suggest the rejection of the Tariff by the Senate; others confirm the probability of its adoption. Foreign firms therefore are in a state of vacillation. Yet, on the afternoon of the 18th instant, the sales of tea amounted to 169,400 catties. On the following day, 27,100 catties were sold to No. 225, 57,200 catties to No. 211, 32,900 catties to No. 33, 45,900 catties to No. 1, 14,400 catties to No. 178, and 3,500 catties to No. 22, making a total of 181,100 catties.

From vernacular papers we gather that a company to be styled the Commercial Correspondence Co., has obtained the sanction of the authorities and will shortly commence business in Tokyo, branches being subsequently established in the principal centres of business in the provinces. The business of the company is to furnish private and confidential in-

formation to its members, as to the credit, capital, and standing of merchants, dealers and private individuals throughout the country, so as to facilitate fair and honest trade. It will also publish a monthly trade magazine for circulation among members only; and will act as surety for employees of banks, mercantile offices, etc.

A meeting of the committee of the Yokohama Silk Guild, says the *Mainichi*, was to be held on the 21st instant, to issue the following caution to local producers of silk:—The new Coinage System will be enforced from the 1st October this year. Should exchange rates remain at the ratio of one to 32 as specified by Government, no considerable loss may be sustained. But if silver bullion continues to be quoted at 29½ pence per oz. as at present, a loss of some seventy yen on account of exchange on every hundred catties of silk will be sustained by sericulturists. The utmost discretion should, therefore, be exercised in the purchase of cocoons this year.

The storm of Tuesday evening appears to have been especially violent in the outskirts of Tokyo, and several cases of damage from lightning are reported. In Azabu a godown in Morimoto-cho was struck by the electric fluid and considerably damaged. In Ebura-gun lightning struck the Jonan Primary School at Shinagawa and the Koshin temple at Setagaya-mura. In Kitatama-gun a house occupied by Mr. Yamashita at Fuchumachi was struck, two persons being injured and the house destroyed. In Minamitama-gun the lightning struck a tea-house at Takatsuki-daki and two of the inmates were slightly injured. At Yokosuka the glass roofs of several photographers' studios were broken by the hail.

Considerable excitement was occasioned among the Japanese in Hawaii when the landing of the last batch of labourers was refused by the Hawaiian authorities, but order and tranquillity are now perfectly restored. The *Yiji* remarks that no theft has ever yet occurred in the island, presumably on account of the difficulty of disposing of stolen goods. Even the poorest people never cause trouble to the police by the theft of clothes or other articles, so common in other parts of the world. Pilfering food is the only exception to this rule of honesty. The climate of Hawaii being almost the same throughout the year, no changes of clothing are necessary, and perhaps for that reason the pawn-broker has not yet found his way there. The Japanese commercial firms in Honolulu now number about thirty.

Information from the Governor General's Office in Formosa, as published in the *Mainichi Shinbun*, announces that an attack of the natives upon Taipei was expected on the 14th inst., but that nothing of the kind actually occurred. According to the statements of prisoners captured in the *Imeule* on the 8th, the number of insurgents exceeded a thousand. Investigations show that the insurgents killed in the district between Taipei and Kik-Kow numbered more than two hundred. Drastic steps are now being taken to extirpate them. The artillery-men and sappers in the vicinity of Beiron have been released from the service of quelling the insurrection, and returned to Taipei on the 13th instant. The districts under the control of the 2nd Mixed Brigade are now in a state of perfect tranquillity, a little disquietude being noticeable only in the neighbouring district of Ungsan, under the 3rd Brigade.

A meeting of the organising committee of the Japan Industrial Bank, says the *Shogyo Shimpo*, was held on the 18th instant, and after much deliberation the following decisions were arrived at:—As the number of shares applied for has reached 730,000, against an issue fixed by the Bank of 50,000, or 14.6 times the required amount, while the number of applicants totalled a little over 8,000, the rate of proportional division is fixed at 14.6, one share being apportioned to every 14.6 applications. Divided among eight thousand applicants in this proportion, the amount leaves a

fraction of some 3,700 shares, which are to be distributed among the shareholders by lot. Subscribers below 14.6 shares are therefore entitled to one share only even if the lots fall to them, while those who have applied for shares at different times will be allowed to obtain the full proportion of the entire amount applied for. The number of shareholders having been thus determined, the sum of fifty yen is to be retained for each share from the security deposits as a first installment of call, and the remainder of the security money will be returned to subscribers about the 25th or 26th instant.

The Tokyo Chamber of Commerce, at a special meeting held on the 18th instant, resolved to forward the following representation to the Ministers of Foreign Affairs and of Agriculture and Commerce with regard to the proposed alteration of the customs tariff in America:—"America abounds in persons of perfect enlightenment, and we are inclined to believe that the proposed tariff will by no means be passed by Congress. Yet as the proposed changes would entail no small loss upon our foreign trade, we consider it advisable that our Government should, in view of the friendly relations existing between the two countries, use every means of warning America from adopting the tariff now under discussion. If the United States insists upon levying heavy duties upon our exports, in violation of the good relations hitherto maintained, we too shall have recourse to equally high taxation in retaliation, as well as for self-protection. It is to be hoped that the Government will not hesitate to make its resolution plain on this point."

A large number of foreign residents, as well as officers from the German men-of-war in harbour, and Japanese, followed the hearse which bore the remains of the late Mr. C. Randewig to their last resting place in the cemetery at Ono, Kobe, on Thursday afternoon. The bands of the German men-of-war in harbour played processional hymns, and the intervals were filled with the solemn sounds of the muffled drum. At the grave-side, says the *Chronicle*, the Rev. Mr. Müller, the lately arrived chaplain of the German squadron, conducted the funeral service. The pall-bearers were Messrs. Himbeck, Krause, Oldenburg, Petersen, Ramseger, Roepfer, Schlüter and Schütze. A large number of wreaths and flower-stands gave evidence of the wide circle of friends the deceased possessed. His genial disposition made him a favourite in any company, and his friends deeply sympathise with the parents and relations at home, to whom the news of his untimely death will come as a great grief.

The *Nagasaki Shipping List* of May 22nd says:—"The *Sakata Maru* arrived here from Vladivostok on the 20th inst., about the same time as did the *Yechigo Maru* from Shanghai. The latter steamship had been undergoing repairs rendered necessary by her impaling herself on the ram of H.M.S. *Narcissus* in Chemulpo some months ago; the *Sakata* had just succeeded in ramming the Russian gunboat *Bobre* at Fusan on her homeward trip. The collision occurred on the night of the 18th inst., and it is alleged by some on the Japanese vessel that the gunboat, which was lying at anchor, carried no light. We will be excused for doubting the latter alleged fact's being possible on a Russian man-of-war. However that may be, we understand that the *Sakata Maru*, which has proceeded to Kobe, has suffered very little damage, while the rammed gunboat has been cut down badly. The night was perfectly clear. The *Bobre* will probably come here to dock for repairs. Captain Molas of the *Bobre* returned in the *Sakata Maru*.

At the Cabinet Council held on the 18th inst. with regard to the Ashio Mine affair, a decision was arrived at that the following order should be issued to the proprietor of the mine:—(1.) The water used in separating the ore and that which flows from places where mineral substances are gathered, shall be directed into a reservoir to be constructed for the reception of the sediment. (2.) The reservoir shall be constructed on a plan

specified by the Minister of Agriculture and Commerce. (3.) Pebbles and ore dust shall be carried away into the swamps or valleys having no connection with the river. (4.) The chimneys of the works shall be constructed as specified by the Minister of Agriculture and Commerce. (5.) The barren hills shall be replanted and the cutting of trees in the forests restricted. Boundary lines against the outbreak of fire shall be established for a distance of twelve *ri*, as an effectual means of protection of all the forests in the vicinity. With reference to the above rules, schemes are also in contemplation to undertake the work of preventing sandstorms, under the superintendence of the Home Department, and to secure exemption from taxation to those who have suffered from the poisoning.

The finding of the *Yikang* Court of Inquiry that sat at Nagasaki, is as follows:—

1.—That the master navigated his vessel in a seamanlike and proper manner, that the course set from Oro-no-shima was a safe and proper one until 9 p.m. and that Wilson Island was properly regarded as a final point of departure.

2.—That the master, having from previous experience perfect confidence in the skill and care of the first mate, having a clear run of about nineteen miles, before getting into a margin of danger, the ship's speed being nine miles, and the weather being clear, was justified in leaving the deck at the time he did with verbal orders only.

3.—That even admitting that the mate did not receive orders from the master to call him at 9 o'clock, he, as an experienced seaman, was not justified in continuing his course after the estimated time at which Wilson Island should have been abeam, and that especially in view of the increasing thickness of the weather he committed a serious error in not under any circumstances calling the master when he failed to sight Wilson Island. While this error has unfortunately been attended with grave consequences, it is in itself not of such a nature as to impose on the Court the duty of dealing with the certificate of an officer who has heretofore shown himself able, painstaking and worthy of all confidence.

4.—That the compasses having been verified on the day preceding the casualty and the ship having on the day it left made a perfectly straight course from Tsushima to Oro-no-shima, the Court cannot consider the casualty due to any unknown error in the compasses but ascribes it to an unusual drift current setting to the Southward which carried the vessel about three and a half miles out of her course after passing Oro-no-shima.

5.—That the Court desires to direct the attention of the Board of Trade to the valuable assistance, described in the master's evidence, rendered by the Japanese on the spot after the casualty.

The battleship which is to be laid down in France under the extraordinary programme will be one of the longest in the world, as between perpendiculars she will measure 400ft., against the *Majestic's* and *Canopus's* 390ft. She will thus be of the same length as the two huge Italian battleships *Italia* and *Lepante*. Her beam is to be only 65ft., which gives her the lines of a cruiser. The battery will consist of four 12.8-in. guns placed in turrets and eight 6.3-in. quick-firers, besides thirty-two smaller guns and four torpedo tubes, of which two are submerged. The engines will be of 15,500 horse-power, propelling the ship at the speed of 18 knots. The screws will be three in number as in the *Massena*, *Bowet*, and *Charlemagne* class. The most noteworthy point about the design—apart from the lines—is the recurrence to heavier guns. The *Charlemagne* class have 12in. weapons, and the *Henri IV.* 10.8-in., with a secondary battery in either case of 5.5in. quick-firers. But in the new ship the calibre of both the main and the auxiliary armament has been raised—probably to meet the improvements in armour. A similar tendency has been observed in the new battleships of the United States.

The schemes contemplated for the military organization of native Formosans under the supervision of the Formosan Administrative Office, will shortly be sanctioned by Imperial Ordinance. The principal points are as follows:—(1.) The enlistment of natives for military organization shall be enforced from the 1st July of this year. (2.) The troops so raised are to be formed into six battalions within three years. This year, however, only 640 men will be enlisted, for the sake of economy in expenditure and other reasons. (3.) Six companies are to be organised next year on a war footing. The expenditure for this year is to be defrayed out of the remainder of the special war expenses. (4.) The term of service will be four years, and the pay eight yen per *ensem*. Clothing will, of course, be provided by Government, but board is to be paid by each soldier out of his pay at

the rate of two yen a month. The remuneration is based on the current price of labour. (5.) The troops will be subjected to the Japanese system of discipline, but as they can not be persuaded to discard their Chinese dress and queue, they are to be granted liberty to enjoy these privileges. (6.) The Formosan native troops will eventually be placed under the control of the Army Department, but until the completion of the system will be under the Governor-General.

The Cabinet, the *Tokyo Shimbun* remarks, has resolved to alter the official organization of the Department of Agriculture and Commerce, and has submitted a scheme of alteration for Imperial sanction. The prominent changes are the establishment of two Bureaux of Engineering and Marine Products, under Superintendents of *Chokunin* grade; of six main divisions of forests, in connection with the control of privately owned forests, for the enforcement of the Forest Law; and an increase of ordinary Secretaries and Councillors in view of the expansion of agricultural, commercial, and industrial enterprises connected with *post bellum* undertakings. The engineering staff is also to be altered and governed by the Civil Service regulations; and radical changes are to be made in the departmental organization.

Professor Milne keeps himself busy with the science that he has made his own. His latest is an appeal, through the columns of *The Times*, to show the importance of establishing seismographs round many of our oceans, partly for determining when cables have been destroyed by seismic action, and partly for the purpose of localising submarine *foci*, to be avoided when cables are being laid. This affects not only the cable engineer, but the public also. Very many cable interruptions are apparently due to submarine landslides, and there are strong reasons for believing that in many instances these are brought about by the shaking and dislocation caused by submarine earthquakes. The importance—especially for Colonies whose only material connection with the mother country is a strand of wires—of being able to attribute the breaking of these to its proper cause, is a matter deserving consideration. The Australian Colonies have twice been isolated from the remainder of the world by the sudden failure of their cables. Subsequently it was learned that the ruptures were the result of submarine seismic or volcanic action—a fact which in all probability would have been known at once had those Colonies been provided with instruments capable of recording unfelt earthquakes.

Treaty revision, which hitherto made steady progress, seems, the *Chyu-shi Shimbun* notes, "to have encountered serious obstacles owing to Austria-Hungary's pertinacity in demanding all manner of concessions. This singular action on the part of Austria-Hungary is supposed to have originated from suggestions made by Germany. Germany, it appears, is not satisfied with the greater advantages, secured to her in the new treaty, than England enjoys, and has attempted to obtain still further privileges from Japan through negotiation with the Austrian Government. The prospect formerly entertained by the Japanese authorities of the enforcement of the revised Tariff from January next year has now ended in smoke, and no definite time for putting it into operation can be fixed." It seems scarcely necessary to point out that the idea of Germany's exerting such influence upon Austria-Hungary, or of Austria-Hungary's submitting to it, is wholly untenable. Great Powers do not make cat's-paws of each other or consent to be made cat's-paws of. There are other reasons for the delay. We may further observe that Austria-Hungary's capacity to block the way is limited. She has no interests in Japan that constitute a special claim on the latter's patience, and if she can not be satisfied with conditions that have satisfied States having really large interests, a very simple method of resolving the difficulty may be adopted at any moment. That alternative would somewhat mar the fair record of the Treaty Revision negotiations, but considerations very much weightier than sentiment call for recognition.

CORRESPONDENCE.

TRUTH!

TO THE EDITOR OF THE "JAPAN MAIL."

DEAR SIR,—*The Month*, a new American Literary Review, called attention to this astonishing Japanese item from the *New York Evening Post*. Some readers of the *Mail* may not have seen it, so I send it to you.

"Wild dogs, as dangerous as wolves, have lately been very abundant in those parts of Japan that were destroyed by the tidal wave of June 15. They killed several country postmen, until these officials were supplied with trumpets, of which these animals are afraid."

So in those parts of Japan which do not exist, having been destroyed by a tidal wave, dead postmen come to life again when supplied with trumpets!

Very truly yours,

HENRY B. SCHWARTZ.

Hiroshima, May 17th, 1897.

PRINCE GEORGE OF GREECE.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In the *Japan Weekly Mail* of May 1st, is a paragraph concerning Prince George of Greece and the Otsu affair denying that the Prince had "anything to do with protecting his Imperial companion." May I ask whether any official account of the affair was ever published. Those of us who were in Japan at the time will remember that it was then difficult to learn any particulars concerning the matter. In the American edition of the *Review of Reviews* for June, 1896, appeared the following extract from a letter of Prince George to his father, "which was published in the semi-official Danish paper:—

"We passed through a narrow street, decorated with flags and filled with crowds of people on both sides of the thoroughfare. I was looking toward the left, when I suddenly heard something like a shriek in front of me, and saw a policeman hitting Nicky a blow on the head with his sword, which he held with both hands. Nicky jumped out of the cart and the man ran after him. Nicky with the blood streaming down his face. When I saw this, I, too, jumped out, with my stick in my hand, and ran after the man, who was about fifteen paces in front of me. Nicky ran into a shop, but came out again immediately, which enabled the man to overtake him; but I thank God I was there in the same moment, and while the policeman still had his sword high in the air, I gave him a blow so hard that he has probably never experienced a similar one before. He now turned against me, but I fainted and fell to the ground; then two of our *finrikisha* pullers appeared on the scene; one got hold of his legs, while the other took up the sword, which he had dropped in falling, and gave him a wound in the back of his head. It is God who placed me there in that moment and who gave me the strength to deal that blow, for had I been a little later the policeman had perhaps cut off Nicky's head, and had my blow missed the assailant's head he would have cut off mine. The whole thing came so quickly that the others who were behind us had seen nothing of the whole affair. Nicky sat down. Dr. Plambach bandaged up the wound as well as he could, and we drove him then, escorted by soldiers, who had in the mean time been called, to the Governor's house. A firmer bandage was put on and we remained in the house about an hour and a half. I must say that I admired Nicky's pluck; he did not faint a single time, nor did he lose his good spirits for a moment, and yet he had two large wounds in the head above the ear. The one wound was five centimetres long, the other six, and both had penetrated to the skull, but luckily, no further."

If the above letter is genuine, we are forced to believe either that the Prince deliberately wrote a false account of the affair, or that the account that has generally been accepted in Japan is incorrect. A recent writer in the *Independent* of New York refers to the spread of the story of Prince George as a modern example of "myth-making;" and I think that the *Japan Mail* has several times spoken of it as not worthy of belief. Cannot the facts be learned and made public? If Prince George did protect his companion, he ought not to be robbed of the praise that is his due; if he did not, then it is not sufficient to say, with the paragraph referred to at the commencement of this letter, that "It amounts almost to a disgrace to the Prince that he never made the slightest attempt to disavow the action attributed to him."

Yours truly,

OTIS CARY.

Kyoto, May 17th, 1897.

A CLEVER ADVERTISEMENT.

As an advertisement and a device for promoting one's own business, Mr. Chas. H. Cramp's address to the Senate Committee of the United States on Commerce is remarkably clever. We need scarcely say that Mr. C. H. Cramp belongs to the ship-building firm of Messrs. W. Cramp and Sons. Here is the address:—

We have to deal with real facts and actual conditions. The interests of ship-owning and ship-building are identical, because no nation can successfully own ships that cannot successfully build them.

No nation can either build or own ships when, unprotected and unencouraged, it is brought in competition with other nations that are protected and encouraged.

This is the existing condition of the ship-owning and ship-building interests of the United States.

The resulting fact is that the enormous revenue represented by the freight and passenger tolls on our commerce and travel is constantly drained out of this country into British, German, and French pockets, in the order named, but mainly British; while the vast industrial increment represented by the necessary ship-building inures almost wholly to Great Britain.

For this drain there is no recompense. It is sheer loss. It is the principal cause of our existing financial condition.

So long as this drain continues, no tariff and no monetary policy can restore the national prosperity.

Until we make some provision to keep at home some part at least of the three hundred and odd millions annually sucked out of this country by foreign shipowners and shipbuilders, no other legislation can bring good times back again.

It is a constant stream of gold always flowing out.

The foreign shipowner who carries overseas commerce makes us pay the freight both ways.

For our exports we get the foreign market price, less the freight.

For our imports we pay the foreign market price, plus the freight.

No fine-spun theory of any cloistered or collegiate *doctrinaire* can wipe out these facts.

The fact that so long as the freight is paid to a foreign shipowner, so long will it be a foreign product is fundamental and unanswerable.

The English steamship is a foreign product, and its earnings, which we pay, are a foreign profit.

No sane man will argue that a foreign profit on a foreign product can be a domestic benefit.

Add to this the fact, equally important, that the carrier of commerce controls its exchanges, and the condition of commercial, financial, and industrial subjugation is complete. Such is our condition to-day.

Great Britain has many outlying colonies and dependencies.

The greatest two are India and the United States.

She holds India by force of arms, whereby her control of that country costs her something. She has to pay something for her financial and commercial drainage of India.

She holds the United States by the folly of its own people, whereby her control of this country costs her nothing. She has to pay nothing for her financial and commercial drainage of the United States.

But the amount of her annual drainage of gold from the United States far exceeds that from India.

Therefore, the United States is by far the most valuable of all the dependencies of Great Britain.

In the relation of England to India, there is something pitiable, because India is helpless.

In the relation of the United States to England there is nothing that is not contemptible, because it is the willing servitude of a nation that could help herself if she would.

England is wide awake to these conditions, and keenly appreciates the priceless value to her.

The United States blinks at them, half dazed, half asleep, insensible of their tremendous damage to her.

England, clearly seeing that, in this age more than ever before, ocean empire is world empire, and exhausts her resources to double rivet the fetters which it fastens upon mankind.

Since 1885 England has expended \$517,000,000 for new ships of war and their armament. During eleven years she has built 38 first-class battle ships, 3 second-class battle ships, 9 armoured cruisers, 20 first-class cruisers, 51 second-class cruisers, 33 third-class cruisers, 30 gunboats, 12 composite sloops, and 74 torpedo destroyers, in-

cluding the vessels authorised in the current year's programme.

The aggregate is 270 vessels of 1,136,575 tons total displacement, 1,674,700 horse-power.

Of the navy England already had in 1885 there remain available 42 armoured ships, 34 cruisers, 11 sloops, 19 gunboats, and 95 torpedo boats, which she is re-engining, rearming, and otherwise modernising as rapidly as she can.

In *personnel* afloat she has augmented her force from 52,600 in 1885 to 100,500 in the estimates for 1897.

In other words, England has doubled her navy in *personnel* and material and more than quadrupled it in warlike efficiency during eleven years of the profoundest peace the world ever saw.

Even greater exertions has England put forth in the augmentation of her merchant marine. During the calendar year 1896 she added 1,380,000 tons of new steel shipping to her merchant fleet, breaking up meantime 530,000 tons of old and obsolete shipping which could no longer be operated profitably; a net addition of 500,000 tons to the total of her merchant marine by the register, but a practical addition of the whole 1,380,000 tons, because the 530,000 tons broken up had done its work for her aggrandisement and simply passed through the scrap heap and the mills into the new tonnage.

No great fact can exist without a great reason.

In recent years Germany on a large scale and in a systematic way, and this country on a small scale and in a spasmodic way, have put forth efforts in the direction of sea power.

England instantly takes alarm. To her the growth of any other sea power, even if its scope be comparatively small and its extent comparatively feeble, is a peril second only to the landing of an invading army in Kent.

England is determined that she shall be not only the supreme sea power, but also that except within limits set by herself there shall be no other sea power at all.

She will tolerate the growth of any other sea power only so far as the point at which it begins to effect her naval supremacy or dispute the ocean monopoly of her merchant marine.

The moment any other national aspiration toward sea power reaches that point England must be prepared to crush it.

She will crush it by intrigue, by cajolery, by treaties, if she can. She will crush it by preponderating force if she must.

Ever since two first-class American ships were put in the transatlantic trade under American management, every device of foul play that selfish ingenuity can invent and every resort that unscrupulous rivalry can suggest have been exhausted by the English Press and the English Administration to defame and discredit them.

English officials abroad, from Ministers and Consuls down, industriously reproduce in the newspapers of Japan, China, Chili, Argentine, and Brazil the misstatements of the English Press about American vessels.

The British Post Office delays the American mails for days in the slower ships of the Cunard line rather than send so much as one letter by the American line.

Our Post Office responds by liberal allotments of its European mails to all the British lines.

The result of all this is that while this country has never known such financial distress, England has never known such industrial activity and financial prosperity as now.

Does it not occur to men who look the least bit below the surface that the warfare for ocean empire, and the strife for commanding sea power which England forces upon the rest of mankind have reached a stage so acute that her prosperity unalterably means the misery of everybody else, and that everybody's loss is inevitably her gain?

What is the response of the United States to this tremendous exertion of English energy and resource to the aggrandisement of her sea power?

To the English estimates for the current year for further increase of her navy amounting to eleven millions nine hundred and five thousand pounds sterling (£11,905,000, say \$57,334,500), and a programme involving 108 new ships in all stages between laying down and completion, the United States responds by a sudden halt in even the comparatively feeble programme fitfully pursued since 1885, and a flat collapse of the policy of the new navy as a whole.

To the 1,380,000 tons of new merchant shipping built by England during the year, what will be the response of the United States?

Now the future lies wholly in the hands of Congress.

From that quarter comes no sign.

A tariff bill framed to produce revenue, and at the same time promote and encourage American industries, is to be passed. To a greater or less

extent this tariff is calculated to promote and encourage every American industry but two—ship-owning and shipbuilding.

As I have already said, this ceaseless ebb of gold without compensation is the tribute this country pays to England, and it is paid through English shipowners.

The United States has never been able to get any of it back except by borrowing it on bonds.

England is keenly alive to these great economic facts and their results.

Is the United States to be forever blind to them and their significance?

These are the questions which confront us.

Mr. Cramp has made a striking picture, but it is amusing to observe how completely unconscious he is of the beam in his own eye. He accuses the English press and the English Administration of "resorting to every foul trick that selfish ingenuity and unscrupulous rivalry can suggest to defame and discredit" America's two forlorn transatlantic steamers. Is not that a little funny any how? The English Administration forsooth? Mr. Cramp, for all his carefully marshalled *resumé* of facts, bears a strong resemblance to Gen. La Fayette Kettle, and his talk about "English officials abroad, from Ministers and Consuls down, industriously reproducing in the newspapers of Japan, China, Chihli, Argentine and Brazil, the misstatements of the English Press about American vessels," sounds like a paragraph from the *Waterloost Gazette* read aloud by General Choke. It is really marvelous that an American man of business, addressing a body of his country's legislators, can deliver himself of such blatant nonsense, and that he can descant, at the same time, on "devices of foul play invented by selfish ingenuity" and schemes of "unscrupulous rivalry." There is no penalty now-a-days for lies uttered in an oration: the greater the publicity given to them, the more they are condoned.

ORIGIN OF THE JAPANESE.*

[WRITTEN SPECIALLY FOR THE "JAPAN MAIL,"]

The Turks spread themselves out from Siberia much earlier than the Mongols. Two thousand years ago they occupied the slopes of the Altai mountains and also the grass land immediately on the North of China. In comparing Japanese with the kindred languages on the mainland, there is none more likely to yield fruitful results than the Turkish. Japanese imperial tradition reaches back to B.C. 600. Not long before that period, the Japanese crossing the straits of Korea entered on a struggle with the Ainos, who then, as recent research has shown, occupied Nippon. When the Japanese resided in Korea, a small but progressive race, their neighbours were the Chinese on the East and the Turks on the North-east. On the North there would be Manchus, Mongols, Koreans and Turks. At present we know of no other races which would occupy North-eastern Asia at that time. The Chinese and the Turks in those days had powerful feudal Governments, and the Japanese naturally imitated them in that particular. In regard to languages these races all have a common vocabulary, presenting to the student in grammar and vocabulary the most striking similarities. Farther than this, the grass land races and those farther to the east are all polysyllabic, while the monosyllabic is favoured by settled peoples using the plough in agriculture and living in villages and market towns.

The Japanese then were once nomad and a grass land people. They became agriculturists in Korea and in Nippon. As a race through isolation they grew short in stature. At least the smallness of their country, the lack of mutton, and the impossibility of mixing with other peoples are not unlikely to produce this result.

The Chinese element in the Japanese language is introduced by simple borrowing. Of its extent we may judge by a verse or two from the New Testament. In Matt. 9 at the beginning we read, "and he entered into a ship and passed over, and came into his own city." The Japanese is, *Jesu fune ni nori*, Jesus carried in a boat, *watarite*, passing over, *furusato ni itari kereba*, to his own village came. In this verse there is no borrowed Chinese word. But in the second verse there are three. The English is "and behold they brought to him a man sick of the palsy, lying on a bed; and Jesus seeing their faith said unto the sick of the palsy, son be of good cheer," thy

* *Ghyusurmek* is to carry. Note that a verb with sonant initial has a derivative noun with a surd initial.

sins be forgiven thee." The Japanese is, *chubu nite toko ni fushitaru mono wo hitobito kaki-kitareri*. Chinese is, 中國 *Chungfeng*, "struck with a wind." This is an expression used for *hemiplegia* and describes a bedridden person generally. The only other Chinese word is 信, sin believe; *Jesu karera ga shinsuru wo mite*, Jesus their faith seeing. *Chubu no mono ni ikeru wa* to the paralytic said, *ko yo son kokoro yasukare*, in mind be tranquil, *nanji no tsumi*, thy sins, *yurasareleri*, be forgiven thee. In the Turkish new Testament we have *ol dakhi*, he also, *kayig boat ghirub* enterings, *gechididah kendus hehrina*, to his own city, *sheldi* came.

Turkish, *ol* also, *dakhi* boat, *kayig* enter, *ghir* pass over, *gechididah* his own, *kendu* city, *shehr* for shatar come, *gheldi* came.

The number of identities here is really most remarkable, and they cannot but strike the attention of any ingenious seeker for the facts. *Shehar* is Persian. Just as Japanese is made up of Turkish, Mongol, Manchu and Chinese words of different periods, so it was with the Turkish. It has a large Persian and a large Arabic element. Religion, politics, trade and joint occupation of territory were the cause of the mixture of vocabularies in the Turkish language. Verse I., and behold, *ve ishtel ana* to him *dushkeda yatan*, on a bed lying, *kyuturumliya*, a bedridden person, *ghetirdilar* brought—"Jesus their faith seeing" is expressed by *Issa dakhi anbaring imanighyurab*. The sick of the palsy said, *ghyuturumliya dadika*; son be of good cheer is rendered *ai ugli khatirini ghosh tut*; thy mind cheerful keep, thy sins be forgiven thee, is *ghyun a halarig ening ga fu ulhadi*. *Gafu* is forgiveness, *olmak* is possess.

Turkish,	Japanese,
see <i>shaf</i>	<i>satoru</i> , perceive
bed <i>dushek</i>	<i>toko</i>
lie down <i>yatmak</i>	<i>ataru</i> , fall upon, hit
one <i>bir</i>	<i>hitto</i>
<i>ghetirmek</i> , bring	<i>katsugu</i> , carry
onlar they	<i>ano he</i>
<i>tar</i> , plural	<i>nado</i>
<i>imanin</i> faith	An Arabic word
<i>ghyurmek</i> see	看 <i>kan</i> see
<i>demek</i> say	<i>dajiru</i> 談 <i>tan</i> , dam
<i>ugli</i> son	<i>hodomo</i>
mind <i>khatir</i>	<i>ki</i> 氣
good <i>ghosh</i>	<i>kichi</i> 吉
keep <i>tut</i>	<i>shut</i> , keep
sin <i>ghyuna</i> , Pers.	
<i>you sen</i>	<i>anata</i> you
<i>gefu</i> forgive	Eng. give, in forgive
have <i>olmak</i>	<i>aru</i>

The preceding Turkish words were in use throughout the lands occupied by that race two thousand years ago. There are three or four times as many Turkish words which are identical with Japanese as there are Chinese words borrowed by the Japanese. The Turks place the verb at the end of the sentence just as the Japanese do.

The Turks have seven gerunds, thus *achmak*, to open, has the gerunds *achip*, *acharak*, opening, *achijak*, *achinje*, on opening, *acha* *acha*, by repeatedly opening, *achmighin* by reason of opening, *achalt*, since opening.

The Japanese is *akeru*, to open, the Turks say *achiyorim*, I am opening, *achiyorim* thou art opening, *arkiyor* he is opening. Here *m* is our own *me*, *sin* is our thou and the Japanese *anata*. Imperfect *achiyor idim*, I was opening, *achiyor idinia* you were opening, *achist* *achartim*, I open habitually, or I shall open.

Di inserted as in *achdim*, I opened, makes a past. In Japanese we have *ta* and *da*, as in *hon wo pauda*, have read the book. The conditional is formed by the Turks by adding *sa*. The Japanese add *ba* and the Mongols *besu*. We may conclude then, that Japanese is an independent member of the Tartar fraternity of languages. On the whole it agrees best with Turkish. The reason is that the Turks were very widely spread and politically powerful 2500 years ago when the Japanese were still upon the continent. Indeed, there are points where the identity is so plain that no one will doubt it. The causative in Japanese is *sase* as in *agegayeru*, cause to raise, *misaseru* cause to see. The Turkish causative is *ir* and *dir*, as in *yat-ir-mak* cause to lie down, *ghyurmek* to see, *ghyurmek* to cause to see, to show. The Japanese causative is sometimes *ra* as in *akrame*, make plain, from *aki* to be open. Now *ra*, *sase*, *r*, *ir*, *dir* are modifications of one sound.

Such a Japanese word as *koro*, time, used in *nandoki goro*, what time? may be the Turkish *kerrek* used in *bir kerrek* one time.

Bir, one, is the Japanese *hitto*, one, so I would identify the following words:—

kyar, business work *J. koto* business, thing.
ku, hair *J. ke*.
kuyu, a well *J. ido*, Mongol *huduk*, a well.
kabuk, skin *J. kaba*.
delmek, perforate, *J. skashi*, prick, sting.
kishi, person, man *J. kata* person.
kab, pot *J. kama*.
dukmet, to pour *J. nagameru*.
kisil, red *J. kurenai*.

The reasons for claiming a close relationship between Turkish and Japanese are really very numerous and powerful. Both races are warlike in character and very fond of conquering their neighbours and extending their territory. This habit came from nomadic life in Tartary. There is not one of the Tartar races which has not made large conquests. The possibility of subduing quiet agriculturists comes from nomad modes of living. The Turks conquered north China in the 5th century and kept it 140 years. Then the Mongols conquered all China and kept it for a century. The Manchus did the same and have retained the Government for two centuries and a half. Now the Japanese have taken Formosa but for the counter influence of Russia. The Japanese are shorter in stature than any of the other Tartar races but this has had no effect in stilling those warlike longings which swell in their bosoms, and one of their most dear delights is to find reasons for maintaining that the great Genghis Khan was no other than their own favourite hero Yoshitsune. The argument is a hopeless one, but it suits them to indulge in the belief that Yoshitsune crossed the sea and transcended Cæsar and Alexander in the extent of his conquests.

When then we find that the forms of Turkish grammar, the order of words in the Turkish language and the words themselves suggest ancient kinship with the Japanese, we are safe in holding that consanguinity is established. It is not at all necessary to look upon Japanese archaeology as terminating with Sir Ernest Satow's researches; in fact the inquiry into the primeval mainland life of the Japanese nation is one of extreme interest because they are one of those races which improve with the progress of the ages. What they need now is to insist upon a pure and thorough national morality, to educate their people, the men and women alike, to lead a chaste life, while they acquire by high education and by religious principle, and practice, such love for what is morally good that all foreign visitors in Japan may say of the Japanese that they are as virtuous as they are brave. I am led to make these reflections because philology opens the way for substituting useful conclusions in the room of those events which certainly took place long ago though history's pen has failed to record them. Japan ought to have a professorship of Ural Altaic languages. They form the midway link between Japanese and the languages of Europe. Thus young Japan would learn to recognize the error which pervades the teaching which tends to isolate the Japanese tongue and conceal its truly Asiatic character.

The reasons why the Turks have not risen to a high moral position among nations, while they have done such great things in the path of conquest and war, is their acceptance of the Mahomedan religion. The adoption of Buddhism has delayed the upward movement of the Japanese intellect. Let them choose Christianity and they will be able to purify the social customs of their country. Both the Turks and the Japanese made a mistake in the adoption of their religion. The one was rendered cruel and oppressive by religious intolerance. The other accepted a faith which puts to sleep the moral sense, and prevents a nation from rising to a vigorous ethical ideal.

J. EDKINS.

SOME NOTES FROM PEKING.

(FROM OUR CORRESPONDENT).

Peking, May 3rd, 1897.
Since the departure of Chang Yin-huan to England, there has been an increase of power with Li Hung-chang. He is the daily attendant at the Tsungli Yamen, and is a leading factor in directing the business of that body.

At the last audience of the foreign Ministers with the Emperor there was a little trouble as to the way the Ministers should leave. Col. Denby led one section as usual through a side-door and down the path leading therefrom. The French Minister led another section through the same door but along the path leading to the main door opposite the Throne. On doing this the German Minister was

seized by his arm by one of the Chinese Ministers acting as Master of Ceremonies. This caused a trouble: the German demanded an apology, and the Chinaman finally gave it. A discussion ensued, and the foreign Ministers, with the exception of the American, insisted that hereafter all the Ministers should take the course chosen by the French Representative. The Yamén yielded, and an advance is made as to etiquette.

For some time the British Minister has been away to Korea and the southern ports. He is expected back shortly. Affairs are so quiet that several of the Legations have no full Minister in Peking. A short time since, rather a notable gathering met at the British Legation, when Lady Macdonald opened her parlours for a farewell talk on Mr. Reid's experiences among the mandarins. There were representatives from the British, American, Russian, French, Netherlands, and Belgian Legations, from Protestants, the Church of England, Roman Catholic and Greek Churches. Mr. Reid outlined his explorations and his scheme for an Institute in connection with the Mission among the Higher Classes. His scheme has been officially sanctioned by the Tsung-li Yamén, and he has many tokens of approval and honour from the Chinese and foreigners alike. He now starts out on a campaign for raising money.

The interest taken in railroads, mines, and such things is rather on the increase. Very seldom do we hear anything these years about the superstitious fear of injuring the *fung-shui*. The only fear that still remains is of foreigners controlling these enterprises. An English M.P. has been here for some time, Mr. Pritchard-Morgan, seeking especially an opportunity to direct the mining projects of the whole Empire. He had already been successful in the gold mines of Australia, and knows what he is talking about. He also came at the recommendation of Li Hung-chang. Still nothing has been granted, and he leaves for home.

Loans also have come up for consideration. The Chinese Government is anxious to pay off all the indemnity to Japan, but where to find the best terms is a puzzle. Here is a chance for more complications. The Hongkong and Shanghai Bank, the Chartered Bank of India, the Russian Bank, and others have all pressed forward to enter the open door. The man most heeded was a George Wilson, who was out here a year ago on railroad speculation. He has been working through Dr. Dudgeon, but the latest news is that his scheme has fallen through.

The French Minister is again announced to leave, but we will believe he is going when actually on the sea. Dr. Dudgeon and Sir Robert Hart have also been going for the last five years. Dr. W. A. P. Martin, who was not expected back, has returned, and, what is more, in good health. He received his first help in Japan. He comes back, not to resume the Presidency of the Sung-Wen Kwan, but to do literary work. He takes up his quarters at Mr. Reid's house and takes charge of his work in his absence.

The Austrian Legation has secured a desirable site for a building, and will begin to erect buildings soon.

BASEBALL.

Y. C. AND A. C. VERSUS U.S.S. "PETREL."

The opening baseball match of the present season took place on Tuesday, the nines being selected from the U.S.S. *Petrel's* baseball team and a team from the Y. C. & A. C. The local battery has been considerably strengthened during the past few months by several men who have made more than a local reputation for themselves in the States, and with a little practice they should make a strong combination. Some interesting matches may therefore be anticipated in the near future. Briggs plays a very nice game; Blake is a capital acquisition at all points, especially as pitcher, and Onderdonk strikes out most freely. As will be seen from the score, the Y. C. & A. C. won easily. There was not a very considerable attendance of the general public, Admiral Buller's "at home" undoubtedly attracting a large number of ladies to the *Centurion*.

CRICKET.

OPENING OF THE SEASON.

The opening match of the season of the Y.C. & A.C. was played on Saturday afternoon, the 22nd instant, between teams chosen by Mr. C. M. Duff, Captain of the Club, and Mr. Bugbird. The weather was all that could be desired and the ground in good condition, though matting was used on the pitch to save the turf from injury. Though on paper the constitution of the two sides—which were really scratch teams, as many who had put their names down to play failed to put in an appearance—seemed fairly equal, the game turned out rather one-sided, the "certainties" in Bugbird's team failing to come off, and bad luck attending them throughout the first innings. The Captain's twelve having won the toss, went first to the wicket and succeeded in putting together the very fair total of 172, of which Lient. Farie contributed 64, in a well played not out innings, which included 5 fours, 9 threes, etc. Against this Bugbird's thirteen were only able to knock up a total of 48, and consequently followed on their innings, and when stumps were drawn at 6.15 p.m. had made 43 for the loss of five wickets. The bowling of Kingston and Murray, in Duff's team, was remarkably good for the commencement of the season, six wickets falling to the former and five to the latter. Bugbird's team was weak in bowlers: of six trundlers who were tried in the course of the innings, Shelford and Philip were the most successful. The fielding, as indeed might be expected at the opening of the season, was with a few exceptions—one of which was a smart catch by Bugbird off his own bowling, by which Duff's wicket was taken—very loose, as the extras tell. But a few weeks' practice should remedy this. The following is the full score:—

MR. DUFF'S TEAM.			
Mr. A. Kingston, b. Shelford	30
" D. Tyng, b. Lloyd	16
" H. S. Goddard, b. Shelford	3

Y.C. AND A.C. V. THE NAVY.

The Queen's Birthday match, between the Y. C. & A. C. and the Navy was played yesterday, the 24th instant. The morning was overcast and dull, and before teatime rain commenced to fall and continued intermittently all the afternoon, and though it was not sufficiently heavy to interfere with the play, it had the effect of preventing the ladies from gracing the scene, though during the afternoon the Band of the *Centurion* played an excellent and most enjoyable selection of music, in which the charming and catchy airs of "The Geisha" were conspicuous items. The naval representatives were unavoidably late in turning up and it was twenty minutes to 12 before play commenced, and then several substitutes had to be found to field for the Navy for half an hour or so. A substantial tiffin was provided by Mr. W. N. Wright in the Pavilion at 1 p.m. for the playing members and their guests, at the conclusion of which Mr. Mollison, President of the Club, proposed the toast of the day, the health of Her Majesty Queen Victoria, which was enthusiastically responded to. The Yokohama team was most unfortunate in its first innings, upon which the match had to be decided, but it was hinted that had two or three chances which were offered early in their innings by the Navy been taken, as they should have been, the game might have been saved. With a few exceptions the fielding on both sides left much to be

desired. Messrs. Brian, Dewette, Mollison and Shelford officiated during the day as umpires.

Yokohama won the toss and sent in Bugbird and Kingston to face the bowling of Shelford and Gillett. After Bugbird had made one run Kingston was clean bowled by Shelford on the third ball of the over. One wicket for 1 run. Murray took Kingston's place and in Gillett's first over Bugbird was caught out by Shelford at slip, after scoring a single. Two wickets for 2 runs. Duff then joined Murray, and Shelford and Gillett each put in a maiden over, after which runs came slowly by singles until Duff's wicket was taken by Gillett, when the score stood at 5 only. Three wickets for 5 runs. Crawford next joined Murray. In the eighth over Murray made a 3 off Gillett and with his next ball the same bowler clean bowled Crawford. Nine runs for four wickets. Watson was the next man in and opened with a 3 to leg, Murray adding 2 twos off the two following balls, and then a single. A few more singles and 20 was scored on the telegraph board, directly after which Watson was taken in the slips by Gillett off Shelford, after adding four to the total. Owen joined Murray who off the next over from Gillett made a couple of twos. In Shelford's next over Owen added a two and a single, but was clean bowled by Gillett immediately afterwards. Six wickets for 27. Schurr joined Murray but was bowled first ball by Gillett. Seven wickets for 28. Watt, who followed next, made a single off Gillett, and Murray added another, bringing the total up to 30. Watt made a three off Shelford's next over and a single off Gillett, and Murray added another off the same bowler. After another two and a single had been added a bailer from Gillett took Watt's wicket, after he had added 7 to the total of 30 for eight wickets. Lias then joined Murray, just as the rain commenced to fall in a cheerless drizzle. Shipway took Shelford's place with the ball and Murray got him away to the fence for 4, and in the next over cut Gillett for 3. Lias made a 2 to leg off Shipway's next over and 50 went up. The first ball of Shipway's next over took Murray's wicket, after he had played a careful and steady innings for 30. Nine wickets for 52. Jackson followed and Lias, after some rather wild hitting, succeeded in getting Shipway over the fence for 6. The Secretary put in a couple of singles and Shelford replaced Shipway at the pavilion end, his first over giving a 3 to Jackson, who added a two and a bye off Gillett, following this up with a pretty cut for 3 off Shelford's next over. A couple of singles and two cuts for 3 each were followed by a 2 and a single by Jackson, which brought the score up to 80. Another 3 by Jackson and then his wickets were disturbed by a ball from Gillett, and the innings closed for 83, of which the last two players had made 34. Play was then suspended for tiffin. The score was as follows:—

Y.C. & A.C.			
Mr. F. H. Bugbird, c. Shelford, b. Gillett	3
Mr. A. Kingston, b. Shelford	1
Mr. G. C. Murray, b. Shipway	0
Mr. C. M. Duff, b. Gillett	0
Mr. F. K. Crawford, b. Gillett	3
Mr. J. G. Watson, c. Gillett, b. Shelford	0

BOWLING ANALYSIS.

	B.	P.	M.	W.
Mr. Gillett	...	60	35	8
Mr. Shelford	...	73	31	7
Mr. Shipway	...	18	16	0

Play was resumed at 2.15. The Navy innings being opened by Garde and Pead, against the bowling of Murray and Kingston. Garde started in the first two overs with a 4 and a 3, to which Pead added a 3. In the fourth over Garde hit Kingston to the pavilion for 4, but the same bowler's next ball but one, after a single had been made, took Garde's wickets. One for 15. Gillett joined Pead and the latter in the next over got Murray away for 4, bringing up the score to 20. Runs continued to come steadily, both batsmen hitting freely though judiciously. After 30 had been posted on the telegraph board Watson relieved Kingston with the ball at the northern end, but a 4 by Pead, 2 by Gillett, and four singles soon brought the total to 40. After ten more had been added Lias was put on in place of Watson and sent down a maiden over. The score, however, still continued to rise, Gillett cutting and Pead driving for three and four respectively till the latter's wicket was taken by Murray after he had compiled 31 by excellent cricket. Two wickets for 61 runs—a vast improvement on the home team's achievement of two for 2. Farie joined Gillett. When 68 had been scored Farie was clean bowled by Lias after adding 5 to the score. Shipway took his place and commenced with a

The Greeks defended Domokos with splendid valour, the Turkish attack from

the centre being repulsed with great slaughter. After many hours' fighting, the Greeks retreated at night, but only when they were completely outflanked.

SETTLEMENT OF THE SITUATION.

It is believed at Constantinople that a definite treaty of peace will be submitted at a conference of the Powers which will probably take place in Paris.

ARMISTICE.

London, May 23.

An armistice has been concluded for a period of 17 days between the Greeks and Turks in the provinces of Thessaly and Epirus.

WAR NEWS.

It now transpires that the Turkish pursuit of the Greeks from Domokos led to a complete rout of the whole Greek Army, only the Foreign Legion making a stand. The flight was continued to Thermopylae, where the Duke of Sparta had established his head-quarters.

Although the Sultan wired to Edhem Pasha on Tuesday to suspend hostilities, the Turks in pursuit continued firing until Wednesday afternoon.

THE U.S. SENATE AND THE CUBAN REBELS.

The American Senate has adopted a resolution that the Cuban insurgents be recognized as belligerents.

CRETE EVACUATED BY GREEKS.

London, May 24.

In accordance with the conditions agreed to by Greece, the troops which were in Crete have now been withdrawn.

THE POWERS AND THE SITUATION.

The Powers are agreed that the cession of the Province of Thessaly to Turkey is impossible, though a strategic rectification of the frontier is admissible, whilst the indemnity must also be reduced; and further, that the capitulations cannot be abolished, though they may possibly be modified.

TROUBLE REVIVING IN CRETE.

The trouble between the Mussulmans and Christians in Crete is reviving.

The Mussulmans have fired on the British and French Admirals whilst walking through the streets of Suda.

IRISH LEGISLATION.

The Right Honourable A. J. Balfour has announced that he has several important liberal measures toward Ireland to bring forward next session. All parties have welcomed the scheme.

GREEK IRREGULARS DISBANDED.

London, May 25.

The Greek Government has disbanded the Irregulars.

FOREIGN VOLUNTEERS FOR GREECE.

Five hundred American and fifty French volunteers have arrived at Athens. They have been sent to the front.

THE SITUATION IN GREECE.

The prospects of Greece are regarded generally as being very gloomy indeed. Disorder and even revolution is feared on the return of the Army to Athens.

CHARTERED COMPANIES IN AFRICA.

London, May 26

Lord Salisbury, in reply to a question put by Lord Stanmore, in the House of Lords, said that he fully recognised the

desirability of the Government having more direct influence with the British Niger Company, now that the Company comes more in contact with foreign Powers.

THE RECORD REIGN.

The military forces sent from British Colonies to take part in the Record Reign Celebrations will be all put under command of Lord Roberts as Colonel-in-Chief.

The officers of the Colonial Contingents will be presented to H.R.H. the Prince of Wales at the next Levee.

THE LARGEST TUBULAR TUNNEL IV THE WORLD.

The Prince of Wales in person opened the Blackwall Tunnel (under the Thames), which is the largest tubular tunnel in the world, being over one mile in length.

CRETE.

London, May 27.

The Powers have made their final decision and presented a collective Note to the Porte regarding the conditions of peace.

It is stated that the Powers have agreed on the appointment of Prince Francis Joseph of Battenberg to be Governor of Crete, and that Turkey has accepted the recommendation.

(SPECIAL TO THE "JAPAN MAIL.")

EARTHQUAKE.

Hakodate, May 24, 7.25 a.m.

Last night at 9.20 a slow, prolonged earthquake, from east to west, occurred here.

(FROM "LE COURRIER D'HAIPHONG.")

THE PARIS TRAGEDY.

Paris, May 5.

The number of lives lost in the Charity Bazaar conflagration is returned at 115. Sixty bodies have been recovered, including those of the Duchess of Alençon, the Countess de Carayon-Latour, and numerous aristocratic ladies. The injured number 180, of whom eight are not likely to recover. The bodies were taken to the Palais de l'Industrie, to which crowds of people are flocking. The consternation in Paris is fearful.

Paris, May 6.

A hundred bodies have been recovered from the ruins, including the charred remains of the wives of Generals Warnet, Cheval, and Serurier. All the Foreign Ambassadors have visited M. Hanotaux, the Foreign Minister, to express their sympathy. Queen Victoria and Emperor William telegraphed to President Felix Faure expressing their sorrow and sympathy.

Paris, May 7.

The Duc d'Aumale died at Zucco in Sicily from an attack of cardiac apoplexy. His death is attributed to the news of the death of the Duchess d'Alençon. Dispatches of sympathy from Sovereigns and foreign authorities continue to pour in. Emperor William will send Prince Radzivil to represent him at the official obsequies, which will take place at Notre-Dame. The Lord Mayor of London will be present. General Munier, who was wounded on Tuesday, is dead.

Paris, May 8.

A service has taken place at Notre-Dame; the catafalque, containing only two bodies, was covered with crowns, among them those of the Emperor William and the ladies of the Russian colony. President Faure, the Ministers, the Diplomatic Body, the Lord Mayor of London, Prince and Princess Radzivil, and all the authorities were present. Nearly all the shops are shut.

THE PARIS DISASTER.

Paris, May 10.

The *Figaro* has opened a subscription on behalf of the object of the charity bazaar destroyed by fire. A million-and-a-half has been collected. One single anonymous donor subscribed 937,000 francs.

Paris, May 11.

The Emperor of Germany has sent 10,000 francs to the charity bazaar subscription.

Paris, May 13.

Baron Mohrenheim has sent to M. Faure a very affecting letter from the Czar in which the latter expresses the grief that the burning of the charity bazaar has caused him.

(FROM THE "SHANGHAI MERCURY")

ROBBERY OF TREASURE.

Hongkong, May 11.

The China Navigation Co.'s steamer *Tatyan* has arrived, and reports the loss of £5,000 between Australia and Hongkong. The Police are now diligently searching the vessel.

(FROM JAPANESE PAPERS)

THE HAWAIIAN EMIGRATION QUESTION.

Honolulu, May 14th.

Mr. Shimamura, Japanese Minister at Honolulu, petitioned the Hawaiian Authorities to open negotiations on the 10th instant in regard to the Japanese emigration matter, in reply to which the Hawaiian Government agreed to hold a conference on the 13th instant. On that day the Japanese Minister and Mr. Akiyama, diplomatic officer, proceeded to the Foreign Office and had an interview with the Hawaiian plenipotentiaries, and presented the communication of the Japanese Government. The Hawaiian deputies intimated that they could not give an answer in the matter until after deliberation, but added that the Hawaiian Government was desirous of settling the matter amicably. The date for the second interview has not yet been decided on.

EARTHQUAKE AT SENDAI.

Sendai, May 24.

A strong earthquake was felt here last night at 9 p.m.

THE WOMEN'S UNIVERSITY.

Osaka, May 26.

The inauguration of the proposed Women's University is to take place here this evening. Count Okuma, Foreign Minister, and Count Hijikata, Minister of the Imperial Household, are expected to be present.

Osaka, May 27.

The inauguration of the Women's University projected by Mr. Naruse Nizo took place at the Osaka Hotel yesterday. Count Okuma, Foreign Minister, Count Hijikata, Minister of the Imperial Household and Prince Konoye, President of the House of Peers, and about 260 leading citizens were present.

A SCHOOL BLOWN DOWN.

Urawa, May 26.

In a severe gale and hail storm at Hoku-gun yesterday the Primary School in Kominomura collapsed. No persons were injured.

DISTURBANCES AT FURUKAWA.

Mito, May 27.

Furukawa district is now in a very disturbed condition and about 300 police have proceeded to the locality.

FATAL LANDSLIP.

Nagano, May 27.

At Sarafu-mura, Sarashina-gun a mass of earth 30 feet in height and 10 feet in breadth became detached from the hill above and fell upon a dwelling house, the three inmates of which were crushed to death.

POST OFFICE DESTROYED BY LIGHTNING.

Mito, May 27.

A Post Office in Kuji-gun, Shitachi Province, was struck by lightning about 3.50 p.m. on the 25th inst. and burnt down.

KYOTO CANAL.

Kyoto, May 28.

The repairing of the canal was completed yesterday. Various factories relying upon water-power for their electricity re-commenced business to-day.

KOBE WATER WORKS.

Kobe, May 28.

Work on the Kobe Water Works was formally commenced to-day.

KOBE TEA SALES.

Kobe, May 28th.
229,900 cattiees of new season's tea changed hands yesterday. Prices ranged from yen 45 to yen 20.

EARTHQUAKE AT TSU.

Tsu, May 28th.
A severe earthquake was felt here this morning at 1.15.

WATCHING THE SEALERS.

Nemuro, May 28th.
A Japanese man-of-war left here this morning for Chishima Islands to keep watch on foreign sealing schooners.

CHESS.

All Communications to be addressed to the Chess Editor.

The Yokohama Chess Club is closed for the season: and reopens on Monday, 4th October.

The Tokyo Chess Club meets at the Tokyo Hotel, every Friday, from 1 p.m. to 7 p.m.

15 Q x Q ch. Kt x Q	32 P Q6 ch. Resigns.
16 K x Kt Castles (QR)	
17 QR K sq. QR K sq.	

NOTES.

- (a) A very tame continuation. Castles or P to Q B4 would be more energetic.
(b) Here Castles was far better, and would have given Black a splendid game.
(c) Premature. Again castling was the move.
(d) Losing another pawn, and the game.

GAME No. 714.

BOARD No. 2.

(QUEEN'S PAWN GAME.)

White—W. F. Nalsh (Cambridge.)	Black—E. Lawton (Oxford.)
WHITE. BLACK.	WHITE. BLACK.
1 P Q4 P K3	16 Kt B5 B x Kt
2 Kt KB3 P Q4	17 P x B Kt K2
3 P QB4 P QR3	18 KR Q q. B x Kt ch.

19 P KKt3 (d) Q K2	39 K B3 Q B3
20 Kt R4 P B5	

NOTES.

Adjudicated drawn.

- (a) As soon as Black has played P to Q Kt 3 White gains a move by P takes P and B to Q 3.
(b) Black has now the better development.
(c) We do not see the object of this weakening move.
(d) A weak move, which gives Black a chance to get a very strong attack by P to B 5.
(e) If simply B takes B Black would win at once.

as after 22—B to Q 2, Kt takes B P, White would be hopelessly lost; for instance, 22—B to Q 2, Kt takes B P; 23—K takes Kt, P takes P ch., followed by Q takes Kt.

Board No. 4 (Vienna Opening).—White got the better of the opening; but after a general exchange of pieces, leaving R and pawns only, it was not easy for him to win. He was able later to take advantage of some weak play by Black, thereby securing the game.

Board No. 5 (Compromised Evans).—Mr. McLean adopted a very interesting and rarely tried form of this defence. White wavered in his attack and then found Black unassailable. Black turned the tables, and by a very pretty combination, surrendering and recovering the exchange, reduced the game to an ending of Q against Q with three pawns ahead, which won.

Board No. 6 (Scotch Gambit).—Played tamely by White, whereby Black in the end game got his rooks on to the seventh file. This broke up White's pawns, and, shortly, losing a knight by an oversight, his game became untenable.

Board No. 7 (Ruy Lopez).—Black adopted the King's Fianchetto Defence and after some exchanges Black was left with a weak Q P (Q 3), which he was luckily able to defend. He presently secured the better end game, and should have won a piece. Instead of this he "closed the drifts," and the consequent block insured a draw.

GAME No. 716.

(RUY LOPEZ.)

GAME PLAYED IN A RECENT CLUB MATCH.

White—O. C. Miller.	Black—E. J. Wallace.
WHITE. BLACK.	WHITE. BLACK.

10 Q x Kt B x B	21 QR x R (g) Resigns

NOTES.

- (a) If it is not intended to exchange off the bishops, why lose time by playing B to Kt 5 at all?
(b) There is particular need for exchanging just now.
(c) A useless move, P to Q R 3 would have done.
(d) White has placed his artillery in position on K sq. and Q sq. and an intuitive instinct of danger under such circumstances ought have induced Black to move his queen out of the indirect line of fire—a line which can be opened at any time, whenever P to K 5 or P to B 5 become feasible. Black had an excellent opportunity to do this now by playing Q to Kt 5.
(e) Black had not a good reply in B to Q 3 against 19—Q to Q 4, as Black has really no move to avert loss consequent on White playing (20)—R takes Kt ch.
(f) R takes Kt is fatal; B to Kt 2 was therefore worth trying.
(g) Beginning with placing both rooks in position, White has handled the position admirably; if now Q to Kt 8 ch., (22)—R to K sq. wins.

21 K Kt K4 R B5	

NOTES.

- (a) Presumably there is some advantage in Black's playing P to QR 3 before playing this move. It led to an interesting game, in which

we should have preferred to continue with P to Q 3 for White.

(b) Not at all amiss. Black threatens Kt takes Kt, followed by P to K 6, therefore it would seem that P to QR 3, driving White's bishop back, may be turned into account.

(c) We should prefer B to Kt 5 at once. (d) The position is becoming exceedingly interesting. White has designs with B to Kt 5, against the queen, which Black cannot prevent by P to R 3 owing to Kt to Kt 6. Black is therefore forced into a heroic line of play, in which he has to give up a pawn.

(e) Of course White cannot take the bishop's pawn; but we think Black had a stronger move at his disposal in B to K 2, which prevents castling on the queen's side, or in B to Kt 2, giving hopes of a gradual effective development by QR to Ksq., also P to Q 3 and B 4, &c. Of the two moves, we think B to Kt 2 would have been the stronger.

(f) We still should have preferred B to Kt 2.

(g) If Q takes Q P, K Kt to K 4, and Black is still in good play, while retaining his queen.

(h) Q R to K B sq. would have answered.

(i) Black cannot save the pawn and prevent Kt to K 6; at the same time K to Kt 1 was of course impossible.

(j) The best under the circumstances.

(k) It would not have been good play to have taken the pawn.

GAME No. 718.

One of eight blindfold games played by Mr. Blackburne in Belfast Chess Club, November 28th, 1896:—

HAMPSHIRE-ALGERIA GAMBIT.

White—Mr. Blackburne.		Black—Mr. O'Hanlon.	
WHITE.	BLACK.	WHITE.	BLACK.

7 Kt xP	KxKt	(e) KxKt	
8 B B4 ch.		18 Q B5 ch. Kt Kt4	
(a) KxP1	B K3 (b)	19 PxKt	PxP (f)
10 P Q4	Kt B3	20 K B2!	K R3
11 Q Q3	K Kt2 (c)	21 BxP ch. QxB	
12 Kt xKB		22 R R sq. ch. Resigns.	
P!	BxB		

Notes by James Mason:

(a) An old continuation, requisitioned perhaps "for the nonce," or as suited to this interesting occasion. 8—P to Q 4 is now usually preferred.

(b) As in the case of 9—B takes P ch, it seems more advisable to move 9..... K to Kt 2. The King can hardly remain on the Bishop file for long; so probably the sooner he leaves it the better.

(c) The position is very intricate. Apparently, however, there would be time for 11..... Kt to Q R4. Even 11..... B takes Kt 12—P takes B Kt to Q Kt 5, etc., would not prove so unfavourable. Black of course could not take Knight and pawn directly, because of 13—Q to B 5 ch, with loss of a piece to him forthwith.

(d) With a formidable attack, play as Black will.

(e) For brilliancy. He could easily draw by checking again and again with Knight.

(f) Almost immediately fatal. 19..... Q to K 3 appears to be the only resource.

PASSENGERS.

ARRIVED.

Per British steamer *Braemar*, from Hongkong via ports:—Mr. Pope. For Tacoma:—Mr. and Mrs. Beale, Misses Beale (2), and Master Beale in cabin.

Per British steamer *Empress of China*, from San Francisco:—Mrs. J. W. Adams, Miss N. Adams, Mr. E. H. Butler, Mrs. E. S. Barbour, Mr. W. T. Barbour, Miss M. E. Barchet, Capt. Crawford, Mr. Dutremez, Mr. A. Dufourmy, Mr. M. D'Orival, Mr. and Mrs. R. W. Fairbanks, Mr. and Mrs. S. L. Gracey, Mr. W. T. Gracey, Mr. and Mrs. S. P. Gracey, Mr. H. Iwasaki, Mr. Lucien Janssen, Mr. Julian F. Perkins, Mr. W. Frank Perkins, Mr. K. Tsuchiko, Mr. and Mrs. P. Van Voorhees, Mr. J. Dayton Van Voorhees, Mr. Walin, and Mr. S. Yamaguchi in cabin; 9 in 2nd class; 71 in steerage.

Per Japanese steamer *Matsuyama Maru*, from Seattle, Wash.:—Capt. Nunome, Rev. and Mrs. D. O. Fox, and Master John Fox in cabin; Mr. John Baiss, and Mr. P. C. van Buskirk in second class; Mr. M. Honda, Mr. A. Goherman, Mr. J. Larkin, Mr. and Mrs. James Baggaides in steerage.

Per British steamer *Empress of Japan*, from Hongkong and ports:—Mr. P. Colomb, Mr. R. Walker, Mr. Iacke, Dr. and Mrs. Thompson, Mr. Saville, Mr. J. J. Bell-Irving, Mr. and Mrs. Faga, Mr. Willeumier, Mrs. J. S. Clarke, Miss Officer, Mr. J. H. Gatherwood, Miss Peacock, Mr. T. Cowen, Mr. F. J. Hall, Mr. M. de Dumast, Mr. M. Schellenberg, Mr. W. Goddard, Mr. A. G. Smith, Mr. P. Laplanche, Mrs. Ede, Mr. Mrs. Schmitt, Mr. and Mrs. U. Cahan, Mr. A. Coxon, Mr. Hill, Mr. A. Ross, Mr. and Mrs. D. Brand and child, Mr. R. Whitham, Master Clarke, Mr. R. B. Greer, Rev. T. Gleboff, Mr. C. E. Cuzdar, Mrs. Weaver & child, Mr. J. McArthur, Mr. and Mrs. C. T. Knight, Mr. W. M. Carst, Mr. W. King, Mr. H. L. Biggaley, and Mr. and Mrs. L. T. Cooke in cabin. For Vancouver:—Com. Gore-Brown and servant, Mr. and Mrs. Seymour, Lieut. H. J. Neville, Sur. Col. H. Johnston, Mr. R. F. Thorburn, Mr. C. Hanbury, Dr. and Mrs. A. C. Parrott and 2 children, Miss N. J. Irvine, Mr. L. Midwood, Mr. M. Wolff, Bishop and Mrs. Evington, Mr. E. D. Mallingson, Lieut. W. M. Thompson, Mr. and Mrs. McHaffin and child, Mr. W. C. Moorsom, Gen. and Mrs. Washburn, Miss Washburn, Mr. W. Stebbins, Miss Bird, Mr. C. Holmstrom, Rev. and Mrs. G. F. Fitch, son and daughter, Mr. G. F. Watts, Mr. B. Matsuki, and Mr. J. L. Alexander in cabin; 17 in cabin; 374 in steerage.

Per British steamer *Doric*, from San Francisco and Honolulu:—Bishop S. C. Breyfogle, Mr. John Farill, Mr. A. W. Karkley, Mr. A. W. Markley, Mr. K. T. Stoepel, Rev. & Mrs. Landis and 3 children, T. W. Markley, Dr. Adolph Koch, Mrs. Ernest Helderling, and Mr. & G. Fison in cabin. For Shanghai:—Mr. and Mrs. T. A. H. Holland, and Mr. W. H. Conrad in cabin. For Hongkong:—Mr. and Mrs. Theo. F. Van Vliet, Dr. and Mrs. F. R. Day, Rev. Joseph Gruber, Mr. Henry Waterhouse, and Mr. Albert Waterhouse in cabin.

Per Japanese steamer *Satsuma Maru*, from Shanghai and ports:—Mrs. Warden, Messrs. E. Wolf, E. J. Plaza, J. C. Wilkinson, Mr. G. Tsuda, A. Kondo, I. Yoshioka, S. Ikeda, and Yuen in cabin; 50 Japanese, 1 European, and 1 Chinese in steerage.

DEPARTED.

Per British steamer *Coptic*, for San Francisco via Honolulu:—Mr. and Mrs. W. Alexander, Mr. E. Arden, Miss C. J. Bockel, Major Byxbee, Mr. and Mrs. J. F. Broadbent, Dr. and Mrs. Busted and infant, Mr. C. P. Bradley, Mr. and Mrs. E. W. Carpenter, Master Chapin, Mr. D. Chanvassayness, Mr. and Mrs. A. D. Bochrane, Mr. S. Coe, Surgeon Major Havelock Charles,

Thos. J. Cowie, U.S.N., Mrs. M. A. Dunbar, Miss Dunbar, Mr. and Mrs. G. M. Dare, Rev. and Mrs. W. O. Elterich and three children, Mr. T. S. Hollis, Mrs. Jos. W. Hobson, Dr. Conrad Immerwahr, Mrs. Immerwahr, Mr. M. Lamadrid, Mr. Lamadrid, Miss Lay, Mr. J. F. Millar, Mrs. G. A. Marsh, Mr. Jas. T. W. McArthur, Dr. McDougall, Bishop and Mrs. John McKim, Miss Onativia, Mrs. W. H. Osborn and maid, Mrs. A. P. Peck and two children, Mr. Peck, Yeong Wai Pun and family, Archdeacon Page, Mrs. Page and five children, Master L. C. Porter, Mr. O. B. Spaulding, Mrs. R. C. Spaulding, Mrs. A. Sheldon, Mr. J. N. Sidebottom, Mr. A. Shewan, Mrs. W. S. Stone, two children and amah, Mr. C. Terry, Mr. Alb. Tholehn, Dr. and Mrs. Eduardo Wilde and maid, Mr. R. H. Wright, Rev. Henry Woods, Miss E. G. Wyckoff, Miss H. G. Wyckoff, Mr. E. A. Wilhelm, and Prince Whi Wha in cabin.

Per British steamer *Ancona*, for Hongkong via ports:—Mr. David Marsden, Mr. de Mornay, Mr. Chan Hai Shan, Mr. and Mrs. A. A. Porter, Dr. Hartigan and native servant, Capt. F. Lyon, Dr. A. G. Smith, Mr. Salinger, Mr. L. Ver Mehr, Mr. P. M. Pappas, and Dr. Perl in cabin; 3 Chinese in steerage.

Per Japanese steamer *Saikio Maru*, for Shanghai and ports:—Messrs. Y. Uyeno, Tregloun, G. M. Woolsey, A. S. Hay, Thomas Inglis, E. Dun, Miss Dun, Mr. Fukumoto, Mr. and Mrs. R. Howe, and Mr. F. W. Blehn in cabin; Mr. M. Oki, and Mr. Jio in 2nd class; 60 Japanese and 2 Chinese in steerage.

Per British steamer *Empress of China*, for Hongkong and ports:—Miss F. S. Wetmore, Miss A. Williams, Mr. F. Salinger, Mrs. and Miss Wedman, Mrs. Olinstroff, Mr. Victor Vivet, Mr. Den Arend, Mr. Mouraou, Mr. Fieet, Mr. E. J. Plaza and servant, Mr. Joë Vidal, Mr. and Mrs. Bogdanoff, Mr. Geo. Y. Taylor, Mr. D. M. Clarkson, and Mrs. B. C. Howard in cabin.

Per British steamer *Sunda*, for London and ports:—Mr. E. W. Rutter, Miss May Moss, Mr. A. L. Robinson, Mr. C. P. O. W. Holland, and Mr. P. O. J. Leonard in cabin.

Per Japanese steamer *Kanagawa Maru*, for London and ports:—Messrs. N. Behrens, N. F. Messerve, S. Suyemori, T. Takagi, T. Simpson, Miss Nellie Pallister, Rev. and Mrs. D. O. Fox and child in cabin; Messrs. K. Mitsui, K. Sakamoto, T. Yamakura, K. Yamaguchi, E. Mole, Ching-Tong, Mrs. Ah-Sung, Mrs. Crawford and children, Mr. S. Naito, and Mr. S. Shimura in 2nd class; 21 Japanese, 1 Chinese and 3 Europeans in steerage.

Per British steamer *Empress of Japan*, for Vancouver:—Messrs. C. A. Apperley, A. L. Apperley, J. L. Alexander, Ashton, A. J. Barley, J. M. Berquet, Mr. Board, Mr. and Mrs. T. L. March 6th, 1897.

37.

THE GREATEST WONDERS OF MODERN TIME

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN.

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations. Mr. J. T. Couras, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude. And, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining 'stock.'"

Sold by all Chemists and Medicine Vendors throughout the World.
May 1st, 1897.

MILKMAID BRAND CONDENSED MILK

The "Milkmaid" Brand is guaranteed to contain all the cream of the original milk. In the process of manufacture nothing but water is removed, nothing but the best refined sugar added.

Avoid low-priced brands from which the cream has been abstracted, and ask for the "Milkmaid" Brand, the best for all purposes.

May 29th, 1897.

DINNEFORDS

The Universal Remedy for Acidity of the Stomach, Headache, Heartburn, Indigestion, Sour Eructations, Bilious Affections.

MAGNESIA

Sold Throughout the World.

N.B.—ASK FOR DINNEFORD'S MAGNESIA.

March 6th, 1896.

17.

A. SAVY & CO., ENGINEERS.

162, Rue de Charenton, Paris.

THE OLD G. HERMANN DEBATISTE WORKS.
ESTABLISHED 1830.

The Oldest and Largest Makers in the World of Chocolate, Cocos, and Confectionery Plants.

Over 2,500 Chocolate Factories fitted up to January 1st, 1896.

GRINDING MACHINERY for all kinds of dry or wet substances, colours, printing inks, toilet soap, perfumery, and chemicals.

MIXING, CRUSHING, AND PULVERISING MACHINES FOR ALL MATERIALS.

Address MESSRS. BOYES & Co., YOKOHAMA.

November 21st, 1896.

37.

SOCIÉTÉ ANONYME DE TRAVAUX DYLE ET BACALAN

Capital: £ 300,000

Head Office: 15, Avenue Maignon, Paris

WORKS IN EUROPE:

at Bordeaux (BACALAN), France

at Louvain (DYLE), Belgium

Railways and Tramways, Plant and Rolling Stock, Carriages and Waggon, Wheels, Wheels and Axles combined, Permanent Bridges for Railways, Permanent and portable (demonstrable) Bridges for Roads, Girders and metallic Frames, Steam Launches and Steamboats, Boilers and Steam Engines, Dredgers.

CONTRACTORS

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, JUNE 5TH, 1897.

MARRIAGE.

On June 3rd, 1897, at the U.S. Consulate, in the presence of Hon. N. W. Melvor, U.S. Consul General, by Rev. John L. Dearing, Mr. EDWIN TAGGARD OSBORN of the P. M. and O. & O. Steamer Cos., to Miss GRACE DARLING SHOTWELL, of San Francisco, U.S.A.

DEATH.

On the 2nd instant, at the residence, No. 20, Nakayama-dori, Sanchoime, Kobe, GEORGIE CAMPBELL FURBER, beloved wife of Dr. Geo. Lyon Tait, aged 30 years.

SUMMARY OF NEWS.

THE Cretan insurgents are showing renewed activity.

THE Porte still insists upon the cession of Thessaly as one of the terms of peace.

It is stated that the Powers have agreed on the appointment of Prince Francis Joseph of Bat-

tenberg to be Governor of Crete, and that Turkey has accepted the recommendation.

THE Derby was won by the favourite, Galtee More, who started at 4 to 1 on.

THE armistice between Turkey and Greece is to be prolonged for an indefinite period.

A JOINT stock company has been formed to start a sanatorium at Hakone, on a large scale.

THE British Mission to Abyssinia has been accorded a splendid reception by King Menelek.

THE laying of the telegraph cable between Japan and Formosa was completed on the 29th May.

THE Hawaiian Government has rejected the claims of Japan in regard to the immigration question.

THE murder of four persons at Tsu on the 4th inst. is reported by telegram, particulars not being yet to hand.

THE Higher School, Tokyo, defeated a baseball team of the Y.C. and A.C. on Thursday, by 15 runs to six.

A CONFERENCE of Chiefs of Post and Telegraph offices throughout the country has just finished its sittings.

A COUNCIL of local Governors commenced its sittings at the Home Department, Tokyo, on the 2nd instant.

THE crop of silk cocoons is reported from most of the producing districts to be satisfactory in quality and quantity.

GREECE objects to any rectification of the frontier and claims inability to pay anything beyond a small indemnity to Turkey.

THE Columbian Assembly has passed an Act which forbids the employment of Japanese labourers on Government works.

THE return cricket match played between the Y. C. and A. C. and the Navy on the 29th May, resulted in another victory for the Navy.

A FIRE occurred in the Ashio Colliery, Buzen Province, last week and the mine had to be flooded. The loss is estimated at yen 200,000.

THE Tokyo and Yokohama (Japanese) Chamber of Commerce have both memorialised the Foreign Office, on the subject of the proposed new U.S. Tariff.

THE half-yearly general meeting of the Nippon Yusen Kaisha was held on the 27th May. A dividend at the rate of 10 per cent. per annum was declared.

HOPES are entertained by Greece that she may be able to raise a loan under the guarantee of Great Britain, France, and Russia, to enable her to pay the indemnity.

THE new United States Minister to Japan, the Hon. Mr. Buck, is expected to arrive at Yokohama on the 17th of June, having left San Francisco on the 29th of May by the *Belgic*.

LIEUT.-GENERAL NOGI, Governor-General of Formosa, will leave his post for the capital this month to lay before the Authorities his views regarding the administration of the Island.

EXTRAORDINARY catches of herrings have been made this season in the North and several extra steamers have been put on the Hokkaido line to transport the fish to Yokohama and the south.

THE annual meeting of the Club Hotel, Ltd., was held on the 31st May, when the report and accounts were passed, a dividend of 4 per cent.

declared, and Mr. Pigott elected to join the Board of Directors.

KITAJIMA BUNZO, a school teacher at Noshiro-minatocho, Akita Prefecture, a few days since murdered a woman to whom he owed some money, and who importuned him for payment.

SOME specimens of silk cocoons raised in Formosa by a Japanese grower, are said to be superior in quality to any produced in Japan, and it is hoped a prosperous industry will result.

A COURT of Enquiry held at Tokyo into the circumstances attending a collision between the steamers *Ryofun Maru*, Capt. W. Thompson, and the *Wakanoura Maru*, Capt. Miyagi, which occurred in April 1895, has found the latter to blame and suspended Captain Miyagi's certificate for two months.

A STRONG force of gendarmes has been dispatched to Tochigi Prefecture, where the farmers are still intensely excited over the Ashio copper mine poisoning, in spite of the provisions imposed upon the owner to prevent injury being inflicted on the neighbouring lands by mineral poison. The farmers avow nothing will satisfy them but the closing of the mine.

DECORATION, or Commemoration, Day was celebrated by the Americans in Yokohama, and a Naval detachment from the flagship *Olympia* on the 30th May, when the monument in the General Cemetery erected to the officers and men who perished in the *Onoeda*, was decorated and an oration delivered by Dr. (Major) Stuart Eldridge, a veteran of the Civil War.

THE Powers having made their final decision, presented a collective note to the Porte regarding the conditions of peace on the 26th May. The Porte, in replying to the Note from the Powers, does not enter into any discussion of the conditions mentioned therein, but indicates a readiness to open negotiations with the Embassies when the formalities in connection with the armistice are completed. Turkey desires that the eventual Treaty of Peace be signed at Pharsala.

THE import market has assumed a somewhat livelier tone during the past week, but buyers paid only the lowest prices and would enter into no large transactions, business being limited to immediate requirements. The heavy stocks of piece goods in Yokohama, are, however, gradually decreasing and the prospect looks a little brighter than it did a month ago. Orders for yarns have been placed for next month and after, but at what appears to be unremunerative prices. In metals a moderate business has been done at former prices, and the same may be said as regards sugar. The sales, however, do not by any means keep pace with arrivals and stocks are consequently accumulating. So far former rates have been maintained, but if arrivals continue on the present scale, a farther fall in prices may be expected. Nothing to speak of has been doing in kerosene, immediate requirements only being filled, while arrivals are more than sufficient. Prices remain unchanged. Among exports the tea market has been brisk and plenty of business done at gradually falling prices. The shipments to America, both from Kobe and Yokohama, have been very considerable during the last fortnight. In raw silk a small business has been done. A few parcels of new silk from Maebashi and other districts have been received, and the prospects of the crop are excellent. During May 3,335 bales were received and 3,376 exported from Yokohama. In waste silk very little is doing. Exchange remains the same, very weak.

SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.

Within the space of a little more than two years the time will arrive for putting the Revised Treaties into operation. Two years is in reality a very brief period when any large work has to be accomplished, though it may appear long to men looking forward cursorily. Twenty-three years were needed to achieve the task of revision. It was a great task, and to the Ito Cabinet belongs the honour of achieving it, and of securing international recognition of the rights that belong to Japan as a sovereign State. But upon the present Cabinet devolves the duty of making preparations for the operation of the new Treaties, and that, too, is no small undertaking. While negotiations for Revision were in progress, the supporters of the present Ministry were in Opposition. It must be fresh in the memory of the public that they placed many obstacles in the path of the negotiators, and that they seldom lost an opportunity of construing the language of the Revised Treaties in a sense unfavourable to Japan, for the sake of saddling upon the negotiators the responsibility of having concluded a partial and unfair arrangement. These same critics are now, if not in office, at any rate allied with those in office, and the duty strongly devolves upon them of discharging their part of this great task in such a manner that they shall not be justly open to the accusations which they themselves unjustly levelled at their predecessors. There is much to be done in the next two years unless the country is to plunge blindfold and unprepared into a position bristling with complications. The new Treaties have doubtless been carefully drafted, but never yet were international agreements drawn up that did not invite differences of opinion in the matter of their interpretation, and never yet had statesmen to complete documents dealing with a situation so novel and unprecedented as that of intercourse on equal terms between an Occidental and an Oriental nation. Thus the interpretation of the Revised Treaties becomes a matter of prime importance, and unless some clear understanding is arrived at, within the course of the next two years, innumerable difficulties must be anticipated after July 13th, 1899. Consider, for example, the 7th Article of the Anglo-Japanese Revised Treaty. It is there provided that "The subjects of each of the High Contracting Parties shall enjoy in the dominions and possessions of the other exemption from all transit duties, and perfect equality of treatment with native subjects in all that relates to warehousing, bounties, facilities and drawbacks." What is to be understood by the word "bounties" in that Article? The spirit of the Treaty is to place foreigners and natives on a perfectly equal footing, yet it can not reasonably be supposed that British subjects will become entitled to claim a share in the sums voted every year by the Japanese Diet for the encouragement of Japanese ship-building and Japanese navigation. The simple word "bounties," however, suggests no limitations. Of course the natural interpretation is that the Article was framed with special reference to foreign commerce, and that the allusion is to bounties connected with the export or import trade. Indeed, the point is elucidated by the more explicit language of the corresponding clause in the German-Japanese Revised Treaty, where the words "exports and imports" are inserted. But Japan's experience goes to show that natural principles can not be successfully appealed to, or inferential limitations enforced, where there is question of a Conventional privilege to be enjoyed by Occidental folk. The matter must be reduced to the most unequivocal terms. Consider, again, the third Article of the Anglo-Japanese Protocol:—"The Japanese Government undertakes, before the cessation of British Consular Jurisdiction in Japan, to join the International Conventions for the protection of Industrial Property and Copyright." What are the "International Conventions" referred to? There have been several conferences of delegates from the States of the West, to consider the question of international protection for patents, trade-marks and

copyrights, but the agreements elaborated have never secured universal endorsement. The German-Japanese Treaty refers explicitly to the Berne Conference of 1886. In the Articles drawn up by that Conference it is provided that any Power may subsequently join the Union by signifying its desire to do so, and by conforming with all the terms of the Convention. Now, in the matter of international copyright the United States has always stood aloof from any such arrangement, and the considerations that have swayed America exist for Japan also in a greatly accentuated form. Countries that began to be progressive centuries ago, and that have been advancing side by side along the paths of science and philosophy, can conveniently and advantageously adopt a policy of equal give-and-take in such affairs. But the case of a nation like Japan is radically different. Japan set herself quite recently to borrow her civilization from the Occident, and it is absolutely essential that she should have free access to the fruits of Occidental thought and Occidental research. Her literary men have been busily engaged during the past twenty-five years translating European and American works for the use of her students, and if they are suddenly cut off from that source of moral and intellectual improvement, the loss will be incalculable—not a mere pecuniary loss, but a social and progressive loss. Does it not plainly behove Japanese statesmen to provide against such a catastrophe by setting limitations to the interpretation of that provision in the Treaties? And turning from the text of the Treaties to the laws of Japan herself, we find that the second Article of the Civil Code is drafted in negative terms. All rights and privileges not specifically withheld from foreigners by law will be enjoyable by them. Such a provision might be workable without inconvenience had the laws in question been invariably drafted in accordance with it. But they have not. Many of them were compiled and put into force long before the Civil Code saw the light of day, and though the compilers had no idea of bringing foreigners within their scope, they inserted no restrictive clauses, on the natural assumption that, under the extraterritorial circumstances of the time, foreigners were *de facto* debarred from enjoying in Japan any privileges not specially secured to them by enactment or convention. If the situation is to be governed by the second Article of the Civil Code, it will follow that foreigners can claim the privileges of laws which were never intended to have any application to them. The inconvenience of such loose procedure would be conspicuous with regard to the Treaties themselves, for they are all compiled on a positive basis—that is to say, only the rights and privileges actually enumerated in their text are supposed to be secured to the subjects or citizens of the High Contracting Parties. But if all rights and privileges legally excepted are to fall within the same category, then it will follow that the Chinese, for example, will be far more advantageously situated in Japan than British subjects. For in Japan's new Treaty with China the privileges to be enjoyed by Japanese subjects are alone enumerated, little or nothing being said about Chinese subjects. Apply the second article of the Civil Code to that case, and it will result that the silence of the Treaty confers upon Chinese subjects in Japan every right or privilege enjoyed by Japanese subjects, without restriction. It is unnecessary to descant upon such an obviously absurd contingency. Here, then, is a large task to be performed by way of preparation for the operation of the Revised Treaties. More specific questions are those of professional men and prisons. Foreign barristers will be required by foreign auditors when the latter come under Japanese jurisdiction fully as much as they are required at present. But the law of Japan provides that a barrister must not be admitted to practice unless he has passed a prescribed examination. It goes without saying that no foreign barrister now in Japan could pass a Japanese examination. The same difficulty presents itself with regard to medical men. These things can probably be arranged without serious difficulty, but they

have to be arranged. As to the prison problem, the question is, shall foreign malefactors or suspects be confined in direct company with Japanese, both being fed and clothed in the same way? That seems scarcely possible in view of the greatly different habits of life of foreigners and natives. But if a separate system is to be adopted, a staff must be organized, buildings must be created, and regulations will have to be drafted. Here is another task, not by any means of trivial dimensions. The *Nichi Nichi Shimbun*, from whose columns in two consecutive issues we quote these thoughtful and timely remarks, concludes with an expression of conviction that the importance of the problem can not be underrated in official quarters, but that there is danger of things being suffered to drift until satisfactory arrangements cease to be possible within the given time.

As a test of administrative ability Formosa has been disastrous to Japan's reputation. That is the verdict of foreign critics and its justice can not be denied. Nearly two years have passed since the island came under Japanese control, yet the first essential of good government, security of life and property, has not yet been attained. Railways, telegraphs, roads, and such things require time for their completion, and stand, at any rate, in a secondary position as compared with the preservation of peace and good order. Were there no censure to be offered except that the progress of useful public works has been slow, the disgrace would be comparatively small. But the inhabitants of the island had a right to expect that their new rulers would provide efficient means for protecting life and property, whereas not even the capital itself is beyond the range of insurgent enterprise. Disturbance in remote inaccessible parts of the island might be condoned, but disturbances at Taipeh betray a marked degree of official incapacity. It is alleged that in this matter the Authorities were not taken by surprise. They had warned that an unquiet spirit was abroad, and they actually despatched a body of troops to check the impending insurrection. But the precaution was too late. The troops marched away leaving the rebels in their rear, and then the latter, leisurely assembling, advanced against Taipeh. They sent a detachment by the high-road, and the Japanese, observing its approach, concluded that it represented the brunt of the assault and directed their force against it, whereas, in truth, it was only a feint, the real assault being made from another direction. It is humiliating that Japanese troops should have been thus outmanoeuvred by a party of insurgents possessing no strategical training and employing a ruse of the most antiquated kind. The local effect upon Japan's prestige must be disastrous. Her military men have become the laughing stock of the Formosans. Food for native mirth had already been furnished in other directions. Works of fortification constructed at Taipeh were destroyed at several points by a night's rain, and the Formosans were lost in admiration of defensive contrivances that a shower could melt. In sanitary matters similar perfunctoriness has been displayed. The sewers were cleaned and the sewage thrown on the streets, where it lay piled for months, an offensive mass. Then suddenly the plague made its appearance, the Authorities woke up, and in twenty days these insanitary conditions were remedied. So, then, the work presented no real difficulty: the mischievous delay had been due to official neglect. How can the country's administrative reputation survive such displays of inefficiency? But, after all, the prime point is the security of life and property. That must be effected at all cost. If there are not enough police and gendarmes in the island, more can be sent; if there are not enough soldiers, the force can be augmented. It is said that the Governor-General has tendered his resignation and that the Cabinet will probably replace him. He may deserve sympathy, but what concerns the nation at present is that a thoroughly competent man be appointed in his stead, and that officials of proved ability and intelligence be sent to

save a situation the disgraces of which are attributable, in the main, to the fact that the administration of the island has hitherto been entrusted to men quite unqualified for the task, and not selected with any view to their qualifications. Three thousand five hundred Chinese have left Taiwan rather than become Japanese subjects, and many more would follow, it is said, if they had the means to pay for their passage. We do not—says the *Fiji Shimpō*, two of whose articles furnish materials for this summary—we do not object to the departure of three thousand five hundred Chinese. Let them go as fast as they please if they dislike Japanese jurisdiction. But we do feel intensely chagrined at the conviction that distrust of Japanese administrative competence and fairness drove them to remove themselves from her jurisdiction. The reputation of our country has suffered severely, and it is for the Cabinet to adopt such vigorous measures as shall prevent this seemingly valuable addition to the Empire's dominions from becoming a permanent source of international reproach.

The *Nichi Nichi Shimbun* writes on the same subject, Formosan misgovernment, in even stronger terms than the *Fiji Shimpō*. It declares that the authority of the rulers is defied and that the hearts of the people are daily becoming more and more estranged. There is neither fixity of purpose nor uniformity of method in the administration of the island. In one district excessive leniency characterizes the conduct of affairs; in another, extreme severity. The regulations issued by the Government are changed incontinently if they can not be enforced, or, if not changed, are suffered to become dead letters, no punishment being awarded for their infraction. Officials gamble, take bribes, contract for public work or enter into collusion with contractors; lend money at usurious rates; police inspectors engage in fraudulent transactions; police constables themselves become pilferers. In fine, the men whose duty is to restrain abuses, offer the example of perpetrating them. The explanation is simple. No care whatever was exercised in selecting officials for service in Formosa. The most untrustworthy and least competent persons were appointed to posts demanding exceptional ability and thorough integrity. The people of Formosa could not have contrived a more striking method of showing their contempt for Japanese administration than the recent attack upon Taipei. On the very day when they were required to choose between leaving the island and becoming Japanese subjects, they proclaimed their estimate of Japan's competence, and their measure of esteem for her prowess, by marching against the capital itself, pillaging its citizens and burning its streets. It is supremely humiliating. After two years of administration, security of life and property has not been attained even in the chief city of the island and under the very shadow of the Governor-General's flag. This object lesson should be conclusive. The time has come to vindicate Japan's reputation, and the nation expects that the Government will not suffer the occasion to pass.

The *Nippon* takes this opportunity to renew its criticisms of the Colonization Department, which it declares to be a totally useless appendage of the Government under existing circumstances. Had not Formosa been added to the dominions of Japan, there never would have been any idea of creating a Colonization Department, and if its achievements in Formosa are to be taken as a test of its value, the sooner it is struck off the roster of the State Departments, the better. But the *Nippon* does not argue that a Colonization Department is not required. Its contention is that the sphere of the Department's duties should be greatly extended. Everything relating to colonization should fall within its province, as should also the affairs of all the outlying islands of the empire, the Riu-kiu, the Bonins, and so forth. With the officials of the Colonization Department twiddling their thumbs for lack of work, it is absurd and an-

malous to see the Foreign Department busying itself about the affairs of Japanese emigrants to Hawaii, Brazil, Mexico, the South Sea Islands, &c.

It is commonly reported that Viscount Takashima intends to resign the portfolio of Colonization, and that Baron Yasuba will be his successor. If the Viscount's resignation be dictated by a feeling that he has made a failure at the Department, and that the wretched state of affairs in Formosa demands some manful acknowledgment of his responsibility, well and good: he is right to resign and his resignation should be accepted. But that Baron Yasuba should succeed him would be going from bad to worse. It would mean the perpetuation and crystallization of the blunders inaugurated under Count Kabayama's regimen in Formosa. Baron Yasuba is a Kumamoto man; Viscount Takashima, a Satsuma. It is six of one and half a dozen of the other. They may both be said to belong to the *Haito*, the stalwarts of old-time Satsuma. They both entertain the same political views and they are intimate friends. Moreover, Baron Yasuba is President of the Formosan Railway Company. That does not appear to be a special recommendation for his appointment to the headship of a Department entrusted with the control of Formosan affairs. If there is to be a change at the Department, let it be a radical change. Let the Matsukata Cabinet choose a new Minister, without any reference to the views of Viscount Takashima, who still sits in the Cabinet as Minister of State for War. These are the opinions of the *Tokyo Shimbun*.

* * *

In the *Shogyo Shimpō* we find an article discussing the development of Japanese navigation in foreign waters. The writer's observations are based on figures furnished by the Japanese Consul in Hongkong, who gives the following returns of Japanese ships that entered that harbour during the past 5 years, namely:—

	ships.	tons.
1892	36	53,489.
1893	40	53,700
1894	48	75,501
1895	27	48,884
1896	78	143,975

Various reasons present themselves for the marked development observable in 1896. For example, the growth of the export of Japanese coal; the fact that in 1896 Japanese-owned vessels became entitled to the privilege of exporting goods from several ports hitherto closed to such operations; the opening of a regular line of steamers, by the Nippon Yusen Kaisha, to Europe in March, 1896, and of a line to Australia in October of the same year; and other minor reasons. Undoubtedly the enterprises of the Nippon Yusen Kaisha constitute the chief factor of increase, for it appears that, of the 78 ships which entered Hongkong in 1897, 46, with a total tonnage of 81,436, flew the Nippon Yusen Kaisha's flag. For the rest, 26, aggregating 54,840 tons, belonged to the Mitsu Bishi Goshi Kaisha. These two companies may be said to have monopolized the entries. There is an idea that, owing to the great rise in the price of coal during the past six months, its export will suffer diminution, and the number of Japanese vessels trading to China will be correspondingly reduced. But, on the other hand, it has to be remembered that a service to the Yangtze is about to be inaugurated, and that coasting voyages in the waters of North China will also be undertaken. The *Shogyo* thinks that the Japanese flag will be seen more and more in foreign waters.

THE RECENTLY SOLD BONDS.

A telegram published by the *Yomiuri Shimbun* says that the War Bonds purchased by the Yokohama Syndicate have been readily sold in London at 103½. If that means that the Bonds have been sold without the June coupons, the Syndicate's profit is 4 per cent., or 1,600,000 yen.

HOKKAIDO AND RAILWAYS.

The *Fiji Shimpō* remarks that since Formosa was added to Japan the spirit of popular enterprise has tended towards the south, and the panic that occurred last year in a portion of the economic world contributed materially to diminish domestic commerce and industry. Yet, despite these things, Hokkaido has made remarkable progress during recent years. The enormous increase in the receipts of the Hokkaido Coal Mining and Railway Company is striking evidence. The following table shows the comparative receipts for the four months from January to April:—

	30th year (1897). Yen.	29th year (1896). Yen.	Increase. Yen.
January	62,399	40,619	21,780
February	71,774	47,708	24,065
March	85,368	65,911	19,456
April	108,124	71,126	36,998
Total	327,667	225,366	102,300

Further increases are of course expected, but estimating receipts at the lowest figures for the eight months ending December, it will be seen that they amount to 877,558 yen for the 30th year against 668,254 yen last year, an increase of 209,304 yen. But the total increase, as compared with last year, does not really fall short of 310,000 yen. These augmentations are no doubt due to the general development of the industries of Hokkaido; but the direct and immediate causes are the continued stream of immigration, the rise in the value of timber, abundant fishery catches, and the expansion of the coal mines.

THE MISSION MILITAIRE.

The question of the engagement of a Russian *mission militaire* in Korea has been amicably settled, says the *Yomiuri Shimbun*, a telegram having been received by Mr. Waerber from the Russian Government instructing him to relinquish the scheme. The Russian Government, it seems, consulted Count Okuma, Minister for Foreign Affairs, and afterwards despatched the following communication to the Japanese Government:—"Whenever circumstances arise in which Russian officers are required to be employed in Korea, the matter shall be referred to your Government and mutual negotiations be entered upon. A telegram shall be despatched to the Russian Minister in Korea instructing him to suspend the engagement of Russian officers." The date of this telegram corresponds exactly with that on which the Russian Minister in Korea despatched an official notification to Li, Korean Minister for Foreign Affairs, intimating that he would communicate with his Government should there be no objection to the engagement of the Russian *mission militaire* on the part of Korea. It looks as though he sent the despatch immediately on receipt of the instructions from his Government, so as to convey the impression that he had sent it prior to the receipt of such instructions. Despite the above order from home, the Russian Minister seems to have attempted to induce his Government to approve the scheme on the strength of Li's favourable reply.

The above version of this much discussed affair is diametrically contradicted by a story appearing in the *Tokyo Asahi*. We read in the latter that, though the project of a mission has been ostensibly abandoned, *sub rosa* negotiations are going on all the while, and have ended in an arrangement for the addition of 12 Russian officers—five of staff rank—to the 7 already engaged as drill instructors in Korea. The *Asahi* is very explicit. It alleges that the twelve are to be taken from among the officers now serving at Vladivostok, and yet it alleges, at the same time, that Russia's consent was obtained on the condition that the officers were not to be on the active list. The truth seems to have retired to the bottom of a very deep well in this instance.

POLITICAL TOPICS.

Outsiders must be perplexed to account for the excitement caused in political circles by two events, in themselves of no great importance. The first is the compulsory retirement of four members of the Board of Audit, namely, the Vice-President, Mr. Yasukawa, and three Auditors, Messrs. Yoshida, Mochida and Seki. The Board of Audit consists of 12 Auditors, two Assistant-Presidents, a Vice-President, and a President. It appears that the Vice-President and the three Auditors mentioned above were not very regular in the discharge of their duties, and their colleagues of the Board concluded that the four were either too old or too infirm to perform the functions of their office. Accordingly a meeting of the Board was held, and, after due deliberation, the Emperor was prayed to order the retirement of the four perfunctory officials, which His Majesty ultimately did. But the four declined to be treated in that summary manner. They complained that they should have been consulted. It appears that no intimation was conveyed to them about the meeting at which their conduct was debated, and that the whole affair was put through without their knowledge. They further allege that they have not been remiss in the discharge of their duties, but, at the same time, they are careful to explain that they would not have hesitated to bow to the Board's decision and the Emperor's endorsement of it had not the matter been managed in such a hole-and-corner fashion. It is plain that these objections have not much validity. If the four Auditors are considered incompetent, their removal is proper and natural, and as to their not having been consulted beforehand, there can scarcely be any serious contention that an official should be consulted about his own competence or incompetence. None the less there is a great deal of political excitement about the affair. So far as we can see, some suspicion is entertained that the compulsory retirement of the four Auditors is due, not so much to their incompetence, as to a desire to create official vacancies which may be filled up from the ranks of the Cabinet's political supporters. That idea seems extravagant. The Board of Audit is much too large a body to be twisted round the Ministry's little finger. Its decision about the competence of the Vice-President and the Auditors must be honest at least, but whether warranted or not we have, of course, no means of judging.

The second cause of excitement is the appointment of Mr. Tsuzuki Keiroku to be Vice-Minister of Education. In this case the opposition ostensibly emanates from officials in the Educational Department, who consider that a slight is put upon them by the promotion of a junior over their heads. But that is not the true difficulty. Mr. Tsuzuki's real opponents are politicians who see in his appointment a restoration of the *entente* between Satsuma and Choshu. Mr. Tsuzuki is Count Inouye's son-in-law and Marquis Yamagata's adopted son. Marquis Ito, Marquis Yamagata and Count Inouye are the three Choshu leaders. Now there is no doubt that the great hope of the *Shimpo-to*—that is to say, the party which supports the Cabinet—was to see the Satsuma statesmen and the Choshu statesmen finally divided. So long as the

Sat-Cho combination existed, the political parties were virtually powerless against it. Let Satsuma and Choshu be once pitted against each other, and their reliance upon the political parties would become inevitable. That was the cherished outlook, now clouded by Mr. Tsuzuki's appointment.

THE OTSU AFFAIR AND PRINCE GEORGE OF GREECE.

We have to recur to the subject of the Otsu affair, and to confess that the information on which our previous comments were founded requires to be materially modified. It is scarcely necessary to say, we trust, that the evidence hitherto at our disposal appeared quite conclusive, and that if an injustice has been done to Prince George, want of investigation was not responsible. The facts now in our possession are attested by eye-witnesses, whose opportunities to observe what happened were exceptionally good, and the version thus furnished seem to be strictly accurate. It tallies, we may add, with official documents which we have had an opportunity of examining. When Tsuda Sanzo struck the Czarewitch the latter sprang from his *jinrikisha*, and the natural effect of his sudden exercise of strength was to compel the drawer to drop, or lower, the shafts. Tsuda's attack was thus interrupted for a moment, but by pressing forward, he again came within reach of his victim and raised his sword to deliver another cut. At that instant Prince George leaped from his *jinrikisha*, and dealt Tsuda a heavy blow. The Prince was carrying a cane; not a light bamboo cane purchased in Kyoto, as we were previously informed, but a cane made of ebony wood. The Czarewitch and Prince George had each bought a cane of that kind during their visit to India, and carried them subsequently on their travels. The Prince's cane did not reach Tsuda's head, not did it fell him. It struck him on the right arm, and owing to the violence of the blow, Tsuda dropped his sword. Almost immediately he was seized round the body by one of the Prince's *jinrikisha*-coolies and thrown down, and another coolie possessing himself of the sword, inflicted a wound on the back of Tsuda's neck. Meanwhile, the Czarewitch had hastened away, with his hand on his head, which was bleeding profusely. He passed through a gate, closely followed by Baron Madenokoji, who ran to his assistance. The gate proved to be the entrance to a blind alley, and the Czarewitch and the Baron emerging once more upon the main road, made their way into a shop, in company with Governor Oki and Prince Arisugawa. There the Czarewitch's hurt was attended to. It will be seen from these facts that Prince George of Greece undoubtedly did contribute materially to the safety of the Czarewitch, and that he behaved with great courage and presence of mind. Had Tsuda succeeded in getting in another cut, he might have achieved his deadly purpose, and the crashing blow that he received on his arm from a heavy cane wielded by a man of Prince George's thews was the direct cause of his failure. As for Prince George's statements, the statements contained in the letter published by the *Review of Reviews*, that Tsuda followed the Czarewitch to a house which the latter entered; that the Czarewitch left the house

immediately afterwards; that as he was emerging from it, Tsuda would again have cut him, had not Prince George knocked the fanatic senseless with a blow of his cane delivered on the head—as for these statements, they are apparently a mixture of misconceptions and realities. Doubtless Prince George believed that his stick reached Tsuda's head and struck him senseless, for Tsuda was actually grappled with and thrown down within the briefest interval after receiving the Prince's blow and dropping his sword. But he received the stroke on his arm, and he never succeeded in continuing his pursuit of the Czarewitch as far as the entrance to the alley. The street was narrow, the confusion naturally considerable. Errors of detail can easily be comprehended under such circumstances. The main fact is that Prince George did unquestionably deliver a most timely and effective blow, and that he exhibited courage, presence of mind, and promptitude. In all probability he was the means of saving the life of the Czarewitch, or, at any rate, of averting a blow that might have been inflicted serious injury. We have been mistaken in this matter, and we owe to Prince George, our correspondents and our readers, a frank apology.

THE ANTI-JAPANESE PETITION IN CANADA.

From beyond the water come occasional echoes of events that suggest uncomfortable reflections. Here in Japan the slightest exhibition of rudeness or roughness towards a stranger evokes an indignant outcry: a fresh access of anti-foreign feeling is recognised, or a recrudescence of the *fo-i* spirit of *pre-Meiji* days. Does a coolie use his patten to pound the head of a bicyclist who has collided against him; does a *jinrikisha*-drawer give impolite assertion to his estimate of the fare that he is entitled to demand, immediately each is identified as a representative of the inveterate hatred cherished by all Japanese towards aliens. Yet the pugnacious students that now and then throw stones; the half-nude coolies that forget to be courteous; the boisterous children that shout "*Ijin pa-pa neko pa-pa*," are they genuine types of the Japanese nation as a whole? Have we any warrant for inferring the temper of the people at large from the occasional ebullitions of the common labourer or the silly shibboleths of the street *gamin*? The British nation is not anti-Japanese, yet sections of the British nation are avowedly opposed to association with the Japanese people and would gladly exclude them from British territory. At this very time, a number of prominent men in Canada are circulating a document addressed to the Canadian House of Commons and entitled an "Anti-Japanese Petition." Their object is to create a strong public impression that the Japanese are undesirable fellow-residents, and ought to be kept out of the Dominion. If a body of Japanese were to draw up a similar anti-foreign memorial, for presentation to the Lower House of the Diet, and were to canvass for signatures, is there any difficulty in conceiving the stature of the language that would grace the columns of the foreign local press and make itself vociferously audible wherever two or three foreign residents were gathered together? The fact is that prudent folk must see the necessity of "going slow" with their

deductions. Neither the Japanese house nor the foreign is without glass windows.

Mr. K. T. Takahashi is domiciled and naturalized in Canada. He is one of over four hundred Japanese similarly circumstanced. On his own behalf and on theirs he has compiled a vigorously written brochure, protesting against the "Anti-Japanese Petition." Naturally he appeals to the general principles of comity and humanity in refutation of the movement, but perhaps we need not take detailed notice of that part of his thesis. We find much more interest in his explicit refutation of the petitioners' specific charges. To their accusation that the Japanese, in consequence of the low standard of living to which they have been accustomed in their own country, are content with much smaller wages than Canadians require, he answers, first, that the standard of living is not low in Japan, and, secondly, that the cost of living to a Japanese in Canada is so great as to prohibit his acceptance of small wages. We confess that the former proposition startles us. Does a diet of rice, a little fish, vegetables, some sugarless, milkless tea, and, perhaps, a measure of muddy *sake*—does that compare fairly with a diet of meat, potatoes, wheaten bread, vegetables, beer, tea with sugar and milk, and, perhaps, a glass of whisky? Surely it is not to be denied that the Japanese labouring man's food is less nutritious and far less expensive than that of the European or American labourer. Whether the standard of living is actually lower in Japan than in Europe or America, may be open to argument: a great deal depends on what is signified by "low." But that a Japanese can exist in health and contentment at far smaller charges than a European, we take to be incontrovertible. The scullions at Herrenhausen in the 17th century received 11 thalers a year—or about 1½ *yen* a month—by way of pay; of course they had their board free. That is approximately what a Japanese maid-servant gets at present in a Japanese family. No European, however, could be induced to serve in any capacity to-day for that wage. The usual estimate for a Japanese labouring man's keep is 3 *yen* a month, or, say, six shillings. To attempt to live on such a pittance in Canada or America would mean starvation. But we do not see why a Japanese labourer should be able to support himself at a greatly lower cost in Canada than a Canadian. What Mr. Takahashi intends to convey, we take it, is that if a Japanese workman desires to enjoy in Canada the same degree of comfort that he enjoyed in Japan, his expenses will be such as to deprive him of any marked advantage in the competition for employment. What are the wages paid to Japanese in Canada and what the wages paid to Canadians? It is singular that neither the Anti-Japanese petitioners nor their opponent touches that practical side of the question. If the former could prove the existence of a wide difference, or the latter, of a virtual parity, the argument would be conclusive. Mr. Takahashi, indeed, sees the value of that line of discussion. He challenges the Anti-Japanese petitioners to formulate their idea of an average scale of wages for white workers in Canada, and undertakes to show that the Japanese receive as much. He even declares that, after careful investigation of the kind of pursuits adopted by Japanese

in Canada, namely, boat-building, net-making, saw-mill work, ranching, farming, coal mining and salmon fishing, he finds their minimum wages "not one whit below what are commonly accepted by the white people." But unfortunately he fails to quote figures. The point is of vital interest. Do Japanese labourers and artisans really obtain employment in Canada at rates of pay corresponding with those paid to Canadians? If Mr. Takahashi would furnish some statistics conclusive on that point, he would do a public service.

We shall not follow Mr. Takahashi's reasoning. It is cogent and concise. That there should be any necessity for him to combat such propositions as those advanced by the Anti-Japanese petitioners, is an unhappy fact. We regret it. But when all is said and done, when the Americans, the Australians, the Canadians, the Russians, have decided to exclude certain alien races, and when their unchallenged acts of differentiation are contrasted with the anathemas levelled at every indication of anti-foreign feeling, real or imaginary, observed in Japan, we come back finally to the invincible fact that Japan herself has her own racial problem, and that she is treating it in virtually the same manner as the Americans are treating the Chinese problem, the Canadians the Japanese problem, and the Russians, the Jewish problem. Japan keeps her doors closed to Chinese immigration. May it not seem to Europeans and Americans that they ought to keep their doors closed to Japanese? A *tu-quoque* is bad logic, we admit, especially when the cases are not exactly analogous. Still Mr. Takahashi and his countrymen should have no difficulty in perceiving that what they feel about letting the Chinese into their family circle, the Occidental feels about letting any Oriental into his. He does not clearly distinguish between Chinese and Japanese. It is hard that his judgment should be so confused, very hard. But time will make the distinction clear to him; time the wisest of all things. Let us have patience. What are thirty years in the history of international prejudice? A mere unit; scarcely a unit. Japan has no reason to be dissatisfied with the dimensions of the breach that she has made in the fortress of Occidental conservatism after thirty years of assault. Decades before she cares to open her arms to the Chinese, she will find herself hand in hand with the West. Men like Mr. Takahashi will help immensely to shorten the interval.

JAPANESE NOTES.

It is alleged that two Koreans, entrusted with the task of killing some of their countrymen now in Japan, have come to Tokyo. These duly accredited assassins are Shhan Pong-hwan and Kwon In-su, and their intended victims are Chhoi Chun-sang and Chhoi Pang-hwan, the latter being the former's father. Shhan pretends that his object is to buy machinery, and Kwon alleges that he has gold dust for sale. The *Fiji Shimpō*, which publishes these facts, adds that the sanguinary travellers are lodging in Tomoe-cho and Minami Sakuma-cho, in the Shiba Ward of Tokyo. If the men's purpose and their whereabouts are so well known, there should not be much opportunity for them to be dangerous.

The *Nichi Nichi* says that Marquis Ito has received instructions from the Em-

peror to travel in England, France, Germany, Russia and Italy after the ceremonies in connexion with the Diamond Jubilee are over. It appears, therefore, that the Marquis will separate from Prince Arisugawa, the latter returning at once to Japan and the former proceeding on his travels.

A member of the staff of the Bank of Japan informs the *Kokumin-no-Tomo* that the price of shares is likely to fall considerably at the close of this year or the beginning of next. His argument is that although several millions paid into the Treasury as security by bidders for the stock of the new Industrial Bank, will flow back into the market, large demands will be made for installments of capital by the Kiushu and the Sanyo Railway Companies, and by other concerns. Further, the Nippon Yusen Kwaisha will have to pay about ten million *yen* abroad in the course of this year, and the Osaka Shosen Kwaisha has ordered ships to the extent of two or three millions. Then there will be a big demand for capital in connexion with the silk business, and while, on the one hand, the new American Tariff will check exports, there seems to be little prospect of any diminution in the great stream of imports now pouring into the country. The volume of the currency, also, is expected to increase, prices will go up, the rate of interest will rise, and people will have no inducement to invest their money in shares or bonds.

The Treasury calculates that the taxes to be remitted on account of the Ashio Copper Mine's deleterious effects upon the arable lands in its neighbourhood, will aggregate from a hundred and fifty thousand to three hundred thousand *yen* annually, and the period of remission being ten years, the total loss of revenue will be from 1½ to 3 million.

The railway from Sorachida to Asahigawa, in Hokkaido, which was begun last year, has made great progress—we read in the *Fiji Shimpō*—and it is expected that trains can be run from Sorachida to the bank of the Ishikari River by the end of June, a distance of 11 miles. The Kani-kotan tunnel is also nearly completed, and the rails will be laid through it in July, so that a section of 20 miles from Sorachida will be open in August or September. With regard to the First-Period Teshiwo Road, a contract for the Asahigawa-Ishikarigawa section (14 miles) was given out on the 17th ultimo, and the work will be commenced immediately.

An Imperial Ordinance promulgated on the 29th instant extends the system of Local Government to Hokkaido. The northern island has hitherto been specially administered by a Board, the theory being that it was still too sparsely populated to warrant the introduction of the system in operation throughout the remainder of the Empire.

Count Kyosumi Iyenari has been appointed Governor of Yamanashi Prefecture, in succession to Mr. Sakurai Tsutomu, who is transferred to Formosa.

It is pleasant to see that the Emperor has conferred on Mr. Saito Shuichiro the Third Class Order of the Rising Sun. Mr. Saito is one of those men whose services Japan can not dispense with in her modern career. He was hounded from office under circumstances that reflected lasting dis-

grace on the Opposition in the House of Representatives, and we have always thought that the Ministry's failure to support him against such injustice did it little credit.

The English Speaking Society of the Higher Commercial School, as stated elsewhere, held its annual exercises on the 29th ultimo in the School Hall, Hitotsu-bashi, Kanda. From a report of the proceedings, published in the *Japan Times*, we take the following:—

The address on "Commercial Morality," by Z. Murai, was instructive and well delivered. He mentioned that a prominent Japanese merchant, when travelling abroad, received many offers of business from foreign merchants, but had to refuse them all because he said he could not trust the Japanese for honesty and punctuality in executing the transactions desired. Another eminent Japanese, in a report on the respective advantages of direct and indirect trade between Japanese and foreign merchants, said direct trade resulted always in disgrace to Japan because the Japanese standard of honesty and punctuality was so deplorably low, and the only way to save the national reputation was to leave the trade in the hands of the foreigners at the treaty ports for the present until the standard in Japan should improve. A German Consul in Kobe had similarly been obliged to declare against direct trade, as altogether untrustworthy. The speaker regretted to say that Japanese merchants were worse than even Chinese; the commercial arteries of Japan were choked with impure blood, and the commerce of the nation must perish if not purified. The remedy was through commercial education, moral and intellectual. There was greater need of turning out men well equipped with moral stamina and the principles of honesty than with commercial sciences. The address was loudly applauded throughout.

It is a most wholesome sign of the times to find brave and honest words like the above spoken from the platform of a commercial school by a student. If such views are gaining currency in Japan, the result will be invaluable to the country.

THE NIPPON YUSEN KAISHA.

According to the Report submitted to the shareholders of the Nippon Yusen Kaisha at the recent semi-annual general meeting, the following is the Company's record, for the half year ended March 31st:—

Steamer services between Japan and Foreign Countries, 10; viz.,

Japan and Europe.
Japan and America.
Yokohama and Adelaide.
Yokohama and Bombay.
Yokohama and Shanghai.
Kobe and Manila.
Kobe and Vladivostok.
Kobe and Tientsin.
Kobe and Newchwang.
Hongkong and Vladivostok.

Steamer services in Home Waters, 11.

Total number of voyages during the year, 811; namely 73 by the Company's steamers, and 74 by chartered boats.

Total mileage run, 1,068,193 knots; namely 164,039 knots by chartered boats, and 904,154 knots by the Company's steamers.

Ten steamers were placed under the Company's charge by the Government during the year, and of these nine have been purchased by the Company, namely, the *Ryofun*, *Kinshu*, *Himeji*, *Sakura*, *Kokura*, *Otaru*, *Kagoshima*, *Yamaguchi* and *Matsuyama*.

The *Kanagawa Maru*, newly built in England, reached Japan in March of this year.

The particulars of the Company's Fleet are:—

	No.	Tonnage.	H.P.
Registered Vessels	63	130,412	11,072
Non-registered Vessels..	24	691	311
Store Ships	4	1,080	—
Lighters	226	—	—

Steamers of 3,000 tons and upwards, 12, namely, *Kanagawa*, *Tosa*, *Ryofun*, *Kagoshima*, *Kinshu*, *Miike*, *Yamaguchi*, *Kaijo*, *Izumi*, *Matsuyama* and *Ihai*.

The largest of the above is the *Kanagawa Maru*, her tonnage being 6,150.

Four steamers, newly built abroad to the Company's order, have been launched, or are on their way to Japan. They are the *Kamakura*, the *Hakata*, the *Kawachi* and the *Wakasa*.

The casualties during the half-year were:—

SHIPS TOTALLY LOST 2; NAMELY.

Name.	Tonnage.	Date of loss.
<i>Himeji Maru</i>	3,008	1st Nov. 1896.
<i>Yamaguchi Maru</i>	3,387	5th Feb. 1897.

SHIPS DAMAGED 10; NAMELY.

Name.	Tonnage.	Date.
<i>Mutsu Maru</i>	911	27th Oct. 1896.
<i>Ryofun Maru</i>	4,670	29th Nov. 1896.
<i>Tairen Maru</i>	2,889	27th Nov. 1897.
<i>Ise Maru</i>	2,244	23rd Dec. 1897.
<i>Otaru Maru</i>	2,374	1st January 1897.
<i>Echigo Maru</i>	1,148	20th Jan. 1897.
<i>Omari Maru</i>	1,058	2nd March 1897.
<i>Sakata Maru</i>	1,953	15th Feb. 1897.
<i>Totomi Maru</i>	1,946	1st March 1897.
<i>Yeiyo Maru</i>	2,474	15th March 1897.

The holders of a thousand shares and upwards are:—

	Shares.
The Imperial Household	80,750
Baron K. Iwasaki	34,997
Mr. Nomoto Teijiro	10,980
Mr. T. Mitsui	8,270

(Here follow 35 other names).

Mr. Kondo Rempei, President of the Company, occupied the chair at the meeting, and delivered the following address:

Gentlemen.—I am glad to be able to say that, contrary to precedent, the business of the Company during the first part of the year has not suffered from the slackness usually incidental to that period, but has been maintained at the general average; a result that must be attributed, in part, to the diligence exercised by the Company's agents in obtaining cargo. On the other hand, repairs had to be undertaken in the case of no less than 36 vessels, representing a gross displacement of 62,951 tons. That, of course, is attributable to the long services performed by the ships during the war, but it amounts, in practice, to losing the use of over seven steamers of 2,000 tons each; a serious drain on the Company's resources. You will not be surprised to hear that losses have been incurred on our foreign lines, for you were prepared for that result from the outset, and signified your ready consent to face the outlay. The total loss amounted to 511,000 yen, namely, 390,000 yen on the European line and 121,000 yen on the Australian. But I have the pleasure to report that, by means of the amount carried over from the previous account and by drawing upon the Reserve for the Equalization of Dividends, it is proposed to pay a dividend of 10 per cent. Further, this loss does not represent money thrown away. It is rather of the nature of an investment, from which profit will ultimately accrue, and it accords with the programme mapped out when the lines were opened. That programme will soon be practically complete, for the twelve new steamers that we ordered in Europe will be built and running at an early date, and we shall receive the bounty fixed by law. I need scarcely remind you that difficulties such as we are now experiencing must be accepted as the inevitable consequence of endeavouring to place ourselves in the same rank with great steamship companies of Europe and America, which have large capitals at their back and reputations based on long experience. It is, however, satisfactory that the newly-built *Kanagawa Maru* and *Hakata Maru* have successfully passed the inspection provided by the Navigation Encouragement Law, and we may look to be equally fortunate with other vessels now en route for Japan or approaching completion abroad. It is expected that the whole of these new vessels will be running before the end of the year, and in that event our fleet will bear comparison with the fleets of the great companies of the Occident, or may even stand at their head. With twelve new steamers our purpose is to have a fortnightly European service from either end, and to place a greater number of vessels on the American line, also. We consider the prospects of the latter line to be good, not only because of the cargoes likely to offer on return voyages—cargoes of timber, flour, and so forth—but also because of the connexion with Hongkong, Australia and Singapore.

I am happy to say that our Australian vessels are rising in public favour and promise to be preferred to any other steamers, though unfortunately the passenger traffic is at present the chief source of income on return voyages, freight being difficult to obtain. However, there are grounds to hope that the Japanese demand for Australian wool and other staples may soon remedy that state of affairs. As to the Bombay Line, which also receives a subsidy from the Government, the outlook is considered good. Perhaps it may be well that, for the purposes of correcting some false impressions apparently entertained, I should add a few words with reference to the appropriation applied for in the last session of the Diet, by way of a special grant for the European and American lines. There can be no doubt that the Law for the Encouragement of Navigation, now in force, is a measure of great benefit for the development of maritime enterprise. But there is one perplexing feature. The Law provides that the bounty paid on a vessel shall decrease, year by year, after she is 5 years old. Moreover, it is generally believed that the Government contemplates revising the Law. Under such circumstances it is impossible to form an estimate of future operations on any stable basis, or to rely upon the Law for the maintenance of our foreign lines. On the other hand, when the Government orders a line of steamers to be opened, the operation is tantamount to building a public road, and it is only proper that the State should bear a part of the expense; certainly the Company can not legitimately be expected to expend its own resources in the service of the nation at large. These considerations were submitted to the Government last year, and their propriety having been recognized, a special grant was sought from the Diet, but unfortunately the session closed before the Bill could be debated. The Minister of State for Communications has distinctly promised, however, that the measure shall be submitted again next session.

The accounts for the half year as presented and passed, were:—

	Yen.
Brought over from previous account	190,539
Reserve for Equalization of Dividends	427,561
Money refunded from Deterioration Fund, in connexion with the <i>Shibata</i> and <i>Toyohasht</i>	168,157
	786,257
Losses	Yen.
Written off value of Buildings	163,327
Rewards to officers	9,669
Dividend at rate of 10 per cent.	5,700
Carried forward to next account	605,000
	2,561
	786,257

It seems not to be generally known that the special grant for which the Government sought to obtain the Diet's consent last session, would not have become operative, so far as the Company is concerned, until 1898. Hence, if the Bill passes next session, the Company will not suffer.

We learn that the bounty payable on the *Kanagawa Maru*, which has just passed the official inspection provided by the Law for the Encouragement of Shipbuilding, will be £20,000. At that rate the Company's twelve new steamers, which are to be running by the end of this year, will draw a sum of nearly 2½ million yen from the Treasury. The Budget does not provide any such sum. Presumably it will be taken from the Reserve, on account of which an appropriation of 3 millions appears in the Budget.

THE ARIMA CONFERENCE.

The Arima Christian Conference meets this year from the 1st of August to the 8th inclusive. The papers and subjects for discussion are as follow:—

- "The conflict of Christianity and other faiths among the common people of Japan."
- "The Jews in Prophecy and Providence."
- "The heathen religions of China in relation to the spread of Christianity at the present day."
- "The place of prayer in the Missionary life of St. Paul."
- "Woman's work in the Apostolic Church."
- "The Character of Christian Converts on the Mission Field."

THE ENGLISH OF JAPANESE JOURNALISTS.

Our recent comments on the quality of the English employed by Japanese writers undertaking to produce journals in that language, are strongly resented by the *Yorodsu Choho*, which declares, in the most unequivocal terms, that the motive of our criticism is mean and venal; that we aim simply at excluding all Japanese from the field of English journalism in order to retain the monopoly for ourselves. Well, that kind of thing might be shrewd and practical enough in its way—"smart" would probably be the term applied to it by some folk. But we are obliged to confess, although the admission places us below the standard of our contemporary's business capacities, that really the idea never occurred to us. We did not imagine that there was any question of rivalry, nor do we even now perceive what on earth a paper like the *Yorodsu Choho* has to apprehend from the competition of the *Japan Mail*, or *vice versa*. It is pleasant and interesting to hear what the Japanese have to say about their country and themselves. We are not conceited, we hope, not having the slenderest grounds for conceit, and being thoroughly sensible of the very poor figure that a paper like the *Japan Mail* cuts in the company of good English journals published in England. Hence when the *Yorodsu Choho* says that "the *Japan Mail* prides itself for its being the largest and best-conducted English newspaper on this side of the Suez Canal," it credits us with an estimate as exaggerated as it is amusing. Knowing well the value imparted to the columns of an English local paper in Japan by contributions from Japanese writers, we have always welcomed such contributions, welcomed them substantially, and it is certainly true that the encouragement offered by us to Japanese essayists has been as great as our resources permitted; perhaps greater than they justified. Thus the queer little motives ascribed to us by the *Yorodsu* are not painful. Faint breezes of spleen have ceased to ruffle us. But we do not like to see the Japanese do anything in such a manner as to provoke ridicule. The English legends that used to figure profusely on sign-boards in Tokyo and Osaka were very laughable. They did more than excite mere laughter, however; they inspired a feeling of contempt. It was impossible to escape the dilemma that the composers of such legends were either lacking in a sense of appreciation or profusely endowed with self-assurance. No country can afford to have the streets of its chief cities placarded with indications of such a nature. They suggest childishness, levity, unpracticality. The legends have disappeared in great part. A few remain, but they are too rare to be obtrusive. They have been succeeded, however, by a mania for writing articles and essays in English. If the *Yorodsu Choho* had any idea of the kind of comments that these efforts evoke, it would understand our objection to them. They simply lower the foreign estimate of Japan's moral standard. There are exceptions, of course; several exceptions. But the general rule is that while the English of these compositions indicates a lamentable deficiency of scholarship, the mechanical effort of constructing them in a strange tongue seems to have cramped the ability

of the writers. They seldom give any indications of the verve, originality and directness that characterise many articles appearing in the leading dailies of Tokyo. Their syntactic and grammatical solecisms offend, and their intellectual quality offers little compensation. They put an argument into the mouths of folks who contend that the Japanese are not to be taken seriously. Such results are painful to any friend of Japan. That is the kernel of the matter. As for the *Yorodsu Choho*, it need not be at all concerned about its English. It was excluded from our reference for reasons which its editors will easily appreciate.

ENGLAND'S PRESTIGE.

What is the matter, we wonder, with England's prestige. There has been much talk about the article lately in the columns of local journals, most of the talkers being apparently agreed that it has been misplaced, or lost, or suffered some kind of injury. But for our own part we think that it is pretty much where it always was—just about as high up as ever. During thirty years' residence in the East we can not recall an interval, not one solitary interval, when somebody or other was not always lamenting in something or other the disappearance of British prestige. It seems to have a most plaguy habit of getting lost, or else a certain class of persons labour under an imperious necessity to proclaim its exit from the scene. If a line of division had to be drawn through British communities in China and Japan, those on one side would be found mourning the demise of their country's prestige, and those on the other looking for a post to nail up a piece of bunting. To tell these anxious patriots that the flag floats where it always floated, and that the prestige stands as much *en evidence* as ever, is a dangerous experiment for anyone that objects to being called names. But in point of fact their trouble is purely subjective.

So far as we can discover, the latest suicide of the prestige is supposed to have taken place in connexion with Liaotung. England failed to aid Japan in keeping the peninsula, and thereby not only lost a unique opportunity of winning Japanese friendship, but also suffered Russia to become the leading Power in the Orient. Do such criticisms really represent the outcome of profound thought? Do they represent the views of intelligent Japanese? To use a homely but apposite phrase, Japan wanted to bite off a great deal more than she could have conveniently swallowed when she stipulated for the cession of Liaotung. In the first place, it would have been a source of heavy and permanent expense to her; in the second, its possession would have deprived her of many of the advantages of her insular position. She ought to be thankful that no one interfered to hold her to her own bargain. We do not claim for England the credit of having stood aloof in consequence of her solicitude for Japan's best interests. But we do say that if she had detected any general advantage in Japan's tenure of Liaotung; if she had deemed that the peace of the East would be guaranteed by that arrangement, she would have made her voice audible quickly enough. As to her having lost an opportunity of winning Japan's gratitude and good-will, there need

be nothing said but that other and far more important opportunities will be afforded by events which, unfortunately, neither England nor Japan can completely control. The outlines of the final situation in the East are already mapped out too clearly to be misinterpreted. If England refrained from thrusting herself into the Liaotung complication, it was not because her hands were busy elsewhere, but because she perceived the unwisdom of such interference. Why is not some comment made by these critics on the fact that she offered no remonstrance against the cession of Formosa to Japan? Did her abstention in that matter establish no claim on Japanese gratitude? If she had entertained any doubt of Japan's friendliness towards her, or of her own towards Japan, she would not have allowed the latter to acquire in the China Sea a position quite as menacing to British interests as a Japanese occupation of Liaotung would be to Russian.

We do not think that, in the eyes of discerning people, England's prestige has become a vanishing quantity because she is self-contained, independent and unperturbed. Everything comes to him that knows how to wait. We shall see what Power will emerge in the best condition from this scramble that has been going on in the Far East since 1895.

"THE NAVIES OF THE PRESENT ERA."

A work which might have been expected to emerge from the brain of some ambitious author and some enterprising publisher long ago, has only now seen the light of day. It is the *Konsei Kaigun*, or "Navies of the Present Era." Mr. Fukumoto Makoto is the writer. His name is not familiar to us, but for that we are probably ourselves to blame. He seems to have performed his task well; namely, to place before Japanese readers a clear idea of the navies of the world as they are to-day. The book is divided into seven chapters, covering upwards of five hundred pages. The first chapter is devoted to general remarks on the functions of a navy, its necessity, the main objects of its armament, and the classification of its vessels. The second treats of marine international law, as observed in times of peace and of war, special notice being given to the provisions that relate to reprisals. The third discusses the Navy of Japan, setting forth its history, the method of educating and training officers and seamen, its strength and its cost. The fourth and fifth contain detailed notices of similar topics in the case of foreign navies. The sixth, discusses the naval armaments of Europe and America in the year 1896, and the seventh shows the composition and strength of the various squadrons flying foreign flags in Oriental waters. We entertain no doubt that this work will prove of great benefit to all Japanese students of naval matters. It is the "Brassey" of Japan.

TEA INSPECTION IN THE U.S.

It having been reported that the only ports in the United States open for the inspection of Tea from Japan were to be San Francisco and Tacoma, and that Teas shipped through any other Pacific port would be seriously delayed by samples having to be sent to one or other of the above-mentioned ports, the Nippon Yusen Kaisha recently cabled their agent at Seattle for confirmation or denial of the statement. Mr. Griffith's reply sets the matter at rest, as his answer to the enquiry, "Is it true that San Francisco and Tacoma are the only ports of inspection for Tea?" has just been received and is as follows:—"The report is utterly false. Inspectors have been appointed for Puget Sound; this applies equally to Seattle and Tacoma."

FORMOSAN ADMINISTRATION.

Recently issued Imperial Ordinances divide Formosa into six prefectures and three administrations, the latter being of the same character as the Hokkaido Administration. The prefectures are Taipeh, Hsinchu, Taichu, Chia-i, Feng-shan and Tainan; and the administrations, Ilan, Taitung and the Pescadores. There is to be a Governor in each prefecture and a chief in each administration, and the total official staff of the prefectures and administrations is to number 1,200, including secretaries, police-inspectors, chiefs of police, tax collectors, engineers, wardens of jails, clerks, interpreters, &c. The salary of governor ranges from three thousand to four thousand *yen* annually; that of chiefs of administrations and secretaries, from 1,200 to 2,000 *yen*; that of chiefs of police, from 1,000 to 1,800 *yen*; that of chief treasurers, tax-collectors, wardens of jails and police-inspectors, from 700 to 1,200 *yen*.

The following have been gazetted Governors of Prefectures and chiefs of administration in Formosa:—

Mr. Sakurai Tsutomu, (now Governor of Yamaguchi) to be Governor of Hsinchu.
Mr. Isogai Seizo, to be Governor of Chia-i, in addition to his present office of Governor of Tainan.
Mr. Kinoshita Shuichi, to be Governor of Feng-shan.
Mr. Saigo Kikujiro, to be Governor of Ilan.
Mr. Sagara Nagatsuna, to be Chief of the Taitung Administration.
Mr. Ijima Kaneyoshi, to be Chief of the Pescadores Administration.

Twelve gentlemen have also been gazetted to be Secretaries of Prefectures and Administrations; four to be Chiefs of Police and one to be a Jail Warden. It may be presumed that the Ministry has now been duly careful to choose competent men for service in the island.

THE INDUSTRIAL BANK.

A detailed report, gathered from the most trustworthy sources, is given in the *Mainichi Shimbun* to show the amount subscribed by various cities and prefectures to the Industrial Bank.

Cities and Prefectures.	Shares subscribed.	Security deposited. Yen.	Shares allotted.
Tokyo	220,676...	5,510,900...	15,105
Osaka	81,453...	2,036,325...	5,572
Hiogo	47,754...	1,193,850...	3,269
Kyoto	38,127...	953,175...	2,610
Kanagawa ...	30,234...	755,853...	2,069
Aichi	21,015...	525,375...	1,439
Shiga	20,795...	519,875...	1,423
Shizuoka	20,366...	509,150...	1,394
Fukuoka	17,066...	426,650...	1,168
Miye	16,352...	413,800...	1,119
Saitama	14,782...	369,550...	1,012
Niigata	14,372...	359,300...	984
Chiba	13,821...	345,525...	946
Tochigi	10,768...	269,200...	737
Nagano	10,629...	265,675...	727

Totals..... 578,208... 14,460,200... 39,574

It will thus be seen that more than thirty per cent. of the shares of the Industrial Bank are in the hands of the citizens of Tokyo.

HEAVY SENTENCES FOR ARSON.

Sentence was delivered in the Yokohama Chiho Saibansho on the 31st ult. in the cases of certain prisoners who were proved guilty of setting fire to the house of Mr. Takashita Kuranemon, in Koza-gori, Kanagawa Prefecture, in December last, the crime having been committed through political differences. The two principals Kato Toyaburo and Ogura Yagoro, were sentenced to life imprisonment; and the accessories, Kojima Yonosuke, to 15 years' imprisonment; Kaneko Kumesaburo, Saenuma Tamakichi and Shinoda Masagoro to 12 years' imprisonment; and Shimidzu Shotaro and Enomoto Niichi to ten years' imprisonment, with hard labour.

FORMOSAN AFFAIRS.

Public peace does not appear to have been restored yet in Formosa. The following items of intelligence, dated May 24th, are said to have been officially received in Tokyo:—

The rioters that attacked Twa-tutia on May 8th are now hiding in the mountains. Numbers of turbulent people are found in Gilan also.

Information having been received on May 13th that insurgents were assembling in force at a place about two miles and a half south-east of Taipeh, a body of gendarmes, 175 strong, marched against them from several directions, and killed forty-four, without suffering any loss.

On the 12th of May a band of some two hundred rebels surprised the gendarmes in Shōkei (?), but were repulsed with a loss of 20 men. Japanese re-inforcements having arrived quickly from Gilan and other posts, the rebels were overpowered and fled to the hills.

On the 13th of May, two ringleaders of the insurgents in Taipeh were surrounded by natives while passing through Hoshinsho (?). One of them was killed and the other captured. The gendarmes are now searching for the latter, who appears to have been hidden away.

At 3 p.m. on May 15th, the mail carrier was attacked by insurgents on the road to Kagi, and both carrier and mails disappeared. The gendarmes have recovered the mails, but the carrier is still missing.

MEMORIALS AGAINST THE U.S. TARIFF.

The Yokohama Japanese Chamber of Commerce has forwarded the following representation to the Minister of Agriculture and Commerce:—

The United States of America occupies not only a most prominent position among the countries with which Japan is commercially connected, but also has close relations with our country in other respects. The recent expansion of our maritime service has so considerably increased the facilities of communication between the two countries, that every opportunity presents itself for the furtherance of our mutual commerce. Under these circumstances, it is absolutely indispensable that both nations should take such steps as are calculated to enlarge their commercial relations, to consolidate their friendly feelings toward each other, and to promote mutual interests. Of late, however, America has proposed, by introducing radical changes in her tariff, to impose abnormally heavy taxes on silk goods, tea, carpets, and fancy matting coming from Japan. The revised tariff has already passed the House of Representatives, and is now under discussion in the Senate, being submitted there to a special committee for investigation. Thus the problem must be decided at no distant date.

Should the proposed tariff be adopted without amendment and promulgated by the President, commerce between Japan and America will be greatly affected owing to the serious obstructions placed in its way, and not a little injury will be done to our trade prospects.

The object of the revision of the import tariff in America has been frankly stated to be the encouragement of American domestic industries. Hence it is not aimed at the productions of any one nation in particular. Countries having commercial dealings with America are supposed to share equally the consequences resulting from the enforcement of the proposed tariff. But the disparity in national conditions creates a corresponding disparity in the degree of suffering felt by each country. Japan, in particular, must be a heavy sufferer. The comparatively high taxes contemplated by the new tariff are to be imposed upon silk manufactures, tea, carpets, fancy matting, and earthen and porcelain wares, all of which constitute staple articles of production in our country.

The enforcement of such a tariff is sure to impair the commercial peace and friendship now existing between the two countries. A warning is thus necessary.

International commerce does not always main-

tain an external equilibrium. The changes of time and sentiment may bring about disparity in demand and supply; but taking a general view of the matter, it may be inferred that trade demands a secure foundation. The trade between Japan and the United States in past years has been rather one-sided. The United States have proved excellent customers for Japanese raw silk, silk manufactures, tea, &c., while Japan has only bought kerosene oil, flour, and a few other commodities. Nevertheless, railway engines and tools, cotton velvets, hardwares, and many other articles formerly imported from various countries of Europe, have recently been purchased from America.

Thus commerce with America has been advancing in proper sequence of progress, with every prospect of a brighter future. It never entered the imagination of Japanese business men that such a tariff would be presented to a Legislature which, to a certain extent, has always exhibited towards Japan a warm sentiment of sympathy. Thus it is not possible for us to keep silence.

Being confident that the proposed revision of the import tariff in America will prove of serious disadvantage to commerce, as well as impair friendly intercourse between the two countries, we beg to request Your Excellency to adopt some measures that may prevent these ills.

HARA ZENZABURO,
President of the Yokohama Chamber of Commerce.

TOKYO MEMORIAL RESPECTING THE U.S. IMPORT TARIFF REVISION.

In accordance with a resolution passed by the Tokyo Chamber of Commerce, the undersigned has the honour to present to Your Excellency the following memorial:—

The most important position in our foreign trade is held by the United States of America; and yet with the object of imposing heavy duties upon silk goods and handkerchiefs, matings and carpets, which are among our chief articles of export, that country has drafted a tariff revision bill which has already passed its House of Representatives and is now under discussion in its Senate. Should this bill unfortunately come into operation, the effect upon our principal articles of export to America would be the same as if prohibitive duties had been imposed upon them, and the trade between Japan and America which has been gradually developing for many years past would suddenly be brought to a standstill.

The effects of the United States tariff revision would certainly be felt by all the nations having commercial relations with that country, but in regard to silk manufactures, for instance, while the proposed rate of duty upon superior goods like the French is no doubt high, it is upon articles of light texture like *habutae* and *kaiki*, which may be considered the peculiar products of this country, that the duty falls most heavily. Such a consequence can not but give rise to a suspicion that the object of the projected tariff revision is especially to prohibit the importation of our manufactured goods. That suspicion is strengthened when we see that it is intended to impose heavy duties not only upon manufactured silk but also upon all other commodities peculiar to our country. Bearing in mind that Japan has always felt a lively gratitude for the goodwill shown by America in prevailing on her to open the country, and has entertained during the intervening forty years a high esteem for her as a friendly neighbour, we are really at a loss to perceive what has induced her to take this sudden action.

It may be that the apprehensions harboured by a section of the American people with respect to the competition of our manufactures are the principal cause for the present action; but such apprehensions must be pronounced excessive, being based as they are upon a complete misconception of the true state of our national industries, for our present chief exports to America are mostly articles whose manufacture or production is peculiar to our country, and include very few commodities that can be regarded as competitive articles. And the effect of the imposition of heavy duties, upon our chief exports would be, it is very clear, not only to injure their sale, but also to compel the American people to pay high prices to satisfy their natural wants and thus to entail in the end sufferings upon both nations. We can not think for a moment that a nation possessed of men of such high commercial abilities as the Americans, is blind to these patent facts, but we are inclined to believe that

the present action arose solely from a temporary misapprehension.

Though in the trade between Japan and America there has always been, it is true, an excess of Japanese exports over American imports, that state of affairs promises to change. Kerosene, for instance is chiefly imported from the United States and indeed, until lately, was almost exclusively of American origin. Ginned cotton is also very largely imported from America. And so great has been our desire to show our goodwill towards that country that we have sincerely endeavoured to maintain a balance of trade between the two countries by giving her large orders such as those for rails and warships. When we find, then that notwithstanding these expressions of goodwill, on our part, America actually proposes to prohibit the importation of our manufactured goods, the whole nation could not but be astonished at such unexpected action.

Possessing, as she does, so many clear-sighted men, we can not believe that America will allow the new bill to become law; but in view of the direct bearing of the measure upon our national interests, this Chamber of Commerce strongly urges the Government to give that country a definite friendly warning, so that the scheme may be wholly abandoned. If, unfortunately, an exorbitant tariff should, in disregard of our goodwill, be imposed upon our exports, our national feelings would, it is certain, be seriously injured and the trade between the two countries lose its smooth character.

The State should then be free, as a last measure of self-protection, to impose differential duties on American goods.

This Chamber, therefore, earnestly hopes that the Government will come to a final decision in the above line.

SHIBUSAWA EIICHI, President,
Tokyo Chamber of Commerce.

H.E. Count OKUMA SHIGENOBU,
Minister of State for Agriculture and
Commerce and for Foreign Affairs.
May 22nd, 1897.

[COPY OF TELEGRAMS SENT TO THE UNITED STATES.]

May 22nd, 1897.
PRESIDENT, United States, Washington.

Firmly believing proposed tariff injure growing trade between United States and Japan, Tokyo Chamber of Commerce respectfully and earnestly solicits serious consideration.

SHIBUSAWA, President.
May 22nd, 1897.

HOSHI, Japanese Minister, Washington.

Firmly believing proposed tariff seriously injure growing Japanese American trade Tokyo Chamber of Commerce request you earnestly to oppose the bill.

SHIBUSAWA, President.
May 22nd, 1897.

CHAIRMAN, Chamber of Commerce, New York.

Firmly believing proposed tariff seriously injure growing trade between United States and Japan, Tokyo Chamber of Commerce earnestly solicits your cooperation in opposing the bill.

SHIBUSAWA, President.
May 22nd, 1897.

CHAIRMAN, United States Senate Committee Foreign Relations, Washington.

Should tariff bill be carried out it will ruin trade between United States and Japan, Tokyo Chamber of Commerce begs your serious consideration.

SHIBUSAWA, President.

CHARITY CONCERT AT UYENO.

The concert in Tokyo, on the afternoon of May 29th, for the benefit of "a young people's library," was fairly well attended, though not so numerous as might have been expected from the various attractions offered. It was given in the hall at Uyeno, a place still nominally associated with the study of European music, but which, to those familiar with its history, is little else than a mausoleum to the memory of what the school once was, before it came to be fully realized that the Japanese were merely trifling with a noble art, and had no intention or desire to promote its serious cultivation. Two faint reminiscences of the by-gone period of real progress were included in the programme of Saturday afternoon. One was a violin solo of humble pretension, written by Sitt, and performed

with unemotional accuracy by Miss Tanomogi. The other was a concerted piece by Bach, for two violins and pianoforte, one of the many works lightly conceived by the great composer, and doubtless looked upon by him as a triviality, though the hand of the master is visible in every phrase. In all the mass of productions left by Bach to immortalize his name, there is no single fragment, however slight of purpose, that is not stamped with the impress of his strength and learning. This memorial of one of the author's genial hours was played by the Koda sisters and Miss Tachibana. It presents no technical difficulties for either of the instruments concerned, and, regarded as a purely mechanical performance, its execution was straightforward and faithful. Incidentally it may not be amiss to remind the elder Miss Koda that while light and shade have their obvious value, the effect of a *planissimo* is not increased by allowing it to become inaudible.

Foreign amateurs contributed largely to the success of the concert, several of these coming from Yokohama to lend their aid. Mrs. Walter, Miss Thomas, and Mr. Ginn were cordially welcomed, and the pleasure which their singing gave was acknowledged with abundant and hearty applause. Mrs. Alexander played a pianoforte transcription of a song from Wagner's "Meistersingers" with excellent taste and effect, in spite of one or two mischievous accidents that might have disturbed the composure of long and tried experience. Mr. von Koeber assisted even more liberally than the announcements promised. His name is always a pillar of strength in any programme, and on this occasion he was in the humour to gratify his hearers to an unusual extent. Yet he did not seem at ease with his instrument. A piano like that which does duty in the Uyeno hall is naturally irritating to the nerves of a sensitive artist. Apart from the circumstance of its exposure to severe weather while travelling in the Ark, it is probable that the animals were permitted to take injurious liberties with this venerable relic, after it was dumped on Mount Ararat with the rest of the furniture. But Mr. von Koeber's reputation is too firmly established to be shaken by a momentary lapse from his brilliant standard. Every body knows that there are times when his playing is of the very highest order, and the conditions must indeed be adverse, under which it could ever fail to be spirited and interesting. The audience of Saturday was certainly in no critical mood, and each exhibition of his skill and force was followed by a storm of enthusiasm, more than sufficient to prove that the wounds he had unavoidably inflicted upon his own ears were wholly unnoticed by the great body of his admirers.

THE ASHIO MINE AFFAIR.

The decision of the Government with regard to the Ashio mine will cost the proprietor four million yen, according to rumour, but we imagine that the usual large discount must be made on account of exaggeration. Another version puts the figure at four hundred thousand yen, which is much more likely to be true. The remedies to be employed are such as might have been expected. Ponds for filtration and precipitation are to be formed, and their dredgings are to be dumped into a walled receptacle measuring about 2½ acres in area. Further, the chimneys of the smelting works are to be fitted with contrivances for preventing poisonous exhalations, and work is to be suspended at some of the shafts pending the completion of these sanitary arrangements. Mr. Furukawa, the proprietor of the mine, has taken vigorous measures to carry out the official instructions. Of course it is in his own interest to get things completed as soon as possible, in order to resume full working at the mine. The Government, on its part, undertakes to re-plant forests that have been destroyed by the poison from the mine, and to remit the taxes in devastated areas. It is difficult to avoid the conviction that some of those remedial measures should have been adopted long ago.

THE ASYLUM RECORD.

Does any one desire to read a really invigorating description of a work of faith; a work that comes to us with exquisite freshness in these days of grinding bed-rock struggle? If there be such a person, we recommend to him the *Asylum Record*. The *Asylum* is Mr. Ishii's at Okayama. It has often been spoken of in these columns; not by ourselves, indeed, but by persons well acquainted with the institution, its noble purpose and its striking story. Yet, somehow, we seem to get our first really clear glimpse of it in the columns of the *Record*—which, we may mention, is a periodical published every alternate month by the orphans and their helpers at the Asylum. After all, it is the enthusiasts—the fanatics if you please to call them so—that accomplish great things in the world. They are the men that rise above difficulties; that illumine life's darkest trials with the fire of their faith; that never faint in their harness until they die in it. Such an one is Mr. Ishii. The columns of the *Record* are luminous with the flame of his zeal; its pages palpitate with the grand vitality of his confidence in a power that makes for good. Think what is involved in undertaking to feed and support an unlimited number of orphans without any present resources for the purpose or any visible means of access to resources. That a man should embark upon an enterprise where privations for himself, or even starvation, may be the consequence of failure, is an effort within the range of every-day courage. That he should take upon his shoulders the burden of feeding and clothing a hundred, or two hundred little children when he has neither money nor prospect of earning money to buy victuals and garments, must be called either heroic or demerited. That is what Mr. Ishii did, and the event justified him. Gifted with some extraordinary bravery begotten of absolute faith in the God that feeds the ravens, he took the orphans, any orphans that came to him; prayed for their sustenance, and they were sustained. Such is the story in a nut-shell. It is told in the *Record*; inimitably told. The massive simplicity of the men that tell it; their absolute unconsciousness of self; their complete absorption in their work—to appreciate these things one must listen to their own voices. There is a Mr. Pettee at Okayama. Our readers should know his name. His presence there might be ascribed to a special dispensation by those that believe in dispensations, for when we read his writings we understand that even the Okayama Orphanage must be the better for his association with it. Here is his summary of the Asylum's biography:

"As thou hast believed so be it done unto thee" may be called the charter creed of the Asylum. The faith of Mr. Ishii and his associates has passed by regular, though sometimes rugged, stages from an imitation born of admiration to a conviction born of personal experience; from a misty trust in a God who works by miracles, to a clear soul sight of the Heavenly Father working through human agencies; from an undue emphasis of a partial truth to a well-rounded conception of the three fold nature of faith, trust in God, in one's fellow men and in one's own right hand.

Let us now set down the statement of Mr. Ishii himself:—

Looking back upon the past I now see that my faith at first was largely an imitation of George Muller's. It was not *my own*. I thought I ought to feel then as he did after long years of growth and experience. I took George Muller's faith and by close imitation was deceived into thinking it my own. God rebuked me later and I found that I had not the faith which I had claimed to have.

But in my own experience and that of the Asylum it has always proved true that the larger gifts of grace have been exactly proportioned to the measures of my own real faith.

I have come now to recognize not only the absolute necessity for the best good of the children, of depending as little as possible on the charities of friends and as much as possible on cultivating a spirit of self help in the orphans, but also the fact that God wishes us to exercise our faith along the lines of our industries as well as of simple trust in his care of us day by day through the gifts of the benevolent.

In former days when our rice failed we fasted and prayed till relief came. I am perfectly willing to do the same myself to-day, but I no longer feel that God directs me to insist upon that course for the institu-

tion as a whole. He wishes us to train every nerve to help ourselves. If we would work we must eat, therefore it is no longer best to go without food except on rare occasions, but to work steadily and faithfully every day believing that our industries will be prospered sufficiently to give us at least the bare necessities of life.

After these years of experience we are able to estimate approximately how much we can earn with a certain plant. Hence our present exercise of faith in the loving purpose of God to give us through our own exertions and the aid of friends sufficient houses and machines to enable us largely to care for ourselves.

Is it possible to be franker? Is it possible to be more convincingly frank? We must set beside it another extract from the writing of Mr. Masatomi, the Treasurer of the Asylum:—

I first came to know of a truth the living God and to understand something of his great love from my experience as treasurer of the Asylum. Often have I run to the foot of an old pine in the cemetery and prayed to God. I called this pine the key to the Asylum's money box. At other times I have named it our telephone post. Several times when in great distress, not knowing how to turn in the care of those three hundred orphans, I have adopted the last resort and fallen on my knees at the foot of the old tree. Praying there the tree has seemed like an electric wire bringing me in direct touch with God. At the close of a season of prayer, I would return to the office and find a money order by cashing which we would be carried safely through another crisis. I have come to believe that whenever I pray at the foot of that tree money will always be given us. So I sang:—

*Kate nakuba,
Koko made koyo to
Yobu koe wo
Tayori ni kurasu
Hibi no ureshisa.*

When there is no food
lither come
With uplifted voice,
Trusting, be fed,
A daily delight.

After this fashion our Asylum, warming itself under the divine wing, has trusted in God. If any one asks about our finances, it is sufficient to reply, "We have entrusted all things to God."

It is an epic in prose—Mr. Ishii with his infinite faith, willing to fast and pray when there was nothing to eat; convinced that fasting and prayer were the best resource for all under such circumstances; Mr. Masatomi on his knees at the base of the old pine tree, crying to heaven to fill the mouths of the three hundred hungry orphans, and finding money orders in answer to his supplications. And then the gradual invasion of Mr. Ishii's ecstatic domain by the hard realities of life! He still has no objection to fasting and praying for his own part, but he doubts the efficacy of that plan for little children. "Years of experience have taught him the greater wisdom of estimating approximately how much we can earn with a certain plant." So the children are now working lustily. Would it not be a comical contrast were it not so insistently realistic? They have printing presses and type worth two thousand dollars and they can not keep abreast of the orders that come to them. They have also looms at which they weave *neru*, a species of cotton fabric. They publish a monthly paper, as well as the *Record*. They have a farm, a musical band, and various other minor occupations. It appears that if they could earn 20 *yen* a day, their needs would be satisfied. Twenty *yen* a day to feed, and clothe 300 orphans; something like six *sen* a piece, or less than three half-pence! But they seem to be earning only fifteen *sen* at present. "My brothers and sisters throughout the world, it is my earnest prayer that our Orphanage, attaining independence, may rescue a large number of needy children and may be aided by you to such an extent as to give these waifs a suitable education."

Trade returns of the export and import of raw and waste silk in Yokohama for last month are as follow:—

Raw Silk.	Bales.	Waste Silk. Bales.
Arrivals	3,535.....	1,823
Sales	3,507.....	2,218
Exports	3,375.....	5,218
Contracts broken	6.....	—
Shipped back	1,458.....	9

CAMPOR PRODUCTION IN CHINA.

With Formosa in her possession, the alluring prospect of monopolizing the camphor production of the world seemed to lie before Japan. Many people assumed that some such hope was not the least potent of the influences that induced the Shimonoseki negotiators to insist on the cession of "the beautiful island." We do not ourselves entertain any such extreme views, but unquestionably the camphor industry in Japan and Formosa, if co-operatively and intelligently worked, might be made a source of great profit. It is with much interest, therefore, that we observe signs of the development of the same industry on the mainland of China. If it should turn out—as present indications seem to show—that camphor can be produced in China to a practically unlimited extent, the significance of the fact is apparent. That the camphor tree has been known to the Chinese from ancient times, though only recognised as a valuable tree during the past three or four centuries, and that it grows freely in the central and southern provinces of the huge empire, every one is aware. Giants of the forest, from 8 to 9 feet in diameter, are said to be common in Kiangsi, and few foreigners in China are without some article of furniture made of camphor wood. But the point is that, until a very few years ago, the camphor of commerce was not produced in China, so far as we know, whereas in 1895 no less than 1,776 piculs were exported thence. The *Pharmaceutical Journal* for March 6th contains a short essay by Mr. Augustine Henry on this subject. We extract the gist:—

The growth of the camphor industry on the mainland of China is shown by the following facts taken from various China Customs' Yellow-books. From the 'List of Chinese Medicines,' misc. series, No. 17, which gives details of the trade in drugs of all kinds for the year 1885, it appears that camphor was unknown as a product of the mainland, except in the single province of Chekiang, there being the small export that year from Ningpo of 25 piculs. Ningpo exported 32 piculs in 1886, 40 piculs in 1890, and none since apparently. The Customs' 'Trade Reports' for the different years show the gradual appearance of camphor production in other parts. Kowloon exported 8 piculs in 1888, 105 piculs in 1892, 887 piculs in 1893. This was conveyed in junks, and its provenance is doubtful, but it was perhaps from the province of Kwangsi. Canton exported 122 piculs in 1891, 37 piculs in 1894, and 237 piculs in 1895. This is Kwangsi camphor. The Pakhoi Trade Report for 1894 states that the first record of the article was in 1892; in 1893 the export was 23 piculs, which increased to 118 piculs in 1894; and 'it comes from Luchuan, near Yu lin-chow, and is likely to grow in importance, as plantations in that and other places in the neighbourhood are coming to the bearing age.' In the Pakhoi Trade Report for 1895, the export is given as 506 piculs, and the writer says that this gratifying increase is due to the extended cultivation in Kwangsi. In Formosa only old and enormous camphor trees are utilised, and I am inclined to doubt of the existence of camphor plantations in Kwangsi; the camphor produced is more likely to be from old forest trees. The Chinese at any rate did not plant any trees with a view to the manufacture of camphor.

In 1895 the exports of camphor from different Chinese ports was:—Foochow, 187 piculs; Amoy, 678 piculs; Canton, 237 piculs; Kowloon, 68 piculs, and Pakhoi, 506 piculs. In the Fukien province there are large forests and camphor trees abound. Some years ago a party of Japanese went into the interior of Fukien to manufacture camphor, but nothing came of this attempt. The Foochow export is probably the product of this province, but that of Amoy is doubtful, as it may be Formosan camphor smuggled over to the mainland in junks. The export of the other three ports is produced in the Kwangsi province, and this will probably grow into large figures if camphor continues high enough in price to encourage the Chinese in its manufacture.

To sum up, the production of camphor on the mainland of China is an affair of the last few years. It began in Chekiang, but has practically ceased in that province. In Kwangsi it commenced a short time ago, and promises to develop into importance. The Fukien product is only trifling so far.

SERIOUS RAILWAY ACCIDENT.

The fatal accident briefly reported by telegram the other day as having occurred on the 31st ult. in the No. 7 tunnel of the O-u line of the Yonezawa Railway, appears to have been wrongly reported. It was first said to have been caused by a caving-in of the tunnel, by which three persons were killed and others injured. It appears, however, from later news received, that the accident was caused by a collision between a locomotive and a service or goods car, and eight workmen were killed on the spot and twenty-four severely injured.

EXPORT OF SILK FROM YOKOHAMA.

According to the report of the Doshin Kaisha of Yokohama, as published in the *Mainichi Shimbun*, the amount of silk exported from this port by the various firms and companies during the ten months ended in April this year, was as follows:—

From	To America. Bales.	To Europe. Bales.	Total. Bales.
No. 1	1,210	723	1,933
No. 2	885	2,130	3,015
No. 3	12	2,545	2,557
No. 22	1,018	—	1,018
No. 50	—	1	1
No. 51	—	—	—
No. 71	87	72	159
No. 88-a	312	—	312
No. 89	33	29	62

No. 216	467	—	467
No. 221	378	378	378
Joint Stock Silk Corporation ...	4,045	570	4,615
Mitsui Bussan Go-meï Kwaisha...	855	—	855
Doshi Kwaisha ...	1,368	—	1,368
Totals.....	22,372	20,583	42,955

The above figures show a considerable decrease in export, especially to America, as compared with the two previous years.

THE GRAND DUKE OF MECKLENBURG-SCHWERIN.

Reuter's telegram that the Grand Duke of Mecklenburg-Schwerin committed suicide, turns out to be wholly baseless. The Grand Duke had been seriously ill for some time, and medical bulletins as to his condition had been posted up thrice daily for about a week before it became apparent that all hope of his recovery must be abandoned. What then occurred is told in the following translation of the official report compiled by the Mecklenburg Minister of State:—

On the 10th April the weakness of the heart during the day, risen to such a degree that the physicians expected positively that the Grand Duke would scarcely survive the night. Having suffered a great deal through want of sleep, he felt a desire for rest at 7.30 o'clock in the evening, and wished, as usual in such cases, to be left alone. The Grand Duke then attempted to sleep, while sitting in a rolling chair. The physician and the servants retired, but listened in the hall, watching the breath of the illustrious patient, which was distinctly audible, at first as oppressed, but later on easier. After some time, the breathing being no longer discernible, the physician, fearing the end had come, entered the room and found it empty. At the same time a servant reported that the Grand Duke had been found lying on the road before the villa; shortly afterwards he was brought back badly injured. The Grand Duke had apparently, as was his habit when oppressed by breathlessness, sought for fresh air, had thus reached the garden in great debility and was precipitated over the low border-wall, which was only distant a few paces from the door, into the street, which was at considerable depth below. There he was found by the wife of the gardener and a body-servant named Gatzow. When the Grand Duke was brought into the room, the physician found that the backbone was injured. In the meantime the relations had assembled round the bed. The Grand Duke addressed to his relations and Prince and Princess Henry XVIII. Reuss some words of love, embraced his sons, and passed away quietly after an hour.

ENGLISH-SPEAKING SOCIETY OF THE H. C. S.

A public exhibition of the English-speaking Society of the Higher Commercial School, was held on Saturday evening in the Lecture Hall of that institution. In spite of the bad weather over a thousand persons were present, and the spacious building was literally packed, leaving scarcely any standing room. The performance was, we think, on the whole, better than that of last year, and the students did ample justice to their reputation as the best English scholars in the Government schools of Japan. Prof. Kanda said, in his opening address, that the programme had been made studiously simple, in order to counteract the tendency among students of English to attempt things beyond their power, and thus to encourage the cultivation of practical English. The singing, especially the "Hunting Song," with its echo from a distant gallery, was very effective. This item, in fact, was remarkably good, considering that the song was hastily got up for the occasion.

PROGRAMME.

PART. I.

1. Opening Address.....Prof. Kanda.
2. My School Scrape (Original).....M. Yamazaki.
3. Webster and the Woodchuck (Adapted).
Father.....S. Yamazaki.
Ezekiel.....M. Kobayashi.
Daniel.....R. Furugori.
 Song:—Mountain Maid's Invitation.
4. Recitation: Rescued (By Celia Thaxter)
 N. Shibutani.
5. The Proposed Female University (Original).....
 Y. Takimoto.
6. The Noblest Deed of All (Adapted).
Father.....S. Nakamura.
1st son.....M. Hori.
2nd son.....I. Ozaki.
3rd son.....T. Kuwita.
 Song:—The Battle-cry of Freedom.
7. The Dream of Eugene Aram (Thomas Hood)
 K. Tanaka.
8. The Table Reversed (Adapted).
Emperor.....D. Miyazaki.
Major.....S. Sasaki.

PART. II.

9. Selection from "Terakoya."
Matsumaru.....T. Kato.
Gemba.....K. Shiramine.
Tonami.....Y. Ihara.
Genso.....H. Tetsuka.
School Children.....
 { Y. Takatsuka.
 { M. Sasaki.
 { K. Sato.
Kwan Shusai and Kotaro.....Y. Saito.
Farmers.....
 { J. Sukegawa.
 { K. Kawamura.
 Song:—Hunting Song.
10. The Moral Defect of our Merchants (Original)
 Z. Murai.
11. Queen Isabella's Resolve (By Violet).
Queen.....K. Oyaizu.
Don Gomes.....B. Ishikawa.
Columbus.....K. Takaku.
 Song:—Good Night.

CHINESE NOTES.

Accounts from Kansu tell of terrible cruelties perpetrated by the Chinese against the Mahomedans. Hundreds, probably thousands, of Mahomedan women and children are said to have been carried off by the Chinese soldiers; many of the women were brutally outraged, and it is estimated that fifty thousand Mahomedans have been killed in the Sining district. To submit on promise of being spared has meant, in most cases, to be butchered. The unfortunate people have been stripped of everything they possessed, and it is thought that their sufferings must goad them into renewing the rebellion. In that event much, if not everything, would depend upon the attitude of the Mahomedan troops in the Government's service. If they went over to the rebels, it would be difficult to restore order. Meanwhile the northern and western parts of Kansu have been devastated by a plague of field mice. Thousands upon thousands swept over the fields when the crops were almost ripe and consumed every grain of corn.

The oldest of the old residents of Yokohama

must confess that his record is young when compared with that of Mr. R. F. Thorburn, who has just left Shanghai. Mr. Thorburn arrived in Shanghai in 1846. Since 1878 he has been Secretary of the Municipal Council. He remembers the time when the British Consul lived in the native city, where the Taotai's *yamen* now stands, and when the foreign residents were located in a street leading to the Little East Gate. A warmly worded address and a handsome piece of silver work were presented to him on his departure from Shanghai.

H. E. Sheng's difficulties in procuring funds to build the railways, with the construction of which he is charged, continue to be apparently insuperable. A Belgian syndicate, supposed to be acting in the interest of French and Russian capitalists, was prepared to lend him four millions sterling, but his enemies in Peking defeated the scheme. The talk in the capital now is said to be that the building of the roads will be deferred until the whole of the indemnity is paid to Japan.

HAWAIIAN NOTES.

From Hawaiian papers just received we infer that public excitement, about the question of Japanese immigration has greatly subsided, and that there is a disposition to regard the Japanese with friendly eyes. Here are two cuttings from the principal Honolulu journal:—

Commissioner Akiyama's statement of his mission is concise and not intended to stir up a war-like spirit. No citizen of this country can object to a fair investigation of the immigration affair. In fact, the people here have reason for the most kindly feelings in consequence of the dignified and conservative attitude thus far maintained by the Japanese Government. The Oriental officials have a large number of hot-headed and thoughtless people behind them to whom they must cater to a certain extent and at the same time hold them in check.

The big Japanese cruiser *Naniwa* has now been in port several days. The quiet and courteous bearing for which these people are so noted has characterized them, thus far, from Counsellor Akiyama and the officers of the ship down to the common sailors. This has had a salutary and quieting effect on the little ripple of excitement incident to recent occurrences. It is understood that during the week, further inquiries and negotiations will begin, regarding matters of recent occurrence connected with the refusal of this Government to let certain Japanese immigrants land here. There is no reason why these inquiries and discussions should not be characterized by the utmost courtesy and good feeling on both sides. We believe they will be so conducted on the part of the Japanese, and the Hawaiian Government will of course meet them half way.

The members of the press of Honolulu gave a banquet on the 15th of May to the representatives of the Japanese press that proceeded to Hawaii in the *Naniwa*. It was the first time the newspaper men of the republic had combined to extend such a courtesy. Flags of all nations were supplied by the *Naniwa* for decorative purposes.

Here is an item about the Japanese in Kona:—

Kona, Hawaii, May 10th.

The interest in coffee is still on the increase. A great many Japanese are leasing small holdings for about 15 years at from \$1 to \$5 an acre, yearly, according to quality and location of land. The Hawaiians are taking quite an interest in coffee, but the Japanese and Portuguese are rather more enthusiastic. These two nationalities are very economical and industrious. Most of these people were brought to Hawaii as contract labourers, but now many of them have comfortable little homes. With the influence of the church and the splendid free schools, the Portuguese will soon become valuable citizens. Their children have learned to speak English at the schools and the parents are learning it from the children.

The Japanese do not try, like the Portuguese, to rise socially. There is no ceremony over a wedding like the Portuguese. In fact, it is hard to tell who of them are married. While they are of a social nature, being fond of games, their principal desire seems to be to live economically and save money. They are not addicted to opium, like the Chinese, but they rather like strong drink, though seldom indulging to excess.

KOREAN NOTES.

"The corruption, brutalities, and total lack of justice which prevail among the majority of Government officials at present," says the *Sōul Independent*, "are very lamentable, and, at times, make a Job-like man impatient." Any reader of the *Independent's* columns must endorse that criticism, but, at the same time, we wonder whether all the items appearing there are trustworthy. The *Independent* seems to insert every anti-official complaint sent to it without discrimination. One of the latest examples is the following, which is published on the authority of "two citizens of Okkwa, Chulla province":—

"The Magistrate of our district has been doing some tall squeezing since his arrival here. Some unknown citizens wrote out the crooked deeds of the Magistrate and posted them in the market places. The Magistrate suspected a wealthy citizen named Sin Dongsik of the district of implication in the exposure of his shortcomings, and set fire to Sin's house and furniture, and tortured Sin and his two sons until each man's legs were broken. He further ordered the people to erect a stone monument in the district in his honour. He collected over \$300 for the monument fund from the people and bought land with it instead of erecting a monument. Now he states that he appreciates the land more than a monument. As far as we, the people, are concerned, we never wanted to erect a single tablet for him; so the matter has been settled rather fortunately. But it would have been more frank if he had asked the people to buy him some land in the beginning."

A placard posted in Chongwo on May 19th is said to have caused great excitement among the people, but the *Independent* does not tell us in what language the placard was written:—

Those who live in Korea and have eyes, look at this notice! The Imperial Japanese Government especially concluded the treaty of friendship and commerce with the Korean Government eight twenty years ago. Since then Japan has felt sorry for the internal troubles of the Korean Government which retarded the progress of the nation so she sent a great army two years ago, punishing the conservative Chinese for the clarification of the Korean Government, also with the view of maintaining the peace and interests of the whole Orient. But lately the wicked gang of the Korean Government has succeeded in deteriorating the intelligence of His Korean Majesty, causing him to change his abode in the Foreign Settlement (Chongdong). Thereby the policy of the Government became impure and confused, and the continuation of the dynasty has been rendered precarious. It is the law of nations that when a country's Government becomes so bad, that there is danger of the trouble being extended to a neighbouring nation, then the latter can properly interfere with the internal affairs of the former Government and settle the trouble for the good of all concerned. Japan and Korea have been tied with the alliance of offense and defence, and Japan entertains sympathy for the unfortunate condition of her friend—Korea. She may, at any time, take steps to drive away the wicked gang from that Korean Government in consideration of the friendship which Japan cherishes for Korea. In that case the public must not be alarmed. The 30th year of Meiji, 19th of 5th month."

To us the placard reads very much like a device to bring the Japanese into fresh suspicion and disfavour.

Another sum of \$20,000 has been appropriated towards the expenses of the royal funeral in Korea, and the Funeral Board has engaged 3,337 men as lantern carriers during the ceremony. These royal obsequies are growing to wonderful dimensions. The *manes* of the unfortunate Queen ought to be appeased.

Officers in the Korean Army appear to be a curiously ill conducted set of men. Every mail brings news of brawls in the streets of Sōul or cases of drunkenness and insubordination in which officers are the chief actors. What is stranger still is that a week's imprisonment seems to be considered quite an appropriate punishment for a Lieutenant. What a farce must an army be that is thus officered.

The War Office has presented a suit of old Korean armour to Colonel Putiata "as a souvenir."

JAPANESE POST-BELLUM FINANCE.

In considering the problem of Japanese finance, the object of chief interest is to ascertain precisely what additional burdens the War has imposed on the nation. To that end we have to examine and compare the public accounts before and after the War, discriminating, as far as possible, between ordinary and permanent income, on the one hand, and extraordinary and temporary income on the other. Obviously the year during which the war actually occurred must be excluded from the reckoning, the methods of appropriating and distributing State funds at such a time being quite abnormal. We proceed, then, to consider the figures for the year immediately previous to the War, and for the three years subsequent to it, taking the Revenue first:—

	1896-7.	1897-8.
	Yen.	Yen.
Ordinary Revenue	85,883,081	95,304,478
Ordinary Revenue	107,953,720	129,540,833

[N.B.—In the Ordinary Revenue for 1896-7 there is included a sum of 6,082,237 yen, being the Revenue from Formosa, and a sum of 303,750 yen, being Interest on Deposits, which was added by means of a supplementary Budget presented to the Diet at the beginning of the 1896-7 session. Similarly, in the Ordinary Revenue for 1897-8, the receipts from Formosa, 8,112,264 yen, are included, as well as a sum of 18,324 yen, being Receipts under the Relief Law for Officials, which was added by a Supplementary Budget. In analysing the Ordinary Revenue, however, we shall omit the Formosan Receipts. These explanations are offered for the convenience of readers who may desire to verify our figures by reference to official records.]

The Ordinary Revenue is derived from two principal, and two minor, sources; the former being Taxation and Government Industries; the latter, Miscellaneous Receipts and Interest on funds deposited in the Bank of Japan:—

	1893-4.	1895-6.
	Yen.	Yen.
Taxes.....	72,470,122	77,273,678
Receipts from State Industries.....	11,743,269	15,897,379
Miscellaneous	750,476	1,065,364
Interest on Deposits ...	913,214	1,068,057
	85,883,081	95,304,478
	1896-7.	1897-8.
	Yen.	Yen.
Taxes.....	82,602,924	98,469,773
Receipts from State Industries.....	16,353,267	20,420,900
Miscellaneous	719,976	813,711
Interest on Deposits ...	1,595,316	1,724,185
	101,271,483	121,428,569

[N.B.—In "Taxes" for the year 1897-8 we have included a sum of 850,408 yen, derived from the monopoly of Leaf Tobacco. This amount appears under the heading of State Industries in the official Budget.]

The fact that the revenue from taxation increased from 72½ millions in the year before the War to 98½ millions in the second year after it, does not indicate an actual addition of that amount to the people's burdens. A small part of the increment results from natural growth of the income from taxes of which the rates have remained unchanged during the years under review. It will be convenient to deal with these latter taxes at once:—

	E.	
	REVENUE FROM TAXES THE RATES OF WHICH HAVE REMAINED WITHOUT CHANGE.	
	1893-4.	1895-6.
	Yen.	Yen.
Land Tax.....	38,808,680	38,663,119

Tax on Issues of Convertible		
Notes	—	—
	52,387,596	52,097,418

It will be seen from the above that five taxes which contributed regularly to the Revenue up to the fiscal year 1896-7, do not appear in the figures for the year 1897-8. They are the Tax on Boats and Ships—a trifling amount of 10 yen, not collected in 1896-7, stands to the credit of this tax in 1897-8, but does not indicate the continued imposition of the levy—the Tax on Confectionary, the Tax on Vehicles, the Tax on Horses and Oxen, and the Fees on Permits, &c. These five taxes, representing an income of 1½ million yen, approximately, were all abolished from the year 1896-7. Taking that fact into consideration, and comparing the total figures for 1893-4 with those for 1897-8, it will be seen that the aggregate increment in the receipts from the remaining taxes is 3½ million yen. We may therefore conclude that the revenue from these taxes grows at the rate of over 6 per cent., approximately, in 4 years, or 1½ per cent. annually.

Simultaneously with the abolition of the above taxes, the rates of two others (the *Saké* Tax and the Tobacco Tax) were raised, and two new imposts (a Registration Tax and a Trades Tax) were enacted. The Registration Tax Regulations require that companies, firms, professions, patents, trade marks, births, deaths, marriages, divorces, etc., shall be registered. Details may be gathered from a translation of the Law appended to this essay. The Law, of course, has much interest for foreign residents in view of their approaching submis-

sion to Japanese judicial and fiscal systems. The income to be derived from the tax was officially estimated at 6,808,449 yen annually, but its operation has proved very irksome in so far as personal matters are concerned, and the Diet, during the session just closed, passed a Bill exempting all such incidents from the scope of the impost. The consequence of that change will be to reduce the yield of the tax by about 1½ million yen, so that the revenue accruing from it will not greatly exceed 5 millions.

The Trades Tax is levied upon sales, contracts, rent of business premises etc. The particulars will be learned from the appended translation of the Law, to which the same remark applies as to the Registration Law in respect of its interest for foreign residents. The income expected from this tax was 7,551,377 yen yearly, and that the figures taken by the Government as a basis of calculation are moderate may be seen from the following table:—

F.	
OFFICIAL ASSESSMENTS FOR THE PURPOSES OF THE TRADES TAX.	
Total Sales annually throughout the	Yen.
empire.....	1,599,653,605
Total Contracts, etc.....	7,220,000
Total Fees of Middlemen, etc.....	1,185,200
Total Rent of Business Premises ...	47,766,417
Total Number of Employés	1,875,943
Total Number of Artizans	2,082,948
Total capital invested in various enterprises	644,402,054

Nevertheless great difficulty is experienced in collecting this tax. Among the taxable items the only one that can be officially fixed with certainty is the "capital invested in enterprises;" all the rest depend upon the statements of the taxpayer, and are therefore subject to large variations. It is found that the returns furnished by individuals differ greatly from the estimates formed by the Government, and since the Law does not provide any standards to guide assessors, the situation has become difficult. It can not be doubted, however, that the tax is fully capable of yielding the income anticipated, and steps will doubtless be taken next session to remedy the deficiencies in the Law. It may be noted that the sum supposed to be derivable from the tax seems small in view of the great industrial energy for which the past two years have been remarkable. But the tax does not become leviable in the case of any enterprise until a year after the actual commencement of business, and many enterprises are exempted for a term of three years—for example, banking, insurance, ware-housing, manufacturing, printing, transport (by land or river), docks, anchorages and landing places. The tax may therefore be expected to yield a considerably larger sum by-and-by.

The increased *Saké* Tax was set down to give an additional income of 9,284,544 yen, but experience shows that it is likely to prove much more prolific, for the new rates have had the effect of greatly diminishing the manufacture of *saké* for

domestic consumption, which has always been treated with curious tenderness by Japanese legislators, the theory being that the poor man ought to be allowed to make *saké* for himself and his family at the lowest possible cost. The *saké* thus brewed is a muddy, impure beverage, not unwholesome, however, and much affected by the lower orders. But there are two cogent reasons against the liberty granted by the Law to domestic manufacturers. One is that great abuses undoubtedly take place: men in comparatively easy circumstances take advantage of the permission, and manufacture untaxed *saké* though they could well afford to purchase the taxed liquor. The other is that the condition of the farmers—for whose special benefit the exemption was originally made—does not justify any consideration of the kind: they are conspicuously prosperous, and owing to the rapid appreciation of agricultural products during recent years, as well as to the development of means of communication by which the large urban markets have been rendered easily accessible to bread-stuffs coming from the remotest rural districts, the incidence of taxation has become constantly lighter for the farming class. The old *Saké-Tax Law* provided that any person not engaged in the liquor trade, and not keeping a public house of entertainment, might brew for family use any kind of *saké*, except the clear variety (known as *seishu*) to the maximum quantity of 1 *koku* (39.7 gallons) on payment of a licence fee of 80 *sen*. The new Law raises the rate to 2 *yen* per annum where the quantity brewed does not exceed 1 *koku*, but permits the brewing of 2 *koku* on payment of a licence fee of 6 *yen*, and the brewing of 3 *koku* on payment of a fee of 12 *yen*. The result is that all kinds of *saké*, except the choicest, may be brewed for family consumption, in quantities varying from 39.7 gallons to 119 gallons, on payment of a tax not less than a penny farthing, and not exceeding seven-pence half-penny, per gallon. It is difficult to discover any sound reason for such a system, or to doubt that the private brewing of *saké* will ultimately be interdicted, with marked benefit to the income of the State. Concerning the taxation of *saké* for purposes of sale, the new Law fixes the rate at 7 *yen* per *koku*, or 17.6 *sen* (4½d.) per gallon. Unquestionably a prolific source of increased revenue offers itself here. Considering that Great Britain derives a revenue of 260 million *yen* from excise duties, and that Belgium, with a population of 6½ millions, gets nearly 18 million *yen* from the same source, Japan's levy of 30 million *yen* is evidently too small. The consumption of *seishu*—which is the beverage of the middle and upper class—is estimated at 3½ million *koku* annually, and it is the opinion of Japanese publicists that the tax might be doubled—i.e. raised to 9 pence a gallon—without the slightest inconvenience. That

would mean an addition of 24½ million *yen* to the revenue, and if, at the same time, the brewing of *saké* for family use were forbidden, another increment of 4 or 5 millions might be looked for.

In the case of tobacco, the system in operation prior to the new programme was to impose a stamp duty, which yielded a gross income of 3 million *yen*, approximately. Such an impost being glaringly inadequate, the Government resolved to establish a State monopoly of leaf tobacco. Briefly, the plan was that all leaf tobacco grown in the country should be delivered to the Government at prices fixed by the latter, and should subsequently be sold by the Government to manufacturers at rates officially determined. All persons intending to grow tobacco were to send in notices, by the end of April in each year, showing the area to be devoted to the purpose, and were to obtain official permission, the Government reserving to itself discretion to limit the area. The produce was to be delivered into the Government's store-houses before the end of March in each year, the grower being permitted, however, to keep back any leaf intended for export, and to sell it for purposes of export, under official licence, free of tax. The gross income derived from this tax was estimated at 10,320,000 *yen*. But the success of the system has been greatly questioned. The area of land under tobacco culture in Japan is 35,393 *cho* (89,714 acres), and the quantity of leaf grown is 10,853,482 *kwan*, or 90,445,683 lbs. That is valued by the Government at 12,340,000 *yen*, for purchase from the growers, and will be sold for a total sum of 22,660,000. Thus the purchase price is 18.20 *yen* per picul (16 *kwanme*, or 100 catties) and the selling price 33.40 *yen*, or a profit of 83.52 per cent. The question is whether, at such rates, foreign tobacco can not be imported to compete successfully with the home-grown product. It has been asserted that foreign tobacco fitted for Japanese consumption, can be laid down in Japan at from 14 to 15 *yen* a picul. But if that estimate were correct, and if—as we are compelled to assume—the official estimate of the average price of the Japanese leaf—namely, 18.20 *yen* per picul—be also correct, it seems plain that importation from abroad would already have taken place. The price of the home-grown leaf to the Japanese manufacturer was 22.62 *yen* per picul under the old system of taxation; that is to say 18.20 *yen* to the grower and 4.42 *yen* to the Treasury. It is thus plain that if leaf tobacco could have been imported from America or elsewhere at a lower price than 22.62 *yen* per picul, the business would have been undertaken. Referring to the Customs Returns, we find that the import of leaf tobacco did, indeed, grow from 571 piculs in 1894 to 2,560 piculs in 1896, and that its price at the place of

shipment averaged 15.63 *yen* per picul, so that its price in Japan was 18 *yen* approximately. At such a price it should be able to drive the home-grown leaf out of the market, and since it does not appear to have that effect, the only conclusion we can come to is that the cheaper varieties of foreign leaf do not suit the Japanese palate. The import of cut tobacco, also, grew, in the same time, from 548 to 1,112 piculs, but as its price was over a hundred *yen* per picul, it must have been intended for special consumption. Foreign cigarettes, however, are beginning to find their way to Japan in considerable quantities: their import more than doubled in the three years ended 1896, the customs returns showing 232,343 *yen* worth in 1894 and 574,234 *yen* worth in 1896. Under the new Tariff leaf tobacco coming from abroad will have to pay a duty of 35 per cent. on its cost at the port of entry. Hence if suitable foreign leaf can be brought to Japan at a smaller price than 24.74 *yen* per picul, it will be able to compete with the monopoly tobacco selling at 33.40 *yen*. These figures seem to indicate that the new system rests on a somewhat precarious basis. There is another difficulty also. We have seen that the selling price of the official monopolists is 83.52 per cent. higher than the price paid to the grower. We have also seen that leaf intended for export is exempted from the monopoly system. Now, according to the new General Tariff, the duty on manufactured tobacco is 40 per cent. Suppose that the leaf were carried to Hongkong, manufactured there, and brought back to Japan, the exporter, manufacturer, and importer, having a margin of 43.25 per cent. to work on, should certainly be able to undersell the leaf offered by the official monopolists. However, since the Diet has competence to alter the General Tariff, no very serious inconvenience need be anticipated from that source. With regard to the initial expenses and investment of capital for carrying out the monopoly, a sum of 4,213,500 *yen* has been required for building store-houses and stations—of that amount 1,130,250 *yen* was appropriated in 1896-7 and the remainder in 1897-8—and a sum of 4 million *yen* is set apart as a capital fund for purchasing the leaf. It was originally supposed that a capital of 10 millions would be required, and the amount seems a minimum when we remember that a year's supply of leaf tobacco is always in stock, over and above the new crop. The Government, however, evidently thinks that the capital invested in buying can be released by speedy sales, and that 4 millions will suffice for working purposes. Hence the total capital outlay of the State for inaugurating and carrying on the system is 8,213,500 *yen*. Further, the working expenses are estimated at 522,454 *yen* for a period of 3 months, or 2,089,816 *yen* per annum. If to that

amount we add the interest on capital invested, at 5 per cent., it results that the aggregate outlay involved in working the monopoly will be 2,500,491 *yen* annually, and the net yield will be 7,819,509 *yen*. That is not a strikingly satisfactory result, especially when the risks attending a State monopoly are remembered. It would seem that by simply adopting the English system—that is to say, passing the tobacco through Government store-houses and levying a tax on it in transit—a net income of nearly ten million *yen* might be obtained at the proposed rate of impost, without any considerable investment of capital or incurring of risk.

The dates from which the above four taxes were to go into operation are:—

The Registration Tax, April 1st, 1896.
Trades Tax, January 1st, 1897.
Saké Tax, October 1st, 1896.
Tobacco Monopoly, January 1st, 1898.

The Government's estimate of the net gain to the Revenue from these new or increased imposts stands thus:—

G.	Yen.
Registration Tax	6,808,449
Trades Tax	7,551,377
Saké Tax	9,284,544
Tobacco Monopoly	10,316,379
Total	33,960,749
Deduct on account of the abolition or reduction of the taxes on soy, confectionery, ships, vehicles, tobacco stamps, etc.	7,552,397
Net increase of Income	26,408,352

In order to find the basis to which the above correction of revenue must be applied, and in order to see how the new taxes have been treated by the compilers of the estimates, we separate the following figures from the Budgets for the year before the war and the three years after it:—

I.	1893-4.	1895-6.	1896-7.	1897-8.
Saké &c. Tax	16,089,105	17,807,577	18,465,464	20,878,727
Tobacco Tax	8,640,351	8,740,434	8,950,327	9,093,844
Registration, &c. Tax	8,458,788	8,614,337	8,990,537	9,145,016
Trades Tax	—	—	—	5,874,168
Total	43,188,244	45,162,348	46,406,328	45,991,755

N.B.—With regard to this table, certain explanations are necessary. The Government's Budget separates into four distinct items the *Saké* Tax, the Malt Tax, the Alcohol Tax and the Tax on Exports of *Saké* from Okinawa Prefecture (Riuku). It seems simpler to group the four under one heading, namely, "Saké &c. Tax." In the case of the Tobacco Tax, it will be observed that the estimate for 1897-8 shows only a small increment as compared with the actual collection in 1896-7. That is because the old system remains in operation until January 31st, 1897, so that only three months (January, February and March) of the fiscal year 1897-8 are affected by the new system. The net sum accruing from the Monopoly of Leaf Tobacco during those three months is estimated at 859,608 *yen*, and is entered in the Budget under the heading of "Receipts from Government Industries, &c." In our table, however, the total proceeds of the collections under the old and new systems are shown simply as "Tobacco Tax." Again, as to the Registration Tax, although the impost did not begin to be levied until April 1st, 1896, certain amounts are entered under the same heading in the accounts for previous years. That is because the Treasury has thought it convenient to include the proceeds of the new tax in the same group with certain cognate taxes—as stamp duties, license fees and so forth—which had been levied for several years previously, and which, consequently yielded sums of revenue annually. Finally, since the Trades Tax went into operation from January 1st, 1897, it would seem at first sight that the revenue for the fiscal year ending March 31st, 1897, ought to have received some addition from that source. But the tax is collected in May and November, and thus no payments on account of it were made until the year 1897-8. A similar remark applies to the increased *Saké* tax: it went into operation from October 1st, 1896, but as July is the period for paying the first installment, no collection seems to have been made until that month in 1897.

Taking the collections under the headings of Saké Tax, Tobacco Tax and Registration Tax (old) in 1896-7, and adding to them the increased revenue as shown in Table H., we obtain 50,438,480 *yen* as the total revenue to be derived from the four taxes of the latter Table when in full operation. We note this figure for purposes of future reference.

Combining the above tables, and omitting the receipts from the Customs, it appears that the direct taxes paid by the Japanese nation now aggregate 91,842,938 *yen*, or 2.20 *yen* per head of population.

From table D. it will be seen that the income derived from State Industries and Properties rose from 11½ millions in 1893-4 to 20½ millions in 1897-8. The bulk of this asset is composed of earnings of posts, telegraphs and railways, but for convenience of comparison we append the complete figures:—

H.	1893-4.	1895-6.	1896-7.	1897-8.
RECEIPTS FROM STATE INDUSTRIES AND PROPERTIES.	Yen.	Yen.	Yen.	Yen.
Official Gazette	154,937	180,163	186,565	185,078
Customs	140,893	183,775	185,103	201,797
Hokkaido Breeding Stations	8,054	175	991	971
Forests	2,086,913	1,080,470	896,318	1,359,773
Posts & Telegraphs	6,487,688	9,551,400	10,821,278	12,131,157
Convict Labour	204,344	210,970	219,138	258,942
Opium sales	13,592	10,834	25,340	25,814
Sales of standard Weights, &c.	2,105	216	582	102
Mint	494,462	486,760	465,000	470,580
Printing Bureau	161,465	305,814	215,848	267,178
Mines	—	—	—	1,435
Railways	2,709,760	3,601,594	4,093,604	5,486,773
Manufacture of Telegraph and Light-house Appliances	11,812	3,460	2,488	3,097
Arsenals	18,730	2,280	—	—
Senju Woolen Factory	27,114	23,935	1,615	2,174
Sale of ship-building Materials	7,703	5,163	—	—
Other Industries (minor)	81,063	89,395	—	—
Rents of Property	211,037	215,548	202,613	391,611
Sales of Lymph	—	—	30,000	—
Totals	11,743,269	15,897,379	16,353,267	20,420,900

The sums credited to "Customs" in the above table are not duties levied on imports, but receipts from harbour dues, warehouse charges and sundries. It would appear more logical to include the amount under the general heading of "Customs," but such is not the method of accounts adopted in Japan.

We have given the above table in detail for the purpose of ascertaining the degree of variability of the various items. Analysis indicates that for the purposes of this review the items of the table may be conveniently grouped thus:—

I.	1893-4.	1895-6.
Railways, Posts and Telegraphs	9,197,448	13,154,856
Various Minor Industries	2,545,821	2,742,523
Total	12,743,269	15,897,379
Railways, Posts and Telegraphs	14,234,882	17,557,910
Various Minor Industries	2,118,385	2,862,990
Total	16,353,267	20,420,900

By this method of division we observe that the revenue obtained from Government Industries and Properties consists of a constantly increasing factor—Railways, Posts and Telegraph receipts—and a tolerably constant but comparatively insignificant factor—receipts from minor

industries. Each year the mileage of State Railways is added to, and the postal, telegraph and telephone services develop. It seems reasonable, therefore, to infer that the rate of increment shown by the table—namely 19.8 per cent. annually—will be maintained, and that the revenue under the above heading will soon become a principal item in the accounts.

The remaining two sources of Ordinary Revenue, namely, Miscellaneous Receipts and Interest on Deposits, are insignificant and do not call for special analysis. It will suffice to note that they represent a tolerably uniform asset.

We are now in a position to analyse the Revenue in a more general manner.

K.

Comparative Table of Revenue before and after the War.

	Yen
Revenue from Direct Taxation the year before the War	67,344,750
Revenue from Direct Taxation the third year after the War	91,842,938
Increase	24,498,188
Revenue derived from Indirect Taxation the year before the War	18,538,331
Revenue derived from Indirect Taxation the third year after the War	29,912,051
Increase	11,373,720
Total Increase	35,871,908

In order to deduce the future prospects of the Revenue from the above data, note must be taken of the fact that the Customs' receipts will be greatly augmented under the new Tariff. Assuming the present volume of the foreign trade as a basis, it is calculated that the Customs receipts will aggregate 12½ million *yen* against 6½ million now collected. We arrive, then, at the following estimate:—

ESTIMATE OF THE AMOUNT OF THE ORDINARY REVENUE IN THE FISCAL YEAR 1902-3 (35TH OF MEIJI).	
Amount collected in the year 1897-8	121,428,569
Add 7½ per cent. of the revenue now derived from old Taxes (<i>vide</i> Table E.), approximately	3,900,000
Add 90 per cent. of the revenue now derived from Posts, Telegraphs and Railways (<i>Vide</i> Table I.), approximately	15,750,000
Add 100 per cent. of the revenue now derived from Customs Duties	6,000,000
Add remainder of income estimated to accrue from the Monopoly of Leaf Tobacco, the increased Saké Tax, the Registration Tax, and the Trades Tax	6,680,462
Total	153,759,031

From table E. it will be observed that the Land Tax remains a virtually constant quantity. The fact is remarkable, seeing that the area of land under cultivation increases year by year, and that the market prices of agricultural commodities are constantly ascending. The Land Tax is composed of two items, namely, the tax on arable lands and the tax on building lands. The figures for 1896-7 are these:—

M.	Yen.
Tax on arable lands	35,023,031
Tax on building lands	3,513,902
The latter of these items is again subdivided:—	
Tax on rural building lands	2,711,419
Tax on urban building lands	802,483

The total value of the building land throughout the empire is assessed at 142,302,500 *yen* for purposes of taxation, of which sum 32 millions represent the value of the urban building land. The latter figure is obviously out of all reasonable proportion, for by "urban building land" is understood the aggregate areas included within the limits of the three cities, Tokyo, Osaka and Kyoto, and of the 38 principal provincial towns, which have a total population of 4,244,210 persons. It may be said that all Japanese subjects, whatever their business, pay land tax directly or indirectly. Now the whole population of the empire being 41,813,215, and the total land tax for the year 1896-7 being 38,668,991 *yen*, it appears that the 37,569,005 persons living outside the urban districts paid Land Tax aggregating 37,866,508 *yen*, or a little more than 1 *yen* per head; whereas the 4,244,210 inhabitants of the urban districts paid only 802,483 *yen*, or less than 19 *sen* per head. Thus the wealthy section of the nation living in the towns does not pay at the rate of one-fifth of the Land Tax levied on the poorer section living in the provinces. There are, of course, other ways of examining this question. We may compare the densities of the population in urban and rural districts. Statistics for that purpose are difficult to collect, but according to the most accurate calculations that we can make, the total area of the three cities and thirty-eight principal provincial towns is 155,810 acres, and the population being 4,244,210, it appears that there is an average of 27.24 persons per acre, approximately. On the other hand, the area under cultivation in the provinces is 11,525,000 acres, and the population being 37,569,005, we have an average of 3.25 persons per acre. It would follow, therefore, that if the rate *per capita* were the same in the urban and rural districts, the inhabitants of the former would have to pay Land Tax at least 8 times greater, area for area, than that paid by the inhabitants of the latter. Whether that proportion would be just, is a matter for consideration. We have seen that, in point of fact, the urban folks pay less than one-fifth of the sum paid by the rural folks, man for man. Putting the statement in another form, the tax actually levied on each acre of urban land is 5.15 *yen*, and on each acre of rural land, 3.28 *yen*; a ratio obviously at great variance with the relative market values of the lands. There can be little doubt that this injustice, whatever its dimensions, will be remedied now that the country's financiers are compelled to think seriously of ways and means. If the inhabitants of the urban districts paid at the same rate per head as the inhabitants of the rural districts, their annual contribution to the Treasury would be fully 4½ million *yen*, instead of eight hundred thousand as it is at present. That would mean, however, that urban lands

should be assessed for taxation purposes at eight times the value of rural lands. For our own part, we do not think that such a difference of valuation would be opposed to facts, but the question is one demanding close scrutiny. The total valuation of urban lands at present for purposes of taxation is only 32 million *yen*, or 17 *sen* per *tsubo*, approximately; an absurd figure. Unquestionably there is here a fair source of additional revenue.

So much misapprehension exists, and so many erroneous statements have been published, with reference to the weight of the Land Tax in Japan, that we have made calculations for the purpose of determining the ratio between the tax and the produce of the land. It is difficult to arrive at results of such a kind with absolute accuracy, but we believe that our figures vary very little, if at all, from the truth:—

N. PRODUCE OF AGRICULTURAL LANDS IN JAPAN.		
	Quantity. <i>Koku</i> .	Value. <i>Yen</i> .
Rice	37,000,000	337,000,000
Barley	17,325,317	47,460,000
Tea	6,123,125	7,749,675
Tobacco	10,853,482	12,340,000
Beans	17,015,332	17,306,750
Silk	1,887,584	80,812,190
Cotton	12,572,971	18,859,456
Lacquer	32,977	2,581,417
Potatoes (foreign)...	49,752,970	1,990,118
Potatoes (sweet) ...	495,948,071	43,675,845
Millet	2,144,839	10,079,743
Crow-foot Millet ...	999,209	2,198,259
Sorghum	250,474	1,252,370
Buckwheat	1,252,372	6,888,062
Hemp	3,224,094	5,239,156
Indigo (<i>ai-dama</i>)...	16,087,337	16,409,083
Rape-seed.....	1,006,581	7,291,712
Sugar, four kinds; total production...	13,167,094	6,571,420
Mawata.....	54,257	1,085,140
Total.....	—	626,790,396

We have not included maize, or *daikon* and several other tubers in the above list, as it seems impossible to procure statistics of their production. Moreover, marine products are wholly excluded, though the value of the fish taken yearly in Japanese waters must be very great, and the section of the provincial population engaged in fishing is considerable. Now the total tax collected on arable land being 35,023,031 *yen* (*vide* Table M.), it appears that the Japanese agriculturist pays, at the highest calculation, 5.58 per cent. of the gross produce of his land to the Central Government. But, according to the calculation made by the Treasury in 1873 for purposes of taxation, the gross produce of the land was supposed to be divided in the following proportion:—

O.		
Land Tax	21.24 of Gross Produce.	
Land Rate (<i>i.e.</i> Local Land Tax).....	21.24	do
Cost of Production	23.54	do
Net Earnings	33.98	do
	100.00	

It has been since enacted that the Land Rate shall not, under any circumstances,

exceed one-half of the Land Tax. Hence, taking that fact in conjunction with table N., we find that the actual division of the gross produce at present stands thus:—

P.	
Land Tax	5.587
Land Rate	2.793
Cost of Production.....	23.540
Net Earnings	68.080
	100.000

These are striking results. It has always been understood that the Government's assessment of the taxable value of land was purposely put at about one-half of the market value. In other words, when the Land Tax nominally represented 21.24 of the gross produce, it really represented only 10.62. We have seen, however, that even when such products as maize, *daikon*, and tubers of various other kinds, fruits, garden produce, oxen, horses, cattle, and so forth, are not taken into account, the farmer pays only 5.584 per cent. of his gross produce. If he paid 10.62 per cent., his contribution to the Treasury would be 66,573,042 *yen*, instead of 35,023,031 *yen*, as it is at present. Foreign critics of Japan's fiscal system habitually speak of the farmer as a heavily burdened individual. They seem to be guided solely by the fact that his tax represents a large proportion of the total ordinary revenue. But that point ceases to have any significance when we remember that the agricultural section of the nation numbers 27,448,150 out of a total of 41,813,215.

In connexion with this subject, another point may be briefly discussed here. It is often asked whether the agricultural classes pay as heavy taxes now as they did prior to the Restoration, and not a few publicists have answered in the affirmative, some even going so far as to allege that they pay more. Such assertions seem to be made without due consideration. The present Land Tax, 38½ million *yen*, represents about four million *koku* of rice at the rate now ruling. Even if we assume rice to be selling at its pre-*Meiji* price, namely, 4½ *yen* per *koku*, the tax represents only 8½ million *koku*. Does any one imagine that the public revenue derived from land was only 4 million *koku*, or even 8½ million *koku* prior to the Restoration? History is accurate enough on that point. When TSUNAYOSHI, the fifth of the Tokugawa *Shoguns* (1680-1709), adopted HAGIWARA SHIGEHIDE'S suggestion of a debased currency to relieve the financial difficulties of the Yedo Court, the revenue of the empire derived from land was 30 million *koku* of rice, of which 23 millions went to the feudal barons, three millions to the bannerets, shrines and temples, 3,850,000 to the Yedo Administration, and 150,000 to the Court in Kyoto. It thus appears that, if we consider quantity alone—and quantity is everything to the farmer—the Land Tax was more than seven times as heavy at the end of the 17th century as

it is at the end of the 19th. Almost the same result is obtained if we consider values. Thirty million *koku* of rice sold for about 27 million pounds sterling in the year 1700, the equivalent of 270 million *yen* of the present time. Hence the Land Tax at the end of the seventeenth century amounted to 270 million *yen* against 38½ millions levied to-day, a ratio of nearly 7 to 1. Recollect, too, that the tax-paying population two centuries ago was not one half of what it is at present. These figures appear conclusive.

What we have hitherto written refers, it will be observed, to the Ordinary Revenue only. To include the Treasury's extraordinary receipts also in this section of our subject would seem to be the natural course. But as the bulk of those receipts are derived from temporary sources, and as their amounts are regulated by the expenditures, a clearer idea of the whole matter will be obtained by examining the latter at once.

We proceed, therefore, to consider the Expenditures, adopting the same method of comparison as to periods in order to trace the development that has taken place since the War.

Q.

TOTALS OF ORDINARY AND EXTRAORDINARY EXPENDITURES.

	1893-4. Yen.	1895-6. Yen.
Ordinary Expenditures	64,442,268	67,104,440
Extraordinary Expenditures	23,539,604	20,656,993
	87,981,872	87,761,433
	1896-7. Yen.	1897-8. Yen.
Ordinary Expenditures	104,832,071	122,983,561
Extraordinary Expenditures	103,306,001	142,179,733
	208,138,072	265,163,294

We see here an increase of Ordinary Expenditures from 64½ millions in the year before the War to 123 millions in the second year after it; a very striking increment. In order to trace the sources of this rapid growth of 58½ million *yen*, it will be necessary to refer to detailed figures for the various Departments of State:—

R.

ORDINARY DEPARTMENTAL EXPENDITURES.

	1893-4. Yen.	1895-6. Yen.
Crown	3,000,000	3,000,000
Foreign Department	623,982	1,047,050
Home do	7,636,149	7,471,262
Finance do	24,915,268	29,934,288
War do	12,316,497	8,400,476
Naval do	5,141,475	4,915,497
Justice do	3,451,911	3,339,533
Education do	958,520	1,047,811
Agriculture and Commerce Department	928,942	908,967
Communications Department	5,469,524	7,040,356
Colonization Department	—	—
	64,442,268	67,104,440

	1895-7. Yen.	1897-8. Yen.
Crown	3,000,000	3,000,000

Agriculture and Commerce Department	1,155,778	1,424,296
Communications Department	8,297,316	11,671,749
Colonization Department	—	12,550,955
	104,832,071	122,983,561

N.B.—For the information of any one referring to the Budgets as published in the *Official Gazette*, some explanation of the above Table is necessary. First, as to the Formosan Expenditures:—These were included in the Expenditures of the Finance Department up to the close of the fiscal year 1896-7, and they consequently form part of that Department's figures in our Table. But from the year 1897-8 the Formosan Expenditures were put into a special account, and do not appear at all in the Budget proper. For purposes of financial convenience that method may be wise, but if we desire to obtain a clear idea of Japanese finance as a whole, it becomes necessary to group all the items into one aggregate. We have therefore added the Formosan Ordinary Expenditures to the figures of our Table, placing them in the section of the Colonization Department, to which they properly belong. Their amount is 10,524,040 *yen*. In the second place, the *Official Gazette's* figures for 1896-7 and 1897-8 have to be amended on account of expenditures contained in Supplementary Budgets. The system of Supplementary Budgets adopted in Japan greatly complicates the accounts, and renders it difficult to form an accurate idea of them. Not only are such Budgets presented to the Diet in connexion with the estimates for the next fiscal year, but some are also presented as a result of the previous year's working. Speaking broadly, it may be said that Supplementary Budgets provide for expenditures not foreseen at the time of compiling the Budget proper; or for expenditures due to accidental circumstances; or for expenditures which the Government is not competent to include in the Budget without obtaining the previous consent of the Legislature; or for expenditures already incurred in excess of the appropriations. Of course, the changes caused in the original Budget owing to these Supplementary votes are ultimately shown in the Treasury's published statistics. They duly appear in the official figures up to the year 1895-6. But the publication of the statistics being always more or less delayed, these corrections have to be independently made for the year 1896-7 and 1897-8. With regard to the year 1896-7, seven Supplementary Budgets were laid before the Diet for *post-facto* approval in the session that closed last March, the appropriations asked for being intended to balance the account for the year then drawing to its close—namely, the year ending March 31st, 1897. The total additions made to the Ordinary Expenditures of 1896-7 by these seven Budgets was 585,450, distributed among the Departments of State as follows:—

	1896-7. Yen.
Foreign Department	91,133
Home Department	34,932
Finance Department	393,750
War Department	44,714
Naval Department	17,288
Communications Department	3,633
	585,450

With regard to the year 1897-8, five Supplementary Budgets were presented to the Diet, the expenditures contemplated by them being for the fiscal year about to open. These five Budgets provided for a total addition of 129,240 *yen*, approximately, to the Ordinary Expenditures. We say "approximately" because, in the case of the Foreign Office, some of the items are stated in foreign coin, and the rate of conversion not being fixed, a margin of uncertainty presents itself. We have taken the sovereign at 10 *yen*; the American gold dollar at 2 *yen*; and the franc at 50 *sen*. Again, in the Department of Education, the salaries of foreigners about to be engaged are subject to increase according to variations in the sterling value of the *yen*. We have not attempted to make any cor-

rections on that account. The total sum of 129,240 *yen* is divided as follows:—

	Yen.
Foreign Department	22,280
Home Department	840
Finance Department	33,366
War Department	7,344
Naval Department	15,600
Education Department	43,810
Colonization Department	6,000
	129,240

These sums are comparatively insignificant, but they can not, of course, be omitted from our calculations.

The growth of the Ordinary Expenditures, as shown by the above table (R.) is one of the significant features of Japanese finance. Extraordinary expenditures, being of a special and temporary character, do not imply any lasting strain on the country's resources, but ordinary outlays have to be permanently provided for, and are, therefore, the real test of the nation's monetary condition. At first sight it appears that the Ordinary Expenditures have increased from 64½ million *yen* in the year before the War to 123 millions in the second year after it. But there are corrections to be applied. The Ordinary Expenditures are not wholly unaffected by the extraordinary programme of military, naval and industrial expansion planned by the Government in the sequel of the War, and although that point need not be considered for the purposes of a general forecast, it can not be left out of the account if we desire to distinguish between the normal and abnormal increments of the national expenditures. Hence, in the total for 1897-8, we must exclude three factors: first, the additional outlay in connexion with the service of the national debt, for the debt has been swollen by the War and by State enterprises consequent on the War; secondly, the increased outlays for maintaining the Army and Navy, since the expansion of those services is also a direct result of the War; and thirdly, the expenditures connected with Formosa. The corrections stand thus:—

	S. 1893-4.	1897-8.	Difference.
Service of National Debt	19,455,918	29,710,378	10,254,460
Maintenance of Army	11,385,339	25,686,890	14,301,551
Maintenance of Navy	5,049,735	9,715,203	4,665,468
Formosan Expenditures (Ordinary) ..	—	10,524,040	10,524,040
Total		39,745,519	

Making these deductions, we find that, apart from results directly attributable to the War, the country's Ordinary Expenditures grew from 64½ millions in 1893-4 to 83 millions in 1897-8, or nearly 29 per cent. Of course other influences attributable to the War have operated to a considerable extent. These, though not reducible to exact figures, will easily be detected as we proceed. Let us, then, take the expenditures for the Departments proper, that is to say, the outlays involved on account of salaries, allowances, office requirements, and so forth:—

T.
EXPENDITURES ON ACCOUNT OF DEPARTMENTS
PROPER.

	1891-4. Yen.	1895-6. Yen.
Foreign Department	114,782	165,664
Home "	274,439	243,715
Finance "	290,315	247,317
War "	174,023	127,270
Naval "	91,740	78,408
Justice "	116,539	92,781
Education "	130,125	118,515
Agriculture and Com- merce Department.....	264,567	227,923
Communication Depart- ment	201,550	175,391
Colonization Department	—	—

Total.....1,658,080 1,476,984

	1896-7. Yen.	1897-8. Yen.
Foreign Department	99,644	166,397
Home "	291,979	297,652
Finance "	277,029	328,035
War "	233,066	240,076
Naval "	118,673	155,086
Justice "	99,387	103,246
Education "	145,954	184,305
Agriculture and Com- merce Department.....	237,175	262,865
Communications Depart- ment	204,802	263,223
Colonization Department.	—	141,420

Total.....1,707,709 2,142,304

The growth shown by the above table is quite insignificant—less than half a million *yen* for the ten Departments of State. Indeed, when we observe that the Administrative machinery of the whole Central Government is kept working at an annual outlay of a little over two million *yen*—say two hundred and twenty thousand pounds sterling—it becomes necessary to admit that there is nothing lavish in Japan's official methods. We may appropriately mention here that the total number of civil officials throughout the Empire, receiving pay from the Treasury, was 45,617 in 1893, and that their salaries aggregated 10,761,164 *yen*, being an average of 235 *yen* a year, approximately; and that the number in 1895 was 46,698, their salaries aggregating 11,405,425 *yen*, an average of 244 *yen*.

In order to trace the reasons for the growth of the Ordinary Expenditures, we append a table showing the principal items of increase:—

U.

	1891-4. Yen.	1897-8. Yen.
Legations and Consulates	509,200	1,328,418
Laboratories (Sanitary, Anti- Toxin Serum, Vaccine Lymph), Home Department.....	—	119,517
Pensions and Rewards, Finance Department.....	1,454,665	3,405,404
Customs Expenses	158,487	287,799
Cost of Collecting Taxes.....	1,752,954	2,848,574
N.B.—The figure for 1897-8 includes the expenses (522,454 <i>yen</i>) incurred in connexion with the Leaf Tobacco Monopoly during the last quarter of that year.		
Gendarmerie Expenses.....	285,140	2,702,691
Central Observatory.....	—	31,573
Outlays on account of Libraries, Schools, &c.	781,989	1,166,656
Rewards to Teachers in Com- mon Schools	—	345,298
Aid to Technical Education ...	—	150,000
Forestry Expenses	528,068	742,113
Sericultural Establishment and Silk Conditioning House.....	—	62,245
Improvement of Stud Horses...	—	150,034
Working Expenses of Railways, Posts, Telegraphs and Tele- phones	5,087,016	9,313,893
Bounties to Encourage Naviga- tion	—	1,720,313
Total.....	10,597,519	24,464,528

The main causes of increase are here sufficiently indicated; minor items need not be considered. It is, of course, inevitable that the working expenses of railways, posts and so forth should grow with the development of the services. We have seen (*vide* Table I.) that the gross revenue derived from these sources in 1897-8 is estimated at 17,557,910 *yen*, and the working expenses being 9,313,893 *yen*, it results that the management costs about 53 per cent. of the gross earnings; a result apparently indicating no lack of economy and organization. As to the cost of tax collecting, that too has necessarily increased owing to the levy of new or increased imposts, as shown in Table G. When the Tobacco Leaf Monopoly is in full operation, its working expenses will probably aggregate 2½ million *yen* annually, and the item "Cost of Collecting Taxes" will then stand at about 4½ millions. The yearly appropriation on account of pensions and rewards is also a growing quantity. Its figure is now remarkably small—3½ million *yen*—considering that the country emerged, two years ago, from a war in which 140,000 men of both services were engaged.

We have endeavoured (*Vide* Table L.) to estimate the probable amount of the Ordinary Revenue in the year 1902-3. The question is much more difficult in the case of expenditures, and its consideration may be conveniently deferred to a later period.

We turn now to the Extraordinary Expenditures, pursuing, with regard to them, the same method as that hitherto followed:—

V.

EXTRAORDINARY DEPARTMENTAL
EXPENDITURES.

DEPARTMENTS.	1893-4. Yen.	1895-6. Yen.
Crown	—	—

Colonization	—	6,188,721
Totals	103,306,001	142,179,733

N.B.—With regard to this table, several explanations are necessary in order to bring the figures into agreement with those of the Budget as published in the *Official Gazette*.

(a.) In 1892 a programme of State Railways was elaborated and a law sanctioning it re-

ceived the Diet's consent. According to that programme, a total sum of 68,025,044 *yen* was to be expended on the construction of various lines, the outlays being spread over a period of 12 years, commencing in the fiscal year 1893-4 and concluding in the fiscal year 1904-5. These expenditures are included in special accounts and do not appear in the Budget proper. They are met by floating a Railway Loan, the interest on which, and the appropriations on account of a sinking fund, appear in the Budget—Finance Department—under the heading "Service of Public Debts." It seems illogical to exclude from the general accounts a productive outlay, the profits from which, as well as the charges connected with it, are included in those accounts, and which, for the rest, constitutes a considerable factor in the national finance. We have consequently added the railway-programme-construction expenses to the Extraordinary Departmental Expenditures, in the section of the Communications Department, which controls the outlay. Up to the end of the fiscal year 1896-7, the amounts expended in this account aggregated 11,580,000 *yen*. The following is the distribution:—

	Yen.
1893-4	3,040,000
1894-5	1,520,000
1895-6	2,520,000
1896-7	4,500,000
1897-8	6,227,333

(b.) The Colonization Department existed in the year 1896-7, but as its expenditures were included in those of the Finance Department, they do not appear independently in the Budget for that year. From 1897-8, however, the Department stands separately in the matter of accounts.

(c.) The Formosan Expenditures, as already explained—*vide* Note on Ordinary Departmental Expenditures—do not appear in the Central Government's Budget for the year 1897-8, but have been included by us. The figures for the Ordinary Expenditures of the island have already been given. The Extraordinary are:—

Formosan Extraordinary Expenditures.

For the fiscal year 1896-7.....4,692,803 *yen*.

This amount is included in the Finance Department Section.

For the fiscal year 1897-8.....4,017,794 *yen*.

This amount is included in the Colonization Department Section.

(d.) With regard to Supplementary Budgets, on account of which certain corrections have to be applied to the figures of the Budget proper for 1897-8, the facts are these:—

Seven Supplementary Budgets, relating to expenditures for the fiscal year 1896-7, were presented to the Diet in its 1896-7 session. Six of these Budgets were for *post-facto* approval, and one was for a grant of 700,000 *yen* to meet the expenses of the Empress Dowager's State Funeral. The total additions made by these Budgets to the Extraordinary Departmental Expenditures are as follow:—

W.

SUPPLEMENTARY BUDGETS FOR 1896-7.

	Yen.
Household Department—on account of the Empress Dowager's Funeral	700,000
Foreign Department	27,475
Home Department—on account of works of repair and relief in connection with disasters from earthquakes and inundations	7,198,440
Finance Department—including 200,000 <i>yen</i> on account of Prince Mori's Funeral	1,406,830
Army Department	7,795
Naval Department	230,381
Education Department	17,230
Agriculture and Commerce Depart- ment	25,000
Communications Department	4,755
Total	9,626,906

For the year 1897-8, five Supplementary Budgets have to be included. They are as follow, distributed among the various Departments:—

X.

	Yen.
Home Department— Aid to construction of Naga- saki Harbour	50,000
Aid to construction of Osaka Harbour	468,000
Aid to Yokohama Water Works	1,027,843
Extension of Kobe Wharfs ... etc.	81,127 etc.
	1,899,232

Finance Department	44,989
War Department—	
Supplementary Funds of Workshops... etc.	1,395,792
Justice Department	31,808
Education Department	74,101
Agriculture and Commerce Department—	
Subsidy for extending Sale of Tea	70,000
etc.	etc.
Communications Department—	
Subsidy to Navigation of the Yangtze	22,600
Aid to Maritime Disasters Relief Society	20,000
Colonization Department—	
Subsidy to Formosa Railway..	176,250
Salary of foreigner in Formosa	6,000

Total 3,759,240

With regard to the item of 468,000 yen, appearing as aid to the construction of Osaka Harbour, it may be explained that the total estimated cost of the harbour is 21,675,000 yen, towards which sum the State has undertaken to contribute 6,658,000 yen. This contribution is in the form of land and money. The land is valued at 1,978,000 yen. It is to be gradually sold, and the proceeds paid to the Osaka Municipality during 4 years, commencing from 1897-8. The remaining sum, 4,680,000 yen, is to be given by the Treasury in cash in equal annual installments, spread over a term of 10 years, commencing from 1897-8.]

If appears from Table V. that the Extraordinary Expenditures leaped suddenly from 20½ million yen in 1895-6 to 103½ millions in 1896-7 and 142½ millions in 1897-8. The chief explanation of such a marked change is to be found in the fact that an extensive programme of military and naval expansion was commenced in the year 1896-7. We shall presently set down the figures relating to that programme, but it will be more convenient to examine, in the first place, other important factors of increase which fall under the head of productive expenditure. They are riparian works; construction and improvement of railways; establishment of banks for the promotion of industry, commerce and agriculture; subsidizing various enterprises, especially maritime; starting of an iron foundry; organization of a university in Kyoto, &c.

Y. PRODUCTIVE EXTRAORDINARY EXPENDITURES, 1897-8.

Riparian Works	Yen. 5,934,067
Buildings, Capital, &c., Leaf Tobacco Monopoly	7,083,300
Establishment of Iron Foundry ...	1,741,621
Extension of Telephone System ...	2,026,298
Improvement of State Railways ...	3,600,000
Laying of Telegraphs, building Lighthouses, &c.	1,388,033
Building of Additional Wharfs at Kobe	84,127
Construction of Hokkaido State Railways	1,275,130
Construction of State Railways in Japan proper	6,227,350
Various outlays on account of Education—e.g. Founding of Kyoto University; founding of Imperial Library; construction and improvement of surgical operating rooms, chemical laboratories, engineering halls, foreign language school; purchase of implements and books, &c.	607,286
Various outlays by Department of Agriculture and Commerce—e.g. Investigation of Forestry and Horse-Breeding; Local Exhibitions; Extension of Foreign Commerce; Paris Exhibition; Inspection of Weights and Measures; Construction of Sericultural School, &c.	468,646

AIDS AND SUBSIDIES.		Yen.
Otaru Harbour Construction	250,000	
Hakodate do.	58,334	
Nagasaki do.	100,000	
Osaka do.	481,634	
Total Aids to Harbour Construction	889,978	889,978
Tokyo Waterworks	150,000	
Osaka do	50,000	
Hakodate do	24,444	
Kobe do	60,000	
Yokohama do	1,027,843	
Total Aid to Water-works	1,312,287	1,312,287
Navigation to Okinawa ...	8,000	
do Ogasawara ...	6,200	
do Oshima (Kagoshima) ...	6,000	
Nippon Yusen Kaisha ...	880,000	
Navigation to Hokkaido ...	7,000	
do the Yangtze	22,600	
Encouragement of Navigation	566,541	
Encouragement of Ship-building	277,250	
Seamen's Training School	10,000	
Maritime Disasters Relief Society	20,000	
Total Aids to Navigation	1,803,591	1,803,591
Nippon Railway Co.	509,102	
Kiushiu do	100,575	
Sanyo do	170,953	
Tanko do	97,458	
Formosa do	176,250	
Total Aids to Railways	1,054,338	1,054,338
Aid for Extending the Sale of Tea	70,000	
Industrial Bank of Japan	62,500	
Agricultural and Commercial Bank	1,997,500	
	2,130,000	2,130,000
Total Aids & Subsidies	7,190,194	
Inspection of European & American Railways	26,855	
Roads, Bridges, &c. in Hokkaido ...	218,268	
Protection of Immigrants in Chishima	9,500	
Total of Productive Extraordinary Expenditures	37,880,675	

Total Aids to Railways 1,054,338

Aid for Extending the Sale of Tea 70,000
Industrial Bank of Japan 62,500
Agricultural and Commercial Bank 1,997,500
2,130,000

Total Aids & Subsidies = 7,190,194

Inspection of European & American Railways 26,855
Roads, Bridges, &c. in Hokkaido ... 218,268
Protection of Immigrants in Chishima 9,500

Total of Productive Extraordinary Expenditures 37,880,675

We have not included the Formosan Extraordinary Expenditures in the above Table, though the total amount, 4,017,794 yen, falls under the heading of productive outlays. The items are:—

Z. FORMOSAN EXTRAORDINARY EXPENDITURES.		Yen.
Public Works	3,300,800	
Investigations	70,530	
Aids to Immigration	91,964	
Sanitation	40,000	
Subsidies	514,500	
	4,017,794	

Adding these Formosan outlays to the total of Table Y., we obtain an aggregate of 41,898,469 yen. Now if from the total Extraordinary Expenditures (142,179,733 yen) shown in Table V., the Military and Naval Expenditures (98,421,473 yen) be subtracted, there remains a sum of 43,758,260 yen. Thus we arrive finally at the following result:—

AA.		Yen.
Aggregate Extraordinary Expenditures of eight Departments of State (the Departments of War and of the Navy excluded) for 1897-8	43,758,260	
Aggregate of Productive Extraordinary Expenditures, as shown in Tables Y. and Z	41,898,469	

Total Unproductive Extraordinary Expenditures 1,859,791

This remainder, 1,859,791 yen, is made up of such items as the construction of consulates and legations abroad; various other constructions (as penitentiaries, quarantine stations, courts of laws, &c.); prizes and rewards; manufacture of public bonds; handling of indemnity and so forth. All these outlays, of which the aggregate is comparatively trifling, are of an unavoidable nature: several of them, indeed, might be classed as productive. It is, therefore, correct to say that virtually the whole of the Extraordinary Expenditures for 1897-8—those of the Military and Naval Departments of course excepted—belong to the category of productive outlays.

It is to be noted that, if the aids and subsidies appearing in the Formosan Budget, be added to those of Table Y., the grand total of aids and subsidies for 1897-8 becomes 7,796,638 yen.

MISCELLANEOUS TOPICS.

Tales of peculation in Formosa form a favourite topic with the vernacular press now a-days. The *Yomiuri Shimbun* thus describes the proceedings of Mr. Sugiyama Shukichi, Engineer-in-chief in the Governor-General's office, who was arrested on the 15th May on the charge of receiving a bribe from a contracting company. He had the superintendence of all the engineering works in the island, and entered into an engagement with the Arima Contracting Company to build the Governor-General's offices, involving an expenditure of one million yen. This big contract he placed with the Company without demanding any security, or bargain money, and in consideration of such accommodating methods the company made him a gift of yen 170,000. Part of the bribe he distributed among the assistant engineers employed in his office, but the greater portion he divided with Mr. Makino, an engineer in Tokyo. The *Yomiuri* moralizes over the startling change in Mr. Sugiyama's affairs. In Formosa he lived a life of extravagance and reckless luxury: now he has to be content with the cold comforts of a house of detention pending trial.

That is all very pretty but we should like to know where the Governor-General of Formosa is to get a million yen to spend on the building of offices. No such appropriation appears in the Budget. It might, of course, be a continuing expenditure, only a small part of which would be entered in the estimates for the current year. But even then the approval of the Diet would have to be obtained for the whole outlay, and we are not aware that any such approval was given or sought last session. However, it appears to be only a question of the degree of Mr. Sugiyama's guilt. He has been removed from office.

The Ashio Copper mine difficulties have by no means been arranged, if the present temper of the people living in the devastated districts is to be taken as any criterion. They have resolved to maintain the agitation with undiminished ardour until the mine is actually closed. They argue that they would become the laughing-stock of Japan should they now abate their demands and allow the mine to continue working.

One sensible resolution the agitators have arrived at, and that is to discontinue domiciliary visits to the houses of persons opposed to them; while the delegates to be sent to Tokyo and other towns are to be chosen with the greatest care.

Count Okuma, during his recent visit to Osaka, was invited to a meeting of persons interested in the establishment of a female university. He remarked, in the course of a short speech, that although the civil and military systems of Japan could now compare favourably with any in force in Occidental countries, female education in this country was practically neglected by everybody. He was in favour of taking immediate steps for the furtherance of female education in Japan. Count Hijikata, at the same meeting, reiterated the arguments he used many years ago in favour of the establishment of higher educational institutions for women, and then touched upon the necessity for a more thorough training in domestic matters of the young women of Japan. A resolution, and also petition, in favour of the scheme, were then put and carried.

It is said that the directors of the Nippon Yusen Kaisha had intended declaring a dividend of eight per cent. only this year, but were compelled by the shareholders to raise it to ten per cent. As a matter of fact, says the *Mainichi Shimbun*, the company having lost 163,300 yen this year, no dividend ought to have been declared. It was only by utilizing the reserve set apart for the equalization of dividends that the matter was arranged. The Company, says our contemporary, is resorting to a most risky expedient, and will have to reckon with its consequences sooner or later. It must depend wholly on its earnings for a dividend during the next half-year, and there is no reason to suppose that it will do better than it did in the half year just ended.

In making the above statement, the *Mainichi* appears to forget that the company's fleet of twelve new steamers, one of which has just passed the official inspection, will be entitled to a bounty of from two to three million yen during the present year. A ten-per-cent. dividend amounts to 1,210,000 yen per annum, so that, even if the Company continues to lose on its European and American lines at such a rate that its working account will show a loss of from three to four hundred thousand yen a year, over all, it will still have an ample margin to pay a dividend.

Remarkable progress is noticeable of late years, the *Yomiuri* notes, in all practical enterprises in Osaka. The capital now appropriated to this purpose has reached an enormous figure. Statistics show that the various companies in the city number 421, of which 14 belong to agricultural industry, 215 are engaged in manufacturing occupations, and 193 are commercial organizations. The capitals of the agricultural companies aggregate 364,400 yen, those of manufacturing corporations 37,226,870 yen, and of commercial companies 36,997,683 yen, making a total of 74,588,953 yen. Branches and agencies existing in Osaka for the various companies in other parts of the empire now total sixty-one, while banking institutions are no less than ninety-one in number, with an aggregate capital of 22,768,000 yen. Besides these there are ninety-eight branches of banks whose head offices are established elsewhere.

The annexation of Hawaii by the United States is not desired by the entire people of Hawaii, nor does it evoke universal sympathy in America, says the *Hochi*. Yet the spirit of annexation entertained by the Americans who have under their control the Government of the little Republic has in no way relaxed or decreased. Mr. Smith, Chief Justice of Hawaii, in his recent trip to America, organised a movement towards annexation, which seems to have strengthened in no small degree the intention of Americans to carry their scheme into practice. President McKinley, however, made no decisive reply on the subject in his late interview with Mr. Smith. The latter is alleged

to have failed in his attempt through vehement opposition from Mr. Sherman, but whether that was really the case is doubtful. The President has lately appointed Mr. Sewall Minister to Hawaii. Originally Mr. Sewall was a bigotted advocate of annexation. His pertinacity in this respect made him early conspicuous among the Republicans at variance with his father and Mr. Cleveland, who, being prominent Democrats, were strong opponents of annexation. Had the President and Mr. Sherman held conflicting views on the subject of Hawaii, the appointment of Mr. Sewall to such a post could scarcely have been effected.

Many abuses having sprung up in connection with the enforcement of the Trades Tax Law. Loud complaints having been heard in all directions, Mr. Shimada, Vice-President of the Lower House, at the ordinary meeting of the Economic Society of Tokyo held on the 15th inst., spoke upon the lamentable abuses appertaining to the administration of the law referred to, and it was eventually resolved to appoint a committee to investigate the facts up to the present time, and to make suggestions for the amendment of the Law. In pursuance of this resolution a conference was held at the *Keisai Zasshi* office on the 18th instant by the most prominent economists of Tokyo, among whom may be mentioned Messrs. Shimada, Minoura, Taguchi, Sakurada, Tsuboya, and Masuda. After much discussion the following measures were decided upon:—Information with regard to complaints against the Trades Tax Regulations shall be collected at the *Keisai Zasshi* office from all parts of the empire, until the 10th of June; written suggestions shall be received until the same date from those who are acquainted with the subject, as to the alterations required in the Law. Frequent conferences are to be held in future to discuss questions relating to the removal of the present abuses.

It has been settled that the posthumous ranks—that is to say, official ranks not military or naval ranks—to be bestowed on officers and soldiers killed in the War, and the grants of money to be made to their families shall be as follow, the maximum being mentioned in each case:—

Commissioned Officers—three steps of rank, and sums varying from a maximum of 5,000 yen in the case of Generals, to 3,000 yen in the case of Colonels and Majors, and 1,500 yen in the case of Captains and Lieutenants.

Non-Commissioned Officers—ranks up to the Second of the Seventh Grade, and gratuities up to 750 yen.

Privates—ranks up to the Second of the Seventh Grade, and gratuities up to 400 yen.

It is stated that Mr. Okuda, Chief Secretary of the House of Representatives, is to leave Japan on the 14th of June, and travel to the European capitals *via* Washington, for the purpose of inspecting the buildings of the various national assemblies. He will return to Japan in October. His trip is connected with the erection of a permanent structure for the Japanese Diet. The *Yomiuri* alleges that as a sum of five million yen is to be spent on the structure, and as the plans hitherto prepared are not entirely satisfactory, this inspection tour is to be undertaken. To us it seems a most superfluous step. Plans, elevations, photographs and the minutest details about every Western parliamentary building are easily procurable, and if submitted to experts in Japan—indeed Japanese and foreign experts in this country probably possess such documents and drawings already—a far more intelligent decision could be formed than by sending abroad a gentleman who, whatever may be his general abilities, possesses no architectural training whatever.

The *Kokumin* writes a striking note about house rent in Tokyo. It says that buildings which could have been rented for 3 or 4 yen before the war, now command 10 yen; that 10 yen houses have gone up to 17 or 18 yen; and that dwellings erected at a cost of two or three

thousand yen ten years ago, bring in a thousand a year to-day, and are valued at ten thousand yen. In fact, house letting is among the most lucrative of all occupations. Despite the fact that the wages of carpenters and plasterers have appreciated fifty or sixty per cent. in the past three or four years, houses can still be built and let at most paying prices. For an ordinary structure the cost of building does not exceed 20 yen per *tsubo*, and many dwellings put up for letting have not cost more than 15 yen a *tsubo*. To be the owner of 3 or 4 houses measuring 30 *tsubo* each, is to have a perpetual income equal to the revenue of a Baron. So says the *Kokumin*. The revenue of a Baron is a sufficiently vague term.

NEWS OF THE WEEK.

We hear delightful things are expected of "Maritana," which Mr. Twinning is arranging for June 18th, at the Public Hall.

The *Kobe Chronicle* is the latest local paper to increase its size, the enlargement practically adding four columns of additional space.

We understand that Mr. H. Vincent's fine house on the Bluff, Lot 106, with 1,000 *tsubo* of land, has been bought by Mr. Holm for \$22,500.

Mr. J. C. Hall, H.B.M.'s Consul at Kobe, acknowledges with thanks receipt of 234.05 yen, from the *Osaka Mainichi Shimbun*, being the amount of contributions collected by that journal in aid of the Indian Famine Relief Fund.

The Governor-General of the Philippines issued a proclamation on the 17th May declaring that the rebellion was at an end, promulgating a conditional amnesty, and announcing that many of the insurgent prisoners would be released.

The *Fiji* learns from Peking that the Anglo-Chinese loan recently floated through the agency of Dr. Dudgeon, is to run for fifty-one years, and only bears five per cent. interest. Part of the Customs and the revenue of the Home Department are given in pledge.

The *Mainichi Shimbun* advocates an immediate doubling of the railways in and around Tokyo and the big commercial centres. The trade of the country, it says, has increased in much larger ratio than the means of transportation, and hopeless congestion of traffic is now the order of the day.

The United Spinning Companies of Osaka have resolved to make various improvements in the packing, marking, and labelling of their yarns, and have drawn up a draft of rules to be carried into effect at once. As usual, they provide for the dispatch of inspectors to all factories violating the new regulations.

The *Kobe Chronicle* finds that there are close upon one hundred ships of war on the China and Japan station. Of these 28 are British ships, in addition to six torpedo-boats in reserve, and three second-class boats; and there are 58 others, including 18 Russian, 13 Spanish, 9 French, 7 United States, 5 German, 2 Portuguese, 2 Austrian and 1 Netherlands.

From the *Nagasaki* journal we learn that the wreck of the German steamship *Doris*, which recently stranded on the North-western end of Tanshima Island, was sold by auction for \$16,850. Captain I. Koch, of the German Consulate, Nagasaki, acted as auctioneer. The bidding was slow and the operation lasted an entire hour. The ship eventually fell to Mr. R. H. Powers, who acted as broker for Japanese purchasers in Kobe.

The Rev. W. T. Austen, Chaplain of the Seamen's Mission, sends us the following statistics for the quarter ending May 31st:—Visits to ships, 944; Visits to Hospitals, 43; Visits to Consular Gaols, 14; Religious Services held, 85; Social and Magic Lantern Meetings, 35; Attendances at Religious Services, 2,038; Attendances at Socials, and Magic Lantern

Meetings, 1,288; number of seamen using the free reading room, 3,520; number of seamen carried by the *Gleaner* to and from the various meetings, etc., 1,648.

A British Consular report from Amoy, just published, says:—Japanese Matches have nearly a monopoly in this district. They have, however, several defects. In damp weather they will not light; in dry weather they light dangerously easily; they splutter, and are made of poisonous material, so that when they splutter, the burns they cause are liable to fester. Two reasons account for their ready sale:—Firstly, they are cheap; and secondly, the labels on the boxes are attractive to the Chinese.

Japan, according to the *Mainichi Shimbun*, has another cause of complaint against Hawaii, the Republic having raised the import duty on *sake* from fifteen cents per gallon to one dollar. The Japanese Government, says this journal, has made frequent representations to Hawaii upon the matter, but has been told that nothing could be done, as the increased tax has been duly passed in the Legislature and then formally promulgated as law. The *Mainichi* declares that the Republic has violated the most favoured nation clause in this matter and warns it against the consequences.

On the 31st ult. an enquiry into the circumstances attending the stranding of the steamer *Fuyo Maru*, of the Mitsubishi Company, was held at the Nagasaki Marine Office. The steamer left Nagasaki for Yokohama on the 3rd Jan. last under the command of Captain Johan Marchin Tornoe, a German subject, and on the following morning the vessel touched a shoal off Hakuto, Chikuzen Province, but having sustained no serious damage continued her voyage. After hearing several witnesses the Court cautioned the Captain to be more careful for the future, and returned his certificate.

The price of rice having risen considerably, foreign rice has lately been imported into Yokohama to the following amount:—

	Bags.
Shanghai cleaned rice	19,265
Shanghai pounded rice	1,416
Shanghai uncleaned rice	735
Shinching uncleaned rice	323
Annum cleaned rice	300
Tonking cleaned rice	820

Total 26,710
The French steamers during May brought 140,000 bags.

The imports of Raw Silk at New York and San Francisco for April, 1897, were as follows:—

	Bales.	Lbs.	\$ Value.
New York.....	865	185,846	628,420
San Francisco	3,311	440,984	1,256,686
	4,176	626,830	1,885,115

The imports of Waste in the same period were:—New York, 182 bales, 54,500 lbs., valued at \$31,930. The imports of Japanese piece goods and silk handkerchiefs from Jan. 1st, to March 11th, 1897, were:—Silk Piece Goods, 59,073 pcs., Handkerchiefs, 72,510 doz.

The *Osaka Asahi Shimbun* states that the export of folding fans last year amounted to 20,287,872 in number, valued at 593,892 yen, showing an increase of 8,714,012 in number and 294,372 yen in value as compared with the figures of the year before last. The countries to which they were mostly exported were the United States, England, and France, in that order. The trade in ordinary fans has also made considerable progress during the past few years. Statistics of last year show the total export to have reached 2,102,446 in number, valued at 40,599 yen. In this branch of trade also the United States occupies the most conspicuous position. Next come England, Germany, Hongkong, India, and France. Fans are also exported to China and Australia, but in very insignificant quantity. The demand from the above countries is mostly for inferior articles,

varying in price from 6 rin to one sen and a half. They are principally used as presents, for advertising purposes, and bear historic pictures painted on one side and the name of some commercial company or private merchant on the other.

The *Kobe Chronicle* announces with regret, the death of Mrs. Tait, wife of Dr. Tait, which occurred at the residence in Nakayamate-dori at three o'clock on Wednesday morning, terminating a prolonged illness which had for some years defied the best medical skill. Last year Dr. Tait gave up a flourishing practice in America in order to take up his residence in Japan in the hope that Mrs. Tait might benefit by the change. During his brief residence in Kobe Dr. Tait won the friendship and esteem of a wide circle, and the deepest sympathy will be felt for him throughout the community in his bereavement. The deceased lady was a sister-in-law of Captain Swain.

Kobe papers report the murder of Hirose Sajiro, a coolie, by a fellow coolie, in the office of Jack Young, the well-known Kobe stevedore, on the afternoon of Tuesday. The *Kobe Chronicle* says that Jack Young recently ceased to do business with a certain firm of coolie contractors, who engaged a man nick-named "Onisadai" (or "Devil-sadai") to intervene. This man with three assistants accordingly waited upon Jack Young with a view to the renewal of business relations with the coolie contractors. The unfortunate man, Hirose Sajiro, was told off by Jack Young to conduct the negotiations. An altercation arose and one man whipped out a knife and stabbed Hirose in the side; the others (or two of them) joined in, and he received three other ugly cuts both before and behind, and was left dying where he fell. The ruffians, says the *Hogo News*, speedily decamped; three of them have, however, already been caught, and the fourth man is perfectly well known and the police are hot on his trail. They were speedily on the scene last night, and the whole premises were placed under guard. The terrible deed was committed about half past four and in twenty minutes the man was dead.

The *Hongkong Daily Press* is dissatisfied with Vice-Admiral Buller's distribution of the British Fleet on Diamond Jubilee Day. Admiral Buller proposes that Her Majesty's ships *Undaunted*, *Humber*, *Rattler*, and *Phoenix* shall be present in Hongkong on the 22nd June, 1897, to assist in the celebration of the 60th year of Her Majesty's reign. In fine scorn our contemporary writes:—"This long array of noble vessels will, subject to the exigencies of the service, dot the spacious anchorage: a belted cruiser, which is detained here, we believe, through the sickness of a large portion of her crew, a storeship, a small gunboat, part of whose slender crew is absent in the *Tweed*, and a sloop. This is the mighty force the Vice-Admiral deems sufficient to worthily represent the first line of defence at the review to be held in the Colony first acquired during the long and glorious reign it is proposed to celebrate with all the *clat* possible. The Colony and the Vice-Admiral differ materially." We think, with the Hongkong journalist, that at least one of the flagships might have been allotted to Hongkong. The place that comes off best in Admiral Buller's programme is the treaty port of Nagasaki, which has the *Centurion* and six other big vessels allotted to it.

Porcelain, remarks the *Osaka Asahi*, is a principal staple of export from Japan. It is chiefly produced at Seto, in Owari, at Karatsu, in Hizen, and at Tono, in Mino. Among the productions of these districts coffee cups occupy the most conspicuous position, plates and cake dishes ranking next. The figures for the past three years are as follow:—27th year (1894), 1,484,853 yen; 28th year (1895), 1,955,060 yen; 29th year (1896), 1,974,850 yen. These annual increases are ascribed to the reputation for cheapness that Japanese porcelains have attained in Europe and America. The places to which these goods are chiefly sent are

the United States, England, India, and a few other countries. Last year's export to the United States amounted in value to 802,580 yen. This year, however, prices of porcelain have risen more than twenty per cent. and the export trade has been seriously influenced. Moreover, the proposed American tariff that contemplates an increase of the former *ad valorem* duty of 35 per cent. for figured porcelain and of 30 per cent. for plain wares, to 60 per cent. and 55 per cent. respectively, can scarcely fail to cripple the trade entirely. About one hundred dealers in Osaka carry on a large business in exporting porcelain and they report that the home market is glutted with goods on account of the dullness of trade with the United States.

According to late advices from Swatow, the rebellion in Kaochou and Leichou prefectures, Kuangtung, appears to be quite serious. The rebellion, says the *N.-C. Daily News*, began about eight weeks ago in Shih't'ouch'en ("stone wall city"), in the former prefecture, and as it was a popular movement against the official and moneyed classes, the ranks of the rebels were being constantly swelled by city men, who were out of work, and country people whose fields lay barren and their families starving owing to the *yamen* runners enforcing the usual land tax as in times of abundant harvest. Late last month the rebels of Leichou prefecture attempted to storm the district city of Sanch'i but were repulsed by the courageous Chih sien, who successfully led the town militia against the rebels until reinforcements came from Leichou city itself. The inhabitants of the districts of Haing and Wuch'uan, Kaochou prefecture, are now also reported to be up in arms and joining the rebels, and the local military forces of the two prefectures have had to retreat before the superior numbers of the rebels, who are not only well-armed but also well led. So serious appears to be the state of affairs that Viceroy Tan, who was on sick leave for two months, has had to submit to force of circumstances and resume his duties, one of the first of which was to appoint Brigadier-General Cheng (the son of the late Commander-in-Chief of Kuangtung), to the chief command of the 5,000 extra troops destined to operate against the rebels. Shih't'ouch'en is to be the first city attacked by the Government troops, and as a portion of the disaffected districts are on the sea coast the Canton squadron has been ordered to co-operate with General Cheng's army.

Strange are the stories that reach distant lands of the fabulous wealth to be had in Japan for the simple asking. The day before yesterday there landed in Yokohama, from the P. & O. *Borneo*, a party of sixteen skilled artisans—skilled that is in the building and allied trades—who have thrown up work in Johannesburg on hearing that craftsmen in their line of work were getting 22s. 6d. a day in Japan! Mr. Atkins, who appears to be the leader among them, says that stories of the marvellously good wages paid to European mechanics in Japan have long been rife on the Rand, and when, in consequence of the Transvaal troubles, work grew slack, his little band thought that Japan was the most promising field they could turn to. Who is it, we wonder, that publishes these falsehoods abroad? Mail after mail brings us applications from all over the world, asking if such and such a statement is true regarding this branch of industry, or that particular trade, and would we recommend the writers to come out at once. A year ago marvellous stories of impossibly cheap bicycles made in Japan were current, and agents and firms abroad implored our aid to place them in communication with the firms who were turning out the profit-making machine of the hour. But that is beside the subject. The best advice we can give Mr. Atkins and his fellow craftsmen is to take the first steamer across to British Columbia, where labour such as they have to barter, can find a living wage. [Since this was written, we hear that the British Consul-General at this port has been seen and has promised his aid in assisting the men to return either to Australia or proceed to Canada.]

CORRESPONDENCE.

[Our readers must distinctly understand that we are in no sense responsible for that sentiments or opinion of our correspondents, for the accuracy of their assertions, or for the deductions they may choose to draw therefrom.]

PRINCE GEORGE & THE CZAREWITCH.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Prince George's letter to his father from Kobe, giving in detail the assault of Tauda Sanzo on the person of the Czarewitsch, to which Mr. Cary refers in your columns of to-day, appeared in almost all the continental journals. The first English translation appeared in the London Times. In the same letter the Prince wrote "after the assault Auntie (the present Empress Dowager of Russia) repeatedly telegraphed us to go to the ships at Kobe harbour, and on reaching there the sailors took me on their shoulders and carried me round the vessel several times while singing a national Russian song." Some time ago I saw in some continental papers (I think French) that the very came by which the Prince was enabled to save his illustrious cousin's life, was mounted in diamonds and prevented by the late Czar to the saviour of his son's life, as a birthday present. It is beyond any shadow of doubt that Prince George has openly and repeatedly claimed the honour of being the Czar's deliverer, and the Czar also, on his part, has acknowledged his gratitude to his saviour cousin, thereby confirming the Prince's version of that lamentable event. If the *Japan Mail* intends to contend the authenticity of this he is bound, in my opinion, to array some more convincing data than the negative statement of the short editorial note.

The present writer, personally, has no interest in the matter whatsoever.

Very sincerely yours,
Tokyo, May 27th, 1897.

D. I.

THE ARBITRATION TREATY VOTE.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In your issue of June 1st, under the caption, "Topics from American Papers," you have a paragraph giving the details of the vote in the U.S. Senate on the Arbitration Treaty. You have, however, misplaced the headings "(Against)" and "(For)," which should be changed about. There were 43 votes in favour of ratifying the treaty, and 26 votes against, a total of 69 votes. The treaty, therefore, received a large majority, but failed to be ratified, because it lacked 3 votes of the required two-thirds.

Respectfully yours,

ERNEST W. CLEMENT.

Tokyo, June 1st, 1897.

CRICKET.

YOKOHAMA V. THE NAVY.

The return match between the Y. C. and A. C. and the Navy was played on Saturday, the 29th instant, under decidedly unpropitious circumstances, as regards the weather, during the latter part of the day. The forenoon was fair enough, but after tiffin the clouds began to gather and by half-past three the rain came down in earnest, driving the players into the pavilion, and throughout the afternoon continued to fall at intervals. This of course had the effect of preventing visitors, especially ladies, from being present in any considerable numbers, in spite of the extra attraction offered by the Band of H.M.S. *Centurion*, which performed a selection during the afternoon. The Yokohama eleven, which we presume was the best that could be got together on the occasion, though it certainly did not represent the strength of the Club, opened the batting with Kingdon and Owen, against the bowling of Shelford and Gillett. The local team proved as unfortunate in their commencement as in the first match with the Navy on the Queen's Birthday. The first wicket fell for 3 and the fourth for 5, and it was not till Duff and Murray got together that any stand was made, Shelford's deliveries being very effective. Murray was caught out by Pead, off Shelford, after compiling 15, and Duff by careful play carried his bat out with a credit of 29 to his name; White and Lias falling victims to Shelford's straight ones for 6 and 9 respectively. The innings closed for the small total of 68. Very differently to their opponents did the Naval eleven open their innings. Dr. Pead and Lt. Gillett commenced the batting and despite several changes in the bowling, were inseparable for an hour or more, and when at last Gillett played a ball from Lias into Owen's hands, the score stood at 74—a win before a wicket

had fallen. Dr. Pead was run out shortly afterwards, when the total stood at 83 for two wickets. After this the scoring dropped off considerably and the innings closed at about 5 o'clock, in a drizzle of rain, for 125 runs for 8 wickets, Farie and Whayman being not out, and Hutchens to bat. For the Navy, Shelford made a capital average with the ball, 7 wickets and 40 runs from 70 balls, while Watson showed up well for the local team with 4 wickets and 17 runs only for 55 balls. The rest of the bowling on Yokohama's side was decidedly below the average and the fielding ditto. The scores were as follow:—

BASEBALL.

TOKYO HIGH SCHOOL versus Y. C. & A. C.

Once again have the baseball players of Tokyo beaten a team of the Y. C. & A. C., and this time by the decisive figures of 15 runs to 6. Thursday was anything but a pleasant day after 11 o'clock in the forenoon. Spells of close, depressing air, being interspersed with rain showers that increased in violence every half hour, till at 2.30 p.m. it was raining heavily and the prospects of the game coming off seemed very remote. But by half-past three there was a break in the clouds and a wind sprang up, keeping away the rain for the next two hours. The ground under such conditions was very greasy, and the turf made but a slippery surface for leather soled boots. The Japanese players were not inconvenienced much, as almost invariably they run barefoot in these matches, and thus have a considerable advantage over their foreign rivals. One thing was very noticeable on Thursday afternoon, and that was the peculiar manners of the two thousand and odd Japanese students who were present on the ground. They crowded round the score's box, completely blocking his view of the game, despite frequent protests; they refused to stand behind the ropes that marked off the players' proper territory, thus hampering the game considerably; while the remarks they passed on the decisions of the Umpire were anything but gentlemanly. Altogether it was not by any means the pleasant, courteous set of young fellows that have usually attended such matches.

The game, that should have started at 3.30 p.m., began at five minutes to four o'clock, Yokohama going out to field, having Ellis as catcher and Gibbs as pitcher. Four no-balls were sent down in the opening essay and Moriaki took a base. He stole the second and third and then had to wait a bit, as Shiwozawa, the next player, was given out on strikes, while a similar fate befel the next man, Fujino. Meanwhile Moriaki got home, scoring the run. The crowd during this innings were sitting so close to the first base line that fielding there was almost impossible, seeing which some Japanese principals managed to get the spectators farther back. Then Matsushima, striking a short ball, was put out at first base and the innings closed with one run only. Smith went to bat first for Yokohama, but was caught out by the third base man on the first ball. Briggs followed and made a double-base hit. Abell followed him, only to be caught on the fly in the right field. Ellis was next in, and played his first ball into the catcher's hands—so the whole

side were out for nothing. The Japanese opened the next innings by losing Yamada at once, Abell holding him at short-stop. The next player got home, however, to be followed by two others, bringing the score up to 4 before the side were out. Blake then went in for the home side sending a ball right down the field. He made a double base and was urged to make a treble but the ball was returned so swiftly that he arrived too late. Onderdonk and Merriman, the next two batters, got home, the first on a good strike by Morse, the other on a hit by Smith. Runs came so freely that five had to be hoisted when the side went out. Blake went on as pitcher at the third innings, Gibbs going to third base. The home side's fielding was very loose, the wet grass causing the men to slip all over the place, so much so that three runs that ought to have been stopped were placed upon the board before the visitors went out to field. Gibbs, the left-handed bat, was the seventh man in for Yokohama, but he failed to achieve anything being caught at first base by Matsushima. Merriman came in next and got down to first base with a low ball played to centre field. Morse, the next player, was caught on the fly in the left field, and then Smith went on at the plate, only to be dismissed by first-base man; Merriman thus being left on second base. Nothing had been added to the score. The next innings opened badly for the visitors, two players being put out on first base with successive balls. Then Blake sent down 4 no-balls. The Japanese added one run during this innings. Yokohama then followed on for the close of the fourth innings. Briggs was caught out in the far field off his first ball—a splendid catch: then the pitcher struck Abel severely on the back of the head, at which the Japanese spectators laughed immoderately, as if a blow from such a hard ball was the best fun imaginable. Ellis, the next man in, managed to get down to first base, then Blake sent a ball into left field's hands; and Onderdonk gave three strikes, the side thus being out for another maiden innings. One run was made by the students in the fifth innings; but Yokohama again failed to score. Three runs were added by the visitors in the sixth innings, and the home side again went in. Abel was caught out, then Ellis made a double base, afterwards getting home, through Blake playing a double. Onderdonk, the following bat, was caught in the left field, and Gibbs went out on first base—six runs against twelve. The next innings were barren, so far as the score was concerned, but some smart fielding took place on both sides. Briggs, for instance, put three men out on first base in the eighth innings, playing a splendidly cool game. Blake had rough luck, a capital ball played down the left field being caught at the fence; and a similar fate befel Gibbs—Yokohama's sixth maiden innings. The ninth and last innings opened in drizzling rain, but the Japanese managed to compile three more runs. The last few minutes of play were disastrous for Yokohama, Gibbs, and Smith being caught out with successive balls, and Briggs came to grief next—all flies. Indeed, the magnificent catches of the Japanese players was a feature of the afternoon, only one catch being muffed.

Mr. W. S. Stone was Umpire; Mr. Geo. E. Rice, Scorer.

THE CLUB HOTEL, LIMITED.

The eighth annual general meeting of shareholders of the Club Hotel, Limited, was held at the Hotel on Monday afternoon, the 31st May. Mr. Litchfield was in the chair, and there were also present Captain Bougouin and Messrs. A. Coye, E. Knaff and R. Ward, Directors, and Messrs. C. D. Moss, J. W. Hall, Theo. Morris, G. C. Allcock, R. Meiklejohn, Captain Weston, John McLean, G. Booth and C. H. Fearon, Secretary.

The Secretary read the notice convening the meeting.

The CHAIRMAN said that before proceeding to read the report it was usual to read the minutes of last meeting, unless it was decided by the meeting to take them as read.

Mr. HALL proposed that the minutes of last meeting be taken as read. Mr. Allcock seconded and the motion was carried.

The CHAIRMAN, in introducing the report, referred to the sum as shown in the accounts, spent upon repairs and improvements of the building—which they hoped would add to the business and attractions of the Hotel. The Directors were in every way satisfied with the present management and they were doing a fairly good business. He had however to report a change in the management of the Tokyo branch.

Mr. HALL said the Directors, who were business men, had hitherto given their time to the affairs of the Hotel without remuneration, which he did not think was fair to them now that the Hotel was paying dividends. He would propose that out of the \$1,700 carried forward to new account \$1,000 should be given to the Directors as remuneration for their services for the past year, and that for the future the Directors' fees should not be less than \$1,000 per annum.

The CHAIRMAN—It would be in order first to pass the report and accounts, and declare the dividend. After that Mr. Hall's motion can be brought forward.

Mr. JONES moved that the report and accounts as presented be passed.

Mr. ALLCOCK said that before the accounts were passed he would like to know something about the \$1,500 written off for bad debts. How many more years were they going to see this \$1,500 brought forward and written off?

The CHAIRMAN, in reply to Mr. Allcock, said that they had a considerable amount of bad and doubtful debts, part of which had been taken over from the former management two years ago. They did not write off the whole sum at once as part of it was recoverable and had been already recovered and more they hoped would be recovered. There were no new bad debts and he thought by another year the amount would be liquidated. This was as much as he thought it advisable to say in public but Mr. Allcock could obtain any further particulars he desired from the office.

Mr. ALLCOCK said he was perfectly satisfied with the kind explanation given by the Chairman, and he would be glad to second Mr. Jones' motion for the passing of the report and accounts.

The motion was then put to the meeting and carried.

The CHAIRMAN—The next business is the declaration of a dividend.

Mr. WARD proposed and Mr. McLean seconded, that a dividend of 4 per cent be declared, and the motion was carried unanimously.

Mr. HALL's proposal was then brought forward and was seconded by Mr. Morris.

The CHAIRMAN said the motion was one that he felt some diffidence in putting to the meeting, but on behalf of his fellow Directors he did so, at the same time thanking the shareholders for this substantial proof of their appreciation of the efforts of the Board.

The motion was put and carried unanimously.

The next business, the CHAIRMAN said, was the election of Directors. There were three vacancies; Mr. Litchfield and Mr. Brower retired by rotation, but were eligible for re-election, and Mr. Knaff had resigned.

Mr. HALL suggested that Mr. Knaff should reconsider his decision and remain on the Board, and eventually Mr. Knaff was induced to withdraw his resignation. This left two vacancies to be filled.

A ballot was then taken, Mr. C. D. Moss acting as scrutineer, with the result that Mr. Litchfield was declared re-elected and Mr. Pigott elected in place of Mr. Brower.

The CHAIRMAN proposed the re-election of Mr. Stewart as auditor.

Mr. KNAPP said Mr. Stewart had informed him that he would be unable to serve.

The CHAIRMAN then proposed Mr. C. D. Moss as auditor. Mr. McLean seconded, and the motion was carried *nem con*.

A vote of thanks to the Chairman and Directors for the past year, proposed by Mr. Booth, brought the proceedings to a close.

The report and accounts were as follows:—

REPORT AND ACCOUNTS.

The Accounts of the working of the Company during the past financial year ended 31st March, 1897, are submitted to the Shareholders.

The gross profit for the year is \$25,210.10, including \$2,309.31 brought down from last year.

Of this sum \$7,417.73 remain for distribution, after meeting the outgoings, inclusive of an interim dividend of 3 per cent. to Shareholders. It is proposed to pay a further dividend of 4 per cent. to Shareholders and to carry forward \$1,017.73 to a new account.

In the absence of Mr. H. Arnould from Japan, Mr. G. Syme Thomson was invited to join the board of

directors. Mr. Knaff retires from the board and does not offer himself for re-election. Messrs. H. C. Litchfield and T. L. Brower retire in rotation, but, being eligible, offer themselves for re-election.

HENRY C. LITCHFIELD,
Chairman.

C. H. EARNON,
Acting Secretary.

I have compared the above account with the Books and Vouchers of the company and find the same to be in accordance therewith.

JAS. STEWART,
Auditor.

THE CONVICT'S SOLILOQUY.

(TENNYSONIAN.)

I come from haunt of shady men,
From dingy court and alley;
And sparkle in the ways of crime,
And bicker down the galleys.

By thirty jails I hurry down,
A-dribbin' through the ridges;
And workin' for the Government,
Without no privileges.

Till by Old Bailey's dock I flow,
To join the brimmin' river—
The tidal tide of shoddy men,
Whose terms go on for ever.

I growl about the stony ways,
In little sharps and trebles;
And murmur at my luckless fate
A-breakin' o' the pebbles.

I wind about with other gangs,
Whose clankin' chains are trailin';
And hear the gaffer's lusty shout,
If in our work we're failin'.

The weary hours of sultry day
My gloomy soul depresses;
Till in my cell the pallet straw
My weary form caresses.
But in the silent midnight hour,
I dream of hazel covers—
Where I and other poaches met
And roamed like happy lovers.
I slip, I glide, I gloam, I glance,
Among the swaying mallows;
And make the netted pleasants dance
Like convicts on a gallows.
O, blissful liberty of soul,
No prison gyves can fetter,
One moment to forget the task
The penal code has set her.
But often when the prison clock
The early hours is chiming,
I lie awake upon the straw
And watch the moon a-climbin'.
And here and there across the bars
The silent cloudbirds travel,
Athwart the moon's resplendent disc,
A-shinin' on the gravel.
The changing scenes of prison life
Are full of wisdom's teachin',
And tell of life's vicissitudes
Like any parson's preachin'.
Men come from every grade of life
All social joys to sever,
And some will come and some will go,
But I go on for ever.

F. STANILAND.

DECORATION DAY IN YOKOHAMA.

Decoration Day was celebrated in Yokohama on Sunday last with more distinction and general interest than of late years, and in spite of the absence of the flag-ship *Olympia* was participated in by a large number of men-of-war's men as well as of the general public. Parties of blue jackets and marines, numbering between one and two hundred, from the *Yorktown* and *Petrel*, landed at the steps near Yato bashi about 9.30 a.m. and headed by the Band of the *Olympia*, marched up to the Cemetery, where Admiral McNair and his staff awaited them. The naval detachment was then drawn up in three sides of a square around the well-known monument erected to the officers and men lost in the *Onsida*, the spot where on all former occasions the same ceremony had been performed, and new floral wreaths and crosses offered from year to year. On this occasion, as usual, the monument was decorated with the national flag as well as flowers, and around it, behind the naval array a large number of American and other foreign residents of Yokohama were gathered. After the hymn "Nearer my God to thee," had been played by the Band, Captain Stockton, of the *Yorktown* offered a short prayer and after another air from the Band, briefly spoke as to the occasion which they were commemorating, and introduced Major Stuart Eldridge, who delivered the following address:—

To honour the dead is a beautiful and pious instinct of our nature which is manifested even in savage tribes, and to forget the faults, and to remember but the virtues of those who have left us, is almost as universal. If then the dead, as such, seem worthy of honour, how much more should we cherish the memory of those whose lives have been given for the good of humanity, and whose deeds have benefitted the world.

So, growing out of a desire to maintain the recollection of those who died in defence of our country, and of human liberty and progress during the great civil war, it has become the custom, in the United States, upon one day in the year, to renew the memories of that time of trial, and to decorate with flowers and our country's flag the graves of those who fell or fought, until now, at this bright spring season, when the perfume of the tribute blossoms rises sweetly to Heaven as did the savour of the deeds we celebrate throughout our broad land, the resting places of the loved and lost bear this day the tender offerings of a grateful nation. North and South, the dwindling remnants of the great hosts in blue and grey that for four long years struggled and died with a sublime and patriotic devotion that won the world's wonder even when mistaken as it was, alas! with the brave sons of our beautiful South-land, go forth to honour their dead comrades, often, thank God! hand in hand, as brethren.

So great was the war, and so vast the numbers of men engaged, that, in the wide borders of earth, wherever commerce or travel calls the foreign guest, there is scarcely a place of graves without its shrine for all true Americans. This, my friends, is why we stand here today, on this remote shore, in reverence of the memory of men who fought that we should keep a country and a place among the nations, of which we can be proud. In this little God's Acre lie men who, though escaping the dangers of battle, lingered to die on this foreign soil, late victims of the disease which, in all wars, kill more than the bullet or the sword. By the side of these sleep others who, having safely endured the awful ordeal of conflict by sea, passed, by sudden shipwreck, to join their comrades slain in battle.

As we place our humble tribute on the tombs of these heroes, let us remember that the ceremonies of

to-day teach, for all of us, a lesson of patriotism. In human affairs everything soon passes into dim oblivion, and already, to many of us, the war of the Rebellion is but as the clouded recollection of a dream. To the younger generation it seems, perhaps, but ancient history, and there is a feeling that war, in our country, with its wealth, its population, and all conditions so eminently peaceful, is not again a possibility. So we felt when came the thunder crash of 1861, and we looked aghast at each other, scarce realizing that war—cruel, bloody war, was actually upon us. Alas, the full sense of its misery followed fast at the heels of the messenger from the first battlefield, and the sum of grief, suffering, and death soon involved almost every household in the land. God grant that never again may the dread tocsin of battle send its peal through our home-land, but, should war come, and come it may, may the young men of to-day lay down their lives for the country we love as cheerfully as did their fathers!

"Rest on, embalmed and sainted dead,
Dear as the blood ye gave;
No impious footstep here shall tread
The herbage of your grave!
No shall your glory be forgot
While fame her record keeps,
Or honour points the hallowed spot
Where valour soundly sleeps.

After the conclusion of this impressive address, more wreaths were placed when the monument and the naval detachment fell in behind the band and marched back to the landing place, while many residents of Yokohama strolled among the graves of departed friends and renewed the flowers on their resting-places.

RAILWAYS OF JAPAN.

ACCIDENTS TO RAILWAYS.

On the Tokaido line a water reservoir, situated at the upper part of the tunnel at Okamigawa in the Kusatsu-Bamba section, broke its embankment at about 4 a.m. on June 27th, and the debris endangered the operation of trains. It that section, therefore, 16 up and down trains were temporarily suspended. On the same day, a sudden outflow of accumulated rain water at Hashiriya in the vicinity of Otani Station, brought down a good deal of mud and gravel, making it necessary to stop the running of six up and down trains between Otani and Bamba. On July 20th, as the 5th train—consisting of 25 waggons—between Bamba and Kyoto, was on the point of entering Yamashina station with a locomotive operating at the rear, the train parted into three separate portions owing to the brake screw of the front locomotive having been injured and the consequent impossibility of slackening the speed of the train. Eight trucks, 6 waggons, 1 oil wagon and a brake van, in all 16 waggons, with the rear locomotive, were derailed and did much damage to the track. The operations of trains on the Bamba-Kyoto section was temporarily suspended, and repairs were at once undertaken, so that after the 8th up train passenger traffic became possible, though goods trains on the section were obliged to suspend operations till the 26th of the month. In consequence of heavy rains on July 22nd and the collapse of the embankment at the mouth of No. 3 tunnel on the Yokosuka line, the operation of two up and down trains on that line was interrupted. Owing to a continuous downpour of rain about July 20th in the districts bordering the Tsuruga line, and an unusual swelling of the rivers by the 28th or 29th of the month, especially the Arima, Imoto, Yanagase, Hikida, and Kenome, bridges in their vicinity were washed away, the track was damaged, and muddy water overflowed the surrounding districts, washing away houses, flooding fields, and causing many casualties to life. The damages were particularly heavy on the Yanagase Hikida section, Nagahama-Takatsuki section and the Hikida-Kanagasaki section, in the order named. Lesser damages were very numerous. On the 29th, the operation of trains along the line was stopped half way. The No. 6 up goods train had a narrow escape. The train, consisting of nine waggons, left the Hikida Station at its due time, but when it reached the front of No. 159 iron bridge, at 25 miles 45 chains, the bridge was found to be injured by the floods. A railway coolie displayed a danger signal. Further progress being out of the question, it was resolved to turn backward, but so violent was the force of the floods that damage had already overtaken the adjoining track, so that 2 lumber waggons and one kerosene wagon were derailed, while the rest of the train only just succeeded in getting back to the starting point. Under the circumstances, trains on that line were confined to traffic on the Mayebara-Nagahama section. By Aug. 26th, two up and down express passenger trains were run on the Mayebara-Nakanogo section; three up and down express passenger trains on the Mayebara-Yanagase section by Sept. 26th, and three up and down express trains on the Kanagasaki-Hikida section by Oct. 22nd. From Dec. 15th,

traffic on the line had resumed its ordinary aspect. On the Ogaki-Tarui section also the collapse of the Akasaka river embankment on July 29th resulted in the submersion of the track along an extent of one mile, and No. 270 up goods train, composed of two locomotives, two brake vans, and four waggons, had one brake van, two waggons and the locomotive derailed several chains west of that river, and the running of trains along that section was suspended till August 6th. On Dec. 24th, when No. 195 train reached Gotemba station, the supplementary locomotive at the rear was uncoupled and then ran into a train that was standing still. The result was that two 3rd class carriages on boggy wheels, one brake van, at the rear, convertible into a passenger car, buffers, buffer bearing, wind glass were damaged, two passengers were wounded and one conductor rendered insensible. However the track did not suffer injury. On the Shinyetsu and O-U lines, though snow interfered more or less with the operation of trains, no total stoppage happened. Only from January 23rd and 31st, operations were suspended along a short length at the north of Kashiwabara. The frequency of accidents that happened to railways and to railway servants during the year, as well as the number of persons who violated the railway regulations, are tabulated as follow:—

Line.	Vehicles derailed.			Collisions.			Accidents to railways.		
	Locomotives.	Cars.	Waggons.	Locomotives.	Passenger trains.	Goods trains.	Natural.	Artificial.	Total.
Tokaido...	21	28	55	37	4	8	18	141	161
Shinyetsu...	6	—	10	7	1	2	17	31	48
O-U.....	—	—	—	1	—	—	3	4	7

Lines.	Accidents to Vehicles.			Obstruction to passengers on trains.			Violations of Regulations.		
	Locomotives.	Cars.	Waggons.	Natural.	Artificial.	Total.	Blindness of Pointmen.	Blindness of Re-spectors.	Total.
Tokaido	119	195	208	13	164	396	50	161	657
Shinyetsu	111	27	43	14	29	205	7	6	212
O-U	16	—	2	1	3	22	—	1	23

Offenders against Railway regulations are subdivided according to the nature of their offences. Those that did not pay fares for distances longer than their tickets entitled them to ride, were 78; those that attempted to obtain passage without tickets, 73; those that jumped from cars while the train was in motion, 14; those that used time-expired tickets, 1; offences against decency, 2; total, 168.

Again, casualties to life either from accident or negligence during the year totalled 258, 169 persons being killed and 89 wounded. If, exclusive of casualties, traceable either to motives of suicide or to negligence, the ratio between casualties to railway officers and the total mileage of locomotives be taken, there was one death per 2,700,000 miles, and one injured per 318,000 miles; while casualties to passengers were in the ratio of one injured for 47,550,000 miles. These casualties are specified below:—

Line.	Passengers.				Officers.			
	Accidents.		Negligence.		Accidents.		Negligence.	
	Wounded.	Killed.	Wounded.	Killed.	Wounded.	Killed.	Wounded.	Killed.

Preservation cost of electric apparatus	4,751,114	3,848,272	902,841

FINANCIAL AFFAIRS.

ESTIMATES AND SETTLED ACCOUNTS RELATING TO RAILWAY CONSTRUCTION.

The total estimates for the year were at first 1,520,000 yen, but as supplementary estimates of 1,000,000 yen were subsequently added, the figures for the year totalled 2,520,000 yen, which, with a sum of 660,911 odd yen, brought over from the previous year's accounts, aggregated 3,180,911 odd yen. Against these estimates, a sum of 2,126,170 odd yen was settled during the year, so that 1,054,741 yen represents the sum carried forward to the next year's accounts, as specified in the appended tables.

The reasons why supplementary estimates were necessitated are briefly these:—Works of construction on the Fukushima-Aomori section and the Tsuruga-Toyama section proceeded steadily from their commencement in the 26th fiscal year, and not only the Aomori-Ikarigasaki section, a distance of 36 miles, was opened for traffic, but also boring works at the Itaya tunnel—the most arduous portion of the Fukushima-Yonezawa section, which, it was thought, would not be completed till March or April of 1896—were virtually finished at the beginning of Nov. 1895, so striking was the progress of the work. (2) Works of construction between Tsuruga and Morita (distance 41 miles), on the Tsuruga-Toyama line, also went on steadily, so that it was expected that traffic could be opened from February 1896. In July 1895, floods suddenly destroyed the greater portion of the work, and it was necessary to undertake repairs before resuming construction. (3) The Hachioji-Nagoya line being one of the most important, work was started as quickly as possible, especially since a long time will be required in construction. (4) The Shinonoi-Shiojiri section having close relations to the above mentioned line, had to be undertaken at the same time. All these causes combined to necessitate supplementary estimates. Those estimates were at first compiled with a view to meeting requirements expected to arise during the first three months of the year; but as it was not till the end of March that, with the approval of the Diet, the estimates were published, there was no time to use the money for the purposes designed. Of more than 1,054,000 yen carried forward to the next year's accounts, therefore, about 1,000,000 yen came from the supplementary estimates.

ESTIMATES AND SETTLED ACCOUNTS.

The estimated Revenue at the beginning of the present fiscal year was 7,061,020 odd yen, and expenditure, exclusive of reserves, 4,392,904 yen, approximately. However, owing to the conveyance of troops and military stores, receipts were greatly augmented, and various incidental repayments and other expenses increased proportionately. On the other hand, the July floods on the Mayebara-Tsuruga section and the Ogaki-Tarui section damaged a large portion of the railways in those places, thereby necessitating the spending of a considerable sum on account of repairs. Such being the case, 1,487,843 yen in revenue, and 950,172 yen in expenditure, in the form of a supplementary budget, were laid before the Diet, and its approval was obtained. Besides these, a sum of 366,436 yen in round figures was brought over from the previous year's account, as receipts and expenditures not settled, and appropriated into Revenue; another of 263,378 yen, also brought over in the same way, and appropriated into expenditures, and lastly there was a sum of 98,940 yen drafted from the Reserve Fund. Altogether the Revenue in the present year's Budget totalled 8,915,301 yen, approximately, and the expenditures 5,705,396 yen approximately. Against this, on the side of Revenue, were duly settled receipts of 6,030,978 yen and others yet to be settled of 304,605 yen; while, on the side of expenditures, 4,986,840

The sum set aside on this account was, in Revenue and Expenditures, 4,690,583 yen approximately, but since a sum of 111,503 yen as receipts was yet to be settled and brought over from the previous year's accounts, and also a sum of 127,783 yen expenditures yet to be settled, Revenue and Expenditures in this year's Budget totalled 4,802,087 yen and 4,818,367 yen respectively. During the year receipts duly settled, on the side of Revenue, were 2,010,038 yen and receipts yet to be settled 502,106 yen, in all 2,512,145 yen; while, on the side of Expenditures, amounts duly settled were 1,939,131 yen, and those yet to be settled 227,343 yen; altogether 2,166,475 yen. Consequently, there was in Revenue a difference of 2,289,941 yen and in Expenditures 2,651,892 yen, compared with the original Budget, as shown below.

* Figures marked with the asterisk represent balance in favour of the estimates.

Balance, net profit 3,602,593 842

Of the above items particulars relating to Revenue duly received and sums yet to be collected, in the section of Receipts, and disbursements duly settled and those yet to be settled, in the section of Disbursements, are shown in the table relating to Estimates and Settled Accounts of Railway Working capital.

Total	6,452,837.209
-------	-----	-----	-----	---------------

DISBURSEMENTS.

Expenditures duly defrayed ...	1,939,131.741
Disbursements yet to be defrayed...	227,343.289
Amount of the Fund ...	1,800,000.000
Amount previously received ...	15,374.191
Value of materials sold and paid for...	1,944,345.882
Value of materials sold and delivered, but not yet paid for ...	491,273.837
Value of materials included in loss account ...	6,073.528
Total ...	6,423,542.388
Balance, profit ...	29,294.821

Of the above, particulars relating to the items of Revenue duly received and of sums yet to be collected, in the section of Receipts, and the items of Expenditures duly disbursed and expenditures still to be defrayed, in the section of Disbursements, are shown in the section of estimates and settled accounts relating to Revenue and Expenditure in the Government Railways Stores Fund. In the section of Receipts, a sum of 120,540 yen cash was brought over from the 27th fiscal year but is really a sum that belongs to a portion of unpaid expenses. The total of unpaid expenditures during the previous year was 127,783 yen, and cash corresponding to that amount has to be brought over. But as against the Fund of 1,800,000 yen in that year and the previously received amount of 165,444 yen, a sum of 1,861,184 yen, representing the actual amount of stores and a sum of 104,260 yen out of 111,503 yen representing sums to be collected, were adjusted, it followed that there yet remained due a sum of 7,242 yen, and as this was applied to make good a portion of unsettled disbursements, cash amounting to only 120,540 yen has been brought over.

The gross value of stores amounting to 3,820,151 yen is made up of 1,861,184 yen carried over from the previous year's account and the value of stores purchased during the year, amounting to 1,942,234 yen, and also a sum of 16,660 yen, as value of coal left over and a sum of 72 yen, value of remanufactured materials. Of that total 2,435,619 yen, value of materials charged to Construction Fund, Operating Expenses, Investigation Expenses, and the Department of War, and also a sum of 6,073 yen, value of materials included in loss account, that is to say, a total of 2,441,693 yen, has to be deducted, and there remains a sum of 1,378,458 yen to be carried forward to the next year's account. The Fund of 1,800,000 yen was the same as last year. A sum of 15,374 yen, an amount previously received, represents a balance obtained by subtracting from the total of 416,216 yen, made up of a sum of 165,444 yen previously received during the preceding year from the Construction Expenses but carried over to the present year's account without settling the account at all, and a sum of 250,771 yen newly received in advance from the same Expenses, another total of 400,842 yen, made up of 344,550 yen as prices of materials sold and delivered and of 56,291 yen refunded in cash.

A sum of 1,944,345 yen, as value of materials for which prices have already been settled, consists of 1,391,681 yen, price of materials entered in the Operating Fund, and 476,516 yen placed to Construction Expenses, 44 yen to the Investigation Fund, and 76,103 yen to the Department of War. A sum of 491,273 yen, value of materials sold and delivered but not yet paid for, consists of 335,538 yen value of materials in Operating Fund, 155,298 yen to the Construction Fund, 24 yen to the Investigation Fund, and 4.2 yen to the Department of War.

The amount of 6,073 yen, value of materials to be included in loss account, consists of 492 yen representing result of re-appraisal during the present year, and 5,591 yen representing useless stores. Of the foregoing Receipts and Disbursement Account, the clear assets and liabilities at the end of the year stand as follows:—

CREDIT (Liabilities).		YEN.
Amount of the Fund	1,800,000.000	
Amount previously received	15,374.191	
Contractors yet to be paid in cash ...	227,343.289

Cash	162,153.245	
Stores	1,378,458.010	
Purchasers of stores not yet paid in cash	501,103.788	
Contractors not yet paid in cash	1,002.437	
Total	2,042,717.480	

STRAWBERRY FÊTE AT THE PUBLIC HALL.

A very enjoyable afternoon and evening's entertainment was provided on Friday, the 28th, at the Public Hall by the members of the local Circle of King's Daughters and some of their friends. The Hall was metamorphosed into a perfect bower of greenery and flowers with a back-ground and filling of ferns, palms, shrubs and bunting. In the centre of the room was a large circular stall for the sale of flowers in pots, bouquets, and button holes, while in each corner of the room and between the two doors at the back were erected light and artistically designed stalls, decorated in various colours—pink, blue, yellow, red, wreathed or festoons with flowers to match or contrasted in tint. The stalls were well stocked with the luscious fruit which gave the title to the entertainment, cakes, confectioneries, bonbons, and other delicate and tempting sweets, while tea and coffee were dispensed from a stall on one side of the room. The pretty white and coloured frocks of the Daughters contributed to make up a charming scene. The small Hall was also on this occasion made use of and was decorated and furnished as a drawing room, with a gipsy's grotto in one corner, where one's fortunes might be learned from very bewitching gipsies. During the afternoon the Town Band played from the platform and a pretty may pole dance was performed by a dozen tots in white, with little Miss Grosser as the Queen of May, the piano accompaniment being played by Mrs. Manley. During the evening a promenade concert was given by the Orchestra of the U.S. Olympia and proved very enjoyable. The programme was as follows:—

March	La Fiesta	Boncovi.
Overture	Nabuccodonosor	Verdi.
Polka	Les Follies (Solo Cornetto)	Waldteufel.
Waltz	La Serenata Italiana	Jaxone.
Prelude Intermezzo	avallieria Rusticana	Mascagni.
String Quartette	Au bord de la Mer	Dunkler.
Characteristic March	The Vicery	Katzenstein.
Selection	Carmen	Bizet.
Retreat	Patrol Comique	Hindley.
Galop	Time is Money	Strobe.
